Congressional Record

PROCEEDINGS AND DEBATES OF THE 97th CONGRESS, FIRST SESSION

SENATE—*Tuesday, June 2, 1981*

(Legislative day of Monday, June 1, 1981)

The Senate met at 11 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, LL.D., offered the following prayer:

Let us pray.

Almighty God, who inhabits eternity, whose throne is heaven, whose footstool is the Earth; Thou art worthy to receive our worship and praise. We thank Thee for Thy gracious mercy and forgiveness when we fail and sin. We praise Thee for Thy grace which is lavished upon us despite our indifference to Thee, our pride and our preoccupation with self.

We worship Thee. We adore Thee. We glorify Thee. We humble ourselves befor Thee. Worthy art Thou, Lord God of the universe, world without end. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. Under the previous order the majority leader is recognized.

Mr. BAKER. Mr. President, I thank the Chair.

THE SENATE AGENDA

Mr. BAKER. Mr. President, let me briefly outline the day, as I see it at this moment, and then I wish to inquire of the minority leader if we could proceed with certain matters.

I inquire of the Chair: Is there not an order for the Senate to go into executive session for the purpose of considering the nomination of R. Tenney Johnson, of Maryland, with a 1-hour time limitation beginning at 2 p.m. this afternoon?

The PRESIDENT pro tempore. The Senator is correct.

Mr. BAKER. I thank the Chair.

Mr. President, there are a number of items from the Commerce Committee which are on the calendar and which I hope at some point the minority will be in a position to clear so that we could proceed with their consideration. I think all or part of those measures will be considered by the Senate and probably passed by unanimous consent.

But I have submitted that list of several measures, and when the distinguished minority leader can give me an answer on that I shall be grateful for it.

Beyond that, Mr. President, there will be a period for the transaction of morning business which I shall request an order for shortly and then one other matter.

I have also submitted for the consideration of the minority a unanimous-consent agreement that would make provision for a 1½-hour debate on a motion to commit S. 271, a bill to repeal section 222 of the Communications Act of 1934, on which there is a dispute on the jurisdiction to some degree at least between the Commerce Committee and the Judiciary Committee.

What I wish to do, if the distinguished minority leader could clear it, is to enter that order as soon as we can and sequence that immediately after the consideration of the R. Tenney Johnson nomination. And in addition to that I might advise the minority leader that since I believe he has a caucus today of Democratic Members and we have one of Republican Members on a range of important issues, I presently plan to ask consent of the Senate to stand in recess from 12:30 p.m. today until 2 p.m.

I respectfully then inquire of the minority leader what position he may be in to clear nominations for consideration and items on the Calendar of General Orders and consideration of the unanimous-consent request that I have just described.

Mr. ROBERT C. BYRD. Mr. President, the request of the distinguished majority leader will be very carefully considered and I think that I will be in a position to be responsive later today. Once I have an opportunity to discuss these various measures in my conference, I am sure that some of them will be agreeable and that the majority leader may proceed to take them up later today. But at this point I am unable to be more definitive.

Mr. BAKER. I thank the minority leader.

ORDER FOR TRANSACTION OF ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I now ask unanimous consent that following on after the discharge of the time allocated to the two leaders under the standing order there be a period for the transaction of routine morning business to extend not more than 45 minutes in length in which Senators may speak for not more than 5 minutes each.

The PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER OF BUSINESS

Mr. BAKER. Mr. President, I have no further requirement for my time under the standing order and I will be pleased to yield to any Senator or yield it to the distinguished minority leader if he has any need for it.

Mr. ROBERT C. BYRD. Mr. President, I thank the distinguished majority leader. I will not have any need for the time which he very graciously offered to yield.

I will yield such time as the Senator from Wisconsin may require from the time that I have under the order.

Mr. BAKER. Mr. President, before the Senator from Wisconsin begins then, I yield back the remainder of the time allocated to me under the standing order.

RECOGNITION OF THE MINORITY LEADER

The PRESIDENT pro tempore. Under the standing order, the minority leader is recognized.

Mr. ROBERT C. BYRD. Mr. President, I yield to the Senator from Wisconsin.

Mr. PROXMIRE. Mr. President, I thank the distinguished minority leader.

A FEW GOOD MEN FOR THE MARINES

Mr. PROXMIRE. Mr. President, recruiting for the Armed Forces is one of the most essential military functions currently funded by Congress. We need high-quality personnel. And we have an extensive nationwide identification and advertising campaign to reach the pool of eligible potential recruits.

The Marines have a particularly appealing slogan: "We're looking for a few good men."

Well, I can attest to the fact that they are looking hard. Richie Van Sistine is a resident of Hilbert, Wis. And the Marines are avidly after him. They send him recruiting material offering the promise of travel, adventure, excitement,

good pay and benefits, educational assistance programs, and career training.

Now all of this sounds pretty good, and Richie may one day take them up on the offer—or he might not. It is just a little too early to make this decision, since he is only in the second grade and all of 7 years old.

Obviously his name came up on some mailing list used for recruiting, just as the names appeared from the retirement home in Ohio last year. Incidentally, many of Richie's second grade friends also received recruiting literature from the Marine Corps asking if they would be interested in joining the Marine Corps.

Maybe it does not pay to screen these lists more carefully. The additional screening may cost more than the sending of an inappropriate letter.

But it is difficult to tell the recipients that this is the case. It appears simply to be mismanagement, waste, or overkill.

It would seem to me that the military services should tighten up their recruiting lists to the point of at least having a reasonable assurance that the list contains individuals of the right age group.

I am sure that Richie appreciated the mail. But the timing was a little off.

THE FOREIGN CORRUPT PRACTICES ACT

Mr. PROXMIRE. Mr. President, 4 years ago Congress passed a landmark law: The Foreign Corrupt Practices Act.

That act is under the gun now from the Reagan administration supporting S. 708.

Philip B. Heymann, former Assistant Attorney General in charge of the Criminal Division of the Justice Department, recently wrote an analysis of S. 708, published in the Washington Post. Mr. Heymann says:

> S. 708 goes much further than eliminating interpretive problems, ambiguities and confusion for business people and opens the doors for bribery by American companies overseas.

I think it would be a tragedy for the Senate to allow bribery of foreign officials by our companies once again. A review of a recent letter of mine published in the Washington Post will remind the Members of the Senate of the history of the bribery scandal.

I ask unanimous consent that the two Washington Post articles referred to be printed in full in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Washington Post, May 27, 1981]

OPENING DOORS FOR BRIBERY ABROAD

(By Philip B. Heymann)

The Foreign Corrupt Practices Act (discussed on this page in a May 20 article by U.S. trade representative Bill Brock) prohibits American business from bribing officials of foreign governments and is an extraordinary member of the family of post-Watergate laws. On the one hand, its existence is hardly surprising. Practically no politician or businessman will openly defend bribery of officials, even abroad. But on the other hand, it reaches only American businessmen, leaving their foreign competitors to reap the advantages of corruption at our expense. No one really knows how prevalent or necessary bribery is in various countries, because it is carried out secretly everywhere. What it costs us in exports can only be a guess, although it must have real costs. No one really knows whether our efforts to reduce corruption are effective in, and appreciated by, Third World countries. But the response of Egypt, Mexico, Algeria and a dozen other countries suggests there are real benefits.

Against this background, one would expect heated debate about the statute, and we've had that. What has been surprising is that the arguments never address the primary question: whether we should be forbidding our businesses from engaging in forms of corruption open to their foreign rivals. Debate has instead centered on alleged ambiguities of the statute and uncertainties about interpretation for two reasons. This has protected politicians and businessmen from having to defend corruption. And what at first seems like a sensible compromise—allowing bribery only if it is an absolutely necessary defensive response to a situation that would otherwise provide crucial and unfair advantages to foreign competitors—is probably unworkable (for bribery is far more often suspected than seen) and likely to result in damaging our foreign relations by branding buying countries tolerant of corruption and competitors corrupt.

This is the context for hearings last week on S 708, a bill introduced by Sen. John H. Chafee (R-R.I.) to amend the Foreign Corrupt Practices Act to eliminate "interpretive problems," "ambiguities" and "confusion" for business people and regulators. It goes much further and opens the doors for bribery by American companies. The present act is, I think, unduly harsh in holding a company criminally responsible when it has "reason to know" that a foreign national, acting as its agent, intends to bribe to get the business and his commission. Crimes generally require more than a "reason to know" of wrongdoing. But foreign bribes are frequently handled by well-known agent-bagmen and a bill, like S 708, that allows the company to ignore even the clearest indications of prospective bribery in selecting its agent and arranging his commission and funding—so long as it does not affirmatively authorize or openly approve bribery—will do wonders for the business of agents known for bribery. If the statute is to mean anything, the corporation should be responsible, at least for sizable civil penalties, if it recklessly aided or encouraged bribery.

The same gap appears for employees. The bill frees companies from their normal responsibility for acts their employees take on their behalf, so long as the company didn't "authorize" the corruption. Then another provision of S 708 apparently operates as a "catch 22" to immunize the bribing employee if the corporation can't be convicted, although this is less than clear in the present drafting. These immunities cover not only the Foreign Corrupt Practices Act but also any other statutes violated in furtherance of the effort to bribe.

If any danger of prosecution remains, it is reduced by the ambiguous wording of exemptions for payments, unlimited in amount, intended to be a "token of esteem" or to "facilitate" in customary ways performance of official duties. The exemptions should at least be limited in the dollar amounts permitted. And the bill creates a new uncertainty as to whether bribing an official to give a contract he is authorized to award is bribing him to act "in violation of the recipient's legal duty as a public servant."

If there is something to be said for, and against, having a statute like the Foreign Corrupt Practices Act, maybe there is something to be said for having one so full of loopholes that it is half like having an act and half like not having one. But I doubt it. An act full of loopholes will, for a while, reward the more unscrupulous American companies at the expense of the more scrupulous. In the long run, it will turn into little more than the pious homage that vice pays to virtue, and that is how La Rochefoucauld defined hypocrisy.

[From the Washington Post, June 1, 1981]

BRIBERY AND FOREIGN COMPETITION

(By WILLIAM PROXMIRE)

WASHINGTON.—In response to the article by Ambassador Bill Brock headlined "No Wonder No Exports" [op-ed, May 20], what is the ambassador talking about? His own administration has told our banking committee that our exports have been extraordinarily strong. And they have been, ever since 1977. That happens to be the date Congress unanimously passed into law a bill I authored known as the Foreign Corrupt Practices Act.

Congress passed the act in response to a series of scandals involving bribes paid by American corporations that had brought down a friendly democratic government in Japan, deeply embarrassed and almost destroyed the monarchy in the Netherlands, and provided the basis for considerable gains by the Communist Party in Italy. It also followed a thorough investigation by the Securities and Exchange Commission that disclosed that some 450 American companies admitted making more than $300 million in questionable payments. And it followed testimony by Roderick Hills, then chairman of the SEC, that in every industry where bribes were paid, other competing firms had been able to operate successfully without paying bribes.

The law we passed has, according to a GAO study, gone a long way toward preventing bribery by American corporations. It does so by requiring corporations to keep accurate records in reasonable detail of payments of corporate funds. This "paper trail" is essential to prevent the use of slush funds to pay bribes. Sen. John Chafee's bill would gut the accounting provision by requiring adherence to a standard of materiality for corporate financial statements. Former SEC Chairman Harold Williams has argued that this provision would have permitted virtually all of the $300 million in questionable payments admitted by American corporations. Ambassador Brock would go even further than the Chafee bill. He would completely drop all of the accounting requirements in the act and rely on criminal statutes that, of course, do not reach foreign bribery because the actual bribe is paid, in most cases, by foreign agents in foreign countries outside our reach unless a "paper trail" is required. It would be impossible to establish the responsibility of American corporate officials whose slush funds made the bribe possible.

The current law makes the SEC a primary enforcing and administering agency. The SEC's enforcement division under Stanley Sporkin did remarkable work that exposed the bribery scandal and provided the groundwork for the law. It has the expertise, the constant and knowledgeable familiarity with the multinational corporations, essential for effective administration of the Foreign Corrupt Practices Act. Brock recommends we take the SEC out of the act altogether, and hand over the enforcement solely to the Justice Department.

Current law prohibits the payment of bribes, through agents, that executives of the exporting companies knew or had reason to know were being paid to government officials. Mr. Brock would knock out this part of the law and simply prohibit exporting executives from "authorizing or directing" any questionable payments. Talk about an open invitation to putting your executive head into the sand! Obviously, there could

be no prosecution, no matter how flagrant the bribe paid by a foreign agent in behalf of an American company if the American executive didn't formally authorize or direct it.

Mr. Brock favors a change in current law that would permit so-called grease payments to foreign officials as long as the payment is customary in the country where made and the purpose is to facilitate or expedite performance by a foreign official of his official duties. This exception subsumes the whole law. Wholesale bribery of foreign government officials would be sanctioned under the Brock proposal and the Chafee bill even where the statutory law of a nation is violated.

Congress was right in passing the Foreign Corrupt Practices Act in 1977. Experience has shown that the law has curbed bribery without harming export sales. This is not the time to gut the law with the radical changes recommended by Ambassador Brock and Sen. Chafee.

LIFE AFTER THE HOLOCAUST

Mr. PROXMIRE. Mr. President, Rene Molho survived Auschwitz and Dachau and was in the displaced persons camp in Landsberg until November 1945. During that time he suffered severe bouts of depression and terrible nightmares. For a while he toyed with the idea of finding and killing the camp doctor who killed his brother, but when he was given the chance, he could not bring himself to the task.

Molho eventually moved to America, and though he had studied medicine before the war, he obtained employment at Sears, where he remains to this day.

Rene Molho's voice is especially poignant because it speaks of shattered dreams. It tells of a life violently changed, and the bitter effects of those changes on a desperately normal existence. Speaking of a son who hides his Jewish past, he admits that "what Hitler couldn't do to us with killing, he has done." His son is unaware of the torment of his heritage, while Molho knows it all too well.

Molho knows that "the traits of the people who hurt you come into you, and in order to keep it under control you have to be very, very strong." He remembers that when his son would do something wrong, his reaction would often be too harsh, and he would instantly regret it.

Feeling the pain of the victim for so long caused Molho to inevitably inflict that pain upon those he really loved. And he states that "I can't condone violence because I've seen too much of it."

Molho was amazed by the declaration of the United Nations a few years ago that equated Zionism with racism, considering that it is "the body that stands for brotherhood, and logical * * * learned, intelligent people." He wonders whether a little stronger anti-Semitism might be necessary to wake people up, to make them realize the danger.

He feels that the books on the holocaust have been far too mild, and do not contain enough anger: "Americans cannot imagine it, and they do not feel guilty about allowing such slaughter." Molho is most ashamed of the fact that these great crimes were often greeted by silence by most of the world.

The Genocide Convention is a good way to break that silence. It can do nothing to bury the past, but it does address itself to present and future holocausts. It condemns the crime, defines it, and requires punishment for it. Over 80 nations have ratified it, while it has been pending before the Senate for 24 years. The convention has been approved by the American Bar Association, the American Civil Liberties Union, and every American President since Truman.

Testimony on the Jewish holocaust will be around for years. If it ever runs out, let us be sure that we do not have witnesses to a new travesty to continue the story. We must take the time to ratify the Genocide Convention now.

DOMINIC FRINZI, HHI MAN OF THE YEAR

Mr. PROXMIRE. Mr. President, I am pleased to announce that Milwaukee's Dominic Frinzi, was selected by Harness Horseman International as its "Man of the Year" for 1980.

He earned this award not only for his impressive service as two-term President of the Illinois Harness Horsemen's Association but also for his tireless energy, dedication, and enthusiasm with which he long has worked to improve the standards and quality of the sport and its horses.

A top-notch lawyer, Dominic Frinzi has argued in numerous cases which have influenced important judicial decisions dealing with the horse racing industry. And through his dedication, concern and determination, he has earned widespread recognition as a civic leader and activist devoted to the well being of his fellow citizens and the quality of life in his community.

Mr. President, it is with great pride that I offer my most sincere congratulations to Dominic Frinzi as the recipient of this well deserved honor. Wisconsin is indeed proud to be the home of this outstanding individual.

Mr. President, I once again thank the distinguished minority leader and suggest the absence of a quorum.

The PRESIDING OFFICER (Mr. SYMMS). The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, we are now or will shortly be in a period for the transaction of routine morning business to extend not longer than 45 minutes in which Senators may speak for 5 minutes, not more than 5 minutes each, is my recollection. Is that the order which has been entered?

The PRESIDING OFFICER. The Senator is correct.

Mr. BAKER. Mr. President, we have checked our cloakroom for Senators who may wish to speak or transact business during this period, and so far we have not had any takers. Shortly after we are in the period for the transaction of routine morning business I am going to once again suggest the absence of a quorum. But for those who may hear me on the system throughout the Senate wing of the Capitol and the several offices, I will say if we do not have Members here to speak within the next 10 minutes or so, I intend to close morning business and put the Senate in recess until 2 p.m.

I yield the floor at this point so that the Chair may execute the order previously entered.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. Under the previous order, there will now be a period for the transaction of routine morning business for not to exceed 45 minutes during which Senators may speak up to 5 minutes each.

Mr. BAKER. Mr. President, I now suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. BAKER. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONGRESS URGED TO SUPPORT CONTINUATION OF FEDERAL BLACK LUNG BENEFITS PROGRAM

Mr. ROBERT C. BYRD. Mr. President, I have recently received a concurrent resolution adopted by the West Virginia Legislature. I ask unanimous consent that House Concurrent Resolution No. 21, a resolution memorializing the Congress of the United States to support the continuation of the Federal black lung benefits program, be printed in the RECORD.

There being no objection, the concurrent resolution was ordered to be printed in the RECORD, as follows:

HOUSE CONCURRENT RESOLUTION NO. 21

Whereas, The people of West Virginia support continuation of the federal black lung benefits program which requires coal industry employers to compensate employees who are inflicted with disabling pulmonary and respiratory diseases caused by years of coal mine employment.

Whereas, The production of American coal, and its energy derivatives, is central to all feasible plans to make the Nation secure and independent of foreign sources of energy and all possible domination by foreign governments over our national economic and political stability; and

Whereas, The production of coal sufficient to so secure the Nation will cause present and future coal workers to suffer the same dreaded diseases now compensated by coal industry employers as a result of the federal black lung benefits program; and

Whereas, The infliction of disabling pulmonary and respiratory diseases upon present and future coal workers will rob them of the physical comfort and dignity and the financial security which is enjoyed by other American workers in the mature years of their employment and in the golden years of their lives, ending so many before their time; and

Whereas, Those coal workers deserve to

share equally with other American workers in the Nation's well-established commitment to make dignified and to make secure those years which follow the lifetime of dedicated service to the Nation by working Americans; therefore, be it

Resolved by the Legislature of West Virginia: That the Congress of the United States be requested to continue in full force and effect the federal black lung benefit program; and, be it

Further Resolved, That the Clerk of the House of Delegates is hereby directed to forward a copy of this resolution to the President of the United States, United States Senators Robert C. Byrd and Jennings Randolph, the West Virginia Delegation in the House of Representatives and the presiding officers of the legislatures of the coal producing states.

RELOCATION TAX DEDUCTION

Mr. STEVENS. Mr. President, on February 24, I introduced S. 565 which would raise the Federal income tax deduction for the sale and purchase of a home when an individual moves for business reasons. S. 565 tied the deduction to the maximum Federal reimbursement for such moves, which is currently $12,000.

While the Treasury Department recognized the severe problems the current limit causes, they voiced their opposition to S. 565 as they felt the bill was excessively costly, in addition to the fact that it introduced a new mechanism to increase the deductible limit. The Department, though, offered various alternatives to alleviate the hardship. One alternative I introduced on May 6, S. 1130, would raise the deductible limit for househunting and temporary living expenses from $1,500 to $5,000—$15,000 for foreign moves—and it would raise the limit for the sale and purchase of a home from $3,000 to $10,000—$20,000 for foreign moves. S. 1130 would also provide that expenses for househunting and temporary living will not count against the larger amount for the sale and purchase of a home. The $5,000/$15,000 and $10,000/$20,000 figures would be phased-in over the next 3 years.

I feel very strongly that this legislation must be passed. If we are to increase productivity in our country, we must enhance the movement of people from areas of labor supply to areas of labor demand. The present deductible limit on business-related moves inhibits productivity and the flow of people seeking new employment is restrained.

I have received many letters supporting this legislation from individuals and businesses who desperately seek tax relief. One such letter comes from McDonald's Corp., and I ask. Mr. President, that it be printed in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

McDONALD'S CORP.,
Oak Brook, Ill., April 30, 1981.

Re: Proposed Bill S. 565.

Sen. TED STEVENS,
Senate Office Building,
Washington, D.C.

SENATOR STEVENS: I would like to sincerely thank you for your understanding of the relocation tax problem facing our corporation as well as several hundred other corporations.

McDonald's Corporation typically relocates 350–400 employees all around the country each year and this bill would certainly provide some long sought tax relief.

I am sure that you have heard the phrase "relocation is no longer a benefit but should be viewed by corporations as a cost of doing business." This is fact and relocations are unavoidable; we look forward to a much needed legislative remedy.

Cordially,

RITA ALBOREZ-POZNIAK,
McDonald's Corporation,
E.R.C. Board of Directors.

ORDER FOR RECESS UNTIL 2 P.M.

Mr. BAKER. Mr. President, about 15 minutes ago I announced that if there were no further morning business to be transacted that it was my intention to ask the Chair to close morning business and put the Senate in recess.

I now ask unanimous consent that, at the conclusion of the period for the transaction of routine morning business, the Senate stand in recess until the hour of 2 p.m. today.

The PRESIDING OFFICER. Without objection, it is so ordered.

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

RECESS UNTIL 2 P.M.

The PRESIDING OFFICER. Under the previous order, the Senate stands in recess until 2 p.m.

The Senate, at 11:35 a.m., recessed until 2 p.m.; whereupon the Senate reassembled when called to order by the Presiding Officer (Mr. NICKLES).

EXECUTIVE SESSION

NOMINATION OF R. TENNEY JOHNSON, OF MARYLAND, TO BE GENERAL COUNSEL OF THE DEPARTMENT OF ENERGY

The PRESIDING OFFICER. Under the previous order, the hour of 2 p.m. having arrived, the Senate will go into executive session and proceed to the consideration of the nomination of R. Tenney Johnson to be General Counsel of the Department of Energy. The clerk will report the nomination.

The assistant legislative clerk read the nomination of R. Tenney Johnson, of Maryland, to be General Counsel of the Department of Energy.

The PRESIDING OFFICER. Time for debate on this nomination is limited to 1 hour to be equally divided and controlled by the Senator from Idaho (Mr. MCCLURE) and the Senator from West Virginia (Mr. ROBERT C. BYRD) or their designees.

The Senate proceeded to consider the nomination.

Mr. McCLURE. Mr. President, I suggest the absence of a quorum, and that the time be equally charged to both sides.

The PRESIDING OFFICER. Without objection, it is so ordered. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. McCLURE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCLURE. Mr. President, I rise in strong support of the President's nomination of R. Tenney Johnson to be General Counsel of the Department of Energy. Mr. Johnson is completely qualified for the position of General Counsel, and he is a public servant with the highest of personal integrity. I want to state at the very outset of this debate, that my support for the Johnson nomination is complete, categorical and totally without any doubt or reservation.

Mr. President, the Committee on Energy and Natural Resources by a vote of 18 to 0 on May 12 reported favorably the Johnson nomination. Mr. Johnson was nominated on March 19, 1981, and he appeared before the committee on two occasions. First, he presented prepared testimony at the nomination hearing on April 8. After the first hearing, the committee at the request of the Senator from Ohio (Mr. METZENBAUM), recalled Mr. Johnson to a second nomination hearing on April 30 to answer questions about various matters. These matters related to the nominee's activities as a consultant at the Department of Energy, pending his formal nomination and confirmation. I will discuss these matters at length later in my remarks. Mr. Johnson responded to oral questions at the hearings and also provided a number of responses to questions for the record from committee members.

During these proceedings, Mr. Johnson also supplied the committee with the information statement and financial disclosure report required by the committee rules. He has agreed to divest himself of two small holdings in energy companies, as required by the Department of Energy Organization Act. He also has agreed to recuse himself in matters affecting former clients he served as a private attorney, using the standard recusal. In all respects, Mr. Johnson has been responsive completely to the Committee's requests and requirements, and those requests and requirements have been satisfied fully.

Mr. President, the action and responses of Mr. Johnson during the committee's confirmation proceedings undoubtedly led in part to the committee vote of 18 to 0 on May 12 to report favorably his nomination to the Senate. Perhaps even more persuasive, however, in the committee's consideration of this nomination were the significant qualifications and integrity of Tenney Johnson for the position of DOE General Counsel. Mr. Johnson clearly has been one of the finest, most able general counsels in the Federal service during my service in the Congress. I recall that when Secretary Edwards first mentioned

to me in private that he was considering Mr. Johnson for the general counsel position, my staff responded that Mr. Johnson was the finest general counsel known to them and certainly the perfect choice to be the Secretary's primary legal advisor. I urged the Secretary to submit Mr. Johnson's name to the White House, and thereafter I and many others in the Senate supported his selection by the President. Our support then, as now, was premised directly on his qualifications and integrity.

Mr. President, Mr. Johnson has been a lawyer for 22 years. Most of those years have been spent in the Federal service. Thirteen years have been spent as General Counsel or Deputy General Counsel of five major agencies. He began his career in 1959 as a lawyer in the General Counsel's Office at the Defense Department. In 1963, he became deputy general counsel of the Army and in 1967 deputy general counsel of the new Department of Transportation. He was appointed general counsel of the Civil Aeronautics Board in 1970, general counsel of NASA in 1973, and the first general counsel of the Energy Research and Development Administration in 1975, a predecessor agency of DOE.

The next year, Mr. Johnson was confirmed by the Senate as a President Ford appointee to be a member of the Civil Aeronautics Board. Upon expiration of his term, he spent the summer of 1977 working with Dr. Schlesinger and the Carter administration's Office of Management and Budget planning the organizational structure of the new Department of Energy, while Congress considered the DOE Organization Act legislation. Upon establishment of the Department, Mr. Johnson resigned from the Federal service and engaged in the private practice of law as a partner in a Washington firm until accepting the current nomination.

These many years of experience form the basis for Mr. Johnson's qualifications for this nomination. He articulately restated that experience in the following excerpt from his own prepared statement to the committee, which appears on page 8 of the April 30 hearing volume:

I believe that the principal area of my expertise and experience is advising heads of Federal agencies on the proper and lawful conduct of all aspects of their responsibilities as they develop and advocate their policies, administer their programs, and work with the Congress and the Administration. I have managed several large government law offices. While I consider myself a "generalist", I have nevertheless concentrated in certain areas of law such as regulatory and administrative practice and government contracting. I have some experience in regulation of the air transportation industry. My main experience has been with agencies whose major activities involve "high technology" and research and development. In many ways my work as General Counsel of the Energy Research and Development Administration was a culmination of the various elements of my prior career in the Federal Government. These form the basis, I believe, for my principal qualification to be General Counsel of the Department of Energy.

The General Counsel is the chief law officer of the Department and the principal legal advisor to the Secretary and the various Secretarial officers. This is, to be sure, a key role. However, as I see the role, the General Counsel is not primarily a policy-maker, but rather a contributor and facilitator, and a provider of an independent (and I hope, objective) point of view.

In addition to his unquestioned experience for the position of general counsel, I believe that Mr. Johnson's philosophy of reducing economic regulation, supporting technology development, and streamlining Federal licensing of energy facilities is consistent completely with the President's program and the obvious mood and direction of this Congress and the country. Mr. Johnson emphasized these principles in his prepared statement, at pages 9 and 10 of the hearing volume:

I believe that a shift in the Department's focus away from regulation and towards research and development is very much in the national interest. When I was a member of the Civil Aeronautics Board in 1976 and 1977, I vigorously supported its move toward lessening economic regulation of the air transportation industry. I believe that the free market will serve as a more efficient allocator of resources, will more surely set relative values for society's choices, and will be more responsive to changing circumstances, than centralized regulation, with its legalities, slow-moving procedures, insufficient current information base, and inadequacies of individual decisionmakers operating under these constraints.

At the same time, I believe there is a crucial role for the Federal Government to play in supporting and performing high-risk research and development in all forms of energy. This is a formidable management task. Not the least of the challenges is assuring that high technology will be successfully transferred from the laboratory to the commercial marketplace. In addition, the Federal Government needs a focus for energy planning, international activity in energy, development and production of nuclear weapons, and management of a strategic reserve for petroleum.

There are several important roles for lawyers in the Department of Energy. One, for example, is in the area of creating a more rational process for planning, siting, and licensing energy production centers. The procedures which we have cumulatively adopted at all levels in our nation are almost impossibly complicated, repetitive, and overwhelmingly negative in effect. I believe we should examine thoroughly and afresh the cumulative burden we have imposed on ourselves. Together with our colleagues in the states and localities, we should review our Federal, state, and local procedures so that all appropriate information needed at each stage of the process can be identified and considered by all necessary decisionmakers and the appropriate decision clearly made, so that all can then move on to the next stage. It is not a matter of creating a steamroller, but rather a more rational, understandable, and open procedure in which all points of view can be effectively considered and acted upon in accordance with their merits. This is of course not an easy, nor a short-term job. But it is a task which "can-do" lawyers should find challenging and worth doing. I would like to include myself in their ranks.

These are exactly the positions that the President, the Secretary of Energy and a majority of Americans now support.

Mr. President, I want to emphasize the fact that the Senate previously confirmed Mr. Johnson for the CAB. There were no problems with that confirmation. Mr. Johnson has served as the chief legal officer or the deputy chief legal officer in five separate major agencies—the Department of the Army, the Department of Transportation, the CAB, NASA, and ERDA, as well as the chief legal officer in the team that established the Department of Energy. As he himself so eloquently states it:

The principal area of my expertise and experience is advising heads of Federal agencies on the proper and lawful conduct of all aspects of their responsibilities as they develop and advocate their policies, administer their programs, and work with the Congress and the Administration.

What more fitting and critical qualification could any nominee have for the position of DOE General Counsel? I believe there could be none more fitting and critical at this most challenging time in our energy and economic history. The Administration and this country need such well-qualified men for our top public service positions. None could be better qualified than Tenney Johnson, and obviously my committee came to the same conclusion in voting to report his nomination by 18 to 0.

Mr. President, I am saddened to say at this point that the primary purpose for this debate on the Johnson nomination under the unanimous consent agreement is not focus exclusively on Mr. Johnson's excellent qualifications and high integrity. Rather, one member of the committee and the Senate, my good friend the Senator from Ohio (Mr. METZENBAUM), apparently has some continuing concerns about Mr. Johnson's activities as a consultant to the Secretary of Energy, pending his nomination and confirmation as General Counsel.

As I stated earlier, the committee recalled Mr. Johnson on April 30, 1981, in order that the Senator from Ohio could question the nominee in detail about these matters. Mr. Johnson was questioned for approximately an hour and one half by the Senator from Ohio at that hearing. Because of a number of allegations of possible misconduct which arose in that hearing, and my conviction that the DOE General Counsel had to be free totally of such alleged, possible misconduct, I commissioned a full review of all available information relating to the allegations.

The review included the March 11, 1981, hearing of the Subcommittee on Environment, Energy, and Natural Resources of the House Government Operations Committee, which included DOE officials testifying under oath and addressed most of the matters raised in the April 30 hearing. The review also included the same subcommittee's hearing of March 25, 1981, at which Mr. Johnson testified under oath extensively on the same matters. Additionally, I asked Mr. Johnson to clarify and amplify in detail his April 30 testimony in a series of questions, which appear at pages 128 to 134 of the hearing volume. Subse-

quently, I requested and received a statement from 10 senior DOE officials familiar with these matters regarding the accuracy of Mr. Johnson's testimony, contained in a letter of June 1, 1981, from DOE Acting General Counsel Eric J. Fygi. I also requested that Mr. Johnson in a sworn statement directly respond to the allegations. I have received that statement as transmitted by his letter of June 1, 1981. I also directed the committee staff to interview two lawyers representing the American Petroleum Institute, who were identified in the April 30 hearing, regarding the accuracy and completeness of Mr. Johnson's testimony. Finally, I requested that the White House Legal Counsel interview an Office of Management and Budget official, who was identified in the April 30 hearing, as to the accuracy and completeness of Mr. Johnson's testimony.

Mr. President, my extensive review of the full record in the Energy and Natural Resources Committee, the record of the two hearings in the House Government Operations Subcommittee, and the subsequent statements of everyone identified as related to these matters leads to a categorical conclusion—any suggestion that Mr. Johnson committed any impropriety during his consultancy at DOE is wholly without any basis in fact. The accuracy and completeness of Mr. Johnson's testimony before the Energy and Natural Resources Committee have been corroborated independently by all identified individuals and information, including the 10 DOE officials in the Fygi letter, by the OMB official and the two private lawyers in the respective interviews, and by the record of the House subcommittee with Mr. Johnson and DOE officials testifying under oath.

There is no contradictory evidence in any of these proceedings which would support a contrary conclusion. Consequently, I have concluded without any doubt or reservation that Tenney Johnson has not committed any impropriety and further, that his integrity remains of the highest caliber.

Mr. President, I ask unanimous consent that Mr. Johnson's letter of June 1 and Mr. Fygi's letter of June 1 be printed in the RECORD at this point.

There being no objection, the letters were ordered to be printed in the RECORD, as follows:

R. TENNEY JOHNSON,
Washington, D.C., June 1, 1981.

Hon. JAMES A. MCCLURE,
Chairman, Committee on Energy and Natural Resources, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: As requested by the Chief Counsel of the Committee, I have reviewed the hearing record and prepared answers to the allegations about my conduct as a consultant to the Secretary to amplify the response which I made at the hearing and the replies made to your written questions.

These answers are attached. I have sworn to them under oath before a notary public.

I appreciate the care and attention given to this nomination.

Sincerely,

R. TENNEY JOHNSON.

AFFIDAVIT

District of Columbia.

R. Tenney Johnson, being duly sworn, hereby states that he has prepared and signed the attached narrative Allegations and Answers and that the information provided therein is, to the best of his knowledge and belief, current, accurate, and complete.

R. TENNEY JOHNSON.

Subscribed and sworn before me this 1st day of June, 1981.

CHERYL D. ARRINGTON,
Notary Public.

My Commission Expires November 14, 1984.

Allegation: It has been implied that I advocated opening an existing contract with the University of California to competition, so that my private energy company clients could bid for the work.

Answer: The facts are completely to the contrary. I did not advocate opening the contract for competition. As I testified, I did not participate in any discussions or decisions with the Department on whether to extend the contract or open it up for competition. My only role, as I testified, was to recommend, in response to questions from Departmental officials, that the Department negotiate a draft extension of the existing contract with the University of California before deciding whether to extend the contract or open it up to competition. As I testified, the basis of the recommendation was to give the Department a better bargaining position vis-a-vis the University than it would have by delaying the negotiation until the University knew it was in a sole source position.

Thus, I did not use my consultant position in any way to advance the interests of my private clients or to enable them to bid on this or any other contract.

My involvement in this matter began when I met with attorneys from the Office of General Counsel and officials from the Office of Procurement, at their request, to discuss the contract with the University of California for managing several DOE laboratories. This contract is scheduled to expire in 1981. The DOE procurement procedure calls for a formal process under which the Department would review the contract and determine whether to extend it or to open it up for competition. A special panel of DOE employees would be appointed for this process, and the entire procedure would take several months to complete. Under business-as-usual procedure, negotiations with the University would be undertaken only after this process produced a decision to extend the contract. It was desirable, however, according to DOE management officials, that the Department be able to sign a contract with the University at an earlier date than the business-as-usual procedure would allow. The question was whether the Secretary should exercise the power he had to waive the normal procedure so as to enable a faster resolution of the contract issue.

I stated that in my opinion the Government would have a weaker bargaining position under the normal process than if it negotiated a sample contract with the University before the University knew it would be in a sole source position. The internal review procedure for deciding whether to extend or compete should proceed, I said, in the usual way, and the sample contact would be signed with the University only if that procedure ended with a decision to extend.

Thus, no additional time for negotiation would be required if this decision were to be made. On the other hand, as I testified, if the decision were to open the contract to competition, the Department would not be locked in to the sample contract. While this is not a procedure technique I would recommend in every case, it was, in my judgment, lawful, appropriate to the circumstances, and in the best interest of the government.

The attorneys and management officials considered this advice and eventually prepared and coordinated a document seeking the Secretary's approval for proceeding in this fashion. When the Acting Under Secretary submitted this document to the Secretary, the Executive Secretary referred it to me for comment. I added a note indicating my involvement in the development of the concept reflected in the document and recommending approval. This completed my participation in the matter.

I did not participate either in the negotiation with the University of California or in the review by the DOE panel on whether to extend or complete the contract. (I have subsequently learned that the panel recently recommended extending the contract.) I would add that the recommendation to the Secretary was made by the appropriate Departmental officials and was concurred in as lawful by the appropriate legal officers.

None of my actions in this matter were intended, nor can be fairly construed, to benefit my private clients.

Allegation: It has been claimed that I participated in drafting questions to be used in a Congressional hearing to "destroy" a witness in that hearing.

Answer: This is untrue. As I testified, I was requested by the then Special Assistant to the Secretary to work with career officials of the Department in drafting questions requested by the staff of a member of a Congressional Subcomimttee that was scheduled to hear the former Special Counsel testify the following day. I assisted in preparing questions which could be answered in a straightforward, professional, factual way.

In doing so, I took pains to assure that none of the questions or answers would tend to embarrass or discredit the witness. Those present at the meeting can attest to my care in this regard. The answers, however, would provide a factual and fair perspective necessary for a balanced evaluation of the witness's testimony.

The questions, which have been introduced into the hearing record, speak for themselves. In no way would answering them factually tend to "destroy" the witness. I would deplore any attempt to haze any witness or distort or mispresent previous statements by any witness. I have never done so, and I would not be a party to any effort to do so.

Responding to the Special Assistant's request to assist was within the scope of my duties as a consultant to the Secretary. The questions were written, and provided to the Congressman whose staff asked for them, by career officials of the Department.

Allegation: It has been claimed that I directed a change to be made in a budget narrative on the enforcement budget proposal and thereby exceeded my authority as a consultant.

Answer: It is not true that I directed any specific change. The Acting Administrator of the Economic Regulatory Administration asked me to meet with him and others and, among other things, to read a draft justification of the budget request for the Office of Special Counsel.

After scanning it, I stated, as I have testified twice under oath, that the draft narrative, as read by me, contained implications that were inconsistent with the Secretary's policy. Specifically, the implications were that the Department would never press charges based on pricing violations alleged to total $7 billion and that oil companies

could therefore in due course expect to be relieved of those charges. The Secretary's policy, on the other hand, was that the charges would be pursued as necessary to enforce the law—if not immediately because of budgetary restrictions, then later—and that no amnesty for violators of the regulations would be granted.

I therefore suggested that the draft should be changed to be accurate and positive. The Acting Administrator agreed with my assessment and directed that the narrative be changed, as acknowledged in the memorandum from the Acting Special Counsel that was introduced in the hearing record. Making suggestions in response to requests from career officials was within my proper role as a consultant to the Secretary and consistent with the duties he has asked me to perform as such.

Allegation: It has been claimed that I exceeded my proper role as a consultant by "interjecting" myself in the Department's consideration of the V-factor rule and "initiating" a review of the rule.

Answer: My actions and advice with regard to the V-factor rule were well within my proper duties as a consultant. As I testified, and stated in reply to Chairman McClure's written questions, I informed myself about the rule and about the discussions that took place between Departmental attorneys and the Office of Legal Counsel, Department of Justice. I discussed the rule in general terms with the Secretary. I suggested, on my own initiative, that the Department review the rule, knowing that conducting such a review would be approved by the Secretary and would be consistent with the sentiments of the OMB task force on regulatory review. I made suggestions in drafting of the Department's Notice of Intent to Review. These suggestions were based on the concept that the review would be in good faith, with no preconceptions.

However, the actual drafting was performed by the appropriate career officials, the Notice of Intent was coordinated within the Department in the normal way, and the Notice was signed and promulgated by the Acting General Counsel.

The V-factor rule was a major action by the previous Administration taken only four days before it left office. Informing myself about it and making the suggestion that it should be reviewed by the new Administration were within my duties as an advisor to the new Secretary. However, I did not direct that a review be made. As a consultant, I could not take any official action on behalf of the Department or direct that any such action be taken, and I did not do so.

Allegation: It has been claimed that I "violated my oath of office as a lawyer to keep matters confidential" and committed an illegal act by acknowledging to an attorney representing the American Petroleum Institute that the Department was working on the V-factor rule and stating that it expected to publish something the following day.

Answer: I did not violate any oath of confidentiality or any standard of conduct for lawyers or special government employees by making these statements. As I testified, I communicated nothing of substance in my conversation with the attorney. There was no way the attorney could glean what the Department was actually going to do from among the range of options available to it. He learned nothing that he did not already know from other sources.

I answered a telephone call on Thursday, February 19, 1981 from an attorney representing the American Petroleum Institute. As I testified, he stated that he was aware that the Department was working on the V-factor rule and asked if he could have a copy when it was ready. (I did not know where he obtained this information. It is possible that he received it from officials of the Office of Management and Budget who were aware that the Department was considering what to do about the V-factor rule. As indicated in my answer to Chairman McClure's written questions in the hearings record, there had been considerable discussion between these officials and Departmental attorneys about the legal status of the rule. It has been reported that the American Petroleum Institute had urged the Office of Management and Budget to have the V-factor rule revoked.)

In any event, I acknowledged, as I testified, that the Department was working on it and hoped to have it finished the following day, Friday. He asked for a copy. I said he could have it after it was executed, as this was the standard procedure. He did not ask for an advance copy, nor did I promise or give him one.

He called my office the next day, as indicated in my phone log, offering to send a messenger to obtain the copy of the Department's publication. It was not ready, however, and I so informed my secretary. She referred him to the Office of Public Affairs. I had no further conversation with him.

The fact that I acknowledged what he already knew—namely, that the Department was working on the V-factor rule—did not amount to giving him advance notice of what the Department was going to do. The Department had a whole range of options—from announcing that the rule was reaffirmed upon review to opening a new rule-making proposing to revoke the rule. This range of possibilities could be inferred by anyone familiar with the circumstances. I did not indicate which option the Department would select (namely, to announce that the rule was in effect but under review). Thus, the information I provided was not substantive, and I violated no lawyer's pledge of confidentiality, and committed no impropriety or illegality.

Allegation: It has been claimed that I generally exceeded the role of a consultant in that I made suggestions which career officials had to accept because I was the President's nominee to be General Counsel of the Department.

Answer: In fact, I have been very careful to stay within the role of a consultant. I am familiar with the guidelines on the proper functions of consultants that have been issued by the Office of Management and Budget and the Office of Personnel Management, as well as the official standards of conduct for special government employees. I have exercised no statutory authority, decided no issue of policy, issued no binding guidance, made no public statements on behalf of the Department, or behaved in any way in the role for which I am nominated. As I have testified under oath before two committees of Congress, I have consistently stated in meetings with Departmental personnel and outside groups that I am a consultant, and not exercising line authority. No one has been in any doubt as to my status. If my comments and suggestions have been acted upon, it has been because of their merits, as viewed by the official acting on them. My comments have not been considered directive in nature, and occasionally have not been adopted because better solutions were found.

The Secretary asked me to help him at the very beginning of his service. It is at the outset that the demands on a new Secretary are the heaviest, and the Secretary is most in need of advice. It was on this basis that I agreed to assist him as a consultant, rather than wait for the clearance and confirmation process to be completed.

DEPARTMENT OF ENERGY,
Washington, D.C., June 1, 1981.

Hon. JAMES A. MCCLURE,
Chairman, Committee on Energy and Natural Resources, U.S. Senate, Washington, D.C.

DEAR MR. CHAIRMAN: I am responding to Mr. Trabrandt's request that departmental officials personally familiar with the functions performed since January 20, 1981 by Mr. R. Tenney Johnson examine the record developed by the Committee in connection with Mr. Johnson's nomination to be General Counsel of the Department.

Mr. Trabrandt has requested that individuals personally familiar with five general areas of Mr. Johnson's activity with the Department examine the Committee's record of his nomination. In addition to myself, those officials are:

Barton R. House, Acting Administrator, Economic Regulatory Administration.

Hilary J. Rauch, Director of Procurement and Assistance Management.

William V. Vitale, Executive Secretary.

Avrom Landesman, Acting Special Counsel for Compliance.

Carl Corrallo, Solicitor to the Special Counsel for Compliance.

Thomas C. Newkirk, Deputy General Counsel for Regulation.

William F. Funk, Assistant General Counsel for Petroleum Regulation.

Leonard Rawicz, Assistant General Counsel for Procurement and Financial Incentives.

Robert L. Forst, Attorney Adviser, Office of the Assistant General Counsel for Procurement and Financial Incentives.

Each of these individuals has authorized me to state that he has examined personally the Committee's printed record of Mr. Johnson's confirmation hearings, and that each of these officials believes the responses given by Mr. Johnson as to matters about which those individuals have personal knowledge are entirely true and accurate. The five matters on which Mr. Trabrandt requested our views are described more particularly below.

THE BUDGET NARRATIVE ISSUE

I was present at the March 3 meeting to which Senator Metzenbaum adverted, along with Messrs. House, Landesman, Corrallo, and Newkirk. Each of our general recollections corresponds with what Mr. Johnson stated as to this matter to the Committee. More particularly, however, I recall that when I examined the draft narrative during this meeting (which was the first occasion on which I had reviewed this document), both I and Mr. House expressed the view that the language chosen was inappropriate in that it did not correspond to what such documents typically are designed to convey. Narratives accompanying any Administration's budget proposals do not speculate as to what a particular funding request will not permit an agency to accomplish, but rather seek to explain the activities that will be accomplished with the money sought. The reservation as to the manner in which the proposed document had been drafted did not originate only with Mr. Johnson, but rather were also expressed contemporaneously by myself and Mr. House as we all examined the document in question.

THE V-FACTOR RULE

I am familiar with this matter, and in fact executed the *Federal Register* notice that announced the intention to conduct a review of several departmental rulemakings, including the retroactive amendment to the V-Factor rule. In addition, Messrs. Newkirk, Funk and Corrallo are familiar with this matter. Our recollections all agree with the

statements made by Mr. Johnson to the Committee as to the character and degree of his involvement in this activity.

While Mr. Johnson has advised the Committee of his involvement in the Department's decision to review this rulemaking, this involvement did not precipiate the Department's concern, after January 29, 1981, with the V-Factor rule. To the contrary, the Department's scrutiny of the rule arose out of predictable issues involving the effect on that rule of the President's memorandum of January 29, 1981 entitled "Postponement of Pending Regulations." Quite apart from and prior to Mr. Johnson's role in familiarizing himself with the rule and his ultimate suggestion that it be reviewed, officals of the Office of Management and Budget charged with carrying out the President's memorandum, as well as representatives of private firms and the media, had contacted me, Mr. Newkirk or Mr. Funk as to this matter. The thrust of these initial inquiries bore upon the question of whether the rule itself fell within the scope of the memorandum which instructed federal regulatory agencies to postpone for 60 days the effectiveness of all final rules otherwise scheduled to become effective within 60 days from the date of the memorandum. The Office of General Counsel of this Department was requested by OMB to examine carefully the rule to determine whether, as a matter of law, it fell within the terms of the President's memorandum and therefore was required to have its effective date postponed.

The result of this scrutiny was the legal determination, to which I adhered and which corresponded with the views of the Department of Justice, that the V-Factor rule did not as a matter of law fall within the terms of the President's memorandum. Having concluded that, however, we also determined that it would be appropriate (and, indeed, entirely predictable in the normal course of events) that this rule should be evaluated carefully by senior individuals of the incoming Administration. The notice ultimately adopted by the Department was intended, among other things, authoritatively to dispel doubts as to the rule's current legal status in view of the President's memorandum, to inform the public that it along with several other rules would be reviewed, to state the logical truism that those compliance actions under any of the rules being reviewed would themselves by necessity be examined as well, and to state authoritatively that no decision on the merits of these rules had yet been made by the incoming Administration.

Some of the questions put to Mr. Johnson suggest that he acted as an intermeddler in this matter, and that the commitment to review the rule is in reality a commitment on Mr. Johnson's part to urge its revocation. None of Mr. Johnson's conduct as to this matter that I have observed suggests anything of the kind. The statements he has made to the Committee describing his role in this matter are entirely consistent with his statements and conduct, including private discussions, on every occasion that this matter was considered. The related legal and policy considerations inherent in this rule involve precisely the type of advice that a consultant with Mr. Johnson's skills and experience would be expected to provide to the Secretary, and on the Secretary's behalf render to the senior professional staff of the Department.

Finally Senator Metzenbaum suggested in the record that Mr. Johnson committed an impropriety by acknowledging during a telephone conversation with a private attorney that some, unspecified action addressing the V-Factor rule was imminent. Mr. Johnson testified before the Committee that during this conversation he gave no information as to the substance of the Department's contemplated action, but provided only an estimate of when the document by which the Department acted would be available to the public. The fact that some action was under way with respect to that rule already was widespread knowledge, and in these circumstances providing advice as to anticipated timing of availability of a decision was an ordinary courtesy, similar to the practice observed by many courts and administrative agencies. Any suggestion of an impropriety on Mr. Johnson's part by reason of his having provided an estimate of when the Federal Register notice covering the V-Factor rule would be available to the public is without merit. Messrs. Landesman, Corrallo, Newkirk and Funk join me in this conclusion.

GENERAL ACTIVITIES

As Acting General Counsel, I am familiar with the general activities performed by Mr. Johnson for the Secretary, as we have exchanged advice and information on a routine basis since the advent of his service as a consultant. In this connection, I should add that there has been a wide array of matters concluded with frequency by this office on which I have not felt it necessary to seek Mr. Johnson's advice. Messrs. Newkirk and Funk of this office, as well as Mr. William V. Vitale, Executive Secretary of the Department, are as well familiar with the character and scope of Mr. Johnson's general activities during his service as a consultant for the Secretary.

In this connection, some of the questions put by Senator Metzenbaum to Mr. Johnson suggest that it was somehow improper for a consultant in Mr. Johnson's position to participate in the official business of the Department. Any such implication is incorrect as a matter of law. Mr. Johnson's consultancy is not that of a private contractor, but rather during his days of service with the Department he is a special government employee, a type of employment status expressly recognized by statute.

Mr. Johnson's areas of expertise, as reflected in the character and duration of his prior federal service, are in the disciplines of administrative law, public contract law, and the mixed questions of law and policy that are peculiar to one who is an experienced legal adviser to an agency head. The character of Mr. Johnson's service as a consultant has involved providing advice to the Secretary that is consistent with his skills and experience, and making himself available to the senior professional staff of the Department to provide them his understanding of the Secretary's general policies so that those officials' actions would properly reflect such policies.

Mr. Johnson has, however, refrained assiduously from conducting himself in a manner beyond this role, and has exercised himself no line, command, or delegated legal authority that otherwise would be wielded by the General Counsel or any other confirmed official. In addition, he has reviewed, with a view to providing the Secretary advice, certain classes of documents transmitted to the Secretary through Mr. Vitale's office, so that the Secretary and his immediate staff may have the benefit of Mr. Johnson's advice when acting upon such documents. Such a function corresponds exactly to the duties that such a consultant is in a position to perform, and corresponds as well to the actual requests for advice made by the Secretary and his immediate staff.

UNIVERSITY OF CALIFORNIA CONTRACTS

While I am not personally familiar with this matter, Messrs. Rauch, Rawicz and Forst are personally familiar with Mr. Johnson's advice as to this contract activity. They have authorized me to state that they concur with the accuracy of Mr. Johnson's response to the Committee as to this matter, and particularly that they confirm that Mr. Johnson's advice was sought and received as to a tactical question involving only the sequence of the necessary steps that should occur.

More particularly, the contracts with the University of California under which some of this Department's weapons research activities are carried out expire September 30, 1982. The thrust of Mr. Johnson's advice was to recommend that the negotiation with the University of California of contract terms commence in advance of a formal determination as to whether to extend the contracts or to compete them afresh. Mr. Johnson's advice that contract negotiations begin while noncompetitive extension had yet to be decided was designed to further the obvious interests and bargaining position of the government, and from what I know of this matter had the question been put to me I would have provided the very same advice. As a parenthetical observation, the methodology suggested by Mr. Johnson violates no principle of public contract law, particularly when one takes into account the peculiar character of weapons laboratory contracts and the special nature of the authority under the Atomic Energy Act that they are designed to further.

MEETING SUNDAY, FEBRUARY 22, 1981

I attended this meeting, along with Messrs. House, Landesman, and other regulatory and compliance officials of the Department. The meeting was conducted in response to requests communicated to the Department the preceding Friday that departmental officials be prepared by Monday morning to brief two members of the Subcommittee on Environment, Energy and Natural Resources of the House Government Operations Committee. One of the members had requested that the Department be in a position to provide that member questions and answers that would assist the member in preparing for the hearing. In this connection, I had been asked by the then Special Assistant to the Secretary to conduct this briefing.

At no time during this meeting (or, for that matter, at any other time) did Mr. Johnson express any animus whatsoever toward any former or present government employee, including Mr. Bloom, the former Special Counsel for Compliance. Particularly, during the course of the meeting he expressed the view that the purpose and nature of the questions to be developed should not be susceptible of seeming to discredit any individual, for that was not the nature of the Department's mission. The Department's mission was to respond to the requests made of the Department by members of the Subcommittee to aid their understanding of the budgetary and enforcement policy issues that were expected to arise during the hearing. Mr. Johnson's counsel during this meeting was that the questions prepared, as well as any other material conveyed, should be designed to adduce only answers that would reflect professional judgments and facts about the merits of the issues before the Subcommittee. At no time during this meeting did Mr. Johnson express or intimate any desire or purpose to impeach the *bona fides* of any witness, let alone "destroy" Mr. Bloom as a witness.

On the basis of this review of the Committee record and my personal observations, I am of the view that any suggestion that Mr. Johnson has committed an impropriety dur-

ing his service as a consultant to the Secretary is wholly without basis in fact.

I hope this information will be helpful to you and to the Committee.

Sincerely,

ERIC J. FYGI,
Acting General Counsel.

Mr. McCLURE. Mr. President, I reserve the remainder of my time.

Mr. DOMENICI. Will the Senator yield 3 minutes?

Mr. McCLURE. I yield 3 minutes to the Senator from New Mexico.

The PRESIDING OFFICER. The Senator from New Mexico.

Mr. DOMENICI. Mr. President, first I compliment the distinguished chairman of the Energy Committee, Senator McCLURE, for the thorough investigation. I would expect exactly that of Senator McCLURE. He has always been that kind of a Senator and he has been that kind of a chairman.

Mr. President, I fully support Tenny Johnson for the position of DOE General Counsel. Senator McCLURE has said it better than I can. He knows him and his excellent work in the Government better than I do, but, frankly, I wholeheartedly support him.

Certainly, from what I have seen in my 8½ years in this body, he is a very distinguished man who will serve the Department well. I am surprised that he is the subject of certain criticism now and at his nominating hearing.

A portion of that criticism was really directed at the Department of Energy and the administration, rather than Mr. Johnson. The remainder of the criticism did involve Mr. Johnson personally, but I do not believe that any of it really justifies action by the Senate other than confirmation of his nomination today.

I have reviewed carefully the definition of a consultant. He was a consultant. I understand, as a Senator, precisely what a consultant is supposed to do. We have a manual in OMB with guidelines. I believe that he has complied in every respect.

It is easy to make allegations, particularly if you happen to be a U.S. Senator. However, if an allegation is made against a nominee and it relates to his personal actions or his judgment, then the allegation should be supported by substantial and verifiable evidence. To not have such evidence is to be unfair to the nominee.

I think Senator McCLURE in his detailed statement has clearly indicated that there is no substantial evidence, no verifiable evidence, to support the accusations against Mr. Johnson.

As far as Mr. Johnson is concerned, there is no evidence to indicate that he acted improperly while he was a consultant, nor is there any evidence that he had any conflicts of interest. In the absence of such evidence, Mr. Johnson should not have the burden of demonstrating that he acted properly. It could be fairly assumed that he did. But I believe Senator McCLURE has gone far beyond that in the various communications that he has related to the Senate in attempting, in a reverse kind of proof, to prove that, as a matter of fact, Mr. Johnson did nothing wrong.

So where is the evidence that would show that Mr. Johnson did more than suggest a review of the DOE's V-factor rule? Clearly, if you look at what a consultant is supposed to do, that is precisely one of the responsibilities, to suggest. There is no evidence that he did more. Is there evidence to support the allegation that he improperly participated in the drafting of a DOE notice of intent to review the rule? The answer is no. He suggested certain language which I believe was certainly within the duties that a consultant has when he is hired by a department of our Government.

He also suggested that certain language be changed in the draft budget narrative for the Office of Special Counsel of DOE. Again, a suggestion, precisely the kind of activity that comes within the definition of a consultant.

The PRESIDING OFFICER. The time of the Senator has expired.

Mr. DOMENICI. One additional minute, please.

Mr. McCLURE. I yield.

Mr. DOMENICI. Where is the evidence that would demonstrate he improperly directed the change or ordered the change? There is none. There is no such evidence, Mr. President.

I could go on in each case where he will be accused here today, and in each instance this Senator is convinced that he did precisely what a competent expert consultant should have done during a transition period, to suggest, to be part of helping them get through the transition, but at no time did he violate the rules of a consultant. I think the Senate should, by a compelling majority, approve this extremely well qualified man for the position for which the President has recommended him. I thank the Senator for yielding.

Mr. McCLURE. Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. The Senator from Ohio.

Mr. METZENBAUM. Mr. President, I yield myself 12 minutes.

Mr. President, I rise today in opposition to the confirmation of R. Tenney Johnson to be General Counsel for the Department of Energy. I do so, Mr. President, with some regret, because I believe that the President should have broad discretion in his choice for every important position.

But there are limits. The Senate has a constitutional duty in the nomination process, and I do not take that duty lightly. Accordingly, I must urge my colleagues to vote against this nomination because during the past 5 months, Mr. Johnson has engaged in activities that raise profound concerns about the propriety of his serving as DOE's chief legal officer.

The previous speaker raises a question about Mr. Johnson merely making suggestions, and implications, to sort of suggest there is no smoking gun, that we do not have him redhanded in this matter.

Well, I think sometimes when you have somebody up for confirmation, you do not have to have him redhanded. We are here to look upon the nomination of this individual and base our determination on whether or not, on the whole record, he should or should not be confirmed.

The case against Mr. Johnson is decisive. Since January 21, he has served as a consultant to Secretary Edwards, being paid at a rate of $192 per day. The terms of his consulting contract state that he is to advise the Secretary on legal matters and affairs. Mr. Johnson has occupied an office in the Secretary's suite and has been issued a Government ID because he has been at DOE every day.

At the same time, Mr. Johnson has remained a partner in the District of Columbia law firm of Sullivan and Beauregard. He has been a registered lobbyist on behalf of an oil company. He represents a number of clients that are considered "energy concerns" under the DOE Organization Act. Those clients include Holley Corp.; Energy Systems of TRW; Avco-Everett Research Laboratories; Aerojet Energy Conversion Co.; and the Newport News Drydock and Shipbuilding Co., a subsidiary of Tenneco.

This, Mr. President, is very far from the standard procedure followed by nominees of this and other administrations.

Joseph Tribble, for example, who recently took office as Assistant Secretary for Conservation and Renewable Resources at DOE, served as a consultant to the Department while awaiting Senate confirmation. Mr. Tribble, however, had taken pains to sever his connection with his former employer, Union Camp Paper, at the time of his nomination.

Mr. Tribble did nothing unusual. In fact, his action was standard procedure—precisely what the people of this country have a right to expect from high Federal officials.

But Mr. Johnson—who has been named to be General Counsel—did not see fit to do even the minimum in order to avoid a possible conflict of interest.

Mr. President, this man is not up for confirmation for a low-level position. He is being confirmed for the position of General Counsel. We expect the highest degree of integrity and moral ethics from members of the legal profession, particularly when they accept governmental responsibility.

According to the Federal Personnel Manual, a Government consultant means "a person who serves as an advisor to an officer or instrumentality of the Government, as distinguished from an officer or employee who carries out the agency's duties and responsibilities. He gives his views or opinions on problems or questions presented to him by the agency, but he neither performs nor supervises performance of operating functions."

Apparently, Mr. Johnson did not read the manual.

In a similar manner, the Office of Management and Budget has issued two circulars, A–76 and A–120, prohibiting the Government from contracting our essential governmental functions.

Mr. Johnson, however, has shown no regard for the restrictions placed on a Government consultant. And apparently, he has just as little regard for the confirmation process in the Senate. From the moment he signed that consulting contract, Mr. Johnson started setting

policy at DOE as though he were already the General Counsel.

For the last 5 months, Mr. Johnson has spent a large part of his time working to get DOE to reconsider a complex pricing regulation known as the V factor. This may seem harmless to anyone unfamiliar with the regulation. In reality, the V factor involves more than $13 billion that the Economic Regulatory Administration says oil companies owe to the consumers, wholesalers, retailers, and the Federal Government; $13 billion, even in today's economic world "ain't hay."

The V factor regulation was first promulgated by the Federal Energy Administration in 1974. Under the rule, a refiner is prohibited from allocating its refining costs, except in proportion to the products it produces.

Let me give you an example.

Let us assume it is 1978, when the price of home heating oil is decontrolled but the price of gasoline is still regulated. A refiner takes a barrel of crude oil and 50 percent of the refined product is heating oil and 50 percent is gasoline. Under the V factor, a refiner can allocate only 50 percent of the refining costs associated with that barrel in determining the lawful controlled price for the gasoline it sells.

That is simple enough. You allocate what your actual costs are. But what happens when there is no V factor? In that case, the oil companies take all of the costs associated with refining that barrel of oil and allocate them entirely to the controlled product, gasoline.

The impact of that reallocation would completely wipe out all of the $13 billion in existing overcharge cases presently pending against the oil companies.

The oil companies tried to eliminate the V factor last year. In August, they succeeded in getting a Federal district court judge in Texas to invalidate a critical portion of the 1974 regulation on a procedural technicality—a finding that all interested parties were not given an opportunity to comment in the record.

As soon as that decision was rendered, the oil companies began refiling their costs; 2 weeks later the refilings totalled more than $10 billion. Today, those refilings total $27 billion, according to ERA's Office of Special Counsel.

In early September, the Department of Energy announced a proposed rulemaking to retroactively remedy the defect in the earlier rule. The purpose of this proposed rulemaking was to put an end to the accounting game the oil industry was playing with the consumers of this Nation. A public hearing was held, the oil companies were given an opportunity to comment on the record. None disputed the legality of a retroactive rulemaking.

On January 16. DOE issued a final rule in the Federal Register remedying the procedural defect and protecting consumers and their claims against the oil companies. The oil companies lost in the rulemaking, but they were not deterred. You cannot stop the oil companies when they are at work in Washington.

In fact, the industry started working a month before the final rule was published.

On December 9, Charles Di Bona, president of the American Petroleum Institute, sent a letter to the Reagan transition team—a letter that can only be described as an oil industry wish list. The API urged the President-elect to decontrol the price of crude oil, to decontrol all petroleum products, to increase leasing in the Outer Continental Shelf, to expedite leasing of onshore lines. Then, over on the second page the letter urged Mr. Reagan to:

> Oppose the adoption of DOE's proposed rulemaking that would retroactively require refiners to allocate their costs for pass-through purposes on a volumetric basis.

The letter went on to say:

> A recent Federal court decision found that the V factor had been illegally adopted. DOE's proposed rule would be inconsistent with this court decision and inappropriate on economic considerations.

As a matter of fact, Mr. President, that letter does not even tell half the story, because the original V factor was invalidated for technical reasons. This letter suggests that it was done on a substantive basis.

Mr. Reagan was inaugurated on January 20. One day later, Mr. Johnson began his consultant job with Secretary Edwards.

According to a national news article of March 10, four oil industry lawyers, including Donald Craven, who was hired by the American Petroleum Institute to lobby the Reagan administration on repeal of the V factor, met on February 4 with Jim Tozzi, a senior OMB official and a member of the President's Task Force on Regulatory Relief, to discuss some industry relief from the V factor. Mr. Craven, I might add, also represents Gulf, which, at the time of the meeting, had outstanding overcharges lodged against it totaling more than $500 million. Also present at the meeting was Boyden Gray, Vice President BUSH's counsel.

The wheels were beginning to turn toward the oil industry's goal. Now, enter Mr. Johnson. According to his DOE telephone logs, he received a call on February 13 from Mr. Tozzi. About the same time, Mr. Johnson told the Energy Committee, he suddenly became familiar with the V factor regulation. He also told the committee that, after reviewing the rule, he decided that, although it was a final rule, before President Reagan took office, it fell within the spirit of the President's January 29 memorandum and ought to be reviewed.

That is preposterous, Mr. President. That is absurd. It was a final rule and the President's memo only dealt with regulations that were pending. But Mr. Johnson wanted to reach out. He wanted to protect the oil industry. That is what he is going there for.

Again, the memorandum that the President wrote directed every Cabinet officer to review all pending major rules proposed during the final weeks of the Carter administration.

The memo said nothing about final rules such as the V factor, but Mr. Johnson decided to review it anyway. Mr. Johnson was not to be deterred. Mr. Johnson had a job to do.

Mr. Johnson told the committee that even though he was merely a consultant, he, on his own, initiated—I am using his own words—initiated the process of deciding to review the V factor.

He did not respond to a request from Secretary Edwards that he provide a legal opinion.

This man, who is just supposed to be a consultant and not involved in policy decisions, moved in. He took it upon himself and he began to set Government policy—acting as if he had already been confirmed by the Senate.

On February 16, a meeting was convened in the office of DOE Assistant General Counsel Tom Newkirk to discuss the V factor. When Mr. Johnson learned that the meeting was underway, he told those assembled to come into his office. He summoned them into his office. He was not even invited to the meeting. But Mr. Johnson had to make certain that he had control of the V factor to protect the oil industry.

Once everyone was assembled, Mr. Johnson told Mr. Newkirk that he wanted the following language in the notice: "Proposed enforcement actions under these rules will be included in the review." And that language was included in the final notice.

Regardless of how far they had gone in an enforcement case, Mr. Johnson wanted to be certain to review it, open up the door, take care of the oil companies. Why should he worry about the American consumer or winning the battle against inflation? Why should he be concerned about any body except the oil companies?

What a red flag to the oil companies. Mr. Johnson was telling them: "Hey, don't settle any of your cases. We're going to be looking at the V-factor . . . and while we're at it, we're also going to review your overcharge cases. Hang on for a few months and you might get off scot-free." And all of this occurred while Mr. Johnson was a consultant and as well as partner in an energy law firm.

According to the Office of Special Counsel, which is the independent arm of ERA set up to audit and prosecute the 15 largest oil companies for pricing overcharges, the red flag has been highly effective. Since DOE began reviewing the V-factor several major settlements totaling more than $250 million have fallen through. No company has even hinted at an interest in negotiating cases. And who can blame the companies?

But Mr. Johnson was not finished with the V-factor. According to his DOE telephone logs. Mr. Johnson received a call on January 19 from Mark Evans, a Washington attorney hired by API along with Mr. Craven to lobby the administration on the V-factor. The message on the log says "Per Boyden Gray," Vice President Bush's counsel for the regulatory relief task force.

Mr. Johnson says he does not think it is unusual that Mr. Gray would refer

the API lobbyist to him. Mr. Johnson claims that he is the only attorney that Mr. Gray knew at DOE. Mr. Johnson would have us believe that Mr. Gray did not know there was an acting general counsel. Mr. Johnson wants us to think that Mr. Gray did not know any of Secretary Edwards' personal assistants.

According to Mr. Johnson, Mr. Evans was calling to find out what was the status of the V-factor review. What did Mr. Johnson tell the API lobbyist? Did he tell him that he was merely a consultant to the Secretary; that he was not a DOE employee; that he was still in private practice; and that there were people in the Public Information Office to answer the public's questions? No way. He told Mr. Evans that the attorneys in Mr. Newkirk's office were working on the V-factor and that "they would probably have something done later today or tomorrow."

When Mr. Johnson told Mr. Evans this, he gave him advance notice about DOE's decision to reconsider and review a rule that impacts on $13 billion in overcharges.

What were the ethics of his revealing that information to him? What was the legal propriety of his doing so? Giving advance notice to an outside party on any departmental decision not yet released is expressly prohibited by at least two formal notices issued by the DOE Secretary. And it is improper conduct for any member of the legal profession.

The next day, Mr. Evans called Mr. Johnson back. The message this time says "wants to send a messenger to pick up the V factor package." Mr. Johnson has testified under oath that he did not give Mr. Evans an advance copy of the notice to reconsider the V factor. He also swears that he did not promise to provide the API lobbyist with an advance copy of the notice. Mr. President, I find it hard to believe that Mr. Evans would offer to send a messenger unless he thought he was going to get an advanced copy.

I wish I could say that Mr. Johnson's initiation of DOE's decision to reconsider the V factor was the only thing he did during the past 5 months that goes beyond the bounds of a consultant's job. But it is not.

The nominee also was involved in the preparation of budget documents DOE submitted to Congress recently.

For the past 3 years, the Office of Special Counsel has been auditing the 15 largest oil companies for possible overcharges made to their refining customers. Those audits are now almost complete. In the process, the Office has identified overcharges totaling more than $10 billion and has begun to seek appropriate administrative and judicial action to recover the money on behalf of consumers and Government.

At the same time, the Office of Enforcement has been auditing the smaller refiners and wholesalers. This Office has identified overcharges of almost $3 billion.

The Carter administration proposed cutting the budget for these two Offices in 1982 from $67 million to $55 million. This cut was to reflect the decreased need for auditors and clerical personnel as the audits begun 3 years ago were completed. The Carter budget, however, left sufficient money to staff a proper level of lawyers to vigorously pursue all of the overcharge cases.

The money that was invested last year in the compliance budget was well spent. Without even considering the importance of enforcing the law against the oil companies, the $34 million spent on the Office of Special Counsel yielded recoveries and settlements totaling $550 million.

The present administration, however, plans to cut the compliance budget for fiscal year 1982 from $67 million to $12 million, even though $13 billion in overcharge cases remain unresolved. The Office of Special Counsel alone will have its budget cut from $34 million to $6 million.

The Acting Administrator of ERA, Mr. House, sent a memo to the Acting Undersecretary on Feb. 2 stating that a compliance budget of at least $44 million was needed in 1982. "Any lesser resource level," he wrote—

> Will signal DOE's reluctance to follow through on existing identified violations and will seriously weaken DOE's position in negotiating settlements.

He went on to say:

> Over $13 billion in identified violations would not be pursued, resulting in . . . criticism of DOE and the administration for absolving criminal and civil violations of Federal law.

It was in this atmosphere, that Avrom Landesman, DOE's acting special counsel, prepared the narrative for his office to submit to Congress for the 1982 budget. A portion of that narrative read:

> Because of limitations on available resources, new enforcement actions will not be initiated even where substantial violations have been discovered . . . It is estimated that this will result in the litigation of less than $3 billion of the $10.8 billion in violations identified.

According to Mr. Landesman, in testimony before a House Subcommittee, 2 days after he wrote that narrative, Mr. House requested a meeting with Mr. Johnson to discuss the compliance budget. At that meeting, Mr. Johnson asked to see the budget narrative. When he read the portion I just quoted, Mr. Johnson became very upset and told Mr. Landesman he thought it should be changed.

Once again, Mr. Johnson did not wait for the Secretary to ask him to provide a legal opinion.

He did not give his views when asked.

Mr. Johnson set policy. He made important Government decisions, even though he did not have the authority to do so.

The budget narrative was revised and returned to Mr. House 2 days later without any mention of the paragraphs that describe why the Office will not be able to pursue $7 billion in overcharges. Attached to the revised narrative was a cover note from Mr. Landesman, stating:

> I believe that the amended narrative satisfies that concern expressed by Tenney Johnson during our meeting with him on March 3d.

Mr. President, I could go on and on. I could discuss how Mr. Johnson worked with DOE officials on renegotiation of a weapons contract, while he still represented high technology clients. I could talk about how he wrote responses to Members of Congress and drafted questions for Republican Members of the House to ask at a subcommittee hearing.

The point is that it is wrong—and it is a very disturbing beginning for the chief legal officer of a major Federal department.

Mr. President, I want all of this on the record. And I want the administration to know that this high-sounding rhetoric about efficient government will be tested in the eyes of the people of this country by the quality and performance of its nominees.

Mr. President, I believe this is another message to the American consumer that the administration is indifferent to the concerns of the American people. But much worse than that, it says "Where is the integrity in this Government?" Where is the integrity that makes it possible to appoint a man as General Counsel to the Department of Energy who acts as its special consultant, acts contrary to the rules and regulations of the law, and goes on and moves into situations in which he has no legal propriety?

Mr. President, I believe that this man should not be confirmed for the Office of General Counsel. But, Mr. President, I am a realist. I can count as well as any Member of this body and I am realistic enough to understand that all of the Members on the other side are prepared to vote to support his nomination. I therefore say with regret that I shall not ask for a rollcall vote. I can only say that I believe that this is a very bad appointment. It should not have been made, and I am sorry that I am here on the floor having to oppose it, since I believe very strongly that we should not oppose Presidential appointments unless there is something very deep seated in our opposition. I feel that way about this one.

Mr. President, I reserve the remainder of my time.

(The following occurred during the remarks of Mr. METZENBAUM:)

Mr. BAKER. Mr. President, will the Senator yield?

Mr. METZENBAUM. Not on my time.

Mr. BAKER. Mr. President, I ask unanimous consent that the Senator from Ohio may yield to me without the time being charged against the time allocated to him under the previous order.

The PRESIDING OFFICER (Mr. MURKOWSKI). Without objection, it is so ordered.

Mr. METZENBAUM. And without changing the time for the final vote?

Mr. BAKER. And without changing the time for the final vote.

The PRESIDING OFFICER. Without objection, it is so ordered.

UNANIMOUS-CONSENT AGREEMENT—S. 271

Mr. BAKER. Mr. President, I believe this unanimous-consent request has been cleared with the distinguished minority leader. I will recite it now.

Mr. President, I ask unanimous consent that when the Senate completes action on the nomination of R. Tenney Johnson to be General Counsel of the Department of Energy, the Senate return to legislative session, and that not before 3 o'clock it proceed to the consideration of Calendar Order No. 37, S. 271, a bill to repeal section 222 of the Communications Act of 1934.

I further ask unanimous consent that the Senator from South Carolina (Mr. THURMOND) be immediately recognized for the purpose of moving that the bill be committed to the Judiciary Committee for a period of 1 week, and that the time on the motion be limited to 90 minutes to be equally divided and controlled by the Senator from South Carolina (Mr. THURMOND) and the Senator from Oregon (Mr. PACKWOOD), provided that if the motion fails the bill be returned immediately to the Calendar of General Orders.

Mr. ROBERT C. BYRD. Mr. President, reserving the right to object, this request has been cleared on our side and there is no objection.

Mr. BAKER. Mr. President, I thank the distinguished minority leader.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. BAKER. Mr. President, I thank the Senator from Ohio for permitting me to interrupt. I apologize to the Senator from Idaho and thank him as well because, due to the diligence and perseverance of the Senator from Ohio in protecting his rights, I ended up taking time from the Senator from Iowa.

Mr. McCLURE. Mr. President, I yield to the Senator from Oklahoma (Mr. NICKLES).

Mr. NICKLES. Mr. President, I thank the Senator from Idaho and congratulate him and his committee for doing an outstanding job.

Mr. President, I fully support Mr. Johnson's nomination for DOE General Counsel. At the outset, I want to point out that it would be difficult to find an individual who is better qualified than Mr. Johnson for that particular position. For much of his professional career, he has been a general counsel or deputy general counsel within the Federal Government. He has served as a member of the Civil Aeronautics Board. He was also in the private practice of law for 3 years.

An interesting and important aspect of Mr. Johnson's background is the fact that he has served as General Counsel for three major Federal agencies. Those agencies are the Energy Research and Development Administration, the National Aeronautics and Space Administration, and the Civil Aeronautics Board. Mr. Johnson has also served as Deputy General Counsel in two additional agencies, the Department of Transportation and the Department of the Army.

I note also that the quality of his performance in those positions has been outstanding. That is apparent from the fact that he received the Distinguished Service Award in 1976 from the Energy Research and Development Administration, the Meritorious Achievement Award from the Department of Transportation in 1968, and the Exceptional Civilian Service Decoration from the Department of the Army in 1967.

Mr. President, Mr. Johnson has also performed a number of special assignments. He was chairman of the Organizational Integration Working Group, DOE Activation Task Force, from June to September 1977. During the period 1975–79, he served as U.S. Co-Chairman, United States-Union of Soviet Socialist Republics Joint Working Group on Intellectual Property, United States-Union of Soviet Socialist Republics Agreements for Cooperation. From 1970–72, he served as consultant on patent policy and indemnification against usually hazardous risks, Commission on Government Procurement.

Mr. President, I am very pleased to support Mr. Johnson's nomination, and I hope he will be confirmed by an overwhelming majority of this body.

Mr. McCLURE. Mr. President, I yield 1½ minutes.

Mr. President, I want to respond in the time remaining to what the Senator from Ohio has already said with respect to the discussion of the V-factor. I have already placed in the RECORD the letter of the Acting General Counsel for DOE concerning Mr. Johnson's role with respect to the review of the regulation on the V-factor, indicating the view that what was done was entirely and totally within the rules and regulations and the law and the ethics of the profession with respect to the suggestion made by a consultant regarding that particular regulation.

With respect to contacts with two API attorneys, let me refer to the fact—not the rumor, but the fact—of what was actually done in regard to those contacts. The record under sworn testimony indicates that Mr. Johnson received a phone call in which he was offered advice with respect to the regulation, and he refused to discuss the matter. There was, later on, a messenger who came up. That was not a contact with Mr. Johnson at all. There was, later, another inquiry by another API attorney as to when a document would be released. Mr. Johnson said, as was customary practice, with respect to timing and not substance, that it might be released the following day.

The PRESIDING OFFICER. The Senator has used 1½ minutes.

Mr. McCLURE. Mr. President, I ask unanimous consent that I may proceed for 2 additional minutes. I do that only with respect to the time taken by the colloquy between the majority and the minority leaders.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. McCLURE. I yield myself 1 additional minute.

Mr. President, the Senator from Ohio has very strong feelings concerning the oil industry. There is not any question about that fact, and his statement today reiterated what all of us well know.

A reporter for the Washington Post very recently was embarrassed, as was that great newspaper, for having written a story based upon fact but which was pretty largely fiction and that, I think, is what we have heard here today, a fictional account of something that might have happened but did not really happen; something that might have taken place but did not take place. But in the fertile imagination of some it has been extrapolated into some kind of a serious charge. But the facts are, and I repeat, the facts on the record refute the charges that are made.

At this point, Mr. President, I am going to address the specific issues raised during Mr. Johnson's nomination hearing held on April 30. At that hearing, Senator METZENBAUM criticized certain actions of the Reagan administration and the Department of Energy, and he also raised a number of possible allegations against Mr. Johnson personally. The Senator suggested that Mr. Johnson, as a consultant to the Department of Energy for the period beginning in January of this year, may have engaged in certain decisionmaking activities and thus did not strictly confine his activities to consulting functions. The Senator also raised several questions involving potential conflicts of interest possibly created by Mr. Johnson's consulting activities.

During the hearing, Mr. Johnson responded to each of Senator METZENBAUM's questions. He provided additional information in answers to written questions that I submitted to him subsequent to the hearing. Other information, described previously, was included in my review of these issues, as well. Based on Mr. Johnson's answers, both at the hearing and later for the record, and the other information available to me, I have concluded that there is no merit whatsoever to any of the possible allegations. In no instance did Mr. Johnson act improperly, nor were any conflicts of interest created by Mr. Johnson's status as a consultant or his activities in that capacity.

These conclusions are readily derived from a number of fundamental facts that are set forth in Mr. Johnson's sworn testimony and in his written responses to my questions. Those facts speak for themselves. Moreover, they have been fully corroborated by individuals other than Mr. Johnson, consisting of DOE personnel, administration officials, and other individuals who have personal knowledge of the events cited by Senator METZENBAUM. Each of these persons has confirmed the facts as stated by Mr. Johnson and that pertain to his consulting activities.

Mr. President, to demonstrate that there is no substance to the allegations made at the hearing, I will summarize or quote the undisputed facts that relate to each issue. Before I do that, however, I have a comment about the general issue of Mr. Johnson's activities as a consultant.

It is evident from his testimony at the hearing that, while serving as a DOE consultant, he was well aware of the precise limits of his role in the Department's decisionmaking process. He explained

those limits very well to Senator METZENBAUM in the following terms:

Senator, in virtually every meeting in which I have participated I have advised all the participants that I am a consultant and acted only as a consultant, and I am very careful in all my actions in the Department not to presume that the Senate has taken any action on the position for which I have been nominated.

I am very conscious that I have no authority. If the officials who do have the authority have accepted any ideas that I presented, they have done so in my opinion on the merit of those ideas and not because I compelled them to do so.

I had no power to compel, and made it consistently plain that I had no power to compel. I have been, if I may say, Senator, on both sides of this equation in five different administrations. I have been a career official working with nominees and working with them to carry out the policies of the new administration. I very well know that when a staff official is in an acting capacity the decisions that are taken by that official are the responsibility of that official.

However, it is perfectly proper and indeed desirable for a staff official to seek views of people who have been brought in to assist the Secretary and who are presumed to be able to reflect the Secretary's views on matters. It makes perfectly good sense for them to seek out views of individuals such as myself, but they know, as I knew in my time, that the advice given is not binding nor is it an order of any kind. It is a suggestion and may be accepted on its merits.

There have been times when suggestions that I made have not been accepted because better ideas were found. I am very used to participating in discussions in which ideas are cast back and forth until the best solution emerges, and it is not a question of dictation by any individual. (p. 31, April 30, 1981, Hearing Record, Publication No. 97–9)

After the hearing, I asked Mr. Johnson to describe the guidance he received from the Secretary on what services the Secretary wanted him to perform as a consultant. Mr. Johnson submitted the following reply:

He asked me to assist him by informing myself on Departmental matters, particularly legal issues, discussing them with Departmental officials, personally advising him on such issues, reviewing on request documents submitted to him, advising other officials whom he had appointed on his immediate staff, passing on to officials in authority desires and instructions of the Secretary. I was also to make suggestions and give advice to Departmental officials to assist them in carrying out the policies of the Secretary and the Administration. On the other hand, I had no directive authority, could not make policy on my own authority, could take no official action, and could not represent the Department to other agencies or the public. (p. 130, April 30, 1981, Hearing Record, Publication No. 97–9)

Mr. Johnson, in his June 1 letter in discussing the last allegation, forcefully denies and refutes the assertion that he exceeded his role as a consultant. Mr. Fygi, on behalf of several DOE senior officials, supports his position in a most persuasive discussion in his June 1 letter at page 4. Also, Mr. Landesman in testimony under oath on March 11 before the House subcommittee which was substantiated expressly by Mr. House, who also was under oath, stated that Mr. Johnson was a consultant, who made that clear to DOE officials and did not issue directives or make decisions. Mr. Fygi's discussion on this issue is as follows:

As Acting General Counsel, I am familiar with the general activities performed by Mr. Johnson for the Secretary, as we have exchanged advice and information on a routine basis since the advent of his service as a consultant. In this connection, I should add that there has been a wide array of matters concluded with frequency by this office on which I have not felt it necessary to seek Mr. Johnson's advice. Messrs. Newkirk and Funk of this office, as well as Mr. William V. Vitale, Executive Secretary of the Department, are as well familiar with the character and scope of Mr. Johnson's general activities during his service as a consultant for the Secretary.

In this connection, some of the questions put by Senator Metzenbaum to Mr. Johnson suggest that it was somehow improper for a consultant in Mr. Johnson's position to participate in the official business of the Department. Any such implication is incorrect as a matter of law. Mr. Johnson's consultancy is not that of a private contractor, but rather during his days of service with the Department he is a special government employee, a type of employment status expressly recognized by statute.

Mr. Johnson's areas of expertise, as reflected in the character and duration of his prior federal service, are in the disciplines of administrative law, public contract law, and the mixed questions of law and policy that are peculiar to one who is an experienced legal adviser to an agency head. The character of Mr. Johnson's service as a consultant has involved providing advice to the Secretary that is consistent with his skills and experience, and making himself available to the senior professional staff of the Department to provide them his understanding of the Secretary's general policies so that those officials' actions would properly reflect such policies.

Mr. Johnson has, however, refrained assiduously from conducting himself in a manner beyond this role, and has exercised himself no line, command, or delegated legal authority that otherwise would be wielded by the General Counsel or any other confirmed official. In addition, he has reviewed, with a view to providing the Secretary advice, certain classes of documents transmitted to the Secretary through Mr. Vitale's office, so that the Secretary and his immediate staff may have the benefit of Mr. Johnson's advice when acting upon such documents. Such a function corresponds exactly to the duties that such a consultant is in a position to perform, and corresponds as well to the actual requests for advice made by the Secretary and his immediate staff.

I note that there is no evidence that Mr. Johnson's view of his consulting role is incorrect, nor that the Secretary of Energy's guidance on Mr. Johnson's consulting role violated any Departmental rule or practice. Moreover, there is no evidence that Mr. Johnson's consulting activities went beyond the limits as expressed by Mr. Johnson, or beyond the scope of the services requested by the Secretary.

I will now turn to the specific issues raised at the hearing, and to the facts that relate to those issues. One of the major issues was the claim that Mr. Johnson acted improperly by participating in the Department of Energy's decision to review the so-called V-factor rule. On January 16, 1981, during the final week of the Carter administration, the DOE issued a final rule on the V-factor, a highly technical issue relating to cost allocation and pricing for certain petroleum products during the period that those products were subject to price controls. On January 29, 1981, President Reagan issued a memorandum directing cabinet officers to postpone for 60 days from that date the effective date of final rules already promulgated, but not yet effective. The purpose of postponing the effective dates was "to subject to full and appropriate review many of the prior administration's last minute decisions * * *." In a notice issued on February 23, 1981, the DOE announced that it would review a number of rules previously issued by the DOE during the Carter administration, including the V-factor rule. The DOE acknowledged in the notice that the V-factor rule, along with five other rules, did not fall within the literal terms of the President's memorandum, because it was effective prior to the issuance of the memorandum. However, the DOE expressed its belief that "it is consistent with the spirit of the memorandum to review these additional final rules as well, to determine if any action is appropriate." The notice also stated:

Proposed enforcement actions under these rules will be included in this review. The decision to conduct this review should not be construed as indicating any view by DOE as to the desirability of changing or eliminating any of these rules.

Senator METZENBAUM suggested that Mr. Johnson, while acting as a DOE consultant, may have "interjected" himself into the V-factor issue and thus had acted improperly. The facts show that there was no improper conduct on Mr. Johnson's part. He participated with DOE staff attorneys and other officials in discussing the review of the rule. He concluded that it would be appropriate for the new administration to review the rule because it was a last minute decision of the outgoing administration.

Accordingly, Mr. Johnson suggested, on his own initiative, that a review would be desirable and within the spirit of the President's memorandum. In making that suggestion, he acted within the proper scope of his duties as a consultant to the Secretary. Mr. Johnson also participated with Departmental attorneys in the drafting of a notice of intention to review the rule, and he suggested the language which stated that the decision to review does not indicate any decision on the merits of the rule. He also requested that language be included to deal with the problem of enforcement of actions based on a rule which might be amended after completion of a rulemaking proceeding not yet initiated.

Each of these suggestions was within Mr. Johnson's duties as a consultant. His job was to render advice to the Secretary on all areas in which the Secretary was interested. It was not his function to sit mute during meetings and merely listen to discussions about pending issues. Indeed, if he had refrained from taking the initiative and making suggestions, a question could have been raised as to whether his performance as a consultant was satisfactory. Finally, I note that there has been no evidence that any DOE

regulation or guideline was violated by any actions taken by Mr. Johnson with regard to the decision to review the V-factor rule.

Mr. Fygi's letter of June 1, at pages 2 to 4, discusses extensively the views of the senior DOE officials involved in the V-factor rule decision about Mr. Johnson's role. Also, the House subcommittee reviewed Mr. Johnson's role in some detail while he was testifying under oath at the March 25 hearing. It is particularly noteworthy that Subcommittee Chairman MOFFETT at the conclusion of the hearing commented to the effect that Mr. Johnson was very capable and he expected Mr. Johnson to be confirmed. Additionally, at my request, the White House Legal Counsel interviewed Mr. James Tozzi, the OMB official identified bv Mr. Johnson at pages 33, 40, 41, and 42 of the hearing volume as having been in contact with Mr. Johnson on the V-factor issue. The Deputy White House Legal Counsel, Mr. Richard A. Hauser, has indicated that Mr. Tozzi on June 1 advised the Legal Counsel that he has reviewed the testimony of Mr. Johnson generally and particularly the discussions related to their contacts. He further advised the Leagl Counsel that to the best of his recollection Mr. Johnson's testimony and answers for the record are absolutely accurate regarding the substance of their conversations. Mr. Fygi's discussion on this issue is as follows:

I am familiar with this matter, and in fact executed the Federal Register notice that announced the intention to conduct a review of several departmental rulemakings, including the retroactive amendment to the V-Factor rule. In addition, Messrs. Newkirk, Funk and Corrallo are familiar with this matter. Our recollections all agree with the statements made by Mr. Johnson to the Committee as to the character and degree of his involvement in this activity.

While Mr. Johnson has advised the Committee of his involvement in the Department's decision to review this rulemaking, this involvement did not precipitate the Department's concern, after January 29, 1981, with the V-Factor rule. To the contrary, the Department's scrutiny of the rule arose out of predictable issues involving the effect on that rule of the President's memorandum of January 29, 1981 entitled "Postponement of Pending Regulations." Quite apart from and prior to Mr. Johnson's role in familiarizing himself with the rule and his ultimate suggestion that it be reviewed, officials of the Office of Management and Budget charged with carrying out the President's memorandum, as well as representatives of private firms and the media, had contacted me, Mr. Newkirk or Mr. Funk as to this matter. The thrust of these initial inquires bore upon the question of whether the rule itself fell within the scope of the memorandum which instructed federal regulatory agencies to postpone for 60 days the effectiveness of all final rules otherwise scheduled to become effective within 60 days from the date of the memorandum. The Office of General Counsel of this Department was requested by OMB to examine carefully the rule to determine whether, as a matter of law, it fell within the terms of the President's memorandum and therefore was required to have its effective date postponed.

The result of this scrutiny was the legal determination, to which I adhered and which corresponded with the views of the Department of Justice, that the V-Factor rule did not as a matter of law fall within the terms of the President's memorandum. Having concluded that, however, we also determined that it would be appropriate (and, indeed, —entirely predictable in the normal course of events) that this rule should be evaluated carefully by senior individuals of the incoming Administration. The notice ultimately adopted by the Department was intended, among other things, authoritatively to dispel doubts as to the rule's current legal status in view of the President's memorandum, to inform the public that it along with several other rules would be reviewed, to state the logical truism that those compliance actions under any of the rules being reviewed would themselves by necessity be examined as well, and to state authoritatively that no decision on the merits of these rules had yet been made by the incoming Administration.

Some of the questions put to Mr. Johnson suggest that he acted as an intermeddler in this matter, and that the commitment to review the rule is in reality a commitment on Mr. Johnson's part to urge its revocation. None of Mr. Johnson's conduct as to this matter that I have observed suggests anything of the kind. The statements he has made to the Committee describing his role in this matter are entirely consistent with his statements and conduct, including private discusions, on every occasion that this matter was considered. The related legal and policy considerations inherent in this rule involve precisely the type of advice that a consultant with Mr. Johnson's skills and experience would be expected to provide to the Secretary, and on the Secretary's behalf render to the senior professional staff of the Department.

Finally Senator Metzenbaum suggested in the record that Mr. Johnson committed an impropriety by acknowledging during a telephone conversation with a private attorney that some, unspecified action addressing the V-factor rule was imminent. Mr. Johnson testified before the Committee that during this conversation he gave no information as to the substance of the Department's contemplated action, but provided only an estimate of when the document by which the Department acted would be available to the public. The fact that some action was under way with respect to that rule already was widespread knowledge, and in these circumstances providing advice as to anticipated timing of availability of a decision was an ordinary courtesy, similar to the practice observed by many courts and administrative agencies. Any suggestion of an impropriety on Mr. Johnson's part by reason of his having provided an estimate of when the Federal Register notice covering the V-factor rule would be available to the public is without merit. Messrs. Landesman, Corrallo, Newkirk and Funk join me in this conclusion.

Senator METZENBAUM also objected to the fact that the DOE decided to review the rule. The Senator has every right to express his opinion that the rule is beneficial and should not be rescinded, but there is no evidence that the decision to review the rule was illegal or in any way improper. As Mr. Johnson stated during the hearing:

It is perfectly proper for the new administration to review a rule with tremendous effect because the new administration has to live with the rule. The old administration, while it put it into effect, is not responsible for its consequences.

Surely, the Senator would agree that any existing regulation of any Federal agency is subject to amendment or rescission, and any such change in the rule will be perfectly valid if the proper administrative procedures are followed.

Another issue raised at the hearing was whether Mr. Johnson acted improperly in communicating with representatives of the American Petroleum Institute during the time the DOE was considering whether to act on the V-factor rule. Mr. Johnson's phone logs were the source of the original information on these contacts. In addressing that issue, Mr. Johnson supplied the following facts:

My contacts with the American Petroleum Institute consisted of answering two phone calls made to me. The first was made by Donald Craven, a Washington attorney whom I only later learned had been retained by the American Petroleum Institute. The call was made on January 30, 1981. Mr. Craven offered to brief me on the V-factor rule. I declined the offer. I have had no subsequent contact with Mr. Craven. He has not sent me any material for review. I took no action of any kind on the basis of Mr. Craven's phone call.

The second phone call was made by Mark Evans. In that conversation I learned that he was a Washington attorney in the same firm as Mr. Craven. This call was made on February 19, 1981.

He stated that he was aware that the Department was working on the V-factor. I said that was true. He asked when the Department would complete its work. I said I expected that something would be issued the next day. He asked if he could have a copy when it was issued. I said that as I understood the Department's procedure, he could have one when it was issued. At no time in this conversation did I discuss the substance of the Department's work, nor did I promise to provide an "advance copy." There was no way he could tell from my conversation what the Department actually was going to do from among the options available to it.

Mr. Evans called me the next day at a time when I was not in the office. He asked my secretary if he could send over a messenger to pick up the Department's "package" on the V-factor. When my secretary mentioned this request to me later that day, I said I had nothing for Mr. Evans. (In fact the Department had not completed its work that day. It was not until the following Monday that the Notice of Intention to Review was finally signed and issued.) I told my secretary that he could get a copy not from me but from Public Affairs or General Counsel. Later, my secretary told me she had referred him to Public Affairs.

I have had no other contact with Mr. Evans.

Neither Mr. Craven's call on January 30 nor Mr. Evans' call on February 19 had any effect on my activities on the V-factor rule. The bulk of my participation in that matter took place in between those dates (p. 133, April 30, 1981, Hearing, Publication No. 97–9).

Again, Mr. Fygi's letter of June 1, at page 4, forcefully supports Mr. Johnson's testimony and conclusion regarding the contacts with the private lawyers. The concurrence of the senior DOE lawyers on this point is particularly noteworthy. Also, Mr. Johnson's June 1 letter restates the full circumstances in a manner which should dispel the overtones of an API initiated or led reversal of the V-factor rule through Mr. Johnson. Further, Mr. Johnson's testimony and answer for the record regarding these contacts, particularly the answer at page 133 quoted above, were the subject of a committee staff interview of Messrs. Donald Craven, Esq., and Mark Evans, Esq., of the law firm of Miller & Chevalier on May 29, 1981. Messrs. Craven and Evans

reviewed Mr. Johnson's statements in the record and individually stated that they believe that Mr. Johnson's answer is complete and accurate in all material respects to the best of their recollection. Both attorneys stated categorically that Mr. Johnson refused completely to discuss the substance of the V-factor rule and its potential reconsideration by the Reagan administration—so much so that his unwillingness was a source of great concern to them about a possible position adverse to their client's interest. Finally, both attorneys stated that without any reservation they would verify the accuracy and completeness of Mr. Johnson's answers to all material facts and certainly as to the conclusions drawn by Mr. Johnson. Again, we have independent corroboration of Mr. Johnson's testimony from identified individuals involved in these matters.

There was nothing improper about Mr. Johnson's conversations with the two API attorneys. He did not provide advance notice of the DOE's decision, nor did he commit to providing advance notice. He provided no substantive information whatsoever. The suggestion that in dealing with the API representatives Mr. Johnson breached a confidential relationship with his employer, is groundless.

A third issue discussed at the hearing related to a meeting of DOE officials called for the purpose of preparing questions to be directed at Paul Bloom in a House committee hearing on proposed budget cuts for the DOE Office of Special Counsel. Mr. Johnson participated in the meeting. Senator METZENBAUM, during his questioning of Mr. Johnson, expressed his view that the meeting was improper and the questions developed at the meeting were intended to "destroy" Mr. Bloom.

The questions prepared by the DOE officials are reprinted in the committee hearing report on Mr. Johnson's nomination at page 19. As Mr. Johnson testified at the hearing, the questions were designed to elicit facts, not opinions, and they certainly did not discredit Mr. Bloom or his enforcement efforts. In fact, Mr. Johnson has stated repeatedly that he emphasized that approach in the meeting, and, further, that he would never be party to an effort to discredit such a witness. It is evident from a review of the questions themselves that there was nothing improper about the meeting or the questions.

Mr. Fygi's letter at page 6 provides the views of other DOE officials who attended the meeting, which was called for the purpose of preparing questions in response to a request from a Member of Congress. They substantiate Mr. Johnson's testimony completely with regard to his participation and his advice, which was to avoid any attack on Mr. Bloom. Mr. Johnson's letter of June 1 restates once again his opposition to the suggestion of "destroying" a witness. He states:

I would deplore any attempt to haze any witness or distort or misrepresent previous statements by any witness. I have never done so, and I would not be a party to an effort to do so.

Mr. Johnson's ringing objection to the mere suggestion, which is paralleled in his oral testimony at page 17 of the Hearing Volume, confirms for this Senator the lack of substance in this allegation. Mr. Fygi's discussion on this issue is as follows:

I attended this meeting, along with Messrs. House, Landesman, and other regulatory and compliance officials of the Department. The meeting was conducted in response to requests communicated to the Department the preceding Friday that departmental officials be prepared by Monday morning to brief two members of the Subcommittee on Environment, Energy and Natural Resources of the House Government Operations Committee. One of the members had requested that the Department be in a position to provide that member questions and answers that would assist the member in preparing for the hearing. In this connection, I had been asked by the then Special Assistant to the Secretary to conduct this briefing.

At no time during this meeting (or, for that matter, at any other time) did Mr. Johnson express any animus whatsoever toward any former or present government employee, including Mr. Bloom, the former Special Counsel for Compliance. Particularly, during the course of the meeting he expressed the view that the purpose and nature of the questions to be developed should not be susceptible of seeming to discredit any individual, for that was not the nature of the Department's mission. The Department's mission was to respond to the requests made of the Department by members of the Subcommittee to aid their understanding of the budgetary and enforcement policy issues that were expected to arise during the hearing. Mr. Johnson's counsel during this meeting was that the questions prepared, as well as any other material conveyed, should be designed to adduce only answers that would reflect professional judgments and facts about the merits of the issues before the Subcommittee. At no time during this meeting did Mr. Johnson express or intimate any desire or purpose to impeach the bona fides of any witness, let alone "destroy" Mr. Bloom as a witness.

Senator METZENBAUM suggested a fourth possible allegation pertaining to Mr. Johnson's suggestions that certain language changes be made in the proposed budget narrative for the Office of Special Counsel at DOE. The Senator objected to the fact that the proposed budget for the DOE enforcement effort was reduced from the Department's request of $35 million down to the OMB proposal of $11.9 million, and out of that amount, the Office of Special Counsel was allocated only $6 million. The Senator also suggested that Mr. Johnson may have acted improperly in suggesting to a DOE official that there should be certain language changes in the draft budget narrative.

Mr. Johnson explained in very explicit terms that he only made a suggestion. He did not order the DOE official to make any changes. Mr. Johnson testified:

Senator, I was asked for my views on the memorandum. I gave them. It was not my decision and not my authority to tell him to change it. The actions that he took were at least responsive to the notion that the document states positively what can be done with the resources and does not contain any implication that enforcement actions would not be undertaken when there is time and money to undertake them. (p. 30, April 30, 1981, Hearing Record, Publication 97–9)

Mr. Johnson also explained why he had concluded that the draft should be revised. He stated:

I said that I saw that document as containing an implication that the Department was going to walk away from a large amount of claims, and since I knew the Secretary had taken the position that there was to be no amnesty for oil companies that had violated regulations, that that contained an implication that was contrary to the Secretary's policy. (p. 29, April 30, 1981, Hearing Record, Publication 97–9)

This particular issue was reviewed extensively and thoroughly in the House subcommittee hearings on March 11, with testimony of the other involved DOE officials, and on March 25, with testimony by Mr. Johnson, all of which was under oath. The hearing record demonstrates conclusively that Mr. Johnson made a recommendation which was adopted and implemented by others. In fact, Mr. Landesman in the March 11 hearing stated that, even if he were the confirmed General Counsel of DOE, Mr. Johnson could not direct him to change the budget document. Only Mr. House could give such an order, and, in fact, it was Mr. House who gave the order to modify the text of the OSC budget discussion. Mr. Johnson's letter of June 1 highlights the subcommittee hearing record in establishing the consultant role in the change to the text. Mr. Fygi's letter of June 1, at page 2, clearly corroborates the testimony of Mr. Johnson and the testimony in the House subcommittee. Mr. Fygi's discussion on this issue is as follows:

I was present at the March 3 meeting to which Senator Metzenbaum adverted, along with Messrs. House, Landesman, Corrallo, and Newkirk. Each of our general recollections corresponds with what Mr. Johnson stated as to this matter to the Committee. More particularly, however, I recall that when I examined the draft narrative during this meeting (which was the first occasion on which I had reviewed this document), both I and Mr. House expressed the view that the language chosen was inappropriate in that it did not correspond to what such documents typically are designed to convey. Narratives accompanying any Administration's budget proposals do not speculate as to what a particular funding request will not permit an agency to accomplish, but rather seek to explain the activities that will be accomplished with the money sought. The reservations as to the manner in which the proposed document had been drafted did not originate only with Mr. Johnson, but rather were also expressed contemporaneously by myself and Mr. House as we all examined the document in question.

Once again, it is obvious that the allegation is without merit. It was Mr. Johnson's duty as a consultant to the Secretary to express his view that the draft narrative misrepresented the Secretary's position on an important issue. Mr. Johnson expressed his opinion to the appropriate DOE official, and his suggestion was accepted. There was nothing improper about such a suggestion.

A fifth issue raised during the hearing was Mr. Johnson's participation in a DOE decision relating to an existing contract between DOE and the University of California. The issue was whether DOE should proceed to negotiate a draft contract, in the form of an extension of

the existing contract with the university, or whether the negotiations should be deferred pending a decision on whether to invite competitive bidding. During his testimony before the committee, Mr. Johnson provided the following background information:

In the case of the contract with the University of California, the question was whether it should be extended or not, and this still is under review. The decision had not been rendered within the Department, at the time I was consulted, as to whether the negotiation would solely be with the University of California or be open to competition. Since there was some urgency attached to this I said that it would be desirable to negotiate a draft contract now before the University of California knew for sure that the contract would be renewed with them, giving the Government a better bargaining position in regard to that contract.

It did not, however, lock in the Government to that particular contract since the fundamental decision of whether to extend it or not had not been reached within the Department. My advice was simply to increase the Government's bargaining position in the negotiation. (Pp. 15–16, April 30, 1981, Hearing Record, Publication 97–9.)

Mr. Fygi's letter of June 1, at page 5, which significantly represents the views of the senior DOE procurement officials most directly involved in and responsible for the renegotiation of the University of California contract, forcefully rebuts the allegation that Mr. Johnson participated improperly or with a conflict of interest. He, as he testified, provided advice on the critical tactical issue in the renegotiation. Mr. Johnson's letter of June 1 provides an extensive discussion of the procurement issues and the nature of his advisory participation in the consideration of the contract. Mr. Fygi's discussion on this issue is as follows:

While I am not personally familiar with this matter, Messrs. Rauch, Rawicz and Forst are personally familiar with Mr. Johnson's advice as to this contract activity. They have authorized me to state that they concur with the accuracy of Mr. Johnson's response to the Committee as to this matter, and particularly that they confirm that Mr. Johnson's advice was sought and received as to a tactical question involving only the sequence of the necessary steps that should occur.

More particularly, the contracts with the University of California under which some of this Department's weapons research activities are carried out expire September 30, 1982. The thrust of Mr. Johnson's advice was to recommend that the negotiation with the University of California of contract terms commence in advance of a formal determination as to whether to extend the contracts or to compete them afresh. Mr. Johnson's advice that contract negotiations begin while noncompetitive extension had yet to be decided was designed to further the obvious interests and bargaining position of the government, and from what I know of this matter had the question been put to me I would have provided the very same advice. As a parenthetical observation, the methodology suggested by Mr. Johnson violates no principle of public contract law, particularly when one takes into account the peculiar character of weapons laboratory contracts and the special nature of the authority under the Atomic Energy Act that they are designed to further.

Mr. Johnson was asked for his views on the matter, and he complied with that request. It is obvious that Mr. Johnson did not make an official decision on the contract. He limited his role to expressing his opinion, which was perfectly proper.

Senator METZENBAUM also suggested that Mr. Johnson's involvement in the University of California contract decision created a conflict of interest. The Senator suggested that Mr. Johnson could have opened the door for participation by certain corporate clients of his law firm. According to the Senator, this was accomplished by Mr. Johnson's suggestion that the possibility of competitive bidding not be foreclosed. Mr. Johnson responded to the allegation with the following statements:

It is not conceivable, Senator. None of those clients are in possible condition to run a laboratory of the complexity of Lawrence Livermore. The only thing I was doing was trying to assure that the Government had the best bargaining position when it was negotiating with the University of California.

Under no conceivable set of circumstances would it be possible for any clients of mine to be the competitor in such a situation.

The decision, Senator, as to whether to open the matter up for competition has not been made. It is under review within the Department, and I have not participated in that review. (Pp. 14 and 15, April 30, 1981, Hearing Record, Publication 97–9.)

On this particular question, this Senator, other Senators on and off the committee, and the staffs of several of our committees, including Appropriations, Armed Services, and Energy, would all appreciate that these huge nuclear weapon laboratories and production facilities (which also have civilian energy programs) simply would be beyond the capability of Mr. Johnson's clients by several orders of magnitude. That fact is not intended to discredit the clients; rather, it is a recognition of the complexity and size of these labs and facilities. Consequently, the suggestion of some benefit to those clients from a bidding procedure is highly unrealistic.

It is evident from these statements that there was no conflict of interest. Thus, an analysis of the facts again demonstrates that there was no substance to the allegation.

During the hearing Mr. Johnson was questioned by Senator METZENBAUM on two additional subjects: The nominee's continuing financial relationship with his law firm, and the extent to which both he and his law firm performed legal services for companies labeled by DOE as energy concerns. In response, Mr. Johnson noted that he was an "intermittent consultant." This means that the Government did not pay him on days when he did not work for the Government. Thus, he was not paid by the Government for the time he spent on work for private clients.

Mr. Johnson provided the following additional information to the committee:

I earn only on the basis of work which I have performed or have originated (i.e., brought to the firm myself). I do not share in work performed by others except in work I originated. Thus, I receive no compensation for work done by my partners for Tosco or Morrison-Knudson, neither of which are my clients. If I am confirmed, I will sever my relationship with the firm, and withdraw my capital and accumulated earnings. If any fees for past services remain to be paid after I leave the firm, I will receive them, less my share of the firm's overhead, when they are paid. I will thereafter receive no other compensation. (P. 129, April 30, 1981, Hearing Record, Publication 97–9.)

In referring to the law firm's work for energy related clients, Mr. Johnson testified:

The energy work that our firm did was almost entirely performed by me. One of my partners has assisted the Tosco Corporation. . . . On another matter, a partner has assisted a company called Morrison-Knudsen, but that is the sum total of the energy concerns represented by the firm other than by me. (P. 12, April 30, 1981, Hearing Record, Publication 97–9.)

Moreover, as a consultant, Mr. Johnson has avoided participating in any way in the department's consideration of any proposal of, or other matter related to, Tosco or Morrison-Knudsen.

The facts supplied by Mr. Johnson in his testimony and subsequent submittals to the committee show beyond any doubt that no actual or potential conflicts of interest were created by his status as a consultant and his relationship with his law firm, under the ground rules he employed. The DOE Organization Act provides statutory prohibitions and restrictions regarding recusal by a DOE official in matters related to his prior employment for the past 5 years. These statutory provisions provide the congressional direction on this issue.

Mr. President, this extensive and thorough review of all of the outstanding allegations against Mr. Johnson should clear any lingering cloud on his integrity. The record itself, and all of the corroborating information, stand as redoubtable fortress as yet undaunted in defense of Mr. Johnson's integrity. As Mr. Fygi correctly concluded:

On the basis of this review of the Committee record and my personal observations, I am of the view that any suggestion that Mr. Johnson has committed an impropriety during his service as a consultant to the Secretary is wholly without basis in fact.

I would hope that this debate will clear that lingering cloud once and for all. In the end, Tenney Johnson is a man of unparalleled qualification and integrity for this position. The record now fully supports that conclusion—and we must act today to conclude this debate and all the allegations by confirming overwhelmingly the Johnson nomination. Thank you, Mr. President.

Mr. President, I reserve the remainder of my time.

The PRESIDING OFFICER. Who yields time? The Senator from Ohio.

Mr. METZENBAUM. Mr. President, I yield myself a minute and a half.

Rather than use up all my time. I would like to take this occasion to point out, if my friend from Idaho is suggesting that facts do not confirm that the "v" factor rule has gone by the boards with this administration, there is confirmation of that fact in Platt's oil regulation re-

port of April 24, 1981. Let me read what that states:

Regarding the proposed rule, several sources find particularly perplexing the fact that DOE is still pushing the matter because, they say, the new "v" factor proposal was supposed to have been dropped outright under direct orders from the White House Office of Management and Budget.

It goes on to say:

Does the latter item mean that the White House has left resolution of the new "v" factor proposal up to DOE? Not at all.

Rather, top administration officials are apparently unaware that the issue is still active. This indication has been confirmed in a recent letter from a White House official to an oil company representative, in which the official declared that the "v" factor rulemaking had been "repealed."

Mr. President, I ask unanimous consent that the report be printed in the RECORD.

There being no objection, the report was ordered to be printed in the RECORD, as follows:

PLATT'S OIL REGULATION REPORT

DOE WAGES CAMPAIGN TO PRESERVE ENFORCEMENT EFFORTS

Dept. of Energy and special counsel officials, concerned about Reagan Administration attempts to trim their operations, are waging an intense campaign to preserve their cases against oil companies over at least the next several years. Moreover, according to sources, the campaign is showing signs of succeeding, and companies of all sizes should beware.

Reportedly, enforcement and special counsel officials are examining every opportunity for expanding and prolonging enforcement cases—a crucial exercise now that Congress is examining the proposed DoE budget for the next fiscal year. Included in this process is a tactic that began during the closing months of the Carter Administration—reopening old audits wherever possible. For example, one small downstream firm was recently contacted by the agency regarding its product sales during the last two months of 1973. In this case, an audit had already been conducted covering the period in question—in 1976. Apparently, DoE has uncovered new information requiring a reexamination. Many such examples have emerged over the past several weeks.

The idea of reopening old audits, according to sources, is to pad DoE's list of unresolved cases to strengthen its argument for sufficient funds to maintain its operations. Ironically, this same tactic had been used unsuccessfully by the agency earlier this year with chief White House budget-cutter Stockman, who even publicly ridiculed DoE for inflating the amount of money involved in overcharge cases. But DoE officials now seem to be employing the strategy with better results on Capitol Hill where they reportedly have won commitments from several key legislators for a higher funding level for enforcement efforts than had been requested by the White House.

The current DoE enforcement situation is mirrored all over the federal bureaucracy at the moment. Officials are fighting White House attempts to curtail their programs. Unfortunately, the White House can't possibly keep track of all the independent actions of the agencies. Furthermore, there is still a substantial constituency in Congress that supports enforcement of the now-defunct oil price regulations. Given those two factors, the current survival campaign by both the enforcement and special counsel offices at DoE is given a fair chance of succeeding.

"V" FACTOR MUDDLE LINGERS

Despite a decision made weeks ago by the Reagan White House to drop the matter permanently (see February 27 Reg/Report), the question of whether the "v" factor in the refinery cost allocation rules was valid and is enforceable continues at the Department of Energy, the product of a fierce internal effort by DOE enforcement people to preserve the issue.

Further, unless new attention is devoted to the matter by the White House, or unless the courts somehow strike down the "v" factor rule once and for all, the issue may persist for some time to come.

The "v" factor rule required assignments of increased costs to price-controlled products to be based on the volumetric proportion of output of each product to total refinery output. The rule was made necessary when the government began the long process, in 1974, of decontrolling selected refinery products. The long controversy over the "v" factor began because it was originally implemented as an emergency rulemaking, with no prior opportunity for public review. The emergency action was taken to "correct" a final rule, not a proposal, an action that was ruled as improper by the U.S. Supreme Court last year.

When we last reported on the status of the "v" factor, DOE had just announced it was reviewing its recent new proposed rulemaking—which would have retroactively imposed the "v" factor beginning in 1974—in response to President Reagan's order for a temporary moratorium on new regulations. Meanwhile, a U.S. District Court in Texas had issued a temporary restraining order against the new rule until a decision could be reached on a new suit brought by Mobil.

The combined effect of those two new developments was to arouse hopefulness among refiners that the issue was about to sink out of sight. No such luck.

COURT DECISION NO HELP

The Texas court, ruling on Mobil's claims, reached the same decision as the U.S. Supreme Court last year, namely, that the old Federal Energy Office improperly implemented the "v" factor rule in 1974. Then, more recently, the Temporary Emergency Court of Appeals—the "temporary" judicial body set up in 1971 to rule on wage and price freeze matters—upheld the Texas decision.

If left to stand, the TECA action probably would wipe out much of DOE's current remaining enforcement effort aaginst refiners, because an invalid "v" factor rule would add billions of dollars to refiner cost banks. Unfortunately, the 1974 "v" factor rule is only one of three DOE could bring to bear against refiners. The other two are the new proposed rule, and a reimplementation of the original rule imposed by the Federal Energy Administration on February 1, 1976. The 1976 rule wasn't addressed directly by the TECA decision.

DOE lawyers, buoyed by the apparent TECA omission, are now claiming that even if the original 1974 rule was not invalid, the 1976 rule was properly implemented and therefore a "v" factor limitation applies at least from February 1, 1976 through the January 27, 1981 end of decontrols. On the other hand, the TECA decision declares that the "v" factor rule was invalid from 1974 through decontrol—in essence invalidating the 1976 rule as well. Both DOE lawyers and outsiders acknowledge that it probably will require another round of litigation to resolve this discrepancy.

CAPITALIZING ON INATTENTION

At this point, it appears that the "v" factor issue could be resolved in favor of the DOE enforcement people, thereby insuring many remaining months of litigation for refiners with pending enforcement cases. At the very least, the issue apparently will remain unresolved for some time, mainly because enforcement officials will be able to pursue the matter on two fronts—by declaring that the 1976 rule is valid and enforceable, and by attempting to implement the new proposal.

Top Administration officials, who had been studying many federal regulations considered unnecessary or overly burdensome, recommended elimination of the new proposal. That recommendation was translated into a directive to DoE.

So why is the "v" factor proposal still under active consideration? Basically, there are two reasons:

According to sources, DoE enforcement officials have waged an "'unprecedented campaign" within the agency to preserve the rulemaking—or at least escape the certain death the suspension would have provided—despite orders from the OMB.

Also according to sources, the White House is currently so preoccupied with broader matters—such as the president's health after the assassination attempt and his overall economic package—that administration officials simply haven't had time to concentrate on "tiny" details such as an obscure petroleum regulation.

Does the latter item mean that the White House has left resolution of the new "v" factor proposal up to DoE? Not at all.

"It's amazing," says one source. "Those guys at the White House don't have any idea what's going on at DoE. And at the rate the (president's) economic package is going through Congress, DoE could have the new rule out and conduct several years' worth of enforcement before they find out."

ENFORCEMENT NOT DEAD

The advantage DoE enforcement officials have now is that, even if the White House manages to return its attentions to the "v" factor proposal long enough to eliminate it, the recent TECA decision still leaves open the possibility—for now at least—that the rule may be enforced from February 1976 through decontrol. Trimming two years from the "v" factor restriction would still leave enormous refiner cost banks. But DoE should find sufficient room to pursue recovery of overcharges for several years—a process that sources say DoE enforcement people consider essentially as important as the outcome.

Incidentally, the Reagan Administration may not be able to curtail DoE enforcement activities easily. The agency has found a new willingness by Congress to appropriate money for DoE enforcement efforts (see story on page one). Consequently, assuming DoE either pursues the latest proposed "v" factor rule or has its 1976 rule upheld in the courts, enforcement officials will have the resources to pursue refiners for quite some time.

Despite current delays caused by pending litigation, Department of Energy officials seem resolute to implement the agency's crude oil entitlements clean-up mechanism essentially as proposed.

The April 2 deadline for public comments on the proposed entitlements clean-up scheme (see March 6 REG/REPORT) has come and gone, and still the agency hasn't issued its final rule. The reason, according to officials, is that the agency is going to have to wait until the several challenges to the final (March) regular monthly entitlements list are resolved.

Currently, a number of U.S. District Court judges have issued injunctions against the March entitlement list, primarily because the plaintiffs involved feared they would lose benefits. The current legal entanglement is so severe, say officials, that it may be at least several more weeks before the March list can be released. Until then, DOE will use the extra time to fine-tune its clean-up mechanism.

According to officials, no final decisions

have been made on the clean-up rule. But sources close to the agency say it is possible the final rule will be exactly like the second alternative proposal. That is, firms would report adjustments to their previous entitlement calculations, and then EPA would compute new balance sheets for each month in question—between January 1980 and January 28, 1981. And the initial $50-million deposit to the special "escrow account" planned to be set up by DOE will remain, despite vehement opposition to the idea by many refiners. Reportedly, refiners will be assessed their shares for the account based on their proportional runs to stills for December 1980, the last full month in the entitlements program.

Mr. METZENBAUM. Mr. President, Mr. Johnson is going to be confirmed. But that does not make what he did right; nor does not it make his involvement regarding the "v" factor and the White House's involvement in the "V" factor right.

As I said to Mr. Johnson when he came into my office for a meeting on his confirmation, I do not understand some of the new people in this administration. Do they go home at night and pride themselves in the fact that they have worked toward eliminating $13 million in claims lodged by consumers, wholesalers, and suppliers, against the oil companies? They feel that they did a great job that day. But I am not certain why they do it.

I am not certain why the "V" factor may be repealed. The money is owed to the Government, and what earthly reason there is for serving the oil companies in this manner and doing so much harm to the people of this country is difficult for me to understand.

As a matter of fact, in these days of crying need for balancing the budget some of these overcharge dollars would at least have helped in that respect. But when it comes to the oil companies, this White House and this nominee seem to have very little concern for anyone but the oil companies.

The PRESIDING OFFICER. The time allotted to the Senator from Ohio has expired.

Mr. McCLURE. Mr. President, how much time do I have?

The PRESIDING OFFICER. One minute and twenty seconds.

Mr. McCLURE. Mr. President, I yield myself the remainder of my time.

Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. McCLURE. Mr. President, again—and I do not want to be simply repetitious—what the Senator from Ohio has suggested simply does not accord with the facts as the record shows them.

Mr. Fygi, who is the Acting General Counsel, whose letter has already been placed in the RECORD, reviewed the precise circumstances to which the Senator from Ohio has made reference.

In his words, everyone complied with existing laws and regulations of the United States and of the Department of Energy under which they were acting, and scrutiny of the v-factor regulation was not the decision of Mr. Johnson. It was the decision of the Acting General Counsel and others who were properly making that kind of decision. I refer Members to the letter which has been placed in the RECORD.

I do not wish to belabor that point and take any further time by reading the letter again at this point, but I think all of the allegations that have been made have been answered on the record. They have been corroborated.

Incidentally, I would just state for the record that Mr. Fygi, who prepared the letter I just referred to, was the Deputy General Counsel under the Carter administration. He is not an appointee of this administration and, therefore, under the Senator from Ohio's views might have more credibility.

The PRESIDING OFFICER (Mr. HEINZ). The Senator's time has expired.

Mr. THURMOND. Mr. President, today I am pleased to support President Reagan's nomination of Mr. R. Tenney Johnson for the position of General Counsel of the Department of Energy.

Mr. Johnson has a long and distinguished career of exemplary Government service. Among the positions which he has held are: Member of the Civil Aeronatics Board; General Counsel with the Energy Research and Development Administration; General Counsel for the National Aeronautics and Space Administration; General Counsel for the CAB; Deputy General Counsel for the Department of Transportation; Deputy General Counsel for the Department of the Army; and attorney in the office of the General Counsel, Department of Defense.

Mr. Johnson has also served his country on various Government commissions and task forces, demonstrating his dedication and resolve to work for sound policies that serve the best interest of the American people. I believe he has the knowledge, experience, and capacity to serve with distinction in this office and to effectively implement the policies of the Reagan administration.

Mr. President, there have been allegations by some on the other side of the aisle that Mr. Johnson engaged in improper activities while serving as a consultant to the Department of Energy. I understand that these allegations have been exhaustively checked out by the Energy and Natural Resources Committee, and as indicated by the committee's overwhelming vote favorably reporting the nomination, there seems to be no basis for such concerns. Accordingly, Mr. President, I hope the Senate will approve this nomination so that Mr. Johnson can get on with the important responsibilities awaiting him as General Counsel of the Department of Energy.

Mr. MURKOWSKI. Mr. President, a number of issues have been raised concerning Mr. Johnson's performance as a DOE consultant. The starting point for analyzing these issues is defining the proper role of a consultant to a Federal agency. The Federal Personnel Manual defines a consultant as a person who gives his views or opinions on problems or questions presented him by the agency, but he neither performs nor supervises performance of operating functions. The OMB's guidelines for the use of consulting services, issued in 1978, state that consulting services will not be used in performing work of a policymaking, decisionmaking, or managerial nature which is the direct responsibility of agency officials.

It is clear to me that these standards have been fully complied with by Mr. Johnson. Mr. Johnson did not make policies or decisions while serving as a consultant at DOE. He did not perform operating or managerial functions. He merely provided advice. No one has provided any facts to suggest otherwise.

Mr. Johnson told the committee during his nomination hearing that he was very conscious of the fact that he had no authority as a consultant, and that he had no power to compel. He was well aware of the limitations placed on the role of a consultant, and I am satisfied that he acted properly in every instance.

I would add, Mr. President, that I am most impressed with Mr. Johnson's qualifications for the position of General Counsel of DOE. He has had substantial experience as a high-level official in a number of agencies that deal with highly technical issues, such as the Civil Aeronautics Board, the Energy Research and Development Administration, and the National Aeronautics and Space Administration. Since the DOE will have major responsibilities in the area of energy research and development, and technical areas, Mr. Johnson has excellent credentials to serve as the chief legal adviser for that Agency.

The PRESIDING OFFICER. The question is, Will the Senate advise and consent to the nomination of R. Tenney Johnson, of Maryland, to be General Counsel of the Department of Energy. The yeas and nays have been ordered, and the clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Maine (Mr. COHEN), the Senator from North Carolina (Mr. EAST), the Senator from South Dakota (Mr. PRESSLER), the Senator from New Mexico (Mr. SCHMITT), the Senator from Texas (Mr. TOWER), and the Senator from Wyoming (Mr. WALLOP) are necessarily absent.

I further announce that, if present and voting, the Senator from North Carolina (Mr. EAST), and the Senator from Texas (Mr. TOWER), would each vote yea.

Mr. CRANSTON. I announce that the Senator from New Jersey (Mr. BRADLEY), the Senator from South Carolina (Mr. HOLLINGS), and the Senator from Massachusetts (Mr. KENNEDY) are necessarily absent.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who desire to vote?

The result was announced—yeas 88, nays 3, as follows:

[Rollcall Vote No. 135 Ex.]

YEAS—88

Abdnor	Bumpers	Cranston
Andrews	Burdick	D'Amato
Armstrong	Byrd,	Danforth
Baker	Harry F., Jr.	DeConcini
Baucus	Byrd, Robert C.	Denton
Bentsen	Cannon	Dixon
Biden	Chafee	Dole
Boren	Chiles	Domenici
Boschwitz	Cochran	Durenberger

Eagleton	Johnston	Pryor
Exon	Kassebaum	Quayle
Ford	Kasten	Randolph
Garn	Laxalt	Riegle
Glenn	Leahy	Roth
Goldwater	Levin	Rudman
Gorton	Long	Sarbanes
Grassley	Lugar	Sasser
Hart	Mathias	Simpson
Hatch	Matsunaga	Specter
Hatfield	Mattingly	Stafford
Hawkins	McClure	Stennis
Hayakawa	Melcher	Stevens
Heflin	Mitchell	Symms
Heinz	Moynihan	Thurmond
Helms	Murkowski	Tsongas
Huddleston	Nickles	Warner
Humphrey	Nunn	Weicker
Inouye	Packwood	Williams
Jackson	Pell	Zorinsky
Jepsen	Percy	

NAYS—3

Dodd	Metzenbaum	Proxmire

NOT VOTING—9

Bradley	Hollings	Schmitt
Cohen	Kennedy	Tower
East	Pressler	Wallop

So the nomination was confirmed.

Mr. BAKER. Mr. President, I move to reconsider the vote by which the nomination was confirmed.

Mr. McCLURE. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. BAKER. Mr. President, I ask that the President be immediately notified that the Senate has given its consent to this nomination.

The PRESIDING OFFICER. Without objection, it is so ordered.

NOTICE OF INTENTION TO MOVE TO SUSPEND PARAGRAPH 7(a)(1) OF RULE XXVI—1980 PROTOCOL AMENDING THE INTERIM CONVENTION OF CONSERVATION OF NORTH PACIFIC FUR SEALS

Mr. STEVENS. Mr. President, in accordance with rule V of the Standing Rules of the Senate, I hereby give notice in writing that it is my intention to move to suspend paragraph 7(a)(1) of rule XXVI for the purpose of allowing the Senate to consider Ex. S, 96-2, 1980 Protocol Amending the Interim Convention of North Pacific Fur Seals.

LEGISLATIVE SESSION

Mr. BAKER. Mr. President, I ask unanimous consent that the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

INTERNATIONAL RECORD CARRIER COMPETITION ACT OF 1981

The PRESIDING OFFICER. Under the previous order, the Senate will proceed to the consideration of Calendar Order No. 37, which the clerk will state by title.

The legislative clerk read as follows:

A bill (S. 271) to repeat section 222 of the Communications Act of 1934.

The PRESIDING OFFICER. Under the previous order, the Senator from South Carolina (Mr. THURMOND) is recognized to offer a motion.

Mr. BAKER. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. THURMOND. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. THURMOND. Mr. President, I send to the desk a motion and ask that it be stated.

The PRESIDING OFFICER. The motion will be stated.

The legislative clerk read as follows:

The Senator from South Carolina (Mr. THURMOND) moves that S. 271, Calendar Order No. 37, be referred to the Committee on the Judiciary for a period not to exceed 7 calendar days, and that thereafter the committee be deemed discharged from further consideration thereof and the bill returned to the calendar.

Mr. THURMOND. Mr. President, as I understand, we have 45 minutes to debate, is that correct?

The PRESIDING OFFICER. The Senator is correct.

Mr. THURMOND. Mr. President, I yield to the distinguished Senator from Maryland (Mr. MATHIAS).

The PRESIDING OFFICER. The Senator from Maryland.

Mr. MATHIAS. Mr. President, I thank the distinguished chairman of the Judiciary Committee.

Mr. President, I rise in strong support of this motion. It seems to me that this bill should be referred to the Judiciary Committee to examine its possible impact on antitrust questions. We all know that the bill repeals a major exemption to the antitrust law and this repeal will have a tremendous impact on competition in international telegraphic communications. What effect it will have beyond that, I do not know.

That, of course, is the purpose for which the distinguished chairman of the Committee on the Judiciary has made the motion, so we can determine. We do not know now what the impact will be. But we need to find out.

We need to recognize the fact that there has been a revolution in the whole field of communications, a revolution of extraordinary proportions. We have seen, within the last decade, the rapid employment of communications satellites, for example, which are affecting this field.

I do not know how this particular legislation will impact on other areas of this widespread communications network, which is rapidly proliferating all over this globe. Since we do not know, I think we ought to find out. And the time to find out is now, by a brief—very brief—examination by the Committee on the Judiciary, which is traditionally charged with the oversight of antitrust issues.

Since the Committee on the Judiciary is charged with oversight of the antitrust laws, which is the basic tenet of the free enterprise system—that is what we are talking about, free enterprise; we are talking about maintaining the competition of the marketplace—then it strikes me that the Senator from South Carolina, the chairman of the Committee on the Judiciary, has been eminently reasonable in suggesting that the committee, with the special body of expertise in antitrust, should be allowed to comment formally on the bill.

Mr. President, this is entirely customary in the Senate. I do not believe that I can recall, in my limited experience here, a situation when a committee has expressed an interest of this sort, has agreed on a very brief examination, has agreed to report the bill back without amendment, and, as a mere matter of comity between committees, such an arrangement has not been agreed to.

Mr. President, I listen with great respect to the Committee on Commerce and to the reports that it issues on highly technical subjects such as the Communications Act. I would be strongly influenced in any final decision I make about the views of the Commerce Committee in that kind of area. By the same token, I suggest that the views of the Committee on the Judiciary on the antitrust aspects of the bill are equally worth consideration by Members of the Senate who may serve on neither committee. I should think that it would be a service to the entire Senate to have the views of the Committee on the Judiciary on the antitrust aspects of the bill.

Mr. President, I, myself, strongly support the chairman of the Committee on the Judiciary, and I urge other Senators, in the interest of the whole Senate—not one committee or the other, but in the interest of the whole Senate—to allow the Committee on the Judiciary the brief period of time that has been requested to review the antitrust aspects of the bill.

The PRESIDING OFFICER. The Senator from South Carolina.

Mr. THURMOND. Mr. President, I thank the able Senator from Maryland for his remarks on this subject. He is the ranking majority member of the Committee on the Judiciary, and I think he has made a very fine point in his remarks.

I yield now to the able Senator from Nevada (Mr. LAXALT).

Mr. LAXALT. I thank my chairman.

Mr. President, the telecommunications industry plays a significant role in the U.S. economy, and has a pervasive influence on the lives of every citizen in the United States. As we enter the information age, telecommunications can be expected to play an even larger and more important role. For this reason, it is extremely important that Government address questions of monopoly concentration in this vital industry.

The Government has in the past conveyed monopoly power on a limited number of carriers in the telecommunications industry. As we move toward the desirable goal of deregulation in this industry, Government must accept responsibility for making certain that competition will replace regulation in an orderly and responsible fashion to assure its viability and vitality.

The situation of Western Union is a case in point. Pursuant to section 222 of the Communications Act of 1934, enacted in 1943, Western Union was

granted a statutory antitrust exemption to permit its merger with the Postal Telegraph and Cable Corp. As a result of this merger, Western Union obtained a monopoly position in domestic telegraph and telex service. However, section 222 expressly prohibited Western Union from entering into the international telegraph and telex business. This prohibition was considered necessary to prevent Western Union from routing its domestic telegraph and telex traffic to its own international operations, and thereby improperly extending its Government protected domestic monopoly power to the international market as well.

The Committee on Commerce, Science, and Transportation recently reported S. 271, which would repeal section 22, thus permitting Western Union to freely enter the international record communications market. S. 271, however, fails to provide any precompetitive safeguards to protect against a lessening of international competition by virtue of Western Union's entry into that market.

On January 16, 1981, the FCC declared that Western Union still dominates virtually 100 percent of the domestic Telex/TWX market:

The public switched record submarket consists almost entirely of Western Union's Telex/TWX service. Since AT&T discontinued TWX service in 1971 and sold some of the associated facilities to Western Union, Western Union has maintained virtually a 100 percent share of this market. Recent entry by Graphnet into the market has had no noticeable effect on Western Union's performance. FCC Further Notice of Proposed Rulemaking, CC Docket No. 79–252, FCC 80–742, paragraph 195, January 16, 1981.

Again on February 19, 1981, the FCC reaffirmed Western Union's continuing market "dominance":

While the Commission has authorized other carriers to provide domestic competition for Western Union, as well as expansion of IRC gateways to 21 additional cities, thereby further diminishing Western Union's domestic market power, it is apparent from the agreements involved in this case that Western Union presently retains some portion of the dominance which originally concerned Congress in 1943. FCC Memorandum Opinion and Order, February 19, 1981, p. 6, fn. 12.

In light of Western Union's continued and well-recognized dominance of the domestic telecommunications industry, its imminent entry into the international market, which would be permitted by the repeal of section 222 by S. 271, clearly raises significant antitrust concerns. Recognizing this fact, the distinguished chairman of the Judiciary Committee, (Mr. THURMOND) wrote to the chairman of the Commerce Committee and requested a limited sequential referral of S. 271 in order to examine these implications. He did so pursuant to the Rules of the Senate, which provide that the Judiciary Committee has jurisdiction over measures involving the "protection of trade and commerce against unlawful restraints and monopolies."

Unfortunately, the chairman of the Commerce Committee chose not to concur in Senator THURMOND's request. He declined to do so despite the fact that, in a "Dear Colleague" letter dated May 5 of this year, he himself recognized that there are, in fact, substantial antitrust implications involved in the legislation.

I was disappointed in the reaction of the Commerce Committee to what I regard as a very reasonable proposal on the part of Senator THURMOND.

Mr. PACKWOOD. Will the Senator yield?

Mr. LAXALT. Yes.

Mr. PACKWOOD. What did the Senator quote from that he said we said in our letter?

Mr. LAXALT. This is a "Dear Colleague" letter dated May 5 of this year and the statement is to the effect that the chairman recognized cerain substantial antitrust implications are involved in the legislation.

Mr. PACKWOOD. Would the Senator read that letter and tell us where we said that?

Mr. LAXALT. I do not have the letter before me, Mr. President, but I am certain the chairman will provide.

Mr. PACKWOOD. Mr. President, I would very much appreciate it if the chairman would provide that because we never said that.

Mr. LAXALT. Surely, the chairman will respond to that, Mr. President, in his remarks.

Mr. PACKWOOD. All right.

Mr. LAXALT. In the first place, as noted in the dear colleague letter circulated to all Senators today, the Judiciary Committee in no way contends that S. 271 should not originally have been referred to the Commerce Committee or challenges the primary jurisdiction of that committee. The brief sequential referral now being sought is in no way intended to impact on that jurisdiction. It is merely sought to enable the Judiciary Committee to carry out its obligations under the Senate Rules.

As also pointed out in the dear colleague letter, over the years, the Judiciary Committee has frequently agreed to share jurisdiction with the Commerce Committee and other committees with substantial interest in a bill even though the legislation may have been primarily within the Judiciary Committee's jurisdiction. Of particular relevance today, the Judiciary and Commerce Committees have shared jurisdiction over communications matters in the past. One such example involved the consideration of the interconnection question and other issues affecting A.T. & T. in 1973–74.

Earlier in this session of Congress, the Committee on the Judiciary agreed to a joint referral of S. 682, a bill involving the antitrust jurisdiction of the FTC, even though the Senate Parliamentarian had determined that the Judiciary Committee had primary jurisdiction over that bill.

In this case the Judiciary Committee is not seeking a joint referral. All that is being sought is the opportunity of a brief referral of 15 days in order to examine those aspects of S. 271 that relate to the protection of trade and commerce against unlawful restraints and monopolies. Floor consideration would not be unduly delayed, and the Senate would have the benefit of the Judiciary Committee's expertise on these matters.

Mr. President, faced with the ever-increasing complexity of legislation, the Senate will only be able to function if we approach issues such as the one now before us in a spirit of reason and comity. If we do not, any Senate committee would be able to deprive another of jurisdiction over matters properly with the other's scope by the simple device of insuring that legislation dealt predominantly with a subject within the original committee's jurisdiction.

I believe Senator THURMOND's very limited request for a brief referral of S. 271 to be extremely reasonable. It was my hope that, in a spirit of comity, the Commerce Committee would comply with that request. Unfortunately, they have chosen not to do so.

I would therefore urge the Members of the Senate to now support the motion of the distinguished Senator from South Carolina for that limited referral.

Mr. President, in conclusion, I have had brought to my attention the "Dear Colleague" letter previously referred to dated May 5, 1981, written by the distinguished chairman of the committee and joined in by Senators CANNON, HOLLINGS, and GOLDWATER.

Mr. PACKWOOD. Is this the one where the Senator said we had substantial antitrust implications?

Mr. LAXALT. I stand corrected.

Mr. PACKWOOD. I thank the Senator.

Mr. LAXALT. In part——

Mr. PACKWOOD. No. That is enough. I thank the Senator.

Mr. LAXALT (continuing). The letter in question indicates——

Mr. PACKWOOD. No more.

Mr. LAXALT (continuing). Even though it has antitrust implications.

I thank you, Mr. President.

The PRESIDING OFFICER. Who yields time?

Mr. THURMOND. Mr. President, I wish to thank the distinguished Senator from Nevade for his splendid statement he has made on this subject.

I now yield to the able Senator from Pennsylvania (Mr. SPECTER).

The PRESIDING OFFICER. The Senator from Pennsylvania is recognized.

Mr. SPECTER. Thank you, Mr. President.

Mr. President, I am pleased to lend my voice of support for the motion by the distinguished chairman of the Judiciary Committee.

Excellent arguments have already been expressed by Senator MATHIAS and Senator LAXALT, and I know there is a long list of Senators of the Judiciary Committee who are marshaled here this afternoon to present cogent reasons why the resolution should be adopted.

I have noted Senate rule XXV(1)(16) which provides that the Committee on the Judiciary has jurisdiction over "protection of trade and commerce against unlawful restraints and monopolies."

In my judgment, there is no doubt at all that the legislation in issue involving the telecommunications industry and Western Union does involve very

substantial issues which touch upon the antitrust matters.

I think it is obvious to say that the Judiciary Committee has developed extensive expertise on antitrust matters and there would be a real benefit to the Senate and to the Nation in having the experience and expertise of the Judiciary Committee apply to this legislation.

Certainly, two heads are better than one and two committees are better than one.

The request is a very moderate one in terms of tenure and I see nothing which would be of harm to the Commerce Committee in having it cede consideration of this measure to the Judiciary Committee for this very brief period of time.

I am aware of the concern that there could be some difficulty as a matter of precedent. But I think it is unusual for the chairman of the Judiciary Committee to make the request which has been tendered in this case and that in the spirit of compromise which I have noted to be so prevalent in the healthy discussion in this very august body, we would be well served by acceding to the request which the chairman of the Judiciary Committee has made.

Mr. PACKWOOD. Mr. President, will the Senator yield?

Mr. SPECTER. I yield.

Mr. PACKWOOD. Would it be the suggestion of the Senator from Pennsylvania, then, that any bill that has antitrust implications of any kind for which the Judiciary Committee asks subsequent jurisdiction be allowed?

Mr. SPECTER. I would say that question, that if the matter were deemed sufficiently important by the Judiciary Committee and its chairman that such a request should be honored.

I have noted a plethora of things to do by the Judiciary Committee so I would not expect it to step out unless the request were well justified.

Mr. PACKWOOD. Mr. President, in the Fair International Trade Act, which prohibited the marketing of imported merchandise at less than its fair market value, this shall be held and considered to be an antitrust law of the United States. That bill was referred to the Finance Committee. If the Judiciary Committee wants it they can have it after the Finance Committee is done with it. Is that right?

Mr. SPECTER. If the chairman of the Judiciary Committee thought it important enough to make a sufficient request, right. If not, let it pass.

Mr. PACKWOOD. Under the bill in the Banking Committee that prohibits bank mergers or acquisitions of banks by bank holding companies if such transactions would result in a monopoly, furtherance of a conspiracy to monopolize or, substantially lessen competition in any relevant market—even though that goes to the Banking Committee, if the Senator from South Carolina wants it the Judiciary Committee shall have it afterwards?

Mr. SPECTER. Yes, as long as it reaches sufficient imports to command the attention of the chairman of the Judiciary Committee as a preliminary to this kind of an extensive debate and discussion in the Chamber, I would say that passes the threshold.

Mr. PACKWOOD. So long as we understand that is the position of the Judiciary Committee. Every single bill that goes to any other committee that has any antitrust relevance, primary, secondary, or tertiary at all, and the Senator from South Carolina asks that it be sent to his committee automatically as a matter of right that is going to happen.

Mr. THURMOND addressed the Chair.

Mr. PACKWOOD. Wait a minute.

Mr. THURMOND. Mr. President, whose time is he speaking on? Let him speak on his own time.

The PRESIDING OFFICER. The Senator from Pennsylvania has the floor.

Mr. THURMOND. Mr. President, if he wishes to speak on his own time, OK, but not on our time.

Mr. SPECTER. Mr. President, I yield to the Senator from South Carolina.

The PRESIDING OFFICER. The Senator from South Carolina is recognized.

Mr. THURMOND. Mr. President, if the Senator from Oregon wishes to speak now he may speak.

Mr. PACKWOOD. No. Go ahead.

The PRESIDING OFFICER (Mrs. HAWKINS). Who yields time?

If neither side yields time, time shall run equally against both sides.

Mr. PACKWOOD addressed the Chair.

The PRESIDING OFFICER. The Senator from Oregon.

Mr. PACKWOOD. Madam President, I yield 1 minute to the Senator from Washington.

The PRESIDING OFFICER. The Senator from Washington is recognized.

Mr. GORTON. Madam President, I share the concern of the chairman of the Commerce Committee the Senator from Oregon that referral of S. 271, the Communications Act, to the Judiciary Committee would abruptly and unjustifiably cut into the jurisdiction of every substantive committee in the Senate.

The issue goes beyond the antitrust implications in the communications area. A decision by this body to refer S. 271 to the Judiciary Committee would unravel our system of organizing committees by functional subject and would by the same logic allow judiciary to claim jurisdiction over the airlines industry, the trucking industry, international merchant shipping, agriculture, export policies, small business, banking, pipeline regulation—all areas with exemptions from the antitrust laws.

As chairman of the Merchant Marine Subcommittee, I am especially disturbed by the attempt of the Judiciary Committee to seek referral of any legislation having even remote antitrust implications.

Such an expansive view of the Judiciary Committee's jurisdiction might compromise the Commerce Committee's efforts to clarify section 15 of the Shipping Act, 1916.

Section 15 is the heart of that act. It permits cooperative agreements among carriers in our foreign waterborne commerce that would otherwise violate the antitrust laws if those agreements are first approved by the Federal Maritime Commission.

Over the last 66 years, the precedent is clear: International shipping matters are handled exclusively by the Commerce Committee, regardless of whether the legislation has antitrust implications.

Congress in the Shipping Act of 1916 plainly rejected the applicability of traditional American antitrust principles to the foreign waterborne commerce of the Nation.

It was the House Merchant Marine and Fisheries Committee which studied the collusive activities of oceanborne carriers and recommended the 1916 antitrust exemption, and it was the Senate Commerce Committee which concurred in this body. That 1916 Congress was no stranger to antitrust concepts, having passed the Clayton Act only 2 years earlier.

In 1961, Congress reacted to the Supreme Court decision in *Isbrandtsen Co. v. United States*, 358 U.S. 481 (1958), and amended the 1916 act to reiterate the inapplicability of domestic U.S. antitrust principles to this field of international commerce.

Again, the House Merchant Marine and Fisheries Committee and the Senate Commerce Committee drafted these amendments rather than the Judiciary Committees of the Congress.

Recent actions of the Senate Commerce Committee provide equally strong precedent for its exclusive jurisdiction over international shipping issues.

In 1978, Congress amended the Shipping Act with controlled carrier legislation; in 1979, it also enacted antirebating legislation. Neither of these bills was referred to Judiciary, although both the House Merchant Marine and Fisheries Committee and the Senate Commerce Committee considered the antitrust objections of the Department of Justice, and rejected them.

Just last year, the Senate Commerce Committee reported out the Ocean Shipping Act of 1980. This bill provided broad antitrust exemptions for cooperative activities in international shipping, for example, conferences and shipping councils, that would otherwise violate the antitrust laws. This legislation, referred solely to the Commerce Committee, passed the Senate unanimously.

The expertise and understanding of the problems facing our merchant marine and the international shipping community lie not in the Judiciary Committee but in the Senate Commerce Committee. Failure to evaluate policy changes relating to U.S. shipping in their proper international, rather than domestic, setting could easily force U.S. ships into a position of competitive disadvantage.

Other nations permit their vessels to operate without antitrust-type restrictions and those nations resist U.S. efforts to enforce its antitrust laws extraterritorially. Antitrust restrictions handicap U.S. vessel operators, causing them to lose substantial U.S. import and export cargoes to foreign ships, and have the potential for depriving U.S. shippers of efficient and responsive service.

The antitrust exemptions in the Shipping Act permit an alternative form of regulation by the Federal Maritime Commission. The Commerce Committee, in grappling with these issues over the years, has developed an understanding of

and sensitivity to the complexities of international transportation regulation.

If the reasoning of the Judiciary Committee prevails in this communications matter, it will, at a later time, be a simple matter to negate the 66 years of the Commerce Committee's expertise in maritime matters and to assume—contrary to the intent of the present law—that antitrust considerations should obscure consideration of the unique needs of our shipping community.

I, therefore, urge my colleagues to support the position of Senator PACKWOOD and the Commerce Committee.

Mr. PACKWOOD. Madam President, I yield 5 minutes to the Senator from Arizona.

The PRESIDING OFFICER. The Senator from Arizona is recognized.

Mr. GOLDWATER. Madam President, we are here today to take up S. 271, the International Record Carrier Competition Act of 1981, Senate Calendar No. 37, which I introduced in February of this year. S. 271 repeals section 222 of the Communications Act of 1934.

Section 222 was enacted in 1943, creating a statutory antitrust exemption which allowed the merger of Western Union Telegraph Co., and the Postal Telegraph & Cable Corp.

I think it is perfectly proper to explore the reason why this has suddenly been asked to be transferred to the Judiciary Committee. A former Attorney General of the United States came down here the day this bill was put on the calendar to attend a prayer breakfast. He represents either ITT or RCA or both, not small companies, but he is well recompensed for it, and that day an objection was called for, a hold order, by one of the members of the Judiciary Committee.

The question in my mind is, Would they have ever come up with this had not the former Attorney General interceded?

While section 222 allowed these two companies to merge and have a monopoly position in domestic telegraph and telex service, the merged entity, Western Union, was forbidden to enter into the international telegraph and telex business.

The logic behind the prohibition was that since the newly merged corporation—Western Union—had a monopoly, it would feed the domestic telegraph and telex traffic to its own international subsidiary, which would then have a monopoly on international telegram and telex traffic originating in the United States.

Section 222 is being repealed because the merged entity—Western Union—no longer has a monopoly on domestic traffic. In the domestic market, the demand for services—telegraph—traditionally offered by Western Union has declined substantially.

This is due to the wealth of substitute services offered by Satellite Business Systems, American Satellite Co., General Telephone, Telenet, and Graphnet.

The Judiciary Committee has requested referral of S. 271. The legislative history of the Senate consideration of section 222 of the Communications Act of 1934 makes it clear that this provision has always been a matter of Commerce Committee jurisdiction, even though it has obvious antitrust implications.

Rule XVII of the Senate Rules provides the referral of a bill be made to the committee with jurisdiction over the subject matter which predominates in the proposed legislation. The predominant matter of S. 271 is economic regulation of the communications industry, and not simply antitrust immunity. That rule was followed when S. 271 was introduced in this Congress, and the Parliamentarian properly referred S. 271 to the Commerce Committee. There were no changes to S. 271 in committee, so the Parliamentarian's ruling should stand. The Judiciary Committee seeks referral of this bill because of what it maintains to be the underlying antitrust considerations. If the Judiciary Committee is successful, it will effectively undermine rule XVII.

I am pleased to have this question of jurisdiction put before the Senate for a vote. I believe the integrity of the committee structure would be seriously jeopardized by permitting referral of my bill, S. 271, to the Judiciary Committee, since it would set a precedent of encroachment by committees.

My 25 years of service in the Senate have taught me to avoid disputes such as these if at all possible, unless they involve significant issues. This is a truly significant matter, and I, therefore, urge my colleagues to support Senator PACKWOOD and the Commerce Committee in this matter.

Madam President, if the chairman of the Judiciary Committee is right in his supposition that his committee should have this, I suggest that he can rewrite the 1934 Communications Act, and I question the ability of the Judiciary Committee to write technical matters such as communications. This is properly referred to the only committee in this body that has the expertise, the knowledge, and the background. We can go through case after case after case which will hold this to be true, which I am sure the chairman of the committee is going to do.

I do not think there is any necessity for this matter even being brought to the floor. Time after time after time the Commerce Committee has exercised its proper jurisdiction in the field, and I suggest, Madam President, if we are not allowed to do that, this committee might as well quit in this particular field.

I thank the chairman of the committee.

Mr. PACKWOOD. Madam President, I thank the Senator from Arizona.

The Senator from Arizona has well stated what the facts of the bill are. Forty years ago Western Union was failing and Postal Telegraph was failing, and we allowed the two of them to merge, and gave them an exemption from the antitrust laws and said in exchange for that they could not compete overseas.

In the last 40 years their percentage of the communications market by the merged company has gone down and down and down. They are no longer even a monopoly in the United States.

But during those 40 years RCA, Globecom, as they call their international subsidiary, and ITT Worldcom have been competing overseas, along with a company that is a spinoff of Western Union called Western International, which was spun off totally when this bill was passed in the early forties.

Those three companies do not want to allow Western Union to compete with them overseas, even though their parent companies compete with Western Union here.

Let us be serious about this. This is not a small potatoes bill. You are not going to get a letter from people making less than $100,000. This is a "big boys' " bill, and some of the big boys are trying to keep other big boys from competing. That is the sum and substance of the merits of this bill.

Let us take a look at the history. It was introduced. The chairman of the Judiciary Committee had a right to ask that it be referred to the Judiciary Committee. He did not do that. All the time we had the bill in committee the chairman of the Judiciary Committee did not ask for referral to his committee, he did not come and testify, did not send a letter.

We did hear testimony from RCA and ITT, and Western Union International, and they are very opposed to the bill.

We reported the bill out and reported it out without any change, so that there was no argument that could be made that there was no reason for the Judiciary Committee to ask for a shared jurisdiction when the bill was put in, but there was when we put it out because the bill was changed. It had not changed.

What happened in between is that the lobbyists for ITT Worldcom went to one of the Senators on the Judiciary Committee and asked that Senator to put a hold on this bill, and I will tell you that that lobbyist and those companies do not give a darn as to jurisdictional dispute. Those companies simply want to kill the bill, and if they kill it in the Judiciary Committee, which has abolished its Antitrust Subcommittee, all the better, so far as that is concerned. They do not care about the merits of jurisdiction.

That bill came out, went on the Calendar, a hold was put on it by the chairman of the Judiciary Committee, and not until a week later did we even get a letter suggesting that he wanted a referral. Why? They wanted a referral solely so that they could start to establish the precedent of taking jurisdiction over any of these bills that have some possible antitrust implications.

The Senator from Pennsylvania said it very well, and for anybody who is on any other committee he had better well watch it.

I read the Fair International Trade Act which prohibits the marketing of imported merchandise at less than the fair market value at which such merchandise is sold in foreign markets. It provides that this "shall be held and considered to be an antitrust law of the United States," and is referred to the Committee on Finance.

But if the Judiciary Committee wants it, the Senator from Pennsylvania says they can have it.

I read the bill that prohibits bank

mergers or acquisitions of banks by bank holding companies if such transactions would result in a monopoly, the furtherance of a conspiracy to monopolize, or substantially lessen competition in any relevant market, and that was sent to the Banking Committee. No subsequent referral to the Judiciary Committee, but if they want it, the Senator from Pennsylvania says, they can have it.

I read the bill that was introduced that prohibits persons engaged in the production or refining of crude oil from acquiring any pipeline or transportation asset; translated it is divestiture of the oil companies, and that goes to the Committee on Energy and Natural Resources. You talk about an antitrust bill, and if the Judiciary Committee wants it they can have it, according to the Senator from Pennsylvania.

I can go right down the list of agricultural marketing acts that exempt the farmers from the antitrust laws that go to the Agricultural Committee, but if Judic'ary wants it they can have it.

If that is what we want in this Senate, if every one of us on the Banking Committee, the Agriculture Committee, the Finance Committee, the Public Works Committee or any other committee wants to say that just because any one of the bills we have in our committee might be said to have some tertiary effect on the antitrust laws, an itsy-bitsy, teeny-weeny effect, the Judiciary Committee can have it, then vote for what the Senator from South Carolina asks. But if you want to maintain the right of all of your committees to have a fair share of judging what should be the competitive aspects on the economy of this country, then I ask you not to vote for the motion to refer.

I will say this in closing: Most importantly, do not vote for the motion to refer at this time on this bill because this bill has very, very limited effects on the antitrust situation in the United States. All it does is allow Western Union to compete overseas, that is all it does.

I might say one last thing: The Judiciary Committee says it wants this bill for just 7 days. The Judiciary Committee at the direction of the Senator from South Carolina has introduced S. 1159. All of us in the Senate are familiar with this device. You take a bill and you rewrite so that it accomplishes the same thing, you slightly rewrite it, and phrase it in slightly different language, and it is referred to a different committee.

This bill was introduced on May 11. It does exactly the same thing in reverse that the bill before us now does, exactly the same thing. They simply changed it and phrased it in terms of a market share and it went to the Judiciary Committee. They have had it now for 3 weeks and a day and they have done nothing with it. They say, "Give us this bill for 7 days so we can look at it." They have a bill to look at. They are not interested in having a hearing on that bill, but they are interested in killing this bill. They are interested in killing this bill and, at the same time, to establish their right to have the jurisdiction over the areas of most of the other committees in this Senate.

If that is the precedent you want to establish, go right ahead, but it does not bode well for any other committee in the Senate.

The PRESIDING OFFICER. Who yields time?

Mr. PACKWOOD. Madam President, I yield such time as the Senator from Nevada desires.

The PRESIDING OFFICER. The Senator from Nevada.

Mr. CANNON. Madam President, I would like to discuss for a moment the wonders and beauty of nature. In some mysterious way and for reasons that still escape human understanding, the springtime triggers extraordinary and awesome events. Every spring the swallows return to Capistrano, the salmon return to fresh water to spawn, the sap rises in New England maple treees, and the Judiciary Committee tries to take jurisdiction from the Commerce Committee.

I must admit that I am having a severe case of deja vu. It seems that we did all this before. In fact we have, but as I recall the chairman of the Judiciary Committee then was somewhat taller and had a New England accent, and the chairman of the Commerce Committe was much more handsome and eloquent.

Quite seriously, Madam President, this is is a very important debate. In many ways it will determine how efficiently this body will function for the next 2 years. In the 95th Congress, the Senate underwent a rigorous analysis of its rules and organization in an attempt to streamline the legislative process and begin to operate on a functional basis. In particular, an attempt was made to give each committee complete jurisdiction over the subject matter under its responsibility. In other words, instead of dealing with broad subjects such as energy, the environment, or communications on an ad hoc basis, with a piece here and a piece there, we could begin to deal with all the aspects of a delicate, multifaceted issue in committees of the Senate that had jurisdiction over the entire subject matter.

I am not standing here today to argue that the bill with which we are concerned has no bearing on antitrust issues. It has some—not a lot—but some. Rather the issue is whether a piece of legislation that is overwhelmingly concerned with the regulation of the telecommunications industry and basic communications policy—clearly the responsibility of Commerce—should be referred elsewhere just because another committee thinks it affects its jurisdiction in some regard.

Let me remind you that the Commerce Committee has jurisdiction over all bills related to "interstate commerce." If we used the same rationale that is being applied here today by the Judiciary Committee, we should have joint referral over every piece of legislation affecting interstate commerce.

Indeed, I would commend my committee chairman, the distinguished Senator from Oregon, for his remarkable restraint in not turning this debate into a referral fight on S. 1159, which is where the debate properly should be. The bill to which I just referred is one that was introduced by various members of the Judiciary Committee to cover the exact subject matter in the Commerce Committee bill. It was referred to the Judiciary Committee because it was drafted in a way that amends the Clayton Act. Frankly, I think the referral of that bill to the Judiciary Committee was absolutely wrong based upon the precedent of our previous debate with the Judiciary Committee in the last Congress.

There we were dealing with precisely the same issue that is raised by S. 1159 today. The chairman of the Judiciary Committee had drafted a bill amending the Clayton Act, but which in effect changed the rules with respect to regulation of the trucking industry. The parliamentarian originally found that Judiciary should have exclusive jurisdiction because the antitrust laws were being amended. Then, after we announced our intention to fight the referral on the floor and after the noses were counted, the Judiciary Committee agreed to a referral that in effect gave most of the jurisdiction to Commerce, despite the fact that the law being amended was the Clayton Act.

Let me quote that referral agreement to you:

> To the Committee on Commerce, Science, and Transportation with instructions that if and when reported, it will then be referred to the Committee on the Judiciary for a period not to exceed 30 days, solely for the purpose of review by the Judiciary Committee of those parts of the bill directly amending the Clayton Act and the bill shall be reported out of the Judiciary Committee without amendment.

In other words, on a bill which was precisely the equavalent of S. 1159, the only right that the Judiciary Committee won was to look at it for 30 days without being allowed to amend it or vote unfavorably on it.

I raise this point not to rub salt in the wound of that previous fight, but to point out that we have been through this before and the precedent not only points in favor of the Commerce Committee argument on S. 271, it makes me wonder why we are not fighting for our rightful jurisdiction on S. 1159.

I want to reiterate the point that we have made time and time again. The debate today is not on the merits of the legislation. It is simply upon the question of whether the Senate rules will be applied in a way that is both fair and expeditious. I strongly urge my colleagues to resist the efforts of the Judiciary Committee to stray into areas that have been set aside for the exclusive jurisdiction of other committees. There is a strong rationale for the existing Senate rules.

I may say that I was on the Rules Committee and had a part in that when we drafted the current rules and tried to streamline them and make some sense out of the mixed-up jurisdictional aspects that had been involved prior to that time. This is a vote that will serve as a precedent for future jurisdictional disputes. I urge my colleagues to vote with us on this issue.

Thank you, Madam President.

The PRESIDING OFFICER. Who yields time?

Mr. THURMOND. Madam President, I yield to the distinguished Senator from Montana.

The PRESIDING OFFICER. The Senator from Montana.

Mr. BAUCUS. Madam President, I find this discussion quite interesting. I have not been in this body terribly long, just over 2 years.

I am a member of the Judiciary Committee and I very strongly support the motion of the chairman of the committee to refer S. 271 for only 7 days.

My reasons for joining the chairman are twofold:

First, there are obvious antitrust implications in this bill. Everyone admits that. It is not in dispute.

Second, this body is a group of 100 individuals, 100 Senators. We have all heard the phrase that we must accommodate each other, we must get along with each other.

The great horror that we have heard about, that if this motion is agreed to, every committee's jurisdiction is vulnerable to the Judiciary Committee, is absurd. First of all, no one in his right mind would ask for that kind of jurisdiction.

The chairman of our committee, Senator THURMOND of South Carolina, is very experienced and astute, and he certainly is not going to ask that the Judiciary Committee have jurisdiction over the areas suggested by those opposed to this motion.

Madam President, I very simply suggest that we have some of this energy that we are exercising here over jurisdictional turf and pursue more important issues that face our country, like inflation, unemployment, energy, and so forth, and that we not spend all this time in a worry about how many marbles every committee has.

I suggest that we very simply talk about it for a while, that we stop talking about it very quickly, have a vote, and then, very graciously, and in a manner becoming to this body, refer the bill for only 7 days to the Judiciary Committee.

I personally have no intention of delaying this bill. I think S. 271 has a lot of merit. I think it is a good bill. But the point that another bill has been rewritten on the same subject and referred to the Judiciary Committee is irrelevant.

This motion provides for only 7 days in the Judiciary Committee, and when 7 days have transpired, the Senate can work its will on the bill. So the Judiciary Committee cannot hold it up more than 7 days, even if we wanted to.

Let us get on with it. Let us just refer it for 7 days. I know the chairman of the committee is not going to get involved in these other attempts to raid committees, which has been suggested thus far.

Madam President, to summarize, I rise in support of the motion by the distinguished chairman of the Judiciary Committee.

First, S. 271 may raise antitrust as well as commerce questions. These questions fall within the jurisdiction of both the Commerce and the Judiciary Committees. The effort to give the Judiciary Committee a mere 7 days in which to examine the antitrust implications of the bill is fair and reasonable.

I have reviewed S. 271. The arguments favoring the bill are quite persuasive. Western Union was permitted to merge with Postal Telegraph when both concerns were experiencing financial difficulties. To insure that the new combine would not exercise undue market power, Congress required Western Union to divest itself of its international operations and deal with all international records carriers on a fair and nondiscriminatory basis.

If the market situation of Western Union has, in fact, changed so that no further antitrust and anticompetitive problems exist, then the repeal of these congressional strictures makes sense. All we are asking is that the Judiciary Committee be given the opportunity to review these aspects of the bill.

My second reason for supporting the resolution is equally important and goes far beyond the merits of this particular bill. The Senate is a body of accommodation. We try to give members a full opportunity to review legislation before it is moved through the body.

Of course, we do not take kindly to delays and unjustified harassment of legislation. But, we strive to accommodate all reasonable requests for fair deliberation.

Applying these principles to the particular bill at issue, it seems clear to me that the Judiciary Committee request should be accommodated. And it can be acommodated without any danger or prejudice to S. 271.

I have no axe to grind on the bill. I see no reason to delay it. I do not intend to impair it. I simply ask that the Judiciary Committee be given 7 days to review the bill and then we can proceed on it.

Madam President, I hope my colleagues can support a reasonable accommodation on this bill.

Mr. PACKWOOD. Will the Senator yield.

Mr. BAUCUS. Yes.

Mr. PACKWOOD. Is the Senator aware of a letter having been sent from the committee pertaining to the jurisdiction of other bills in addition to this bill?

Mr. BAUCUS. I must say I am not aware of that. I must say also that I will judge each question separately.

Mr. PACKWOOD. So the Senator thinks that the matter should be judged on the individual merits of each bill?

Mr. BAUCUS. I think on all of these questions it is a matter of who is asking. In this case, the chairman is asking for 7 days to consider the bill. It would depend on how much time it would take to discuss the issues. I think we should get along and work together.

Mr. THURMOND. Madam President, I yield to the Senator from Utah.

Mr. HATCH. Madam President, everybody involved in this matter is a very dear friend of mine. However, I believe that the issue here is not the bill itself. I do not think anybody questions that. As a matter of fact, Judiciary does not in any way contest the primary jurisdiction of the Commerce Committee in regards to communication bills.

All the chairman of the Judiciary Committee is making is a reasonable request. I do not think it sets a deleterious precedent. He is asking for a sequential referral for 7 days in order to hold a hearing so that the Antitrust Committee, which is now the full committee of the Judiciary Committee, can ask some questions and receive answers on major questions that could arise under this bill.

This is a matter of comity. I think comity is the only way this body can work to resolve some of these matters and get them resolved in a manner satisfactory to all of us.

Traditionally, the Commerce and Judiciary Committees have sequentially dealt with matters they had an interest in such as S. 682, shared monoply, and S. 1980, the FTC transfer of adjudication process. In 1973 and 1974 the Judiciary Committee held hearings on the interconnector issue of ATT in the communications industry.

Of course, a limited referral and automatic discharge after 7 days is, it seems to me, not too much to ask.

I do not think there is any danger whatsoever of the Judiciary Committee killing this legislation or causing any difficulties to it at all. It is simply a matter of courtesy and comity that the distinguished chairman of the Judiciary Committee has asked for.

I might raise the question, does the Commerce Committee have the expertise to handle complex antitrust issues, and especially issues involving monopolization?

I have no doubt in my mind that the Senators on the Commerce Committee are just as intelligent and just as effective as the Senators of the Judiciary Committee. In fact, I think we have nonlawyers on the Judiciary Committee and they have lawyers on the Commerce Committee.

On the other hand, there are some serious antitrust issues here that literally anybody who looks at them would want to give some consideration to, and especially the Judiciary Committee if it wants to do its job—such as Western Union has a domestic monopoly, which could result in the same problems which section 222 was designed to prevent; such as whether S. 271 contains enough safeguards to protect Western Union's domestic market position; I think such as, since the Commerce Committee hearings on S. 271 were in February of this year, they did not have the benefit of hearing the position of the newly appointed Assistant Attorney General for Antitrust.

I think it would be very instructive, Madam President, to obtain his views on the antitrust aspects of this bill to all of us here. And it would be a shame if this bill passes and there were some antitrust aspects that were not considered as a result of the lack of the Judiciary Committee review of this particular bill.

With regard to S. 1159, there is an im-

pact between the two committees on that. That addresses the antitrust concerns raised in S. 271 and clearly illustrates that there are antitrust issues involved. I think it makes more sense to hold a hearing on S. 271 directly, since it is a piece of legislation that raises the issues about which S. 1159 is concerned.

So, Madam President, it is not our intention to completely reexamne S. 271 or in any way to block that legislation. We merely want the opportunity for 1 day of hearings in an area which our committee has special expertise in, where we have antitrust experts on our staff. Certain Senators on the committee also qualify as antitrust experts.

I think this could be scheduled for next week, early June—June 10 is available, I understand—so it will not unreasonably delay this bill in any way. In that way, if the Judiciary Committee has any amendments to suggest, they will be able, through the hearing process, to come up with those amendments and bring them up on the floor at the time S. 271 is considered.

Madam President, I think these are reasons enough, and again, I reemphasize that I do not think anybody, especially the chairman of the Committee on the Judiciary, has any desire to take away the jurisdiction of the Committee on Commerce on this matter. I do think his request has been fair and courteous. I think it has been reasonable, and I do think that we could do some extra special work here that would assist the Committee on Commerce on a bill which could have some very serious antitrust ramifications, not only with regard to Western Union, but in many other ways as well.

I support the distinguished chairman of the Committee on the Judiciary in this matter, although I do respect and accept the positions of Senator PACKWOOD, Senator GOLDWATER, and, of course, Senator CANNON and others who have a contrary point of view.

I do not think it hurts in these areas to have this kind of referral, especially since the committee is willing to do the work on it and add its expertise to that considerable expertise of the Committee on Commerce.

Madam President, I do support the distinguished chairman of the Committee on the Judiciary. I think we can do a service to the Committee on Commerce, to the Committee on the Judiciary, and to the whole Senate, as well as to the American people, even though this is not the most earthshaking thing, from anybody's point of view.

With that, Madam President, I hope that my colleagues will consider supporting the motion of the chairman of the Committee on the Judiciary.

Mr. GOLDWATER. Madam President, will the Senator yield me about 2 minutes?

Mr. PACKWOOD. I yield 2 minutes to the Senator from Arizona.

Mr. GOLDWATER. Madam President, we first must understand that section 222 is being repealed because the merged entity, Western Union, no longer has a monopoly on the domestic market. I heard the distinguished Senator from Nevada, the distinguished Senator from Montana, the distinguished Senator from Utah and the distinguished Senator from Pennsylvania talk about monopoly. I should like any Senator in this Chamber to rise and tell me how many Western Union offices he can name in his State. There are just none left. These people have been almost put out of busines in this field.

Madam President, who is opposing this bill? Well, RCA and ITT, and they have opposed it for the 4 years I can remember being on the committee, having hearings on this bill. The amazing thing is that the former Attorney General of this country was the one who raised the interest of one Senator to the point that he marked a hold on it. It is a strange coincidence—I would not make the charge without further investigation, but somebody in the Attorney General's office, along about that time, dismissed the suit against ITT.

Now, the same kind of operation is going on here. I think they are taking in a wonderful committee, the Committee on the Judiciary, trying to convince them that there is a monopoly. I can tell you from a lifetime spent in communications, Madam President, there is no monopoly. The only thing they want to see is some big money boys, RCA and ITT, grab hold. They do not have enough. They just run the whole doggone world. Now they want to take in Western Union and there is no Western Union left.

The PRESIDING OFFICER. Who yields time?

Mr. THURMOND. Madam President, I yield myself such time as I may require.

First, I would like to mention that it has been comity and courtesy for one committee to allow its bills to be seen by other committees and commented upon—and in many cases, to have joint referral. For instance, I have a letter here from the distinguished chairman of the Committee on Finance (Mr. DOLE), dated May 15. He said it has come to his attention that one of the four titles of S. 1068, introduced by a member of the Judiciary Committee, consists of certain matters in the jurisdiction of the Committee on Finance. I did not question that, Madam President. When the chairman of the Committee on Finance said that he felt his committee ought to see this, out of respect for that chairman and out of my high regard for any chairman in this Senate, I have agreed to refer it. And not just for 7 days; I have agreed to refer it for 45 days.

I have a letter here now to Senator BAKER, signed by Senator BIDEN and myself from the Judiciary Committee and Senator SIMPSON and Senator CRANSTON from Veterans' Affairs, requesting that S. 349, when reported to the Committee on Veterans' Affairs, be referred to the Committee on the Judiciary for not to exceed 45 days.

Madam President, we have all agreed in these other cases. This is the only time that I have had any question arise about a bill being referred. If we have any bill in the Committee on the Judiciary that the able chairman of the Committee on Commerce feels he wants to see, we shall let him see it. In fact, he did want to see a bill we had, S. 682. When the able chairman of the Committee on Commerce asked to see it, we let him see it. We agreed to let the Committee on Commerce review S. 682.

I say to him now, if there is any other bill me have which he feels concerns communications or any matter within his jurisdiction—like S. 682 which I have right here—we shall be glad to refer it to the Commerce Committee.

All that I am asking is reciprocity. We are just asking that we be allowed to see a bill that came out of his committee.

Madam President, I want to say further that this action will not be abused. I have a list here of bills since 1957 on which the Senate Committee on Commerce and other committees have shared jurisdiction with the Senate Judiciary Committee on particular issues or legislative bills—for 25 years. That has been only an average of about a bill a year where there was a request for shared review. Unless we felt that this current bill had important antitrust implications, we would not ask for it to be sent to the committee.

In the factsheet that the distinguished chairman sent out to the Members of the Senate, he makes this statement, and I call the attention to my colleagues on this. It is on page 2 of that factsheet. It said that this legislation has obvious antitrust implications. If this bill has obvious antitrust implications, should it not go to the Judiciary Committee? The Standing Rules of the Senate, on page 24, item 16, provide that the Committee on the Judiciary is responsible for the "protection of trade and commerce against unlawful restraints and monopolies."

The Judiciary Committee thus has a responsibility to look out for the whole Senate in the matters of antitrust. That is our duty. It is our responsibility. On this matter, all that we ask is for the bill to be referred to the Judiciary Committee so we may review it and make comments on it for the benefit of the Senate. We do not intend to amend it. We did not even ask for a joint referral. We merely asked for the opportunity to look at it and make suggestions if any were worthwhile.

This is important. We have three expert antitrust lawyers on this committee. One is Pete Chumbris who was with Senator Dirksen and Senator Hruska for years and years and who has been with the Senate for 28 years. He is an expert on these matters.

He believes that this bill needs to be referred to our committee for comment.

Mr. Steve Cannon on the committee staff was with the Antitrust Division of the Justice Department for a number of years. His opinion is that this bill should be referred to the Judiciary committee.

We have Ms. Marcy Tiffany of our staff, who formerly practiced antitrust law as a member of an outstanding law firm in Washington, also believes that S. 721 should be referred to our committee for review and comment. This will benefit both the public and the Senate.

What is wrong with that? All we are trying to do is to protect the public and to protect the Senate. That is my only

interest. I am not interested in Western Union. I am not interested in ITT. I am not interested in furthering the interests of any corporation. I have not a single bit of stock in any corporation in the world. But if I had, it would not make any difference; I just want to protect the public.

Further, I note that we have a new Assistant Attorney General in the Justice Department for antitrust matters, Professor Baxter, and this gentleman is an expert on antitrust matters. At the time the Commerce Committee held its hearings on S. 271 he had not yet been confirmed. He has since been confirmed and assumed his duties in that office. I would like for him to look at this bill. I wish to have him come up during our proposed one day hearing on this bill to testify. We will have the bill for only 1 week, if it is referred. But we would have a hearing in that time and we would ask Professor Baxter to come up and testify on this bill and to give us his opinion on its ramifications. That should be worth something, because it would help the Senate. It should help the country. What is wrong with that?

It is my duty as chairman of the Judiciary Committee to try to protect the public.

I just want to say that in my judgment it is important that every step possible be taken to protect the public interest on antitrust matters. It is amazing how many important matters there are concerning antitrust.

We held a hearing some time ago on an antitrust matter. That matter involved antitrust concerns raised by the impending sale of an important U.S. company to a Canadian concern. As part of that sale, the stockholders were to get a relatively small amount for their stock. As a result of our hearing, another entity agreed to buy that company and pay the stockholders a lot more money. Thus that hearing not only resolved the antitrust concerns connected with the originally proposed sale, but also resulted in benefitting the stockholders, the people. If that hearing had not been held, the stockholders and the public as a whole would not have benefited as they did.

That is all we are trying to do. We do not want to usurp the jurisdiction of the Commerce Committee. The chairman of that committee is an able man, a fine man. He has a good committee and he has good members on his committee. We just want the antitrust experts on our committee and the Assistant Attorney General to take a look at this bill and see what suggestions they might make for the benefit of both the public and the Senate.

I have a responsibility in this, because the Senate rule XXV puts that responsibility on me. I did not choose it; the rule imposes such a responsibility on the chairman of the Judiciary Committee. I am just trying to meet my responsibility when I say, as I do, to the Senate that the Committee on the Judiciary wants to take a look at this bill for 7 days in order to make comments. We think this effort would help the Senate to determine whether the bill should pass, and if it should pass, whether it should have amendments. I would note, however, that we do not intend to amend it, but we do want the opportunity to make comments, recommendations, and especially to hear from the Assistant Attorney General on antitrust on this piece of legislation.

I reserve the remainder of my time.

Mr. PACKWOOD. Madam President, will the Senator yield for a question on my time?

Mr. THURMOND. I am pleased to yield.

Mr. PACKWOOD. He cited rule XXV (1)(16), the protection of trade and commerce against unlawful restraints of trade. What we have in the law at the moment is a lawful restraint of trade. We prohibit Western Union from competing overseas. All we are talking about is removing that restraint. How does that make this an unlawful restraint?

Mr. THURMOND. I am not saying it does make it unlawful. I am saying that this bill involves antitrust matters just as the Senator cited in his factsheet when he said, "Even though it has obvious antitrust implications." If this bill has obvious antitrust implications, then what is the objection to letting the Judiciary Committee take a look at it and make comments on it if they have any comments to make?

Mr. PACKWOOD. I am sorry. I was reading the rules. I thought the Judiciary Committee had jurisdiction on simply the trade and commerce against unlawful restraints and monopolies, not antitrust.

Mr. THURMOND. We will work with the Senator any way we can. We will let him have any bill that he asks for from my committee.

Mr. PACKWOOD. The Senator from South Carolina complained that he had not had a chance to hear from the Assistant Attorney General. The Senator has in his committee, of course, the bill he introduced, S. 1159, which is exactly the same as S. 271 in reverse. He had it for 3 weeks. Why has he not had a hearing and heard from the Attorney General on it?

Mr. THURMOND. We expect to hold hearings on that bill if this bill passes, but we were hoping that we could get this bill and comment on this bill and thereby prevent the necessity of action on that bill altogether.

Mr. PACKWOOD. The Senator is asking for this bill for 7 days and he had this one 3 weeks. Why did he not ask for jurisdiction of this bill when it was introduced when we considered it and reported it? Why only when it comes out of committee—and we are on my time now—only when it comes out of committee does he ask for the jurisdiction and it was not changed a whit from the time it went in until it went out? Let me ask further: The Senator asked also for jurisdiction over S. 898; is that correct?

Mr. THURMOND. That is correct.

Mr. PACKWOOD. He sent a letter saying when we finish it, if we finish it, we want it referred to the Judiciary Committee.

Mr. THURMOND. I made the request on S. 898 because, like S. 271, it appears to have obvious antitrust implications.

Mr. PACKWOOD. It is the Senator's opinion that any letter he sends like that to any chairman phrasing it has antitrust implications——

Mr. THURMOND. There have been in the past and will be in the future very few such requests. As stated a few moments ago, only about one bill a year for 25 years was subject to a joint review request, there were very few bills that were asked for. In fact the members of the Judiciary Committee requested me to make this present request. The committee felt——

Mr. PACKWOOD. Wait a minute. The letter that he sent said——

Mr. THURMOND (continuing). Felt that we ought to ask that this bill be referred to us so we could comment on it.

Mr. PACKWOOD. The letter that he sent said one member asked.

Mr. THURMOND. What is that?

Mr. PACKWOOD. The letter the Senator sent to Senator BAKER and me said one member on your committee asked.

Mr. THURMOND. A number of members have requested this referral in a signed resolution that I have here. A number of Senators have requested this referral.

Mr. PACKWOOD. Madam President, I simply conclude with this, the Judiciary Committee has asked for this bill. They asked for S. 898 to be referred. The Senator from Pennsylvania has indicated that any bill that has any antitrust implications, no matter how minor, if the Judiciary Committee chooses to ask for it they shall get it. The Senator from South Carolina has indicated they do not request for it very often; if they do they have it as a matter of right. I simply say to other committees if that is the precedent they want to establish, they should vote for the Senator from South Carolina. If not, they should vote with me.

Mr. THURMOND. How much time remains, Madam President?

The PRESIDING OFFICER. The Senator from South Carolina has 4 minutes and 25 seconds.

Mr. THURMOND. How much time has the Senator from Oregon?

The PRESIDING OFFICER. Nineteen minutes and 22 seconds.

Who yields time?

Mr. PACKWOOD. How much time did I have left?

The PRESIDING OFFICER. Nineteen minutes and 22 seconds.

Mr. PACKWOOD. I am prepared to yield back my time if the Senator from South Carolina is prepared to yield back his.

Mr. THURMOND. Madam President, I will be glad to yield back in just a short time. I thought I might just make this closing statement: I think it is well for the operation of this great body to continue in its great historic tradition of comity and courtesy. I tell the Senator now that if there is any bill he would like to see that refers to any matter within the jurisdiction of his committee, we will be glad to refer to him. And similarly, we will respect a request for any other bill that another committee wants to see, just as Judiciary has honored the requests of Senator DOLE and Senator SIMPSON and others.

I feel that it is in the best interest of this Senate to adopt a policy that when a chairman requests a bill that he does not do so lightly, that he do so for a good reason. But when he does, we should acquiesce to the chairman's request, especially when it will not delay the matter. Here the delay would be only for 1 week. We are asking for this time in order to get the opinion of the Assistant Attorney General, and to let our specialists in antitrust study this matter to see if they have any helpful suggestions. In a week, it will come back under any circumstances. It may come with recommendationse and suggestions. It may not.

But what are we doing is trying to preserve the historic comity and courtesy of this body which has always existed between the committees, especially when the members of a committee request a chairman to ask that a certain bill be sent to the committee, as the members of the Judiciary Committee did in this particular instance.

Madam President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second?

There is a sufficient second.

The yeas and nays were ordered.

Mr. PACKWOOD. Madam President, as the Senator from South Carolina well knows, a bill does not have to be referred to committee to hold a hearing. It does not have to be referred to hold a hearing on that bill. The rules of this body permit any committee to hold any hearing that they want to hold.

This particular bill, S. 271, was introduced early this year. At any time that the Senator from South Carolina wanted to hold a hearing on that bill he could have. He has a similar bill in his committee that was introduced by him on which he could have held hearings.

I find it very coincidental that it was not until we had sent the bill out after hearings and 1 week after a hold had been put on the calendar that a request was made to refer this bill to the Judiciary Committee.

And it was only after RCA and ITT had lost in our committee unanimously, only after that, that an effort was made to refer it to the Judiciary Committee. I think it would be a bad precedent.

If the Senator is prepared to yield back his time, I am prepared to yield back mine.

Mr. THURMOND. Madam President, I just want to state for the record that I made the request weeks ago for this bill to be referred to our committee so we could have a quick hearing and comment on it.

I want to say again, I am not concerned about what those corporations want and do not want. Our job is to serve the public. Our job is to protect the interest of the people of this country. That is all I have tried to do in asking that this bill be referred to the Judiciary Committee. I hope that when the Members vote they will realize that a chairman, acting in his capacity, will be presumed, I imagine, to be acting in what he considers to be the best interest of the country.

There cannot be any delay. This is 1 week for a hearing, and then the bill can be considered and acted upon by the Senate.

Again, I would remind the distinguished Senator that when they asked for a bill from our committee, we agreed to refer it to his committee.

Mr. LONG. Would the Senator yield?

Mr. PACKWOOD. I yield to the Senator from Louisiana.

Mr. LONG. Madam President, I hope that the Senate is not going to set a precedent here that any time a committee wants a bill referred to that committee from the committee which clearly has jurisdiction, the committee with jurisdiction is under the burden of referring it.

Madam President, if we are to do that, we will never get anything done around this body. We could be here forever. The committee can just go on and on ad infinitum without ever reaching any conclusions.

As the chairman of the Commerce Committee has said, any committee—you do not have to have jurisdiction to hold a hearing. I mean, you could just hold hearings on anything on God's green earth anytime you want to. Every committee can do it.

May I say, as a former chairman of the Finance Committee, I can recall times when a single Senator just sets up a hearing, just calls people and gets a lot of people in and holds himself a hearing. He does not represent anybody, not even a committee. You can get away with that in the U.S. Senate. I have seen Senators do it with great success on occasion.

So that people can hold hearings and committees can hold hearings and subcommittees can hold hearings. They can do it if they do not have one whit of jurisdiction to do it.

But when a committee that is responsible and hears the issue and reports on it, controversial though it may be, to set a policy that another committee would like it referred to it because they feel an interest in the matter, that it ought to be referred and to feel that we owe it to one another by courtesy and comity, in my opinion, Madam President, that just flies into the rules of the Senate which says that the jurisdiction of this bill is in this committee. And these committees are reasonably well balanced.

With that in mind, I hope that we do not set a precedent here that when a committee feels it should have the bill referred to it because it would like to look at this matter, that everything must wait until it has hearings.

Mr. THURMOND. Will the Senator yield?

Mr. LONG. I yield to the Senator.

Mr. THURMOND. Madam President, I have here a letter from the chairman of the Finance Committee asking that a bill be referred to him. He said it had matters pertaining to the Finance Committee's jurisdiction. We were glad to agree to refer it to him.

I am sure no chairman of a committee today would ask for a bill unless he felt there is merit in it, just as I am sure the able Senator would not have asked for a bill to be referred unless he felt there was some reason for it. And if there is some reason for it, it has been a custom to refer it.

I agree that you cannot refer every bill to every committee, or anything of that kind. But when you have a chairman, especially when he is acting at the request of the committee, who asks for a referral, it seems reasonable to agree to such a referral just as I referred this bill to the Finance Committee at the request of Senator DOLE the present chairman of the committee.

Mr. LONG. The point is, sometimes you do and sometimes you do not. It all depends upon the particular problem involved.

But I would think that were a committee cleared to have jurisdiction, it is within the discretion of the committee they do not think they ought to refer this. I hope, unless the Senate finds some good reason why it wants further advice on the subject, it would sustain the jurisdiction of the committee.

● Mr. INOUYE. Madam President, I would hope the Senate will resist any attempt to refer S. 271 to the Judiciary Committee.

I believe the reasons set forth by the distinguished chairman of the Commerce Committee, its ranking minority member, and many of my other colleagues on the committee clearly explain why jurisdiction over this legislation, which deals with the Federal regulation of communications, should rest exclusively with the Commerce Committee.

Indeed, I believe argument to the contrary not only overlooks the Senate rules and a considerable body of its precedent, but is based on a history which has been made irrelevant by the technological breakthroughs in communications since World War II, and the decisions of the FCC recognizing these revolutionary changes in the state of the art. Western Union no longer has a monopoly on domestic record communications traffic, and this was the underlying reason for the enactment of section 222 in 1943.

In my view, the ramifications of acceding to the Judiciary Committee's request go far beyond accepting myth over reality. We would be setting a precedent for according that committee super status, and giving it authority to oversee most of the work of the other standing committees of the Senate. In the event the Judiciary Committee will then be the architect of communications policy, our tax policy, our transportation policy, and so forth. A result, I believe we all agree, is neither envisioned by the Senate rules, nor by conventional wisdom which holds that the committee with the expertise and experience regarding a particular subject is the appropriate forum in which to consider it.●

The PRESIDING OFFICER. Who yields time?

Mr. THURMOND. Madam President, if the other side is willing to yield back their time, I am willing to yield back my time.

Mr. PACKWOOD. Madam President, I yield back the remainder of my time.

The PRESIDING OFFICER. All time having been yielded back, the question is on agreeing to the motion of the Senator from South Carolina (Mr. THURMOND) to refer S. 271 to the Committee on the Judiciary for not to exceed 7 calendar days. The yeas and nays have been ordered and the clerk will call the roll.

The assistant legislative clerk called the roll.

(Mr. CHAFEE assumed the chair.)

Mr. HEFLIN (when his name was called). Present.

Mr. BAKER. Mr. President, on this vote I have a pair with the distinguished Senator from Maryland (Mr. MATHIAS). If he were present and voting, he would vote "yea." If I were at liberty to vote, I would vote "nay." Therefore, I withhold my vote.

Mr. STEVENS. Mr. President, on this vote I have a live pair with the Senator from North Carolina (Mr. EAST). If he were present and voting, he would vote "yea." I voted "nay." Therefore, I withdraw my vote.

I announce that the Senator from Maine (Mr. COHEN), the Senator from North Carolina (Mr. EAST), The Senator from Maryland (Mr. MATHIAS), the Senator from South Dakota (Mr. PRESSLER), the Senator from Texas (Mr. TOWER), and the Senator from Wyoming (Mr. WALLOP) are necessarily absent.

Mr. CRANSTON. I announce that the Senator from New Jersey (Mr. BRADLEY), the Senator from Connecticut (Mr. DODD), the Senator from South Carolina (Mr. HOLLINGS), and the Senator from Massachusetts (Mr. KENNEDY) are necessarily absent.

The PRESIDING OFFICER. Is there any other Senator in the Chamber who wishes to vote?

The result was announced—yeas 28, nays 59, as follows:

[Rollcall Vote No. 136 Leg.]

YEAS—28

Abdnor	Grassley	Simpson
Armstrong	Hatch	Specter
Baucus	Helms	Stafford
Biden	Laxalt	Stennis
Boren	Leahy	Symms
Chiles	Melcher	Thurmond
D'Amato	Metzenbaum	Tsongas
DeConcini	Nickles	Zorinsky
Denton	Percy	
Dole	Proxmire	

NAYS—59

Andrews	Glenn	Mattingly
Bentsen	Goldwater	McClure
Boschwitz	Gorton	Mitchell
Bumpers	Hart	Moynihan
Burdick	Hatfield	Murkowski
Byrd, Harry F., Jr.	Hawkins	Nunn
	Hayakawa	Packwood
Byrd, Robert C.	Heinz	Pell
Cannon	Huddleston	Pryor
Chafee	Humphrey	Quayle
Cochran	Inouye	Randolph
Cranston	Jackson	Riegle
Danforth	Jepsen	Roth
Dixon	Johnston	Rudman
Domenici	Kassebaum	Sarbanes
Durenberger	Kasten	Sasser
Eagleton	Levin	Schmitt
Exon	Long	Warner
Ford	Lugar	Weicker
Garn	Matsunaga	Williams

ANSWERED "PRESENT"—1

Heflin

PRESENT AND GIVING A LIVE PAIR, AS PREVIOUSLY RECORDED—2

Baker, against.
Stevens, against.

NOT VOTING—10

Bradley	Hollings	Tower
Cohen	Kennedy	Wallop
Dodd	Mathias	
East	Pressler	

The PRESIDING OFFICER. On this motion, the yeas are 28, the nays are 59, one Senator voting present. The motion to refer is not agreed to.

Under the previous order, the bill, S. 271, is returned to the calendar.

Mr. PACKWOOD. Mr. President, I move to reconsider the vote by which the motion was rejected.

Mr. STEVENS. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. The Senator from Alabama.

Mr. HEFLIN. Mr. President, on this motion I voted "present." I would like to explain the reason why I voted "present."

I am a member of the Commerce Committee and I am also a member of the Judiciary Committee. I am in a unique position of being the only member of both committees.

In the interest of internal harmony in the Commerce Committee and in the interest of internal harmony in the Judiciary Committee, I voted "present." Either way it would have gone I would have had a bite on the apple of antitrust.

[Laughter.]

Mr. STEVENS. Mr. President, there will be no more votes tonight.

INTERNATIONAL TRAVEL ACT AUTHORIZATION

Mr. STEVENS. Mr. President, I ask that the Chair lay before the Senate Calendar Order No. 91, S. 1105.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (S. 1105) to amend the International Travel Act of 1961 to authorize appropriations for fiscal year 1982, and for other purposes.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Alaska?

There being no objection, the Senate proceeded to consider the bill which had been reported from the Committee on Commerce, Science, and Transportation with amendments as follows:

On page 2, line 16, strike "the offices" and insert "any office";

On page 2, line 19, strike "offices" and insert "office":

So as to make the bill read:

S. 1105

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the first sentence of section 6 of the International Travel Act of 1961 (22 U.S.C. 2126) is amended by striking out "and" immediately before "(8)", and by inserting immediately before the period at the end thereof the following: "; and (9) $8,600,000 for the fiscal year ending September 30, 1982".

SEC. 2. The first sentence of section 4 of the International Travel Act of 1961 (22 U.S.C. 2124) is amended by striking "who shall report directly to the Secretary." and substituting "who shall report directly to and be under the general supervision of the Secretary or, to the extent such authority is delegated, the Deputy Secretary, but shall not report to, or be subject to general supervision by, any other officer of the Department of Commerce.".

SEC. 3. The International Travel Act of 1961 is further amended by adding at the end thereof the following new section:

"SEC. 10. (a) Notwithstanding any other provision of law, the Secretary may not reduce the number of employees of the United States Travel Service in any office of such Service in foreign countries to a number that is less than the number of authorized employees assigned to such office in fiscal year 1979.

"(b) Notwithstanding any other provision of law, the Secretary may not reduce the amount of funds obligated in any fiscal year to pay for the activities of the offices of the United States Travel Service in foreign countries to an amount that is less than the amount of funds that were obligated to pay for the activities of such offices in fiscal year 1980.".

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AUTHORIZATION OF APPROPRIATIONS FOR THE INTERNATIONAL INVESTMENT SURVEY ACT

Mr. STEVENS. Mr. President, I ask that the Chair lay before the Senate Calendar Order No. 94, S. 1104.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (S. 1104) to amend the International Investment Survey Act of 1976 to provide an authorization for further appropriations, to avoid unnecessary duplication of certain surveys, and for other purposes.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Alaska?

There being no objection, the Senate proceeded to consider the bill which had been reported from the Committee on Commerce, Science, and Transportation, with an amendment as follows:

On page 2, line 5, strike "the".

So as to make the bill read:

S. 1104

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 4(b) of the International Investment Survey Act of 1976 (22 U.S.C. 3103(b)) is amended by striking all of such section before the words "among other things and to the extent he determines necessary and feasible—" and substituting the following:

"(b) With respect to foreign direct investment in the United States, the President shall conduct a benchmark survey covering calendar year 1980, a benchmark survey covering calendar year 1987, and benchmark sur-

veys covering every fifth calendar year thereafter. With respect to United States direct investment abroad, the President shall conduct a benchmark survey covering calendar year 1982, a benchmark survey covering calendar year 1989, and benchmark surveys covering every fifth year thereafter. In conducting surveys pursuant to this subsection, the President shall,".

SEC. 2. Section 4(c)(2) of the International Investment Survey Act of 1976 (22 U.S.C. 3103(c)(2)) is amended to read as follows:

"(2) In addition to the benchmark surveys conducted pursuant to paragraph (1), the President shall annually compile currently available data on United States portfolio investment abroad including items such as data on the magnitude and aggregate value of portfolio investment, form of investment, types of investors, nationality of investors and recorded residence of private holders, diversification of holdings by economic sector, and holders of record. The President shall submit an analysis of such data to the Congress not later than the first day of July of each year.".

SEC. 3. Section 4 of the International Investment Survey Act of 1976 (22 U.S.C. 3103) is amended by redesignating subsections (e) and (f), and all references thereto, as subsection (f) and (g), respectively, and by inserting the following new subsection after subsection (d):

"(e) The Secretary of Commerce shall prepare a report on the estimated cost of monitoring and compiling data on legislation enacted by the major trading partners of the United States, and such other foreign nations as the Secretary deems appropriate, which regulates or restricts foreign inward investment in such foreign nations.".

SEC. 4. Section 8 of the International Investment Survey Act of 1976 (22 U.S.C. 3107) is amended by striking "AND REVIEWS" in the section heading, by striking "(a)" immediately after "SEC. 8.", and by striking subsection (b).

SEC. 5. Section 9 of the International Investment Survey Act of 1976 (22 U.S.C. 3108) is amended by striking "and" immediately after "1980," and by inserting immediately before the period at the end thereof the following: ", $4,000,000 for the fiscal year ending September 30, 1982, and such sums as may be necessary for any subsequent fiscal years".

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. ROBERT C. BYRD. Mr. President, I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AUTHORIZATION OF APPROPRIATIONS FOR NATURAL GAS PIPELINE SAFETY ACT AND HAZARDOUS LIQUID PIPELINE SAFETY ACT

Mr. STEVENS. Mr. President, I ask that the Chair lay before the Senate, Calendar Order No. 99, S. 1099.

The PRESIDING OFFICER. The bill will be stated by title.

The legislative clerk read as follows:

A bill (S. 1099) to amend the Natural Gas Pipeline Safety Act of 1968, as amended, and the Hazardous Liquid Pipeline Safety Act of 1979 to authorize appropriations for fiscal years 1982 and 1983.

The PRESIDING OFFICER. Is there objection to the request of the Senator from Alaska?

There being no objection, the Senate proceeded to consider the bill which had been reported from the Committee on Commerce, Science, and Transportation with an amendment to strike out all after the enacting clause, and insert the following:

That section 4(b) of the Natural Gas Pipeline Safety Act of 1968 (49 U.S.C. 1673(b)) and section 204(b) of the Hazardous Liquid Pipeline Safety Act of 1979 (49 U.S.C. 2003(b)) are each amended by striking "once every 6 months." and substituting "twice each calendar year.".

SEC. 2. Section 8(a) of the Natural Gas Pipeline Safety Act of 1968 (49 U.S.C. 1675(a)) is amended by striking "sixtieth day" and substituting "90th day".

SEC. 3. Section 206(a) of the Hazardous Liquid Pipeline Safety Act of 1979 (49 U.S.C. 2005(a)) is amended by striking "60th day" and substituting "90th day".

SEC. 4. Section 5(a) of the Natural Gas Pipeline Safety Act of 1968 (49 U.S.C. 1674(a)) is amended by striking "other than subsection (a)(3) thereof)" and substituting "(other than subsection (a)(2) thereof)".

SEC. 5. Section 17(a) of the Natural Gas Pipeline Safety Act of 1968 (49 U.S.C. 1684(a)) is amended by—

(1) striking "and" at the end of paragraph (1);

(2) striking the period at the end of paragraph (2) and substituting a semicolon; and

(3) adding at the end thereof the following new paragraphs:

"(3) $3,446,000 for the fiscal year ending September 30, 1982; and

"(4) $3,446,000 for the fiscal year ending September 30, 1983.".

SEC. 6. Section 17(b) of the Natural Gas Pipeline Safety Act of 1968 (49 U.S.C. 1684(b)) is amended by—

(1) striking "and" at the end of paragraph (1);

(2) striking the period at the end of paragraph (2) and substituting a semicolon; and

(3) adding at the end thereof the following new paragraphs:

"(3) $3,618,000 for the fiscal year ending September 30, 1982; and

"(4) $3,618,000 for the fiscal year ending September 30, 1983.".

SEC. 7. Section 214(a) of the Hazardous Liquid Pipeline Safety Act of 1979 (49 U.S.C. 2013(a)) is amended by—

(1) striking "and" at the end of paragraph (1);

(2) by striking the period at the end of paragraph (2) and substituting a semicolon; and

(3) adding at the end thereof the following new paragraphs:

"(3) $1,000,000 for the fiscal year ending September 30, 1982; and

"(4) $1,000,000 for the fiscal year ending September 30, 1983.".

The amendment was agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

The title was amended so as to read:

A bill to amend the Natural Gas Pipeline Safety Act of 1968 and the Hazardous Liquid Pipeline Safety Act of 1979 to authorize appropriations for fiscal years 1982 and 1983, and for other purposes.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the bill passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

ORDER VITIATING ACTION ON CALENDAR ORDER NO. 99, S. 1099

(Later the following occurred:)

Mr. STEVENS. Mr. President, I ask unanimous consent that the action taken by the Senate on Calendar Order No. 99, S. 1099, a bill to amend the Natural Gas Pipeline Safety Act of 1968, as amended, and the Hazardous Liquid Pipeline Safety Act of 1979 to authorize appropriations for fiscal years 1982 and 1983, be vitiated.

I state that the reason is that the House of Representatives has just sent this body a similar bill, and it is our intention to attempt to see if we can amend the action of the Senate so that we return to the other body the House-passed bill.

The PRESIDING OFFICER. Without objection, it is so ordered.

ANNUAL FEDERAL PAYMENT TO THE DISTRICT OF COLUMBIA

At the request of Mr. STEVENS, the bill (S. 1040) to amend the District of Columbia Self-Government and Governmental Reorganization Act to increase the amount authorized to be appropriated as the annual Federal payment to the District of Columbia was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 502 of the District of Columbia Self-Government and Governmental Reorganization Act (D.C. Code, sec. 2501d) is amended by striking out "for the fiscal year ending September 30, 1978, and for each fiscal year thereafter the sum of $300,000,000" in the first sentence and inserting in lieu thereof "for each of the fiscal years ending September 30, 1978, September 30, 1979, September 30, 1980, and Sepetmber 30, 1981, the sum of $300,000,000; and for the fiscal year ending September 30, 1982, and for each fiscal year ending after September 30, 1982, the sum of $336,600,000".

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the bill passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AUTHORIZATION OF APPROPRIATIONS FOR THE NATIONAL HISTORICAL PUBLICATIONS AND RECORDS COMMISSION

At the request of Mr. STEVENS, the bill (S. 1050) to extend the authorization of appropriations for the National Historical Publications and Records Commission for the fiscal years 1982 and 1983, was considered.

Mr. MATHIAS. Mr. President, on behalf of Senators PRYOR, PELL, and SASSER, cosponsors of S. 1050, I am pleased to see the Senate move this simple reauthorization to final passage.

This bill was favorably reported by the Senate Governmental Affairs Committee by a 10 to 0 bipartisan vote on May 15. It will permit this Commission to continue its important support of historical publications and records preservation across our Nation. And it will insure the continued private support of those same efforts through matching funds. Private support for publications and records preservation at present represents 60 percent of the total funding devoted to this effort. Without the Federal participation, this private participation is certain to cease.

Those individuals and organizations who are researching and writing about our Nation's most important historical figures have recently written to me describing the way the national historical publications and records program works and the way it leverages private dollars. I ask unanimous consent that the letter to me from the Coalition To Save Our Documentary Heritage be printed at this point in the RECORD.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

COALITION TO SAVE OUR DOCUMENTARY HERITAGE,
May 21, 1981.

HON. CHARLES MCC. MATHIAS,
U.S. Senate,
Washington, D.C.

DEAR SENATOR MATHIAS: On behalf of the Coalition to Save our Documentary Heritage, I would like to express our appreciation for your sponsorship of S. 1050. The Coalition strongly supports this legislation, which would reauthorize the grants program of the National Historical Publications and Records Commission for two years at an annual level of $3 million. S. 1050 is now on the Senate Calendar and we urge its expeditious consideration.

Attached to this letter is a list of the 47 member organizations of the Coalition. These organizations represent historians, archivists, librarians, state and local government officials, genealogists, university presses, and college and university professors and officials. Three of the members have representatives on the NHPRC.

The public/private funding partnership that has been so successful over the past seventeen years has contributed enormously to our documentary heritage. For your benefit we would like to describe the continuing successes of the two grants programs.

PUBLICATIONS

There are forty-three ongoing publications projects currently funded in part by the NHPRC. Nearly half of these projects will cease to exist if this bill does not pass, and a considerable portion of the public and private funds that have been spent on them will be wasted.

While the projects that are publishing the papers of the Founding Fathers (i.e., Jefferson, Adams, Franklin, Madison, and Washington) may find sufficient funding in the private sector, projects relating to such a diversity of figures as Daniel Chester French, the sculptor of Abraham Lincoln in the Lincoln Memorial, labor leader Samuel Gompers, social worker Jane Addams, Chief Justice of the Supreme Court John Marshall, Civil War General and President Ulysses S. Grant, and even the Documentary History of the First Federal Congress, will probably terminate without his reauthorization.

Only a handful of publications projects existed in 1964, and they were operating on very small private grants, together with institutional support. The introduction of Federal funding to the NHPRC in 1964 made it possible to expand the number of publications projects. It also provided the nucleus of funding necessary to convince the private institutions and other sources of financial support to contribute to this endeavor.

But the private sources cannot and will not support these projects alone. Rather than receiving increased private [illegible], the projects will receive less, and in many cases this [illegible] will disappear completely.

For example, the Documentary History of the First Federal Congress currently receives payment for indirect costs (office space, furniture and equipment, together with the University's administrative support system) and the salary of its Editor in Chief from the George Washington University.

If no federal funds are being contributed, no research project will exist in the University's estimation, and the project office will be forced to close down. The three volumes, including two volumes of histories of First Congress legislation, on which the staff has worked for the past four years, will not go to press.

One thing is clear: the termination of the federal contribution will also mean the end of nearly all of the private participation.

Inquiries to some of the major foundations have already been made, and each response has been the same. These private foundations have been overwhelmed with applications in recent months, and they do not have the resources to supply the long term, stable financing that documentary editions require.

The amount granted for the publications program of the NHPRC has remained constant at $2 million since 1975, and yet the program has been able to expand and to encourage new projects which document the lives of notable women, Blacks, Hispanics, and Native Americans, as well as to continue its role as a sponsor of the projects relating to the founding of the nation.

RECORDS

The Records grants program of the NHPRC that was authorized in 1974, but not fully funded until FY 1980, has played a critical role in beginning to deal with some of the overwhelming problems relating to records preservation and management that are facing states, localities and institutions.

The records program has funded projects of national importance such as manuals on archival techniques, research and development projects in photography preservation, appraisal studies for a variety of historical records, and needs assessment and planning on such key problems as labor records, police records, and records documenting science and technology in the United States.

For example, a grant was given to the municipality of Anchorage, Alaska, to preserve and duplicate the Anchorage Historical and Fine Arts Museum's nitrate and glass plate negative collections which extensively document various aspects of early 20th century life in Alaska, including gold mining in the region of Dan and Chititu Creek, military life at Fort Michael, and domestic life along the Valdez-Fairbanks Trail and in Nome. This holding, including these rare historical images, is the only public photography collection in the Anchorage area.

Another example of this broad-based program is a grant given to the City of Baltimore to arrange the mayoral and council records from 1797 to 1971 in the Archives and Records Management Office. City officials realized a need to develop a system for properly controlling their valuable but virtually unknown and inaccessible municipal records. Before it received an NHPRC grant to begin to organize the collection and to properly treat the important historical documents, the City committed itself to sustaining the effort. The NPHRC grant brought in a qualified professional to begin the program which, after the completion of this demonstration effort, will make this important city archives usable by students of Baltimore History.

Records grants are short-term (one or two years) and have been designed to strengthen individual or cooperative archival programs across the country in their efforts to save America's past. Emphasis has been placed on modern archival techniques and on increasing the non-federal support whenever possible. After the NHPRC grant assists in providing the expertise and organization, the program becomes self sufficient.

It is essential that the federal presence in the form of records grants be continued because it is spending a relatively small amount of money to provide the expertise that enables the states, localities, and institutions to save much larger sums that would have been spent on storing all of the records.

The NHPRC also provides national leadership in the archival and records management fields, and has worked to establish regional document conservation centers, each of which serves several states and assists with document preservation problems in the region.

We urge the Senate's speedy passage of S. 1050 for the following reasons:

Highly specialized programs: The National Historical Publications and Records Commission is not run by bureaucrats, but by a Commisison of experts working with a staff of experts. The emphasis is on sound efficient techniques in historical editing and archival and records management. The very modest funding has merely provided a bit of incentive to foster use of cost-efficient techniques throughout the country.

Cost savings: Records projects stress the drawing up of carefully considered records schedules so that bulky low value records occupying expensive office and storage space can be destroyed, while those that clearly have continuing value to society are identified, put in order, and made more easily accessible. This improved access also saves time and money, and the savings increase with each use. Publications projects, such as The Documentary History of the Supreme Court (1789–1800), which bring together widely scattered or hard to access material save time and money for government agency personnel, congressional staff, lawyers and other researchers tracking legislative history or pursuing other research.

Efficient management: Historical preservation and publication projects have been slow and labor intensive. By demonstrating the use of automated word processing and information retrieval techniques, through the guidance provided by manuals and other publications, through trained personnel, and through bringing archivists and librarians from throughout the country together, the NHPRC has induced cooperation and avoided much duplication of effort.

Leveraging of private dollars: The NHPRC grant programs have stimulated, not supplanted, non-federal funding.

The records grants, averaging $20,000, have demonstrated to many state and local governments and to nonprofit organizations their continuing need for a professional archives and records program maintained with their own resources. Over 60 percent of the funding for records grant projects comes from non-federal sources. The Commission has paid no indirect costs to any grantee.

The sponsoring organization's share of publications projects would decline abruptly if federal funding were withdrawn. It is estimated that half of the 43 projects currently funded would come to a halt immediately; the others would be greatly slowed and hampered by extremely precarious funding.

The Historical Publications program has, to date, sponsored the publication of 319 volumes, 5,450 reels of microfilm, and 1,005 microfiches. All of these have made an important contribution to our knowledge of

and access to the documents of our national heritage.

The Historical Records program has made over 350 grants in 49 of the 50 states, which have contributed to the preservation of historical records across our nation.

In 1972, when Senator Roth cosponsored the NHPRC reauthorization bill, he quoted former President Eisenhower and said:

"The free world must have histories written by men and women in search of the truth—not by those seeking to rewrite the records of the past to their own advantage. This underlines the essential need of a broad and incorruptible supply of our Nation's documentary resources."

The NHPRC's grant program has fostered a private/public partnership. Private foundations and institutions contribute roughly 60 percent of the program's costs. The federal support has, in the past, been 40 percent. Because we recognize the need to restrain federal spending we are willing to work with a 25 percent reduction in federal support, as S. 1050 proposes. This, of course, will mean that an even greater level of private support will be needed to continue the programs sponsored by the NHPRC.

The NHPRC offers dramatic proof of a worthwhile and effective government funding program, which even in times of fiscal restraint deserves national support. The Coalition again thanks you for your efforts to continue this small but effective program which has assisted in the publication of so much that is a part of our American heritage.

Sincerely,

CHARLENE N. BICKFORD,
Coordinator for the Coalition.

The bill (S. 1050) was ordered to be engrossed for a third reading, read the third time, and passed, as follows:

S. 1050

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 2504(b) of title 44, United States Code, is amended by striking out "for the fiscal year ending September 30, 1981, an amount not to exceed $4,000,000" and inserting in lieu thereof the following: "for ecah of the fiscal years ending September 30 of 1982 and 1983, an amount not to exceed $3,000,000".

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the bill passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to

AUTHORIZATION OF APPROPRIATIONS FOR INTERNATIONAL AFFAIRS FUNCTIONS OF THE DEPARTMENT OF THE TREASURY

At the request of Mr. STEVENS, the Senate proceeded to consider the bill (S. 1116) to authorize appropriations for the international affairs functions of the Department of the Treasury for fiscal year 1982, which had been reported from the Committee on Banking, Housing, and Urban Affairs with amendments, as follows:

On page 2, strike line 3, through and including line 4, and insert the following:

"(2) by inserting 'and $22,896,000 for fiscal year 1982' after 1980";

On page 2, after line 9, insert the following:

SEC. 2. On or before October 1, 1981, the Secretary of the Treasury shall transmit a report to both Houses of the Congress regarding the status of negotiations within the Organization for Economic Cooperation and Development on improving the International Arrangement on Guidelines for Officially Supported Export Credits and on the status of any other multilateral or bilateral negotiations or discussions for the purpose of improving any other arrangements, standstills, minutes, and practices involving official export financing in which the United States participates. Such report shall include—

(1) an assessment of the progress, if any, that has been made in these negotiations, and of the prospects for a successful conclusion to these negotiations within a reasonable time; and

(2) a recommendation by the Secretary of the Treasury as to whether the Congress, in order to improve the prospects for a successful conclusion to these negotiations, should enact legislation for the purpose of enhancing the ability of the Export-Import Bank of the United States to offer or support export credit fully competitive with the subsidized official export credit offered or supported by other governments.

So as to make the bill read:

S. 1116

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 5(a) of the Act of November 8, 1978 (92 Stat. 3092), is amended—

(1) by striking out "and" after "1979" and inserting in lieu thereof a comma; and

(2) by inserting "and $22,896,000 for fiscal year 1982" after "1980,".

(b) Subsection (b) of such section is amended by inserting "and for fiscal year 1982 not to exceed $1,000,000," after "$800,000".

SEC. 2. On or before October 1, 1981, the Secretary of the Treasury shall transmit a report to both Houses of the Congress regarding the status of negotiations within the Organization for Economic Cooperation and Development on improving the International Arrrangement on Guidelines for Officially Supported Export Credits and on the status of any other multilateral or bilateral negotiations or discussions for the purpose of improving any other arrangements, standstills, minutes, and practices involving official export financing in which the United States participates. Such report shall include—

(1) an assessment of the progress, if any, that has been made in these negotiations, and of the prospects for a successful conclusion to these negotiations within a reasonable time; and

(2) a recommendation by the Secretary of the Treasury as to whether the Congress, in order to improve the prospects for a successful conclusion to these negotiations, should enact legislation for the purpose of enhancing the ability of the Export-Import Bank of the United States to offer or support export credit fully competitive with the subsidized official export credit offered or supported by other governments.

The amendments were agreed to.

The bill was ordered to be engrossed for a third reading, read the third time, and passed.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the bill passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AUTHORIZATION OF APPROPRIATIONS FOR NONPERFORMING ARTS FUNCTIONS OF THE JOHN F. KENNEDY CENTER FOR THE PERFORMING ARTS

At the request of Mr. STEVENS, the bill (S. 1209) authorizing appropriations to the Secretary of the Interior for services necessary to the nonperforming arts functions of the John F. Kennedy Center for the Performing Arts, and for other purposes, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

S. 1209

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That subsection (e) of section 6 of the John F. Kennedy Center Act (Public Law 85–874, as amended; 20 U.S.C. 761) is amended as follows: In the last sentence strike out the period and add in lieu thereof ", and not to exceed $4,544,000 for the fiscal year ending September 30, 1982.".

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the bill passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT OF ENVIRONMENTAL QUALITY IMPROVEMENT ACT OF 1970

At the request of Mr. STEVENS, the bill (S. 1210) amending the Environmental Quality Act of 1970, was considered.

Mr. GORTON. Mr. President, the Council on Environmental Quality was established in 1969 by the National Environmental Policy Act. The Council, established within the Executive Office of the President, was to be comprised of members who would "be conscious of and responsive to the scientific, economic, social esthetic, and cultural needs and interests of the Nation;" and who would "formulate and recommend national policies to promote the improvement of the quality of the environment."

The Council's performance has been good in the decade following its creation.

The Council has, in the past, taken a leading role in the development of national environmental policy. Ocean oil pollution, water resources, and solar energy are but a few areas where the Council has participated in the administration's policy development.

The Council has provided leadership and a forum for national discussion in such important areas as toxic substances, agricultural lands, global resources, the export of hazardous substances, and domestic housing, and water-sewer problems. The Council has provided an independent policy point of view with respect to the Nation's environment which could not be articulated by any of the agencies of our Federal system which have control over particular programs or properties, the operation of which affect our national environment. The Council has assisted other Federal departments in evaluating the environmental effectiveness of their existing programs, has reviewed Federal agency predicting of environmental changes, and had promoted the advanced knowledge of the effects of technology on the environment.

Most importantly, the Council has prepared the President's environmental quality report, required by the National Environmental Policy Act to be provided annually to Congress. In the past, the Council's staff has compiled up-to-date technical information and its own professional advice on environmental issues for the Congress. In fiscal year 1980, the project consumed approximately $0.5 million in staff time, materials and production costs.

The Council's total fiscal year 1980 budget was $3,108,000. The President's budget proposal for the Council on Environmental Quality was $1,044,000. I do not feel that the Council can carry out the rather wide range of responsibility with which it is charged with only $1 million. I am doubtful that the Council can effectively prepare the environmental quality report on that short budget, let alone continue to make the significant contribution to the development of environmental policy in this Nation that the Council has made in the past. It was with this in mind that the Environment Committee reported out the bill reauthorizing $1,544,000 for the Council on Environmental Quality.

I am aware, as is the majority of the Senate, of the importance of maintaining the budget parameters which the administration has proposed. The Committee on Environment and Public Works has, therefore, reported out several bills which, taken together, realize the administration's proposals. Note that S. 1211, authorizing appropriations to the Environmental Protection Agency for operation under the Toxic Substances Control Act proposes reduced appropriation level so as to compensate for the increase proposed by this bill.

Mr. President, at this time when fiscal austerity is much with us, we must, nevertheless, continue to practice environmental policy thinking. The Congress earlier instructed the Council on Environmental Quality to "formulate and recommend national policies to promote the improvement of the quality of the environment." In order to accomplish that same end, I encourage the Senate's support of S. 1210.

The bill was ordered to be engrossed for a third reading, read the third time, and passed, as follows:

S. 1210

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 205 of the Environmental Quality Improvement Act of 1970 (40 U.S.C. 4374) is amended by striking out subsections (a) and (b) and inserting in lieu thereof the following:

"(a) $1,544,000 for the fiscal year ending September 30, 1982.".

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the bill passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

EXTENSION OF TOXIC SUBSTANCES CONTROL ACT

At the request of Mr. STEVENS, the bill (S. 1211) to extend the Toxic Substances Control Act for 1 year, was considered, ordered to be engrossed for a third reading, read the third time, and passed, as follows:

S. 1211

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 29 of the Toxic Substances Control Act (15 U.S.C. 2628) is amended by inserting before the period at the end of the first sentence thereof the following: ", $59,646,000 for the fiscal year ending September 30, 1982".

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the bill passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

AMENDMENT OF MARINE PROTECTION, RESEARCH, AND SANCTUARIES ACT

At the request of Mr. STEVENS, the Senate proceeded to consider the bill (S. 1213) to amend title I of the Marine Protection, Research, and Sanctuaries Act, as amended.

Mr. CHAFEE. Mr. President, on March 26, 1981, the Acting Administrator of the Environmental Protection Agency requested an additional $2 million in fiscal year 1982 to carry out the functions under section 111 of the Marine Protection, Research, and Sanctuaries Act. In documents submitted to the Committee on Environment and Public Works to support this request, the Agency indicated the increased authorization was necessary to continue the programs authorized by title I, to meet the Agency's obligation under a stipulation agreement and to establish and implement plans to phase out the dumping of sewage sludge and industrial waste in ocean waters prior to January 1, 1982, as required by Public Law 96–572.

Title I of the Marine Protection, Research, and Sanctuaries Act, regulates the transportation and disposal of materials in the ocean. As part of the title I program, the Environmental Protection Agency reviews ocean dumping permit applications and, where appropriate, issues special, general research, or emergency permits. The Agency also reviews permit applications for the disposal of dredged material, and evaluates and acts on waiver requests by the Army Corps of Engineers. The program evaluates potential and current dumping sites and designates dump-sites for specific discharges.

The vast majority of the sites designated are for the disposal of dredged material, although sites for other materials are assessed and designated where appropriate. Finally, in implementing title I, the Agency participates in the International Ocean Dumping Convention. This bill increases the existing fiscal year 1982 authorization to support the programs under this title.

The primary focus of the program supported by this increased authorization is the evaluation and designation of ocean dumping sites for the disposal of dredged material. The Corps has indicated a continuous and growing need for such sites, and the Environmental Protection Agency has the responsibility not only to designate new sites as required, but to evaluate on a regular basis the impacts of all sites currently in use. This requires field studies and analyses of areas of the ocean which are not currently used for ocean dumping but which are potential ocean dumping sites, as well as of areas which are currently used, or have been used in the past, as either interim or final sites for dredged material.

S. 1213, which the committee ordered reported by a unanimous voice vote on May 11, provides increased authorization for title I of the Marine Protection, Research and Sanctuaries Act, as requested by the administration, in the amount of $2,000,000. This makes the total author-

ization for fiscal year 1982 $4,218,000. The committee did not extend the authority for title I beyond fiscal year 1982.

The bill was ordered to be engrossed for a third reading, read the third time, and passed, as follows:

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 111 of the Marine Protection, Research, and Sanctuaries Act, as amended (33 U.S.C. 1420), is amended by striking "and fiscal year 1982," and inserting in lieu thereof "and not to exceed $4,213,000 for fiscal year 1982.".

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the bill passed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

DISAPPROVING THE PROPOSED DEFERRAL OF CERTAIN BUDGET AUTHORITY

At the request of Mr. STEVENS, the Senate proceeded to consider the resolution (S. Res. 120) disapproving the proposed deferral of budget authority for Veterans' Administration medical care.

Mr. CHILES. Mr. President, I am pleased to offer this resolution and I hope the Senate will pass it today. This resolution would disapprove the proposed deferral of $31 million of medical care staffing funds for the Veterans' Administration. We believe that maintaining an adequate level of staffing at VA hospitals and clinics is one of those basic protections for the disadvantaged that should not be cut back to achieve fiscal restraint. No one has argued that these facilities are overstaffed, or even that they are adequate to meet the current demand for services. The administration's proposal shows a reduction in hospital days of service and a reduction in outpatient clinic visits. Yet the need for service is growing, not declining.

The administration argues that it is not cutting back on doctors and nurses, only on support staff. In medical facilities, support staff are not some kind of excess paper pusher. They are the technicians, the nurses' aides, the caseworkers who enable the physicians to perform their job efficiently. If you cut back on support staff, each physician will be able to treat fewer patients. If you cut back on laboratory technicians, physicians will not be able to get X-rays or diagnostic tests performed in a timely fashion. The result will be, simply, less medical care for the veteran.

Mr. President, in addition to the substantive problem of cutting back services, we have a procedural problem with this deferral. Congress has frequently had problems with the Office of Management and Budget withholding funds for congressionally mandated staffing. This is an institutional problem, not a partisan one: OMB acts the same whether the President is a Democrat or a Republican. I strongly support the President's position that he wants to streamline the bureaucracy and reduce the size of Government. This deferral resolution does not speak to the constitutional question of whether the President's authority to manage the executive branch includes the power to determine staffing levels. Rather, we are dealing with a limited situation in which Congress has examined a certain need, the need for veterans' medical care, and determined that a minimum level of staffing is required to serve that need.

In the last session of Congress, we passed a law (Public Law 96–151) which mandated that OMB provide the Veterans' Administration with the full personnel ceiling for which Congress has appropriated funds.

Despite this legislation, OMB has refused to grant the VA an exemption from the President's hiring freeze. Instead, they have submitted this proposed deferral of funds for the two affected appropriation accounts.

Mr. President, the Budget and Impoundment Control Act of 1974 was written to resolve procedural disputes of this sort. That act gives the Comptroller General the responsibility to rule on the appropriateness of proposed actions to withhold funds. We have submitted this situation to the Comptroller General, and he has ruled that the deferral is an illegal action circumventing the law that mandates the hiring of staff for which funds are appropriated.

Let me quote the final paragraphs from the Comptroller General's letter of February 10, 1981:

In light of the provisions of section 1001 it is our view that the Impoundment Control Act may not be used to deny to VA the funds and related positions mandated to be available by paragraph 5010(A)(4). In this connection, and in the context of paragraph 5010 (A)(4), we see no distinction between a congressional mandate to spend and a mandate to allot positions and make funds available to fill them.

We conclude that 38 U.S.C. 5010(A)(4) precludes the administration from using the President's hiring freeze, as implemented by OMB bulletin No. 81–6, to reduce congressionally funded VA employment levels. We also hold that all the funds appropriated for the designated positions in the medical care, medical and prosthetic research, and medical administration and miscellaneous operating expenses accounts for fiscal year 1981 must continue to be available to fill those positions.

The Comptroller General followed this finding with the following conclusion in his April 13, 1981 letter to the President of the Senate:

In the first two cases, deferrals D81–95 and D81–96 would reduce the funded personnel levels 1,280 and 49 below the mandated levels established by Congress . . . Consequently, we believe that deferrals D81–95 and D81–96 are unauthorized to the extent they result in a reduction in the personnel levels below those mandated by Congress.

Based on the foregoing, we recommend the adoption of an impoundment resolution disapproving deferrals D81–95 and D81–96 on the basis that they are unauthorized under the Impoundment Control Act. This action would require the administration to make the funds available to fund the position mandated by the Congress.

Mr. President, let me state for the record that by passing this resolution, we are not conceding the legality of the proposed deferral. That is also made clear in the text of the resolution. Rather, we are taking the most expeditious action available to correct OMB's mistake and allow the medical staff to be hired.

Mr. President, passing this resolution will be very important to the medical care of our veterans. It is consistent with the appropriations bill which passed the Senate and meets the President's guidelines on the budget. I therefore hope it will pass.

Mr. CRANSTON. Mr. President, I rise in support of Senate Resolution 120, which I joined with my good friend and able colleague, the Senator from Florida (Mr. CHILES), and many others in introducing on May 5.

This is an impoundment resolution, pursuant to section 1013(b) of the Impoundment Control Act of 1974, disapproving the proposed deferrals—D81–95 and D81–96, transmitted by special message from the President on March 10, 1981—of $29.4 million in the Veterans' Administration medical care account and $1.7 million in the VA's medical and prosthetic research account, respectively. According to the deferral documents, the funds involved are for 1,280 full-time equivalent employees—FTEE's—in VA health care facilities and 74 FTEE's in VA health care research programs.

Mr. President, the proposed deferrals are just one further step that Director of the Office of Management and Budget, David Stockman, has taken in persistent, open disregard and violation of section 5010(a)(4) of title 38, United States Code, which requires that he make available to the Veterans' Administration the authority to employ under certain VA health care accounts not less than the number of employees for which Congress has appropriated funds. The VA accounts identified in section 5010(a)(4) are the medical care account, the medical and prosthetic research account, and the medical administration and miscellaneous operating expenses account.

A few weeks ago, on April 27, in a statement appearing on pages S4005 through S4009 of the RECORD, I described Director Stockman's violations of this provision of law, including the application of the Reagan administration's Government-wide hiring freeze, to VA health care employees in violation of section 5010(a)(4).

I also discussed and inserted in the RECORD at that point an April 13 report to the Congress—OGC–81–7—from the Acting Comptroller General concluding that the current OMB-imposed ceilings on VA medical care account and research account employees are 1,280 FTEE's and 49 PTEE's, respectively, below the levels mandated by section 5010(a)(4) by virtue of the enactment of Public Law 96–526, the HUD-Independent Agencies Appropriations Act for fiscal year 1981, which made appropriations for the VA accounts in question. In that same report, which was submitted pursuant to the requirement in section 1014(b) of the Impoundment Control Act that the Comptroller General inform the Congress as to whether in his judgment each proposed deferral is in accordance with existing statutory authority, the Acting

Comptroller General determined that, in light of the fact that deferrals D81–95 and D81–96 would have the effect of reducing the VA's medical care account and research account employment ceilings below the mandated levels, those deferrals are unauthorized. Accordingly, the Acting Comptroller General recommended the adoption of an impoundment resolution disapproving deferrals D81–95 and D81–96 on the basis that they are unauthorized under the Impoundment Control Act.

As the Acting Comptroller General further noted, adoption of such a resolution by either House of Congress, would, under section 1013(b) of the Impoundment Control Act, "require the administration to make the funds avilable to fund the positions mandated by the Congress."

I certainly trust that adoption of this resolution will finally bring to a halt OMB Director Stockman's persistent flouting of the law and congressional intent and that he will not add a violation of section 1013(b) to his list of statutory transgressions.

Mr. President, I want to emphasize for my colleagues that this is not simply an exercise in vindicating certain provisions of the laws relating to veterans' programs and impoundments—though I feel strongly that the statutory principles involved therein would themselves warrant this action. Rather, what is also at stake is the VA's ability to provide health-care services to the Nation's sick and disabled veterans at the levels that the Congress has intened. I would also note specifically that the deferral is severely restricting the operation of a vital program for Vietnam-era veterans—the VA's readjustment counseling program, which is operated at storefront vet center operations at 91 locations. As I noted in my April 27 statement, the deferral is effectively preventing the employment of 114 of the 176 personnel that were specifically funded to enhance and expand the readjustment counseling program.

Mr. President, the most important component of any health-care program or system is far and away the people who provide the care and operate the facilities involved. Congress has long recognized that essential fact with respect to the VA health-care system and, in order to provide badly needed upgrading of VA facilities, has added over 50,000 positions to the VA system over the past decade.

Moreover, it was in reaction to the previous OMB Director's actions thwarting the intent of the Congress, by providing the VA with lower health-care personnel ceilings than the Congress had intended in fiscal year 1979 appropriations legislation and diverting the funds involved to absorption of VA health-care personnel costs resulting from the October 1978 civilian pay raise, that the Congress enacted section 5010(a)(4) of title 38, in section 301 of Public Law 96–151. That law was thus designed to serve a vitally important purpose in helping to insure adequately staffed health-care facilities for our Nation's sick and disabled veterans.

I would note before closing, Mr. President, that, in addition to sponsoring this resolution in order to obtain compliance with title 38, the Impoundment Control Act and Public Law 96–526, I have joined in bringing suit in my official capacity as a Senator—the only time I have ever done so—against OMB Director Stockman. That litigation also is described on pages S4005 through S4009 of the April 27 RECORD, where I had printed a copy of the complaint.

As we contend in that litigation, OMB Director Stockman is unlawfully forcing me and other Senators and Members of Congress to pursue adoption of this resolution in order to seek compliance as swiftly as possible with the laws I have discussed. Although the adoption of this resolution should result in the personnel positions and necessary funding therefor being provided to the VA immediately, this will not amount to a satisfactory resolution of this continuing controversy involving, as it does, so many unlawful actions, so extended a denial of authority to employ much-needed health-care employees, and, apparently, so easily repeated a course of action in defiance of the express law and will of the Congress.

Accordingly, on behalf of the veterans whose health care is at stake and in order to begin instilling appropriate respect for all of the laws involved, I urge my colleagues to support the Chiles resolution.

The resolution (S. Res. 120) was considered and agreed to.

The preamble was agreed to.

The resolution, with its preamble, is as follows:

S. RES. 120

Whereas the provision of medical care for veterans remains a top national priority, even during periods of fiscal restraint; and

Whereas efficient and effective provision of medical care by the Veterans' Administration requires a full complement of physicians, nurses, other health professionals, and support staff; and

Whereas section 5010(a)(4) of title 38, United States Code, requires the Director of the Office of Management and Budget, in each fiscal year, to provide the Veterans' Administration the full personnel ceiling for which the Congress has appropriated funds, and those funds, in three specified Veterans' Administration appropriation accounts (the medical care, medical and prosthetic research, and medical administration and miscellaneous operating expense accounts); and

Whereas the Comptroller General in opinion B–198108 dated February 19, 1981, has held that the Impoundment Control Act of 1974 (31 U.S.C. 1400 et seq.) may not be used to deny to the Veterans' Administration such ceiling and funds mandated to be made available in a given fiscal year pursuant to such section 5010(a)(4) and thereby defeat the mandate of that section; and

Whereas, notwithstanding the foregoing, the Director of the Office of Management and Budget continues to withhold, by virtue of the deferral proposals which are the subject of this resolution (D81–95 and D81–96), such personnel ceiling and funds for two of the Veterans' Administration appropriation accounts involved, the medical care and the medical and prosthetic research accounts (including ceiling and funds expressly intended by Congress to improve and expand readjustment counseling services for Vietnam-era veterans in the vet centers program); and

Whereas the Comptroller General has determined that rather than temporary deferring expenditure of these funds until the fourth quarter of fiscal year 1981, it is intended to use these funds for other purposes and leave the positions unfunded for the entire fiscal year; avoiding such diversion of appropriated funds away from medical care staffing to other purposes was the intent of Congress in enacting section 5010(a)(4); and

Whereas, in light of that action, the Senate in adopting this resolution of disapproval of such proposed deferral is not, and should not be deemed to be, disagreeing with the opinion of the Comptroller General, or condoning the unlawful withholding of the Director of the Office of Management and Budget, but rather is taking all feasible steps to assert its view that the Veterans' Administration must be provided all personnel ceilings in each fiscal year for which funds are appropriated in the specified accounts: Now, therefore, be it

Resolved, That the Senate disapproves the proposed deferrals, D81–95 and D81–96, which would defer the amounts of $29,389,000 and $1,690,000 of budget authority for the Veterans' Administration, as set forth in the message transmitted by the President to the Congress on March 10, 1981, under section 1013 of the Impoundment Control Act of 1974.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the resolution was agreed to.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

SEQUENTIAL REFERRALS—NOMINATIONS

Mr. STEVENS. Mr. President, I ask unanimous consent, as in executive session, that the nominations that were referred yesterday for Inspectors General positions of various agencies be sequentially referred as follows:

That each nomination be referred to the Committees of Legislative Jurisdiction, and if and when each committee reports the nomination, they then be referred to the Government Affairs Committee for not to exceed 20 calendar days.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, I ask unanimous consent, as in executive session, that the nomination of Sherman Maxwell Funk, of Maryland, to be Inspector General of the Department of Commerce, be referred to the Committee on Commerce and if and when the Committee on Commerce reports the nomination, it then be referred to the Committee on Governmental Affairs for not to exceed 20 calendar days.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, I ask unanimous consent as in executive session that the nomination of Joseph P. Welsch, of Virginia, to be Inspector General of the Department of Transportation, be referred to the Committee on Commerce and if and when the Commerce Committee reports the nomination, it then be referred to the Committee on Governmental Affairs for not to exceed 20 calendar days.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, I ask unanimous consent that the nomination of Richard Mulberry, of Texas, to be Inspector General of the Department of the Interior, be referred to the Committee on Energy and if and when the Energy Committee reports the nomination that it then be referred to the Committee on Governmental Affairs for not to exceed 20 calendar days.

The PRESIDING OFFICER. Without objection, it is so ordered.

UNANIMOUS-CONSENT AGREEMENT—S. 854

Mr. STEVENS. Mr. President, I ask unanimous consent that, if and when S. 854, the Foreign Missions Act of 1982, is reported by the Committee on Foreign Relations, it be referred to the Committee on Governmental Affairs for a period of 90 calendar days, excluding weekends, holidays, and those periods when the Senate is not in session, and that the printed report of the Committee on Foreign Relations be delivered to the Committee on Governmental Affairs.

The PRESIDING OFFICER. Without objection, it is so ordered.

EXECUTIVE SESSION

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate go into executive session to consider nominations on the Executive Calendar under Merit System Protection Board and the Department of Health and Human Services.

There being no objection, the Senate proceeded to the consideration of executive business.

The PRESIDING OFFICER. The nominations will be stated.

MERIT SYSTEMS PROTECTION BOARD

The legislative clerk read the nomination of Alex Kozinski, of California, to be Special Counsel.

Mr. STEVENS. Mr. President, I am pleased to support the nomination of Mr. Alex Kozinski to the Office of Special Counsel of the Merit Systems Protection Board. I strongly recommend his confirmation by the Senate.

The Office of Special Counsel was established by the Civil Service Reform Act of 1978 as a part of the Merit Systems Protection Board. The Merit Board is an independent body responsible, among other things, for adjudicating Federal employees' appeals and grievances. The Special Counsel is the Board's investigator and prosecutorial arm.

Unfortunately, the Office of the Special Counsel has never gotten off the ground. Lack of funding, lack of personnel, and the absence of a permanent head have contributed to its lackluster performance. In addition, its strained relationship to the Merit Systems Protection Board has diverted needed resources away from its responsibilities.

I still believe, however, that the legislation establishing the Office of the Special Counsel was correct. The need to establish a viable program to protect our Federal employees from political harassment and abuse exists as much today as it did when we passed the legislation establishing the Office.

I believe Mr. Kozinski understands the challenge before him and has the capabilities and enthusiasm to establish an effective program to protect Federal employees and for that matter the whole system itself. With the nomination and appointment of a new chairman to the Merit Systems Protection Board, Mr. Kozinski has the opportunity to transform its relationship to the Board so the offices can devote their energies to fully carry out their respective, yet interwoven functions.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the nomination was considered and confirmed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

The legislative clerk read the nomination of Robert J. Rubin, of Massachusetts, to be an assistant secretary.

The PRESIDING OFFICER. Without objection, the nomination is considered and confirmed.

Mr. STEVENS. Mr. President, I move to reconsider the vote by which the nomination was confirmed.

Mr. ROBERT C. BYRD. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. STEVENS. Mr. President, I ask unanimous consent that the President be notified of the confirmation of the nominations.

The PRESIDING OFFICER. Without objection, it is so ordered.

LEGISLATIVE SESSION

Mr. STEVENS. Mr. President, I ask unanimous consent that the Senate return to legislative session.

The PRESIDING OFFICER. Without objection, it is so ordered.

ROUTINE MORNING BUSINESS

Mr. STEVENS. Mr. President, I ask unanimous consent that there be a period for routine morning business not to exceed 25 minutes, in which Senators may speak for not to exceed 5 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR STAR PRINT—SENATE JOINT RESOLUTION 84

Mr. ROBERT C. BYRD. Mr. President, on behalf of the distinguished Senator from Arizona (Mr. DECONCINI), I ask unanimous consent that due to a clerical error in the proclamation date, there be a star print of Senate Joint Resolution 84, the National Energy Education Day Resolution. The corrected resolution should read, "To proclaim March 19, 1982, 'National Energy Education Day'." I am submitting a corrected copy of the resolution.

The PRESIDING OFFICER. Without objection, it is so ordered.

RAYMOND NELS NELSON

Mr. PELL. Mr. President, many of us in Rhode Island and Washington and particularly here in the Senate grieve at the dreadful and untimely death yesterday of Raymond Nels Nelson, who was cruelly murdered by an unknown assailant.

I am particularly shocked and saddened by his tragic death because I had known Ray Nelson longer than anyone here in the Senate. It was more than 20 years ago, when I was an underdog first seeking public office and regarded as an unlikely candidate, that Ray Nelson gave up a promising newspaper career with the Providence Journal to join my campaign staff.

As press secretary he contributed enormously to the success of that first campaign, and then for more than 12 years worked directly with me as my administrative assistant. In April of 1974, Ray moved on to the staff of the Senate Committee on Rules and Administration where he did a superior job in the sensitive and complex task of allocating office space in the Senate Office Buildings. In addition, Ray served as Associate Director of the Joint Committee on Inaugural Ceremonies for the last two Inaugurations, directing the broadcast coverage of the ceremonies. He also served in a liaison capacity between the Smithsonian Institution and its oversight Rules and Administration Committees.

There is probably no other Senate employee known to more of us than was Ray. The respect and affection with which he was regarded by his colleagues was shown when he was selected to serve as president of the Senate Staff Club, and last year was presented the Distinguished Service Award by the Congressional Staff Club for "his longtime service in every facet of Senate life." He also served as Senate chairman for the Combined Federal Campaign.

Ray was a truly good man who bubbled with warmth, enthusiasm, and new ideas, and a man in whose company it was always a joy to be.

I know how sad his wife, Shirley, and his children, David, Rebecca, and Mark are. I wanted to take this opportunity to say how much my wife, Nuala, and I grieve for and with them.

I ask unanimous consent that articles about Ray Nelson from the Providence Evening Bulletin of June 1 and the Washington Post of June 2, 1981, be printed at this point in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Providence (R.I.) Bulletin, June 1, 1981]

RAYMOND N. NELSON

Raymond Nels Nelson, 59, former administrative assistant to Senator Claiborne Pell, was found beaten to death today in his Washington home, according to District Police.

Police said a roommate at 701 Quincy Street, NE found the body at about 7:30 AM and called police. Police said they believe Nelson was killed last night or this morning. They have no suspects and no medical cause of death has been determined.

Nelson, a former Journal-Bulletin reporter, was manager of the newspapers' Warwick bureau in 1960 when he left to join Pell's first election campaign as press secretary. He was named administrative assistant to the Senator in January, 1961. He served in that capacity until 1974, when he left to become a staff member of the Senate Committee on Rules and Administration, of which Pell was formerly chairman and is now the ranking minority member.

Nelson, who was well-known and liked on Capitol Hill, had served as president of the Senate Staff Club, a large organization of his colleagues.

Senator Pell, speaking through his Washington office, said he was deeply saddened by "this horrible, senseless tragedy."

"Ray Nelson", he said, "was a dear and old friend of my wife and me, as well as an associate who worked with me for many years. I grieve with and for his wife and children." Pell is in Rhode Island today for Brown University's commencement.

A 1971 Providence Sunday Journal story quoted Mr. Nelson as saying he was "a catholic reader" who had a "natural curiosity and an interest in world affairs". The article continued, "He also has two other things going for him. He is a nice guy and a tough guy and he knows when to be which."

When Mr. Nelson joined the Pell campaign in June, 1960, the candidate, who would become the first unendorsed aspirant to win a statewide primary in Rhode Island, was considered a long shot. Mr. Nelson called the campaign "the most fun I have ever had." Some of his old friends shook their heads at his taking a chance with a unknown candidate. Mr. Nelson said later, "there is absolutely nothing like being right when everybody thinks you are wrong."

Mr. Nelson, whose parents, Nels Hilmer and the late Lillie E. V. (Swanson) Nelson, were Swedish immigrants, was born in Providence on September 2, 1921, and spent his early years in the Pontiac section of Warwick. A twin brother died of spinal meningitis at age 8.

He was a 1939 graduate of the former Lockwood High School in Warwick and served as an enlisted man in Naval aviation during World War II. He had no further formal education except for night school and a ten week journalism course at Brown University.

In the summer of 1939 he worked in the Rhode Island Hospital kitchen, then he was an office assistant at the Fruit of the Loom textile plant.

From 1942 through 1945, he was in the Navy and was an aviation machinist. In a 1956 biographical sketch, he traced his Navy experience, winding up this way: "Was in England for one wonderful year. Never heard shot fired in anger. Only personal acute experience was crash of plane. Believe I was one of luckier ones in war, in retrospect, although at times I volunteered without success for many things, such as aerial gunner, but too big. Nuff said."

Mr. Nelson worked for the Providence Journal-Bulletin as a dictationist in 1946–47 and joined the state staff as a reporter in 1947. He became chief of the Warwick Bureau in 1952 and kept that post until he joined Pell in 1960.

He is survived by his wife, Shirley, of Bethesda, Maryland, a married daughter, Rebecca Rae, and two sons, David Crane and Mark.

[From the Washington Post, June 2, 1981]

SENATE AIDE BEATEN TO DEATH IN HIS NORTHEAST APARTMENT

(By Athelia Knight)

Raymond H. Nelson, a well known Capitol Hill staffer for more than two decades, was discovered brutally beaten to death yesterday in his Northeast Washington apartment.

Nelson, 59, was found by his roommate at 701 Quincy St. NE, about 7:30 a.m., D.C. police said. Police said he died of head injuries. Police said they have no motive in the killing and refused to say what weapon was used in the beating.

Nelson's death shocked neighbors, friends and Capitol Hill colleagues. "I deeply regret this horrible, senseless tragedy," said Sen. Claiborne Pell (D-R.I.), for whom Nelson had worked as an administrative assistant for 13 years. "Ray Nelson was a dear and old friend of my wife and me, as well as an associate who worked with me for many years. I grieve with and for his wife and children."

Nelson worked as Pell's administrative assistant until 1974 when he joined the staff of the Senate Rules Committee. "He was the person mainly in charge of room space allocation in the Senate Building," said John B. Childers, deputy staff director for the committee. "He probably knew more people in the Senate than any single person and more people knew him."

"He was very full of love, very generous, very full of life and vitality," said his daughter-in-law, Vicky, who was at the family's Bethesda home yesterday. "He was always looking for the good things in life."

Neighbors said Nelson and his wife, Shirley, had been separated for several years. The couple had three children—David, Rebecca and Mark.

Even though the couple was separated, neighbors said Nelson was often seen working in the yard and walking the dog.

Nelson, whom friends and colleagues described as a dapper dresser with a penchant for hats he wore cocked to one side, was a native of Providence, R.I.

A 1939 high school graduate, Nelson was an aviation machanist in the U.S. Navy during World War II In 1946, he joined the Providence Journal, where he was a reporter and later became chief of the bureau in Warwick, the paper's largest suburban bureau.

He became campaign press secretary for Pell in 1960. When Pell came to Washington in January 1961, Nelson became his administrative assistant.

Mr. MATHIAS. Mr. President, with the tragic death of Raymond Nels Nelson, we have lost a dedicated member of the Senate staff and a friend.

For many years, Ray has been an arresting, colorful figure in our midst. His character was a fine blend of healthy irreverence traceable to his days as a newspaperman with a practicality and sensitivity honed by his service as administrative assistant to our distinguished colleague, Senator CLAIBORNE PELL. Ray's very special brand of wit and charm was informed by the deep empathy he felt for the joys and sorrows, hopes, and failures of his fellow human beings.

Today, in sorrow, we remember how Ray could pontificate, tongue in cheek, and then having captured our attention, turn serious to impart his message. We remember how he could dismiss stupidity and insensitivity with a disdainful wave of the hand more eloquent than words, and then discourse on the positive aspects of an issue with intelligence and warmth.

In his lifetime, he was husband, father, serviceman, political figure, reporter and bureau chief, Senate administrative assistant, active participant in the Hill's staff activities, and a valuable member of the staff of the Committee on Rules and Administration. He was a devotee of the arts, but at the same time he could participate with implacable joie de vivre in one of the Senate's least aesthetic undertakings—the biennial relocating of offices.

As chairman of the Rules Committee I have the sad duty of informing my colleagues in behalf of Ray's family that he will be cremated and there will be a memorial service for him at Trinity Lutheran Church at 2 p.m., on Thursday, June 4. The church is at 11200 Old Georgetown Road, Bethesda, Md.

Ray's ashes will be interred in the cemetery at Pontiac Lutheran Church in Warwick, R.I., at 2 p.m., on Saturday, June 6.

The family suggests that anyone wishing to do so may make a contribution in memory of Raymond Nels Nelson to: The Children's Hospital National Medical Center, (Attention: Development Office) 111 Michigan Avenue N.W., Washington, D.C. 20010.

TWO SIGNIFICANT EDITORIALS REGARDING THE VOTING RIGHTS ACT

Mr. THURMOND. Mr. President, there has been much controversy—and all too much misinformation—about the discriminatory special-review provisions of the 1965 Voting Rights Act that are up for renewal in August of 1982.

Under the present law, it will be possible for States that were brought under these review provisions to prove in Federal court that there has been no discrimination in voting for 17 years—so that those States under the act could be treated like all other States. That seems to be a reasonable approach. But if the affected States are not allowed that opportunity then all States ought to be brought under the special review requirements.

The real issue is whether the Voting Rights Act will be applied uniformly, or whether certain States and areas continue to be unfairly singled out.

Two recent editorials—one in the South's oldest newspaper, the Augusta (Ga.) Chronicle-Herald, and the other in the Columbia (S.C.) State express some of my sentiments about this important legislation.

Mr. President, in order to share these excellent editorials with my colleagues, I ask unanimous consent that these viewpoints appear at this point in the RECORD.

There being no objection, the articles were ordered to be printed in the RECORD, as follows:

[From the Columbia (S.C.) State, May 22, 1981]

VOTING RIGHTS LAW HAS MET ITS STATE GOALS

The Voting Rights Act of 1965 was a milestone in civil rights enforcement. By making it easier for blacks to register and vote and harder for white officials to thwart them,

the act revolutionized politics in the South. Segregationist politicians either retired from the scene or changed their tunes.

The act, nevertheless, contains elements of unfairness. Originally it was directed principally at the South. It was triggered by a formula based on the use of literacy tests and voter registration in 1964. Only South Carolina, five other Southern states, Alaska, and parts of four other states came under the law at first. Extensions of the act expanded coverage so that 25 states in whole or in part are now included.

The main objectives of the act have been achieved. Voter registration in all covered areas is now sufficient to meet the act's requirements. Literacy tests have been abolished.

But civil rights lawyer Laughlin McDonald argues that without the automatic Justice Department review of election laws there will be "prompt and serious regression in voting rights." We don't believe that. It discounts the importance of the black vote, the good faith of officials, and the power of the federal judicial system.

If Congress, on the other hand, decides the problem is still of sufficient scope to warrant an extension, the law should be applied to all states. It can be argued that this will create an administrative nightmare at the Justice Department. It would. But the review procedure can be changed. The Justice Department has objected to only 2.3 percent of the almost 35,000 election law changes submitted to it. A procedure could be set up to provide federal screening of election law changes at the state or regional level. Only cases involving apparent discriminatory intent would be submitted to Washington.

The most important or most onerous (depending on one's point of view) part of the act, however, is the one requiring the covered areas to get Justice Department or federal court approval before any election law can be changed. The procedure, called preclearance, is designed to prevent subtle changes in the law from diluting the voting strength of blacks and other minorities.

A bill to extend the act for 10 years is now before Congress. Senate Judiciary Committee Chairman Strom Thurmond, whose panel will handle the issue, has made it clear he wants to eliminate the enforcement provisions or extend them to all states.

As we have said, all of the tests laid down in the original legislation have been met by the covered areas. These areas should no longer be required to suffer the stigma of second-class citizenship, should no longer be required to comply with rules not applicable to every part of the nation. Inherent in the act is a presumption of guilt, and that is not a part of the American system.

No one would argue seriously that there are no pockets of discrimination left in the land. Civil rights leader Jesse Jackson, in Columbia last weekend to heat up a nationwide campaign to extend the act, pointed to one such pocket—Senator Thurmond's home county of Edgefield. This county has far more black voters than it had before 1965, but change hasn't increased black representation on governing bodies.

Edgefield, we suggest, is an exception. We would also suggest that such remaining pockets of resistence are not located solely in areas presently covered by the law. Ideally, Congress should let the act die and leave to the courts the task of dealing with discriminatory situations.

[From the Augusta (Ga.) Chronicle-Herald, Apr. 7, 1981]

WATER UNDER THE BRIDGE

It was a moment for liberal nostalgia in Selma, Ala., Sunday as demonstrators assembled to restage the 1965 march to Edmund Pettus Bridge.

Jesse Jackson, now affiliated with an organization styled "People United to Save Humanity," sought to drum up the emotional tension of the long-ago march to Jackson, when he claimed that "means are still being used to keep blacks off the (election registration) books."

Jackson sought to create sentiment supporting extension of the iniquitous federal Voting Rights Act, but his charge is without substance unless and until he can cite instances—places, dates, names—and offer conclusive evidence.

Insofar as the 1965 law eliminated spots of inequity, and insofar as it stimulated the voting conscience of newly registered individuals, it served a purpose. That purpose, however, was tarnished by the law's application to only a few specific states, grossly violating the U.S. Constitution's guarantee of equal protection under the law for all. It placed these states, with blatant disregard for equal rights, under the paternalistic dictatorship of the federal Justice Department in all election matters regarding which states supposedly have jurisdiction. That indignity and handicap is something which vindictive liberals would like to see retained.

It even provided for the utterly absurd legalization of votes by illiterates—which is not a plus, but a minus, in the pursuit of informed, enlightened government.

Jesse Jackson, instead of trying to turn back the clock, should address himself to the present challenges of responsible citizenship in a concerted effort to have good and equitable government for all people.

EDITORIAL COMMENDING APPOINTMENT OF ARTHUR BURNS AS U.S. AMBASSADOR TO WEST GERMANY

Mr. THURMOND. Mr. President, the recent nomination of Dr. Arthur Burns as U.S. Ambassador to West Germany is one of the most outstanding appointments of the Reagan administration.

Dr. Burns has as many admirers on Capitol Hill as he has in the new administration, and I predict his nomination will be resoundingly approved by my colleagues here in the Senate.

West Germany is the heart of the North Atlantic Treaty Organization. During the Easter recess I visited West Germany's capital city, Bonn, and conferred with leading officials of that government. The West Germans are in the forefront in our NATO forces, and I predict this important role will be enhanced under the leadership of Dr. Burns as our representative in Germany.

Mr. President, selection of Dr. Burns for this post has been favorably received both in the United States and Germany. I ask unanimous consent that an editorial praising this nomination, which appeared in the May 28, 1981 issue of the Aiken Standard newspaper in Aiken, S.C. under the heading "Arthur Burns, Staunch Symbol," be printed in the RECORD.

There being no objection, the editorial was ordered to be printed in the RECORD, as follows:

ARTHUR BURNS, STAUNCH SYMBOL

No one could be better suited than Arthur Burns—that staunch symbol of American economic stability—to his newly conferred rank as U.S. ambassador to Germany.

And nowhere, it would seem, will Ambassador Burns be more appreciated than in West Germany, where fiscal integrity is accorded only slightly less respect than godliness.

Arthur Burns has several important qualifications for the task of representing the United States in the capital of its foremost ally. First, there is the close personal relationship and confidence he enjoys with President Reagan. Burns was a principal adviser to the president during the transition period and is one of the chief architects of Mr. Reagan's economic recovery program.

This close relationship, together with the new ambassador's international prestige as an expert in economics and finance, should assure him a warm welcome in Bonn, where the much-admired Germany economic miracle is beginning to lose some of its luster. His appointment was immediately hailed, in fact, by the German government as a sign of the importance President Reagan attaches to German-American relations.

Burns was distinguished by his high-level service to three administrations before becoming an economic adviser to Mr. Reagan. He was chairman of President Eisenhower's Council of Economic Advisers, and chairman of the Federal Reserve Board under Presidents Nixon and Carter.

Few men in public life could carry such prestigious credentials abroad to a post where economic issues will be of an importance rivaled only by the military alliance that binds the United States and Germany.

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

RECOMMENDATIONS WITH RESPECT TO WAIVING CERTAIN SECTIONS OF THE TRADE ACT—MESSAGE FROM THE PRESIDENT—PM 56

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with accompanying papers; which was referred to the Committee on Finance:

To the Congress of the United States:

In accordance with subsection 402(d)(5) of the Trade Act of 1974, I transmit herewith my recommendation for a further 12-month extension of the authority to waive subsections (a) and (b) of section 402 of the Act.

I include as part of my recommendation my determination that further extension of the waiver authority, and continuation of the waivers applicable to the Socialist Republic of Romania, the Hungarian People's Republic, and the

People's Republic of China will substantially promote the objectives of section 402.

This recommendation also includes my reasons for recommending the extension of waiver authority and for my determination that continuation of the three waivers currently in effect will substantially promote the objectives of section 402.

RONALD REAGAN.

THE WHITE HOUSE, *June 2, 1981.*

MESSAGE FROM THE HOUSE

At 2:35 p.m., a message from the House of Representatives, delivered by Mr. Berry, one of its clerks, announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 779. An act to authorize the Secretary of the Army to contract with the Tarrant County Water Control and Improvement District Numbered 1 and the city of Weatherford, Tex., for the use of water supply storage in Benbrook Lake, and for other purposes.

H.R. 1371. An act to amend section 12 of the Contract Disputes Act of 1978.

H.R. 3420. An act to authorize appropriations for fiscal year 1982 for carrying out the Natural Gas Pipeline Safety Act of 1968 and the Hazardous Liquid Pipeline Safety Act of 1979, and for other purposes.

ENROLLED JOINT RESOLUTION SIGNED

The message also announced that the Speaker has signed the following enrolled joint resolution:

S.J. Res. 50. Joint resolution designating July 17, 1981, as "National P.O.W.-M.I.A. Recognition Day".

The enrolled joint resolution was subsequently signed by the President pro tempore (Mr. THURMOND).

HOUSE BILLS REFERRED

The following bills were read twice by unanimous consent, and referred as indicated:

H.R. 779. An act to authorize the Secretary of the Army to contract with the Tarrant County Water Control and Improvement District Numbered 1 and the city of Weatherford, Tex., for the use of water supply storage in Benbrook Lake, and for other purposes; to the Committee on Environmental and Public Works.

H.R. 1371. An act to amend section 12 of the Contract Disputes Act of 1978; to the Committee on Governmental Affairs.

HOUSE BILL PLACED ON THE CALENDAR

The following bill was read twice by unanimous consent, and placed on the calendar:

H.R. 3420. An act to authorize appropriations for fiscal year 1982 for carrying out the Natural Gas Pipeline Safety Act of 1968 and the Hazardous Liquid Pipeline Safety Act of 1979, and for other purposes.

ENROLLED JOINT RESOLUTION PRESENTED

The Secretary reported that on today, June 2, 1981, he had presented to the President of the United States the following enrolled joint resolution:

S.J. Res. 50. Joint resolution designating July 17, 1981, as "National P.O.W.-M.I.A. Recognition Day".

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC–1259. A communication from the Acting General Counsel of the General Accounting Office, transmitting, pursuant to law, a report on the status of budget authority proposed for rescission, but for which Congress failed to pass a rescission bill; pursuant to the order of January 30, 1975, referred jointly to the Committee on Appropriations and the Committee on the Budget.

EC–1260. A communication from the Principal Deputy Assistant Secretary of Defense (Comptroller), transmitting, pursuant to law, notice of the intent to obligate $15.1 million in the Navy Stock Fund for war reserve stocks; to the Committee on Appropriations.

EC–1261. A communication from the Secretary of the Army, transmitting, pursuant to law, notice that the Department of the Army intends to proceed with the next phase of the Chemical Agent Munitions Disposal System at Tooele Army Depot, Utah; to the Committee on Armed Services.

EC–1262. A communication from the Acting Assistant Secretary of the Army (Installations, Logistics, and Financial Management), transmitting, pursuant to law, a report on a study with respect to converting the housing management activity at Fort Eustis, Virginia, and the decision that performance under contract is the most cost-effective method of accomplishment; to the Committee on Armed Services.

EC–1263. A communication from the Deputy Assistant Secretary of Defense (Installations and Housing), transmitting, pursuant to law, a report on three construction projects to be undertaken by the Naval and Marine Corps Reserve; to the Committee on Armed Services.

EC–1264. A communication from the Secretary of the Navy, transmitting a draft of proposed legislation to amend title 10, United States Code, to eliminate the requirement that nominations of persons for appointment to the U.S. Naval Academy be made not later than May 4 of each year; to the Committee on Armed Services.

EC–1265. A communication from the Acting Comptroller General of the United States, transmitting, pursuant to law, a report entitled "DOD's Industrial Preparedness Program Needs National Policy to Effectively Meet Emergency Needs"; to the Committee on Armed Services.

EC–1266. A communication from the Acting Director of the Federal Emergency Management Agency, transmitting, pursuant to law, a report on the acquisition of real and personal property for the quarter ended May 31, 1981; to the Committee on Armed Services.

EC–1267. A communication from the Chairman of the National Credit Union Administration, transmitting, pursuant to law, the first annual report on the Depository Institutions Deregulation Committee, dated May 26, 1981; to the Committee on Banking, Housing, and Urban Affairs.

EC–1268. A communication from the Secretary of Housing and Urban Development, transmitting, pursuant to law, the third annual report on the urban development action grant program; to the Committee on Banking, Housing, and Urban Affairs.

EC–1269. A communication from a member of the Board of Directors of the Export-Import Bank of the United States, transmitting, pursuant to law, a report with respect to a transaction involving U.S. exports to the Socialist Republic of Romania; to the Committee on Banking, Housing, and Urban Affairs.

EC–1270. A communication from the Acting Under Secretary of Energy, transmitting, pursuant to law, the third of the semiannual reports on the activities undertaken by the Department of Energy to implement the alternative fuels portion of the Department of the Interior and Related Appropriations Act for fiscal year 1980; to the Committee on Energy and Natural Resources.

EC–1271. A communication from the Acting General Counsel of the Department of Energy, transmitting a draft of proposed legislation to reduce regulatory burdens and authorize the waiver of licensing requirements with respect to certain non-Federal hydroelectric power projects; to the Committee on Energy and Natural Resources.

EC–1272. A communication from the Chairman of the Nuclear Regulatory Commission, transmitting, pursuant to law, the report on abnormal occurrences at licensed nuclear facilities for the fourth calendar quarter of 1980; to the Committee on Environment and Public Works.

EC–1273. A communication from the Acting Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Billions Could Be Saved Through Waivers For Coastal Wastewater Treatment Plants"; to the Committee on Environment and Public Works.

EC–1274. A communication from the Fiscal Assistant Secretary of the Treasury, transmitting, pursuant to law, the 25th annual report on the condition and results of the operation of the Highway Trust Fund; to the Committee on Finance.

EC–1275. A communication from the Acting Assistant Legal Advisor for Treaty Affairs of the Department of State, transmitting, pursuant to law, a report on international agreements, other than treaties, entered into by the United States in the 60-day period prior to May 21, 1981, to the Committee on Foreign Relations.

EC–1276. A communication from the Secretary of Labor, transmitting, pursuant to law, the semiannual report of the Office of Inspector General, Department of Labor, for the period October 1, 1980 through March 31, 1981; to the Committee on Governmental Affairs.

EC–1277. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of legislation adopted by the Council on May 5, 1981; to the Committee on Governmental Affairs.

EC–1278. A communication from the Chairman of the Council of the District of Columbia, transmitting, pursuant to law, copies of legislation adopted by the Council on May 5, 1981; to the Committee on Governmental Affairs.

EC–1279. A communication from the Mayor of the District of Columbia, transmitting a draft of proposed legislation to amend the District of Columbia Self-Government and Governmental Reorganization Act and section 7324 of title 5, United States Code, to authorize the Council of the District of Columbia to regulate political activities of employees of the District of Columbia Government; to the Committee on Governmental Affairs.

EC–1280. A communication from the Under Secretary of State for Management, transmitting, pursuant to law, notice of new system of records for the Department of State for

implementing the Privacy Act; to the Committee on Governmental Affairs.

EC–1281. A communication from the Deputy Assistant Secretary of Defense (Administration), transmitting, pursuant to law, a report on a new system of records for the Department of Defense for implementing the Privacy Act; to the Committee on Governmental Affairs.

EC–1282. A communication from the Chairwoman of the Merit Systems Protection Board, transmitting, pursuant to law, a report on a new system of records for the Board for implementing the Privacy Act; to the Committee on Governmental Affairs.

EC–1283. A communication from the Deputy Assistant Secretary of Defense, transmitting, pursuant to law, a report for a proposed altered record system entitled "Job Opportunity Announcements"; to the Committee on Governmental Affairs.

EC–1284. A communication from the Acting Administrator of the General Services Administration, transmitting, pursuant to law, a report summarizing and analyzing the reports submitted by executive agencies showing the amount of personal property furnished to non-Federal recipients; to the Committee on Governmental Affairs.

EC–1285. A communication from the Assistant Secretary of Interior for Indian Affairs, transmitting, pursuant to law, a proposed plan for the distribution of funds awarded to the Confederated Tribes of the Colville Reservation of Washington, by the U.S. Court of Claims; to the Select Committee on Indian Affairs.

EC–1286. A communication from the Secretary of Health and Human Services, transmitting, pursuant to law, the Annual Report of the Indian Health Care Improvement Act (P.L. 94–437); to the Select Committee on Indian Affairs.

EC–1287. A communication from the Acting Commissioner, Immigration and Naturalization Service, transmitting, pursuant to law, copies of orders entered in 907 cases in which the authority contained in section 212(d)(3) of the Immigration and Nationality Act was exercised in behalf of such aliens; to the Committee on the Judiciary.

EC–1288. A communication from the Director of the Administrative Office of the U.S. Courts, transmitting a draft of proposed legislation to establish a commission to recommend the salary and benefits of judges and judicial officers, and for other purposes; to the Committee on the Judiciary.

EC–1289. A communication from the Acting Inspector General of the Department of Health and Human Services, transmitting, pursuant to law, a report on a proposed match of payroll records against social security numbers for the purpose of reviewing the integrity of Health and Human Services payroll processing procedures; to the Committee on Labor and Human Resources.

EC–1290. A communication from the Secretary of Health and Human Services, transmitting, pursuant to law, the annual report regarding the status and accomplishments of the runaway youth program; to the Committee on Labor and Human Resources.

EC–1291. A communication from the Secretary of Health and Human Services, transmitting, pursuant to law, the Special Report to the Congress on the Impact of the Change in the Definition of Developmental Disabilities, the Developmental Disabilities Assistance and Bill of Rights Act; to the Committee on Labor and Human Resources.

EC–1292. A communication from the Secretary of Education, transmitting, pursuant to law, a proposed publication entitled "Priorities for fiscal year 1981 for the International Understanding Program"; to the Committee on Labor and Human Resources.

EC–1293. A communication from the Chairman of the Federal Election Commission, transmitting, pursuant to law, the Annual Report of the Federal Election Commission; to the Committee on Rules and Administration.

EC–1294. A communication from the Principal Deputy Assistant Secretary of Defense (Comptroller) transmitting, pursuant to law, a report on the value of certain property, supplies, and commodities provided under the German Offset Agreement by the Berlin Magistrate for the quarter ending March 31, 1981; to the Committee on Appropriations,

EC–1295. A communication from the General Counsel of the Department of Defense, transmitting a draft of proposed legislation to exempt certain physicians from Senate confirmation prior to appointment in the Armed Forces; to the Committee on Armed Services.

EC–1296. A communication from the Acting Assistant Secretary of the Air Force for Research, Development, and Logistics, transmitting, pursuant to law, a report on a decision made to convert the Commissary shelf-stocking and custodial function at Ellsworth Air Force Base, S. Dak. to performance under contract; to the Committee on Armed Services.

EC–1297. A communication from the Acting Assistant Secretary of the Army for Research, Development, and Acquisition, transmitting, pursuant to law, a report on Army Research and Development Contracts over $50,000 awarded October 1, 1980 through March 31, 1981; to the Committee on Armed Services.

EC–1298. A communication from the Acting Director of the Defense Security Assistance Agency, transmitting, pursuant to law, a report on a proposed foreign military sale to Jordan; to the Committee on Armed Services.

EC–1299. A communication from the Deputy Assistant Secretary of Defense for Administration, transmitting, pursuant to law, a report on the financial condition and operating funds of the Department of Defense for the fiscal year ending September 30, 1980; to the Committee on Armed Services.

EC–1300. A communication from the Secretary of the Navy, transmitting a draft of proposed legislation to impose certain restrictions on enlisted and military band personnel; to the Committee on Armed Services.

EC–1301. A communication from the Secretary of Housing and Urban Development, transmitting, pursuant to law, the semiannual report of Inspector General, Department of Housing and Urban Development for October 1, 1980 to March 31, 1981; to the Committee on Banking, Housing, and Urban Affairs.

EC–1302. A communication from the Acting Comptroller General of the United States, transmitting, pursuant to law, a report entitled "FAA Misses Opportunities To Discontinue or Reduce Operating Hours of Some Airport Traffic Control Towers"; to the Committee on Commerce, Science, and Transportation.

EC–1303. A communication from the Secretary of Transportation, transmitting, pursuant to law, the semiannual report of the Inspector General, Department of Transportation, for October 1, 1980, through March 31, 1981; to the Committee on Commerce, Science, and Transportation.

EC–1304. A communication from the Acting Administrator of the National Aeronautics and Space Administration, transmitting, pursuant to law, a report on the construction of a proposed motion generation system; to the Committee on Commerce, Science, and Transportation.

EC–1305. A communication from the Secretary of Commerce, transmitting, pursuant to law, the report of the Inspector General of the Department of Commerce for October 1, 1980, to March 31, 1981; to the Committee on Commerce, Science, and Transportation.

EC–1306. A communication from the Secretary of the Interior, transmitting, pursuant to law, the Outer Continental Shelf oil and gas leasing and production annual report, including the number of reported or alleged safety violations and results of investigations undertaken; to the Committee on Energy and Natural Resources.

EC–1307. A communication from the Under Secretary of the Department of the Interior, transmitting, pursuant to law, notice of a proposed oil and gas lease, Outer Continental Shelf, Gulf of Alaska; to the Committee on Energy and Natural Resources.

EC–1308. A communication from the Acting Comptroller General of the United States, transmitting, pursuant to law, a report entitled "River Basin Commissions Have Been Helpful, But Changes Are Needed"; to the Committee on Environment and Public Works.

EC–1309. A communication from the Acting Administrator of the General Services Administration, transmitting, for the information of the Senate, information on certain proposed lease prospectuses; to the Committee on Environment and Public Works.

EC–1310. A communication from the Assistant Secretary of Health and Human Services (Health), transmitting, pursuant to law, a report on a proposed new system of records for the Department for implementing the Privacy Act; to the Committee on Governmental Affairs.

EC–1311. A communication from the Acting Inspector General of the Community Services Administration, transmitting, pursuant to law, the third semiannual report of the Office of Inspector General, Community Services Administration, for the period October 1, 1980, through March 31, 1981; to the Committee on Governmental Affairs.

EC–1312. A communication from the Deputy Assistant Secretary of Defense (Administration), transmitting, pursuant to law, a report on a proposed new system of records for the Department of Defense for implementing the Privacy Act; to the Committee on Governmental Affairs.

EC–1313. A communication from the Under Secretary of Interior transmitting a draft of proposed legislation to provide for the use and distribution of Clallam judgment funds in docket No. 134 before the Indian Claims Commission, and for other purposes; to the Select Committee on Indian Affairs.

EC–1314. A communication from the controller of the Boys Clubs of America, transmitting, pursuant to law, the audited financial report for the year ending December 31, 1980; to the Committee on the Judiciary.

EC–1315. A communication from the Acting Commissioner of the Immigration and Naturalization Service, transmitting, pursuant to law, orders in the cases of certain aliens who have been found admissible to the United States under the Immigration and Nationality Act; to the Committee on the Judiciary.

EC–1316. A communication from the Director of the Administrative Office of the U.S. Courts, transmitting a draft of proposed legislation to improve the federal jury system by extending the work injury coverage of the Federal Employee's Compensation Acts, title 5, United States Code, to petit and grand jurors in the U.S. district courts, clarifying the compensation of attorneys for jurors to protect their employment rights, and authorizing the service of jury summonses by ordinary mail; to the Committee on the Judiciary.

EC–1317. A communication from the Director of the Administrative Office of the U.S. Courts, transmitting, pursuant to law, the annual report of the Director of the Admin-

istrative Office and the reports of the sessions of the Judicial Conference of the United States held in 1980; to the Committee on the Judiciary.

EC–1318. A communication from the Secretary of Health and Human Services, transmitting, notification that the final report on a study dealing with sudden infant death syndrome will not be available until the end of September 1981; to the Committee on Labor and Human Resources.

EC–1319. A communication from the Chairman of the Minimum Wage Study Commission, transmitting, pursuant to law, the final report of the Commission; to the Committee on Labor and Human Resources.

EC–1320. A communication from the Secretary of Energy, transmitting, pursuant to law, the second semiannual report of the Inspector General for the Department of Energy for the period October 1, 1980 through March 31, 1981; to the Committee on Labor and Human Resources.

EC–1321. A communication from the Secretary of Education, transmitting, pursuant to law, the annual report of the Women's Educational Equity Act Program for fiscal year 1980; to the Committee on Labor and Human Resources.

PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM–125. A resolution adopted by the Dallas Transit Board, commenting upon the proposed recommendation to limit State of Texas capital assistance through the State public transportation fund; to the Committee on Banking, Housing, and Urban Affairs.

POM–126. A resolution adopted by the City Council of Point Arena, Calif., expressing its support of efforts by the Federal Administration to return powers to local entities and urging a careful implementation of those efforts in ways that will enhance, not further impede, home rule; to the Committee on Finance.

POM–127. A resolution adopted by the City Council of Lauderdale Lakes, Fla., opposing any budget cuts which would reduce social security benefits; to the Committee on Finance.

POM–128. A resolution adopted by the California Federation of Women's Clubs, urging changes in the Social Security System to meet the requirements of the changes that have occurred in society; to the Committee on Finance.

POM–129. A resolution adopted by the City Council of Half Moon Bay, Calif., expressing its support of efforts by the Federal Administration to return powers to local entities and urging a careful implementation of those efforts in ways that will enhance, not further impede, home rule; to the Committee on Governmental Affairs.

POM–130. A resolution adopted by the City Council of Signal Hill, Calif., expressing its support of efforts by the Federal Administration to return powers to local entities and urging a careful implementation of those efforts in ways that will enhance, not further impede, home rule; to the Committee on Governmental Affairs.

POM–131. A resolution adopted by the City Council of Westminster, Calif., expressing its support of efforts by the Federal Administration to return powers to local entities and urging a careful implementation of those efforts in ways that will enhance, not impede, home rule; to the Committee on Governmental Affairs.

POM–132. A resolution adopted by the Republican Women's Club of Indian River, Vero Beach, Florida, supporting high bonds for arrested drug defendants and opposing the reduction of such bonds prior to the arraignment of these alleged criminals; to the Committee on the Judiciary.

POM–133. A resolution adopted by the Alabama State Council on the Arts and Humanities, expressing support for the efforts of the Reagan Administration in dealing with the economic problems of the Nation; to the Committee on Labor and Human Resources.

POM–134. A resolution adopted by the City Council of Palm Desert, California, expressing its support of efforts by the Federal Administration to return powers to local entities and urging a careful implementation of those efforts in ways that will enhance, not impede, home rule; ordered to lie on the table.

POM–135. A resolution adopted by the City Council of Pico Rivera, California, expressing its support of efforts by the Federal Administration to return powers to local entities and urging a careful implementation of those efforts in ways that will enhance, not impede, home rule and retaining present cutoff figure of 50,000 for entitlement of funds; ordered to lie on the table.

POM–136. A resolution adopted by the City Council of Needles, California, supporting efforts of the Federal Administration to return home rule to local entities; ordered to lie on the table.

POM–137. A resolution adopted by the City Council of Victorville, California, expressing its support of efforts by the Federal Administration to return powers to local entities and urging a careful implementation of those efforts in ways that will enhance, not impede, home rule; ordered to lie on the table.

POM–138. A resolution adopted by the Board of Directors of the City of Pasadena, California, expressing its support of efforts by the Federal Administration to return powers to local entities and urging a careful implementation of those efforts in ways that will enhance, not further impede, home rule; ordered to lie on the table.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

On May 27, 1981:

By Mr. HATCH, from the Committee on Labor and Human Resources:

Report to accompany the bill (S. 1029) to amend title XIII of the Public Health Service Act relating to health maintenance organizations (Rept. No. 97–127).

On today:

By Mr. HELMS, from the Committee on Agriculture, Nutrition, and Forestry, with an amendment in the nature of a substitute:

S. 1007. A bill to amend the Food Stamp Act of 1977 to restrain food stamp program spending, to increase State agency flexibility, to focus benefits toward the most needy, to extend appropriations authority, to amend the Agriculture and Consumer Protection Act of 1973, and to extend and improve the commodity distribution programs, and for other purposes (with additional views) (Rept. No. 97–128).

By Mr. HELMS, from the Committee on Agriculture, Nutrition, and Forestry, without amendment:

S. Res. 149. An original resolution waiving section 402(a) of the Congressional Budget Act of 1974 with respect to the consideration of S. 1007; referred to the Committee on the Budget.

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. PACKWOOD, from the Committee on Commerce, Science, and Transportation:

Mary Ann Weyforth Dawson, of the District of Columbia, to be a member of the Federal Communications Commission for a term of seven years from July 1, 1981.

(The above nomination, reported from the Committee on Commerce, Science, and Transportation with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

By Mr. WEICKER, from the Committee on Small Business:

Paul Robert Boucher, of Virginia, to be Inspector General, Small Business Administration (Reappointment); pursuant to the order of May 21, 1981, referred to the Committee on Governmental Affairs for 15 calendar days.

(The above nomination, reported from the Committee on Small Business with the recommendation that it be confirmed, subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. HEFLIN:

S. 1295. A bill to establish a Soybean Research Institute for the purpose of coordinating and conducting research programs, encouraging soybean exports, and providing the leadership for a national soybean policy; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. PACKWOOD (by request):

S. 1296. A bill to amend the National Traffic and Motor Vehicle Safety Act of 1966 and the Motor Vehicle Information and Cost Savings Act to authorize appropriations for fiscal years 1982 and 1983; to the Committee on Commerce, Science, and Transportation.

By Mr. THURMOND (for himself and Mr. STAFFORD):

S. 1297. A bill to amend title 38, United States Code; to increase the compensation payable to veterans who have lost or lost the use of both upper extremities as the result of service-connected disability; to the Committee on Veterans' Affairs.

By Mr. WALLOP (for himself, Mr. BRADLEY, Mr. HATFIELD, Mr. PACKWOOD and Mr. BAUCUS):

S. 1298. A bill to amend the Internal Revenue Code of 1954 to extend certain tax provisions to Indian tribal governments on the same basis as such provisions apply to States; to the Committee on Finance.

By Mr. McCLURE (by request):

S. 1299. A bill to reduce the regulatory burdens and authorize the waiver of licensing requirements with respect to certain non-Federal hydroelectric power projects; to the Committee on Energy and Natural Resources.

By Mr. DANFORTH:

S. 1300. A bill to amend the Internal Revenue Code of 1954 to allow individuals a credit for contributions to certain investment accounts, to exempt the earnings on such accounts from tax, and to exempt from tax certain distributions from such accounts; to the Committee on Finance.

By Mr. RANDOLPH (for himself and Mr. CHAFEE):

S. 1301. A bill to amend the Comprehensive Employment and Training Act to provide a career intern program to encourage school districts and community-based organizations to carry out programs to improve the educational employment opportunity for youths; to the Committee on Labor and Human Resources.

By Mr. CRANSTON:

S. 1302. A bill for the relief of Tse Mee Sau; to the Committee on the Judiciary.

By Mr. MELCHER:

S. 1303. A bill to authorize the Secretary of the Interior to exchange certain lands in Hill County, Montana.

By Mr. CHAFEE (for himself, Mr. DURENBERGER, Mr. SARBANES and Mr. BAUCUS):

S. 1304. A bill to amend the Internal Revenue Code of 1954 with respect to the tax treatment of business development companies; to the Committee on Finance.

By Mr. BOSCHWITZ:

S. 1305. A bill for the relief of Sung Tae Sung; to the Committee on the Judiciary.

S. 1303. A bill for the relief of Salome Zusman; to the Committee on the Judiciary.

S. 1307. A bill for the relief of Mr. William Greerson; to the Committee on the Judiciary.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. HEFLIN:

S. 1295. A bill to establish a Soybean Research Institute for the purpose of coordinating and conducting research programs, encouraging soybean exports, and providing the leadership for a national soybean policy; to the Committee on Agriculture, Nutrition, and Forestry.

LEGISLATION TO ESTABLISH A SOYBEAN RESEARCH INSTITUTE

Mr. HEFLIN. Mr. President, I am today introducing legislation to establish a National Soybean Research Institute. My reason for recommending such action is to focus attention on and bring about a renewed commitment to one of our most precious agricultural resources—the soybean.

The soybean is one of this Nation's most nutritional crops. In fact, the soybean has become our leading agricultural commodity, producing a revenue of almost $14 billion annually.

Equally impressive is the fact that soybean exports bring in more revenue than any other single U.S. crop, $8.9 billion in fiscal year 1980–81.

Yet, I strongly believe that we have merely cracked open the door on the possibilities of this miracle crop.

Therefore, Mr. President, with the establishment of a Soybean Research Institute, I feel we could provide the leadership and direction needed at this time to take full advantage of the potential that resides in the production, marketing, and use of soybeans and soybean products.

I foresee the Soybean Research Institute bringing together the most talented scientists, agricultural experts, and concerned groups to solve many of the troublesome production and marketing problems that currently plague U.S. soybean producers.

Production, for example, has tripled over the past 30 years, but this is only because plantings have tripled during this time, not because of any significant growth in increased yield per acre. Thus, while world demand is steadily increasing, our ability to supply is steadily decreasing.

Also, our soybean farmers are plagued by a tiny but destructive parasite, the cyst nematode. This little worm causes $300 million in crop damage each year. So far, these worms have been developing strains faster than researchers can find ways to control them.

Obviously, we must increase our commitment to soybean scientific research in order to curb this threat. The Soybean Research Institute would make it possible to launch an intensive, unified effort to wipe out the cyst nematode.

Naturally, our land grant universities currently involved in soybean research would play a vital role in this effort.

Strengthened commitments are needed in other areas, also. Although we may increase our yield through soybean research, unless we establish a more open, aggressive export policy, then we would be creating an undesirable situation, namely an excessive amount of soybeans for the domestic market.

There is continued competition from various South American soybean producers. The United States still maintains some 70 percent of the export market, but there was a time when we possessed 90 percent of that market. When the export embargoes were imposed during a previous administration, our export customers concluded that we were unreliable suppliers and looked for supplies elsewhere. To fill the vacuum, our competitors jumped headlong into soybean production and captured over 20 percent of the world market.

Argentina, for example, grew 4 million metric tons of soybeans several years ago. This year's crop is nearly four times as great, with 15.7 million metric tons destined for the world market. Brazil, once a very minor competitor, now outdistances the United States in exporting soybean meal.

Of course the Brazilian Government in the past 5 years has assisted its farmers in developing their soybean crop. Because of a commitment to research, they have developed varieties of soybeans more suitable to Brazilian climatic conditions.

Even more important, the Brazilian Government has backed development with generous concessions to foreign investors and enormous subsidies to exporters of meal. These subsidies have amounted to as much as $1 a bushel and have enabled exporters in Brazil to offer European and Japanese feed buyers discounts of $20 to $30 a ton below U.S. prices.

Soybean demand in Japan and Western Europe should continue to grow at a rate of about 5 percent annually; 49.4 million metric tons were produced in the United States and 23.8 million metric tons were exported from the United States. Yet anticipated yield increases and significantly greater planting of soybeans in Brazil, and competition from other oils, may pose threats to American soybean exports in the future. It is absolutely imperative that U.S. producers become more proficient in research and market development in order to profit in today's competitive market.

A National Soybean Research Institute would assume the leadership in expanding international markets for soybeans.

We have been fortunate, Mr. President, in that our country has been spared from the scourge of famine.

But America has not only fed her own people, she has fed hungry people around the world. Since the food for peace program administered by USDA was first initiated by Congress in 1954, this country has contributed more than $30 billion in agricultural commodities to hungry people in foreign nations through government - to - government programs and voluntary agencies cooperating with our Government.

It is predicted that in 25 years the Earth's population will be 6.5 to 7 billion compared to some 4 billion today. These people must be fed and to feed them we must have adequate agricultural research and technology, while maintaining incentives for our farmers to produce.

A National Soybean Research Institute would lay the foundation and insure our success in meeting these future, worldwide needs.

Mr. President, about 85 percent of the soybeans used in and exported from the United States ends up as livestock feed. It was not until the mid-1960's that the Western World began giving serious consideration to soybeans as a direct food—another source of protein.

For the last 5 years, USDA has been spending on the average of $1.2 million a year on soybean research programs involving the use of soy protein for human nutrition.

In addition, private industry has invested about one-half million dollars annually for basic research and product development in the same area.

Here again, I believe that a more intensive effort is needed—and that the Soybean Research Institute would be a natural addition to what is being done in the area of soybean research. It could, in fact, provide the emphasis needed to accomplish a major breakthrough in the development and use of soybean products for human consumption.

Mr. President, the Soybean Research Institute I am proposing would, of course, be supportive of the family farm concept as we know it today. It would be structured to lend aid and assistance to small farmers throughout the Nation. The American family farm represents entrepreneurship at its best. It is here that we find a direct relationship between personal profit and investment, innovation, risk-taking, and just plain old hard work and enterprise.

Russian experts have come to this country to visit American farms, and have taken back to Russia with them our large power units, our combines and pickers, our well-bred livestock, and our high yielding crop varieties. But they do not seem to work well on the Russian farms, because our Russian visitors never saw that invisible mortar and cement that held it all together on the American farm. That invisible mortar or cement is, in fact, the farmer and his family in business for themselves, in pursuit of a little more profit than would come from average performance or would result from central governmental interference or for the so-called good of a commune.

Our Nation—and every nation of the world—must make a commitment to move agriculture to the front burner. To do less would be to condemn hundreds of millions of people to such a substandard level of living in a few years that peace would be difficult, if not impossible. That is why this Nation's agriculture now commands such a strategic position. And this is why it must be kept moving forward.

I feel that my proposal to establish a National Soybean Research Institute could serve as a major element in our overall agricultural policy.

Mr. President, I hope that hearings can be held expeditiously and I extend an invitation to my colleagues to join me in this unique and worthwhile endeavor. I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1295

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

That a Soybean Research Institute shall be established and that sufficient funds shall be allocated to maintain the administrative functions of the Institute and to enable the development of a unified, aggressive national soybean policy.

The Soybean Institute shall develop programs to accomplish the following:

(1) Working cooperatively with the President, the U.S. Department of Agriculture and other Federal agencies, to develop an intensive research program to increase the per acre yield and eliminate the cyst nematode parasite.

(2) Development of an effective soybean export market policy.

(3) Formation of a cohesive unit including national and international groups interested in and responsible for food production and/or consumption, for the purpose of establishing and coordinating national and international objectives.

(4) To insure that the soybean shall fulfill its role as a miracle protein crop for the United States and for the world.

The Institute shall be composed of sixteen (16) members and a chairman.

The President, upon nomination by the Secretary of Agriculture, shall select the members. Members shall be selected from a broad spectrum of agriculture, business, scientific, educational, and consumer interests. The composition of the members of the Institute shall be balanced geographically; and the term of office of the members shall be for a period of six (6) years. The term of office for the members shall be staggered so that the terms of one-fourth (¼) of the membership will expire simultaneously.

By Mr. THURMOND (for himself and Mr. STAFFORD):

S. 1297. A bill to amend title 38, United States Code, to increase the compensation payable to veterans who have lost or lost the use of both upper extremities as to the result of service-connected disability; to the Committee on Veterans' Affairs.

LEGISLATION TO INCREASE VA COMPENSATION RATES FOR VETERANS WHO HAVE SUFFERED THE LOSS OF BOTH UPPER EXTREMITIES

Mr. THURMOND. Mr. President, I rise to introduce legislation that would amend section 314, title 38, U.S.C., which would increase rates of disability compensation payable to veterans who have suffered the loss or loss of use of both upper extremities as a result of a service-connected disability.

Mr. President, according to data received from the Veterans Administration, there are 125 veterans who have suffered the service-connected loss of both upper extremities and 357 veterans who have incurred the service-connected loss of use of both upper extremities.

Depending upon the degree of impairment and/or the site of the extremity amputation involved, these veterans are rated by the VA in the upper special statutory award categories under section 314 of title 38. My bill would advance these veterans one full step in their present statutory award category. This would amount to an average increase of some $250 per month to these severely disabled veterans.

Mr. President, in view of the many and varied disabilities one may have, the compensation rating schedule is very complex in its effort to adequately compensate for service-connected injuries. However, under current law, a certain distinction is made—and a higher rate of compensation is paid—with respect for the loss of a single upper extremity, if that extremity is on the right or left side of a right- or left-handed veteran. In contrast, this higher rating is not reflected in the case of a single lower extremity loss since there is no comparable dexterity function that is involved.

However, when considering bilateral upper and lower extremity losses, this distinction is not carried through and both classes of double amputees are treated the same. I believe this is a disparity that should be rectified.

Mr. President, I believe upon close examination of the loss of function suffered by bilateral arms amputees and the very limited extent of function restored by their prosthetic devices, one will agree that veterans so disabled suffer a more distinct disadvantage in terms of their ability to function in their daily activities than those veterans who suffer the loss of both legs.

Mr. President, I ask unanimous consent that my bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1297

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 314 of title 38, United States Code, is amended by—

(a) striking from subsection (1) the words "both hands, or";

(b)(1) striking from subsection (m) the words "two extremities" and inserting in lieu thereof "both hands, or both legs"; and

(2) striking out the words "elbow or" in subsection (m);

(c) striking from subsection (n) everything after the phrase "as the result of service-connected disability," and by inserting in lieu thereof all of the following: "has suffered the anatomical loss or loss of use of both arms at a level, or with complications preventing natural elbow action with prosthesis is place, or has suffered the anatomical loss of both legs so near the hip as to prevent the use of a prosthetic applicance, or has suffered the anatomical loss of both eyes, the monthly compensation shall be $1,581"; and

(d) inserting in subsection (o) immediately following the comma after the phrase "total blindness with 5/200 visual acuity or less," all of the following: "or if the veteran has suffered the anatomical loss of both arms so near the shoulder as to prevent the use of a prosthetic appliance,".

SEC. 2. The amendments made by the first section of this Act shall take effect October 1, 1981.

By Mr. WALLOP (for himself, Mr. BRADLEY, Mr. HATFIELD, Mr. PACKWOOD, and Mr. BAUCUS):

S. 1298. A bill to amend the Internal Revenue Code of 1954 to extend certain tax provisions to Indian tribal governments on the same basis as such provisions apply to States; to the Committee on Finance.

INDIAN TRIBAL GOVERNMENTAL TAX STATUS ACT OF 1981

● Mr. WALLOP. Mr. President, I am pleased today to introduce a bill that is of vital importance to American Indians. This legislation would enhance the opportunities of Indian tribal governments to provide essential governmental services to these tribal members by according Indian tribal governments the same tax status which is currently accorded State, county, and municipal governments. Enactment of this bill would strengthen tribal governments significantly by providing additional sources of financing and by eliminating the unfair burden of taxes Indian tribal governments must now pay. Joining with me in sponsoring this legislation are: Senators BRADLEY, HATFIELD, PACKWOOD, and BAUCUS.

Mr. President, this legislation already has a strong legislative history. A bill identical in all substantive respects to my legislation was introduced in the 95th Congress under the sponsorship of Chairman Ullman of the Committee on Ways and Means and Chairman UDALL of the

Committee on the Interior. That bill, H.R. 4089, was a subject of hearings by the Committee on Ways and Means and was reported favorably to the House, but was not considered prior to adjournment of the 95th Congress. Similar legislation was reintroduced in the 96th Congress, but no action was taken on it at that time. The companion legislation in the House of Representatives is being introduced under the sponsorship of Mr. JONES and Mr. UDALL, along with several other cosponsors. In my view enactment of this legislation in the 95th Congress as recommended by the Committee on Ways and Means was fully justified and today, there are even more compelling reasons for prompt enactment of this proposal.

This bill would amend the Internal Revenue Code to extend certain Federal tax benefits to recognized Indian tribes and Alaskan Natives, placing those tribal governments on an equal footing with the tax treatment accorded States, municipalities and local governments for certain tax purposes. This legislation would not, I emphasize not, expand the taxing power of recognized Indian tribal governments, but rather would overturn a technical and questionable ruling by the Internal Revenue Service which denies those governments the treatment accorded State and local governments for certain tax purposes.

Legal authorities long have recognized the power of Indian tribes to govern their reservations and members. Specifically, tribal governments have the authority to exercise general police powers, including the power to tax transactions occurring on reservation lands.

In implementation of these powers, many tribal governments have assumed broad governmental responsibilities. Tribes have provided to their members police and fire protection, health care, schools, roads and transportation, recreational facilities, and agricultural and business assistance. Because of these activities which have been aimed at stimulating their economies and providing common governmental services, the revenue needs of tribal governments have increased.

As a matter of policy, the Federal Government for the past half century virtually without exception has sought to strengthen tribal governments politically and economically. The Indian Reorganization Act of 1934 authorized tribes to modernize their governmental structures to deal more effectively with contemporary problems and needs. In recent years both Congress and the executive branch have reaffirmed and strengthened the governmental role of Indian tribes. Most recent Federal legislation, for example, which provides assistance to local governments, also expressly includes assistance to tribal governments. These acts include the Economic Opportunity Act, Economic Development Act, the Housing and Urban Development Act, the Juvenile Delinquency Prevention and Control Act, the Omnibus Crime Control and Safe Streets Act, and the State and Local Fiscal Assistance Act.

In an effort to assume greater responsibility for financing their own governmental functions and services, Indian tribes have endeavored to raise funds at the local level through the collection of tribal taxes. Efforts of Indian tribal governments to levy their own taxes, however, have been only partially successful because the Internal Revenue Code does not extend to Indian tribes the same treatment it accords other State and local governments. This difference in treatment undermines the tax initiatives of tribal governments and seriously interferes with their efforts to improve the conditions of life in Indian country.

There are essentially two ways of overcoming the position of the Internal Revenue Service regarding the tax status of Indian tribal governments. The first is to incorporate pursuant to State law. The second is to enact legislation to overcome the position of IRS. The first option—incorporation under State law—would qualify a tribe as a municipal corporation eligible to receive a tax exempt status but it would require a tribe to become, in effect, a political subdivision of the State. Such a status would be totally inconsistent with the legal and political history of Indian tribes and would tend to undercut the sovereignty and integrity of such tribal governments.

The more historically justified approach is to discontinue the discriminatory application of Federal tax laws to Indian tribal governments. Both the Congress and the President have indicated repeatedly their intention to treat Indian tribal governments fairly in the provision of Federal assistance and to provide the same benefits to Indian tribal governments that are now afforded to State and local governments. This legislation would make available to tribal governments tax benefits now available to State and local governments to deal more effectively with their current needs.

PROVISIONS IN THE LEGISLATION

The most significant aspects of the bill are that it: First, grants a deduction from Federal income tax for taxes paid to an Indian tribe; second, provides that charitable contributions to Indian tribal governments would be deductible for income, estate and gift purposes; third, exempts Indian tribal governments from a variety of excise taxes; including the tax on special fuels, the manufacturers excise taxes and the tax on the use of certain highway vehicles; and fourth, provides an income tax exemption for certain governmental obligations, subject to special limitations regarding the tax treatment of industrial development bonds issued by an Indian tribal government.

TAX IMPACT

The tax impact of this legislation was estimated by the House Ways and Means Committee in its report filed by the committee in the 95th Congress after consideration of this legislation in 1978. The committee, in agreement with the Treasury Department, estimated that the provisions in the legislation relating to the deductibility of Indian tribal government taxes would reduce income tax revenues by $1 million a year. The revenue effect of the other provisions in the legislation was estimated to reduce overall tax liability by less than $5 million per year.

Mr. President, at a time when President Reagan and the Congress is looking to cut Federal spending and reduce the bureaucracy we are looking to State and local governments to assume a greater responsibility for carrying out their governmental functions. Tribal governments are willing to accept these same responsibilities. It seems to me only fair and just to free legitimately recognized Indian tribal governments from the discriminatory constraints imposed upon them by the interpretation of our tax laws given by the Internal Revenue Service. The quickest, most effective, and logical way of eliminating this discriminatory treatment is to enact S. 1298. This action by the Congress would impose no significant tax burden on our citizens but rather would enhance the ability and opportunity of recognized Indian tribal governments to provide better, more efficient, and economical services to their constituent members at a time when such governmental services are greatly needed.

This legislation has the strong support of Indian tribes throughout the United States as well as numerous organizations who work on behalf of American Indians. As evidence of this support, I ask unanimous consent that a resolution from the Northern Arapahoe Business Council meeting at Fort Washakie, Wyo., on April 24, 1981, be printed in the RECORD.

There being no objection, the resolution was ordered to be printed in the RECORD, as follows:

RESOLUTION No. 4721

Whereas, the Arapahoe Business Council considers it essential that the United States Government continue to recognize that Indian Tribes are in fact governments in the same manner that state, county and municipal governments are and should therefore enjoy all of the same benefits and rights under the federal tax system that those other governments already possess; and

Whereas, important congressional leaders in the 97th Congress, particularly Senator Malcolm Wallop of Wyoming, have recognized that the time has come for enactment of legislation to give Indian Tribes these governmental tax benefits and rights;

Now, therefore, be it resolved, that the Arapahoe Business Council strongly urges that Senator Wallop, consistent with his previous interest in this subject, sponsor and introduce a Senate Bill which has been drafted, circulated and discussed with Congressional Leaders entitled the Indian Tribal Governmental Tax Status Act; and

Be it further resolved, That Senator Alan Simpson support the measure in every way he can and that Congressman Richard Cheney support the same bill when introduced in the near future in the United States House of Representatives.●

By Mr. McCLURE (by request):

S. 1299. A bill to reduce regulatory burdens and authorize the waiver of licensing requirements with respect to certain non-Federal hydroelectric power projects; to the Committee on Energy and Natural Resources.

WAIVER OF CERTAIN LICENSING REQUIREMENTS WITH RESPECT TO CERTAIN NON-FEDERAL HYDROELECTRIC POWER PROJECTS

● Mr. McCLURE. Mr. President, at the request of the administration, I send to the desk for appropriate reference a bill to reduce regulatory burdens and authorize the waiver of licensing requirements with respect to certain non-Federal hydroelectric power projects.

Mr. President, this draft legislation was submitted and recommended by the Department of Energy, and I ask unanimous consent that the bill and the executive communication which accompanied the proposal from the Acting General Counsel be printed in the RECORD.

There being no objection, the bill and communication were ordered to be printed in the RECORD, as follows:

S. 1299

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Federal Power Act (16 U.S.C. § 792 *et seq.*) is amended by adding after section 30 a new section as follows:

"SEC. 31. In order to simplify, promote, and expedite the development of a non-Federal hydroelectric power project, and consistent with the public interest and safety, the Commission, by rule or order, may waive any provision of this Part, in connection with an application for, or amendment or notice of, a permit, license, or exemption for an existing or proposed water project and appurtenant project works, if the total installed capacity of the project upon completion is equal to or less than 15 megawatts, subject to terms and conditions that the Commission considers appropriate."

DEPARTMENT OF ENERGY,
Washington, D.C., May 21, 1981.

Hon. GEORGE BUSH,
President of the Senate,
Washington, D.C.

DEAR MR. PRESIDENT: Enclosed is proposed legislation "[t]o reduce regulatory burdens and authorize the waiver of licensing requirements with respect to certain non-Federal hydroelectric power projects." This proposed legislation is part of the Department of Energy legislative program for the 97th Congress. The Office of Management and Budget advises that the presentation of this proposal is in accord with the President's program.

PURPOSE OF THE LEGISLATION

The purpose of this bill is to simplify, promote, and expedite the development of non-Federal hydroelectric power projects by authorizing the Federal Energy Regulatory Commission (FERC) to reduce unnecessary or burdensome regulatory requirements with respect to hydroelectric projects having an installed capacity of 15 megawatts or less.

FERC currently has limited authority to waive the licensing requirements of the Federal Power Act for (a) hydroelectric projects of 5 megawatts or less at existing dams and impoundments (16 U.S.C. § 2705(d)) and (b) hydroelectric projects of 15 megawatts or less installed in water conduits, on non-Federal lands that are used for irrigation or industrial purposes. (16 U.S.C. § 823a.) The draft bill would expand this waiver authority, and the related authority to prescribe terms and conditions, so that it extends to all hydroelectric projects of 15 megawatts of installed capacity or less, whether the projects utilize new or existing dams, are on Federal or non-Federal lands, or utilize conduits, rivers, or other watercourses.

It is expected that enactment of this bill would reduce the regulatory burden on those persons who now must seek an application for a permit or license for their small water power projects subject to Federal Power Act provisions. It also would reduce the administrative burden on the FERC. The requirements of the Federal Power Act with respect to small non-Federal hydroelectric power projects are often needlessly detailed and excessively burdensome. Mandatory continuation of these requirements is unjustifiable.

Sincerely,

ERIC J. FYGI,
Acting General Counsel.●

By Mr. DANFORTH:

S. 1300. A bill to amend the Internal Revenue Code of 1954 to allow individuals a credit for contributions to certain investment accounts, to exempt the earnings on such accounts from tax, and to exempt from tax certain distributions from such accounts; to the Committee on Finance.

INVESTMENT CREDIT INCENTIVE ACT OF 1981

● Mr. DANFORTH. Mr. President, today, I am introducing the Investment Credit Incentive Act of 1981. This legislation is aimed at stimulating increased personal saving in our country through tax incentives. It is patterned after similar legislation (H.R. 3073) currently pending in the House of Representatives introduced by Congressman DICK GEPHARDT. In my opinion, Congressman GEPHARDT has made a valuable and timely contribution to the debate concerning the development of effective tax incentives for saving.

Under this legislation, a tax credit of 10 percent is allowed on the first $5,000 invested each year in an account in a financial institution. The maximum amount that can be contributed to such an account is $50,000. Earnings on these contributions would not be taxed as long as they were kept on deposit. Withdrawals of principal or interest before the end of a 10-year period would be taxed at ordinary tax rates. At the end of 10 years, up to $50,000 in capital and $50,000 in earnings could be removed from the account tax free. Additional withdrawals of either would be taxed at capital gain rates.

It is well documented that the United States has the lowest savings rate of our major trading partners. There is little doubt that an important element of stimulating productivity, reducing inflation, and enhancing our international competitiveness is increasing the pool of savings from which businesses can finance new capital investment.

While this bill may not be the preferred incentive for every saver or investor in our country, it does provide some incentive to all of them. In addition, a 10-year program for saving and reinvesting would encourage the type of long-term stable supply of funds we need without discouraging savers by limiting access to their funds for an unrealistically long period.

Mr. President, I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1300

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE.

This act may be cited as the "Investment Credit Incentive Act of 1981".

SEC. 2. INVESTMENT ACCOUNTS.

(a) IN GENERAL.—Subpart A of part IV of subchapter A of chapter 1 of the Internal Revenue Code of 1954 (relating to credits against tax) is amended by inserting after section 44E the following new section:

SEC. 44F. CONTRIBUTIONS TO INVESTMENT ACCOUNTS.

"a() ALLOWANCE OF CREDIT.—In the case of an individual, there shall be allowed as a credit against the tax imposed by this chapter for the taxable year an amount equal to 10 percent of the sum of—

"(1) the amounts paid in cash, and

"(2) the fair market value of qualified securities transferred,

during the taxable year by such individual to an investment account.

"(b) LIMITATIONS.—

"(1) MAXIMUM CREDIT.—The credit allowed subsection (a) to an individual for a taxable year may not exceed $500.

"(2) LIMITATION BASED ON AMOUNT OF TAX.—The credit allowed by subsection (a) shall not exceed the tax imposed by this chapter for the taxable year, reduced by the sum of the credits allowable under a section of this subpart having a lower number or letter designation than this section, other than credits allowable by sections 31, 39, and 43.

"(c) DEFINITIONS.—For purposes of this section—

"(1) INVESTMENT ACCOUNT.—The term 'investment account' means a trust created or organized in the United States for the exclusive benefit of an individual or his beneficiaries, but only if the written governing instrument creating the trust meets the following requirements:

"(A) No contribution will be accepted by the trust if—

"(i) it is other than in cash or qualified securities, or

"(ii) the investor has any other investment account.

"(B) The sum of—

"(i) the cash, and

"(ii) the aggregate fair market value of all property,

contributed to the trust for all taxable years will not exceed $50,000.

"(C) The trustee is a bank (as defined in section 401(d)(1)), or any other person who demonstrates to the satisfaction of the Secretary that the manner in which such other person will administer the trust will be consistent with the requirements of this section.

"(D) The interest of the investor in the account is nonforfeitable.

"(E) No part of the trust assets will be invested in life insurance contracts.

"(F) The assets of the trust will not be commingled with other property except in a common trust fund or common investment fund.

"(2) QUALIFIED SECURITY.—The term 'qualified' means any security (within the meaning of section 165(g)(2)) which is readily tradable on an estabilshed securities market.

"(d) INVESTMENT ACCOUNT EXEMPT FROM TAX.—Any investment account shall be exempt from taxation under this subtitle except for the taxes imposed by section 511 (relating to imposition of tax on unrelated business income).

"(e) ORDERING RULES FOR DISTRIBUTIONS.—Distributions from an investment account shall be deemed to be made—

"(1) first from the adjusted contributions to the account, to the extent thereof,

"(2) second from the qualified seasoned earnings of the account, to the extent thereof,

"(3) third from the nonqualified seasoned earnings of the account, to the extent thereof, and

"(4) then from other amounts in the account.

"(f) TAX TREATMENT OF DISTRIBUTIONS.—

"(1) IN GENERAL.—Amounts paid out of an investment account during a taxable year shall be subject to taxation as follows:

"In the case of amounts paid out of:	Tax treatment:
A. Adjusted contributions	No tax.
B. Qualified seasoned earnings	No tax.
C. Nonqualified seasoned earnings	40 percent inclusion.
D. Other amounts	100 percent inclusion.

"(2) DEFINITIONS RELATING TO TAX TREATMENT.—For purposes of paragraph (1)—

"(A) 40 PERCENT INCLUSION.—The term '40 percent inclusion' means 40 percent of each payment shall be included in gross income (as ordinary income) by the payee for the taxable year in which the payment is received.

"(B) 100 PERCENT INCLUSION.—The term '100 percent inclusion' means 100 percent of each payment shall be included in gross income (as ordinary income) by the payee for the taxable year in which the payment is received.

"(3) ADJUSTED CONTRIBUTIONS.—For purposes of this subsection, the term 'adjusted contributions' means with respect to any payment out of an investment account, the excess of—

"(A) the sum of—

"(i) all cash contributed to the account, plus

"(ii) the aggregate adjusted bases of all property contributed to the account,

before the close of the taxable year during which such payment is made, over

"(B) the credit allowed by subsection (a) for such taxable year and all prior taxable years with respect to contributions to the account.

"(4) DEFINITIONS AND SPECIAL RULES RELATING TO EARNINGS.—For purposes of this subsection—

"(A) SEASONED EARNINGS.—The term 'seasoned earnings' means, with respect to any payment out of an investment account, the lowest amount of earnings in such account during the period of 10 taxable years ending before the taxable year in which such payment is made.

"(B) QUALIFIED SEASONED EARNINGS.—The term 'qualified seasoned earnings' means the seasoned earnings of the account to the extent such earnings do not exceed $50,000.

"(C) NONQUALIFIED SEASONED EARNINGS.—The term 'nonqualified seasoned earnings' means the seasoned earnings of the account which are not qualified seasoned earnings.

"(D) SPECIAL RULES.—

"(i) EARNINGS INCLUDE REALIZED APPRECIATION, ETC.—The earnings of the account include realized appreciation and other net gains.

"(ii) ACCOUNT TREATED AS HAVING NO EARNING BEFORE CREATION.—For purposes of subparagraph (A), the earnings of the account shall be zero for any taxable year before the taxable year in which the account is created.

"(iii) PROPER ADJUSTMENTS FOR DISTRIBUTIONS.—In determining seasoned earnings for any taxable year, proper adjustments shall be made for distributions of seasoned earnings in prior taxable years.

"(g) SPECIAL RULES.—For purposes of this section—

"(1) FAIR MARKET VALUE OF QUALIFIED SECURITIES DETERMINED ON DATE OF CONTRIBUTION.—In the case of a contribution of qualified securities to any investment account, the fair market value of the securities shall be determined on the date of the contribution.

"(2) DISTRIBUTIONS OF PROPERTY.—In the case of a distribution of property from any investment account, the fair market value of such property (determined on the date of the distribution) shall be treated as an amount paid out of such account.

"(3) ACCOUNT MUST BE NONTRANSFERABLE EXCEPT AT DEATH.—An account shall not be treated as exclusively for the benefit of an individual unless—

"(A) it is nontransferable except at the death of the investor or as provided in paragraph (6), and

"(B) the written governing instrument creating the trust provides that all amounts in the account will be distributed to the beneficiaries of the investor before the close of the 5th year following the death of the investor.

"(4) TERMINATION OF ACCOUNT IN CERTAIN CASES.—An account shall be treated as terminated—

"(A) on the first day on which the account—

"(i) buys or leases any property from, or sells or leases any property to, or

"(ii) borrows any money from, or lends any money to,

the investor or any member of his family, and

"(B) if it has not therefore terminated, on the last day of the 5th year after the date of the death of the investor.

In any such case, the trust shall be treated as paying out all amounts in the trust on the day on which it is treated as terminated.

"(5) EFFECT OF PLEDGING ACCOUNT AS SECURITY.—If at any time the investor (or a beneficiary) uses the account or any portion thereof as security for a loan, the portion so used shall be treated as distributed to the investor (or beneficiary).

"(6) DIVORCE.—The transfer of an investor's interest in an investment account to the investor's former spouse under a divorce decree or under a written instrument incident to such divorce is not to be considered a taxable transfer made by the investor notwithstanding any other provision of this subtitle, and such interest at the time of the transfer is to be treated as an investment account of the spouse and not of the investor. Thereafter such account shall be treated for purposes of this subtitle as maintained for the benefit of such spouse.

"(7) BASIS IN ACCOUNT AFTER DEATH.—The basis of any investment account in the hands of a person acquiring such account by reason of the death of the investor shall be able the same as the basis in such account immediately before the death of the investor.

"(8) CONTRIBUTIONS RETURNED BEFORE DUE DATE OF RETURN.—

"(A) IN GENERAL.—If—

"(i) any amount contributed during a taxable year to an investment account is paid out of such account on or before the date prescribed by law (including extensions of time) for filing the return of tax imposed by this chapter for such taxable year,

"(ii) no credit is allowed by subsection (a) with respect to such amount, and

"(iii) such payment is accompanied by the net income attributable to such amount, then such amount shall not be treated as a contribution to such account.

"(B) YEAR INCOME INCLUDED.—Any net income described in subparagraph (A)(iii) shall be included in the gross income of the individual for the taxable year in which the contribution was made.

"(9) CUSTODIAL ACCOUNTS.—Rules similar to the rules provided by section 408(h) shall apply.

"(10) REPORTS.—The trustee of an investment account shall make such reports regarding such account to the Secretary, and to the investor, with respect to contributions, distributions, and such other matters as the Secretary may require under regulations. The reports required by this paragraph shall be filed at such time and in such manner, and furnished to such individuals at such time and in such manner, as may be required by those regulations.

"(h) OTHER DEFINITIONS.—For purposes of this section—

"(1) INVESTOR.—The term 'investor' means the individual for whom the account is established.

"(2) MEMBER OF FAMILY.—The family of the investor shall be treated as including his spouse, ancestors, lineal descendants, and any spouse of a lineal descendant.

"(3) DISTRIBUTIONS TREATED AS PAYMENTS.—Any distribution out of an account shall be treated as a payment out of such account.

"(i) SECTION NOT TO APPLY TO CERTAIN PERSONS.—This section shall not apply to any estate or trust, nor shall it apply to any nonresident alien individual."

(b) TAX ON EXCESS CONTRIBUTIONS.—

(1) IN GENERAL.—Section 4973 of such Code (relating to tax on excess contributions to individual retirement accounts, certain section 403(b) contracts, certain individual retirement annuities, and retirement bonds) is amended by adding at the end thereof the following new subsection:

"(d) EXCESS CONTRIBUTIONS TO INVESTMENT ACCOUNTS.—For purposes of this section in the case of an investment account (within the meaning of section 44F(c)(1)), the term 'excess contributions' means the excess of—

"(1) the sum of—

"(A) the cash, and

"(B) the aggregate fair market value of all property,

contributed to the account during the taxable year and all prior taxable years, over

"(2) $50,000.

For purposes of this subsection, any contribution which is paid out of an investment account in a distribution to which section 44(F(g)(8) applies shall be treated as an amount not contributed."

(2) TAX PAID BY INVESTOR.—Subsection (a) of section 4973 of such Code is amended by adding at the end thereof the following new sentence: "In the case of an investment account, the tax imposed by this subsection shall be paid by the individual for whom the account is established."

(3) TECHNICAL AND CONFORMING AMENDMENTS.—

(A) Subsection (a) of section 4973 of such Code is amended by redesignating paragraphs (2) and (3) as paragraphs (3) and (4), respectively, and by inserting after paragraph (1) the following new paragraph:

"(2) an investment account (within the meaning of section 44F(c)(1)),".

(B) The section heading for section 4973 of such Code is amended by inserting "INVESTMENT ACCOUNTS," after "RETIREMENT ACCOUNTS,".

(C) CLERICAL AMENDMENT.—The item relating to section 4973 in the table of sections for subchapter B of chapter 42 of such Code is amended by inserting "investment accounts," after "retirement accounts,".

(c) FAILURE TO PROVIDE REPORTS ON INVESTMENT ACCOUNTS.—

(1) IN GENERAL.—Subsection (a) of section 6693 of such Code (relating to failure to provide reports on individual retirement accounts or annuities) is amended by adding at the end thereof the following new sentence: "The person required by section 44F(g)(10) to file a report regarding an investment account at the time and in the manner required under such section shall pay a penalty of $10 for each failure unless it is shown that such failure is due to reasonable cause."

(2) CLERICAL AMENDMENTS.—

(A) The section heading for section 6693 of such Code is amended by inserting "OR INVESTMENT ACCOUNTS" after "ANNUITIES".

(B) The item relating to section 6693 in the table of sections for subchapter B of chapter 68 of such Code is amended by inserting "or investment accounts" after "annuities".

(d) OTHER TECHNICAL AND CONFORMING AMENDMENTS.—

(1) Subsection (b) of section 6096 of such Code (relating to designation of income tax payments to Presidential Election Campaign Fund) is amended by striking out "and 44E" and inserting in lieu thereof "44E, and 44F".

(2) The table of sections for subpart A of part IV of subchapter A of chapter 1 of such Code is amended by inserting after the item relating to section 44E the following new item:

"Sec. 44F. Contributions to investment accounts."

(e) EFFECTIVE DATE.—The amendments made by this section shall apply to contributions made in taxable years beginning after December 31, 1981.●

By Mr. RANDOLPH (for himself and Mr. CHAFEE):

S. 1301. A bill to amend the Comprehensive Employment and Training Act to provide a career intern program to encourage school districts and community-based organizations to carry out programs to improve the educational opportunity for youths; to the Committee on Labor and Human Resources.

YOUTH CAREER INTERN PROGRAM ACT

● Mr. RANDOLPH. Mr. President, today I introduce legislation similar to a bill jointly sponsored in the last Congress by myself and our former colleague, who served on the Labor and Human Resources Committee, Secretary of Health and Human Services, Richard Schweiker. The measure, the Youth Career Intern Program Act, is to encourage local educational agencies and community based organizations to implement and carry out programs to improve educational employment opportunity for youth in areas of high youth unemployment across the country.

I am joined in sponsoring this bipartisan legislation by my able colleague from Rhode Island, Senator JOHN CHAFEE. Senator CHAFEE is a strong supporter of legislation to help disadvantaged youth.

The high level of youth unemployment continues to be one of the more pervasive problems confronting our Nation.

Nationally, the level of youth unemployment averages 17 percent. A disportionate level of this unemployment is based in our major cities where youth unemployment rates have averaged close to 40 percent. This appalling waste of our Nation's most valuable resource, its youth, must be halted.

The current condition of our economy is a contributing factor to the employment problems of youth. A most critical problem confronted is a lack of the requisite education and training to obtain and retain meaningful employment. A proven and available weapon to attack this substantial problem is the career intern program.

The program was conceived and has been implemented on a limited scale by opportunities industrialization center, OIC, founded and operated by the Reverend Leon Sullivan.

Our bill would allow for replication across the country of the career intern program, one of OIC's most successful projects. The success of the career intern program has been described in testimony before the Labor and Human Resources Committee in hearings on education and youth unemployment during the 96th Congress. Dr. Michael Timpane, acting director of the National Institute of Education at that time stated:

One such program that we believe to be highly promising is the career internship program (CIP) started in Philadelphia by Rev. Leon Sullivan and his colleagues at opportunities Industrialization Centers, Inc. This program is an alternative high school for 16 to 21 year olds who have dropped out of high school or are in serious risks of dropping out before graduation.

The program enables students to complete high school, acquire occupational knowledge, plan for a career, and improve basic reading and mathematics skills—in short, to facilitate the transition from high school to work or to further education.

Initial evaluation findings indicate a significant increase in the rates of high school completion, in reading and math scores, and in rates of employment or enrollment in college and technical schools.

This program has proved to be so successful in Philadelphia that the Department of Labor has now transferred funds to the National Institute of Education to support the replication of this program in four additional cities in order to ascertain what made the program so successful in Philadelphia and whether or not it can be duplicated elsewhere with similar results.

OIC is not the only community-based organization which has had success in meeting the training and education needs of dropouts or potential dropouts. The findings of NIE show that community-based organizations are a good vehicle for reaching these at-risk students or dropouts. Private nonprofit organizations like OIC are a vital link between the schools and the business community.

Mr. President, the Senate Labor and Human Resources Committee, over the next several months, will begin the process of evaluating the success and/or failure of various youth employment programs administered under title IV of the Comprehensive Employment and Training Act. It is my intention that the youth career intern program will be a part of any legislative package growing out of this process later in this session or in the second session.●

By Mr. MELCHER:

S. 1303. A bill to authorize the Secretary of the Interior to exchange certain lands in Hill County, Mont.; to the Committee on Energy and Natural Resources.

EXCHANGE OF CERTAIN LANDS IN MONTANA

● Mr. MELCHER. Mr. President, this bill would authorize and direct the Secretary of the Interior to enter into a land exchange in Hill County, Mont. It would involve about 400 acres of private land and 400 acres of public along the Milk River.

In January of this year the Water and Power Resources Service responded to Mr. Keith Donoven concerning a possible land exchange. I am including that letter at the end of my remarks because it forms the basis for this bill.

In effect the service told Mr. Donoven that they lacked the exchange authority to trade with private ownership. I note the Service makes reference to other general authority for exchanges that may be proposed.

That same kind of authority was proposed and passed in the last Congress, but was, unfortunately vetoed as a part of a larger measure.

This exchange is desired by both the private land owner as well as the Water and Power Resources Service.

I ask unanimous consent that the bill and the accompanying letter he printed in the RECORD.

There being no objection, the bill and letter were ordered to be printed in the RECORD, as follows:

S. 1303

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That the Secretary of the Interior be, and hereby is, authorized and directed to enter into an exchange of lands with Keith Donoven in Hill County, Montana. The private deeded lands proposed for exchange are, to wit: the SW¼ and NW¼ SE¼, Section 13, Township 34 North, Range 12 East, 200 acres; N½ NW¼, section 24, Township 34 North, Range 12 East, 80 acres; N½ N½ NE ¼ SE¼, Section 17, Township 34 North, Range 13 East, 10 acres; N½ NE¼ NE¼, Section 21, Township 34 North, Range 13 East, approximately 25 acres; plus an area comprised of SW½–SW¼SE¼, SE¼SW¼, W½NE¼SW¼, E¼–E½W½SW¼, E¼SE¼SW¼NW¼, N¼ S½–SW¼NW¼, NW¼SW¼NW¼. Section 22 Township 34 North, Range 13 East. Such deeded lands contain 415 acres more or less and are to be exchanged for the following lands owned by the United States, to wit: S½S½, Section 24, Township 34 North, Range 12 East, 160 acres; NE¼NW¼, Section 25, Township 34 North, 40 acres; N½NE¼, Section 25, Township 34 North, Range 12 East, 80 acres; SW¼NW¼, Section 30, Township 34 North, Range 13 East, 40 acres; W½SW¼ Section 30, Township 34 North, Range 13 East, 80 acres.

SEC. 2. No conveyance shall be made pursuant to this Act until the Secretary determines values being exchanged are equal, except differences in value may be offset by monetary settlement in accordance with applicable law and regulations.

SEC. 3. The patents issued pursuant to this Act shall contain a reservation to the United States of all gas, oil, coal, and other mineral deposits as may be formed in such lands, provided, however, that if the private deeded lands conveyed to the United States include both surface and sulsurface mineral values, the Secretary is authorized and directed to enter into such an exchange on an equal value basis.

WATER AND POWER RESOURCES SERVICE,
Malta, Mont., January 16, 1981.

Mr. KEITH DONOVEN,
Kremlin, Mont.

DEAR MR. DONOVEN: With regard to your request for a possible land exchange with this government agency's withdrawal land at Fresno Reservoir.

Your request has been reviewed by the Land Use Branch at our Regional Office in Billings, Montana. I have been advised that we do not have authority to participate in a land exchange with private ownership.

However, we understand that legislation is

being proposed which would provide this agency with land exchange authority.

We will keep you informed of any changes.

Sincerely,

ROBERT A. GREEN,
Chief, Milk River C. & M. Fld. Sec.●

By Mr. CHAFEE (for himself, Mr. DURENBERGER, Mr. SARBANES, and Mr. BAUCUS):

S. 1304. A bill to amend the Internal Revenue Code of 1954 with respect to the tax treatment of business development companies; to the Committee on Finance.

LEGISLATION PROVIDING PASSTHROUGH TAX TREATMENT TO BUSINESS DEVELOPMENT COMPANIES

● Mr. CHAFEE. Mr. President, last year, Congress passed the Small Business Investment Incentive Act of 1980, Public Law 96–477. This new law enables public venture capital companies and small business investment companies (SBIC's) to avoid complex, outdated regulation under the Investment Company Act of 1940 and, instead, elect simplified treatment as business development companies (BDC's).

To claim the exemption from rules of the 1940 act, BDC's must comply with certain requirements insuring they are investing in and providing substantial management assistance to small, growing companies. Unlike the Investment Company Act of 1940, which was originally designed to regulate mutual funds before the existence of the modern venture industry, the 1980 act is suited to the unique regulatory needs of venture investing.

The new law is a good one; however, it will not be fully utilized until a conforming amendment is added to subchapter M of the Internal Revenue Code. This part of the Code allows investment companies to pass earnings through to their shareholders without first paying taxes on them. Currently, an investment company must be regulated under the complex 1940 act to qualify for such tax treatment.

Since SBIC's and venture capital companies that take advantage of the new securities law will not be registered under the 1940 act, they will not be able to utilize the conduit tax treatment in subchapter M.

Subchapter M should be amended, therefore, to provide the same tax treatment to BDC's under the new law as venture capital companies regulated under the old one, or else the new Securities Act will be ineffective. The flow of funds to small, growing businesses will be curtailed.

Today, along with Senators DURENBERGER, SARBANES, and BAUCUS, I am introducing a bill that would provide such tax treatment to business development companies. Each of us has worked closely with the National Association of Small Business Investment Companies in drafting this conforming amendment. The Finance Subcommittee on Savings, Pensions, and Investment Policy, which I chair, is now scheduled to hold a hearing in June to discuss our legislation. We urge all our colleagues to support its enactment this year.

Mr. President, I ask unanimous consent that the text of this bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1304

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That

(a) IN GENERAL.—Subchapter M (relating to regulated investment companies and real estate investment trusts) of chapter 1 of subtitle A of the Internal Revenue Code of 1954 is amended by adding at the end thereof the following new part:

"PART IV—PROVISIONS WHICH APPLY TO DEVELOPMENT COMPANIES

"SEC. 860A. Tax treatment of business development companies.

"SEC. 860A. TAX TREATMENT OF BUSINESS DEVELOPMENT COMPANIES.

"(a) GENERAL RULE.—Except as otherwise provided in this section, the provisions of parts I and III of this subchapter shall apply to a business development company which would be a regulated investment company but for the requirements of section 851(a). When used other than in this part, the term 'regulated investment company' shall be deemed to include a business development company to which the provisions of parts I and III of this subchapter apply.

"(b) DEFINITION OF BUSINESS DEVELOPMENT COMPANY.—For purposes of this section, the term 'business development company' means any domestic corporation (other than a personal holding company as defined in section 542 without regard to section 542 (c)(8))—

"(1) which is a business development company within the meaning of section 2(a)(48) (15 U.S.C. 80a–2(a)(48)) of the Investment Company Act of 1940, as amended (15 U.S.C. 80a–1 to 80b–2); or

"(2) which is a small business investment company, licensed before July 1, 1980, under the Small Business Investment Act of 1958, as amended (15 U.S.C. 661 to 696), or is so licensed on an application filed not more than one month after the date such company is incorporated."

(b) CLERICAL AMENDMENT.—The table of parts for Subchapter M of Chapter 1 is amended by adding at the end thereof the following new item:

"PART IV. PROVISIONS WHICH APPLY TO BUSINESS DEVELOPMENT COMPANIES."

(c) EFFECTIVE DATE.—The amendments made by sections (a) and (b) shall apply to taxable years beginning on or after October 21, 1980.●

● Mr. DURENBERGER. Mr. President, during the final days of the 96th Congress, a major securities law was passed that will greatly facilitate the flow of venture capital to small, growing firms. The Small Business Investment Incentive Act of 1980 exempts public venture capital companies and small business investment companies (SBIC's) from the most aggravating provisions of the Investment Company Act of 1940, allowing them instead to elect treatment and regulation as business development companies (BDC's) under the new law.

With the passage of the "1980 Act", Congress took a giant step toward its goal of opening capital formation mechanisms to smaller companies. The legislation I am sponsoring today is the next logical step in this process. It will amend subchapter M of the Internal Revenue Code to make tax treatment of BDC's under the 1980 act consistent with that accorded venture capital companies and SBIC's under the Investment Company Act of 1940.

Section 851 of the tax Code permits regulated investment companies that pass through 90 percent of their earnings to shareholders and meet the other requirements of subchapter M to elect conduit tax treatment. The company then pays no corporate tax on income distributed to shareholders. One of the eligibility criteria for conduit tax treatment is registration under the Investment Company Act of 1940.

As the situation currently exists, a venture capitalist wishing to get relief from the 1940 Investment Company Act must forfeit his subchapter M tax passthrough. Once treated as a BDC under the 1980 act, he no longer satisfies the definition of regulated investment company in section 851, since he is no longer a 1940 act company. The result is that venture capitalists are reluctant to utilize the new securities law. My bill would eliminate registration under the Investment Company Act as one of the eligibility requirements of subchapter M for public BDC's.

In addition, the bill we are introducing today would make all licensed SBIC's eligible for conduit tax treatment, provided they meet the other substantive requirements of section 851. Currently, only those companies that are making or have made a public offering or have more than 100 shareholders can register under the Investment Company Act of 1940. Most SBIC's do not qualify because they are privately held, and therefore are denied the option of pass-through tax treatment.

The legislative history of the 1942 amendment that made 1940 act registration a prerequisite for 851 tax treatment clearly demonstrates that Congress did not intend the reference to limit the availability of the conduit tax treatment. Instead, it was principally a descriptive phrase. The venture capital industry as we know it today did not exist at that time and the SBIC program did not come into being until 1958. According to the legislative history, Congress was attempting to cover all types of investment entities, and assumed that most were registered under the 1940 act.

The amendment to section 851 that we are proposing today will have a negligible revenue impact, yet it will be a tremendous incentive for venture capital companies to use the new securities law. By reducing the regulatory burden on public SBIC's and venture capital firms, Congress clearly indicated its desire to promote venture investing. Without this amendment, however, the effect of the securities bill will be neutralized and congressional intent frustrated.

I urge my colleagues to give this bill their careful consideration.●

● Mr. SARBANES. Mr. President, I am pleased to join my colleagues the junior Senator from Rhode Island, the senior Senator from Minnesota and the junior Senator from Montana in introducing S. 1304, legislation enabling business de-

velopment companies to qualify for pass-through treatment of corporate earnings. By so doing, this legislation will correct an anomaly in the tax treatment of venture capital companies which has arisen pursuant to the enactment last year of the Small Business Investment Incentive Act, Public Law 96-477. S. 1304 would also extend pass-through treatment to bona fied small business investment companies with fewer than 100 shareholders.

The purpose of the Small Business Investment Incentive Act, briefly put, was to amend the Investment Company Act of 1940 in order to encourage mobilization of capital for new, small, medium sized and independent business by facilitating the activities of venture capital companies and investment advisors while maintaining indispensable standards of investment protection. It is a tribute to the effectiveness of the Investment Company Act that the investment company industry has not experienced a debacle in 40 years. Over that 40-year period, however, mutual fund and venture capital operations have diverged in very significant ways and the act had come to restrict unnecessarily venture capital activities. Recognizing the importance of venture capital for for new and untried businesses whose access to conventional capital markets is limited, the Small Business Investment Incentive Act last year established a new regulatory framework exempting private and public venture capital companies that meet certain criteria and thereby qualify as business development companies from the registration requirements of the Investment Company Act.

It would be illogical and self-defeating if the incentive to venture capital activities provided by the business development company framework were to be nullified by unfavorable tax treatment for the business development company. Companies regulated under the Investment Company Act of 1940 qualify for passthrough tax treatment of corporate earnings—such earnings are taxed once to the shareholders in the year they are earned rather than twice, once to the corporation and again when distributed to the shareholders. Since registration under the 1940 act is the prerequisite for passthrough treatment, a company not so registered is ineligible for it. Under existing law a venture capital company seeking to expand its investment activities by qualifying as a business development company not regulated by the 1940 act is therefore penalized with regard to its tax status. By extending the passthrough to qualified business development companies, S. 1304 would correct that anomaly. It would also extend passthrough treatment to small business investment companies not currently eligible, that is, those with fewer than 100 shareholders, but would not apply such treatment to closely held personal holding companies.

Mr. President, the Small Business Investment Incentive Act was designed to contribute to the capital formation process for a critical sector of the business community. It recognizes the vital importance to our national economy of the small business sector. It removes unnecessary and antiquated regulatory barriers that have obstructed the direct flow of capital to small and new business enterprises. S. 1304, the legislation being introduced today, is a logical and necessary tax corollary of the Small Business Investment Incentive Act. It will help to translate the promise of that legislation, enacted in the last Congress into solid economic reality.●

ADDITIONAL COSPONSORS

S. 98

At the request of Mr. DANFORTH, the Senator from Idaho (Mr. SYMMS) was added as a cosponsor of S. 98, a bill to amend the Internal Revenue Code of 1954 to provide a credit against tax for certain research and experimental expenditures, and for other purposes.

S. 99

At the request of Mr. JEPSEN, the Senator from Michigan (Mr. LEVIN), the Senator from West Virginia (Mr. RANDOLPH), the Senator from Montana (Mr. MELCHER), and the Senator from Minnesota (Mr. DURENBERGER) were added as cosponsors of S. 99, a bill to amend the Internal Revenue Code of 1954 to allow individuals a deduction for certain expenses paid or incurred in connection with the adoption of a child.

S. 141

At the request of Mr. BENTSEN, the Senator from Colorado (Mr. HART) was added as a cosponsor of S. 141, a bill relating to tax treatment of qualified dividend reinvestment plans.

S. 360

At the request of Mr. WEICKER, the Senator from Massachusetts (Mr. TSONGAS) was added as a cosponsor of S. 360, a bill to amend the Internal Revenue Code of 1954 to improve productivity and employment by promoting capital investment in small business, and for other purposes.

S. 395

At the request of Mr. WALLOP, the Senator from Iowa (Mr. GRASSLEY) was added as a cosponsor of S. 395, a bill to amend the Internal Revenue Code of 1954 to provide estate and gift tax equity for family enterprises, and for other purposes.

S. 728

At the request of Mr. KENNEDY, the Senator from North Dakota (Mr. BURDICK), and the Senator from New Jersey (Mr. WILLIAMS) were added as cosponsors of S. 728, a bill to amend the Foreign Assistance Act of 1961 to prohibit the assignment to or presence in El Salvador of U.S. military personnel and to prohibit the furnishing of military and other security assistance for El Salvador.

S. 861

At the request of Mr. PACKWOOD, the Senator from Wyoming (Mr. WALLOP) was added as a cosponsor of S. 861, a bill to amend the Social Security Act to provide for a 6-year demonstration program of comprehensive community-based noninstitutional acute and long term care services for the elderly and disabled.

S. 1030

At the request of Mr. MCCLURE, the Senator from Wisconsin (Mr. KASTEN), the Senator from California (Mr. HAYAKAWA), and the Senator from Nebraska (Mr. ZORINSKY) were added as cosponsors of S. 1030, a bill to protect firearms owners constitutional rights, civil liberties and rights to privacy.

S. 1091

At the request of Mr. ZORINSKY, the Senator from Oklahoma (Mr. NICKLES), and the Senator from North Carolina (Mr. EAST) were added as cosponsors of S. 1091, a bill to provide an entitlement for educational institutions for the reimbursement of the reasonable costs incurred in responding to compliance reviews conducted by the Office for Civil Rights of the Department of Education, and for other purposes.

S. 1235

At the request of Mr. D'AMATO, the Senator from Idaho (Mr. SYMMS), the Senator from North Carolina (Mr. HELMS), the Senator from North Carolina (Mr. EAST), and the Senator from Kansas (Mr. DOLE) were added as cosponsors of S. 1235, a bill to exempt certain matters relating to the Central Intelligence Agency from the disclosure requirements of title 5, United States Code.

S. 1279

At the request of Mr. DANFORTH, the Senator from Montana (Mr. MELCHER), the Senator from Kentucky (Mr. HUDDLESTON), and the Senator from Michigan (Mr. RIEGLE) were added as cosponsors of S. 1279, a bill to amend the Internal Revenue Code of 1954 to exclude from gross income a certain amount of interest earned on the All Savers Certificate offered only at savings institutions.

SENATE JOINT RESOLUTION 17

At the request of Mr. GARN, the Senator from Montana (Mr. MELCHER) was added as a cosponsor of Senate Joint Resolution 17, a joint resolution proposing an amendment to the Constitution of the United States for the protection of unborn children and for other purposes.

SENATE JOINT RESOLUTION 62

At the request of Mr. DOLE, the Senator from Georgia (Mr. NUNN), and the Senator from Kentucky (Mr. HUDDLESTON) were added as cosponsors of Senate Joint Resolution 62, a joint resolution to authorize and request the President to designate the week of September 20 through 26, 1981 as "National Cystic Fibrosis Week."

SENATE JOINT RESOLUTION 73

At the request of Mr. GLENN, the Senator from Alabama (Mr. HEFLIN), the Senator from North Dakota (Mr. ANDREWS), the Senator from Washington (Mr. JACKSON), the Senator from Tennessee (Mr. SASSER), the Senator from Kentucky (Mr. HUDDLESTON), the Senator from Georgia (Mr. NUNN), the Senator from West Virginia (Mr. RANDOLPH), the Senator from Wisconsin (Mr. KASTEN), the Senator from Ohio (Mr. METZENBAUM), and the Senator from New Jersey (Mr. WILLIAMS) were added as cosponsors of Senate Joint

Resolution 73, a joint resolution to designate the week beginning June 1, 1981, and ending June 7, 1981, as "Management Week in America."

SENATE JOINT RESOLUTION 78

At the request of Mr. COCHRAN, the Senator from Maryland (Mr. MATHIAS), the Senator from Tennessee (Mr. SASSER), the Senator from Arizona (Mr. GOLDWATER), and the Senator from Alaska (Mr. STEVENS) were added as cosponsors of Senate Joint Resolution 78, a joint resolution to provide for the designation of October 2, 1981, as "American Enterprise Day."

SENATE JOINT RESOLUTION 84

At the request of Mr. DECONCINI, the Senator from New Mexico (Mr. SCHMITT), the Senator from Pennsylvania (Mr. HEINZ), and the Senator from Illinois (Mr. PERCY) were added as cosponsors of Senate Joint Resolution 84, a joint resolution to proclaim March 18, 1982, as "National Energy Education Day."

AMENDMENT NO. 59

At the request of Mr. CRANSTON, the Senator from Tennessee (Mr. SASSER) was added as a cosponsor of amendment No. 59 intended to be proposed to S. 912, a bill to amend the Atomic Energy Act to clarify that no prior public hearing is required for applications for amendment which involve no significant hazards consideration and for other purposes.

SENATE RESOLUTION 148—RESOLUTION CALLING FOR A MORATORIUM OF INDEFINITE DURATION ON THE COMMERCIAL KILLING OF WHALES

Mr. PACKWOOD submitted the following resolution; which was referred to the Committee on Foreign Relations:

S. RES. 148

Whereas whales are a unique marine resource of great esthetic and scientific interest to mankind and are a vital part of the marine ecosystem; and

Whereas the protection and conservation of whales are a particular interest to citizens of the United States; and

Whereas the United States, which effectively banned all commercial whaling by United States nationals in December 1971, has sought an international moratorium through the International Whaling Commission on the commercial killing of whales since 1972; and

Whereas in 1971 the Congress enacted the Pelly Amendment to the Fishermen's Protective Act of 1967 (22 U.S.C. 1978(a)), giving the President of the United States the right to embargo the fishery products of foreign nations whose nationals have conducted whaling operations that interfere with international conservation programs; and

Whereas in 1979 the Congress enacted the Packwood-Magnuson Amendment to the Magnuson Fishery Conservation and Management Act of 1976 (16 U.S.C. 1824(b)(6)(A)), which limits access to the U.S. Fishery Conservation Zone to any nation found by the Secretary of Commerce to be in violation of whale conservation programs; and

Whereas in 1979 the Congress enacted a provision urging the International Whaling Commission to agree to a moratorium on the commercial killing of whales (Pub. L. 96-60, Title IV, § 405, Aug. 15, 1979); and

Whereas the management regime established by the International Convention for the Regulation of Whaling, signed in 1946 and implemented by the International Whaling Commission, is not providing adequate protection to the world's whale populations: Now, therefore, be it

Resolved by the Senate of the United States, That it is the sense of the Senate that the United States Delegation to the International Whaling Commission is urged to work toward the adoption of a moratorium of indefinite duration on the commercial killing of whales.

SENATE RESOLUTION 149—RESOLUTION WAIVING CONGRESSIONAL BUDGET ACT

Mr. HELMS, from the Committee on Agriculture, Nutrition, and Forestry, reported the following original resolution; which was referred to the Committee on the Budget.

S. RES 149

Resolved, That pursuant to section 402(c) of the Congressional Budget Act of 1974, the provisions of section 402(a) of such Act are waived with respect to the consideration of S. 1007, the Food Stamp and Commodity Distribution Amendments of 1981. Such waiver is necessary to permit consideration of an additional fiscal year 1981 authorization of appropriations for the food stamp program which was not reported on or before May 15, 1980, as required by section 402(a) of the Congressional Budget Act of 1974. Increases in program costs have resulted in the need for additional authorization authority to permit a fiscal year 1981 supplemental appropriation in excess of the amounts already authorized to be appropriated for fiscal year 1981.

Such waiver is also necessary to permit consideration of authorization of appropriations for the food stamp program and the commodity distribution programs for fiscal year 1982 which was not reported on or before May 15, 1981, as required by section 402(a) of the Congressional Budget Act of 1974. Specifically, S. 1007 would extend authorizations of appropriations for these programs for fiscal years 1982 through 1985 and make significant reforms in the food stamp program to restrain food stamp program spending, focus benefits toward the most needy, increase the flexibility of states in administering the program, provide for improved administration, and reduce fraud and abuse. The delay in reporting S. 1007 was occasioned by a number of factors including consideration at the same time of separate legislation to extend the authorities for almost all of the Nation's major farm commodity programs and by a determined effort on the part of the Committee on Agriculture, Nutrition, and Forestry to report legislation meeting the budgetary restraints of the First Concurrent Resolution on the Budget for fiscal year 1982.

NOTICES OF HEARINGS

SUBCOMMITTEE ON CRIMINAL LAW

Mr. MATHIAS. Mr. President, the Subcommittee on Criminal Law of the Judiciary Committee will hold a hearing on June 8, 1981, on S. 186, the Criminal Justice Construction Reform Act, at 10 a.m. in room 2228, Dirksen Senate Office Building. Senator DOLE will chair the meeting.

For further information, please contact Ralph Oman at 224-9491.

COMMITTEE ON GOVERNMENTAL AFFAIRS

Mr. ROTH. Mr. President, the Committee on Governmental Affairs will hold a hearing at 9:30 a.m. on Thursday, June 4, 1981 on Government organization for international trade and investment matters and on S. 970, a bill to create a Cabinet-level Department of International Trade and Investment. For further information regarding the hearing, you may contact Ms. Marian Malashevich at 244-2441.

SUBCOMMITTEE ON INTERNATIONAL FINANCE AND MONETARY POLICY AND THE SUBCOMMITTEE ON SECURITIES

Mr. GARN. Mr. President, on behalf of the Committee on Banking, Housing and Urban Affairs, I am announcing that the Subcommittee on International Finance and Monetary Policy and the Subcommittee on Securities will continue joint hearings on S. 708 on June 16, 1981, at 9:30 a.m.

The hearing on June 16 will be held in room 5302 of the Dirksen Senate Office Building. The subcommittees held 2 days of hearings on S. 708, the "Business Accounting and Foreign Trade Simplification Act," on May 20 and 21, 1981.

For further information, interested persons should contact Paul Freedenberg at 224-0891 or John Daniels at 224-1561.

AUTHORITY FOR COMMITTEES TO MEET

COMMITTEE ON AGRICULTURE, NUTRITION, AND FORESTRY

Mr. STEVENS. Mr. President, I ask unanimous consent that the Committee on Agriculture, Nutrition, and Forestry be authorized to meet during the session of the Senate on Wednesday, June 3, to mark up budget reconciliation matters within the jurisdiction of the Agriculture Committee.

The PRESIDING OFFICER. Without objection, it is so ordered.

SUBCOMMITTEE ON INTERGOVERNMENTAL RELATIONS

Mr. STEVENS. Mr. President, I ask unanimous consent that the Subcommittee on Intergovernmental Relations of the Governmental Affairs Committee be authorized to meet on Wednesday, June 3, beginning at 9 a.m. to hold oversight hearings on the GAO report entitled "The Community Development Block Grant Program Can Be More Effective in Revitalizing the Nation's Cities."

The PRESIDING OFFICER. Without objection, it is so ordered.

ADDITIONAL STATEMENTS

CARDINAL STEFAN WYSZYNSKI

● Mr. LEVIN. Mr. President, Cardinal Stefan Wyszynski, who died in Warsaw last Thursday, led the Polish Catholic Church for 32 years. During that time, he symbolized Poland's quest for freedom from an imposed civil order that was alien to his people. And while Poland's quest for freedom will continue, its path will become more difficult without the guidance of the cardinal whom many regard as the Polish Catholic Church's greatest leader in its 1,000 year history.

The legacy that Cardinal Wyszynski leaves behind should serve as an example to his bereaved followers of the two main objectives in his life: the integrity of Poland's culture and heritage, and the spiritual regeneration of its people. He

was a great Polish patriot. It was said that Cardinal Wyszynski's loyalty to Poland was second only to his loyalty to the Catholic Church.

It was in that light that he helped to guide Poland through its current struggle. His personal mediation of the conflicts between Poland's Communist Government and the Solidarity Union helped to avoid Soviet intervention.

Mr. President, in a state that is officially atheistic, the Polish Government declared a national period of mourning over Cardinal Wyszynski's death. And, perhaps a greater tribute to Cardinal Wyszynski were the institutions represented at his memorial service on Sunday. Joining an estimated quarter of a million Poles gathered in Warsaw's Victory Square were representatives of the Catholic Church, Communist Party and Solidarity Union. This presence was a reminder of Cardinal Wyszynski's influence in a society that he helped forge. And his memory will help guide that society in the future.●

SUPPORT FOR THE PRESIDENT'S ECONOMIC PROGRAM

● Mr. PACKWOOD. Mr. President, I direct your attention, and the attention of my esteemed colleagues in the U.S. Senate to a special survey of timely importance recently conducted by the National Republican Senatorial Committee.

We asked Senatorial Club members for their opinions on several crucial budgetary matters. The results were overwhelming—we have received tens of thousands of responses. I am pleased to report that they have spoken as one.

The message is clear: we must stand firmly behind President Reagan and his program for economic recovery. Let the record show that the members of the National Republican Senatorial Club urge quick action on the administration proposals now before Congress.

I might add that the members of the Senatorial Club are informed, active participants in our political system. When they speak—we are obligated to listen.●

CRS CHINA STUDY

Mr. GLENN. Mr. President, I call attention to a research paper entitled "Increased U.S. Military Sales to China: Arguments and Alternatives." It was prepared by Dr. Robert G. Sutter, specialist in Asian affairs at the Congressional Research Service, Library of Congress, and examines in detail the security relationship between the United States and the People's Republic of China. He gives special attention to the sensitive question of possible U.S. military sales to China. His study succeeds in presenting this complex subject succinctly and with a degree of scholarship I find most impressive.

The study examines all aspects of the arms sales debate and outlines the strategic assumptions held by various contending schools of thought. Dr. Sutter then discusses both the advantages and disadvantages of U.S. military sales to China. He concludes that the "risk of a carefully limited U.S. military transfer to China could be reduced substantially if U.S. leaders shifted to a more clearly defined policy of moderate U.S. objectives toward China that could assure friends and foes alike of American intentions toward the PRC."

I happen to support some expansion of the United States-People's Republic of China strategic dialog, and I am prepared to consider transferring some selective defensive technologies and other military equipment to the People's Republic of China. But I believe strongly that we must move cautiously and in full consideration of our allies' views.

For example, I would oppose a dramatic shift, particularly if it were done in haste and without full consultation with the Congress. But even for those Members of Congress and their staffs who disagree, I believe Dr. Sutter's thought-provoking study deserves careful scrutiny. He has made a major contribution to our knowledge of United States-People's Republic of China relations, and it is must reading for those interested in this vital area of American foreign policy.

I ask that the summary of Dr. Sutter's paper be printed in the RECORD.

The summary follows:

SUMMARY

The rapid development of U.S. relations with the People's Republic of China (PRC) over the past few years has led to the establishment of normal Sino-American economic and political relations and a recent American willingness to sell some military support equipment and civilian technology with military applications to the PRC. Chinese leaders are pressing the United States to go further, notably to sell weapons and weapons-related technology to China. They are strongly supported by U.S. observers who judge that more U.S. military transfers to China are needed to meet current Chinese expectations that the U.S. will sell some weapons and weapons-related technology to China; to increase China's sense of security against the Soviet Union; and to consolidate U.S. political relations with China in anticipation of possible future Sino-American difficulties over Taiwan, U.S.-Soviet arms control and other matters.

American proponents of increased transfers stress the growing need for closer Sino-American cooperation in the face of what is seen as Soviet expansionism abroad. (A few of them judge that the U.S. should soon follow military sales with other forms of security cooperation, leading ultimately to the establishment of a mutual security arrangement between the U.S. and China.) They acknowledge that although U.S. friends and allies in Asia may be unsettled by the transfers, this need not work completely to American disadvantage; it might actually increase U.S. leverage over some of those states, notably Japan. The proponents claim that Moscow views closer U.S.-PRC ties as inevitable and that the USSR is not likely to act rashly in dealing with either China or the United States. Limited U.S. transfers to China are said to present no major impediment to U.S.-Soviet cooperation in such important areas as arms control.

Recent trends in the triangular relationship among the United States, Soviet Union and China are seen by the proponents of increased Sino-American military sales as favoring their case. Pressure for sales to China is likely to build so long as U.S. relations with the Soviet Union remain more hostile than cooperative, U.S. relations with China build toward greater friendship, and Sino-Soviet relations remain stalemated. The Chinese leaders are also likely to continue to press for U.S. military supplies.

Increased military sales to China are strongly opposed by other U.S. observers. Some believe that negotiations with Moscow are a better way to deal with Soviet power than closer strategic alignment with China. Others see problems stemming from possible leadership instability in China or excessive Chinese expectations of, or dependence on, U.S. support; or they voice concern over the rise in Chinese influence and decline in U.S. influence in Asia that is expected to follow U.S. arms sales to China, stressing that China might use its new influence to bully its smaller neighbors, especially Taiwan.

In reaction to the U.S. sales, the Soviet Union might increase military pressure throughout China's periphery—a development that would likely affect negatively U.S. interests as tensions rose in Asia. Japan might feel compelled to adopt a more independent foreign policy that would not necessarily be in U.S. interests. U.S.-Soviet relations could clearly be affected, as the sales to China could lock the United States into a stridently anti-Soviet policy that would preclude progress in arms control negotiations or other important matters.

The arguments of those opposed to the U.S. sales to China suggest that U.S. policy makers will be taking certain—possibly grave—risks if they decide to go ahead with more sales. In the absence of a clear definition of American objectives in developing security relations with China, such ties could well be misinterpreted by Chinese, Soviet, Japanese, Taiwanese or other interested leaders abroad, as well as by opinion leaders in the United States. Friends and foes alike could see the ties as affecting their interests in the extreme—misinterpretations that could lead to reactions with potentially negative consequences for the United States.

If the Reagan Administration does decide to proceed with military sales to China, the likelihood of misinterpretation of that action could be substantially reduced if the United States took the current opportunity to define publicly a set of limited goals for American-China security ties that could command support at home, consolidate relations with China and still reassure U.S. friends and foes in Asia. This would necessitate a change in the American practice during the past decade when U.S. policy makers kept their approaches to Sino-American security ties shrouded behind a veil of ambiguity and secrecy.

THE EASTER SEALS REHABILITATION CENTER OF SOUTHWESTERN CONNECTICUT

● Mr. WEICKER. Mr. President, June 10, 1981, marks the 37th anniversary of the Easter Seals Rehabilitation Center in southwestern Connecticut. It is also the day on which the center's fourth and most recent addition will be formally dedicated. The Rehabilitation Center was first established in 1944 in one room of an old schoolhouse and was directed for 27 years by Ruby C. Oscarson, a pioneer in the field of rehabilitation. Since its modest beginnings the center has provided the highest quality care to nearly 27,000 residents of the region through more than 2 million hours of treatment.

Although the center is fully staffed by a host of professionals from several different disciplines, the center's mainstay has always been its volunteer leadership. The development of this outstanding community commitment, a cooperative effort on the part of concerned citizens,

businesses and local government officials, assisted by a dedicated staff, is reflected by the participants in the upcoming dedication ceremony.

Under the leadership of Mr. Fred T. Allen, chairman of the board and executive officer of Pitney Bowes, Inc., funds for the new construction were received from corporations, businesses and interested individuals. Mr. David T. Kearn, president of the Xerox Corp., has also provided a great deal of assistance to the center in addition to his responsibilities as the Chairman of the U.S. Council for the International Year of the Disabled Persons. Both David Albert, the current president of the board, and Mrs. Edward Plaut, president of the board when the first facility was completed in 1954, have provided much of the overall leadership over the years necessary to make the newest addition to the center a reality. Very ably assisting in these efforts has been the dedicated staff under the leadership of James L. Shearin, executive director.

All of these individuals, Mr. President, exemplify the epitome of citizen voluntarism and leadership. It is for this reason that I would lke to ask my colleagues to join me in extending congratulations and best wishes for the future to the entire Rehabilitation Center, its staff, board of directors, and volunteers.●

A COMPARISON OF NATIONAL SECURITY APPROACHES

● Mr. KENNEDY. Mr. President, last month, Robert W. Barnett wrote a series of three interesting and perceptive articles for the Baltimore Sun which compared approaches to national budgets and national security in America, China, and Japan.

Formerly Deputy Assistant Secretary of State and now a senior fellow of the Asian Society and resident associate of the Carnegie Endowment for International Peace, Mr. Barnett notes that "China and Japan share with the United States an acute awareness of threat from the Soviet Union, but they respond differently to it.

In the wake of the major budget debate which has just occurred in the Congress, I believe that Robert Barnett's findings on the continuing responses of these three important countries are of particular interest, and I request that his series, "National Budgets, National Security," be printed in full at this point in the RECORD.

The material follows:

NATIONAL BUDGETS, NATIONAL SECURITY—I

(By Robert W. Barnett)

China and Japan share with the United States an acute awareness of threat from the Soviet Union, but they are responding differently to it.

Peking and Tokyo observe, all the time, very nearby evidence of formidable Soviet military capability. Forty-five Russian divisions and a forest of nuclear-armed missiles stand along China's northern frontier. Soviet warships, aircraft and merchant vessels move today into Haiphong, Danang and Cam Ranh Bay, constant reminders of the military potentials of Moscow's links with Hanoi.

The growing Navy of the Soviet Union can steam into the Pacific Ocean from Siberian bases only by moving through narrow straits which can be seen across from Japan's shores. The Soviet Union occupies four small northern Japan islands—despite Tokyo's challenge of its right to remain there—and one is now being provided with new military capability.

Soviet military aircraft skirt and sometimes penetrate Japanese air space.

A Russian military capability to pounce on Chinese or Japanese targets lies only minutes away. In our environment of nuclear missiles, that may be true for all countries, but the Chinese and Japanese, looking at their maps, sense the immediacy of danger.

President Reagan occupies the White House today because he convinced the American people that he could do better than the Carter administration in handling threats to the nation seen in the emergence of superior Soviet military capability and in pernicious price inflation. While the whole world watches, the Reagan administration now proposes to lick inflation by cutting almost $50 billion in non-defense spending and to make the country strong by adding almost $50 billion to the budget for the military establishment.

Budget calculations of superpowers differ, obviously, from those of countries not having that aspiration. However, for all countries budgets reveal not only values, vulnerabilities and sought-for capabilities, but also self-image.

Everything past, present, and future is involved in how a nation goes about deciding what to set aside as not essential, how to pay for what it wants to do, and whether that cost will be borne today or by the future.

Perceptions of necessity differ as viewed by governments in Peking, Tokyo and Washington.

China's mortal vulnerability is price inflation and both modernization and amiable foreign relations must be subordinated to bringing it under control. Japan's is assured access to resources without reliance on force of arms. Washington's appears to be to regain self-esteem and by behavior at home to insure the good opinion of others abroad.

Washington is in the throes of a budget crisis which is a test of this nation's intention. Peking and Tokyo have just passed through crises of comparable severity. Our circumstances differ from theirs, of course, but there is value in making note of how their analyses of national requirements have led to judgments which differ conspicuously from those about to be made by the United States.

Peking and Tokyo are by no means novices in analyzing the dynamics of security for the individual, the group, the nation and the international neighborhood. Both take for granted the refinement of their cultural traditions, their knowledge of war and peace, the possibility of good government and of corrupt government, cycles of affluence and of natural and social disaster, and an ancient ethical idiom by which public responsibility in their countries is judged. Their national commitments, even when fluctuating, are not inadvertent, or, from their standpoint, irresponsible. They, too, as we do, try to take everything into account. Their budgets announce their priorities.

In 1979, the People's Republic of China spent the equivalent of $15.1 billion on its military establishment, or about 11 percent of China's gross national product (GNP). This was a $1.3 billion over-run, largely attributable to China's 17-day Vietnam War, in which direct Russian involvement was an understood possibility. In 1980, despite great rhetorical stress on the Soviet threat, China cut military spending by 13.3 percent—to $13.1 billion—so as to increase the allocation of resources to agriculture, light industry, transportation, communications, education—in short, for the people's welfare, and to bring in sight a prospect for basic economic growth without inflation. The same commitment to that priority is evident in the 1981 budget. Peking believes that this is, in fundamental terms, the only way to gain real national security.

Last spring Prime Minister Masayoshi Ohira talked in Washington with President Carter, Defense Secretary Harold Brown and the State Department about wanting to increase Japan's contribution to our mutual security. For years, Washington and Tokyo have discussed Japan's "no-war" Constitution, its tradition of a 1-percent-of-GNP limit on military spending, Japan's nuclear allergy and charges in Congress and in the American business community that Japan was getting a "free-ride" on security. Those were always ingredients in mutual security discussions. In 1980, Iran, Afghanistan and, marginally, Cambodia had given added urgency to consideration of common vulnerabilities. Washington believed, after the Ohira talks, that Tokyo had promised to increase its military budget of about $10.2 billion—just less than .9 percent of GNP—by 9.7 percent. Doing this would cause Japan to exceed slightly 1 percent of its GNP in defense spending within three or four years.

However, on New Year's Day, Tokyo announced an intention to make a budget increase of only 7.6 percent. The State Department promptly complained. Many defense-minded Japanese were disappointed. But Tokyo's decision has to be seen as reflecting a deliberate calculation of Japan's comprehensive national security priorities.

So Chinese and Japanese national security spending priorities do differ significantly from ours. These differences are no secret, but the differences are not discussed with the care that might give them instructive value.

NATIONAL BUDGETS, NATIONAL SECURITY—II

(By Robert W. Barnett)

In discussing China, we must start with the proposition that self-reliance stands at the very center of Chinese Communist military strategy.

All of the heroic figures of the Long March and of Yenan were authentic military commanders and strategists. Mao's most quoted maxim is "political power comes from the mouth of a gun." But power for China's leaders was never real unless rooted in the capability and intention of ordinary Chinese people whose interests were the first principle of security, and the ultimate precondition of self-reliance. The U.S.S.R. was never the quartermaster for the People's Liberation Army, nor will the Pentagon be.

Some charge China with the same hegemonistic superpower intention which Peking attributes to Moscow. I do not. Poverty and unsolved domestic problems prohibit use of China's resources that way for a long time to come. China will not be an aggressor, but it will respond, promptly and vigorously, to any penetration of its borders.

As recently as January, 1979, China did, in fact, attack Vietnam, to teach it a lesson, to divert Vietnam's forces from Cambodia, to reassure Thailand, to forestall an "encircling" Soviet present in the South, and to frustrate Vietnam's first serious steps towards effective economic reconstruction.

But, paradoxically, it was China which was taught the lesson. Its 17 days of combat cost it something like all the money intended for investment in the modernization of China's entire military establishment during the year 1979. In taking that loss, China also compromised its reputation as a peace-loving nation, fanned anti-Chinese paranoia in Southeast Asia and increased Soviet involvement in Vietnam.

I believe that, inadvertently, China may have been instrumental in underlining, for itself and others, what war in Vietnam should have demonstrated to the United States and what Afghanistan should be teaching Moscow: Limited and sub-limited wars are not cost-effective for "aggressors." Peking will, I think, be guided by this lesson for the rest of the coming decade.

But what about nuclear capabilities and strategies? The evolution of Mao's attitudes is interesting. Right off, he equated possession of a nuclear weapons capability with status. He believed, however, that atom bombs could not decide wars. Peking has a nuclear weapons capability. But it exists for an entirely political reason: to break the monopoly of the two superpowers. According to Mao, nuclear weapons themselves are useless, and their actual number more or less irrelevant. Mao told Andre Malraux in 1965 that six would be enough. Mao did not fear nuclear weapons and believed that their potency depended entirely upon their being feared. It was fear that deterred.

Peking will continue to invest in nuclear capability only what is needed to confirm knowledge that it possesses reliable second-strike power, and not much more. China will possess means to have always an invulnerable weapon or two sure to reach Moscow, Leningrad, Vladivostok—or another target or two of its choice. That capability, infinitesimal in the context of SALT vocabularies, will be enough, according to the Chinese, to deter the Soviet Union or any other nuclear-armed adversary from the "intimidating" strategic braggadocio of overkill.

China will be a modest and relatively restrained actor in the world military scene, convinced that deterrence is in the imagination, and that possession of just a few weapons sure to exterminate swiftly an enemy capital may be all that is necessary to arrest resort to nuclear weaponry by anyone. Meanwhile, Chinese leaders recognize that the most immediate real threat to national security is price inflation, and in the breakdown of domestic order, demoralization among the people, and the failure of government authority to hold out hope for a better future. For that reason China's priorities are what we now see them to be. They require, just now, cancellation of heavy investment in capital plant, and great restraint in defense spending.

Post-war, resource-poor Japan, disarmed and stripped of overseas territory, and with only half the population of the United States or of the Soviet Union, has become the third economy in the world. Now condemned by some of us for devoting less than 1 percent of its gross national product to arms spending, still it administers the seventh or eighth largest military establishment in the world. As we know, Japan often claims to spend no more because of its no-war Constitution, public revulsion against war, concern over disapproval by other countries for destabilizing remilitarization, and so forth. But Japan's unspoken reasons may be quite different.

Even with the Soviet Union a close neighbor, Japan's survival is threatened far more by its vulnerability to events which could not be cured, or even much affected, except unfavorably, by the actual use of any military power. The Japanese economic system depends, vitally, upon access to imported raw materials, particularly oil, and particularly from the Middle East.

No Japanese leader can plausibly explain to the Diet how prospects of access to that oil could be improved by Japanese possession of naval, air, or ground forces deployable to that area were it endangered by domestic turmoil or external aggression. The Japanese Diet will not vote large military budgets without being told against whom Japan's forces would be used, where and for what ultimate purpose.

So far the most plausible rationale offered is that they could replace American forces re-deployed from Japan elsewhere. But many thoughtful Japanese have difficulty—even then—in imagining where the released American forces would fight for any purpose that could diminish and not increase Japan's own basic vulnerabilities.

A war in the Middle East which stopped or even suspended Japan's and Europe's supply of oil would be, for Japan, a disaster. And closer to home, a brilliant Japanese trip-wire engagement designed, strategically, to hold up a Soviet assault on the home islands until Washington could organize appropriate retaliation could spell national suicide if it were a prelude to nuclear exchange. Japan does not have China's geographic and demographic assets.

For these reasons, intellectual leaders of the Japanese establishment like Saburo Okita and Kiichi Saeki, haunted by the necessity to define real national security, have advocated a concept of comprehensive security in which weapons are only a low-priority ingredient. Assistance to developing countries in the destabilizing throes of modernization, reinforcement of strategies for easing inflation and curing crippling trade and financial imbalances, captial and technology transfers to increase the productivity of agriculture and industry in developing countries, greater cultural interchanges: These are also ways to forestall explosions of despair and violence which can tear to pieces the general environment of order and hope within which both rich and poor countries can best cope with basic structural problems which face the globe.

Conspiracy and the use of force are dangers. But so, for example, are population growth, exhaustion of finite natural resources, dehumanization of productive processes, pathological urbanization, racial and religious antagonisms—from which no country is exempt.

How can Japan's possession of a large military establishment help to resolve these dangers? It probably couldn't. For this reason many Japanese prefer to think of paying, much more heavily than ever before, for what would be Japan's share in "comprehensive" security; in expanded economic aid.

NATIONAL BUDGETS, NATIONAL SECURITY—III

(By Robert W. Barnett)

Inherent in these kinds of decisions is, of course, a feeling about the future. What people and their governments do often measures conviction and values even more than what they say.

And I want to suggest that "saving" and "studying" are, very clearly, future-oriented activities. To save and to study is doing something—not just talk. The power and greatness of the United States has been based on its capacity for capital accumulation—through saving—and on the quality of its people—achieved by investment in general and very advanced education.

These characteristics of the American system, rather than just our political institutions, are what East Asian countries, through the past century, have noticed and have most wanted to emulate, in environments much less generous than ours.

But what now must Americans—and East Asians—conclude is the future orientation in the actual priority Washington accords to the use of American resources?

During 1979, 27 percent of public expenditure in the United States was devoted to defense, compared to 19 percent for education. Comparable figures for Japan were 7 percent and 12 percent; and for China, they were 15 percent and 22 percent.

We defer spending, as individuals and societies, because of belief that there is a future—to make the future better. But we are not now doing as well as we used to—or as some other countries now do. Last year, in the United States, private, corporate and government saving represented 18 percent of the gross national product (GNP). Japan's represented 30 percent; China's, something like 25 percent. Psychologically significant "personal" savings in the United States and in Japan were, respectively, at 6 percent and 20 percent of "personal" income!

All East Asians know that their future, as well as ours, will be vitally affected by the wisdom of the choices President Reagan makes in restoring vitality to the American economy and in achieving real national security for the United States. They listened as both Governor Reagan and President Carter were agreeing last autumn on the need to spend much more on the U.S. military establishment, saying, essentially, that this was necessary because the Soviet Union is spending 12 percent of its GNP (against 6 percent U.S. spending) and because on the drawing board the United States could not be sure of superiority in all significant categories of weapons capability. East Asians now know that Defense Secretary Caspar Weinberger dislikes to talk about such "percentages" or about automatic dollar/combat capability equations. But, to East Asia, Washington gives the impression that almost everybody is demanding that much more money be spent on weapons.

But some of them may wonder whether anyone in the Reagan administration listens when former Chairman of the Joint Chiefs of Staff Maxwell Taylor says that fewer weapons at lower cost, and a better defined strategy should replace mere acquisition of "vast new military programs, consisting largely of high-priced weaponry." This would regain for the United States a respect in the international community now being forfeited by Washington's seeming readiness to acquiesce in almost all of the weapons-hungary demands of the competing services of its military establishment.

Others wonder how it can be that defense spending should increase by 5 percent annually without creating both unmanageable domestic turmoil and stoking savage inflation, in an economic setting where GNP growth may be under 2.5 percent, where productivity is already declining by 1 percent annually, and where federal payments to individuals have risen from 22 percent of the budget only 20 years ago to about 50 percent of it today.

Some East Asians wonder if the President and his Secretary of State have listened to Lester Thurow warn that "United States has fallen to tenth among all nations in per capita gross national product. . . . Productivity is falling in the United States; almost everywhere else it is rising. Extend current economic trends 20 years into the future, and, regardless of missiles or diplomats, present U.S. alliances and foreign policies will be in shambles."

President Reagan will soon have things to say about our powers, vulnerabilities, and responsibilities, to our East Asian friends, and about what we expect from them. If he listens, to, many of these friends will tell him that a breakdown in the American economy—unmanageable inflation, high unemployment, trade protectionism, and drying up of available capital—is a greater potential threat to their survival than the Soviet Navy ever could be: Mere possession of more weapons at the price of rising domestic, social, and economic disorder would betray not only the true security of the American people, but of theirs as well. Some speak of the Wisdom of the East: This might be it.●

RETIREMENT OF DR. GENE HENDERSON

● Mr. DANFORTH. Mr. President, on June 7, Dr. Gene Henderson, superintendent of the Francis Howell School District of St. Charles County, Mo., will mark his retirement from a long and productive career in the public schools of Missouri.

Dr. Henderson was born in 1927, in Fulton, Mo. He began his career as an educator in 1949, in the schools of Fulton; for 4 years, he taught in the schools where he had gained knowledge as a student. Between 1953 and 1961, he served as a band instructor in the public schools of Bethany. In 1961, he assumed the superintendency of the Martinsville schools, serving for 1 year. From 1962 until 1965, Dr. Henderson was superintendent of schools in the Chamois system. In 1965, he became superintendent of the Francis Howell School District, where he has served as the district's principal administrative officer for 16 years.

I join the patrons and students of the Francis Howell district in the recognition of Dr. Henderson's contribution to public education and in extending every hope for enjoyment in retirement with his wife, Bonnie.●

MEMORIAL DAY ADDRESS BY SENATOR LUGAR

● Mr. LUGAR. Mr. President, on May 22, I had the honor of speaking at the Indianapolis 500 Festival Memorial Service on Monument Circle. This service is a moving tribute to all those who gave their lives that we may live in freedom. I ask that my remarks be entered into the RECORD.

The remarks follow:

MEMORIAL DAY ADDRESS 1981

(By Senator RICHARD G. LUGAR)

Independence Day celebrates the birth of a young nation. We are still moved by the vision and courage which American patriots displayed over two hundreds years ago. With youthful enthusiasm and great courage, they defied the imperial power of the Old World. In the midst of great danger, they pledged to each other their lives, their fortunes, and their sacred honor. Theirs was a confidence and exuberance of men and women dedicated to achieving the rights and freedoms that they believed had been granted to them and to all men by Almighty God.

Memorial Day reminds us of the cost of our Independence Day—the pain of defiance and the price of asserting the dignity of persons in a world of intense passions, powerful interests, and tyrannical tendencies. Memorial Day recalls to us the many young lives snuffed out before their time, fields not planted, homes not built, and children unborn. It recalls to us sacrifices made to protect our towns and cities, our neighborhoods, our homes and churches, and the fierce independence of Americans. It recalls to us the reality of selfless acts of patriotism by many, many Americans whose deeds and whose names will remain forever unknown to us.

It is well to be reminded of this, for we are often forgetful. It is especially important now, for there are people here and abroad who wish *not* to remember the price of freedom. There are those who counsel that freedom faces no dangers which cannot be accommodated, averted, or otherwise wished away. Today, for example, Prime Minister Helmut Schmidt of Germany is in Washington. He is trying at great risk to his own political future to hold fast to an alliance of free nations against those of his own political party who favor ever greater accommodation with the Soviet Union. Indeed, there are many statesmen in many countries of the world today whose chief defense of freedom consists in hoping to tame and to moderate the Soviet Union. To adopt this course requires an hyprocrisy which knows no bounds: the Soviet conquest of Afghanistan is called a defensive action; hundreds of missiles pointed at European cities are called defensive weapons; Soviet proxy terrorists are called freedom fighters; and Soviet ships in American coastal waters are called defensive fleets.

For this perverse understanding the towering Russian author Alexandr Solzhenitsyn provides a sobering antidote. He has recently written these words:

"Anyone not hopelessly blinded by his own illusions must recognize that the West today finds itself in a crisis, perhaps even in mortal danger. One could point to numerous particular causes or trace the specific stages over the last 60 years which have led to the present state of affairs. But the ultimate cause clearly lies in 60 years of obstinate blindness to the true nature of communism.

"I am not concerned here with those who cherish, glorify and defend communism to this day. To such people I have nothing to say. Yet there are many others who are aware that communism is an evil and menace to the world, but who have nevertheless failed to grasp its implaccable nature. And such individuals, in their capacities as policy advisors and political leaders, are even now committing fresh blunders which will inevitably have lethal repercusions in the future.

(A common mistake) is the falure to understand the radical hostility of communism to mankind as a whole—the failure to realize that communism is irredeemable, that there exist no "better" variants of communism, that it is incapable of growing "kinder," that it cannot survive as an ideology without using terror, and that, consequently, to coexist with communism on the same planet is impossible. Either it will spread, cancerlike, to destroy mankind, or else mankind will have to rid itself of communism . . ."

In the land of Solzhenitsyn there is no Independence Day, for there is no independence to celebrate. I remember well my visit to the Soviet Union in August of 1979. There one can literally feel what Solzhenitsyn describes so eloquently—the iron grip of totalitarian state control over every minute of every life; the constant erosion of human dignity; and the systematic destruction of the human spirit. All people grieve their dead; but in the land of Solzhenitsyn there is no celebration of individual human destiny in a memorial day. It is our special privilege to remember that American sacrifice has had this meaning: to serve a nation of people striving to preserve and to expand human liberty and dignity in a world marked by despotism, barbarism, and terrorism.

In recent days two poignant events have reminded Americans of further threats to decency, free institutions, and dignity. As he paused to wave to American citizens in the nation's capitol, the President of the United States was shot and nearly killed. And more recently, Pope John Paul II was shot and nearly killed as he greeted worshippers in St. Peter's Square. Americans were shocked and outraged by these acts. But as we have reflected upon the attacks upon these two men—who perhaps more than any others guide the course of the human spirit today—we have been told by some political observers that such attacks are inevitable in an unjust and troubled world. I, for one, am outraged that anyone would attack the Pope or the President for any reason, and deeply disturbed by the presence of spurious analysis which rationalizes and explains away such attacks. Surely, there are times for moral judgment and unequivocal condemnation and we have just encountered two such times.

Memorial Day is a reminder that we must pay a deep and bittersweet price if we wish to preserve our independence. Selfishness, indifference, and resignation are not consistent with the preservation of our free and independent way of life. For we as creatures of God, the ideals of human liberty and dignity require constant struggle, diligence, and sacrifice.

It is self-indulgent, fundamentally mistaken, and morally deficient to argue that the world would be safer if America were weaker or more tolerant of evil; that the Soviet Union represents no serious threat to the West; that it is our military power which threatens the peace; and that our example, alone, will cause dedicated despots to alter their ways. It is a moral trust to make clear to all the world that the United States is prepared to defend against those who threaten freedom and dignity, and that it will be prepared to do so.

We must not permit ourselves a phony libertarian self-indulgence which makes it impossible to protect Presidents and Popes. Our Constitutional framework implies many ways in which we can and must act together in common cause to secure our lives, our liberty, and our happiness. The signers of the Declaration of Independence were prepared to hang together or to be hung separately. And so must we, in the knowledge that the preservation of our nation requires more than the random actions of self-centered individuals.

America's is a national fabric strong enough to make the abstract ideal of freedom work in a world in which liberty is still the exception in practice. This fabric has depended upon the sacrifice of many brave patriots. But we will understand the death of patriots only if we know and revere patriotism. And we will understand the sacrifice of many brave Americans only if we profoundly respect the history of our land and its place among the nations of the world. And we will appreciate the meaning of this day only if we hold in awe the Almighty God who looks down upon the frailty of our great institutions with knowing comprehension.

Memorial Day is a day to reflect upon those who have sacrificed for their country. But this day will be hollow if we do not reflect upon the fact that some of us, too, may one day be required to make major sacrifices for our country. Appeals to a world of safety and freedom which knows no dangers are illusory. We are obliged to the American men and women who have died for us to give great care to the common good and to the conditions for its preservation. To do less would not do justice to the memory of those Americans we honor today.●

LEGISLATIVE PROSPECTS FOR SPECIAL EDUCATION: UNANSWERED QUESTIONS; UNFULFILLED GOALS

● Mr. WEICKER. Mr. President, on April 3, 1981, my distinguished colleague and friend, Senator CHARLES MATHIAS, spoke at the 20th anniversary celebration for the Christ Church Guild Center in Bethesda, Md. His speech very eloquently addressed the education of handicapped children, not only as it is carried out at the guild center, but the national story as well. Education for the handicapped has come a long way, but there are still many unfulfilled goals in our attempts to provide an appropriate education for our

handicapped citizens. Senator MATHIAS articulates these issues at a time when many of us are concerned about the future funding of this vital program. I would like to submit Senator MATHIAS' speech for the RECORD so that it may stand as a testament to America's commitment to our handicapped children.

Mr. President, I ask that Senator MATHIAS' speech be entered into the RECORD at this point.

The remarks follow:

LEGISLATIVE PROSPECTS FOR SPECIAL EDUCATION: UNANSWERED QUESTIONS; UNFULFILLED GOALS

(By Senator CHARLES McC. MATHIAS, JR.)

It is a great pleasure to be with you this afternoon to help celebrate the 20th Anniversary of Christ Church Child Center. It is always a pleasure to associate with people who are dedicated to helping others lead happier, more fulfilling lives, but when those people are helping handicapped children, it is a positive joy.

Christ Church Child Center is a unique and wonderful organization. Your interdisciplinary approach to the children and their families was already fully developed when public schools were still either shunting aside the handicapped, providing them with segregated classrooms and inadequate teaching, or had discouraged them from attending classes altogether. Nearly 15 years before anyone had ever heard of Public Law 94–142, you were blazing trails in the education of handicapped children.

With the passage of the Education for the Handicapped Act in 1975, this nation made a unique commitment to handicapped children. I do not know of any counterpart to P.L. 94–142 in any other nation in the world. The law not only affirms the educational rights of the handicapped, it also establishes programs to assure those rights as the public policy of the United States.

As many of you know, Public Law 94–142 evolved from state laws that urged, but did not require, the education of the handicapped. When those laws proved ineffective, state "mandatory" laws were passed requiring such services, but adequate funds were never provided to pay for them. Children were still not being served, so parents turned to the courts.

In 1974 Judge John Raine in the Circuit Court for Baltimore County, Maryland, ruled on a class action suit. The Maryland Association for Retarded Children had sued the State of Maryland on behalf of all the State's retarded children. Judge Raine decreed that:

"It is the established policy of the State of Maryland to provide a free education to all persons between the ages of 5 and 20 years, and this includes children with handicaps, and particularly mentally retarded children, regardless of how severely and profoundly retarded they may be."

A series of parallel state and federal court decisions supporting the claims of handicapped children set the stage for congressional action.

The Education of the Handicapped Act authorizes the federal government to make grants to state and local agencies to help with the excess cost of special education. It also requires the federal government to assure that states are in compliance with the law's requirements of specific due process procedures, individual education plans, and other protections for children and parents. In a sense, the Act is both a discretionary grant program and a civil rights law.

As a result of this mix of state and federal laws and appropriations and court decisions, we have reached the highest level of service on behalf of handicapped children in history. Almost four million children are receiving special education, geared to individual education plans as the law requires. Better quality education is being provided. More parents are participating cooperatively with school officials than ever before. More care is being taken to protect the constitutional rights of parents and children than ever before.

Clearly, education for the handicapped has come a long way since those landmark court decisions and the initial legislation. But sometimes what we hail as a landmark achievement turns out to be only the first milestone on a very long, very rough road.

This is what we are finding out about Public Law 94–142. And it is just what we found about civil rights legislation. Too often in these difficult areas court decisions and laws are only the beginning of a process, not the end.

For example, Title VIII of the 1968 Civil Rights Act made it the law of the land "to provide . . . for fair housing throughout the United States". But recent studies show that while residential desegregation is occurring both in suburban areas and in cities, discrimination still exists in the sale and rental of housing and in mortgage lending.

This is very discouraging 13 years after the Fair Housing law took effect. But not one of us who fought for that legislation is going to give up on it because it hasn't lived up to our highest hopes. We know that we have to work harder to make the law work better. And that's why in February I introduced a new Fair Housing Act to modify the law and to provide an enforcement mechanism. My bill also includes the handicapped as a protected class for the first time.

I think that's pretty much where we are now with Public Law 94–142. There have been problems and uncertainties. There are still unfulfilled goals. But I am not prepared to give up on it and neither are you.

Henry Ward Beecher, a great civil libertarian and a wise human being, thought that "law and institutions are constantly tending to gravitate. Like clocks," he said, "they must be occasionally cleansed, and wound up, and set to true time."

I myself do not have the key that will wind up Public Law 94–142 and set it to true time. But clearly that is what needs to be done. I have no doubt that, working together, public and private agencies and individuals concerned with the education of handicapped children will find the proper key.

Public Law 94–142 was a tremendous breakthrough. If its goal is to be met by at least the mid-1980's, we have to address several major problems. These concern me, and I am sure they trouble you too.

Some questions on eligibility criteria need to be resolved. For example, nearly one-third of the children counted as handicapped under the program are classified as speech-impaired. They are receiving only speech therapy. For this number of children, states received about $235 million in federal grant funds for fiscal year 1980.

The General Accounting Office reports that the speech-impaired children include many who receive therapy for impairments such as lisping, stuttering, and word pronunciation problems. For example, they say "wabbit" for "rabbit" or "bud" for "bird". Other children have voice tones which are low, high, nasal, harsh or hoarse.

I am not questioning whether such children need speech therapy. Speech therapy may be vital for them to master the basic skill of effective communication. What I am questioning is whether the Congress intended that they be served under the 94–142 program as handicapped children.

The law and its legislative history are unclear on this. Nevertheless, the Department of Education issued a bulletin in July 1980 to permit children receiving only speech therapy to be counted as handicapped for federal funding.

I am raising the question because of the significant dollar impact that including such children has on the total program. It is all very well to talk about "appropriate free education for all handicapped children" but, when funds are limited, putting this principle into action can force you to make some anguishing policy decisions.

Two years ago listening to witnesses testify at a hearing on Public Law 94–142, I began to realize just how difficult it is for you to make those decisions because the precise legislative intent of Public Law 94–142 still is far from clear. There was not even any consensus among those expert witnesses about what the terms "handicapped" and "least restrictive environment" and "free, appropriate education" mean.

The question I asked the education professionals at that hearing and the question I would like to ask you is this: Would it alarm you, or reassure you, if Congress attempted to delineate more carefully some of the categories of limits of handicaps under the 94–142 program?

A great many other issues remain to be resolved if the goal of Public Law 94–142 is to be met by the mid-1980's. But the greatest challenge before us is obtaining adequate federal funding for Public Law 94–142. The lack of money to pay for needed personnel, space, supplies and other services is and has been the principal barrier to providing full, appropriate education programming for all handicapped children. It is a problem I have been wrestling with since before Public Law 94–142 became law. And I am sorry to say it is a problem that is getting harder rather than easier to surmount.

My work in 1974 in amending Public Law 93–380, the precursor to Public Law 94–142, established the principle that the federal government should help shoulder the extra costs for funding education of handicapped children. It also established the formula for this funding. At the beginning of Public Law 94–142, the federal government promised to be a responsible financial partner with state and local agencies in providing the services mandated by the Act and, for the first two years under the law, the federal government honored that commitment. But then things began to slide.

I still bear battle scars from later fights in the Appropriations Committee to get the federal government to live up to its pledges. But as you well know, the actual funds annually requested by the President and finally appropriated by Congress are considerably less than the full funding levels authorized by 94–142.

Now I am deeply concerned about the future funding of the program. President Reagan has proposed that 94–142 funds be consolidated next year with funds of 44 federal elementary and secondary education programs into two block grants—one for local educational agencies and the other for state educational agencies.

The intent, as stated by the Administration, is to decrease federal control over these programs and to increase local flexibility in the use of federal aid. The Administration proposes to cut the combined funding of all these programs by 25 percent. It argues that the cut would be partially offset by lower administrative costs due to reduced regulatory and paperwork burdens.

For the handicapped, both the state grant and preschool incentive grant programs are included in the proposed block grant for local educational agencies along with 10 other federal education programs. Together these would serve the economically disadvantaged, migrants, adults needing basic education, and school districts undergoing

desegregation, as well as handicapped children.

The consolidation proposal would generally eliminate requirements for state and local matching funds and would allow federal funds to supplant state and local funds. The proposal does not specify any program purposes or objectives or special services that would have to be provided by the recipients of the block grants.

I am not at all optimistic about our chances of ever coming out anywhere near the authorized funding level for 94–142. Even maintaining the current funding level will be a challenge. The President has proposed rescinding 25 percent of the funds that Congress has already apportioned under 94–142 for the school year which starts this fall.

As I said earlier, next year—the first year of the block grants—the Administration has proposed a 25 percent reduction for education programs. But I think we have some grounds for hope here. The Senate Committee on Labor and Human Resources rejected the proposed cuts for 94–142 grants and instead recommended a 10 percent increase above the current level. That recommendation would increase 94–142 grant funding from $922 million to slightly over $1 billion.

The Senate Budget Committee, however, rejected the 10 percent increase for the next year but did maintain the current funding level despite the Administration's request for a 25 percent cut.

Over the past several years—largely through the trail-blazing of organizations like Christ Church Child Center and the leadership of the professionals in special education—virtually every school district in the nation has moved toward affirming the fundamental rights of handicapped children.

This is a substantial achievement especially when you consider that when I was a boy growing up in Frederick, Maryland, families with handicapped children literally locked them away; hid them from public view.

So we can be proud of what we have achieved. But we still have a very long way to go and now, just when we're beginning to see real signs of progress both in attitudes toward the handicapped and in education for handicapped children, is no time to turn back.

If new limits on federal spending must curtail or slow down delivery of some federal services, we must redouble our efforts to fulfill the goal of 94–412: "to assure the free appropriate public education of all handicapped children."

I can think of no more appropriate way for all of us to mark this 20th Anniversary of the Christ Church Child Center than by reaffirming our shared commitment to America's handicapped children.●

THE YOUTH CAREER INTERN PROGRAM ACT

● Mr. CHAFEE. Mr. President, I am proud to be an original cosponsor of legislation which would help disadvantaged youths to become productive and educated members of society. This bill attacks youth unemployment and rising school dropout rates—two problems of startling proportions. It does so by encouraging community-based organizations and local educational agencies to establish career intern programs.

Youth unemployment is virtually endemic to many areas of this country. In 1980, the unemployment rate among teenagers was over 17 percent; the rate for minority group teenagers was over twice that. Equally alarming, and by no means unrelated, are the enormous numbers of youths who are dropping out of school, running away from home, and getting in trouble with the law. Youths who are without even the prospect of jobs which provide security and the opportunity for advancement often become destructive of themselves and society. It is vital that youths be given the opportunity to acquire skills that will allow them to support and improve themselves.

Programs and theories aimed at resolving youth unemployment abound. Yet, many are of dubious value or seriously flawed. This bill endorses an approach with proven success. Education is an essential prerequisite to placing and keeping youths in the workforce. It readies them not only for work, but for life. Community-based organizations, such as the opportunities industrialization centers, are best able to respond to youth unemployment and its attendant problems. For it is they who best understand the conditions which give rise to the problems which youths face. These groups have worked with local education agencies to rescue high school dropouts, to teach them basic skills, and to train them for productive jobs.

In this time of budgetary restraint, it is essential that we recognize that career intern programs have been cost effective. They have provided education and training at costs at or below those offered in traditional settings. Moreover, they have made productive citizens out of disillusioned youths who might otherwise have dwelled in a state of hopelessness and been lifelong recipients of public aid.

We are now engaged in a stringent review of various CETA programs. As we seek to eliminate or correct those elements of CETA which have not worked, we must not abandon the goal of reducing youth unemployment. By embracing an approach which has demonstrated its effectiveness, we will be directing our energies toward giving a justifiable sense of hope to those youths who most desperately need our help.●

KANSAS CITY UNITES TO FIGHT YOUTH UNEMPLOYMENT

● Mr. EAGLETON. Mr. President, I would like to commend private initiatives and the city government of Kansas City, Mo., for taking important strides in fighting the problem of youth employment.

In today's economy, many young people, especially disadvantaged youths, are presented with little opportunity for job experience. With the decrease of Federal involvement in this area, it is imperative that the private sector take an active role.

The Chamber of Commerce of Greater Kansas City, the Kansas City Alliance of Business, the Urban League of Greater Kansas City, the Private Industry Council of Kansas City, the Kansas City Central Labor Council, and the city have done just that.

Under the leadership of these sponsoring organizations, a drive has begun to provide 2,500 summer jobs for the disadvantaged youths of Kansas City. Through the efforts of volunteers, business executives, and employers the needs of both industry and jobseeking young people will be met.

Mr. President, I urge other cities across the Nation to follow the lead provided by Kansas City and set up similar programs. The result will be higher employment, a better trained work force, and an improved level of income and independence among our young people.

I ask to have printed in the RECORD an article which appeared on May 29, 1981, which highlights the details of the program and reflects my views on this important initiative now underway in Kansas City.

The article follows:

FINDING SUMMER JOBS

For any young person, the first or interim job between school and lifetime adult work is extremely important, supplying some money to help with living expenses as well as insight into the satisfaction of being independent. For disadvantaged youth, the first steps into the work world have even greater consequences.

Recognizing they can't make much progress if the jobs aren't available, Kansas City private industry intends to find some spots suitable for fledgling workers. A concentrated drive has started to develop 2,500 summer jobs for disadvantaged youth under the leadership of the Chamber of Commerce of Greater Kansas City, the Kansas City Alliance of Business, the Urban League of Greater Kansas City, the Private Industry Council of Kansas City and the city.

A volunteer telephone bank, getting an early start this week, will contact businesses asking if they will provide jobs. Chief executives of 10 industry groups will solicit positions from firms in those fields. The Kansas City Alliance of Business will handle placements and the Kansas City Comprehensive Employment and Training Act program will make referrals from a pool of needy youth.

The combination of a slow economy and the shrinking of federal job programs intensifies an already bleak situation in youth employment. About 600 fewer CETA jobs will be available this year, with further cuts expected next year. It's always harder for young people to find jobs than adults, now having their own troubles with a 7 percent unemployment rate. Year-long projections for 1981 indicate that 24.2 percent of those 16 and 17 will be unemployed, for example, and the rate for non-white youths is expected to be 51.8 percent here.

The retreat by the federal government in summer employment underwriting makes it imperative that private industry act to fill the gap, finding space, concentrating on those who need work most, offering it, helping match jobs with applicants. The private sector program started here does that. The sponsoring organizations are to be commended for their leadership. Not only is it socially responsible but it can pay dividends for industry. As Chamber chairman Robert A. Long observed: "It is in the best interest of area businesses to begin developing the future labor supply, for today's youth hold the key to Kansas City's economic future."

Firms cannot be urged too strongly to take part. Thousands of untested kids looking around the corner into adulthood, still with hope, depend on it. A job now or its lack can make or break many of them. The right decision to participate will make unnecessary any business' regret in the future that a little more effort could have made the difference.●

ON RETURNING NAZI ART TO GERMANY

● Mr. WEICKER. Mr. President, I believe the recommendation to return to Germany various works of art confiscated at the end of World War II is seriously flawed and I urge the administration to abandon this course of action.

These pieces of art, some 9,000 in number and including several watercolors by Hitler himself, were originally commissioned by the Third Reich to glorify nazism and the exploits of the German armies. In a very concrete way, these works represent and symbolize one of history's most demonic and destructive regimes. How we handle these art objects reflects our attitude toward the deeds and values of those who created them. Improvement of our relations with the current German Government notwithstanding, we cannot in anyway communicate by our actions that the crimes of this pivotal period of modern history are forgotten or forgiven.

In order that these art works be utilized in the most appropriate and constructive manner possible, the U.S. Holocaust Memorial Council would appear to be an ideal repository. The Council's clear, congressionally established mission, to quicken the Nation's memory and conscience with regard to this period, and its mandate to be involved in archival and educational activities, recommend it strongly for this responsibility. It is certainly preferable to any of the other alternatives now available: returning the works to the Germans; destroying them; or leaving them under the control of the Army.

I urge the administration to carefully consider the merits of each proposed course of action before proceeding. This matter has important long-term consequences which must be addressed.

Mr. President, I ask that an article which appeared in the Washington Post on this subject be printed at this point in the RECORD.

The article follows:

UNITED STATES CONSIDERS GIVING NAZI ART BACK TO GERMANY

(By Charles Fenyvesi)

The U.S. government is considering the return to West Germany of four watercolors by Adolf Hitler and more than 6,000 works of art commissioned to glorify the conquests of Nazi armies in Europe and North Africa.

The paintings and sketches were collected at the end of World War II by the U.S. Army from hiding places such as salt mines, castles and museums, as well as from individuals. The search followed an agreement by the Allies—the United States, Britain, France and the Soviet Union—to locate, confiscate and destroy all art that might revitalize Nazism.

Instead of destroying the art, however, the U.S. Army shipped the collection home, storing the items at various locations and loaning them for display at U.S. military bases and in hospitals, government buildings and traveling exhibits.

Before Chancellor Helmut Schmidt's visit here last week, State Department specialists recommended to Secretary of State Alexander M. Haig Jr. that the collection be returned to West Germany as a gesture of friendship between the two countries.

As another option, they suggested returning to Germany that portion of the collection judged by a committee not to be Nazi propaganda. But the officials warned about possible controversy as the committee decided whether oil portraits of Hitler and his cohorts, and items featuring swastikas and other emblems of the Third Reich, were propaganda and thus not returnable.

In 1945 the Allies defined as the goal of occupation the prevention of "all Nazi and militaristic activity or propaganda."

According to Fritz Ziefer, a press counselor with the German embassy here, Bonn has not initiated any action toward getting the collection back. "We don't consider that war art part of German culture, and we have no national interest in it," he said. However, he added, former owners of the paintings and families of the artists have asked the government periodically to try to retrieve the art works. Ziefer concluded that "it's strictly a legal matter," not a political one.

Much of the collection—if returned—would have to be closed to the public because display of Nazi insignias is against German law. A 1946 Allied agreement declares as illegal "the planning, designing, erection, installation, posting or other display of any monument, memorial, poster, statue, edifice, street or highway name marker, emblem, tablet, or insignia which tends to preserve and keep alive the German military tradition. . . ."

Earlier this month, Rep. William Whitehurst (R-Va.) introduced legislation to authorize the return to West Germany of "certain works of art" seized by the U.S. Army at the end of the war. Whitehurst says that no U.S. funds would be expended in the transfer.

Since 1947, when the collection was set up, the Army has spent an average of $20,000 a year to maintain what it calls "German war art." According to Marylou Gjernes, curator of the Army Center of Military History in Alexandria, some of the items require restoration. Her office has photographs of all the items, cataloged by artists.

The items themselves are stored in various government buildings. The four watercolors by Hitler are kept in the vault of the U.S. Army Center of Military History here and are occasionally loaned, most recently to a University of Maryland exhibition in Towson.

Some of the collection's paintings hang in the Pentagon and on Capitol Hill, but most people are not aware of who painted them or what they represent, Gjernes said.

One work, depicting the Russian front, hangs in Whitehurst's congressional office. He says he resents the collection being called "Nazi art." He calls it "military art," argues that most of the items have no ideological content and thinks that all but 1,000 articles should be returned to be hung in German museums.

"We returned Japan's war mementos when we returned Okinawa," Whitehurst said. In 1978, he sponsored legislation to return to the German navy 10 paintings from the U.S. collection. The bill passed by a voice vote, and the paintings now hang in Bremerhaven's naval museum—"an appropriate place," Whitehurst says.

Whitehurst, who was in the Navy during World War II and lost a brother fighting the Nazis, has seen what he calls a representative sample of the collection, shown to him by Army authorities. He was unaware that four Hitler watercolors are included, and said he thought it unlikely that they would be returned to Germany because "they glorify the regime we all loathe."

The Hitler watercolors are conventional depictions of the Belgian countryside and old buildings in Munich and Vienna, painted during World War I or shortly thereafter.

Many of the German war paintings are pastoral landscapes; some show a lonely machine-gun emplacement or soldiers on the march. The majority are colorful and sometimes bucolic representations of Germany's conquests. German soldiers are depicted as eminently human: thoughtful, tough, grim—but never despairing. There are images of a regimental commander with well-chiseled features, a daring young mountain trooper, a radio operator absorbed in his craft, and an enlisted man throwing a hand grenade.

All the paintings fall within Hitler's prescribed style of realism, yet they are anything but dull. The earnest faces half convince a viewer that theirs is a just war. Tangled rows of barbed-wire barriers, hordes of Frenchmen fleeing from German tanks and vivid colors of burning Ukrainian villages do offer fine art. There is a certain merit, if that is the proper word, to the oil painting titled "In the Beginning Was the Word," which shows Hitler addressing his followers.

"It's a collection you can make anything out of," said curator Gjernes, who is of several minds about the prospects of having to part with it.

"Some of the paintings we have are quite beautiful," she said. "They reflect someone else's belief. I cannot argue with the emotions of the painters. I wasn't there."●

S. 1273—THE INTELLIGENCE REFORM ACT OF 1981

● Mr. CHAFEE. Mr. President, on May 21, 1981, I introduced S. 1273, the Intelligence Reform Act of 1981.

I ask that S. 1273 be printed in the RECORD at this time.

S. 1273 follows:

S. 1273

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Intelligence Reform Act of 1981".

SEC. 2. Section 6 of the Central Intelligence Agency Act of 1949 (50 U.S.C. Sec. 403g) is amended to read as follows:

"SEC. 6. In the interests of the security of the foreign intelligence activities of the United States and in order further to implement the proviso of section 102(d)(3) of the National Security Act of 1947 (50 U.S.C. 403(d)(3)) that the Director of Central Intelligence shall be responsible for protecting intelligence sources and methods from unauthorized disclosure, the Agency shall be exempted from the provisions of any law which require the publication or disclosure of the organization, functions, names, official titles, salaries, or number of personnel employed by the Agency. In furtherance of the responsibility of the Director of Central Intelligence to protect intelligence sources and methods, information in files maintained by an intelligence agency or component of the United States Government shall also be exempted from the provisions of any law which require the publication or disclosure, or the search or review in connection therewith, if such files have been specifically designated by the Director of Central Intelligence to be concerned with—

"(1) the design, function, deployment, exploitation or utilization of scientific or technical systems for the collection of foreign intelligence, counterintelligence, or counterterrorism information;

"(2) special activities and foreign intelligence, counterintelligence, or counterterrorism operations;

"(3) investigations conducted to determine the suitability of potential foreign intelligence, counterintelligence, or counterterrorism sources; and

"(4) intelligence and security liaison arrangements or information exchanges with foreign governments or their intelligence or security services.

Notwithstanding the preceding sentence, requests by United States citizens and by aliens who are lawfully admitted for permanent residence in the United States for information concerning themselves made pursuant to any provision of law shall be processed in accordance with such provision. The provisions of this section shall not be superseded except by a provision of law which is

enacted after the date of enactment of the Intelligence Reform Act of 1981 and which specifically repeals or modifies the provisions of this section.".●

CONCLUSION OF MORNING BUSINESS

The PRESIDING OFFICER. Is there further morning business? If not, morning business is closed.

ORDER FOR RECESS UNTIL 11:45 A.M. TOMORROW

Mr. STEVENS. Mr. President, I ask unanimous consent that, when the Senate completes its business today, it stand in recess until the hour of 11:45 a.m. tomorrow.

The PRESIDING OFFICER. Without objection, it is so ordered.

ORDER FOR RECOGNITION OF SENATOR SIMPSON AND SENATOR ROBERT C. BYRD TOMORROW

Mr. STEVENS. Mr. President, I ask unanimous consent that following the recognition of the two leaders under the standing order on tomorrow, the Senator from Wyoming (Mr. SIMPSON) be recognized for not to exceed 15 minutes.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. STEVENS. Mr. President, I ask unanimous consent that the distinguished minority leader, the Senator from West Virginia, Senator ROBERT C. BYRD, be recognized for 15 minutes for a special order following the recognition of Mr. SIMPSON.

The PRESIDING OFFICER. Without objection, it is so ordered.

HOUSING BILL—S. 1197

Mr. STEVENS. Mr. President, it is the intent of the leadership to turn to the housing bill, Calendar No. 111, S. 1197 at 12:30 p.m. tomorrow.

RECESS UNTIL 11:45 A.M. TOMORROW

Mr. STEVENS. Mr. President, if there be no further business to come before the Senate, I move, in accordance with the previous order, that the Senate stand in recess until 11:45 a.m. tomorrow morning.

The motion was agreed to; and at 5:42 p.m., the Senate recessed until Wednesday, June 3, 1981, at 11:45 a.m.

NOMINATIONS

Executive nominations received by the Senate June 2, 1981:

DEPARTMENT OF THE TREASURY

Ann Dore McLaughlin, of the District of Columbia, to be an Assistant Secretary of the Treasury, vice Joseph Laitin, resigned.

John M. Walker, Jr., of New York, to be an Assistant Secretary of the Treasury, vice Walter J. McDonald, resigned.

Peter J. Wallison, of New York, to be General Counsel for the Department of the Treasury, vice Robert H. Mundheim, resigned.

DEPARTMENT OF LABOR

Donald L. Dotson, of Pennsylvania, to be an Assistant Secretary of Labor, vice William P. Hobgood.

DEPARTMENT OF ENERGY

Herman E. Roser, of New Mexico, to be an Assistant Secretary of Energy (defense programs), vice Duane C. Sewell, resigned.

AGENCY FOR INTERNATIONAL DEVELOPMENT

Jay F. Morris, of Maryland, to be an Assistant Administrator of the Agency for International Development, vice Donald Gordon MacDonald, resigned.

CONFIRMATIONS

Executive nominations confirmed by the Senate June 2, 1981:

DEPARTMENT OF ENERGY

R. Tenney Johnson, of Maryland, to be General Counsel of the Department of Energy, vice Lynn R. Coleman.

The above nomination was approved subject to the nominee's commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.

MERIT SYSTEMS PROTECTION BOARD

Alex Kozinski, of California, to be Special Counsel of the Merit Systems Protection Board for a term of 5 years, vice Haywood Patrick Swygert, resigned.

DEPARTMENT OF HEALTH AND HUMAN SERVICES

Robert J. Rubin, of Massachusetts, to be an Assistant Secretary of Health and Human Services, vice John L. Palmer, resigned.

HOUSE OF REPRESENTATIVES—*Tuesday, June 2, 1981*

The House met at 12 o'clock noon.

The Reverend Robert R. Robertson, pastor, First United Church of Christ, Everett, Pa., offered the following prayer:

Lord God, we pray to ask for Your continuing guidance and help in the affairs of this Nation, and the nations of the world. We especially pray for Your power and wisdom to be with these our leaders. Give them a growing sense of law and order. Temper their lives with a spirit of justice and righteousness as they strive to serve the will of the people.

Bring to them a spirit of gracefulness, grant them patience; provide them with a sense of courage; allow them the grace and freedom to make, and to admit to, mistakes; and help them to celebrate the joy of good and right choices.

We thank You for being our God and for granting the spirit of this prayer. Amen.

THE JOURNAL

The SPEAKER. The Chair has examined the Journal of the last day's proceedings and announces to the House his approval thereof.

Pursuant to clause 1, rule I, the Journal stands approved.

THE REVEREND ROBERT ROBERTSON

(Mr. SHUSTER asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SHUSTER. Mr. Speaker, today's opening prayer was offered by the Reverend Robert Robertson, pastor of my home congregation, the First United Church of Christ in Everett, Pa. Reverend Robertson, his wife, Barbara, and their two children, Andy and Amy, have been wonderful additions to the community for 9 years since arriving in Everett in October 1972.

Reverend Robertson graduated from Meyersdale High School in Somerset County, Pa., received his undergraduate degree from Catawba College in Salisbury, N.C., and his masters of divinity from the Lancaster Theological Seminary in Pennsylvania.

Reverend Robertson has taken a strong spiritual faith, and utilized it to help his neighbors and congregation by being active in many areas including the area community housing board and as chairman of the area senior citizens center.

I am pleased that the House of Representatives has had the privilege of praying together with Reverend Robertson.

PRIVATE CALENDAR

The SPEAKER. This is Private Calendar day. The Clerk will call the first individual bill on the Private Calendar.

BLANCA ROSA LUNA DE FREI

The Clerk called the bill (H.R. 661) for the relief of Blanca Rosa Luna de Frei.

There being no objection, the Clerk read the bill as follows:

H.R. 661

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, for the purposes of the Immigration and Nationality Act, Blanca Rosa Luna de Frei shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this Act, upon payment of the required visa fee. Upon the granting of permanent residence to such alien as provided for in this Act, the Secretary of State shall instruct the proper officer to deduct one from the total number of immigrant visas and conditional entries which are made available to natives of the country of the alien's birth under section 203(a) of the Immigration and Nationality Act or, if applicable, from the total number of such visas and entries which are made available to such natives under section 202(e) of such Act.

With the following committee amendments:

Page 2, line 5 delete the work "and", and all that follows through "entries".

Page 2, line 9 delete the words "and entries".

The committee amendments were agreed to.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

JUNIOR EDMUND MONCRIEFFE

The Clerk called the bill (H.R. 688) for the relief of Junior Edmund Moncrieffe.

There being no objection, the Clerk read the bill as follows:

H.R. 688

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That for the purposes of section 203(a)(2) and 204 of the Immigration and Nationality Act, Junior Edmund Moncrieffe shall be held and considered to be the alien son of Rupert Edmund Moncrieffe, a lawful permanent resident of the United States: *Provided,* That the natural mother or brothers or sisters of the beneficiary shall not, by virtue of such relationship, be accorded any right, privilege, or status under the Immigration and Nationality Act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

ROLAND KARL HEINZ VOGEL

The Clerk called the bill (H.R. 783) for the relief of Roland Karl Heinz Vogel.

There being no objection, the Clerk read the bill as follows:

H.R. 783

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, notwithstanding the provision of section 212(a)(9) of the Immigration and Nationality Act, Roland Karl Heinz Vogel may be issued a visa and admitted to the United States for permanent residence if he is found to be otherwise admissible under the provisions of that Act: *Provided,* That this exemption shall apply only to a ground for exclusion of which the Department of State or the Department of Justice had knowledge prior to the enactment of this Act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

MADELEINE MESNAGER

The Clerk called the bill (H.R. 1469) for the relief of Madeleine Mesnager.

There being no objection, the Clerk read the bill as follows:

H.R. 1469

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, in the administration of the Immigration and Nationality Act, Madeleine Mesnager, the adoptive mother and aunt of Jeanne Petroff, a citizen of the United States, shall be deemed to be an immediate relative within the meaning of section 201(b) of such Act, and the provisions of section 204 of that Act shall not be applicable in this case: *Provided further,* That any fee received by any agent or attorney on account of services rendered relating to the introduction of this bill shall be unlawful, any contract to the contrary notwithstanding. Any person violating the provisions of this Act shall be deemed guilty of a misdemeanor and upon conviction thereof shall be fined in any sum not exceeding $1,000.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

□ This symbol represents the time of day during the House proceedings, e.g., □ 1407 is 2:07 p.m.

● This "bullet" symbol identifies statements or insertions which are not spoken by the Member on the floor.

OMAR MARACHI

The Clerk called the bill (H.R. 1480) for the relief of Omar Marachi.

There being no objection, the Clerk read the bill as follows:

H.R. 1480

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, Omar Marachi shall be held and considered to have satisfied the requirements of section 316 of the Immigration and Nationality Act relating to required periods of residence and physical presence within the United States and, notwithstanding the provisions of section 310(d) of that Act, may be naturalized at any time after the date of enactment of this Act if otherwise eligible for naturalization under the Immigration and Nationality Act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

REMEDIOS R. ALCUDIA, CHRISTOPHER, EZRA, VERMILLION, AND PERISTELLO ALCUDIA

The Clerk called the bill (H.R. 1547) for the relief of Remedios R. Alcudia, Christopher, Ezra, Vermillion, and Peristello Alcudia.

Mr. SENSENBRENNER. Mr. Speaker, I ask unanimous consent that the bill be passed over without prejudice.

The SPEAKER. Is there objection to the request of the gentleman from Wisconsin?

There was no objection.

AURORA ISIDRA RULLAN DIAZ

The Clerk called the bill (H.R. 1550) for the relief of Aurora Isidra Rullan Diaz.

There being no objection, the Clerk read the bill as follows:

H.R. 1550.

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, in the administration of the Immigration and Nationality Act, Aurora Isidra Rullan Diaz may be classified as a child within the meaning of section 101(b)(1)(F) of the Act, upon approval of a petition filed in her behalf by Mr. and Mrs. Peter Banez, citizens of the United States, pursuant to section 204 of the Act: *Provided,* That the natural parents or brothers or sisters of the beneficiary shall not, by virtue of such relationship, be accorded any right, privilege, or status under the Immigration and Nationality Act.

The bill was ordered to be engrossed and read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

HANIFE FRANTZ

The Clerk called the bill (H.R. 2185) for the relief of Hanife Frantz.

There being no objection, the Clerk read the bill as follows:

H.R. 2185

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That, for the purposes of the Immigration and Nationality Act, Hanife Frantz shall be held and considered to have been lawfully admitted to the United States for permanent residence as of the date of the enactment of this Act, upon payment of the required visa fee. Upon the granting of permanent residence to such alien as provided for in this Act, the Secretary of State shall instruct the proper officer to deduct one number from the total number of immigrant visas which are made available to natives of the country of the alien's birth under section 203(a) of the Immigration and Nationality Act or, if applicable, from the total number of such visas which are made available to such natives under section 202(e) of such Act.

With the following committee amendment:

Strike out all after the enacting clause and insert in lieu thereof the following:

That, in the administration of the Immigration and Nationality Act, Hanife Frantz, the widow of a citizen of the United States, shall be deemed to be an immediate relative within the meaning of section 201(b) of such Act, and the provisions of section 204 of that Act shall not be applicable in this case.

The committee amendment was agreed to.

The bill was ordered to be engrossed and read a third time, and was read the third time, and passed, and a motion to reconsider was laid on the table.

The SPEAKER. This concludes the call of the Private Calendar.

PERMISSION FOR COMMITTEE ON APPROPRIATIONS TO HAVE UNTIL MIDNIGHT TOMORROW TO FILE CONFERENCE REPORT ON H.R. 3512, SUPPLEMENTAL APPROPRIATIONS AND RESCISSION ACT OF 1981

Mr. WHITTEN. Mr. Speaker, I ask unanimous consent that the managers may have until midnight tomorrow, Wednesday, June 3, 1981, to file a conference report on the bill (H.R. 3512) making supplemental appropriations for the fiscal year ending September 30, 1981, rescinding certain budget authority, and for other purposes.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

MAKING IN ORDER ON THURSDAY, OR ANY DAY THEREAFTER, CONSIDERATION OF CONFERENCE REPORT AND ANY AMENDMENTS IN DISAGREEMENT ON H.R. 3512, SUPPLEMENTAL APPROPRIATIONS AND RESCISSION ACT OF 1981

Mr. WHITTEN. Mr. Speaker, I ask unanimous consent that it may be in order at any time on Thursday, or any day thereafter, to consider the conference report and any amendments in disagreement on the bill (H.R. 3512) making supplemental appropriations for the fiscal year ending September 30, 1981, rescinding certain budget authority, and for other purposes.

The SPEAKER. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

CARDINAL WYSZYNSKI, CHAMPION OF FREEDOM

(Mr. LANTOS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LANTOS. Mr. Speaker, a great spiritual leader, a courageous fighter for liberty, a deep believer in human rights, is no longer with us. Cardinal Stefan Wyszynski, the late primate of Poland, died last week, and freedom-loving men and women throughout the world mourn his passing.

I have, Mr. Speaker, a particularly personal appreciation for what this great man believed in and for the courageous way in which he acted on his beliefs. During his distinguished career, he opposed both the totalitarianism of Nazi Germany and the imperialism of the Soviet Union with determination and wisdom.

A representative of the finest in the Roman Catholic tradition, he fought for all humankind. His memory will be honored and cherished by all who are committed to freedom.

CONSTITUENT RESPONSE ON ADMINISTRATION SOCIAL SECURITY PROPOSALS IS NEGATIVE

(Mr. SHARP asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. SHARP. Mr. Speaker, the overwhelming response I have received from my constitutents to the administration proposals on social security has been negative. Person after person calls them unfair.

And I certainly agree, especially when one looks at the administration's proposal to drastically and immediately reduce early retirement benefits.

Thousands of Americans have planned for their retirement next year, counting on the Government to faithfully fulfill its obligations. Many must retire for health reasons, some are committed by contract to leave their regular employment.

Suddenly these citizens are being told they may lose up to $160 a month they had every right to expect they would receive. That may not be a lot of money for those earning over $100,000 a year, but it is a very stiff

tax for the bulk of those expecting to retire next January.

Mr. Speaker, the Congress must, and I believe it will, reject such unfair proposals. We must seek alternatives that will be based on fairness to the generation receiving benefits and fairness to the generations now paying into the fund.

WHAT IS ADMINISTRATION'S MILITARY PAY POLICY?

(Mr. MOFFETT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. MOFFETT. Mr. Speaker and colleagues, we all heard the speech by President Reagan to the graduating class at West Point. He talked about how we had come out of the Vietnam syndrome, and how we are rearming to be better prepared in the world. He promised the graduates increased pay and incentives to make the Army more attractive.

What the President did not tell those graduates and the military personnel around the world, of course, is that he has just deferred a planned 5.3-percent pay increase for the military which was to become effective on July 1, 1981, under current law. This increase was to be added to the one scheduled for October 1, 1981.

Mr. Speaker, the question is, What is the administration's position on military personnel? The Reagan budget increases investment in hardware by 34 percent, but the investment in operations and maintenance is increased only 4 percent. We are, therefore, laying the groundwork for a military with fancy equipment, but no way to repair it and no skilled hands to operate that equipment which works, and to fix the equipment which does not.

□ 1215

THE EFFECTS OF GRAMM-LATTA ON OLDER WOMEN

(Ms. OAKAR asked and was given permission to address the House for 1 minute, and to revise and extend her remarks.)

Ms. OAKAR. Mr. Speaker, as Chair of the Task Force on Social Security and Women for the Aging Committee, I will be holding hearings on the effects of the social security cuts in the Gramm-Latta budget and other administration proposals on older women.

Mr. Speaker, 72 percent of all our elderly poor happen to be women. The average woman 65 or over lives on $220 per month. If they take the early retirement benefit at age 62, their reduced benefit is an average of $189 a month. The administration's proposal would decrease that check by 25 percent. The elimination of the minimum benefit of $122 a month, also affects older women adversely.

Mr. Speaker, the list goes on and on and on. This is the so-called safety net related to our older Americans, especially older women. I believe personally it is a sham. Hopefully, our hearings will relay the truth about the administration's proposals related to social security and their effect on older Americans, in particular older women.

A 3-YEAR TAX CUT WITH SUNSET TRIGGERED PROVISIONS—A BIPARTISAN COMPROMISE

(Mr. LEVITAS asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. LEVITAS. Mr. Speaker, there has been much discussion in Washington and around the country recently about proposed tax reductions.

Some of us who would like to see a multiyear tax reduction such as the Kemp-Roth program are very concerned about the high deficits under which the budget is now operating. We want to see the tax burden relieved and productivity stimulated. But, we are concerned that the national debt will this year reach $1 trillion, and that a multiyear tax reduction could add to the depth of the deficits and add to the raging fires of inflation.

Consequently, since President Reagan has asked for proposals for compromise, I now submit one which many of us who feel the way I do could support wholeheartedly. That proposal is to enact a 3-year, 30-percent tax cut, but for the second and third years trigger in a sunset provision for each of those years. The triggers would be whether or not the economy achieves the very same assumptions which the Reagan administration and OMB Director David Stockman have placed before us. If the inflation rate comes down, as it is predicted according to the President's program, if the interest rates are reduced, according to the President's program, if the deficits are brought under control, according to the President's program, then those tax reductions for the second and third out years are put in place; if not, we avoid the higher deficits and the inflation which would result from them by having an automatic sunset of the tax cut.

This proposal is fiscally prudent. It gives the President his Kemp-Roth tax cut intact. It uses the President's very own economic assumptions and gives Congress and the marketplace an incentive for reaching them.

Mr. Speaker, this is a compromise based on the President's own assumptions, and I think it would merit bipartisan support and become the bipartisan compromise which the President and the public want.

VETERANS' PROGRAMS UNDER FIRE BY ADMINISTRATION

(Mr. PEASE asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. PEASE. Mr. Speaker, we will vote today on seven bills relating to veterans. I note that the Reagan administration opposes four of the seven bills.

That is understandable. The Gramm-Latta-Reagan budget has a $38 billion deficit for fiscal year 1982. President Reagan must oppose all new spending programs and cut existing ones.

Mark this. The Reagan budget for fiscal year 1983 projects a deficit of $23 billion if additional spending cuts of $30 billion are made by Congress.

The question is which veterans' programs will be on the chopping block a year from now as part of that $30 billion in new, unspecified cuts which must be made.

ARTS RESCISSIONS

(Mr. WEISS asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WEISS. Mr. Speaker, the unfairness and callousness of the Reagan administration seems to have no limits. I was shocked to learn of the further cuts in 1981 funding being proposed by the administration, all third quarter fiscal year 1981 funds for the national endowments for the arts and humanities have been frozen pending a rescission in these areas totaling $58 million. That is this quarter we are in. These proposals are a breach of both contract and faith with arts and cultural groups. The freeze alone threatens irreparable damage to many arts and cultural organizations who have already budgeted these moneys for their activities. In light of the massive cuts under consideration for fiscal 1982, these rescissions would impose additional and unexpected hardship upon groups now fighting for their very survival.

For example, the Joffrey Ballet Co. of New York City depends on the revenues they receive from their national tour to cover over 50 percent of their annual operating expenses. The recent freeze on arts endowment funds jeopardizes most of the revenues they expected to earn on their 12-city tour, now in progress, if sponsoring agencies in the host cities fail to receive their third quarter payments from the NEA. The remainder of the tour could be canceled. It would be difficult, if possible at all, for the Joffrey to recover

from such a financial blow. In addition, the loss of funding would be needlessly destructive to the local economies that benefit enormously from these cultural activities and from the relatively modest Federal investment in the arts.

The Joffrey Ballet is not alone in this situation. Many other organizations in New York and around the country would face similar disasters. I cannot urge my colleagues strongly enough to oppose any cuts in 1981 funding for the arts and humanities.

THE MILITARY CONSTRUCTION AMENDMENT WOULD HOLD UP MX MISSILE SYSTEM

(Mr. SIMON asked and was given permission to address the House for 1 minute.)

Mr. SIMON. Mr. Speaker, I join my colleague, the gentleman from New York (Mr. WEISS), in his concern over the drastic cuts in arts and humanities, and I will have more to say about that within a few days.

My immediate reason for taking time at this point is to point out that when we get to the Military Construction Authorization Act, I will have an amendment which would hold up any further funding of the racetrack MX missile system until the President's committee makes its recommendation. I will be joined in support of this amendment by my colleagues, the gentleman from Utah (Mr. MARRIOTT), the gentleman from Utah (Mr. HANSEN), and the gentleman from Nevada (Mr. SANTINI).

IN OPPOSITION TO THE ADMINISTRATION'S MODIFICATIONS OF THE SOCIAL SECURITY SYSTEM

(Mr. MATSUI asked and was given permission to address the House for 1 minute.)

Mr. MATSUI. Mr. Speaker, I rise to speak in opposition to President Reagan's recommended alterations of our Nation's social security system. I share the concern of my outraged constituency that these drastic changes will unfairly penalize current social security beneficiaries and those hard-working Americans approaching retirement.

The principal flaw of President Reagan's proposal is the immediacy of its harsh effect. Conscientious citizens have no opportunity to prepare for these severe cutbacks in fundamental retirement benefits. The President has pulled out the safety net without a warning.

While I fully support the need to assure the fiscal viability of the social security system, I believe far more equitable solutions are possible. For instance, the Ways and Means Subcommittee on Social Security has recommended in H.R. 3207 a phase-in formula approach to commence in 1990. In contrast to the President's suggestion, this formula would not disrupt pending retirement plans of working Americans.

As the Congress addresses this difficult task, it must exercise caution and due regard for the interest of social security beneficiaries. It must be remembered that the social security system is the primary means by which retired Americans have guaranteed their financial security.

This security must not be sacrificed in the interest of fleeting political expediency. The conscience and compassion of the Nation cannot allow this to occur.

WHAT IS FAIR IN SOCIAL SECURITY?

(Mr. O'BRIEN asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. O'BRIEN. Mr. Speaker, remarks about the unfairness of the Reagan program do not just upset me; they turn my stomach. Let us talk about what is really fair.

When the program was developed by President Roosevelt years ago, we were living to be about 63 years of age, and every hard-working laborer willingly contributed $30 a year to the program. Now we are living to be about 76, and the laborers, most of them, are contributing about $2,000 a year, and many of them think they want to opt out because if they do not, they feel they will never get anything.

Let me point out one other thing with respect to the 62-year retirement age. Look at it from the standpoint of life expectancy. Two people are arriving at the age of 61 and deciding what to do. One takes early retirement, and one elects to work 3 more years. If they both live to the age of 76, the early retiree gets more retirement dollars than the 65-year retiree. Meanwhile the 65-year-old is continuing to contribute into the system and risking himself in the stress he has in his regular employment.

Mr. Speaker, when it comes to fair play, I think the arguments against the President's program simply lack foundation in fact.

COORDINATION OF SEVERE STORMS RESEARCH NEEDED

(Mr. WINN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WINN. Mr. Speaker, I am introducing today a bill entitled the Severe Storms Advisory Committee Act of 1981. The purpose of the advisory committee would be to review, on an annual basis, the severe storms research and operations activities of the Federal Government.

Mr. Speaker, this legislation is badly needed. For example, several weeks ago eight tornadoes splintered houses and barns across Oklahoma and Kansas and violent thunderstorms caused considerable damage in the Mississippi Valley. Unfortunately, this is not an infrequent occurrence. Much of the Nation is plagued by such storms for large portions of each year.

The advisory committee established by this bill would assess current objectives and milestones of the severe storms forecasting program, recommend initiation of any needed new programs, and recommend incorporation of new technological developments into the operational forecasting system. The committee would thus tie together the Federal effort in this area. The National Oceanic and Atmospheric Administration (NOAA) would take the lead, in cooperation with DOD, NASA, FAA, and the Federal Emergency Management Agency. The committee would not exceed 12 members and its life would be limited to 5 years. No new authorization is provided by the bill. The personnel, facilities, and needed services are to be provided by the agencies involved.

I urge the Committee on Science and Technology to take prompt action on this necessary legislation.

SOCIAL SECURITY AND THE SAFETY NET

(Mr. LUNGREN asked and was given permission to address the House for 1 minute, and to revise and extend his remarks.)

Mr. LUNGREN. Mr. Speaker, it seems that over the last couple of weeks we have had many Members take the well and talk about social security. I have done that. I have requested that we turn the rhetoric down and prepare to talk and come up with some alternatives. But as I return to the well, I constantly hear from the other side of the aisle criticisms of this President, some Members accusing him of destroying the safety net because of his recommendations on social security.

Let us make one thing very clear. Those who have destroyed the safety net on social security for the people of this country are those in this Congress who, through their spending and their taxing policies, have allowed inflation to take more and more from our retirement bases than the people were able to put into their savings accounts and into the social security system over the years.

Last week I was in my district and attended a classroom attended by social security recipients or at least people of that age group. When I discussed the issue with them, they were

not berating the President. They wanted to know what we were going to do to make that system solvent; they were giving the President credit for at least having the guts to talk about the problem.

Some have said that we have had committees in this House working on the program. That is fine. Everybody has worked on it, but where have their answers been? Four years ago we in this House promised the American people we would solve the problem of social security from now until the 21st century. Four years does not make a century, but it does make a great deal of mischief.

Mr. Speaker, we ought to have the guts to follow the President, give him some advice, and help him come up with a solution to the problem so we can indeed save the social security program for the people.

CUBAN BROADCAST INTERFERENCE HEARINGS ANNOUNCED

(Mr. FASCELL asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. FASCELL. Mr. Speaker, as chairman of the Subcommittee on International Operations of the House Committee on Foreign Affairs, I would like to draw your attention to a series of hearings planned by the subcommittee to discuss an issue which will touch the everyday lives of many Americans. The subject of the hearings is the upcoming Region II Administrative Radio Conference where the nations of the Western Hemisphere will renegotiate international agreements governing AM broadcasting. The results of this conference will affect the ability of AM radio stations to broadcast without interference and to maintain the quality of radio services received by the American public.

Within the range of conference issues is the problem of Cuban interference with U.S. broadcasting activities. At present, Cuban broadcasting practices interfere with U.S. radio stations in Florida, the Gulf Coast States, and a number of other States throughout the Nation as far north as Maine and as far west as Washington. New proposals for more high-powered stations, which are being discussed by the Cuban Government and which will be aired at the November conference in Rio de Janeiro, could further aggravate this problem and cause increased levels of interference in radio broadcasts as far away as Alaska and Hawaii.

Testifying at the subcommittee hearings on June 4 and 10 will be representatives of the Department of State, the National Telecommunications and Information Administration—Department of Commerce—the FCC, and experts from the private sector who will discuss the effects on U.S. broadcasters of conference issues which include channel spacing, transmitter power, and frequency allocation.

A CALL FOR A BIPARTISAN TAX BILL

(Mr. LOTT asked and was given permission to address the House for 1 minute.)

Mr. LOTT. Mr. Speaker, I think we are seeing more and more every day now why we on this side of the aisle were so concerned about the ratio being put in place earlier this year on the Ways and Means Committee. They have the majority that refuses to even make an effort to work out a bipartisan compromise tax bill.

It is time for that bill. We have got to work on it. The Speaker has indicated as recently as yesterday that there would be a tax bill on the President's desk by August 1.

Must we fight about this? The President has again and again said, "I want to work with the Congress."

Mr. Speaker, let us work together in a bipartisan effort. The President has gone the extra mile. It is time now to get together on a reasonable tax bill.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore (Mr. ALEXANDER). Pursuant to the provisions of clause 5 of rule I, the Chair announces that he will postpone further proceedings today on each motion to suspend the rules on which a recorded vote or the yeas and nays are ordered, or on which the vote is objected to, under clause 4 of rule XV.

U.S. INTERNATIONAL TRADE COMMISSION AND CUSTOMS SERVICE AUTHORIZATIONS

Mr. GIBBONS. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 2540) to authorize appropriations for the U.S. International Trade Commission, the U.S. Customs Service, and the Office of the U.S. Trade Representative for fiscal year 1982, and for other purposes, as amended.

The Clerk read as follows:

H.R. 2540

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

TITLE I—AUTHORIZATION OF APPROPRIATIONS

SECTION 101. UNITED STATES INTERNATIONAL TRADE COMMISSION.

Paragraph (2) of section 330(e) of the Tariff Act of 1930 (19 U.S.C. 1330(e)(2)) is amended to read as follows:

"(2) There are authorized to be appropriated to the Commission for necessary expenses for fiscal year 1982 not to exceed $18,501,000. No part of any sum that is appropriated under the authority of this paragraph may be used by the Commission for the making of any special study, investigation, or report that is requested by any agency of the executive branch unless that agency reimburses the Commission for the cost thereof.".

SEC. 102. UNITED STATES CUSTOMS SERVICE.

Section 301 of the Customs Procedural Reform and Simplification Act of 1978 (19 U.S.C. 2075) is amended—

(1) by inserting "(a)" immediately after "SEC. 301."; and

(2) by inserting at the end thereof the following:

"(b) There are authorized to be appropriated to the Department of the Treasury not to exceed $480,001,000 for the salaries and expenses of the United States Customs Service for fiscal year 1982.

"(c)(1) No part of any sum that is appropriated under the authority of subsection (b) may be used—

"(A) for administrative expenses to pay any employee of the United States Customs Service overtime pay in an amount exceeding $25,000; or

"(B) to implement any procedure relating to the time of collection of estimated duties that shortens the maximum 10-day deferment procedure in effect on January 1, 1981.

"(d) For the fiscal year beginning October 1, 1981, and for each fiscal year thereafter, there are authorized to be appropriated to the Department of the Treasury for salaries of the United States Customs Service such additional sums as may be provided by law to reflect pay rate changes made in accordance with the Federal Pay Comparability Act of 1970.".

SEC. 103. OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE.

Section 141(f) of the Trade Act of 1974 (19 U.S.C. 2171(f)) is amended to read as follows:

"(f)(1) There are authorized to be appropriated to the Office for the purpose of carrying out its functions $10,000,000 for fiscal year 1982; of which not to exceed $40,000 may be used for entertainment and representation expenses.

"(2) For the fiscal year beginning October 1, 1981, and for each fiscal year thereafter, there are authorized to be appropriated to the Office for the salaries of its officers and employees such additional sums as may be provided by law to reflect pay rate changes made in accordance with the Federal Pay Comparability Act of 1970.".

TITLE II—FUNCTIONS AND POWERS OF THE OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

SEC. 201. FUNCTIONS AND POWERS.

(a) BASIC AMENDMENTS TO THE TRADE ACT OF 1974.—Section 141 of the Trade Act of 1974 (19 U.S.C. 2171) is amended as follows:

(1) Subsection (c) is amended by redesignating paragraph (2) as paragraph (3), and by inserting immediately after paragraph (1) the following new paragraph:

"(2) The United States Trade Representative may—

"(A) delegate any of his functions, powers, and duties to such officers and employees of the Office as he may designate; and

"(B) authorize such successive redelegations of such functions, powers, and duties to such officers and employees of the Office as he may deem appropriate.".

(2) Subsection (d) is amended—

(A) by inserting ", powers and duties" immediately after "functions" in paragraph (3);

(B) by striking out "and" after the semicolon at the end of paragraph (6);

(C) by striking out the period at the end of paragraph (7) and inserting in lieu thereof a semicolon; and

(D) by adding immediately after such paragraph (7) the following:

"(8) pay for expenses approved by him for official travel without regard to the Federal Travel Regulations or to the provisions of subchapter I of chapter 57 of title 5, United States Code (relating to rates of per diem allowances in lieu of subsistence expenses);

"(9) accept, hold, administer, and utilize gifts, devises, and bequests of property, both real and personal, for the purpose of aiding or facilitating the work of the Office; and

"(10) acquire, by purchase or exchange, not more than two passenger motor vehicles for use abroad, except that no vehicle may be acquired at a cost exceeding $9,500.".

(3) Subsections (b)(3), (g), and (h) are repealed.

(4) Such section (including the section sideheading) is further amended—

(A) by striking out "Special Representative for Trade Negotiations" each place it appears therein and inserting in lieu thereof "United States Trade Representative";

(B) by striking out "Deputy Special Representatives for Trade Negotiations" in subsection (b)(2) and inserting in lieu thereof "Deputy United States Trade Representatives"; and

(C) by striking out "Deputy Special Representative" and "Deputy Special Representative for Trade Negotiations" each place it appears in subsections (b)(2) and (c)(3) and inserting in lieu thereof "Deputy United States Trade Representative".

(b) CONFORMING AMENDMENTS TO TRADE ACT OF 1974.—(1) The chapter heading for chapter 4 of title I of the Trade Act of 1974 is amended to read as follows:

"Chapter 4—OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE".

(2) The table of contents of such Act relating to such chapter 4 is amended to read as follows:

"Chapter 4—OFFICE OF THE UNITED STATES TRADE REPRESENTATIVE

"Sec. 141. Office of the United States Trade Representative.".

(c) CONFORMING AMENDMENTS TO TITLE 5.—(1) Section 5312 of title 5, United States Code, is amended by striking out:

"Special Representative for Trade Negotiations." and inserting in lieu thereof

"United States Trade Representative.".

(2) Section 5314 of such title is amended by striking out:

"Deputy Special Representatives for Trade Negotiations (2)."

and inserting in lieu thereof

"Deputy United States Trade Representative (2).".

TITLE III—MISCELLANEOUS CUSTOMS PROVISIONS

SEC. 301. ORGANIZATION AND MANAGEMENT OF THE UNITED STATES CUSTOMS SERVICE.

The Secretary of the Treasury shall take such action as may be necessary to ensure that—

(1) the United States Customs Service is administered by the close of fiscal year 1983 through not more than 6 regional offices and 35 district offices; and

(2) by the close of fiscal year 1982 the aircraft fleet of the United States Customs Service consists of not more than 45 aircraft.

SEC. 302. INCREASE IN VALUE LIMITATIONS FOR CERTAIN CUSTOMS PURPOSES.

(a) INCREASE IN VALUE LIMITATIONS ON ARTICLES ADMINISTRATIVELY EXEMPTED FROM DUTY.—Section 321(a) of the Tariff Act of 1930 (19 U.S.C. 1321(a)) is amended—

(1) by striking out "$10" in paragraph (1) and inserting in lieu thereof "$20";

(2) by striking out "$25" and "$40" in paragraph (2)(A) and inserting in lieu thereof "$50" and "$100", respectively;

(3) by striking out "$25" in paragraph (2)(B) and inserting in lieu thereof "$50"; and

(4) by striking out "$5" in paragraph (2)(C) and inserting in lieu thereof "$10".

(b) INCREASE IN LIMITATION ON VALUE OF ARTICLES SUBJECT TO SUMMARY FORFEITURE.—(1) Section 607 of the Tariff Act of 1930 (19 U.S.C. 1607) is amended—

(A) by striking out "VALUE $10,000 OR LESS" in the heading thereto and inserting in lieu thereof "ADMINISTRATIVE FORFEITURE"; and

(B) by striking out "$10,000" each place it appears in the text thereto and inserting in lieu thereof "$15,000".

(2) Section 610 of the Tariff Act of 1930 (19 U.S.C. 1610) is amended—

(A) by striking out "VALUE MORE THAN $10,000" in the heading thereto and inserting in lieu thereof "JUDICIAL FORFEITURE"; and

(B) by striking out "$10,000," in the text thereto and inserting in lieu thereof "the maximum value specified in section 607 of this title,".

(3) Section 612 of the Tariff Act of 1930 (19 U.S.C. 1612) is amended by striking out "$10,000," and inserting in lieu thereof "the maximum value specified in section 607 of this title,".

(c) INCREASE IN FAIR RETAIL VALUE LIMITATION ON IMPORTS UNDER PERSONAL EXEMPTION.—Subpart A of part 2 of schedule 8 of the Tariff Schedules of the United States (19 U.S.C. 1202) is amended—

(1) by striking out "$300" in item 813.30 and inserting in lieu thereof "$400"; and

(2) by striking out "$600" and "$300" in item 813.31 and inserting in lieu thereof "$800" and "$400", respectively.

(d) INCREASE IN FAIR RETAIL VALUE LIMITATION ON CERTAIN NONCOMMERCIAL IMPORTATIONS.—Part 6 of schedule 8 of the Tariff Schedules of the United States (19 U.S.C. 1202) is amended by striking out "$600" in the article description immediately preceding item 869.00 and inserting in lieu thereof "$800".

(e) EFFECTIVE DATES.—The amendments made by subsections (a), (c), and (d) shall apply with respect to importations made after September 30, 1981.

(2) The amendments made by subsection (b) shall apply with respect to seizures made after September 30, 1981.

SEC. 303. AMENDMENTS REGARDING CUSTOMS SERVICES FOR PRIVATE AIRCRAFT AND VESSELS.

(a) AMENDMENTS.—Section 53(a) of the Airport and Airway Development Act of 1970 (49 U.S.C. 1741(a)) if amended—

(1) by striking out "on or after July 1, 1970"; and

(2) by striking out "$25" and inserting in lieu thereof "$50".

(b) EFFECTIVE DATE.—The amendments made by subsection (a) shall apply with respect to services performed after September 30, 1981.

SEC. 304. JOINT UNITED STATES-CANADIAN CUSTOMS OPERATIONS.

The President is urged to enter into negotiations for purposes of reaching an agreement with the Government of Canada under which customs facilities can be constructed, maintained, and operated by the United States and Canada on a joint basis at those border crossings where the volume of traffic does not warrant the provision of separate customs facilities by each Government.

SEC. 305. TEST AND EVALUATION OF CERTAIN CUSTOMS PROCESSING.

During fiscal year 1982, the United States Customs Service, Department of Agriculture, and the Immigration and Naturalization Service shall conduct 6-month tests in at least two major international airports of new Federal inspection systems that would result in the facilitation of passenger entry into the United States. The Commissioner of Customs, the Commissioner of Immigration and Naturalization, and the Secretary of Agriculture (or his designee) shall submit to the Congress a joint report containing the results and an evaluation of such tests, including, but not limited to (1) data on the differences, if any, between the new systems of processing and traditional processing with respect to revenue collections, seizures in the enforcement of both agricultural and customs laws, and processing times; and (2) an assessment regarding whether any of the new systems have potential for manpower savings.

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from Florida (Mr. GIBBONS) will be recognized for 20 minutes, and the gentleman from Michigan (Mr. VANDER JAGT) will be recognized for 20 minutes.

The Chair now recognizes the gentleman from Florida (Mr. GIBBONS).

Mr. GIBBONS. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, let me first say that trade policy and the carrying out of trade policy has never been a partisan issue in the years I have been in Congress. The Republicans and Democrats have worked together to carry out a common purpose. We are here today to discuss the mechanics by which we implement the policy that we have set here.

The bill before the House, H.R. 2540, provides an authorization of appropriations for fiscal year 1982 for three international trade agencies under the jurisdiction of the Ways and Means Committee.

The authorization levels provided in this bill are fully consistent with and fully support President Reagan's budget. We adopted the numbers requested by the President for the Customs Service and the Office of the Trade Representative, thus achieving a $30,258,000 reduction over the original budget requests of January. For Customs, we are providing an authorization of $480,001,000. This is a reduction from the January budget estimates for fiscal year 1981 of $495.6

million. In other words, Customs is taking an absolute cut; its budget numbers will be lower in fiscal year 1982 than in fiscal year 1981—despite inflation and a growing Customs workload. Customs manpower will be reduced from 13,280 in fiscal year 1980 to 12,703 in fiscal year 1982. For the Office of the Trade Representative, we are providing $10 million. This figure is $633,000 above the fiscal year 1981 estimated budget—an increase of 6 percent.

For the International Trade Commission, we adopted the figure requested by that agency—$18,501,000. The ITC, which is a quasi-judicial, independent agency designed to provide special services to the Congress, submits its budget directly to the Congress and does not clear its budget through OMB. Therefore, over the years, the Ways and Means Trade Subcommittee has been careful to provide especially severe oversight of the Commission's operations. The Commission's budget is only $790,000 or 4.4 percent more than its total fiscal year 1981 budget, assuming the enactment of the pay increase supplemental. There will be no increase in the Commission's staff. Therefore, we believe that the ITC's budget is a very tight one and should be supported as submitted.

There are several items of particular interest in title III of the bill relating to the Customs Service.

Because of the cut in the Customs budget, the continued inflation, and Customs growing workload, we desperately need to find ways to make the operations of Customs more efficient, to eliminate unnecessary tasks and low priority programs. Therefore, we have proposed several changes in the laws affecting Customs operations, which we estimate may save about $14 million per year beginning in fiscal year 1983 and thereafter.

Several of these proposals have evoked questions.

In one case, the bill requires that by the end of fiscal year 1983, Customs be operated out of no more than 6 regional offices and 35 district offices. This is a reduction of at least 3 regions and 11 districts. We have not spelled out in the bill which offices are to be closed and I have no idea which offices Customs management and analysts may eventually select for closing. But let me say, that over the past 17 years there have been 12 studies on Customs' field organization and all of those studies have found a need for fewer offices. Closing some of these headquarters offices will result in cost savings, reduced overhead, and increased efficiency. It is a time to end the studying and to act. By mandating the closings, we intend to give Customs the political backbone to make the hard choices of which offices to close. There are some who are questioning this provision. We can no longer play pork barrel politics with the budget. The present Customs field structure is a product of 200 years of gross pork barreling and the Nation's taxpayers demand an end to it. Some may argue that this proposal and the $7-plus million it will save are not in the President's budget. That is a strange argument. Of course, the Congress can make additional savings and efficiencies above and beyond the President's budget. This is what our oversight function is for.

Second, because of the extraordinary budget tightness facing Customs, we must find new more efficient ways to inspect arriving passengers and cargo. This is particularly important, because at some of our Nation's airports, it already takes up to 2 hours or more to clear Customs—and this is before the planned budget cuts.

The General Accounting Office has recommended several new ways of processing passengers. Primarily, these new methods center on one-stop inspection and the preliminary interviewing of passengers before they receive their luggage or pit baggage from the aircraft. GAO believes that these new methods, variations of which are used in many foreign nations, can be tried without impairing law enforcement. Therefore, the committee's bill provides for 6 month tests at at least two major international airports of new ways of processing passengers. We have taken great care to work with USDA to insure that such tests are jointly developed and administered and evaluated by Customs, Agriculture, and the Immigration and Naturalization Service so that the concerns of each of these agencies are addressed. In particular, we are concerned that the current systems of protecting the country against the importation of infected or diseased animals and plants be continued without change. We believe that the committee's amendment providing for joint agency development of tests—which will not—I repeat, not—be the so-called red door/green door type of system—satisfies the concerns of the American agricultural community about the dangers of the entry of exotic plant and animal diseases.

Finally, I would just like to say that I wish we could provide a larger budget for Customs. It is a well-run agency of dedicated public servants. It is a revenue raising agency. I hope that in fiscal year 1983, the administration will support a significant growth in its budget. This year, however, the demands for less Government spending require this budget reduction. It will mean some hardships and some delays in the processing of goods and merchandise. We hope that with the creative management which has been demonstrated by Customs in recent years, that they will use this budgetary crisis to find new and better ways of doing the really essential tasks.

Mr. Speaker, I have covered the main points of the bill and the principal controversial sections. I urge the Members to support this bill as one which meets the Nation's immediate budget needs while also including some long-range improvements in the operation of the Customs Service.

□ 1230

Mr. Speaker, I reserve the balance of my time.

Mr. VANDER JAGT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the distinguished chairman of the Subcommittee on Trade has explained the content of H.R. 2540, which I rise to support. Under his very distinguished bipartisan leadership, through extensive hearings and markups, he has worked together with the minority and the administration to fashion a bill which now has the unanimous support of the committee. I commend him for his leadership and urge my colleagues to support the bill.

Mr. Speaker, I support H.R. 2540, a bill authorizing appropriations for the U.S. International Trade Commission, the U.S. Customs Service, and the U.S. Trade Representative for fiscal year 1982. It is heartening to be considering this bill so early in the session since last year it failed to be scheduled at all and often the appropriations bill comes to us first in spite of House rules that require prior passage of authorization legislation.

As described by my colleague, H.R. 2540 authorizes for fiscal year 1982 $18.5 million for the International Trade Commission (ITC), $480 million for the Customs Service, and $10 million for the USTR. All of these amounts represent austere budgets consistent with our overall efforts to control Government spending and reduce the Federal budget deficit. In the case of the Customs Service, the authorization reflects a 3.1-percent reduction over fiscal year 1981 levels.

In addition to the amounts authorized, H.R. 2540 contains statutory language and important report language that address congressional concerns regarding the operations of these agencies. For example, the bill contains a provision which increases from $20,000 to $25,000 the cap on the amount of overtime pay which may go to any Customs employee and urges Customs management to continue to monitor the allocation of overtime.

The increase in the cap will alleviate the administrative burden and additional cost of complying with the more restrictive cap which should be helpful at a time when the hiring freeze will mean fewer inspectors to share the

overtime workload. Yet the cap helps to curtail escalating costs in general as well as ease the problems which have arisen among Customs personnel.

Because the reduced budget for the Customs Service will necessarily put pressure on services provided to the traveling public, H.R. 2540 provides for 6-month tests of new systems of facilitating passenger processing at at least two major international airports. These tests would be determined and carried out by three agencies: Customs, Agriculture's Animal Plant Health Inspection Service (APHIS) and the Immigration and Naturalization Service (INS). There has been some concern that speeded-up processing would mean the entrance of plant or animal pests and diseases. The bill provides for the active participation of the Department of Agriculture in the processing tests and in any resulting new systems.

The bill also prohibits the use of appropriated funds to implement any mechanism for the collection of estimated customs duties that provide for less than a 10-day deferment in the collection of such duties. Congressional intent in this regard has been firmly expressed on three previous occasions in the report language of both the Customs Procedural Reform Act (Public Law 95-410) and the fiscal year 1980 and 1981 authorization bills for the U.S. Customs Service.

Although the present administration has announced no plans to change the present deferment period, the committee wants a definitive statement that finally will put this matter to rest. Thus, H.R. 2540 provides a statutory prohibition against any shortened deferment period.

I would like also to mention the concern of the Ways and Means Committee with respect to the reorganization of the structure of the Customs Service which is addressed in this bill. The committee has pressed Customs for several years to reduce the number of its regional offices and to otherwise streamline its operations so that resources are concentrated at the district and port locations where the important direct services are delivered. Although Customs has taken significant steps to improve the efficiency and effectiveness of the agency, it has not moved to reduce the number of regional offices. The bill mandates reducing the number of regional offices from 9 to 6 and the number of district offices from 46 to 35 by the end of fiscal year 1982 to help the need for Government cost savings and efficiency.

Finally, the bill makes changes in the personal exemptions and simplified duties applied to merchandise brought back into the United States by the traveling public. We have also made changes in the reimbursements required for certain special customs services. These changes are an effort to set realistic value levels that take into account inflation—a trend that began with the Customs Procedural Reform Act.

Therefore, the personal exemption for returning residents would be increased from $300 to $600 and from $600 to $800 in those cases where an individual is returning from the insular possessions. Also, above the personal exemption, the flat 10-percent rate of duty—5 percent in case of the insular possessions—would be applied to the next $800 worth of noncommercial entries rather than $600 as in current law.

Mr. Speaker, H.R. 2540 is an important authorization bill that addresses a broad range of issues that are of ongoing concern for the Congress. I urge my colleagues to give this bill their unqualified support.

Mr. GIBBONS. Mr. Speaker, I thank the distinguished ranking minority member of the committee. I have found that it is a pleasure to work with him and to work with all the members of our committee. I pledge that we will continue that kind of cooperation.

Mr. Speaker, I yield such time as he may consume to the gentleman from Florida (Mr. IRELAND), who has a question.

Mr. IRELAND. Mr. Speaker, while the committee has attempted to insure that any new methods of speeding the processing of passengers as the gentleman from Florida alluded to, through Customs protects the American agricultural community against the introduction of foreign animal and plant pests and diseases, I continue to have serious concerns.

I would like to ask my colleague from Florida whether it is the intention that in these tests, there will be no reduction in the level of inspection designed to insure the enforcement of the Nation's plant and animal health laws?

Mr. GIBBONS. The committee is very clear on that point. There will be no reduction of the level of inspection. The Subcommittee on Trade and the General Accounting Office will be monitoring the development and conduct of these tests very closely. The USDA's Animal and Plant Health Inspection Service will be an equal participant in the design and implementation of the studies. As a fellow Member from the State of Florida, I certainly share the concern of the entire State delegation on this matter.

Mr. IRELAND. I thank the gentleman. I am further concerned that in fact, the current level of enforcement of the Nation's agricultural health laws is already inadequate. It is a miracle that there have not been more, costly outbreaks of animal and plant epidemics.

I think part of the problem is that the traveling public and the customs officers themselves do not place a high priority on the enforcement of these agricultural laws. Under Customs laws, the penalty for bringing in a possibly diseased agricultural product is simply the forfeiture of that item. A failure to report the item to a Customs officer under questioning means a penalty equal to the value of the item. In the case of infested fruit or meat products carried by the general public, this is a miniscule amount. It is no deterrent at all.

Also, under the agricultural laws, there is a criminal penalty for a violation of the animal and plant quarantine laws. But that is never used; it is too laborious. The U.S. attorneys simply will not touch it. Therefore, it is no deterrent.

For that reason, the gentleman and I have introduced today legislation which we feel will provide a practical deterrent. I have explained it in detail in my floor statement, but for the present, I would suggest that we should think of it as analogous to a costly traffic ticket which would be assessed, rather than an impressive sounding potential penalty which would never be assessed.

The point here is to stop people, not to have a law engraved in granite which stops nothing.

Can the gentleman, the cosponsor of this bill comment on when the committee may be able to consider this legislation?

Mr. GIBBONS. The gentleman makes a number of excellent points. I am very pleased to be a cosponsor of this penalty-for-failure-to-declare legislation. This type of measure is essential for insuring the better enforcement of our Nation's laws relating to animal and plant health. My Subcommittee on Trade will schedule this bill for consideration during our upcoming round of hearings on small tariff bills. While I cannot speak for the entire membership of the subcommittee, I believe it has an excellent chance of passage.

Let me make several other points.

In the conduct of these tests, I expect that Customs will develop some new, informative literature, in various languages, for the traveling public explaining the travelers obligation to meet national laws. In these pamphlets, I hope that more can be done to stress the importance of complying fully with the agricultural health laws.

Last, as you know, the Carter administration proposed legislation which would establish a system of civil penalties for the violation of these health laws. That proposal was introduced in 1980 in the Senate as S. 2956. It was not introduced in the House. I understand that this year OMB is reviewing

the situation to determine whether USDA can again request this legislation. This legislation is a matter which would be under the jurisdiction of the House Agriculture Committee, and I hope concerned members will explore the possibility of that legislation.

Mr. IRELAND. I thank the gentleman for his kind words of support for my legislation, and for his hard work and support to protect the agricultural interests of our State and our Nation.

As I have often said, no one who has ever stood in line in Miami, or Tampa, or any of our major international airports can be insensitive to the need to facilitate our traveling public—and our guests—more expeditiously.

But at the same time we cannot let an airport traffic management problem override the health and welfare of our agricultural industry. That is self-evident, and I welcome the support of the gentleman and the committee as we work in the future with Customs, Agriculture, and all appropriate officials and agencies to make sure that our Nation's agricultural interests are fully protected.

Mr. GIBBONS. Mr. Speaker, I thank the gentleman. As one Member of Congress who has observed the terrible damage that these imported diseases can do to our plants and animals and to the economy of this Nation, I assure the gentleman that I do not intend to stand by and watch these very helpful protective measures be sacrificed just for passenger convenience.

Mr. Speaker, I yield such time as he may consume to the gentleman from Oregon (Mr. AUCOIN).

Mr. AUCOIN. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I understand the need for cost savings in the Customs Service, and though I understand that, I am concerned that in closing some regional or district offices, there may be a reduction in services to the local trading community and that this might, in turn, lead to a diversion of trade away from certain ports and to areas which still retain a Customs headquarters.

I am wondering if the distinguished chairman, the gentleman from Florida, would comment on this concern?

□ 1245

Mr. GIBBONS. Mr. Speaker, will the gentleman yield?

Mr. AUCOIN. I am happy to yield to the gentleman from Florida (Mr. GIBBONS).

Mr. GIBBONS. Mr. Speaker, I know that this is a fear among importers and exporters in a number of cities. But I want to stress, as strongly as I possibly can, that the committee does not intend for there to be any reduction in service to the trading community—merely a reduction in overhead and layers of bureaucracy. Indeed, we expect that service to the public will be improved by these closings, since they will free up personnel to work with the public directly, rather than maintain unneeded headquarters staffing.

We stress this point in our committee report on page 10, where we say:

The Committee does not expect most personnel from these closed headquarters operations to be transferred to other headquarters; rather, they are to be moved into line operations.

I would also like to quote from a 1978 GAO study on the need for Customs to close some of these headquarters. The GAO said, and I quote:

The negative effects of retaining the existing (organizational) structure are felt by all those served by Customs because fewer resources are available to meet day-to-day operating requirements. Having fewer regions and districts would allow Customs to reduce overhead and reassign personnel to day-to-day operations.

Mr. AUCOIN. I thank the gentleman. Is it also your understanding that Customs has not yet decided on what facilities to close and that decisions on closures will be based on up-to-date information on workloads and trade trends.

Mr. GIBBONS. The gentleman is correct. That is our understanding.

Mr. Speaker, I now yield such time as he may consume to the gentleman from Kansas (Mr. GLICKMAN).

Mr. GLICKMAN. Mr. Speaker, I thank the gentleman for yielding and would ask two questions of the distinguished gentleman from Florida (Mr. GIBBONS). The first question concerns the same issue the gentleman from Oregon (Mr. AUCOIN) raised, the closing of three regional offices and nine district offices.

The committee report notes that the personnel which will be freed up by closing those offices will be transferred to ports of entry to provide direct service. Has the committee given any consideration at this point to just where those personnel might be reassigned? I ask this because of a problem I am trying to work out with the Customs Service. At the point of entry at Mid-Continent Airport in Wichita, there are only 3 Customs Service personnel who handled 5,250 entries last year while at another point of entry in an adjacent State, the Customs Service had 9 staff members to handle 5,837. Would the committee agree that as personnel are freed up, they should be shifted to facilities like that in Wichita which are short staffed?

Mr. GIBBONS. Mr. Speaker, will the gentleman yield?

Mr. GLICKMAN. I am happy to yield to the gentleman from Florida.

Mr. GIBBONS. Mr. Speaker, the gentleman is correct; the purpose of closing headquarters offices is to free up personnel to serve the public.

I must advise the gentleman that with the cut in Customs budget and its decline in manpower, even closing headquarters staffs will not substantially reduce the demands on Customs manpower. Further, I would expect most of the staff at closed headquarters offices to switch to "port-of-entry" type work in the same area. Nevertheless, the only hope for increased manpower in the type of case you describe is through cutting some of these headquarters staffs. In the example you cite at Mid-Continent Airport, it certainly sounds as if staffing should be adjusted upward, and with your permission, I would like to inquire with Customs as to why immediate staffing adjustments could not be made so as to help at Wichita Airport.

Mr. GLICKMAN. I thank my colleague. I would ask one additional question.

I note the support the committee has given in its report to the one-stop inspections where one staff person handles both Customs Service and Immigration and Naturalization Service matters. That approach makes imminent sense in terms of maximizing service provided at the least cost. In the case of Wichita, we have those three Customs Service personnel, but no INS office. That has created some real problems most notably for the sizable aviation industry located in Wichita. It has meant that when a plane is flown into Wichita for business purposes or for repairs or modifications, any passengers other than crew can be diverted to the nearest INS office in Kansas City to be cleared for entry. A number of us in the Kansas congressional delegation have been working to get an INS office in Wichita for a number of reasons, but, short of that, it would certainly be a help if this one-stop service could be instituted there. Can you tell me, is it the view of the committee that one-stop service should be instituted in situations like this where there is a Customs Service point of entry but no INS staff to provide complementary services?

Mr. GIBBONS. I thank the gentleman for bringing this example to my attention. It is a classic example of unnecessary bureaucracy. The one-stop system and cross training of Customs inspectors is ideally designed for the type of situation you describe at Wichita. Again, with your permission, I would like to begin some discussions with Customs on a creative, nonexpensive way to handle the case you describe. In this time of budget austerity, it is absolutely essential that our border inspection services cooperate and coordinate to cut down on manpower needs and redtape.

Mr. GLICKMAN. I thank my colleague for his generous responses and urge the adoption of this bill.

Mr. GIBBONS. Mr. Speaker, I yield such time as she may consume to the gentlewoman from Louisiana (Mrs. BOGGS).

Mrs. BOGGS. Mr. Speaker, I am very concerned by the fact that title III of the bill before us includes a provision directing the U.S. Customs Service to reduce the number of regional offices from nine to six by the end of fiscal year 1983.

There is a strong suspicion on the part of those in the trade and maritime communities that this reorganization will result in the closure of regional office 5 which is located in New Orleans. This would make no sense whatsoever by any rational standard.

New Orleans is the Nation's leading port in tonnage for waterborne traffic. According to Corps of Engineers statistics, New Orleans surpassed the Port of New York in 1979 and became the Nation's premiere port.

New Orleans is the No. 6 port in the Nation in customs collections, which easily surpasses both Houston and Miami.

Ports in the State of Louisiana are rapidly growing and expanding; 35 percent of the Nation's waterborne commerce moves through Louisiana and some 13 percent of the Nation's total foreign waterborne trade is handled within the State.

Just last month, operations began at the Louisiana offshore oil port, which we call the Louisiana superport. This is the first true deep-draft port in the continental United States. It will handle a significant volume of the Nation's imported petroleum needs in the future.

Just 2 weeks ago I participated in hearings in New Orleans on the development of coal-handling facilities in our region. By all reports, New Orleans will likely experience a significant increase in coal and grain movement once the channel is dredged to a depth of 55 feet.

It therefore concerns me, Mr. Speaker, that at a time when there is the very definite potential for growth in trade activities in the New Orleans area that this House is considering legislation that could result in the closure of one of the key facilities that makes New Orleans a great port and that contributes to the orderly processing of customs revenues.

Could the gentleman from Florida please explain to me what criteria he expects the Treasury Department to use in determining the reduction in the number of customs regional offices?

Does the gentleman feel that growth trends in import activities should be an important factor in the development of plans for reorganizing the Customs Service?

Mr. GIBBONS. Mr. Speaker, will the gentlewoman yield?

Mrs. BOGGS. I am happy to yield to the gentleman from Florida.

Mr. GIBBONS. I thank the gentlewoman for bringing these observations. I will try to answer her questions.

Before I do, let me say I had the privilege of visiting New Orleans about 2 years ago. As I recall, when I was there, the gentlewoman informed me about the great growth of the Port of New Orleans and, of course, it is one of the historically great ports of the world. I would hope that the Customs Service would use criteria that are designed to achieve the greatest amount of good for every American and that they would be completely objective and use objective criteria in measuring the workload, the work demands on these various headquarters.

As the gentlewoman knows, the Customs Service is perhaps the oldest service rendered by our Government. It really was in existence before this Government came into existence, and it is a continuation of that. During that time conditions have vastly changed; communication is much more rapid and decisions can be made more centrally than they could in those days.

So I would hope that in developing this objective criterion by which to measure offices, that thorough consideration would be given to what are the needs of the community and how do the needs of that community stack up with the needs of other areas.

From what the gentlewoman has described to me about the activity of the Port of New Orleans, it would seem to me that headquarters as important as that would probably be maintained.

Mrs. BOGGS. I thank the gentleman.

Mr. Speaker, I would like to include in the RECORD a copy of a letter the Louisiana congressional delegation received last year from the executive director of the Port of New Orleans on this proposal to reorganize and reduce the regional office structure of the customs service:

PORT OF NEW ORLEANS,
March 5, 1980.

Hon. RUSSELL B. LONG,
U.S. Senator,
Russell Senate Office Building,
Washington, D.C.

Hon. J. BENNETT JOHNSTON,
U.S. Senator,
Russell Senate Office Building,
Washington, D.C.

Hon. LINDY (MRS. HALE) BOGGS,
U.S. Representative,
Longworth House Office Building,
Washington, D.C.

Hon. W. HENSON MOORE,
U.S. Representative,
Rayburn House Office Building,
Washington, D.C.

Hon. ROBERT L. LIVINGSTON,
U.S. Representative,
Cannon House Office Building,
Washington, D.C.

DEAR MRS. BOGGS AND GENTLEMEN: We are writing to bring to your attention the proposed closing of several Customs regions, with the strong possibility that New Orleans may be one of those to be closed. We are indebted to Mrs. Boggs for her enclosed letter of January 25, 1980, which alerted us to the proposed closings.

As background, the U.S. Customs Service nationally was last reorganized in 1966 based on the "Stover Report," which brought about the regionalization of Customs. That report, the only one of the many conducted over the past fifteen years in which the opinions of brokers, freight forwarders, steamship companies and importers were considered, recommended that the then existing 113 principal field offices and nearly 400 subordinate installations be reorganized into six regions. The result was a four tier structure, Headquarters, Region, District and Port designed to achieve uniformity and unity of command, permit increased delegation of authority, permit centralization of certain functions, and improve field administrative programs. The six regions were established using the following criteria: (1) grouping geographical areas having similar Customs activities and problems; (2) achieving a balance of workload among regions; and (3) maintaining a reasonable number of ports to be supervised. Using those criteria, the Boston, New York, Baltimore, New Orleans, San Francisco, and Chicago Regions were created. Intense Congressional and public interest resulted in the subsequent addition of three more regions in the cities of Miami, Houston, and Los Angeles for a total of nine.

While the Regional office performs the many functions mentioned above, one of its most important is coordinating the research efforts and on-going liaison involved in developing, implementing, and operating new trade and other programs such as the construction of the Louisiana Offshore Oil Port (LOOP). Regional representatives of Customs meet frequently with company officials and others to assure that the equipment at the LOOP conforms to government standards and this will reduce the paperwork and other problems for everyone involved. They then coordinate the flow of information to the rest of the staff and Custom's Headquarters.

The recent report of the General Accounting Office reiterates, as it has in previous reports, the desirability of a six regional configuration for Customs. It states that "six regions would provide for:

More balanced workload and personnel among regions.

Better groupings of regions into areas having similar activities and problems.

Greater uniformity of management over activities along the Mexican border."

In putting forth its recommendation, GAO repeats the assertions of the studies conducted since the Stover Report. Many of

those studies called for the abolishment of the New Orleans Region (among others) on irrelevant grounds—smaller workload, less personnel, fewer districts, and smaller collections. Having been tremendously reduced from its original size after large sections were carved out to create two additional regions, New Orleans was left with only two districts. Consequently, fewer personnel and reduced collections and workload are conditions which would naturally follow such an act.

The GAO study, like its predecessors, presents no original research, or new interpretation of events, no study of commercial conditions, but instead proposed reducing regions where it appears convenient. Instead of simply following the path of least resistance, Customs should apply a more imaginative and responsible approach to reorganization. It should conduct some new research into the number and location of firms engaged in international commerce, the trade routes of various lines, programs in progress which will affect Customs and the community, and the existing and potential workload.

With those facts in hand, a more thoughtful decision may be reached.

A very significant set of statistics that dramatically illustrates the greater business volume carried out by the New Orleans Customs District as compared to Houston and Miami is shown by the enclosed collections comparison for Calendar Year 1979 as compared to Calendar Year 1978. This enclosure shows that New Orleans ranked No. 6 in the nation, with total collections of almost $374 million, as compared to Houston with $270 million, and Miami not even ranking within the top 15 in the nation. Of corresponding interest and importance is the enclosed summary of waterborne statistics for Louisiana ports. This shows that 35 percent of the nation's total waterborne commerce moves through Louisiana ports and waterways. Louisiana handles 13 percent of the nation's total foreign waterborne trade value.

Also of interest is the enclosed Executive Summary of the Mid-America Ports Study. This report shows on page 17 that Louisiana's share of projected new port facilities required in the 17-state region is almost 44 percent of the total, or $4.1 billion out of $9.4 billion for the next 20 years.

In conclusion, we believe strongly that the tremendous concentration of waterborne commerce, related industries and maritime entities certainly demonstrate that New Orleans is undoubtedly the greatest maritime, foreign trade action center in the Southeastern part of the nation. In view of the foregoing, we solicit your assistance in using your good offices with the Secretary of the Treasury to insure that the New Orleans Customs Region will not be abolished.

Sincerely,

EDWARD S. REED,
Executive Port Director-General Manager.

The SPEAKER pro tempore (Mr. AUCOIN). The time of the gentleman from Florida (Mr. GIBBONS) has expired.

The Chair now recognizes the gentleman from Michigan.

Mr. VANDER JAGT. Mr. Speaker, I yield such time as he may consume to the gentleman from Louisiana (Mr. LIVINGSTON).

Mr. LIVINGSTON. Mr. Speaker, I thank the gentleman for yielding. I would not want to take much of the gentleman's time except to reemphasize what the gentlewoman from Louisiana (Mrs. BOGGS) has just pointed out, that the Port of New Orleans is now recognized to be, if not the largest port in the world, certainly among the largest, and it certainly would be ill-advised if the Customs Office were to be closed in that area.

I frankly would move to strike section 301 of this particular bill if I possibly could. I cannot do that, but I want to make my objection known for the record.

While I support this bill as a whole, I am compelled to speak out against one particular section of it. I refer to section 301, which provides that the Customs Service must eliminate three of the current nine regional offices that it operates. In addition, this section mandates the closing of 11 district offices, a reduction from 46 to 35.

Section 301 is not a part of President Reagan's program for economic recovery, was not requested by this administration. By the same token, the hypothetical savings from the closings of these offices were not specifically figured into the Reagan budget. In fact, I understand that the administration intends to work with the Senate to delete section 301 from the bill. I would support such an effort.

Given current circumstances, I cannot believe that the House really means to mandate that the Secretary of Treasury close these facilities. This would be the wrong move at the wrong time.

The Port of New Orleans, for example, has recently moved into a position as the premier port facility in the United States. New trends in coal and grain exports indicated that cargo volumes in the New Orleans/Baton Rouge corridor will increase dramatically over the next decade. In addition, the coast of south Louisiana is fast becoming the most active drug-smuggling area in the country.

These situations demand a regional-level Customs Service response, not a congressionally mandated reduction of regional offices.

Mr. Speaker, under the rules of the House, I cannot offer an amendment today to strike out section 301, as I would like to do. But I can make clear that I hope the administration and my colleagues in the Senate will be more successful, and that the Members of the House—once given the chance—will join in rejecting these ill-advised closings of Customs Service regional and district offices.

Mr. DE LUGO. Mr. Speaker, I am pleased to indicate my support today for H.R. 2540, the bill that authorizes appropriations for the U.S. International Trade Commission, the U.S. Customs Service, and the Office of the U.S. Trade Representative for fiscal year 1982.

This bill is of extreme importance to the U.S. Virgin Islands, which relies very heavily on the tourism industry, since it increases the current ceiling on duty-free gifts that tourists can mail to the mainland from $40 to $100. It also increases the ceiling on duty-free hand carried purchases from $600 to $800. Meanwhile, gifts sent from persons in foreign countries would be duty-free up to $50 and hand carried purchases up to $400, therefore the Virgin Islands would maintain its two to one advantage in both categories.

Tourism, our economic mainstay, has been hard hit by inflation. The increases in the duty-free ceiling that this bill would provide, particularly in the ceiling on gift purchases made from the territory, would be an economic shot in the arm for us. Each year hundreds of thousands of vacationers come to partake of our impeccable weather, clear tropical waters and beautiful white sand beaches. Aside from our esthetic attractions, however, there is also our reputation as a shopping area, where liquors, perfumes, watches, and gifts can be purchased at a savings over mainland prices.

However, tariff considerations given to neighboring developing areas have severely reduced our once famous price advantage. Increasing our duty-free ceiling will ameliorate this situation and enhance the attractiveness of this American flag territory to today's sophisticated, bargain-conscious tourists. A thriving tourist industry will in turn contribute significantly in providing aid to private enterprise, help the local government increase its severely strained operating revenues, and create much needed additional employment in the Virgin Islands.

The importance of this legislation to the economy of the U.S. Virgin Islands cannot be overstated and I am pleased to voice my support for its passage.

Ms. FERRARO. Mr. Speaker, as chairwoman of the subcommittee with jurisdiction over Federal personnel ceilings, I have been investigating the effects of reduced Federal personnel on the ability of certain agencies to perform their mandated functions. The Customs Service is one of the agencies in question.

The committee report on H.R. 2540 points out that the U.S. Customs Service is "an exceptionally well-run agency" which has little fat to cut and, therefore, reduced budget and personnel will result in "slowed and reduced service for the traveling public and the trading community."

This administration has instituted an arbitrary hiring freeze and personnel ceiling cutbacks which bear no relationship to affected agencies' workload or to the fact that it may be counterproductive in budget terms to cut personnel at a revenue producing agency. The effects of this grand-

standing, public relations ploy are evident in the Customs Service.

I am particularly concerned because 347 Customs employees will be separated through reductions in force during this fiscal year. Two hundred and five of them—59 percent—will be in the New York region. There are also major cutbacks scheduled for the Immigration and Naturalization Service, and again, the eastern region, which includes New York, will inexplicably take disproportionately high share of the cuts.

The peak international tourist season is almost here. My subcommittee will be holding a hearing at JFK on June 15 to try to determine the magnitude of these problems and to find long-term solutions.

But today we must face the immediate problem. I do not believe that lax enforcement of our customs and immigration laws is an acceptable alternative to hours long waits at our Nation's airports of entry. While I would prefer not to see experiments with expedited passenger processing undertaken in an atmosphere of impending crisis, I recognize that we must act now.

Let me record strong agreement with the committee report language on the enforcement question, which states:

It is important that the tests be carefully constructed to ensure that movement to this system will not result in illegal immigation or increased drug, weapons or other contraband smuggling or danger to the agricultural community.

Having stated my doubts about the wisdom of personnel cuts in agencies like Customs, and the resulting need to devise emergency means of dealing with staff shortages that follow, I want to express my support for the demonstration projects authorized by the committee.

As I have said, we need to develop innovative new methods of improving passenger processing. At JFK International Airport in New York, the coming peak tourist months of summer will mean even longer than average delays for incoming passengers at INS and Customs checkpoints.

The tourist trade is very important to New York's economy. The Port Authority of New York and New Jersey, which operates JFK, has conducted a major promotional campaign this spring to encourage Western Europeans to travel to the United States. This effort has included a series of seminars with European travel agents. In these seminars, the single biggest complaint heard, over and over, was that the Federal inspection process, meaning Customs and INS, caused great delay and inconvenience to arriving passengers.

JFK is by far the leading U.S. airport of entry. In 1980, 6.3 million international passengers arrived at Kennedy. That is 31 percent of total U.S. arrivals by air, and 75 percent more than the second largest gateway airport.

In the past weeks I have been involved in discussions with officials of major U.S. international airlines about the need for prompt, strong measures to deal with the delay problems at JFK. I commend the committee for recognizing the severity of the problem and for establishing the two 6-month demonstration projects. I would hope that JFK International Airport, as this country's leading gateway, would be selected as one of the two demonstration sites.

Mr. VANDER JAGT. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Florida (Mr. GIBBONS) that the House suspend the rules and pass the bill, H.R. 2540, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

EXTENSION OF FUNDS FOR VETERANS' ADMINISTRATION SUPPORT OF STATE MEDICAL SCHOOLS

Mr. MONTGOMERY. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 2156) to amend title 38, United States Code, to extend by 12 months the period during which funds appropriated for grants by the Veterans' Administration for the establishment and support of new State medical schools may be expended as amended.

The Clerk read as follows:

H.R. 2156

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 5073(a)(2)(G) of title 38, United States Code, is amended by striking out "seventh such period" and inserting in lieu thereof "seventh and eighth such periods".

The SPEAKER pro tempore. Is a second demanded?

Mr. HAMMERSCHMIDT. Mr. Speaker, I demand a second.

The SPEAKER pro tempore. Without objection, a second will be considered as ordered.

There was no objection.

The SPEAKER pro tempore. The gentleman from Mississippi (Mr. MONTGOMERY) will be recognized for 20 minutes, and the gentleman from Arkansas (Mr. HAMMERSCHMIDT) will be recognized for 20 minutes.

The Chair now recognizes the gentleman from Mississippi (Mr. MONTGOMERY).

Mr. MONTGOMERY. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I want to take this time to compliment the distinguished gentleman from Ohio (Mr. MOTTL), the very able chairman of our Subcommittee on Hospitals and Health Care. I want to compliment him for the work he has done since assuming the position of chairman of the subcommittee when we organized earlier this year. I am very pleased with the time and attention he has devoted to the medical issues that relate to our Nation's veterans and, of course, part of the backbone of the veterans' programs are the medical care in the hospitals.

It is my privilege at this time to yield such time as he may consume to the gentleman from Ohio (Mr. MOTTL) and request that he would handle this bill.

Mr. MOTTL. Mr. Speaker, I thank the gentleman for those kind remarks.

Mr. Speaker, the bill H.R. 2156 is a very simple yet very important measure. Public Law 92-541, the Veterans' Administration Medical School Assistance and Health Manpower Training Act of 1972, established a program through which the VA could provide grant assistance for the establishment of not more than eight new State medical schools, on a pilot basis, to be located in proximity to and operated in affiliation with a VA medical facility. As a result of this authority, five new State medical schools were established with the assistance of the VA grant. Each of these new medical schools has received grants to assist in the alteration or repair of buildings in order to make them suitable for use as medical school facilities and to help pay faculty salaries.

Although new medical schools are no longer authorized to be established under the program, funds previously appropriated remain available for 6 years after the year for which they were appropriated. Under section 5073(a)(2) of title 38, a grant made to a new medical school under the program for a payment of faculty salaries may be used for that purpose only during the first 7 years of the school's operation, and only up to a statutorily specified percentage of total faculty salary costs—declining from 90 percent during the first 3 years of a school's operation to 50 percent in the seventh year.

Wright State University, in affiliation with the VA Medical Center in Dayton, Ohio, was the first of the five new medical schools established under this program, and it is now well into its seventh year of operation. According to information received by the committee, Wright State, because of unanticipated delays in completing its faculty roster in the first year, was unable to expend fully the first year's VA grant for faculty salaries. Thus, at the end of that year, approximately one-third of the VA grant funds were

unexpended and remained in Wright State's account. It should be noted that the University of South Carolina Medical School, Columbia, S.C., and possibly one other, could also experience similar problems.

In an attempt to resolve this problem, the bill, as reported, would extend the availability of the appropriations authorized for purposes of this grant program from a period of 6 years to a period of 7 years following the year in which such appropriations are made. However, some question was raised that the bill, as reported, could be interpreted as an amendment proposing an appropriation; and, if so, would not be in order. Therefore, the bill has been amended to eliminate a possible conflict with the Appropriations Committee. As amended, the bill would simply provide an additional 12-month period in which these schools could obligate the funds already committed to them under the program. This provision would limit the amount of remaining funds that could be used to pay faculty salaries during the 12-month period to 50 percent of the total cost of such salaries during that year—the same limit that currently applies in the seventh year.

Mr. Speaker, this bill will not authorize any additional funds beyond those already appropriated. I would like to express my appreciation to Chairman SONNY MONTGOMERY, the ranking minority member of the full committee and the Subcommittee on Hospitals and Health Care, the Honorable JOHN PAUL HAMMERSCHMIDT, and the Honorable CLARENCE BROWN of Ohio for their support on this most important measure.

Mr. Speaker, I urge my colleagues to favorably consider this measure.

□ 1300

Mr. HAMMERSCHMIDT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 2156, a bill to extend for 1 additional year the authority to disburse funds already appropriated to new State medical schools. I commend the chairman of our subcommittee, Mr. MOTTL, for expediting this important and needed legislation.

During the 92d Congress, legislation was enacted that would authorize grants to States to assist them in establishing new State medical schools. The law provided that the grants would be disbursed in increments as required over a 7-year period.

Funds were appropriated and five States qualified for the grant. Because it was a new program, and medical schools were being created from "square 1," delays were experienced and faculties were not readily available. As a result, some of these schools will have unexpended funds remaining in their accounts when the authorization to expend such funds expires. Simply stated another way—they will run out of time before they run out of money.

Mr. Speaker, the record of the five new schools speaks for itself. They are all affiliated with Veterans' Administration hospitals and are assisting in serving the health needs of the Nation's veterans while providing a modern health care delivery system in the States in which they are located.

The funds have been appropriated. They are programed for expenditure by the schools and need only the 1-year extension authorized by this measure to spend them.

I urge my colleagues to support this bill.

Mr. BROWN of Ohio. Mr. Speaker, in the past weeks, we have heard a great deal about making Government funding more efficient so that moneys are expended in such a way as to bring maximum benefits to the institution receiving the grants. Within this context of the current emphasis being placed on the effective allocation of Federal resources, I would like to make the case for the medical schools that receive funding through the Veterans' Administration Medical School Assistance and Health Manpower Training Act of 1972. These centers will be forced to make hasty decisions in order to spend appropriated Federal funds before their 7-year grant authorization expires on June 30 of this year, and because one of the schools involved, Wright State, is in my district, I have chosen to be an original cosponsor of H.R. 2156—a bill that would extend the authorization for the program for an additional 12 months.

The Medical School Assistance and Manpower Training Act provides funds for the establishment and support of new State medical schools in affiliation with nearby veterans' facilities. In the case of Wright State University Medical School—which is affiliated with Dayton VA Medical Center—the grant runs for a period of 7 years as specified by the regulations of the Veterans' Administration. Wright State's authority ends June 30, 1981; however, because the university has budgeted the use of the money for faculty support salaries, some of it will not have been spent by the end of the grant period. Wright State, therefore, needs the authorization period to be extended by the 12 months so that remaining grant money can be used in an effective and rational manner. Extension of the grant period would cost no extra money and require no new VA regulations. At the same time, it would preclude the four other schools from facing the same technical problem in the near future. I feel it is only in the best interest of the Federal Government and the American taxpayer for the Congress to reward the prudent use of funds rather than forcing grantees to spend all their moneys in a short period that may not provide for the most efficient use of funds.

At a time when both the VA hospital appropriations and health funds are being reduced, I feel we are justified in helping ease the termination of these grants to a program that has answered many of our most pressing medical problems. Not only has the affiliation between teaching schools and veterans' hospitals upgraded the care available for those who have served their country in times of need, it has provided a training ground for future health care professionals and introduced them to the special needs of our veterans. Most importantly, these facilities have been particularly sensitive to the maldistribution of primary health care.

The VA hospital and medical school partnership has served us well since its beginnings in 1946. I urge my colleagues to consider this measure favorably, so as not to disrupt a longstanding partnership that has brought mutual benefit to veterans, students, and the communities they serve.

Mr. HAMMERSCHMIDT. Mr. Speaker, I have no further requests for time, and I yield back the remainder of my time.

Mr. MOTTL. Mr. Speaker, I yield back the remainder of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. MONTGOMERY) that the House suspend the rules and pass the bill, H.R. 2156, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. MOTTL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and include extraneous matter on the bill just passed, H.R. 2156.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

VETERANS' HEALTH CARE ACT OF 1981

Mr. MOTTL. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 3499) to amend title 38, United States Code, to extend the Vietnam-era veterans' readjustment counseling program, to provide medical care for Vietnam veterans exposed to herbicide defoliants, including agent orange, to recover the cost of certain health care

provided by the Veterans' Administration, and for other purposes, as amended.

The Clerk read as follows:

H.R. 3499

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SHORT TITLE; AMENDMENTS TO TITLE 38, UNITED STATES CODE

SECTION 1. (a) This Act may be cited as the "Veterans' Health Care Act of 1981".

(b) Except as otherwise expressly provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of title 38, United States Code.

AUTHORITY FOR CONTRACT HOSPITAL CARE IN PUERTO RICO AND THE VIRGIN ISLANDS

SEC. 2. Section 601(4)(C)(v) is amended by striking out "December 31, 1981" and inserting in lieu thereof "September 30, 1982".

MEDICAL CARE FOR VETERANS EXPOSED TO AGENT ORANGE

SEC. 3. Section 610(a) is amended—

(1) by striking out "and" at the end of clause (3);

(2) by redesignating clause (4) as clause (5); and

(3) by inserting after clause (3) the following new clause (4):

"(4) any veteran who served in the Republic of Vietnam during the Vietnam era if a physician employed by the Veterans' Administration (or, in areas where no such physician is available, by a physician carrying out such function under a contract or fee arrangement) determines that such hospital care is necessary for the treatment of a condition that may be associated with exposure while serving in the Republic of Vietnam to phenoxy herbicides and chemicals used as defoliants (including the defoliant commonly knows as 'Agent Orange'); and ".

EXTENSION OF VIETNAM-ERA VETERANS' READJUSTMENT COUNSELING PROGRAM

SEC. 4. Section 612A(a) is amended by striking out "or two years after the effective date of this section" and inserting in lieu thereof "or by September 30, 1984".

MEDICAL CARE FOR SURVIVORS AND DEPENDENTS OF CERTAIN VETERANS

SEC. 5. The second sentence of section 613(b) is amended by striking out "particularly" and "most effective".

MEDICAL CARE FOR VETERANS IN THE REPUBLIC OF THE PHILIPPINES

SEC. 6 (a) Section 624(d) is amended by striking out "and at the same rate as specified in section 632(a)(4) of this title".

(b) Section 631 is amended by inserting "in fulfilling its responsibility" after "the Republic of the Philippines".

(c)(1) Section 632 is amended to read as follows:

"§ 632. Contracts and grants to assure the effective care and treatment of United States veterans in the Veterans Memorial Medical Center

"(a) The President, with the concurrence of the Republic of the Philippines, may authorize the Administrator to enter into contracts with the Veterans Memorial Medical Center, with the approval of the appropriate department of the Government of the Republic of the Philippines, covering the period beginning on October 1, 1981, and ending on September 30, 1986, under which the United States—

"(1) will provide for payments for hospital care and medical services (including nursing home care) in the Veterans Memorial Medical Center, as authorized by section 624 of this title and on the terms and conditions set forth in such section, to eligible United States veterans at a per diem rate to be jointly determined for each fiscal year by the two Governments to be fair and reasonable; and

"(2) may provide that payments for such hospital care and medical services provided to eligible United States veterans may consist in whole or in part of available medicines, medical supplies, and equipment furnished by the Administrator to the Veterans Memorial Medical Center at valuations therefor as determined by the Administrator, who may furnish through the revolving supply fund, pursuant to section 5021 of this title and subject to reimbursement, such medicines, medical supplies, and equipment as necessary for this purpose.

"(b)(1) To further assure the effective care and treatment of United States veterans in the Veterans Memorial Medical Center, there is authorized to be appropriated for each fiscal year occurring during the period beginning on October 1, 1981, and ending on September 30, 1986, the sum of $500,000 to be used by the Administrator for making grants to the Veterans Memorial Medical Center for the purpose of assisting the Republic of the Philippines in the replacement and upgrading of equipment and in rehabilitating the physical plant and facilities of such hospital.

"(2) Grants under this subsection shall be made on such terms and conditions as prescribed by the Administrator. Such terms and conditions may include a requirement of prior approval by the Administrator of all purchases of equipment and of all plans for rehabilitating and upgrading the physical plant and facilities of the Veterans Memorial Medical Center.

"(3) Funds for such grants may be provided only from appropriations of the Veterans' Administration available for medical care.

"(c)(1) The Administrator may stop payments under any contract or grant under this section upon reasonable notice as stipulated by the contract or grant if the Republic of the Philippines and the Veterans Memorial Medical Center fail to maintain such hospital in a well-equipped and effective operating condition as determined by the Administrator.

"(2) The authority of the Administrator to enter into contracts and to make grants under this section is effective for any fiscal year only to the extent that appropriations are available for that purpose.".

(2) The item relating to such section in the table of sections at the beginning of chapter 17 is amended to read as follows:

"632. Contracts and grants to assure the effective care and treatment of United States veterans in the Veterans Memorial Medical Center.".

RECOVERY OF THE COST OF CERTAIN HEALTH CARE PROVIDED BY THE VETERANS' ADMINISTRATION

SEC. 7. (a) Subchapter III of chapter 17 is amended by adding at the end the following new section:

"§ 629. Recovery by the United States of the cost of certain care and services

"(a) In any case in which a veteran is furnished care and services under this chapter for a non-service-connected disability which was incurred—

"(1) incident to the veteran's employment and the disability is covered under a workers' compensation law or plan which provides reimbursement for or indemnification of the cost of health care and services provided to the veteran by reason of the disability,

"(2) as the result of a motor vehicle accident covered under the law of a State which requires that owners or operators of motor vehicles registered in such State have in force automobile accident reparations insurance, or

"(3) as the result of a crime of personal violence that occurred in a State or political subdivision of a State in which a person injured as the result of such a crime is entitled to receive health care and services at such State's or subdivision's expense for personal injuries suffered as the result of such crime, the United States shall have the right to recover the reasonable costs of such care and services from the State (or political subdivision thereof), employer, employer's insurance carrier, or automobile accident reparations insurance carrier, as appropriate, to the extent that such veteran, or the provider of care and services to such veteran, would be eligible to receive reimbursement or indemnifications for such care and services if such care and services had not been furnished by a department or agency of the United States.

"(b) The amount that may be recovered by the United States under subsection (a) of this section may not exceed the lesser of (1) an amount equal to the reasonable cost of the care and services furnished such veteran under this chapter, as determined by the Administrator, or (2) the maximum amount specified by the law of the State or political subdivision thereof concerned or by any relevant contractual provision to which such veteran was a party or was subject. The Administrator shall prescribe regulations for the determination of the reasonable cost of care and services under clause (1) of the preceding sentence, and any determination of such reasonable value by the Administrator under such clause shall be made in accordance with such regulations. Regulations under the preceding sentence shall be prescribed only after notice and opportunity for public comment.

"(c)(1) The United States shall, as to the right provided in subsection (a) of this section, be subrogated to any right or claim that such veteran or such veteran's personal representative, successor, dependents, or survivors may have against a State or political subdivision of a State, an employer, an employer's insurance carrier, or an automobile accident reparations insurance carrier.

"(2) In order to enforce any such right or claim to which it is subrogated under paragraph (1) of this subsection—

"(A) the United States may intervene or join in any action or proceeding brought by the veteran or such veteran's personal representative, successor, dependents, or survivors against a State or political subdivision of a State, an employer, an employer's insurance carrier, or an automobile accident reparations insurance carrier, or

"(B) if—

"(i) no such action or proceeding has been commenced within one hundred and eighty days after the first day on which care and services for which recovery is sought were furnished to such veteran by the Veterans' Administration under this chapter, and

"(ii) the United States has sent written notice by certified mail to such veteran at

such veteran's last-known address, or to such veteran's personal representative or successor, of the United States intention to institute legal proceedings,

the United States may, sixty days after the mailing of such notice, institute and prosecute legal proceedings against such State or political subdivision, employer, employer's insurance carrier, or automobile accident reparations carrier.

"(d) A veteran eligible for care and services under this chapter may not be denied such care and services by reason of this section.

"(e) No law of any State or of any subdivision of a State, and no provision of any contract or agreement entered into, renewed, or modified pursuant to any State law shall operate to prevent recovery by the United States (1) under subsection (a) of this section for care and services furnished under this chapter to any veteran for a non-service-connected disability, or (2) under subsection (b) of section 611 of this title for care and services furnished as a humanitarian service in emergency cases under such subsection to any individual.".

(b) The table of sections at the beginning of such chapter is amended by inserting after the item relating to section 628 the following new item:

"629. Recovery by the United States of the cost of certain care and services.".

MINIMUM NUMBER OF HOSPITAL AND NURSING HOME BEDS IN MEDICAL FACILITIES OF THE VETERANS' ADMINISTRATION

SEC. 8. (a) Paragraph (1) of section 5010(a) is amended by striking out the first sentence and inserting in lieu thereof the following: "The Administrator shall establish the number of hospital and nursing home beds in medical facilities over which the Administrator has direct jurisdiction for the care and treatment of veterans at not more than one hundred twenty-five thousand and not less than one hundred thousand. The Administrator shall establish such number so as to maintain a contingency capacity to assist the Department of Defense in time of war or national emergency. Of the number of beds authorized, the Administrator shall operate and maintain not less than eighty-two thousand five hundred hospital beds and not less than nine thousand nursing home beds and shall have available such additional beds and facilities above the operating bed level as the Administrator considers necessary for contingency purposes. The President shall include in the budget transmitted to the Congress for each fiscal year pursuant to section 201(a) of the Budget and Accounting Act, 1921 (31 U.S.C. 11(a)), an amount for medical care and amounts for construction sufficient to enable the Veterans' Administration to operate and maintain not less than eighty-two thousand five hundred hosital beds and not less than nine thousand nursing home beds in accordance with this paragraph.".

(b) Paragraph (3) of such section is amended to read as follows:

"(3)(A) The Chief Medical Director shall annually (i) analyze agencywide admission policies and the records of those eligible veterans who apply for hospital care, medical services, and nursing home care, but are rejected or not immediately admitted or provided such care or services, and (ii) review the adequacy of the established operating bed levels, the geographic distribution of operating beds, and the demographic characteristics of the veteran population and the associated need for medical care and nursing home facilities and services in each State.

"(B) After considering the analyses and recommendations of the Chief Medical Director pursuant to subparagraph (A) of this paragraph, the Administrator shall annually report, on or before December 31, to the committees regarding the number of operating beds required to meet the health care mission of the Veterans' Administration and, as appropriate, shall recommend the number of operating beds required for the health care of veterans.".

(c) Section 5010 is further amended by striking out subsection (b) and redesignating subsection (c) as subsection (b).

EXPANSION OF SCOPE OF AGENT ORANGE STUDY

SEC. 9. Paragraph (1) of section 307(a) of the Veterans Health Programs Extension and Improvement Act of 1979 (Public Law 96-151; 93 Stat. 1097) is amended to read as follows:

"(1)(A) The Administrator of Veterans' Affairs shall design a protocol for and conduct an epidemiological study of the long-term adverse health effects in humans of service in the Armed Forces of the United States in the Republic of Vietnam during the period of the Vietnam conflict as such health effects may result from exposure to phenoxy herbicides (including the herbicide known as Agent Orange) and the class of chemicals known as the dioxins produced during the manufacture of such herbicides. In conducting such study, the Administrator may include an evaluation of the adverse health effects in humans of such service as such health effects may result from other factors involved in such service, including exposure to other herbicides, chemicals, medications, or environmental hazards or conditions.

"(B) The Administrator shall also conduct a comprehensive review and scientific analysis of the literature covering other studies relating to whether there may be long-term adverse health effects in humans from exposure to phenoxy herbicides (including the herbicide known as Agent Orange) and the class of chemicals known as the dioxins produced during the manufacture of such herbicides. In conducting such review and analysis, the Administrator may include a review and analysis of the literature covering other studies relating to whether there may be long-term adverse health effects in humans from other factors involved in service in the Armed Forces of the United States in the Republic of Vietnam during the Vietnam conflict or in other comparable situations involving one or more of the factors described in the second sentence of subparagraph (A).".

EFFECTIVE DATES

SEC. 10. (a) The amendments made by sections 2, 3, 4, 5, 6, and 7 shall take effect on October 1, 1981.

(b) The amendment made by section 7(a) shall apply with respect to care and services furnished under chapter 17 of title 38, United States Code, on or after the date of the enactment of this Act.

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from Ohio (Mr. MOTTL) will be recognized for 20 minutes, and the gentleman from Arkansas (Mr. HAMMERSCHMIDT) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Ohio (Mr. MOTTL).

Mr. MOTTL. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, this bill, H.R. 3499, the Veterans' Health Care Act of 1981, is the result of five oversight and legislative hearings by the Subcommittee on Hospitals and Health Care. The need for all of the provisions of H.R. 3499 was clearly demonstrated during the hearings.

Mr. Speaker, this bill would:

Extend the authority of the Administrator of Veterans' Affairs to contract for hospital care, or medical services to obviate the need for hospital admission, for veterans in the Commonwealth of Puerto Rico and the Virgin Islands to September 30, 1982.

It would also provide authority for hospital care for Vietnam veterans who served in the Republic of Vietnam if a physician employed by the Veterans' Administration, or a physician carrying out such functions on a contract or fee basis arrangement in areas where a VA physician is not available, determines that such care is necessary for the treatment of a condition that may be associated with exposure to phenoxy herbicides and chemicals used as defoliants, including the herbicide commonly known as agent orange.

H.R. 3499 would extend the Vietnam-era veterans readjustment counseling program, the so-called vet centers, by 3 additional years or until September 30, 1984.

This program would cost an estimated $27.4 million in budget authority and $24 million in outlays to operate in fiscal year 1982, which is a small amount to pay to alleviate the psychological and emotional problems of Vietnam veterans. By comparison, the proposed military construction budget for 1982 is $6.8 billion. Taxpayers spent some $30 billion a year in the midsixties to support the American military machine in Vietnam. In view of the special sacrifices that Vietnam veterans have made for their country, which have gone largely unheralded, it is fitting that the Congress remedy this gross injustice and continue to provide Vietnam veterans with the services of the vet centers. In the past 1½ years, these vet centers have had more than 130,000 visits and have provided services to over 52,000 Vietnam-era veterans. There are many more out there we still must reach, and that is why we must keep this program going.

One provision would make technical changes in the language of the CHAMPVA program in section 613(b) of title 38, United States Code, to facilitate the treatment of certain beneficiaries within VA facilities.

Further, the bill would extend the Administrator's authority to contract for the hospital care and medical services of U.S. veterans in the Veterans'

Memorial Medical Center in the Republic of the Philippines and provides for a grant program of $500,000 per year for 5 years for the replacement and upgrading of equipment and rehabilitation of the physical plant of this medical center. This grant authority expires on September 30, 1986. It also clarifies the position of the United States that the Republic of the Philippines has the primary responsibility for providing hospital care and medical services for Commonwealth Army veterans and new Philippine scouts, and is an expression of the long-standing position of the United States that the operation and maintenance of the Veterans Memorial Medical Center should eventually be assumed by the Philippine Government.

H.R. 3499 would also provide authority to the Veterans' Administration to recover the reasonable cost of care and services from a State, employer, employer's health insurance carrier, automobile accident reparations insurance carrier, or in situations arising under a State's "victims of crimes" provisions in those cases where a VA health care facility provides the hospital care or medical service for non-service-connected conditions of a veteran.

The bill would require that the Administrator of Veterans' Affairs establish not more than 125,000 or not less than 100,000 hospital and nursing care beds in VA facilities and operate and maintain not less than 82,500 hospital beds and not less than 9,000 nursing care beds. It further provides that the budget transmitted to the Congress for each fiscal year will include an amount for medical care and for medical construction sufficient to enable the VA to operate and maintain this minimum number of hospital and nursing care beds.

The proposed legislation would authorize the Administrator of Veterans' Affairs to expand the epidemiological study on the long-term adverse health effects, if any, in veterans serving in the Republic of Vietnam who were exposed to phenoxy herbicides, including agent orange, and the chemicals known as dioxins. The study was originally authorized by Public Law 96-151, and authorizes an expanded review and analysis of other studies which relate to the long-term adverse health effects in humans from other factors involved in service in the Armed Forces in the Republic of Vietnam.

Mr. Speaker, all of the provisions of H.R. 3499 are sorely needed and justified. The Congressional Budget Office has estimated the budget authority in fiscal year 1982 to be $30.8 million and outlays of $27.2 million. Some of the provisions are cost-savings measures. The principal cost is for the extension of the readjustment counseling program. The testimony on this subject clearly demonstrated the urgent need for the extension of the program.

I wish to express my sincere appreciation to the chairman of our committee, the Honorable SONNY MONTGOMERY of Mississippi; to Congressman TOM DASCHLE of South Dakota, the chairman of the Vietnam Veterans Caucus; the Honorable DON EDWARDS of California; the Honorable BOB EDGAR of Pennsylvania; the Honorable MARVIN LEATH of Texas; the Honorable RICHARD SHELBY of Alabama; the Honorable CHRIS SMITH of New Jersey; as well as a special thanks to the Honorable JOHN PAUL HAMMERSCHMIDT, the ranking minority member of the committee, and the Honorable MARGARET HECKLER for their support in bringing this important piece of legislation to the floor today. Without their help, it would have been most difficult to act on this legislation at this point in time.

I urge my colleagues to favorably consider the Veterans' Health Care Act of 1981, H.R. 3499.

Mr. Speaker, I reserve the balance of my time.

Mr. HAMMERSCHMIDT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 3499. This bill incorporates the provisions of seven measures that were the subject of extensive hearings by the Subcommittee on Hospitals and Health Care. All of the major veterans' organizations and spokesmen for the Veterans' Administration expressed their views on this legislation.

This measure, Mr. Speaker, which I was privileged to cosponsor, truly can be termed an omnibus measure because it contains seven unrelated matters, though all are in the general area of veterans' health care.

The first provision will extend the authority of the Veterans' Administration to contract for hospital care in Puerto Rico and the Virgin Islands through the 1982 fiscal year. Our failure to enact this provision will result in the denial after December 31, 1981, of medical care to eligible veterans residing in these U.S. possessions.

The provision authorizing grants to the Republic of the Philippines to assist in providing care and treatment in the Veterans' Memorial Medical Center to certain veterans must also be considered at this time in view of the impending termination of the existing grant authority.

Initiated in 1948, the grant program has recognized the close special relationship between the United States and the Republic of the Philippines. Yet, it has been the long-standing policy of the United States that the full responsibility for the operation and maintenance of the Veterans' Memorial Medical Center should eventually be assumed by the Republic of the Philippines.

This measure, authorizing a total of $2.5 million over a 5-year period for the replacement and upgrading of equipment and rehabilitation of the physical plant and facilities of the hospital presents a reasonable alternative to the abrupt cutoff of grant funds. I strongly support it.

Another provision of this measure will require the Veterans' Administration to operate not less than 100,000 hospital and nursing home beds. Having witnessed the continuing erosion of the Veterans' Administration Hospital system—a health care system once described as second to none—I am pleased to support this provision.

Mr. Speaker, three provisions of this bill relate directly to the needs of Vietnam veterans. One provision will extend a priority in medical care for treatment of conditions that may be associated with the use of defoliants. Another provision will extend the readjustment counseling program for an additional 3 years, while another provision will expand the scope of the previously authorized agent orange study in order to include the effects of all environmental hazards.

Mr. Speaker, all of the provisions of this measure have been carefully thought out. They are needed and I urge that the bill be passed.

Mr. LOTT. Mr. Speaker, will the gentleman yield?

Mr. HAMMERSCHMIDT. I am very pleased to yield to the gentleman from Mississippi, the distinguished whip.

□ 1315

Mr. LOTT. Mr. Speaker, I appreciate the gentleman yielding and I would like to take this opportunity to commend the gentleman from Arkansas (Mr. HAMMERSCHMIDT) and the distinguished chairman of the subcommittee and, of course, our distinguished chairman of the full committee from my own State of Mississippi (Mr. MONTGOMERY) for the job that they have done on veterans' legislation. I think my record speaks for itself in support of these efforts.

I do want to ask this question, though, if I could: This particular bill, H.R. 3499, the Veterans' Health Care Act of 1981, does in fact have some provisions in it that are controversial; is that correct?

Mr. HAMMERSCHMIDT. It does have some provisions that some with administrative authority feel are controversial; that is correct. And obviously that makes them controversial.

Mr. LOTT. I think it would certainly go beyond the administration.

Mr. HAMMERSCHMIDT. Yes; I agree that could be so.

Mr. LOTT. There are others that raise some questions. While in the final analysis they may go along, approve of them, the reason I ask is this: I wonder if this bill should be on suspension or should it have been on the regular calendar so it could have a full

and thorough discussion with amendments being in order?

Mr. HAMMERSCHMIDT. It had, of course, thorough and full review within the subcommittee and the full committee of jurisdiction. I did not feel there was that much controversy, at the time from the testimony that we heard. That is a subjective judgment, of course; but I really believe that this bill has overwhelming support in the House.

Mr. LOTT. In the House, most veterans' bills do pass overwhelmingly, as they should, because this committee is a very responsible committee and does a good job. I do think sometimes that perhaps we put too much legislation on suspension here in the House, and I just wanted to raise that question.

Mr. HAMMERSCHMIDT. Might I say further to the gentleman, some of the controversy may be caused by a misunderstanding on what the issues are. When I suggest that the administration opposes this, I am not entirely sure that is so, because as the gentleman knows, it has taken time to put the new administration in place. We do not yet have a Veterans Administrator confirmed. We get mixed signals out of those people that are down at the Veterans' Administration right now. We have had conflicting testimony.

I would not want to, certainly, indict the administration as opposing certain provisions of this bill when I do not know for sure.

Mr. LOTT. Like this committee, I am sure that the administration should be primarily a nonpartisan organization anyway. Maybe no matter what administration controls, hopefully they will speak with about the same voice down there.

I understand what the gentleman is saying. I just would urge the committee to be careful about the bills they put on suspension.

Mr. HAMMERSCHMIDT. I appreciate that. Let me say further, in discussion with the President of the United States—and I think the gentleman knows this—he, the President has always expressed his very strongest concern over many of these items that are in this bill. I am not sure that his legislative recommendation would take this form, but he has great concern about the Vietnam veteran, about the possible implications of agent orange, about all matters bearing on the health and welfare of all our veterans. It is a matter of trying to find the right solution. I would say that the President has deep concern about everything that is in this bill.

Mr. JEFFORDS. Mr. Speaker, will the gentleman yield?

Mr. HAMMERSCHMIDT. I yield to the gentleman from Vermont.

Mr. JEFFORDS. Mr. Speaker, I rise in support of the Veterans' Health Care Act and I wish to commend the gentleman and the committee for their action.

I cosponsored the legislation introduced by my colleague from Massachusetts (Mrs. HECKLER) to extend the veterans readjustment program for 3 years. I am very pleased that an extension of the program has been endorsed by Mr. MOTTL and the Committee on Veterans' Affairs.

I have spoken here before on the importance of the readjustment counseling program for Vietnam veterans. It is a subject I can discuss with a great deal of pride and praise because the program we have in Vermont is excellent. Since the Outreach center opened in January 1980, about 500 vets have taken advantage of the center regularly and countless others drop in from time to time. It is truly the focal point for many Vietnam vets in the State. These men are getting back into the labor force, they are reestablishing relationships with their wives and families, and they are responding to the system without anger—something that many of them felt would never be possible. Most important, however, they seem to be becoming comfortable with themselves and with their status as veterans of the Vietnam conflict. In short, the program has been a tremendous success.

I also support the provision of this bill that expands the study on the effects of agent orange that is already underway to include an evaluation of the effects of other environmental agents or conditions. Pending the outcome of this study, this bill authorizes medical care for Vietnam veterans if VA-approved doctors find that treatment is necessary for symptoms that could be associated with agent orange or other defoliants.

This is a small step, but it is a beginning. Vietnam veterans in my home State of Vermont have been working very hard to inform one another of the consequences of exposure to agent orange. Nevertheless, there is still a need for a comprehensive study of the problem by an independent group.

Mr. Speaker, I would also like to briefly mention two other bills that the House is considering today and indicate my strong support for them. H.R. 3423, the Veterans' Training and Business Loan Act of 1981 makes Vietnam-era vets eligible for educational assistance for the pursuit of on-the-job training and vocational training through 1983. It also creates a Small Business Administration loan program for Vietnam vets that is similar to what was extended to World War II and Korean war vets under their GI bills.

Another bill, H.R. 2039, authorizes the VA to guarantee home loans with provisions for variable payment plans used to purchase single family dwelling units.

I am pleased that the House is enacting these bills today. It is time we gave the considerations to Vietnam veterans that they deserve and heightened our awareness of the debt of gratitude we owe our veterans as a whole.

Mr. WYLIE. Mr. Speaker, will the gentleman yield?

Mr. HAMMERSCHMIDT. I yield to the gentleman from Ohio, a member of our committee.

Mr. WYLIE. I thank the gentleman for yielding.

Mr. Speaker, the Veterans' Health Care Act of 1981, designated H.R. 3499, contains several provisions essential to maintaining the continuity of health care being administered to eligible veterans. I recommend its adoption by our colleagues.

Of special interest to those of us who have received a high volume of constituent mail about the Vietnam veterans readjustment counseling centers is the section extending their authority to operate until September 30, 1984. These centers were scheduled to close September 30, 1981, by the law establishing them.

Hearings before the Veterans' Affairs Committee brought out the difficulty these centers have encountered in establishing themselves in a community. Time is required to overcome the doubt and skepticism that is frequently engendered by a new program and new approach. Operation Outreach, as these centers were called, was set up to provide readjustment assistance for veterans of Vietnam, not to administer a medical treatment program. This distinction broke new ground in the usual delivery of health services. The development of methodology and policy along with the counseling facilities themselves has taken more time than anticipated.

Based on the record they have so far established and on field investigations conducted by the staff of the Veterans' Affairs Committee, it appears these centers have not yet had the time to do the job they were established for. I recommend, therefore, that this bill giving them 3 more years of existence be considered favorably.

Mr. HAMMERSCHMIDT. Mr. Chairman, I have no further requests for time, and I yield back the balance of my time.

Mr. MOTTL. Mr. Speaker, I yield 4 minutes to the distinguished gentleman from Pennsylvania (Mr. EDGAR), who has certainly contributed a great deal to this bill.

Mr. EDGAR. Mr. Speaker, we heard in the last few minutes that there is some controversy about this bill. I think the only controversy about this particular bill at this time in history is that the bill has not been to the floor sooner and that we may not pass the bill by unanimous consent.

This bill is a very good one and perhaps for the first time in a long time we are recognizing on the House Veterans' Affairs Committee that there are some unique problems that face the Vietnam-era veteran, some problems like delayed stress syndrome, exposure to agent orange, needs for better, improved health care services, opportunities to walk in off the street to Outreach centers. I think the President of the United States ought to listen carefully to the words of those who serve actively on the House Vietnam-Era Caucus who have been lobbying for some time not only to recognize the great value of readjustment conseling centers, but the special needs of those veterans who served in a very troubled time in our history.

I think if the President of the United States and the ranking minority member and the ranking whip, the majority leader, and the Speaker of the House would listen, as we did, to the many hours of testimony, they would recognize that this bill is only controversial to those people who do not know the details and the needs.

I would hope that we would eliminate that controversy by passing this bill unanimously and by sending a clear message to the President of the United States, but more importantly a clear message to every Vietnam veteran who served this country well, that we care about them and their needs and their responsibilities.

Mr. Speaker, today marks a very significant milestone. For the first time in many years the House of Representatives has taken the initiative over both the Senate and the executive branch in advancing the cause for progressive legislation in behalf of Vietnam-era veterans.

The 3-year extension of readjustment counseling and the long overdue medical provision for the treatment of agent orange disabilities contained in H.R. 3499 are only part of this achievement. When coupled with the employment, vocational, and business loan programs brought before the House yesterday, they comprise a well-rounded targeted readjustment package that will benefit thousands of deserving Vietnam veterans.

We have taken the lead on these issues with the unanimous bipartisan support of the House Committee on Veterans' Affairs. I would like to thank the chairman of the full committee, SONNY MONTGOMERY, for his leadership. Special thanks are also in order for Congressmen TOM DASCHLE and DAVE BONIOR of Michigan of the Vietnam Veterans Caucus, Subcommittee Chairman RON MOTTL and ranking minority members JOHN PAUL HAMMERSCHMIDT and MARGARET HECKLER.

The action we are taking today is designed to clearly state the intent of the House Committee on Veterans' Affairs and the House as a whole in support for full implementation of these programs. The battle over readjustment counseling has been waged within the Congress and in the White House for nearly 10 years. The program was implemented in 1979 with a limited budget and under a 2-year restrictive time period. Testimony before our committee as early as 1978 indicated that a minimum of 5 years of full operation was necessary to allow these centers to reach their full targeted veteran population. Even if the Congress approves the full 3-year extension contained in H.R. 3499, Operation Outreach is far behind the schedule already mandated by the Congress. The program, quite naturally was delayed in reaching full operation due to startup time lags. In addition, in recent months the program has been effectively crippled under OMB's hiring freeze and the deferral of expansion funds authorized by the Congress last December. We intend to see this situation corrected.

A major survey of Vietnam-era veterans mandated by the Congress and completed by the Center for Policy Research in New York indicates that up to 800,000 Vietnam veterans are still suffering from the residual effects of that war and are in need of these services.

Very few programs, scheduled for elimination in fiscal year 1982 by OMB have received so much attention and support both within the Congress and among the American people. It is a tribute to the value and effectiveness of this project that 91 small storefront counseling centers with an original $9.9 million budget could spread so much good news. When our colleague DON EDWARDS of California introduced H.R. 747, the original legislation in this Congress which called for the 3-year extension we are voting on today, he was quickly joined by 100 additional sponsors.

But support for the program has also come from around the country: From State and local officials, and from all veterans' service organizations. However, the most telling support has come from individual veterans themselves and from their families whose lives have been touched by this valuable assistance.

Quite simply, readjustment counseling works. It works as originally designed by the health care professionals and dedicated VA employees who staff these centers. We need to send them a very strong signal of our support for this program and for the continuation of the services they provide. They have our confidence and our support. The vet center program should continue in full operation as mandated by this legislation, free from continued bureaucratic manipulation or administrative counterventionn.

I trust the statement made today in passage of this legislation will make clear the intention of the House supporting 3 more years of quality, peer group designed and implemented, readjustment counseling services.

Vietnam will always be with us. The scars of Vietnam will always be with us, too. In war there are no unwounded soldiers. However, at vet centers across this country, over 60,000 Vietnam veterans have already learned that they do not have to fight that war any longer. There are thousands more in need of help. Through this program and the others approved today we can show our good faith to welcome them all home again at full potential.

Mrs. HECKLER. Mr. Speaker, will the gentleman yield?

Mr. EDGAR. I yield to the gentlewoman from Massachusetts, who has worked on this legislation.

Mrs. HECKLER. Mr. Speaker, I rise in support of H.R. 3499, the Veterans' Health Care Amendments of 1981.

Consideration today of H.R. 3499 marks a turning point in the House regarding health care treatment for all veterans, but especially Vietnam veterans. This House has never before been presented with proposed Vietnam veteran legislation such as this, legislation which in one bold stroke would:

Expand the Operation Outreach vet center program an additional 3 years, until 1984;

Authorize Veterans' Administration treatment of Vietnam veterans for agent orange poisoning, and expand the VA study of agent orange to all herbicides used in Vietnam.

Establish maximum and minimum authorization levels regarding the number of hospital beds the Veterans' Administration must operate.

I am especially pleased that H.R. 4399 contains the provision of my bill, H.R. 2886, to extend the highly successful and needed Operation Outreach vet center program.

I personally have visited vet centers operating in my State and have worked closely with both counselors and veterans being counseled. My personal observation is that this program is an unqualified success.

I am pleased to say that the Veterans' Administration agrees. It therefore is paradoxical that the Veterans' Administration should recommend that this program be eliminated and eliminated abruptly on September 29.

By the Veterans' Administration's own figures, 82 percent of veterans counseled by Operation Outreach say they were counseled successfully and to each's own satisfaction. This is not a bureaucratic statistic—it is human. The number of veterans who say they were counseled unsuccessfully is a meager 2 percent.

The Hospitals Subcommittee of which I am a member heard testimony from veterans, counselors, medical care experts, and VA physicians on this subject. Testimony went only in one direction—commendation for the program and recommendations that it be extended.

In March, the congressionally mandated five-volume, 6-year study of Vietnam veterans was released by the Center for Policy Research in New York City. It further confirms what some of us have known for a long time: That Vietnam combat veterans suffer significantly more emotional, social, educational, and job-related problems than those who were not in battle.

It further found that exposure to combat has a direct relationship to current abuse of alcohol and other drugs, as well as arrested, medical, and stress-related problems.

The American Psychiatric Association has recognized a disorder unique to the Vietnam veteran—delayed stress syndrome. This disorder is defined as a veteran suffering emotionally or psychologically from combat, long after returning from the battle.

These problems are not disappearing. In fact, they are intensifying. Talk of cutting this program is exacerbating such problems. We need to be concerned about Operation Outreach and Vietnam veterans because there are 2½ million Americans who served in Vietnam. But there are 230 million veterans of Vietnam in America. We must preserve and extend Operation Outreach because we all—each and every one of us—are Vietnam veterans, and we all are benefiting from this highly successful program.

Section 3 of H.R. 3499 would specifically provide for treatment of a veteran by the VA for agent orange poisoning. Such treatment would be provided if a Veterans' Administration physician, or a physician under contract to the VA, diagnoses a veteran's health problem as connected to agent orange poisoning.

A significant number of Vietnam combat veterans have been seeking this type of treatment at the VA for years. This legislation has been too long in coming, but I commend the leadership of the Veterans' Committee for advancing this proposed legislation at this time.

Mr. Speaker, between 1964 and 1971, the Department of Defense sprayed 11 million gallons of agent orange—and millions more of other herbicides—on the Vietnam jungles as a defoliant.

Agent orange is a 50-50 mixture of two chemicals, the manufacture of which creates an inevitable byproduct, dioxin. Dioxin has been described by experts such as Dr. Epstein, of the University of Chicago, as one of the most toxic and potent synthetic chemicals ever produced.

Human and laboratory tests in lower animals have found that persons exposed to dioxin are more likely to contract cancer than are those who are not.

The Veterans' Administration recently awarded a congressionally mandated study contract to the UCLA Medical Center to conduct a comprehensive study of the health effects of agent orange exposure. Results will be available in 2 years.

In the interim, there is great concern among Vietnam veterans over the adverse health effects that are a consequence of exposure.

As one of those who first brought the agent orange concern before the Veterans' Committee in 1978, I feel it has taken too long for this kind of legislation.

Passage of this bill today will send a message to the frustrated and angry Vietnam veteran who feels his fears and needs are not being addressed or met. It will say that this House cares and will give the veteran in need the benefit of the doubt.

The benefit of the doubt as opposed to the bureaucratic cold shoulder. This our message in this bill.

I thank and commend Messrs. MONTGOMERY, HAMMERSCHMIDT, MOTTL, DASCHLE, EDGAR, and BONIOR especially for their work on behalf of Vietnam veterans.

Section 8 of H.R. 3499 establishes minimum and maximum levels of beds that the Veterans' Administration will be required by Congress to have authorized and to operate. This benefits veterans of all wars.

The Veterans' Administration would be authorized a maximum of 125,000 and a minimum of 100,000 hospital beds throughout its 172-hospital system.

It would be required to operate not less than 82,000 acute care beds and not less than 9,000 nursing home beds.

By statutorily mandating minimum and maximum numbers of beds Congress will stop the erosion of hospital beds that has occurred against our will during the past decade.

During the past 10 years VA has lost 10,000 to the bureaucratic cutting at the Office of Management and Budget. This is directly contrary to the documented need for greater numbers of beds throughout the system as stated in the VA's 1978 report on the aging veteran.

The VA's own 1978 report on the aging veteran documents the need for 125,000 beds by the turn of the century. Instead, needed beds are being taken out of service. This provision would reverse that confounding trend and assert the will of Congress over the VA hospital system.

Mr. EDGAR. Let us join in recognition, as the gentlewoman has said, that the controversy rests in the minds of the Vietnam veterans. Let us ease that controversy by unanimously passing this piece of legislation.

Mr. MOTTL. Mr. Speaker, I yield 3 minutes to the distinguished gentleman from Michigan (Mr. BONIOR), who is not a member of the committee but has done a yeoman's job on behalf of the Vietnam veteran.

Mr. BONIOR of Michigan. Mr. Speaker, on Thursday, last week, two Vietnam veterans ended a multiday hunger strike. They had sought through that hunger strike to communicate to America and its Government something of the needs felt by Vietnam veterans.

Their plea was not new to many of the Members of this House. We have all heard it before in the letters we receive from Vietnam veterans, in town hall meetings, in the briefings of our case workers. But it was no less urgent for being less new. Listen to their plea: "Extend and properly fund the readjustment counseling program." "Recognize and deal with the real problem of agent orange." "Develop inpatient psychiatric care in the VA hospitals which is appropriate to the needs of posttraumatic-stress-disorders, delayed-stress."

That is not a radical agenda. Nor a frivolous one, as the Members of this body know, the need has been well documented.

Documented in the 1976 National Academy of Science study which raised serious questions about the quality of VA psychiatric care;

Documented in the Forgotten Warrior project, funded by the Disabled American Veterans and run by Dr. John Wilson, which laid out the readjustment problems faced by Vietnam veterans;

Documented in the 1979 and 1981 Center for Policy Research Studies, done under a Veterans' Administration (VA) contract, which confirmed the underlying conclusions of Dr. Wilson and specificially called for an outreach program similar to the readjustment counseling program;

Documented in the European epidemiological studies, made public by the gentleman from South Dakota and myself, which demonstrated a correlation between exposure to 2,4,5-T, a major ingredient in agent orange, and cancer.

Today, this body takes action which will answer the pleas of Vietnam veterans.

Today, this body acts unequivocally to extend the readjustment counseling program for 3 years.

Today, this body breaks new ground by clarifying and establishing that veterans with health problems related to exposure to agent orange are eligible for health care.

Today, this body asserts its continuing concern that agent orange research be allowed to forcefully pursue

the most effective channel, whatever that channel may be.

Today's action reflects the leadership of several members of the Veterans' Affairs Committee who have acted to insist that we meet our national obligation. The chairman of the subcommittee, Mr. MOTTL, the ranking minority member of the subcommittee, Mr. HAMMERSCHMIDT, the chairman of the full committee, who has worked to bring a new direction to the committee, Mr. MONTGOMERY, and the gentleman from South Dakota, the present chairman of the Vietnam veterans in Congress, Mr. DASCHLE, who joined by the gentleman from Pennsylvania, Mr. EDGAR, has served as a crucial ambassador for Vietnam veterans of the committee, also Mr. EDWARDS of California and Mrs. HECKLER of Massachusetts. I extend them my thanks.

In acting today, we have not answered every need, which, of course, we may never be able to do. But we have started. In acting today, we have not guaranteed that what we pass will be finally enacted, and then properly implemented. But we have shown our resolve.

Let us carry that resolve with us as we face some of the outstanding problems:

The need for carefully and specifically designed psychiatric in-patient facilities for Vietnam veterans will remain.

But that does not require legislation. The VA could do that today, under existing authority.

Let the VA and the new administration show its resolve as well by demonstrating the regional availability of special psychiatric wards for Vietnam veterans.

The problem of implementation will still loom over us, a discouraging burden.

The magnitude of this problem can be suggested by the fate of the readjustment counseling program during fiscal year 1981—this fiscal year.

Appropriated for the program was $30 million. This included a $6 million increase for new staff and new centers, available for implementation in December of 1980.

While the Carter administration implemented the new funds, the Office of Management and Budget under the new administration first froze that implementation in January, and then in March deferred it until nearly the end of this fiscal year. As we talk today, the money is not yet in place.

Delaying expansion, however, was only a part of the problem. As the VA has itself testified, over and above the freeze and deferral, an additional $12 was reprogramed to cover hospital operation costs, not the costs of the vet centers.

Consider the bottom line: The program was budgeted for $30 million; $6 million was impounded, leaving $24 million; $12 million was then reprogramed, leaving approximately $12 million as the final budget.

The program received only 40 percent—less than half—of the money Congress appropriated for it.

What is even more startling is that while the reprograming is, arguably, a "normal" exercise of the Executive's "abnormal" discretion over spending, the impoundment of the $6 million was clearly illegal. Two separate rulings by the General Accounting Office (GAO) had made that clear.

For some reason, the Executive was so intent on ending this program that they would not only oppose its extension, they would not only reprogram 40 percent of the budget, but they would also illegally impound an additional 20 percent more. The message to Vietnam veterans was clear.

But so also was the message to Congress. At stake in the Executive action was the fundamental question of whether the Executive will abide by Congress control over spending.

As Members of this body know, these issues are being resolved now in the courts through a law suit brought by myself and other Members of Congress—some of whom are on the floor here today. Additional efforts to compel the Executive to abide by congressional intent have been brought by others, including the chairman of the Committee on Veterans' Affairs, Mr. MONTGOMERY, and the chairman of the Appropriations Subcommittee, Mr. BOLAND. Finally, the Congress is expected to act this week to explicitly disapprove the Executive's decision to defer funding.

I am increasingly confident that the Executive will bend to the will of Congress—better late than never. I have always been confident that the courts will uphold the law and protect the integrity of the congressional spending power.

But let today's actions send a clear signal. Our resolve is firm.

We act today not only to extend the program, but to communicate our insistence that the intent of Congress be fulfilled in the implementation of the program.

Let the time end where Vietnam veterans must go on hunger strikes as a plea for action.

I would like to close with a question to the distinguished chairman of the subcommittee, Mr. MOTTL.

I am concerned about OMB's persistent statement that Congress did not specifically intend that the readjustment counseling program be implemented through the so-called store front Outreach centers based in the community, outside the traditional Veterans' Administration regional centers and hospitals. In my mind, the legislative history has clearly established that Congress did specifically intend that the program be run through such vet centers. Would the chairman comment? Is it his understanding as well, that the committee clearly intends the program be run through separate vet centers like the 91 now in existence?

Mr. MOTTL. If the gentleman will yield, it is the legislative intent of the subcommittee—I am speaking also for the full committee—that they be allowed to sustain themselves to 91. We expand this program as Outreach.

Mr. BONIOR of Michigan. I thank the gentleman for his comment.

I would note that, of course, the committee has already, in part, made clear that intent within their report. I refer, for example, to the statement on page 5 of the report, which states, the centers are "unique and should be allowed to operate outside VA facilities * * *".

Nor was this question left open in the past. The committee clearly stated their intent that the program be community based on page 23 of the report to the House bill which originally established the program, House Report No. 96-140, where the committee said:

> The committee feels the readjustment counseling provided under the reported bill should be community oriented if it is to be effective, and that vigorous outreach must be undertaken . . .

Mr. MOTTL. Mr. Speaker, I yield such time as he may consume to the very distinguished and capable representative of Puerto Rico (Mr. CORRADA), who looks out for the veterans' best interests in Puerto Rico.

Mr. CORRADA. I thank the gentleman for yielding.

Mr. Speaker, I rise in strong support of H.R. 3499, the Veterans' Health Care Act of 1981. This legislation encompasses different health provisions for veterans.

As Resident Commissioner from Puerto Rico, I can attest to the strong support of all island veterans' organizations for this important bill.

The bill has three main purposes. The first is to allow Vietnam veterans to receive Veterans' Administration hospital and nursing home care for conditions which a VA doctor determines may be associated with exposure while serving in the Republic of Vietnam to phenoxy herbicides and chemicals used as defoliants including agent orange. In areas where no such physician is available, the determination can be made by a physician carrying out such functions under contract or fee arrangement.

The second purpose is to allow the VA to expand the scope of the ongoing study of the health effects of agent orange exposure to include the possible health effects of exposure to other toxic chemicals used in Vietnam.

The third main purpose is to extend through fiscal year 1984 the current

VA psychological readjustment counseling program for Vietnam veterans. The present program is scheduled to expire at the end of fiscal year 1981.

The bill also contains three other provisions: First, it permits the VA to recover the costs of veterans' non-service-connected care if the disability is covered by State workers' compensation plans, by State-required no-fault automobile insurance, or by State "victims of crimes" compensation.

Second, extends the authority of the VA to contract for the care of U.S. veterans in the Republic of the Philippines through fiscal year 1986; it authorizes funds to replace and upgrade VA medical equipment in the Philippines; and it terminates VA's authority at the end of fiscal year 1981 to contract for the care of veterans who served in the Philippines' armed services.

Third, it extends the authority of the Veterans' Administration to provide contract hospital care and medical services to veterans in Puerto Rico and the Virgin Islands through September 30, 1982.

This will permit uninterrupted continuation of services to our veterans population and offers the Congress the needed additional time to consider the merits of the Veterans' Administration's "Report to Congress on Health Care for Veterans in Puerto Rico and the Virgin Islands." This report will indeed be very helpful in the future consideration of a definite path which will lead to offer adequate medical assistance to veterans in Puerto Rico and the Virgin Islands.

Mr. Speaker, this legislation is not only important to our veterans, but essential to our most recent veterans—those of the Vietnam war. More than any other veteran in the history of our Nation, the Vietnam veteran has suffered from neglect by our Government. Having fought in an increasingly unpopular war from which we retreated in defeat, the Vietnam veteran returned to a nation which wanted to forget that era. Instead of receiving the support and appreciation warranted by his response to his country's call to duty, all Vietnam veterans fell victims to the charges that they were drug addicts, malcontents, and suffering from emotional problems. But while being ready to label them in those terms, we have not often stood willing to give them our assistance and help. Only those that served in Vietnam can truly understand the tremendous disappointment in realizing that their sacrifices in the battlefield were for naught; but we can insure that we live up to the commitments that as a nation we have always made to our veterans. This legislation, Mr. Speaker, fulfills a part of that commitment. I urge all my colleagues to vote in favor of this legislation.

Mr. MOTTL. Mr. Speaker, last but not least, I yield 4 minutes to the gentleman from South Dakota (Mr. DASCHLE), the very capable Representative who continues to champion the cause of the Vietnam veteran in the committee as well as in the Congress of the United States.

□ 1330

Mr. DASCHLE. Mr. Speaker, I have been on the House floor many different times over the last 2½ years and I have to say without question that this is one of my finest moments. It is a moment that I will treasure for as long as I am in politics, as long as I am in Government.

I want to thank, in the most sincere fashion, the chairman of this subcommittee, the chairman of the Committee on Veterans' Affairs and the ranking members for their unequivocal support of this most important effort. We have waited too long, Mr. Speaker, for the kind of support that we see here today. We have waited for years to be able to come home and tell these Vietnam veterans for the first time we are listening. We are listening to the problems that they have with psychological abuse, and with drug abuse. We are listening to the problems that they have in finding a need for employment and someone to talk to, but we are listening for the first time.

And it is to their credit and to the credit of those people who have worked as hard as they have on this legislation, that today we come with a unanimous voice.

Last week, Richard Cohen wrote in the Washington Post that it is unfortunate that we have to see the victims to appreciate the pain. For 10 years we have heard about the pain, we have heard about those victims of agent orange. Today, for the first time, we can tell those victims, yes, we are listening and we are doing something about it.

For the first time we are going to give you the kind of priority medical treatment that you deserve as victims of the last war, and indeed, we intend to build upon that kind of service.

We are going to continue to listen and continue to build on the documentation that we have as a responsibility in the Veterans' Affairs Committee by building on the research and the study that we have authorized through this legislation in agent orange.

So, I commend the chairman. I commend these Members for their persistent effort and I commend the veterans for their effort over these last 10 years, many times a lonely, desperate and very, very frustrating effort to get this Congress to come to the position we are today.

The legacy of agent orange has been with most of us only since 1977, yet it is one of the most unusual and controversial issues our Government has faced in many years. The Veterans' Committee has taken a genuinely substantive and proper step by approving legislation I originally introduced in H.R. 2953 which will provide priority medical care for Vietnam veterans suffering from effects which may be related to agent orange or perhaps other chemicals used in Southeast Asia. This step will in the short term alleviate much of the financial burden on many of these men currently under treatment for chronic health problems and assure them that the Veterans' Administration and the Congress are concerned and willing to provide the treatment necessary to correct these conditions. Pending the completion of VA, Air Force, and Center for Disease Control studies on this issue, the subject of compensation will be addressed. I wish to assure both my colleagues and the 2.8 million veterans who served in Vietnam that if exposure to agent orange, or any other chemical used in Vietnam, is found to be detrimental, I will seek final approval of legislation I have introduced which authorizes compensation (H.R. 2493).

H.R. 3499 takes another very important step by reauthorizing the Vietnam Veterans' Outreach centers for an additional 3 years. The centers, many of them in operation for barely a year have been visited by over 56,000 veterans and 23,000 family members. A recent study commissioned by the VA estimated that as many as 450,000 additional veterans may be suffering from delayed stress. Without question, the unique and peculiar nature of the war itself and the treatment faced upon returning home has left many of these men bitterly frustrated and alienated from conventional VA sources of assistance. The peer group counseling network utilized at the centers has been endorsed by a number of reputable organizations. The Center for Policy Research, which recently finished a massive study on the readjustment problems of Vietnam veterans, has concluded that this approach is the best method available to reach out and bring these men back into the mainstream of society. I am most pleased that the committee disregarded the Reagan administration's request to discontinue the program. I fail to understand how the President could consider Vietnam a noble war, but its veterans unworthy of treatment to counter the side effects of the war itself and the bitterness and disillusionment they felt upon their return home.

This legislation also makes necessary refinements in the VA's epidemiology study, as proposed by the Scientific Panel of the Interagency Work Group. These changes will allow the VA to consider the effects of herbicides other than agent orange, pesticides,

and other chemicals which were extensively used in Vietnam.

Another very important provision in this legislation deals with the subject of hospital and nursing home beds in the VA hospital and health-care system. The Office of Management and Budget (OMB) has in recent years initiated a most unfortunate trend by forcing reductions in the number of beds and medical personnel maintained by the VA. The practical effect of this policy has been that the VA has been unable to provide the care and services mandated by the Congress and veterans are often denied care they have been promised. H.R. 3499 will require that no less than 82,500 hospital and 9,000 nursing home beds be maintained in the VA health and hospital care system. Passage of this legislation will thus help the VA resist continued OMB encroachment and allow the VA to provide the quality care veterans have come to expect. This is especially important in view of the fact that most World War II veterans are now in their sixties and will increasingly need the services which the VA now provides.

I wish to offer my gratitude to the members of the committee, especially the chairman of the Subcommittee on Hospitals and Health Care, Mr. MOTTL, the ranking minority member, Mr. HAMMERSCHMIDT, and the full committee chairman, Mr. MONTGOMERY, for their dedication and support in advancing this legislation. Together, the provisions of H.R. 3499 form a package which addresses the most imminent needs and concerns of America's Vietnam veterans. Though the answers are not yet all in concerning the effects of exposure to agent orange, we are going to provide the basic health care needs these men deserve and require until the effects of agent orange are more clearly understood. Though the agony and disillusionment of the war and return home cannot totally be erased, we are going to provide an outlet for the venting of these frustrations. And finally, though our Vietnam experience will haunt this Nation for many years to come, we can and have come to terms with Vietnam, and truly separated the "war from the warrior."

● Mrs. COLLINS of Illinois. Mr. Speaker, it is with great pride that I rise today to express support for a number of bills on which the House will vote on relating to veterans. I would specifically like to highlight:

H.R. 3499, the Veterans' Health Care Act of 1981, which would extend the Vietnam-era veterans' readjustment counseling program, provide medical care for Vietnam veterans exposed to herbicide defoliants—including agent orange—and to recover the cost of health care provided by the VA.

As a cosponsor of H.R. 2157, which would provide a presumption of service connection for veterans exposed to herbicides during the Vietnam era, I was pleased that this bill was encompassed in H.R. 3499.

H.R. 3423, the Veterans' Training and Business Loan Act of 1981, which provides vocational education and training opportunities for Vietnam-era veterans and disabled veterans. The disturbing reality is that a large percentage of Vietnam veterans have not successfully adjusted to civilian life. On top of feeling ignored, Vietnam veterans experience drug and alcohol problems, along with lack of proper job training and jobs. In a study prepared for the Veterans' Administration entitled, "Legacies of Vietnam: Comparative Adjustment of Veterans and Their Peers," it was recommended that the period of eligibility for GI education and training benefits be extended and training benefits be targeted to reach chronically unemployed veterans. The Committee on Veterans' Affairs, in response to these and other recommendations, has reported a bill to isolate and target job training and placement for those veterans of the Vietnam era still experiencing employment problems.

H.R. 1100, would expand the eligibility of former prisoners of war for certain health-care benefits provided by the Veterans' Administration. This bill changes from 6 months to 60 days the length of time a former POW must have been interned to establish a presumption of service connection for certain diseases. This legislation is important in that it assures former POW's of compensation and health care benefits for all their disabilities which were attributed to their internment.

Accordingly, I look forward to my colleagues joining me in voting for final passage of these bills.●

● Mr. GILMAN. Mr. Speaker, I take this opportunity to express my support, with some reservation, for H.R. 3499, the Veterans' Health Care Act of 1981.

Of course, Mr. Speaker, I fully support the provisions in this bill that have the highly laudatory effect of liberalizing the services available to our Nation's veterans. I particularly applaud the committee's decision to extend the eligibility for health care to individuals who were exposed to agent orange and who, in the judgment of Veterans' Administration physicians, are suffering from health problems because of that exposure. This eligibility is temporary, however, pending the expected September 1981 completion of a study of the effects of agent orange mandated by Public Law 96-151.

However, it is with respect to that study that I differ with the committee and I regret that we are taking this bill up under the suspension of the rules procedure. If we were free to offer an amendment, Mr. Speaker, I would move to incorporate into this bill the provisions of H.R. 1962, which I have introduced and which has been cosponsored by 33 of my colleagues. That bill would amend Public Law 96-151 to provide that the study be transferred from the VA to the National Academy of Sciences. I am convinced that a study done by the National Academy of Sciences, in cooperation with the VA, would result in a study that would be more credible to the veterans whom it would affect most specifically—the veteran who has been exposed to agent orange, who fears that his health may have been affected, and who, based on its record on this issue, mistrusts the VA's ability to conduct an unbiased study.●

● Mr. EDWARDS of California. Mr. Speaker, I rise in support of H.R. 3499, the Veterans' Health Care Act of 1981. As a member of the Committee on Veterans' Affairs, and of its Subcommittee on Hospitals and Health Care, I am proud of the measure before us today.

I would like to commend the distinguished chairman of our committee, the gentleman from Mississippi (Mr. MONTGOMERY) for the leadership he has shown in shepherding this bill, as well as the various other bills we have considered this week dealing with veterans benefits and services, through the House. I would also like to compliment the gentleman from Ohio and the chairman of the Subcommittee on Hospitals and Health Care, Mr. MOTTL, for the key role he has played in the drafting of this legislation.

H.R. 3499 is an excellent bill containing a number of important provisions which our chairman has outlined for us. If I may, however, I would like to take a moment to highlight a few of the key features of the bill.

Under this legislation, the Veterans' Administration would be authorized to provide hospital care to Vietnam veterans if VA physicians determine that such care is necessary for the treatment of a condition that may be associated with exposure to agent orange. This provision provides a workable, fair, and immediate solution to a problem of serious concern to many Vietnam veterans.

There is not yet conclusive evidence of the effects of exposure to agent orange on Vietnam veterans. The VA is conducting ongoing research in this area, and in fact the provisions of this bill would expand the scope of their study. However, while this research continues, there is a need to treat health care problems that may arise among veterans who served in Southeast Asia when there is reason to believe that the problem could have been caused by exposure to this herbicide. H.R. 3499 will enable the VA to

provide such care now, even though the results of ongoing studies will not be reached for several more years. I think our enactment of this measure will help to alleviate concerns which I have heard expressed by many Vietnam veterans who fear for their health because of their exposure to agent orange.

Another crucial provision of H.R. 3499 is that which extends Operation Outreach, the VA's highly successful program of readjustment counseling, for another 3 years. Under this legislation, the program, which is due to expire this fall, would be continued until October 1, 1984.

In January of this year, I introduced H.R. 747, which also proposed a 3-year extension of Outreach, I did so because all the available evidence suggested that the readjustment difficulties of Vietnam-era veterans continued to be significant. Evidence also demonstrated that in their short time of operation, the 91 community-based, storefront centers established as Operation Outreach had been remarkably successful in reaching out to a segment of the Vietnam veteran population that had come to feel alienated from the Veterans' Administration as well as other governmental insititutions.

I should take this opportunity to thank the 100 of my colleagues, from both sides of the aisle, who cosponsored H.R. 747. Their support was gratifying. Even more gratifying was the outpouring of support and encouragement I received from Vietnam-era veterans throughout the country. The hundreds of letters I received from these veterans—and from their families and friends—demonstrated vividly how effective Operation Outreach has been. In case after case these letters explained how the readjustment counseling services of Operation Outreach had helped veterans—10 years—15 years—or more after their service—to finally put the war behind them and take their place as productive members of their communities.

Reading these letters and listening to the testimony presented to the committee by the veterans organizations and experts in the area of readjustment counseling affirmed my belief that we would be doing a grave disservice to our Nation's veterans if we did not extend Operation Outreach.

I am pleased, therefore, that the bill which the committee adopted, and which is before us today, contains language to keep Operation Outreach in business for another 3 years.

I strongly support this measure. I hope that we can approve the bill unanimously, and that the Senate will schedule it for prompt consideration.●

● Mr. MONTGOMERY. Mr. Speaker, this is a very important bill that will enhance the medical care and treatment for our Nation's veterans. I want to compliment the distinguished gentleman from Ohio, RON MOTTL, for the tremendous work he has done in bringing this bill to the floor.

Mr. Speaker, I might point out that a major provision of this bill is contained in section 4. This section of the bill would extend, by 3 years, the period during which Vietnam-era veterans may receive psychological readjustment counseling. The enactment of this provision of the bill will mean that Vietnam veterans will have an opportunity to participate in the Outreach center program for another 3 years. It has been a very successful program.

I want to pay special tribute to the Honorable DON EDWARDS, the very able gentleman from California and the ranking majority member of the full committee for sponsoring this legislation. DON EDWARDS was instrumental in bringing about the legislation that created these Outreach centers. He was a strong advocate in conference with the other body when we resolved our differences and agreed to establish these centers. We are grateful to DON EDWARDS, Mr. Speaker, for working so closely with the former chairman of the subcommittee, Dave Satterfield of Virginia, in passing the enabling legislation creating this particular program.

Mr. Speaker, this is a good measure. It is well within the budget targets contained in the first budget resolution and I would urge my colleagues to support the bill.●

● Mr. MOFFETT. Mr. Speaker, I rise today to renew my commitment to the health and well-being of our Vietnam veterans through my support for the Veterans' Health Care Act. This legislation before us today provides for the special health needs of thousands of Vietnam veterans who were exposed to the herbicide agent orange and for those who have had psychological difficulties readjusting to civilian life. I believe that the passage of the Veterans' Health Care Act will go a long way toward insuring these veterans that Congress has no intention of betraying their needs.

Unfortunately, many Vietnam veterans fear that they have been betrayed by proposed VA budget cutbacks. The President's recommendation that the psychological counseling program not be continued has sparked cries of betrayal and injustice from veterans across the Nation. The modest funding level of the counseling program belies its remarkable reach and effectiveness; thousands of Vietnam veterans have received counseling services in the short time that the program has been operative. It took 10 years for Congress to enact the readjustment program—this is reprehensible enough. To discontinue the program now, in the face of recent studies on the stress and disorders so many Vietnam veterans suffer, would indeed be a betrayal—a betrayal to the veterans themselves, their families, and the entire Nation which prides itself on the deeds of its veterans. Today's legislation extends the counseling service through fiscal year 1984 and it deserves our hearty support.

The Veterans' Health Care Act provides another significant health-care service for Vietnam veterans: VA health care for those veterans suffering from exposure to agent orange. I have made public statements about the VA and its inadequate treatment of the agent orange problem. At the risk of repeating myself, I will say again that a recent VA survey shows that VA doctors are not discussing results of their tests with potential agent orange victims, that many Vietnam veterans believe the VA is giving their possible agent orange-related symptoms short shrift, and that the VA has indirectly acknowledged existence of the problem. This problem is a wide range of disabling ailments, which many believe are connected to agent orange exposure. These ailments include liver damage, cancer, and reproductive system damage resulting in stillbirths, miscarriages, and the bearing of children with severe birth defects. The Veterans' Health Care Act would allow Vietnam veterans suffering from possible agent orange-connected disabilities to receive VA hospital care. It has taken the VA 2 years to contract out an agent orange health study. Let's not allow any further dragging of the heels in providing vital health care services for disabled Vietnam veterans.

In conclusion, I urge my colleagues to sign their names on the dotted line of this figurative letter of commitment to Vietnam veterans by supporting the Veterans' Health Care Act. There are many veterans in this country who feel that a gap is yawning before them and at the far side of that gap recede veterans' health programs. With the Reagan administration yet to announce a successor for the VA Administrator position, I can understand why any veteran would feel like crying Judas. Let us give them the chance to cry hurrah instead.●

Mr. MOTTL. Mr. Speaker, in conclusion we want to especially thank the gentleman from South Dakota (Mr. DASCHLE) and the gentleman from Mississippi (Mr. MONTGOMERY) for their leadership on this legislation, and especially the ranking minority member, the gentleman from Arkansas (Mr. HAMMERSCHMIDT), who contributed a great deal in being here on the floor today.

Mr. Speaker, at this point I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Ohio (Mr. MOTTL)

that the House suspend the rules and pass the bill, H.R. 3499, as amended.

The question was taken.

Mr. EDGAR. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to the provisions of clause 5, rule I, and the Chair's prior announcement, further proceedings on this motion will be postponed.

GENERAL LEAVE

Mr. MOTTL. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and to include extraneous matter on the bill, H.R. 3499, just considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Ohio?

There was no objection.

CONSTRUCTION AND ACQUISITION OF NATIONAL CEMETERIES

Mr. MONTGOMERY. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 2136) to amend title 38, United States Code, to revise the provisions of such title relating to the construction and alteration of, and acquisition of land for, national cemeteries, as amended.

The Clerk read as follows:

H.R. 2136

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) section 1006 of title 38, United States Code, is amended to read as follows:

"§ 1006. Construction and alteration of, and acquisition of land for, national cemeteries

"(a) For purposes of this section:

"(1) The term 'alter', when used with respect to a cemetery, means to remodel, improve, or expand the cemetery.

"(2) The terms 'construct' and 'alter', when used with respect to a cemetery, include such preliminary planning, engineering, architectural, legal, fiscal, and economic investigations and studies and such surveys, designs, plans, working drawings, specifications, procedures, and other similar actions as are necessary for the construction or alteration, as the case may be, of the cemetery.

"(3) The term 'cemetery' means any cemetery (or any part of a cemetery) that is, or will be, under the jurisdiction of the Veterans' Administration as part of the National Cemetery System, including necessary roadways and necessary facilities (including superintendent's lodges, chapels, crypts, mausoleums, and columbaria).

"(b) No cemetery may be constructed or altered by the Administrator, and no land to be used as the site for, or for the expansion of, any cemetery may be acquired by the Administrator except in accordance with this section.

"(c) In carrying out this section, the Administrator—

"(1) shall provide for the location of cemeteries in a manner that results in the equitable distribution of cemeteries throughout the United States, taking into consideration the comparative urgency of the need for each particular cemetery; and

"(2) shall give due consideration to excellence of design.

"(d)(1) Subject to subsection (e) of this section, the Administrator may construct or alter any cemetery and may acquire, by purchase, condemnation, donation, exchange, or otherwise, such land or interests in land as the Administrator considers necessary for use as the site for such construction or alteration.

"(2) Any site authorized to be acquired under this section may be acquired without regard to title III of the Federal Property and Administrative Services Act of 1949.

"(3) Whenever the Administrator determines that any site acquired for the construction of a cemetery is not suitable for that purpose, the Administrator may exchange that site for another site to be used for that purpose or may sell such site without regard to the provisions of the Federal Property and Administrative Services Act of 1949.

"(e)(1) No appropriation may be made for the construction or alteration of any cemetery, or for acquisition of any land to be used as the site for (or for the expansion of) any cemetery, if such construction, alteration, or acquisition involves a total expenditure by the United States of more than $500,000, unless a document setting forth the proposed construction, alteration, or acquisition is first submitted by the Administrator to the Committees on Veteran's Affairs of the Senate and House of Representatives and, before the expiration of ninety days of continuous session of Congress following the date on which such document is so submitted, neither such committee adopts a resolution stating in substance that it does not favor the proposed construction, alteration, or acquisition.

"(2) For purposes of paragraph (1) of this subsection—

"(A) continuity of a session of Congress is broken only by an adjournment sine die; and

"(B) days on which either House is not in session because of an adjournment of more than three days to a day certain are excluded in the computation of the ninety-day period.

"(3) Each document submitted to the Committees on Veterans' Affairs of the Senate and House of Representatives under paragraph (1) of this subsection shall contain—

"(A) a brief description of the cemetery to be constructed or altered or of the land to be acquired for cemetery purposes; and

"(B) an estimate of the cost to the United States of such construction, alteration, or acquisition.

A copy of each such document shall be delivered to both such committees on the same day and on a day in which both Houses of Congress are in session.

"(4) The estimated cost of any construction, alteration, or acquisition not disapproved under paragraph (1) of this subsection (as such estimated cost is set forth in the document submitted to the Committees on Veterans' Affairs under such paragraph) may be increased by the Administrator by an amount equal to the percentage increase, if any (as determined by the Administrator), in construction, alteration, or acquisition costs, as the case may be, from the date of submission of such document to the date of contract, but in no event may the amount of the increase exceed 10 per centum of such estimated cost.

"(5) The Administrator may not enter into any project for any construction, alteration, or acquisition described in subsection (d)(1) of this section for which the estimated cost is not more than $500,000 before the expiration of sixty days beginning on the date on which the Administrator submits a report of the facts concerning the proposed construction, alteration, or acquisition to the Committees on Veterans' Affairs. Any such report shall be submitted to such committees on the same day. After entering into any such project, the Administrator shall report to such committees not less often than every two years on the progress of the project.

"(f)(1) The Administrator may carry out any construction or alteration authorized under this section by contract if the Administrator considers it to be advantageous to the United States to do so.

"(2) The Administrator may obtain, by contract or otherwise, and without regard to the civil service laws and regulations, the services of individuals who are architects or engineers and of architectural and engineering corporations and firms, to the extent the Administrator may require such services for any cemetery authorized to be constructed or altered under this section.

"(3) No corporation, firm, or individual may be employed under the authority of paragraph (2) of this subsection on a permanent basis.

"(4) The Administrator shall be responsible for all construction and alteration authorized under this section, including the interpretation of construction contracts, the approval of materials and workmanship supplied pursuant to a construction contract, approval of changes in the construction contract, certification of vouchers for payments due the contractor, and final settlement of the contract.

"(5) The authority of the Administrator to enter into contracts under this section is subject to the availability of appropriations for that purpose.

"(g)(1) The Administrator shall submit to Congress not later than January 31 of each year a report showing the location, space, cost, and status of each construction, alteration, or acquisition authorized under this section that was uncompleted as of the date of the last preceding report made under this paragraph.

"(2) The Administrator shall make such cemetery project surveys as may be requested by resolution by the Committee on Veterans' Affairs of the House of Representatives or the Committee on Veterans' Affairs of the Senate, and within a reasonable time, but not later than six months after the date of the adoption of any such resolution, shall make a report thereon to Congress. Such report shall contain, with respect to any such project, the information specified in subsection (e)(3) of this section.

"(h) The Administrator shall make a continuing investigation and survey of the needs of the National Cemetery System in order to carry out this section.".

(b) The item relating to section 1006 in the table of sections at the beginning of chapter 24 of such title is amended to read as follows:

"1006. Construction and alteration of, and acquisition of land for, national cemeteries.".

SEC. 2. Section 1004 of title 38, United States Code, is amended by striking out sub-

section (b) and by redesignating subsections (c) through (g) as subsections (b) through (f), respectively.

SEC. 3. (a)(1) Chapter 24 of title 38, United States Code, is amended by adding at the end thereof the following new section:

"§ 1009. Contributions to local authorities

"The Administrator may make contributions to local authorities toward or for the construction of traffic controls, road improvements, or other devices adjacent to a national cemetery if the Administrator considers such traffic controls, road improvements, or devices necessary for safe ingress to, or egress from, such cemetery. The authority of the Administrator to make contributions under this section is subject to the availability of appropriations for that purpose.".

(2) The table of sections at the beginning of such chapter is amended by adding at the end thereof the following new item:

"1009. Contributions to local authorities.".

(b) Section 1009 of title 38, United States Code, as added by subsection (a), shall take effect on October 1, 1981.

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from Mississippi (Mr. MONTGOMERY) will be recognized for 20 minutes, and the gentleman from Arkansas (Mr. HAMMERSCHMIDT) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Mississippi (Mr. MONTGOMERY).

Mr. MONTGOMERY. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, the enactment of H.R. 2136, as amended, will result in better planning and operation of our national cemetery system. The purpose of this measure is to permit greater oversight into the construction and alteration of, and acquisition of land for, national cemeteries. It will not result in any Federal outlays and will greatly assist the Committee on Veterans' Affairs in carrying out its oversight responsibilities.

Mr. Speaker, I now yield such time as he may consume to the chairman of the Subcommittee on Housing and Memorial Affairs, the gentleman from Texas (Mr. LEATH).

Mr. LEATH of Texas. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I rise in support of H.R. 2136. H.R. 2136 would revise current procedures relating to the construction or alteration of a cemetery, or the acquisition of land for a new cemetery, or the expansion of an existing cemetery.

Under the bill, no appropriation shall be made to construct or alter, or to acquire land to be used as the site for, or for the expansion of any cemetery if such construction, alteration, or acquisition involves a total expenditure of more than $500,000 unless a detailed document justifying these actions is submitted to the House and Senate Committees on Veterans' Affairs, and before the expiration of 90 days of continuous session of Congress following submission of the document, neither committee adopts a resolution that it does not favor the proposed action.

The bill further provides that the Administrator may not enter into any construction, alteration, or acquisition under $500,000 before the expiration of 60 days after the date on which he submits a report of the facts concerning such proposed action to the House and Senate Veterans' Affairs Committees. The Administrator shall report to the committees every 2 years on the progress of the project.

Mr. Speaker, the rules of the House of Representatives place oversight and legislative responsibilities with the Committee on Veterans' Affairs for cemeteries of the United States in which veterans of any war or conflict are or may be buried, whether in the United States or abroad, except cemeteries administered by the Secretary of the Interior.

Mr. Speaker, I believe that oversight responsibility without authorization authority is largely meaningless. I believe the enactment of this bill will enhance the committee's ability to carry out its responsibilities.

Mr. Speaker, I urge the adoption of H.R. 2136.

Mr. MONTGOMERY. Mr. Speaker, I reserve the balance of my time.

Mr. HAMMERSCHMIDT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 2136, a bill to revise current procedures relating to the construction and acquisition of land for national cemeteries.

This measure was the subject of recent hearings before our Subcommittee on Housing and Memorial Affairs under the able guidance of the gentleman from Texas, Chairman LEATH, and the former ranking minority member, the late Tennyson Guyer of Ohio and his successor as ranking minority member, the distinguished gentleman from Michigan (Mr. SAWYER). Testimony was received from the Veterans' Administration and the major veterans organizations.

Mr. Speaker, the Committee on Veterans' Affairs is vested with both legislative and oversight responsibility for the National Cemetery System, according to the rules of the House of Representatives. Notwithstanding the clear jurisdictional mandate set forth in the rules, the Veterans' Administration arbitrarily selects sites for national cemeteries subject only to the availability of funds.

The bill before us will require authorization action by the House and Senate Committees on Veterans' Affairs on any cemetery construction or site acquisition project costing in excess of one half million dollars before any funds can be appropriated.

Mr. Speaker, until 1979, Veterans' Administration hospital construction operated in the same manner, with construction of new or replacement hospitals subject only to the funding limitation. Now, hospital construction must be authorized in the same manner as this bill will do for cemetery construction.

I would anticipate that the procedures authorized by this measure will operate as effectively as the procedures currently used in hospital construction.

Mr. Speaker, I urge that the bill be passed.

Mr. Speaker, at this time I yield 2 minutes to the gentleman from Michigan (Mr. SAWYER), the ranking minority member of the subcommittee.

Mr. SAWYER. Mr. Speaker, I thank the gentleman for yielding.

Mr. Speaker, I rise in support of H.R. 2136, a bill that would give the House and Senate Veterans' Affairs Committees effective oversight over the expansion and development of our national cemetery system.

This legislation revises procedures for acquiring land or making improvements where the total expenditure exceeds $500,000. In accordance with its provisions, no appropriation of this order could be made unless a detailed document justifying the project was submitted to the two Veterans' Affairs Committees. The committees would have 90 days of continuous session of Congress to disapprove the action.

While the Committee on Veterans' Affairs has oversight responsibility for the national cemetery system, the Veterans' Administration has taken the position it has blanket authority to establish and locate national cemeteries without regard to Congress judgments in these matters.

I believe, Mr. Speaker, that orderly development of the national cemetery system requires active oversight and approval by the authorizing committees of Congress. Accordingly, I support this measure and urge my colleagues to do likewise.

Mr. HAMMERSCHMIDT. Mr. Speaker, I have no further requests for time, and I yield back the balance of my time.

Mr. MONTGOMERY. Mr. Speaker, I strongly support enactment of this bill, as amended, and hope it will receive the unanimous approval of the House.

I have no further requests for time, and I yield back the balance of my time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. MONTGOMERY) that the House suspend the rules and pass the bill, H.R. 2136, as amended.

The question was taken.

Mr. HAMMERSCHMIDT. Mr. Speaker, on that I demand the yeas and nays.

The yeas and nays were ordered.

The SPEAKER pro tempore. Pursuant to the provisions of clause 5, rule I, and the Chair's prior announcement, further proceedings on this motion will be postponed.

GENERAL LEAVE

Mr. MONTGOMERY. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks and to include extraneous matter on the bill, H.R. 2136, just considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

VETERANS' MEMORIAL HEADSTONES AND MARKERS

Mr. MONTGOMERY. Mr. Speaker, I move to suspend the rules and pass the bill (H.R. 1714) to amend title 38, United States Code, to authorize the Veterans' Administration to furnish memorial headstones or markers to commemorate veterans who by choice are buried at sea, who donate their bodies to science, or who are cremated and have their ashes scattered without interment, as amended.

The Clerk read as follows:

H.R. 1714

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That subsection (b) of section 906 of title 38, United States Code, is amended to read as follows:

"(b) The Administrator shall furnish, when requested, an appropriate memorial headstone or marker to commemorate any veteran—

"(1) whose remains have not been recovered or identified;

"(2) whose remains were buried at sea, whether by the veteran's own choice or otherwise;

"(3) whose remains were donated to science; or

"(4) whose remains were cremated and the ashes scattered without interment of any portion of the ashes, for placement by the applicant in a national cemetery area reserved for such purpose under the provisions of section 1003 of this title, in a State, private, or local cemetery, or in any other appropriate location that is designated by the next of kin and that the Administrator, in the Administrator's discretion and having due regard for the circumstances in each case, approves.".

SEC. 2. Subsection (a) of section 1003 of title 38, United States Code, is amended to read as follows:

"(a) The Administrator shall set aside, when available, suitable areas in national cemeteries to honor the memory of members of the Armed Forces and veterans—

"(1) who are missing in action;

"(2) whose remains have not been recovered or identified;

"(3) whose remains were buried at sea, whether by the member's own choice or otherwise;

"(4) whose remains were donated to science; or

"(5) whose remains were cremated and the ashes scattered without interment of any portion of the ashes.".

SEC. 3. The amendments made by this Act shall take effect on October 1, 1981, and shall apply with respect to the furnishing of memorial headstones or markers to commemorate veterans dying on or after December 7, 1941.

The SPEAKER pro tempore. Pursuant to the rule, a second is not required on this motion.

The gentleman from Mississippi (Mr. MONTGOMERY) will be recognized for 20 minutes, and the gentleman from Arkansas (Mr. HAMMERSCHMIDT) will be recognized for 20 minutes.

The Chair recognizes the gentleman from Mississippi (Mr. MONTGOMERY).

Mr. MONTGOMERY. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I want to call to the attention of the House that this legislation was introduced by our distinguished colleague from Hawaii (Mr. HEFTEL). I am pleased to say that he called this matter to the attention of the committee.

Mr. Speaker, I now yield such time as he may consume to the chairman of the Subcommittee on Housing and Memorial Affairs, the gentleman from Texas (Mr. LEATH).

Mr. LEATH of Texas. I thank the gentleman for yielding.

Mr. Speaker, I rise in support of H.R. 1714. H.R. 1714 as reported is a bill to amend title 38, United States Code, to authorize the Veterans' Administration to furnish memorial headstones or markers to commemorate veterans who by choice are buried at sea, who donate their bodies to science, or who are cremated and have their ashes scattered without interment.

The headstone or marker could be placed in a national cemetery area reserved for such purpose, State, private, or local cemetery or any other appropriate location designated by the next of kin.

The benefit would be retroactive to December 7, 1941, so that it would include veterans dying in World War II, Korea, the Vietnam conflict, and thereafter.

Enactment of H.R. 1714 will have no inflationary impact. The Congressional Budget Office advises that the cost of this bill would be insignificant.

Mr. Speaker, I urge the adoption of H.R. 1714.

Mr. MONTGOMERY. Mr. Speaker, I thank the chairman of the subcommittee.

Mr. Speaker, I would like to reserve my time so that the ranking minority member on this committee could make his remarks. Then I will yield time to the gentleman from Hawaii (Mr. HEFTEL).

Mr. HAMMERSCHMIDT. Mr. Speaker, I yield myself such time as I may consume.

Mr. Speaker, I rise in support of H.R. 1714, a bill to authorize the furnishing of a headstone or memorial marker for certain deceased veterans whose remains for one reason or another cannot be interred.

I also want to commend the distinguished chairman of our Subcommittee on Housing and Memorial Affairs, the gentleman from Texas (Mr. LEATH) and the ranking member, Mr. SAWYER of Michigan, the other members of the subcommittee for their prompt action in bringing to the floor this measure that will eliminate a longstanding inequity in the law.

Existing law, Mr. Speaker, authorizes the furnishing of headstones or markers on behalf of veterans whose remains were not recovered or identified or who were buried at sea. It does not, however, authorize a memorial of this nature for the veteran who, by choice, was buried at sea, or for the veteran whose remains were donated to science or were cremated and the ashes scattered without interment. This measure will permit the furnishing of markers or headstones in such cases.

The bill will also permit the veteran's marker to be placed in the memorial area of a national cemetery that is presently limited to honoring the memory of members of the Armed Forces.

Mr. Speaker, this bill will eliminate inequities in existing law at a minimal cost to the Government. I urge that it be approved.

Mr. Speaker, at this time I yield 2 minutes to the gentleman from Michigan (Mr. SAWYER).

Mr. SAWYER. I thank the gentleman for yielding.

Mr. Speaker, I rise in support of H.R. 1714. While this is a relatively small group of individuals affected, those who choose burial at sea, those who choose cremation with their ashes being scattered, and those who donated their bodies to science, it seems to me there was an omission in the law that this clarifies and plugs and makes it equitable to that small group of people.

□ 1345

Mr. HAMMERSCHMIDT. Mr. Speaker, I have no further requests for time, and I reserve the balance of my time.

Mr. MONTGOMERY. Mr. Speaker, I am pleased to yield 3 minutes to the sponsor of this legislation, the gentleman from Hawaii (Mr. HEFTEL).

Mr. HEFTEL. Thank you, Mr. Chairman.

Mr. Speaker, I particularly want to thank the chairmen of the committee and the subcommittee, Mr. MONTGOMERY and Mr. LEATH of Texas; Mr. HAMMERSCHMIDT, the ranking minority member, for the expeditious manner in which they moved this legislation once the matter was brought to their attention.

I particularly want to thank Mrs. Beverly Brew Miranda, of Kula, the island of Maui in Hawaii, who brought it to my attention when she found that her husband, who had elected to have his body donated to medical science, could not be memorialized in the Cemetery of the Pacific.

Once I learned of the problem and introduced the legislation and discussed it with the chairmen of the committee, I found that they were so responsive and moved so very quickly that it is a testimonial to the way in which we function and in the extent to which we care.

I am delighted to be able to participate in bringing this to the floor, and I urge its adoption.

Mr. MONTGOMERY. Mr. Speaker, I certainly hope that we will have unanimous adoption of this piece of legislation.

Mr. Speaker, I have no further requests for time.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. MONTGOMERY) that the House suspend the rules and pass the bill, H.R. 1714, as amended.

The question was taken; and (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

The title was amended so as to read: "A bill to amend title 38, United States Code, to authorize the Veterans' Administration to furnish memorial headstones or markers to commemorate veterans who by choice are buried at sea or who donate their bodies to science, and for other purposes."

A motion to reconsider was laid on the table.

GENERAL LEAVE

Mr. MONTGOMERY. Mr. Speaker, I ask unanimous consent to revise and extend my own remarks, and that all Members may have 5 legislative days within which to revise and extend their remarks and to include extraneous matter on the bill just considered.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Mississippi?

There was no objection.

ANNOUNCEMENT BY THE SPEAKER PRO TEMPORE

The SPEAKER pro tempore. Debate has been concluded on all motions to suspend the rules.

Pursuant to clause 5, rule I, the Chair will now put the question on each motion on which further proceedings were postponed in the order in which that motion was entertained, and then on which further proceedings were postponed on Monday, June 1, 1981, in the order in which that motion was entertained.

Votes will be taken in the following order:

H.R. 3499, by the yeas and nays;
H.R. 2136, by the yeas and nays;
H.R. 3337, by the yeas and nays;
H.R. 1100, by the yeas and nays;
H.R. 3423, by the yeas and nays;
H.R. 2039, by the yeas and nays; and
H. Con. Res. 76, by the yeas and nays.

The Chair will reduce to 5 minutes the time for any electronic votes after the first such vote in this series.

VETERANS' HEALTH CARE ACT OF 1981

The SPEAKER pro tempore. The pending business is the question of suspending the rules and passing the bill, H.R. 3499, as amended.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Ohio (Mr. MOTTL) that the House suspend the rules and pass the bill, H.R. 3499, as amended, on which the yeas and nays are ordered.

The vote was taken by electonic device, and there were—yeas 388, nays 0, not voting 42, as follows:

[Roll No. 54]

Mr. Leland with Mr. Frost.
Mr. Fuqua with Mr. Gray.
Mr. Nelson with Mr. Wirth.
Mr. Washington with Mr. Roe.
Mr. Stump with Mr. Wilson.
Mr. Dingell with Mr. Foglietta.

So, two-thirds having voted in favor thereof, the rules were suspended and the bill was passed.

The result of the vote was announced as above recorded.

A motion to reconsider was laid on the table.

Mr. HAWKINS. Mr. Speaker, I ask unanimous consent for the immediate consideration of an identical Senate bill (S. 1070) to extend the authorization for youth employment and demonstration programs, and for other purposes.

The Clerk read the title of the Senate bill.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

The Clerk read the Senate bill, as follows:

S. 1070

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Youth Employment Demonstration Amendments of 1981".

SEC. 2. Section 112(a)(4) of the Comprehensive Employment and Training Act is amended by adding at the end thereof the following new subparagraph:

"(D) There are authorized to be appropriated such sums as may be necessary for the fiscal year 1982 to carry out part A of title IV.".

SEC. 3. Section 441 of the Comprehensive Employment and Training Act is repealed.

The Senate bill was ordered to be read a third time, was read the third time, and passed, and a motion to reconsider was laid on the table.

A similar House bill, H.R. 3337, was laid on the table.

GENERAL LEAVE

Mr. HAWKINS. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the Senate bill just passed.

The SPEAKER, pro tempore. Is there objection to the request of the gentleman from California?

There was no objection.

PRISONER-OF-WAR BENEFITS AND HEALTH-CARE SERVICES ACT OF 1981

The SPEAKER pro tempore. The unfinished business is the question of suspending the rules and passing the bill, H.R. 1100, as amended.

The Clerk read the title of the bill.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr.

MONTGOMERY) that the House suspend the rules and pass the bill, H.R 1100, as amended, on which the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 394, nays 2, not voting 34, as follows:

□ 1445

The Clerk announced the following pairs:

Mr. Mollohan with Mr. Carney.
Mr. Brooks with Mr. Broomfield.
Mr. Zablocki with Mr. Pashayan.
Mr. Nelson with Mr. Marlenee.
Mr. Harkin with Mr. Badham.
Mrs. Bouquard with Mr. Dickinson.
Mr. Fary with Mr. Evans of Iowa.
Mr. Savage with Mr. Hillis.
Mr. Price with Mr. Schulze.
Mr. Fuqua with Mr. Walker.
Mr. Florio with Mr. Washington.
Mr. Flippo with Mr. White.
Mr. Roe with Mr. Stump.
Mr. Stratton with Mr. Wirth.
Mr. Foglietta with Mr. Frost.
Mr. Leland with Mr. Grisham.

So (two-thirds having voted in favor thereof) the rules were suspended and the bill, as amended, was passed.

The result of the vote was announced as above recorded.

The title was amended so as to read: "A bill to amend chapter 37 of title 38, United States Code, to authorize the Administrator of Veterans' Affairs to guarantee home loans with provisions for variable-payment plans, and for other purposes."

A motion to reconsider was laid on the table.

SENSE OF CONGRESS FOR SECRETARY OF ARMY TO PLACE PLAQUE IN ARLINGTON NATIONAL CEMETERY FOR ARMED FORCES MEMBERS WHO DIED IN IRANIAN HOSTAGE RESCUE ATTEMPT

The SPEAKER pro tempore. The unfinished business is the question of suspending the rules and agreeing to the concurrent resolution, House Concurrent Resolution 76.

The Clerk read the title of the concurrent resolution.

The SPEAKER pro tempore. The question is on the motion offered by the gentleman from Mississippi (Mr. MONTGOMERY) that the House suspend the rules and agree to the concurrent resolution (H. Con. Res. 76) on which the yeas and nays are ordered.

The vote was taken by electronic device, and there were—yeas 391, nays 0, not voting 39, as follows:

[Roll No. 60]

Mr. Early with Mr. Foglietta.
Mr. Price with Mr. Nelson.
Mr. Washington with Mr. Stump.
Mr. Stratton with Mr. White.
Mr. Wirth with Mrs. Bouquard.
Mr. Albosta with Mr. Grisham.

So (two-thirds having voted in favor thereof) the rules were suspended and the concurrent resolution was agreed to.

A motion to reconsider was laid on the table.

PERSONAL EXPLANATION

Mr. CHAPPELL. Mr. Speaker, on rollcalls 54, 55, and 56, I was unavoidably detained and could not be present.

Had I been present, I would have voted "yea" on each one.

TRIBUTE TO DR. HOWARD W. THURMAN

(Mr. DYMALLY asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. DYMALLY. Mr. Speaker, the death of Dr. Howard W. Thurman—preacher, theologian, mystic, and writer—in San Francisco on April 9, 1981, removed from the American scene one of its most distinguished religious thinkers. Born into a family one generation removed from slavery in Daytona, Fla., Dr. Thurman rose to a position of international preeminence. Persons such as Mahatma Gandhi and the mystic Rufus Jones were among his intimate friends.

The city of Washington, D.C., was graced with Dr. Thurman's presence during the years he served as dean of the chapel and professor at Howard University. He subsequently held the position of dean of Marsh Chapel at Boston University and was cofounder of one of the first genuinely integrated churches in this Nation, the Church of the Fellowship of All Peoples in San Francisco.

A primary religious concern which consumed much of Dr. Thurman's reflection, preaching, and writing was "the search for common ground," that is, the unity between God and man, and between man and man, which transcended human divisions and arrangements with respect to religion and life. Though he took seriously the presence of contradictions and polarities in human communities and institutions, he expressed the faith that "in God there are no contradictions."

At the time of his death, Dr. Thurman was head of Howard Thurman Educational Trust, a nonprofit foundation dedicated to providing scholarship aid to students in higher education; to the distribution of books, tapes, and papers by Thurman; and to the convening of seminars and conversations focusing his thought.

The author of 22 books and over 200 articles, Howard Thurman's contributions to the intellectual and spiritual life of the past several decades are beyond measure. The world is richer for his having lived in it.

LEGISLATIVE PROGRAM

(Mr. LOTT asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. LOTT. Mr. Speaker, I take this time to inquire of the distinguished majority leader as to what the schedule will be for the rest of the week.

Mr. WRIGHT. Mr. Speaker, will the distinguished acting minority leader yield?

Mr. LOTT. I yield to the majority leader.

Mr. WRIGHT. I thank the gentleman for yielding.

The schedule for the remainder of the week is that on tomorrow we will have a session but a pro forma session with no legislative business, in honor of the passing of our late and beloved colleague, the Honorable Carl Vinson of Georgia, who will be buried tomorrow.

□ 1500

It is possible that a quorum call might be requested tomorrow. While there will be no legislative business, there will be the swearing in of our new colleague, the gentleman from Maryland, Steny Hoyer.

On Thursday, we will have two items of business which we hope to conclude on that day. We will meet at 10 o'clock on Thursday, and the first order of business will be the conference report on the supplemental appropriations bill.

Following that, we will take up H.R. 3455, the military construction authorization.

If we are able to complete those two on Thursday, there will not be any business on Friday.

Mr. LOTT. I thank the gentleman for that schedule.

THE LATE HONORABLE CARL VINSON

(Mr. EVANS of Georgia asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. EVANS of Georgia. Mr. Speaker, I have the sad duty of informing you that former Representative Carl Vinson, who served as a Member of Congress for over 50 years from the great State of Georgia, passed away.

Representative Vinson was a man unsurpassed in his dedication to my home State and to the security of our Nation. His service as chairman of the Armed Services Committee is unmatched in fervor to the extent that Georgia will forever be honored by his memory. His name has been placed above the door of the Armed Services Committee Room.

Congressman JACK BRINKLEY and I have reserved time for a special order to pay tribute to Carl Vinson on Wednesday, June 10. I invite all of my colleagues to participate at that time in memory of a great Georgian and a great American.

THE TWO TAX PACKAGES

(Mrs. SCHROEDER asked and was given permission to address the House for 1 minute and to revise and extend her remarks.)

Mrs. SCHROEDER. Mr. Speaker, I just wanted to say how very disgusted I have been with the press of late on this whole issue of the two tax packages. I really think they have been treating it like a sporting event and I really hope the Speaker would have a press conference and give them a little pop quiz.

I am not sure they really have any idea what the real issues and the real differences between the two packages are. I do not think people understand that the reason the Democrats are so concerned is we want to do away with the marriage penalty tax, and we would like housewives to be able to have a retirement account, and we would like very much for middle-income people between $15,000 and $50,000 to be able to have the major portion of the tax cut, and that we are very worried about having a cut for more than 1 year and make sure we do it one at a time.

It is very easy to get votes for another cut next year if everything is working well.

I hope he gives this little pop quiz to the press, and I hope they know what this is about, and I hope they understand this is not a ball game; this is a very serious economic issue that this House is going to have to deal with.

SMALL BUSINESS TAX ACT OF 1981

(Mr. RUSSO asked and was given permission to address the House for 1 minute and to revise and extend his remarks and include extraneous matter.)

Mr. RUSSO. Mr. Speaker, smaller businesses are the overwhelming majority of business firms in the United States. During the last several years, these smaller businesses have been competing in a marketplace that has become increasingly more concentrated on the largest firms. Smaller businesses are not able to compete effectively when most of the rules of the game favor the larger firm. As all costs are rising each year, it is the small firm that is least able to cope with the higher cost of capital, labor, and taxes. In recent years small businesses have been faced with the nearly impossible task of expanding business while interest rates on loans have climbed above the previously unheard of 20-percent level. Smaller firms are generally more labor intensive. These firms hire more new workers than big firms. The new jobs that should be available from smaller businesses will materialize only if the firm hiring the new worker will realize greater productivity. Increased productivity for workers goes hand-in-hand with more efficient use of capital. Relief from the present burden of Federal income tax for small businesses is a step in the right direction. It will help to remove some

of the obstacles to capital expansion and productivity.

The bill that I am introducing today is the result of serious consideration to the needs of small business. It addresses these needs without losing sight of the general tax policy goals of equity and simplicity. Too often Congress has set forth with the best intentions to enact tax laws that seek to aid small businesses only to arrive at rules whose complexity defeats their purpose. This bill would provide tax rules that are easily understood, but hopefully would not provide new opportunities for tax shelter artists. As the Ways and Means Committee considers the several proposals for depreciation reform and individual tax cuts, I am hopeful that the plight of small businesses will be remembered. This bill may be easily coordinated with a simplified depreciation system.

Under the bill, small businesses could annually elect to take an immediate deduction for up to $25,000 of tangible personal property placed in service during the year instead of recovering the property's cost through depreciation. The investment credit would not be allowed for amounts expensed in this manner. This provision would greatly simplify capital cost recovery for small business. It would allow most firms to use one class and 1-year writeoff for all of their capital expenditures.

My bill would also widen the corporate income tax brackets. Graduated corporate income tax brackets were first enacted in 1978. Under present law, the corporate tax rates range from 17 percent on the first $25,000 to 46 percent on amounts over $100,000. This bill would expand each of these brackets to $37,500, with top rate of 46 percent on amounts over $150,000.

The double taxation of dividends is a problem often cited by smaller firms. My bill would help to alleviate this problem for most small firms by not taxing the first $100,000 of a small corporation's taxable income paid to shareholders as dividends for the taxable year. Taxable income in excess of the first $100,000 of dividends paid would continue to be taxed at the normal corporate rates. Thus, a small business corporation with $200,000 taxable income paying out at least $100,000 in dividends for the taxable year would be taxed only on $100,000—at the regular corporate rate. A small business corporation would be defined as a domestic corporation with not more than $1 million received as a contribution to capital or as paid-in surplus. This proposal has been carefully drafted to avoid the pitfall of creating additional potential for tax abuse.

The bill would also double the investment credit used property limitation. Under present law, the investment credit is allowed only on the first $100,000 of used property purchased each year. This limit would be increased to $200,000. I am hopeful that the Ways and Means Committee will review this used property limitation during the consideration of depreciation changes. The investment credit must be closely coordinated with depreciation reform. I am hopeful that the committee will view favorably a significant increase in the used property limitation. Under a new capital cost recovery system, the distinction between new and used property could be eliminated if appropriate recapture rules were devised.

Under present law, a 10-percent investment tax credit is allowed for the rehabilitation of buildings which are at least 20 years old which are used by the taxpayer in its trade or business.

In order to encourage the rehabilitation of older buildings, many of which are used by small businessmen, the bill would change present law to allow a 15-percent rehabilitation credit for buildings at least 30 years old, a 20-percent credit for buildings at least 40 years old, and a 25-percent credit for a certified rehabilitation of a certified historic structure. For purposes of this provision, certified historic structures include certified historic residential rental properties. No credit would be allowed for buildings less than 30 years old.

The bill also provides that the investor who acquires preferred stock in new corporations may realize ordinary losses if the venture fails. This tax treatment is presently available under section 1244 of the Tax Code, but it is limited to shareholders of common stock only. Extending ordinary loss treatment to losses on preferred stock issued by a small business to an individual shareholder would benefit the risk-taking investors whose finances support many new corporate ventures.

The bill would also increase the maximum number of shareholders in a subchapter S corporation from 15 to 25. Subchapter S allows certain small business corporations to elect not to be taxed at the corporate level, but pass all income or loss through to the shareholders. This proposal would allow more small businesses to take advantage of subchapter S.

The bill also requires the Treasury Department to complete, within 1 year of enactment, a detailed study of the appropriate methods of tax accounting for inventory during periods of inflation. This Treasury study would also require Treasury to report on ways to simplify inventory accounting for small businesses. The present accounting rules are very complex. Smaller firms are often placed in a disadvantageous position compared to larger firms that are much better able to cope with these problems. After receiving this detailed analysis, the Ways and Means Committee and the Senate Finance Committee will be in a better position to enact new accounting rules that will meet the smaller firm's requirements during periods of inflation.

FIRSTHAND CRITICISM

(Mr. WYDEN asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. WYDEN. Mr. Speaker, a lot of experts have criticized the Reagan administration's proposals to cut social security. But I received a letter last week from a working wife in Portland, Oreg., that says it all.

The letter is from Mrs. Donna Miller, 8312 SE. Oak Place, and here is what she said:

I can't believe it!! I'm absolutely stunned about the penalties President Reagan wants to put on Social Security for age 62 recipients.

Once again the working people get penalized. We plod along working most of our lifetimes, trying to raise our families, pay our taxes, pay our own medical bills, receiving no help from anyone—and we're the ones who lose when budget cuts are made.

My husband, age 54, has been a welder for over 25 years. While laid off last year, he had a heart attack. We'd paid the insurance premium so our hospital bills were 80 per cent covered, but because he was laid off work at the time, we were not eligible for disability payments or unemployment, of course. So, we survived on my salary of $500 a month. We tightened our belts and made it, all on our own, with no help from anyone.

We have a mobile home, and a little house on our own lot. We live in the mobile home, and let my 80-year-old widowed mother live in the house, rent free, so that she can have enough money from her Social Security to buy decent food and pay her heat bills. Mama is diabetic.

It is most difficult for my husband to work as hard as he does since his heart attack, but he does, because he must.

When he asked the Employment Division if they could help retrain him to an easier job, the answer was no. The doctor had released him for work, and he had been welding since the heart attack, so that was that.

We've tried to plan for our retirement so our bills will be paid for by the time my husband would retire at age 62, so we can live on Social Security as comfortably as possible. But how can we retire at a 55 percent cut of his earned benefits?

He's paid in to Social Security all his working days. By the way, I am 47 years old, so it puts an added burden on us, as I couldn't collect any retirement for 7 years after my husband.

Jobs are nil, crime runs wild, and now our President wants to punish us further because we want to retire at age 62. I so wish he was in our shoes for a while, so he'd know how it feels to suffer through layoffs, worry about medical bills and have the rug pulled out from under you, when all you want is to retire and live a few years without job worries.

I'm scared, I'm mad and I feel completely defeated.

THE INTERPARLIAMENTARY UNION SPRING MEETING, MANILA, PHILIPPINES

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. PEPPER) is recognized for 60 minutes.

Mr. PEPPER. Mr. Speaker, at the end of April, I had the distinct privilege and pleasure of serving as chairman of a House delegation, appointed by the Speaker to represent the U.S. House of Representatives at the spring meeting of the Interparliamentary Union held in Manila, Philippines. I have requested this special order today so that members who attended that important international conference of parliamentarians can report on the accomplishments.

As with all recent IPU sessions, the Manila meeting provided the best opportunity available in the world today for parliamentarians of many lands to gather together to discuss significant world issues. Through IPU meetings it has even been possible for parliamentarians to discover areas of agreement and to publish joint resolutions designed to encourage their respective governments to develop and implement policies for which there is wide popular support among citizens of the world.

The IPU has been in existence now for nearly a century and has throughout that period given important impetus to positive international efforts by encouraging international arbitration and conciliation. Ninety-four countries are now members of the IPU, and 560 members of parliaments from 80 countries attended the meeting in Manila. Representatives from many international organizations, such as the United Nations organizations, also attended as observers. Needless to say, given the many representatives from developing and developed countries and from the many continents, diversity of views and points of disagreement were very apparent. The sharing of these different views and the negotiation process of the drafting sessions allowed all the parliamentarians ample opportunity to learn clearly where other parliaments stand.

My colleagues in the House who participated in the Manila meeting deserve high commendation for their diligence and persistence in representing the United States and carrying messages on issues very important to Americans. Representative EDWARD J. DERWINSKI, designated by the Speaker to serve as House vice chairman, through his many and longstanding contacts with other parliamentarians who regularly attend IPU sessions and his enthusiasm for making the American participation a success, performed great service. The other delegation members included Representatives J. J. PICKLE, E (KIKA) DE LA GARZA, GEORGE E. DANIELSON, DAVID R. BOWEN, ANTONIO WON PAT, ROBERT MCCLORY, and GUY VANDER JAGT. We from the House were complemented by a highly qualified Senate group, headed by Senator ROBERT T. STAFFORD, that also included Senators QUENTIN N. BURDICK and HOWARD W. CANNON.

Our delegation was a fine example of bipartisan and bicameral cooperation.

With pride I can report that each and every member of our delegation was intensely engaged in the activity of the conference. Our delegation presented four American draft resolutions which we defended as positions worthy of international support. Obviously with the give and take on negotiation in the drafting committees, all of the American positions were not adopted. But we can be satisfied that other nations' parliamentarians are now better aware of American views.

Five of our delegates spoke formally to the meeting to explain views on the agenda issues, and U.S. delegates participated on all five drafting committees established to compose draft resolutions that serve as the communiques of parliamentarian opinion of the IPU. Some of the drafting lasted late into the night.

The issues before us in Manila were important ones and included arms control and disarmament, Parliaments and human rights, energy, the U.N. International Year of Disabled Persons and decolonization. These issues were fully debated in Manila, and draft resolutions on them were adopted for consideration by all national groups before final adoption at the fall conference.

In statements and negotiation, U.S. delegates were quite forceful in making clear how we view these matters. Our delegates reaffirmed opposition to the Soviet occupation of Afghanistan and the insistence that they withdraw their armed troops from Afghan soil. We also stressed how disastrous any Soviet military intervention in Poland would be. On the question of the disabled persons, I personally spent hours together with other parliamentarians, shaping a resolution that should add momentum to international efforts on behalf of these very disadvantaged people. This resolution, specially adopted unanimously by the Interparliamentary Council in Manila, urges greater efforts to facilitate the integration of disabled persons into economic, social, and cultural development and recommends a number of concrete actions to ease and prevent disability. This resolution of the IPU complements efforts of our own body on behalf of the disabled, such as embodied in House Concurrent Resolution 55.

The Manila meeting also devoted special attention to the energy crisis, human rights, and decolonization. Resolutions on these subjects contain many helful suggestions and should be considered. Some of the ideas advanced, however, particularly concerning energy and decolonization, go way beyond what the American Congress would support. I am sure that U.S. delegates to the fall conference will want to propose amendments that could make IPU positions on these matters more universally approved.

In conclusion, the Manila IPU meeting was a productive and enlightening session. Opinions of the world's parliaments were registered so we can move ahead better informed of possibilities and obstacles. Methods and program proposals were advanced that deserve study. A final report, detailing more fully the results of the meeting, will be published in the near future.

Mr. DANIELSON. Mr. Speaker, will the gentleman yield?

Mr. PEPPER. I yield to the gentleman from California (Mr. DANIELSON).

Mr. DANIELSON. I thank the gentleman for yielding.

Mr. Speaker, the spring meeting of the Interparliamentary Union held at Manila, Republic of the Philippines, during the period of April 20 to 25, 1981, was my first opportunity to serve on our delegation. The experience was for me a most exciting and informative one. The opportunity to meet with, work with, and debate the important issues facing the world today with fellow parliamentarians from throughout the world was both unique and valuable. Our cochairmen, the Honorable CLAUDE PEPPER, of Florida, from the House of Representatives and the Honorable ROBERT T. STAFFORD from the Senate assigned me to the Committee on Parliamentary, Juridical, and Human Rights Questions. I feel that I was most fortunate in that assignment. During the days of the spring meeting our committee concentrated on the subjects of human rights and the various international treaties and agreements implementing human rights policies throughout the world. I personally took up the subject of international terrorism since it is clear to me that terrorism is the most palpable and vicious form of the violation of human rights. On behalf of our group I also advocated that parliaments throughout the world take an evenhanded approach to the consideration of human rights violations and that the people of the world, and their parliaments, should be objective in evaluating the conduct of all regimes, be they authoritarian or democratic, and should get away from the tendency to apply an international double standard in the field of human rights. Too often, in my opinion, we have looked upon conduct by one regime differently than we look upon identical conduct by other regimes solely be-

cause of our relationships to those several regimes.

A text of my speech on that subject, which I made before my subcommittee on Wednesday, April 22, 1981, follows:

STATEMENT OF REPRESENTATIVE GEORGE E. DANIELSON

Mr. Chairman, and Fellow Parliamentarians, the question before us is what role Parliaments can play to control governmental activity on human rights, and what Parliaments can do to promote adherence to and the effective implementation of meaningful international standards on human rights.

The recognition of international standards of conduct on human rights has been a part of the basic tradition of the United States for more than 200 years—at least as far back as the American Declaration of Independence—in 1776.

Ever since that time civil, political and economic rights have been the basis of our legal system and the United States Congress has enacted innumerable laws to secure those rights for individual Americans. Certainly, and historically, there have been those for whom full respect for human rights have been denied. But a free and independent Congress—a President freely elected by and responsible to the people—a free, inquisitive and courageous press, and a people blessed with the rights of freedom of thought and speech, have provided the self-criticism needed to bring about improvements where improvements have been necessary.

We in the Congress strongly supported the emphasis laid by the U.S. delegation to the recent Geneva session of the UN Human Rights Commission on the grievous threat to human rights posed by the rising tide of terrorism in the world today—much of it sponsored from abroad.

Terrorist attacks on life, liberty and security of person are attacks on the very governmental and political structures which provide and protect those rights. Terrorists believe that their violent acts will compel the abandonment of the defense of those rights and thus bring about the destruction of a free society. As the direct representatives of the people, we in the Parliaments should condemn and strongly resist this terrorist assault on fundamental freedoms and on our free institutions.

At the HRC session in Geneva the U.S. delegation also protested the violation of another fundamental human right—the freedom of a people to choose their own political system, free from coercion, from intimidation, and from external interference.

We in the United States believe that all governments derive their just powers from the consent of the governed. Yet, today we see glaring examples of human oppression imposed from abroad: by Soviet troops in Afghanistan, which the IPU deplored last September in Berlin. The threat of foreign intervention since has been raised by the Soviets and their surrogates against the stirrings of the human spirit in Poland. By condemning such moves and by supporting effective government counter-measures, Parliaments can register their determined opposition to these massive violations of human freedom.

In my country the Congress has enacted laws to integrate the consideration of human rights into foreign policy and to serve as a policy guide for the Executive. We have legislated to include human rights criteria as conditions to the granting of foreign assistance. We have insisted upon scrutiny of the human rights records of other nations as well as our own.

As an example, the U.S. Congress created a Commission on Security and Co-Operation in Europe to monitor and report on compliance with the Helsinki Final Act, including its Principle Seven, on Respect for Human Rights and Fundamental Freedoms, including Freedom of Thought, Conscience, Religion and Belief. We know that the United States record on human rights is good, and we know that our compliance with the Helsinki accords can stand up to close inspection.

At the same time, on the part of some signatories, we note wide discrepancies between their performance and their obligations to abide by the human rights provisions of the Final Act. Some of these same signatories argue that the examination and discussion of their human rights record by others constitutes interference in their internal affairs and that it is contrary to other provisions of the Helsinki accords. To this we reply that the matter of compliance with the provisions of the accords is a matter of legitimate and proper concern for all of the signatories. We will continue to monitor, and we will continue to press for full compliance. To do less would render that great effort but an idle act. No country's human rights record should be above scrutiny, or beyond criticism, whatever the country and whatever its political system.

We have observed that closed, totalitarian regimes, with their endemic oppression of human rights, often virtually escape international censure, while more open societies may be judged much more harshly. We parliamentarians know, all of us know, that all societies, all regimes, should be held accountable to the same, commonly-accepted, standards on human rights. Parliaments can, and should, press for this needed objectivity and even-handedness, and for the elimination of an international "double standard" in the field of human rights.

The new U.S. Administration is currently reviewing four international human rights conventions submitted earlier by President Carter to the Senate for ratification. These are: the International Covenant on Economic, Social and Cultural Rights; the International Covenant on Civil and Political Rights; the International Convention on the Elimination of All Forms of Racial Discrimination; and the American Convention on Human Rights. While this process is underway, the U.S. delegation to the recent HRC meeting in Geneva joined in backing a consensus resolution urging support of the two above UN covenants, and it strongly supported the HRC's adoption of the Declaration on the Elimination of All Forms of Intolerance based on Religion or Belief.

Mr. Chairman, while understanding the desire of governments to weigh carefully, as ours is doing, the legal and other implications of international human rights instruments to which they have not yet adhered, we call on all countries to fulfill their commitments under those instruments to which they have already subscribed. Only thus can we hope to realize the high intentions expressed and give them genuine impact on the human rights and the lives of our peoples.

Mr. Speaker, I am pleased to announce that I was assigned to the drafting subcommittee on my committee. In drafting our committee's resolution, I was able to include a provision to condemning terrorism and violence in all forms as grave threats to the assurance of human rights.

As I said before, Mr. Speaker, I found my service on our delegation to the Interparliamentary Union to be most valuable and rewarding. I hope that it will be my good fortune to participate in future work of that fine group.

Mr. McCLORY. Mr. Speaker, will the gentleman yield?

Mr. PEPPER. I yield to the gentleman from Illinois.

Mr. McCLORY. I thank the gentleman for yielding and I want to commend the gentleman from Florida for his leadership of the House delegation at the Interparliamentary meeting in Manila and to concur in the remarks the gentleman has addressed that this was a most important meeting.

Mr. Speaker, the subject which was assigned specifically to the Education, Science, Culture, and the Environment Committee, upon which I was named to serve, gave primary consideration to the subject of the Year of Disabled Persons, taking note that the United Nations has designated 1981 as the Year of Disabled Persons.

In this connection, Mr. Speaker, I participated in the preparation of a memorandum which was thereafter filed in behalf of our U.S. group. The memorandum, which outlines activities undertaken by various segments of our Nation, including the private sector, is included at the end of these remarks. In addition, Mr. Speaker, I addressed the members of the committee, briefly sketching the work of the U.S. Council for the International Year of Disabled Persons established by the President and calling attention to the concurrent resolution that was adopted on April 7, 1981 (H. Con. Res. 55) shortly before our delegation departed for the spring conference in Manila.

Mr. Speaker, my remarks to the members of the committee are as follows:

STATEMENT OF REPRESENTATIVE ROBERT MCCLORY (U.S.A.) ON THE YEAR OF DISABLED PERSONS

What should we do as members of the world's parliaments to support and implement the United Nations' action in designating 1981 as the Year of Disabled Persons—in particular disabled children?

We should, indeed, do the best and the most that is possible.

In short, we should share with each other our experiences as members of our respective parliamentary bodies. We should inform, and we should support each other—and we should coordinate our efforts for the maximum good for the largest number of our disabled brothers and sisters of every land—and of every race, color and creed.

It seems to me counter-productive to criticize, to condemn, or to seek to make political propaganda from this issue. To criticize the internal policies of a member nation, or to use this issue as a forum for political debate is a disservice to those whom we wish

to aid—and repugnant to the kind of useful exchanges which the IPU makes possible.

First, of course, we can all participate in a great awareness program to bring to the individual attention of countless millions of our constituents and fellow citizens both the plight and the potential of our disabled brothers and sisters. When we stop to consider that physical and mental disability touches about one out of every ten families, this awareness task seems entirely realizable.

In the United States, both a Presidental proclamation and a Concurrent Resolution of the U.S. House of Representatives and U.S. Senate are directed primarily at bringing the subject of disabled persons to public notice. A postage stamp commemorative of the Year of Disabled Persons will be issued in July.

A full schedule of public events has been planned touching virtually every segment of our society and reaching into every part of our geographic boundaries.

Second, we seek to identify and reach every type of disability and every age of individual with particular influence on young people. It is not simply a federal or national government effort. It seeks, indeed, to reach every subsidiary unit of government and public officials at all levels.

Third, since the maximum benefit can come from individual understanding and cooperation, the governmentally initiated programs in the United States rely substantially on participation by private organizations and persons.

One of my long-time friends, and a fellow alumnus of my college alma mater, and himself a paraplegic—Alan Reich—is President of the U.S. Council for the International Year of Disabled Persons. Already, he has given assurance of a successful national program in my country by securing cooperation in all 50 states on the part of governmental and non-governmental entities.

Let me mention just two projects of special interest to the delegates attending this Spring IPU meeting, namely, (a) a conference of representatives of the disabled community from North and South America and the Caribbean with the plans scheduled for development this month and the full conference to be held in November, and (b) a meeting of selected disabled persons from the developing nations to share experiences and techniques also to take place in November. It is expected that both of these projects will be sponsored by private companies.

Finally, what we have learned and what we discover this year and hereafter we offer for the benefit of disabled persons everywhere. The Year of Disabled Persons is not a goal nor an end in itself. On the contrary, it is a starting point, a launching pad for world-wide cooperation among governments, parliamentarians, and individual citizens and organizations everywhere in behalf of 500 million of our fellow citizens who are disabled and who need us—and whom we need to make this a better and happier world in which to live.

MEMORANDUM PRESENTED BY THE AMERICAN GROUP AT INTER-PARLIAMENTARY UNION

On December 16, 1976, the United Nations General Assembly designated 1981 as a special year in which the needs and aspirations of disabled persons the world over could be addressed. The purpose of the International Year is to promote full participation in society, to promote the achievement of living conditions equal to those of other persons in the country, and to assure disabled persons an equal share in the improvement of living conditions resulting from social and economic development.

On February 6, 1981, President Reagan issued a proclamation stating that through partnerships of disabled and nondisabled persons of private sector and government and of national, state and community organizations, the United States can expand opportunities for disabled persons. These goals are being addressed both at the federal governmental level and by a nationwide organization of entities in the private sector.

A number of statutes have been enacted over the years to help develop services and ensure rights for disabled persons. It is the philosophy of the United States that disability may be ameliorated by early identification and training of young disabled children, by education of disabled youngsters along with nondisabled youngsters when possible, and by vocational training and employment opportunities for disabled adults. The participation in society of disabled persons of all ages offers disabled persons the fullest opportunity for a normal life and gives nondisabled persons the opportunity to personally know and work with disabled persons. Attitudes can be improved by experiences of learning and working together. In the United States the abilities of persons are stressed, and it is well known that for most disabled persons ability far outweighs disability. Efforts are being made to help expand the abilities of impaired individuals and to work to accommodate the disabilities of such individuals. Accommodations made for disabled persons include the accessibility of public buildings, the provision of interpreters for deaf persons and readers for blind persons, and a vast array of technological devices to assist individuals to hear, see, talk, walk, breathe, and otherwise function as normally as possible. Increasingly, disabled persons are participating in the educational, economic, and social life of the United States.

As a means of early identification of disability, low income children are screened for physical and mental deficiencies which could lead to disability if not corrected early. Pregnant women and young children are provided supplementary feeding, if needed, to prevent disability and promote optimal prenatal and early developmental growth.

A free, appropriate education is the right of all handicapped children in the United States. Disabled children are educated in the same setting as nondisabled children, insofar as this is possible, and special assistance and supportive services are provided to the disabled children to enable them to participate in the regular classrooms. Some severely disabled children must be provided their education in a special facility, but efforts are made to integrate such children into normal school activities as much as possible.

Vocational rehabilitiation is provided to disabled persons who require training or special services to prepare themselves for employment. Under this program an individualized plan is prepared for each person to ensure that he or she receives all services necessary to allow the disabled individual to engage in productive activity. The services provided include physical and mental restoration, counseling, college instruction, training in sheltered workshops, transportation, and income maintenance. Many persons in the vocational rehabilitation program receive job training in private industry where such training frequently leads to a permanent job in the private sector. Severely disabled persons who are not able to work are taught the skills necessary to allow them to live within the family or the community as independently as possible.

All programs which receive federal funds must serve disabled persons who would otherwise qualify for these services. Colleges and universities receiving federal funds cannot deny an education to disabled persons who otherwise qualify for entrance into the school. Other federal programs to which this requirement applies include health facilities, public housing, public transportation, and public recreation facilities.

Disabled persons who are unable to contribute toward their own support may qualify for a variety of benefits including medical services, subsidized housing, food stamps and income maintenance.

To prevent disability, a broad research program is underway which includes basic biomedical research, rehabilitation engineering research, and research which addresses the special educational needs of disabled children.

The National Council on the Handicapped has broad responsibility to review and evaluate policies, programs, and activities conducted by federal agencies. Members of the National Council on the Handicapped are representative of handicapped individuals, national organizations concerned with the handicapped, individuals engaged in research related to the handicapped, business concerns, and labor organizations. The Council makes recommendations respecting ways to improve research concerning handicapped individuals and ways to increase the effectiveness of service delivered to handicapped persons. The dissemination and utilization of research findings are also responsibilities of the National Council.

In addition to the governmental activity, the private sector is engaged in furthering the goals of the International Year of Disabled Persons. A broad coalition has been established which includes the corporate community, public interest groups, and state and local governmental groups. This organization, the United States Council on the International Year of Disabled Persons, is promoting programs to implement the following goals:

Expanded educational opportunity;

Improved access to housing, buildings, and transportation;

Greater opportunity for employment;

Greater participation in recreational, social, and cultural activities;

Expanded and strengthened rehabilitation programs and facilities;

Purposeful application of biomedical research aimed at conquering major disabling conditions;

Reduction in the incidence of disability through accident and disease prevention;

Increased application of technology to ameliorate the effects of disability; and

Expanded international exchange of information and experience to benefit all disabled persons.

The U.S. Council has organized a community partnership program, a corporate partnership program, and the Council plans to take special national initiatives involving the public and private sector. The community partnership program is an effort to encourage communities to establish goals and programs. To date, 14,000 mayors and other chief elected officials and all governors have pledged cooperation. The corporate partnership program urges corporations to make a firm commitment to full participation of

disabled persons and to undertake special initiatives. National initiatives of the U.S. Council include activities in the areas of attitudes toward disability, biomedical research, technology, international exchange, and volunteerism.

A major activity of the U.S. Council is the corporate partnership program. Through joint programs with other interested groups such as voluntary and non-profit agencies, organizations of disabled and nondisabled persons, labor unions, and national, state and local governments, private corporations are making a significant contribution to the quality of life of the 35 million disabled persons in the United States. In this way, the United States hopes to demonstrate world corporate social responsibility and create entrepreneurial leadership in this important area of human concern. The following corporate initiatives are currently being undertaken in the United States:

Corporations are seeking to increase employment, including training and recruitment, of handicapped individuals. It is recognized that handicapped persons can be recruited for all levels of employment. Special success is occurring through employment of severely handicapped persons in the computer area, and some corporations have established home-based employment using computers for persons who are unable to travel to work.

Corporations are improving access to buildings and job sites. This increases employment opportunities for handicapped individuals and improves business by making commercial areas accessible to handicapped persons.

Corporations are undertaking programs to positively affect attitudes within the workplace and in the business world generally.

The corporate community is utilizing technology to lessen the effect of disability in the work environment. Devices, such as talking typewriters, reading machines, and broad use of computers are greatly increasing employment opportunities for disabled persons.

Corporations are working to reduce disability-causing accidents and diseases associated with the workplace.

The corporate community is participating in the community partnership program, a U.S. Council activity designed to increase knowledge of, and opportunities for, disabled persons at the community level.

Activities taking place at the community level to commemorate the International Year of Disabled Persons include television programs to increase positive attitudes regarding disabled persons, examination of retail stores to determine accessibility for disabled persons, sports events involving disabled and nondisabled persons, recruitment centers for disabled persons seeking employment, and awareness programs in public schools.

It is the hope of government and corporate leadership in the United States that the activities undertaken in the International Year of Disabled Persons can further the quality of life and the participation in society of disabled persons in the United States and around the world. It is hoped that the sharing of ideas and technology between countries will result in a more productive and satisfying life for all disabled persons.

Mr. Speaker, I have received word, just in the last few days, of the recent passing of the longtime Secretary General of the Interparliamentary Union, André de Blonay.

Mr. de Blonay was a most distinguished Swiss citizen who had a broad background in international organizations. Even before he came to head the Interparliamentary Union in 1953, I should point out that André de Blonay was a celebrated citizen of Switzerland coming from a Swiss family whose roots ran deep in the history of this great little country.

It was during André de Blonay's tenure that the membership of the IPU was expanded substantially to take in representatives from those many other nations whose parliamentary systems differ substantially from the parliaments of the western free world. While many may question the wisdom of this change in the membership rolls of the IPU, there can be no question but that the opportunities for contacts between the representatives of our country and other free world nations increased substantially when membership was granted to the Eastern bloc and other nations having single party parliaments or legislative bodies.

Mr. Speaker, I am sure that all who recall André de Blonay will attest to his skill as an administrator of this great international organization. He provided prestige, distinguished and experienced leadership, and was, himself, a most imposing and commanding personality.

Mr. Speaker, I'm sure I bespeak the sentiments of all of my colleagues, and particularly those of us who have had the opportunity to represent our Nation at meetings of the Interparliamentary Union, in expressing our respect and affection for André de Blonay. Let us also add our sympathy to the surviving members of his family.

Mr. Speaker, may I add these other unrelated comments regarding the recent Interparliamentary Union Conference held in Manila which is the subject of the special order which our colleague from Florida, Chairman of the House Delegation to the Spring Conference, Congressman CLAUDE PEPPER, has reserved. Mr. Speaker, as my colleagues to the Manila conference know, I traveled to Mainland China after departing from Manila. While visiting in the People's Republic of China, I had occasion to visit with the Deputy Secretary of the People's National Congress and with a Vice Chairman of the Standing Committee of the People's National Congress. In these meetings in Peking, I urged these officials of the People's National Congress to consider affiliation with the IPU. Certainly, it would add to the interest and influence of the IPU if parliamentary representatives of the one billion citizens of the People's Republic of China were a part of this great international organization.

Mr. Speaker, without elaborating upon my meetings in the PRC, I wish, merely, to observe that the relations between that country and ours, as evidenced by the words and actions of Chinese officials and citizens alike, are more cordial than at any time in recent history. There is an apparent attitude which permeates the citizenry of the People's Republic of China—an attitude of warmth and of friendship which evidences their strong desire for enhanced economic, political and social ties from which our respective nations and the entire world would seem destined to benefit. Mr. Speaker, based in large part on these observations and the favorable reaction to my initiatives during my conferences in Peking, I am hopeful that the People's Republic of China will affiliate with the IPU and that the delegates representing this great mainland area of Asia will join in forthcoming meetings of the IPU.

Mr. Speaker, finally, may I pay a special tribute to our delegation leader, Senator BOB STAFFORD of Vermont and to my colleagues, Congressman CLAUDE PEPPER of Florida, Chairman of the House group and to Congressman ED DERWINSKI of Illinois and Senator QUENTIN BURDICK, Vice Chairmen of our delegation, for their leadership during this important Spring Conference of the Interparliamentary Union.

Mr. PEPPER. I thank the able gentleman from Illinois, who has been a long-time representative from the House to the Interparliamentary Union and is highly esteemed by the members from all the countries who attend those conferences, and who made a splendid record again this year.

Mr. DE LA GARZA. Will the gentleman yield?

Mr. PEPPER. I yield to the distinguished gentleman from Texas.

Mr. DE LA GARZA. I want to add my commendation to the leadership of the gentleman from Florida that he gave us during all this session that we had in the Philippines, and I say, as a much younger Member, I want to commend him for his untiring effort in our behalf and on how diligently he worked every hour of the working session. I want to thank him also for giving me the honor of serving, of representing our country in the drafting session on the energy issue. This was to me very interesting and certainly quite a challenge. It was with great pride that we were able to have a resolution that was unanimously adopted by the conference, and again, I thank the gentleman for allowing me this privilege and commend him for the excellent leadership which he gives us when we attend these very important sessions.

Mr. PEPPER. I want to thank the very able gentleman from Texas, one of the outstanding members of our

delegation to Manila, for the splendid work he did on the Energy Committee. You may be sure that he had very difficult obstacles to overcome in that committee, where there were so many nations that came from the other part of the world and the other kind of philosophy from ours who were trying to keep us from getting adopted principles that we think make for peace and security in the world.

One of the strong efforts that the distinguished gentleman from Texas and we made was to try to get a declaration of commitment from all the nations, including the Soviet Union, that they would not interfere with the ownership of the oil reserves in their critical areas nor would they interfere with the transportation or accessibility of the oil ports to the ships of the world or the areas that wanted to obtain those supplies. But while we did not get all that we wanted, the gentleman from Texas, by his persistence and the excellence of his efforts, did get a commitment in there that the roots of transportation, the means of access to the oil reserves of the critical oil countries, would be available to all the countries of the world that wanted to purchase in those markets, a very significant recognition.

□ 1515

Let me add that one of the things that the gentleman from Illinois (Mr. MCCLORY) and I were able to get done in that Committee on the Disabled was to get a resolution adopted which called upon the United Nations to establish a special agency, the function of which should be to serve the disabled people of the world.

We are hopeful, therefore, that what we did may have meaning in the lives of many disabled people all over the globe.

May I just add, Mr. Speaker, that we all returned with a warm gratitude in our hearts for the very gracious hospitality extended to our delegations and all those delegations attending the assembly by the distinguished President of the Philippines and his very able and lovely wife. We also are very much indebted to our Ambassador in the Philippines, Mr. Murphy and to his lovely wife for the gracious hospitality they extended to us and the invaluable assistance that the Ambassador and his lady and the members of the Embassy staff rendered to our delegation in performing our duties in respect to the conference.

So I think I can report with satisfaction, Mr. Speaker, that our delegation made an earnest effort to be worthy of the representation of this House and we hope that shall be the record of those who observed our contributions.

● Mr. DERWINSKI. Mr. Speaker, I am pleased to join with the other Members who attended the spring meeting of the Interparliamentary Union in Manila, the Philippines, in reporting our activities at this most important international conference.

It has been my impression, after attending numerous IPU meetings over the years, that U.S. relations abroad are very definitely benefited by the parliamentary contacts which IPU meetings facilitate. Those of us who have served as delegates to these meetings have interacted closely with parliamentarians who have gone on to direct their government's policies. Our relationship with them has continued to have an abiding influence on our respective nations' foreign policies.

I want to take this opportunity to commend the chairman of the delegation from the House, the gentleman from Florida, CLAUDE PEPPER, for the outstanding job he did in leading our group in Manila. He deserves special praise for his negotiation skill in helping to shape a final resolution on the work of the United Nations in the International Year of the Disabled Persons. His expertise was a valuable asset to our delegation.

The strong leadership of Senator ROBERT STAFFORD, who was chairman of that body's delegation, was instrumental in promoting the U.S. position which became universally approved. As usual, he was a very active and effective participant.

We were successful in getting adopted a draft resolution endorsing the International Year of the Disabled Persons, in particular the disabled child. The purpose of this designation is to give special emphasis to promoting the full participation in society of the disabled person; to improve their living conditions equal to other persons in the country; and to provide for their aspirations and needs. Efforts to help expand the abilities of impaired individuals by education, vocational training, and employment opportunities for disabled adults were areas stressed in adopting this resolution.

Other issues that required our attention were arms control and disarmament, the world energy crisis, the implementation of the United Nations recommendations on decolonization, parliaments and ways of promoting human rights. We were successful in getting draft resolutions adopted condemning terrorist activities, the continued Soviet aggression in Afghanistan, and for the rights of peoples in non-self-governing territories. The IPU Council also considered requests for future agenda issues, and as with past years, the subject of the Mideast figured prominently.

One of the ongoing activities of the IPU is their continued investigations of the reported violations of the rights of parliamentarians. At a special Council meeting which I attended, a status report of the ongoing investigations was presented to the Council detailing the situation with respect to 120 parliamentarians from Ethiopia, who have been arrested without charges and punished without trial.

The IPU is now pressing the Ethiopian authorities for information on these individuals. This IPU action on behalf of the detained Ethiopian parliamentarians has had my full support and I will be looking for progress reports, hopefully, of the release of these parliamentarians.

In debate, in long hours of negotiation, and in many dialogs with parliamentarians from many other national and idelogical perspectives, our delegates, in my view, did an outstanding service in communicating American and congressional views on important international matters. Much was also learned on how other nations view U.S. policies as a result of the great debating skill exhibited by members of the U.S. delegation.

There are several parliamentary associations where representatives meet to share ideas and views and seek common directions and solutions. But the IPU is the oldest and largest and the only parliamentary association where representatives from the United States and from virtually all the Eastern bloc nations can meet. It is also a unique opportunity for north-south dialog between the developed and developing countries.

I again commend the gentleman (Mr. PEPPER) and I also commend all those who took part in the work of the Interparliamentary Union. I believe this is an extremely important activity in which Members of this body participate. Working with our counterparts from the over 94 countries who are now members of the IPU is an invaluable form of communication.●

● Mr. WON PAT. Mr. Speaker, I am pleased to join my esteemed colleague Representative CLAUDE PEPPER today as he reports on the spring meeting in Manila of the Interparliamentary Union. As a member of the U.S. delegation to that meeting I was privileged to work closely with Representative PEPPER who was the chairman of the delegation from the House of Representatives

I want to call particular attention to the fine work done by our colleague Representative DAVID BOWEN who addressed the Conference about non-self-governing territories on April 22. His statement did an outstanding job of clarifying American responses to the needs of such areas and did much to reinforce the image that this Nation is a friend to developing nations.

It was my pleasure and privilege to also address the Conference on this same subject. As a resident of a U.S. territory, I have had a long experience with this issue. We on Guam are justly proud of our many years of association with this Nation and as Representative BOWEN said: "Guam is another ex-

ample of the exercise of a mode of free association chosen instead of sovereign independence."

The work of the Conference covered many other subjects and it is my belief that the work done there by the American delegation was a credit to this country and to the Congress of the United States.

It is important that this exercise in communications between legislators from all nations continue. We have much to learn from each other and I believe that meetings such as that which took place in Manila provide the background for cooperation between this body and the legislatures of other countries in the future.

Congressman PEPPER did an outstanding job as chairman of our delegation from the House and I also congratulate my other colleagues from the House and Senators ROBERT STAFFORD, HOWARD CANNON, and QUENTIN BURDICK for their significant contributions at the Manila Conference. Thank you.●

GENERAL LEAVE

Mr. PEPPER. Mr. Speaker, I ask unanimous consent that all Members may have 5 legislative days in which to revise and extend their remarks on the subject of my special order today.

The SPEAKER pro tempore. Is there objection to the request of the gentleman from Florida?

There was no objection.

VIVE LA FRANCE!

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Texas (Mr. GONZALEZ) is recognized for 60 minutes.

Mr. GONZALEZ. Mr. Speaker, we hear constantly that there is a wave of conservatism sweeping the world, bringing with it the economic structure of the 19th century. We are told that the election of Ronald Reagan is proof that Margaret Thatcher was no fluke, that the industrial world is ready to march back to the happy days when governments catered only to the needs of the rich, leaving everyone else to fend for themselves. The latter-day social Darwinists see triumph in their grasp.

But looking at the world in a different way, we see that they may very well be wrong.

France, so often the leader in the world, has done anything but move to the right. In fact, France has just thrown out a rightwing that has been in power since 1938. The people of France have just spoken. They are tired of unemployment, tired of economic repression, and tired of the nonanswers of the right. They want opportunities to work, they want economic opportunity, they want social justice.

And in Great Britain, so often the last to lead, Margaret Thatcher can go nowhere without being greeted by bitterly unhappy Britons. London has been besieged by unprecedented demonstrations by people who are unemployed as a result of her economic policies. Britons have seen Reaganomics and lived with it, and they do not think it works. They would like to see a solution to their problems, and they do not see it in a bigger dose of the British version of Stockman's poison.

Even in Germany, that bastion of conservatism, Helmut Schmidt sees his party losing in by-elections. Germans may fear inflation more than the devil, but that does not mean they embrace the prescriptions of Herr Schmidt, whose policies may please bankers, but surely have brought pain and more displeasure than even placid Germans are willing to endure.

No, we are not seeing a tilting of the globe to the right; France has demonstrated that.

If a victory by the left in France has taken place, as indeed it has, there are few here in the United States who understand and appreciate just how long the odds were against it. After all, in France, the press is controlled. It is the government that runs the television services there, and the government names its own people to run the networks. It is as if Ronald Reagan had the power to name the president of ABC, CBS, and NBC. The incumbent right wing government of France has had decades to use the media as its own propaganda agent, but that has not been enough to keep the right in power.

And it is not only the electronic media that the French Government influences. Agence France-Presse, the French version of AP and UPI, gets 70 percent of its operating money from the Government. You can imagine that when the Presidential Palace frowns, the wire service of France takes due note and acts accordingly.

With all that, and much, much more going for it, the right wing government of France lost.

The people of France sent a message: They want jobs and justice.

The people of Great Britain have been saying the same thing: they want jobs and justice.

The people of Germany have been saying the same thing: they want jobs and justice.

We here in America have not been told much of this, perhaps because we are preoccupied with our own problems. But we should be watching and listening, because in the policies and experiences of other countries we can see our own future foreshadowed.

The Giscard government of France was hellbent on nuclear power, just as the Reagan government is. Mitterand said that he would moderate that all-out drive.

The Giscard government put economic stability above all else, at the cost of record unemployment. The people of France have said that 1.6 million unemployed Frenchmen is too many.

The Giscard government followed a cavalier foreign policy. The people of France have said that they want a government that respects human rights, does not underwrite and prop up tinpot despots in former French possessions in Africa, and is staunchly anti-Communist. That is another reason why they elected Mr. Mitterand.

In other words, all of the things that are being advanced as our own policies have been tried in France. They did not work, and the people of that country have rejected them.

We have in our history gained much from our relatives across the sea. It was France that supported our own revolution—with money, with ships, with ideas, and with what we would today call military advisers. Had it not been for French support, our independence might never have been won—and that is a debt we ought to acknowledge.

In more recent years we have been inclined to castigate France for moving out of the NATO alliance. And yet if we but reflected on it, perhaps we should be grateful for that as well.

We took upon ourselves the task of defending Europe after World War II. We still spend a vast amount of our defense budget in building forces and maintaining forces on the continent—even though Germany and others have the economic strength to carry their own load. And why do we do this? We do it because we have never attempted to devise a policy to fit the realities of the postwar world. We have simply temporized, tinkered, and never moved an inch toward realistic policies.

France has said they will carry their own load. They will be responsible for themselves. Perhaps it is because they know NATO is anything but a grand alliance; perhaps they know that the shield is cardboard. In any case, we should seek to learn what it is we can do in a truly cooperative spirit with Europe—and it may well be NATO is not the way that can be done. Maybe now, 40 years later, we should again look at Europe as independent, not subordinate. After all, Europe's economic power is equal to our own.

□ 1530

It was France that led the way in pointing to the unreality of the postwar monetary structure. France insisted on making the United States make good its promises to redeem the dollar in gold—not because of the gold, but because of the fact that the monetary structure represented by that

gold redemption promise was untenable. We fumed and we condemned DeGaulle, but in the end, Nixon killed the Bretton Woods monetary agreement, long years after France saw the writing on the wall, and so impolitely asked us to read it.

So here we are today, launching Reaganomics on the promise that it is the only right thing to do. Yet if we but look at the world, we will see that others are telling us, the right wing is the wrong wing. Vive la France.

BEN PLUCKNETT SETS DISCUS AND SHOTPUT RECORD

(Mr. EMERSON asked and was given permission to address the House for 1 minute and to revise and extend his remarks.)

Mr. EMERSON. Mr. Speaker, I wish to call to the attention of the House, and of all Americans, the extraordinary achievements of Ben Plucknett, whose parents, Mr. and Mrs. Glenn Plucknett of Sikeston, Mo., live in my district. On May 16, 1981, Ben broke the world record in the discus throw at a world class track meet in southern California.

Plucknett, who represented the Southern California Striders Track Club, set this world record at the 40th annual California relays at Modesto. He tossed the discus a record 233 feet 7 inches in his final throw of the day. His toss broke the previous world record of 233 feet 5 inches, set by Wolfgang Schmidt of East Germany.

Not only did Plucknett break a world record at the meet, but 4 hours after his world record-breaking toss, he stepped into the shotput ring and put the shot a personal record of 67 feet 7 inches. The combination of the two records is thought to be the best combined performance by an athlete in history.

Plucknett, a native of Nebraska, was a two-time Big Eight Conference champion while a student at the University of Missouri-Columbia and was an all-American while at the University in 1976.

I am sure that all Americans join me in sending the heartiest congratulations to Ben Plucknett and his family for his truly extraordinary achievements.

FREEDOM IS PRICELESS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Florida (Mr. HUTTO) is recognized for 5 minutes.

● Mr. HUTTO. Mr. Speaker, we have just observed another Memorial Day in which we paid our respects to those who have given so much to our great Nation. I, along with many Members of this body, gave speeches on Memorial Day in which we took note of the sacrifices that have been made in all America's wars that we might enjoy the freedoms we have today. Especially, I think it is good that we recognize the families of America who have given up loved ones—those who have made the supreme sacrifice for the love of their country.

Patriotism is not dead. We have seen vivid examples in the last year or two of how Americans unite for the good of the Nation at crucial times. We may squabble among ourselves, but let no outsider trod on the United States of America. That is when we come together. We did it when our hostages were taken by Iran. And again, when they came home, there was a great outpouring of love and patriotism from a united nation.

There are still those who are willing to fight and die for America, like those who went voluntarily to try to free our hostages in Iran. Eight of them gave their lives in this cause.

Yes, Memorial Day is a good time to honor those who have given so much for our Nation. We recognize and pay our respects to the living veterans as well as the dead. The veterans of all our wars should be given due honor and this is especially true of our Vietnam-era veterans since this conflict was so recent in our history.

Mr. Speaker, I would like to close with a poem written by Homer S. Jackson, principal of Haney Vocational Technical Center in Panama City, Fla. This poem was recited at a Memorial Day ceremony on May 25, 1981.

FREEDOM IS PRICELESS

Everybody talks about Freedom
  But Freedom is a priceless thing,
It brings great happiness
  And makes the birds sing.

Freedom comes to many
  Through blood, sweat, and tears,
But there is everlasting joy
  Cause Freedom lasts throughout the years.

Some men take Freedom lightly
  Others take it with great concern,
But if you don't appreciate Freedom
  You have much to learn.

There is great joy in resting now
  In the places of your choice,
Think how you were unshakable
  So now you have a voice.

Think about those before you
  Who had no kind of say,
They worked from morn to sunset
  From light till the close of day.

They had to go to the back woods
  To get a secret word to pray,
Hell and damnation followed them
  Each and every day.

Now let us look at Freedom
  It's more than a gift to stay,
It is a sign of happiness
  That comes to those who obey.

Freedom goes beyond the sunset
  It outdistances the rain,
Freedom brings peace of mind
  With it woes and stain.

Some came today to celebrate
  Others have come to commemorate,
But if you just look around
  And thank God for Freedom you've found.

So organize your good thoughts
  And spread the news everywhere,
Let the world know you are concerned
  And that you live each day above fear.

Let them see you moving ahead
  Through happiness and sad times,
But remind each and everyone
  That this Freedom is mine.

Say to those who don't know
  And say to your fellowman,
That without this great Freedom
  America could not stand.●

THE 35TH ANNIVERSARY OF THE ITALIAN REPUBLIC

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Illinois (Mr. ANNUNZIO) is recognized for 5 minutes.

● Mr. ANNUNZIO. Mr. Speaker, June 2 marks a stirring event in the rich history of Italy. For on that day in 1946, the great Italian people gave a resounding vote of confidence for political democracy.

It was 35 years ago on this day that the Italian people voted in a plebiscite to end their constitutional monarchy and establish a republic. By replacing the Italian monarchy with a republican form of government, Italy began her return to the cultural and political prominence she had long enjoyed.

Eleven days after the referendum, King Umberto II left Italy. With the aid of the Marshall plan, the determined and ingenious Italian people launched upon a great period of economic, political, and social progress. In addition to outstanding postwar achievements on the domestic scene, Italy also placed herself in the vanguard of European integration. Moreover, in the North Atlantic Treaty Organization, Italy has been and continues to be a stalwart and loyal Western ally.

The beautiful land of Italy, washed by the blue waves of the Mediterranean and cradled within the Alps, has boasted of an advanced civilization for thousands upon thousands of years. It may be truly said that Italy constitutes a mosaic of human history. She is a major source of Western culture—her legal system is a model for the West, her language is the tongue of music, and her Renaissance stands as one of mankind's greatest achievements.

I take this opportunity to extend my greetings and best wishes to the people of the Italian Republic, as well as to the Italian Americans in my own 11th Congressional District of Illinois and throughout our country who are joining in this 35th anniversary observance.

Mr. Speaker, an article on the restoration of Italy's art treasures from the news magazine Panorama of Milan follows as it appeared in the June 1981 edition of the World Press Review:

The eyes of experts all over the world are fixed on him, but Prof. Gianluigi Colalucci seems unbothered. Tireless and precise to a milimeter, since last June Colalucci has borne the most important responsibility of his life: to return all the paintings in the Sistine Chapel to their ancient splendor.

Flanked by assistants, Colalucci has a twelve-year plan just for the work on Michelangelo's "Universal Judgement." A movie crew will record each step while laboratory technicians proceed with physical and chemical analysis.

As director of restoration for the Vatican museums, Colalucci is satisfied with the work so far. "The thrill of seeing the brilliant colors laid down by Michelangelo's own hand is enormous. Remember that Buonarroti took four years to execute the dome and seven for the 'Judgement'," he notes. "Since then there have been centuries of protective treatments, nearly always with a glue base. There are coats of glue that are no longer used and that obscure the original colors."

To bring Michelangelo's tones back to life, the magicians of restoration now have at their disposal a miraculous solvent called AB 57, a honeylike material made of sodium bases, fungicides, and other substances. To cancel out the injuries of time the workers spread a light film over the painting, let it stand twenty-four hours, and then repeat the process.

Interest in the Sistine restoration is not due only to technical advances. Historians of art have made no official comment, but it is whispered that once the work is completed there will be a major new discovery in Michelangelo's painting.

While the ills of the Vatican masterpiece are being cured, another of the world's famous invalids has begun a time of healing: Leonardo da Vinci's "Last Supper." The work is in the hands of Pinin Brambilla Barsilon, who works with a surgeon's microscope to cure a painting in critical condition. "Besides the layers of repainting since 1700 there are also scales of color peeling and dropping off." she notes. "And the whole work also seems shrouded in a gray mist due to humidity and pollution."

Nevertheless the result so far is breathtaking. The work has already saved Saint Simon and the halo above him. "We're counting on recovering half of Leonardo's painting by next year," says Carlo Bertelli, art superintendent of Milan. "So far the work has cost very little: $47,000 to $57,000. But Rome has been silent about further funding."

Other masterpieces are also under the surgeon's scalpel. Bronze experts are at work on the horses of St. Mark's at Venice and on the statue of Marcus Aurelius in Rome, where both horse and rider are stricken with a cancer caused by pollution. Concerned parties have suggested an underground museum to save the ancient equestrian statue.

Also seriously ill are the marble works of the Roman Forum, the arches and columns of the city's historic center. X-rays of Giotto's campanile in Florence have revealed fearful deterioration of the structure's iron supports. "It will take a restoration effort of at least two years," say Florentine experts. Another patient is the Basilica of St. Francis of Assisi, where the frescoes of Giotto have not been touched.

From north to south monuments are falling, columns are tottering, paintings and colors are fading away, never to be seen again. No more than 300 people travel the peninsula stopping leaks and remedying past mistreatment. With degrees from Rome's Central Institute of Restoration or Florence's Fortezza da Basso, the restorers are nearly all private citizens, often organized in consortia or small cooperatives. Among them are experts in metal, mosaics, ceramics, architecture, and solvents.

It is a patrol flanked and coordinated by the profession's masters in Rome. At the Central Institute of Restoration, just twenty-one professors either offer advice or intervene directly in the more difficult cases. Above all they pioneer new methods and teach the profession.

Extremely rigorous—three years of courses plus an optional year of specialization—the Roman school furnishes a dozen restorationists every year. There are also graduates from Florence and those from semi-secret private courses like one run by the Christian Workers' Society of Brescia (a 1939 law bars the proliferation of private schools).

"The problem is not with the low number of restorationists," the Central Institute's directors say. "We lack a global intervention policy. This is why all the restoration work is late. The restorationists arrive to plug up a frightful, chronic emergency. Decades of insensibility cannot be canceled with miracles."●

REMARKS OF STUART E. EIZENSTAT BEFORE DUKE UNIVERSITY FORUM ON PRESIDENTIAL NOMINATIONS

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Georgia (Mr. LEVITAS) is recognized for 5 minutes.

● Mr. LEVITAS. Mr. Speaker, recently, Stuart E. Eizenstat, former domestic policy adviser to President Carter, offered some thoughts on revisions that might be made in the Presidential nominating process before the Duke University Forum on Presidential Nominations on May 11, 1981, in Washington, D.C.

Mr. Eizenstat's observations are most interesting and, among other things, focus on the need to involve more participation by elected officials within the parties. I commend Mr. Eizenstat's views to the consideration of my colleagues.

Mr. Eizenstat's remarks follow:

There are two essential changes which I believe should be made in the nomination process for Presidential candidates: a) reduce the duration of caucuses and primaries; and b) increase the importance of the political parties and the elected officials of the parties in the selection.

Since 1972, there has been a growing proliferation of primaries. Now, more than one-half of the States have them. The caucuses and primaries now stretch from January to June, stretching the resources of candidates and the patience of voters.

It is no accident that our last three elected Presidents—Nixon, Carter, and Reagan—all held no elected public office when they were nominated and later elected. Only non-office-holders have the time required to build organizations in all of the primary States and to make themselves known by the voters in those States. Those elected officials with significant responsibilities have the greatest difficulty competing in such a system—although this stature gives them significant qualification for the job of President which they seek.

Moreover, individual primaries, like the one in New Hampshire, take on a role of exaggerated importance which fails to reflect the nation's diversity on its views. These take on a life of their own and have too great an influence on later primaries.

I do not believe one national primary is the answer to these problems. Such a system would put an even greater premium on full-time campaigning, would be extraordinarily costly to candidates, would make it difficult for lesser-known, but qualified candidates to gain stature and financial backing from early victories, would further eviscerate State and local parties which are badly in need of strengthening, and would ignore regional and local issues that often test a candidate's ability to balance regional issues against the national interest.

I would require that the primaries and caucuses be held within a four-month period so that the campaigns are somewhat shortened.

I would endorse the plans of Congressmen Morris Udall and John Ashbrook that all primaries must fall on the first Tuesday of each month from March to June, with States having their choice of date. I do not think it wise to require that each of these be a regional primary, since this would tend to lead to regional favorite sons, and would give too much emphasis to regional issues over national issues. Moreover, such a set-up might guarantee one region, with less populous States, having no effective voice in the selection process, if it followed the regional primary of the industrial Northeast or Midwest.

Where primaries are employed, they should not be "open" primaries, where voters can vote even if they are independents or members of another Party, as in Wisconsin. A recent Supreme Court decision permits the Republican and Democratic Parties to keep the primaries available only to voters with that Party identification. This power should be utilized, to preclude members of one Party from crossing over and trying to influence the primaries of another Party.

Of even greater importance than these modifications, is to find ways to strengthen the influence of elected officials and party organizations in the nomination of Presidential candidates.

Parties at all levels have been debilitated by the false glorification of independence from Party labels, unrestricted funding by independent organizations (like the National Conservative Political Action Committee), primaries themselves, the enormous impact of television, the diminished role of elected and Party officials due to the changes of the past decade, and the rise of single issue groups.

Parties are important harmonizers in our society of disparate views. They can also serve as the umbrella under which elected officials from a Party and their Party's Presidential candidate, can have an earlier and closer identification.

I do not think it practical in our heterogeneous nation to scrap our Constitution and try to develop a parliamentary form of government—despite the fact that with a stable ruling party this is the most efficient form of democracy. But, I do think it is important to tie our Congressman and President more closely together.

In 1976 and 1980, Democratic Congressmen and Senators had little hand in selecting their Party's nominee, Jimmy Carter, and thus felt less of a stake in his Presidency. He, in turn, owed them little in return. In 1980, at the Democratic Convention, only 45 of the 3,331 delegates were Congressmen and Senators.

While in 1976, it might have been somewhat more difficult for Jimmy Carter to secure the Democratic nomination if elected and Party officials had played a greater role, it would have made it easier for him to govern had they played a more significant part in securing his nomination.

Likewise, while there was in 1980 a set-aside for State organizations to select Party officials to serve as delegates, it was a small one indeed. We cannot expect to rebuild State and local parties unless we provide some incentives for Party participation. Attendance at a national Convention provides such an attraction.

Moreover, exclusion of Party and elected officials has made the Party Platform one which often represents the sum total of the maximum demands of every group which participates in the Convention. No wonder that Platforms are as ignored as they are by Members of Congress, when they have had no role in developing them. I believe Platforms are important, having been one of the principal authors of the 1976 and 1980 Democratic Party Platforms. To assure they are more meaningful and are taken more seriously, I suggest again that elected and Party officials be given a greater hand in drafting them.

None of the changes I propose suggest abolishing primaries and closing the nomination process. I believe, however, that we should do more to mix the advantages of participatory democracy through the primaries with changes to enhance the opportunity for those who must ultimately govern with a President to have a stake in his nomination—and for him to have some obligation to them in turn.

I would have the Parties, certainly the Democratic Party, change its rules to require that every Democratic Congressman, Senator, and Governor be automatically a full voting delegate to both the Midterm and the National Convention. They should not have to run against their own constituents for such a position.

They also should be a greater percentage of the total number of delegates.

Primaries should select no more than 60 percent of the delegates to the Convention. I do believe these delegates should be bound through the first ballot—or the voice of the majority in the State primary would be nullified. We should not play fast and loose with the primary results or we will add to the cynicism which already surrounds the nomination process. The other 40 percent should come from the elected officials and from people selected by the State Party organization. These people should go unpledged and uncommitted to any particular candidate, to maximize their influence.

Elected officials and Party officials should also participate in drafting the Party Platform. Greater Congressional input here will instill a greater sense of balance in the Platform and a greater sense of Congressional responsibility to implement it.

To further strengthen our political parties, I would suggest Congress remove all limits in giving through National Committees, so that they can become dispensers of more campaign financing vis-a-vis political action committees than is now the case. Caps should be enacted on the maximum contribution which candidates can receive from political action committees, individually or cumulatively.

These modifications will help add cohesion to a fragmented and chaotic nomination process.

I commend President Terry Sanford and Duke University for its interest in helping to modify a system badly in need of change.●

NATIONAL TECHNOLOGY FOUNDATION ACT OF 1981

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from California (Mr. BROWN) is recognized for 20 minutes.

● Mr. BROWN of California. Mr. Speaker, throughout the 96th Congress and continuing into the 97th Congress, the Subcommittee on Science, Research, and Technology has been studying the critical issues of innovation and productivity. Hearings have covered patent policy, university-industry relations, Federal laboratory utilization, the Government's role in industrial innovation high-technology small business, a focusing point for technology through a foundation, and several other areas. In the United States private enterprise is the sector of society primarily responsible for providing jobs, goods, and services. I believe this is appropriate and the Government should not attempt to take over this responsibility. Government, however, must provide an environment in which private enterprise can flourish in both the short and long term. If needs for essential goods and services are not being met by private enterprise, the Federal Government should take steps to remove barriers to action. The subcommittee's study has made it clear that current efforts of the Federal Government to facilitate technology development are fragmented and too small to provide a focus for a national economy in which innovation can thrive.

Today, I am introducing the National Technology Foundation Act of 1981, a bill designed to correct many of the problems we have found. The bill would establish a National Technology Foundation to facilitate technology advancement and innovative utilization for the national welfare. It is a revised version of H.R. 6910 introduced in the 96th Congress and incorporates valuable suggestions received through direct communications and 5 days of hearings held on the bill in September 1980. Joining me as cosponsors of this bill are the current chairman of the subcommittee, DOUG WALGREN, and HAROLD HOLLENBECK, ALLEN ERTEL, WES WATKINS, JOHN SEIBERLING, and MERV DYMALLY.

Responsibility for technology-related programs is now scattered throughout the Federal Government. The various mission agencies—Department of Defense, Department of Health and Human Services, Department of Energy, and so forth—each support technology development related to their mission. The National Science Foundation and the Department of Commerce have components directed at technology and innovation, but these are minor portions of the budgets of those agencies and are often treated as stepchildren by those agencies. Recent budget cuts have made this situation even more true.

In considering how the Federal Government can most effectively organize itself to support technology for the national welfare, one extreme is to leave programs scattered but to make each the best possible. The other extreme would be to consolidate all science and technology activities of the Federal Government in a single Department of Science and Technology; an idea that received considerable attention in the midseventies during consideration of the bill that became the National Science and Technology Policy, Organization, and Priorities Act of 1976. The idea of a Department was not adopted at the same time because of compelling arguments that most science and technology activities should be kept closely tied to the missions which they support—defense, energy, space, health, and so forth, and hence should be kept as integral parts of the agencies which pursue those missions. The National Technology Foundation bill represents an intermediate position. It would consolidate technology-related activities which are not now closely tied to a specific agency mission and would insure that the Federal Government will assume a coordinating role among additional responsibilities for technology planning, advancement, and transfer to utilization which have heretofore not been adequately discharged by any sector of society.

The programs which this bill would consolidate in a single agency might, in theory, be adequately supported in their current homes, the Department of Commerce and the National Science Foundation. This has not been the case. Support has been modest at best and even at their best they still suffer the fractionation of being in several agencies. I am reserving judgment on which course of action is best, consolidation in a new agency or strengthening in existing agencies. The bill to establish a National Technology Foundation is a vehicle by which we can continue to focus the discussion of alternatives. If the Department of Commerce and the Science Foundation are unable to strengthen and broaden their current programs, the National Technology Foundation may emerge as the only feasible alternative.

At hearings held in September 1980 the major focus of testimony centered

on whether or not it would be in our Nation's best interests to create a new autonomous agency or whether existing institutions were sufficient to resolve the problems associated with technology and innovation. The administration spokesmen testified to their position that existing programs were capable of promoting applied research and development. A few other witnesses testified that if given more resources they thought existing departments or agencies could be flexible enough to address these issues. However, there was strong sentiment expressed by most of the nonadministration experts that existing institutions were unable to deal with the technology innovation and development issues in the coordinated manner that was needed. There were differences expressed amongst this group with some suggesting a narrower focus of only the engineering portion while others suggested an even broader scope. Many also addressed specific details of functions and composition while generally concurring that a void existed which the National Technology Foundation would fill.

WHY A NATIONAL TECHNOLOGY FOUNDATION

The population of the world is growing inexorably while its resources are inexorably being consumed. It does not take a mathematician to determine that per capita consumption in the future cannot match the per capita consumption of an average American today if technology does not dramatically improve. Only if there are continual major improvements in technology can the world provide for its inhabitants. By improved technology I mean not only the development of hardware but also the better organization of society to assist in the efficient use of technology, the Foundation would support development of the requisite knowledge base, the resources of high-quality manpower, high-technology small business, the promotion of technology transfer for appropriate civilian utilization and stimulation for entry into the stream of commerce, the establishment of technological standards, and the long-range planning and forecasting needed for each of these areas. In short, the Foundation would be a focal point for all that technology embodies.

While the U.S. Government has adopted a largely laissez faire attitude toward international trade in high-technology items—other than military hardware—governments in other countries—most notably Japan—have planned and provided a national atmosphere in which both technology development and the export of high-technology products are carefully nurtured. These other countries have often been highly successful in their efforts. We are buying Sonys, Volkswagens, Datsuns, and Seikos. The international balance of trade has been unfavorable to the United States for several years. It is likely that without a coherent Federal policy of technology development and promotion the United States will not be able to compete effectively in future world trade. The National Technology Foundation would provide a focus for one of the two needs, technology development and movement into the stream of commerce. The other needs, assistance for exports, should be provided by an expanded and reoriented Department of Commerce and Trade, as other legislators have recommended—for example, Senator ROTH in his bill S. 970.

The United States is faced with seemingly uncontrollable inflation. By finding improved ways to produce and deliver goods and services—and this is the meaning of technological progress—we can make a significant contribution to the efforts to control inflation. The National Technology Foundation would contribute to that process.

High-technology industries have been responsible for the creation of a higher share of new jobs than low-technology industries, and the development of new technologies promises fuller national employment.

The profession that takes knowledge and converts it into the design of products and processes is engineering. Engineers take science and turn it into technology. Heretofore there has been inadequate recognition of past and potential contributions of engineers. In the Federal Government, engineering has been overshadowed by science. In research support, engineering receives less than 10 percent of the budget of the National Science Foundation. The National Academy of Engineering is subordinate to the National Academy of Sciences. Moreover, there is a shortage of engineers in the country today at all levels of training, including a shortage of the most educated, who will be needed to train future generations. Among other things, the National Technology Foundation would recognize the importance of engineering and help harness its potential.

THE SPECIFIC NEEDS ADDRESSED BY THE NATIONAL TECHNOLOGY FOUNDATION

Links between the generation of knowledge and its use need to be strengthened. The National Technology Foundation would help tie science to useful applications. This would be accomplished by several means. First, extramural grants and contracts would be provided to researchers and technologists in areas of science and technology showing promise for useful results. Second, it would disseminate scientific and technical information, and third, it would have, as an integral part, its own intramural science and technology laboratory which already exists.

The United States needs to insure that an adequate supply of technological manpower, training or educational institutions, facilities, and equipment is available to it. This country has never had a scientific and technological manpower policy to guide where Federal funds would be best used. As a result the Federal Government has funded the training of too many in some areas and not enough in others. This is a national planning failure that ought to be corrected. The National Technology Foundation would do that.

The bill provides for the continuation and establishment of a new type of technology institution called centers for industrial technology. These centers would join industry and universities in cooperative technology activities including generic research—research on technology of use to many industries, such as welding or microfabrication—and the training of individuals in technology innovation. The 96th Congress passed, and the President signed, legislation for such centers as part of the Stevenson-Wydler Innovation Act of 1980 (Public Law 96-480). In this bill they are transferred to the National Technology Foundation because I consider these centers to be only one part of a broader focus as expressed by the Foundation.

In order to make sensible decisions about technology and society, there is a need in all sectors of society to understand the workings of technology development, of technology management, and of the interactions of technology with society. The National Technology Foundation would analyze the workings of technology in modern society. It would formulate policies based on these analyses, both for its own operations and for the benefit of other parts of the Federal Government and society as a whole. This function was also included in Public Law 96-480 and again is considered as one part of the broader responsibilities of the Foundation.

Technology, in the sense I am using it, includes not only what comes immediately to mind—machinery, electronics, chemicals, and so forth—but also the structure and management of the human organizations of our society. The Foundation would study technology policy in this broader sense.

The National Technology Foundation would foster high-technology small business. The past performance and the potential of small business are tremendous in high technology. We need more Silicon Valleys and Route 128's, and we need to encourage them in all areas of the country.

State and local governments are a large sector of the national economy. They should be as efficient and productive as possible and need assistance to become so. The National Technology Foundation would encourage and

assist State and local governments to be more productive and make better use of science and technology in their operations and decisionmaking as well as offer assistance to any statewide organized technology distribution network.

The inadequacy of the Nation's position in engineering has already been cited. This inadequacy needs to be corrected. The National Technology Foundation would work to see that the Nation has an appropriate supply of engineers. In addition it would provide support for fundamental engineering studies. The bill would provide that the National Technology Foundation would bear primary responsibility for nominating award winners for the National Technology Medal, an award established by Public Law 96-480.

We are living in a time of rapid change. Degrees of change that once took a century now come about in a decade. The Nation needs to look down the road and anticipate better what tomorrow will bring. The principal agency of change is technology. The National Technology Foundation would identify emerging national problems and support research and development of solutions to those problems.

The Nation needs to provide incentives for development of innovations, and the Nation needs standards of measurement and product performance or design to permit the efficient flow of commerce. The National Technology Foundation would provide for these needs.

Many, but not all, of the needs mentioned above are already being addressed by Federal programs. For example, the Patent Office provides incentives for innovation, and the National Bureau of Standards provides standards. None of the needs are being met with complete adequacy. There is a tremendous need, moreover, for such existing programs as there are to be coordinated more fully for most effective utility. One of the primary accomplishments of establishing a National Technology Foundation with strong centralized focus would be to meet the need for coordination.

DESCRIPTION OF THE BILL

The National Technology Foundation Act of 1981 establishes the Foundation as an independent agency in the Federal Government.

STRUCTURE OF THE FOUNDATION

The Foundation would have eight main branches, as follows.

First, the Office of Small Business. This Office would serve as the focus of the Foundation's small business activities. It would carry out the small business innovation program that would be transferred to it from the National Science Foundation. This program provides funding for the research and development phases of new technology small business and links small business with venture capital for the production phase. The program has been very well received in the small business community and is ripe for expansion. The National Technology Foundation would have the authority to operate other types of programs for the development of high-technology small business, as well. Other functions of the Office of Small Business would be to foster communication between scientific and technological agencies of the Federal Government and the small business community, assist high-technology small businesses in dealing with the Federal Government, and recommend policies enabling the Nation to benefit more from high-technology small businesses.

Second, the Office of Institutional and Manpower Development. This Office would collect and analyze information on technological manpower, providing quantitative manpower need projections, and would provide for adequate training and educational institutions for technological manpower to meet the needs. The Foundation would provide support as necessary directly to individuals to obtain training, provide support to existing institutions—such as schools of engineering—support the development of new curricula or training programs, encourage the exchange of professional personnel between academia and industry, and support with funding—or if need be operate—new kinds of institutions—for example, the Centers for Industrial Technology authorized by Public Law 96-480, Federal responsibility for which is transferred by the bill.

Third, the Office of Technology Policy and Analysis. This Office would conduct technology assessments, develop indicators of the health of technology, study the effects of technology on the economy and vice versa—including foreign trade matters—study the impacts of policies on technology, identify emerging problems, and make recommendations for steps with the potential for advancing technological innovation. In short, this Office would be the brain trust of the Foundation. The National Science Foundation's Innovation Processes Research Section would be transferred to this Office to form the nucleus of its activities.

Fourth, the Office of Intergovernmental Technology. This Office would facilitate the integration of scientific and technological resources into the policy formulation, management support, and program operations of State and local governments. The intergovernmental programs of the National Science Foundation and the Center for Utilization of Federal Technology of the Department of Commerce would be transferred and serve as the nucleus of this Office.

Fifth, the Office of Engineering. This Office would support, by extramural grants and contracts, fundamental research in all engineering disciplines and applied research not adequately supported from other sources. A major portion of the National Science Foundation's engineering directorate would be transferred to the Office of Engineering and would constitute the initial program of the Office.

Sixth, the Office of National Programs. In conjunction with the Office of Technology Policy and Analysis, this Office would identify emerging national problems—for example, novel ways of producing materials—and support basic and applied research leading to their solution. It would also support applied research and development in focused areas of national concern not adequately supported by other agencies—for example, earthquake hazards reduction. Specific problem focused programs of the National Science Foundation's engineering directorate would be transferred to form the core program of the Office initially.

Seventh, the National Bureau of Standards. The Bureau would be transferred intact from the Department of Commerce to the National Technology Foundation and function as the Foundation's intramural science and technology laboratory. It would continue in its current missions—maintaining measurement standards, performing basic research related to standards, serving as a laboratory for other Federal agencies, and so forth. It would also assist other activities of the Foundation, as determined by the Director of the Foundation. The act gives authority to the Foundation to support U.S. interests in international voluntary standardization activities, which is not adequate under existing law. The Bureau would be the proper branch of the Foundation to exercise that authority. Whether international activity would be undertaken by Federal employees or by representatives of private voluntary standards organizations with Federal funds is a matter deserving further consideration.

Eighth, the Patent and Trademark Office and National Technical Information Service. These two agencies would be transferred from the Department of Commerce to the National Technology Foundation and administered as a single branch of the Foundation. Both agencies deal with the classification and dissemination of scientific and technical information and closer coordination would provide improved service. The Patent and Trademark Office has had a particularly hard time in the Department of Commerce and hearings have been held regarding the advisability of making this office an independent agency. Because the purpose of the office is the promote technology, it would be more ap-

propriate to incorporate it in a larger entity devoted to the same purpose and having additional functions.

MANAGEMENT OF THE FOUNDATION

The Foundation would have a Director, a Deputy Director, and eight Assistant Directors—one for each branch. It would also have a National Technology Board.

NATIONAL TECHNOLOGY BOARD

The Board would have 24 members and would have powers over the National Technology Foundation similar to those the National Science Board has over the National Science Foundation. Members would be Presidential appointees and would be selected from people eminent in a wide variety of fields. It would be expected that nominations for the Board would be solicited widely, including from all member societies of the American Association of Engineering Societies.

The intent of having a Board is to insure that the community of those who will be affected by the Foundation will have a say in the operation of the Foundation. There is considerable risk in any Federal agency either that it will be "captured" by a narrow segment of its potential community or that it will operate solely under motivations and incentives internal to the Federal Government, thus failing in either event to serve properly. The best way to insure proper service is by control from the community. There is little risk of the Board running amok because the President has control over the Director, the membership of the Board and the budget.

The principal specific functions of the Board would be to establish the policies of the Foundation, review its budget, review its program, and approve any large grants or contracts.

DIRECTOR AND ASSISTANT DIRECTORS

The Director, the Deputy Director, and the eight Assistant Directors of the Foundation would be Presidential appointees at executive levels II, III, and IV, respectively. The Director's term of appointment would be 6 years.

In order to permit the strong central operation needed to coordinate activities of the various branches of the Foundation, all authority over the Foundation other than that reserved to the Board, has been given to the Director. The Director may delegate parts of that authority and would be expected to do so, but would always have the ability to take personal control of any aspect of Foundation operations.

COORDINATION OF PROGRAMS

A separate section of the National Technology Foundation Act, section 11 requires close coordination of the Foundation's programs with other activities in technology.

The strongest tie created by the act is between the National Technology Foundation and the National Science Foundation. This is because of the need expressed earlier to strengthen links between the generation of knowledge and its use. One of the virtues of having applied activities in the National Science Foundation has been the closeness of the activities to basic research. The act preserves this virtue by requiring that the membership of the National Technology Board overlap the National Science Board by six to eight members. Terms of service of National Technology Board members are to be of the same length and to have the same starting dates as Science Board members to facilitate the overlap. The act also requires that to the maximum extent feasible extramural basic research support that the National Technology Foundation wishes to provide should be channeled through the National Science Foundation. This provision would not apply to basic research in engineering since it would be transferred entirely to the Technology Foundation.

Section 11 also requires that the Technology Foundation coordinate programs closely with the Small Business Administration. SBA has not in the past provided strong support for high-technology small business, but it has authority to do so and appears to be moving in this direction. The act gives the Director of SBA the authority to assure that any small business activities of the Foundation do not duplicate SBA activity.

Section 11 requires further that Foundation activities be coordinated with State and local governments. The Centers for Industrial Technology authorized by the act for example, will be of interest to State and local governments and their participation in the Centers should be explored.

Other coordination is required in other sections of the act. The President's Office of Science and Technology Policy and Analysis would be assisted in two ways, by support from the Foundation's Office of Technology Policy and Analysis and by staff assistance from the Foundation's Office of Intergovernmental programs to the Intergovernmental Science, Engineering and Technology Advisory Panel.

OTHER PROVISIONS OF THE ACT

Sections 10 and 12 of the act provide miscellaneous authorities to the Foundation that are common throughout Government: reorganize, have regional offices, transfer funds to a modest degree among authorized categories, make rules for its operation, expend funds, enter into grants and contracts, acquire and hold real property, and so forth.

AUTHORIZATIONS

The act would provide for authorization of activities in fiscal years 1982, 1983, and 1984. Any funds for years beyond 1984 would have to be authorized by further acts. The following table gives an analysis of the current funding of programs that would be transferred to the Foundation, and levels of funding proposed by the act for the offices of the Foundation.

A brief rationale for the funding levels also follows. In general, these are activities which have been chronically underfunded in comparison to the need, so that proposed funding increases at a moderately rapid pace. The total amount appropriated for these programs in fiscal year 1981 is $354 million. The act proposes $500 million in fiscal year 1982 and $730 million and $935 million in fiscal years 1983 and 1984, respectively.

NATIONAL TECHNOLOGY FOUNDATION OFFICE—BUDGET ANALYSIS

[In millions of dollars]

National Technology Foundation Office	Fiscal year—			
	1981 [1]	1982	1983	1984
1. Small Business	[2] 7.5	10	20	40
2. Institutional and Manpower	[3] 22.5	45	90	150
3. Technology Policy and Analysis	[3] 1.5	15	20	20
4. Intergovernmental Technology	[3] 6.1	10	20	30
5. Engineering	[2] 65.5	80	150	200
6. National Programs	[2] 24.7	70	90	110
7. National Bureau of Standards	[4] 102.4	120	145	170
8. Patent and Trademark Office and National Technical Information Service	[4] 116.9	130	170	190
9. Other purposes	[5] 6.9	20	25	25
Total	354.0	500	730	935

[1] Appropriated.
[2] NSF.
[3] NSF and DOC.
[4] DOC.
[5] This is a prorated share (121.6/1080.4 of NSF's overhead (61.7)).

RATIONALE FOR FUNDING

First, Small Business. This is an excellent existing program with plenty of demand. It should increase as quickly as possible. The amounts budgeted are small compared with Small Business Administration programs—which are budgeted at over $1 billion.

Second, Institutional and Manpower Development. This is the area of greatest need in the Foundation. Rapid increases are proposed to a level that can have national impact.

Third, the Office of Technology Policy and Analysis. This office should quickly be put together to help formulate Foundation programs and begin longer range studies. It should not need to grow much thereafter.

Fourth, Intergovernmental Technology. This area should also grow rapidly from its current size. National impact can be accomplished without enormous funds.

Fifth, engineering. This is a chronically underfunded area which needs substantial increases.

Sixth, national programs. These have been virtually strangled at NSF. They need immediate resuscitation and continued revitalization.

Seventh, the National Bureau of Standards. The Bureau is a mature organization. Continued growth at a moderate rate is appropriate. Expansion of innovation programs and of

linkages between NBS and industry will be encouraged.

Eighth, Patent and Trademark Office and National Technical Information Service. The Patent and Trademark Office is mature but malnourished. More high-quality patent examiners are needed and a computer based information system for getting access to patents should be developed. A substantial increase between 1982 and 1983 is provided for this purpose.

Ninth, other purposes. This is intended to provide funds for the central administration, the National Technology Board, certain personnel costs, support staff, and other inevitable overhead costs. Once the Foundation is fully staffed increases should be slight.

SUMMARY

The concept of a National Technology Foundation grows out of continuing study of innovation and productivity by the Subcommittee on Science, Research, and Technology. There is a clear need for the Federal Government to improve its programs in support of technology, and the consolidation and enhancement of existing fragmented programs in a National Technology Foundation is an alternative deserving careful consideration.

The principal needs the Foundation would address are the need for improved technology for the benefit of all mankind, the need to improve the U.S. balance of trade, the need to fight inflation, the need to provide full employment, and the need for more adequate support and recognition of engineering.

The National Technology Foundation would be an independent agency with eight main branches for, first, small business; second, institutional and manpower development; third, technology policy and analysis; fourth, intergovernmental technology; fifth engineering; sixth, national (problem focused) programs; seventh, National Bureau of Standards; and, eighth, Patent and Trademark Office and National Technical Information Service. The agency would have programs transferred from NSF—all of engineering plus most of industrial science and technological innovation—and from the Department of Commerce—almost all of the programs of the Assistant Secretary of Commerce for Science and Technology.

The National Technology Foundation Act incorporates the two main features of Public Law 96-480, passed with bipartisan support of the 96th Congress by putting the Office of Industrial Technology functions of Public Law 96-480 into the technology policy and analysis branch of the Foundation and putting the responsibility for the support of centers for Industrial Technology in the institutional and manpower development branch.

The National Technology Foundation would not have any responsibility for assisting foreign trade. Independently, the Department of Commerce should be upgraded to a Department of Commerce and Trade and should be assigned a foreign trade assistance function. The Foundation would work closely with the Department.

The governance of the Foundation would be handled by a Director and a National Technology Board patterned in organization, but not composition, after the National Science Board. Key functions of the Board would be to establish the policies of the Foundation and Review the Foundation's budget and programs. The Director would have all powers not assigned to the Board and would be assisted by a deputy and eight assistants, one for each branch.

The bill contains authorizations for fiscal years 1982 ($500 million), 1983 ($730 million), and 1984 ($935 million). In each year the eight branches plus an "other purposes" category each have a line item. Each branch grows over the 3 years of authorization.

The bill requires close coordination between the National Technology Foundation and other agencies, particularly the National Science Foundation. The two foundations are to have interlocking directorates.

Mr. Speaker, I welcome any comments on, or support for this legislation.●

INTRODUCTION OF THE OMNIBUS SMALL BUSINESS CAPITAL FORMATION ACT OF 1981

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from New York (Mr. LAFALCE) is recognized for 20 minutes.

● Mr. LAFALCE. Mr. Speaker, I am introducing a bill which contains a number of proposals to amend our tax system in a way that will permit small businesses to retain and attract the capital necessary for their survival. More specifically, this measure would, among other things, lower capital gains taxes, graduate and reduce corporate tax rates, accelerate and simplify depreciation schedules, reduce gift and estate taxes, and liberalize certain provisions contained in subchapter S of the Internal Revenue Code.

This bill is identical to a bipartisan measure introduced in the Senate. I am introducing the measure at this stage of our tax discussions because I believe that it offers a number of thoughtful approaches which are needed to ease the burdens of small business brought about by high interest rates, inflation and an outmoded and discriminatory Federal Tax Code.

For too long the Federal Government has conducted a policy of benign neglect of the small business capital shortage. To permit the continuation of this policy will only encourage fewer private sector jobs, less innovation and more absorptions of small businesses by the corporate sector.

We are all in agreement that greater economic growth is vital to our future as a nation. It is therefore imperative that we keep in mind that small business accounts for 43 percent of the gross national product, 53 percent of all private sector jobs and more than 50 percent of all industrial inventions and innovations.

This bill, which includes many of the major promising tax recommendations of small business organizations and the White House Conference on Small Business, recognizes the special role played by small business in our economy and offers concrete proposals to restore our tax system to permit small business to grow and innovate.

I would not claim that it offers all the answers to restructuring our discriminatory Tax Code to foster the creation, expansion, profitability and continuity of small business enterprises; nor would I claim that it should not be amended, modified, or improved upon. I am indeed hopeful, however, that its introduction will serve to focus our attention on the needs of small business. Should we fail to do so we will further jeopardize the very backbone of our free enterprise system.

I insert a factsheet outlining this bill in the RECORD at this point:

FACTSHEET—OMNIBUS SMALL BUSINESS CAPITAL FORMATION ACT OF 1981

The provisions of the Omnibus Small Business Capital Formation Act of 1981 fall into five broad categories:

I. Capital Formation.—To improve the ability of small business to attract needed capital from external sources of financing by providing greater incentives for investors.

A. Investment tax credit for investments in new stock issues of small businesses. A 10 percent tax credit (up to $1,000 per person) would be provided for an investment in stock issued by businesses with less than $25 million in net worth.

B. Authorize the creation of a new financing instrument, the "Small Business Participating Debenture" (SBPD). The SBPD would be a hybrid security, with elements of equity and debt capital. SBPD's issued by eligible firms (net worth less than $25 million) would bear a relatively low stated rate of interest, but also could involve a distribution of the company's earnings, which would be taxable to the investor at the preferential long term capital gains rate.

C. Capital gains tax reduction for individuals and corporations, with maximum rates reduced from 28 percent to 21 percent for investments in small businesses.

D. Capital gains "rollover." Gains resulting from the sale of an investment in a small business would not be recognized if reinvested in another qualifying small business within 18 months.

E. An increase in the maximum number of shareholders permissible for Subchapter S corporation election from 15 to 100. This

would improve the access of small businesses to new sources of capital.

F. Broker-dealer Reserve. Would permit dealers "making a market" in small business equities to transfer, with deferred tax recognition, up to an aggregate of $1 million in capital gains resulting from the sale of such stock, to a reserve for future market-making activities. This would greatly enhance the marketability of small business stock.

II. Capital Retention.—to permit small businesses to retain a greater share of internally generated capital.

A. Graduation and reduction of corporate tax rates. Would increase the number of brackets to seven and reduce tax rates, particularly helpful for smaller businesses. Present law corporate tax brackets and rates are as follows:

Taxable income:	Percent
$0 to $25,000	17
$25,000 to $50,000	20
$50,000 to $75,000	30
$75,000 to $100,000	40
Over $100,000	46

Under the bill, brackets and rates would be:

Taxable income:	Percent
$0 to $25,000	15
$25,000 to $50,000	17
$50,000 to $75,000	25
$50,000 to $100,000	30
$100,000 to $150,000	35
$150,000 to $200,000	40
Over $200,000	44

B. Accelerated and simplified depreciation tax treatment for more realistic capital cost recovery for smaller businesses. Bill would propose "5-3" classification (from 10-5-3) for equipment and vehicles, respectively, with 10 percent investments and 6 percent credit for investment in trucks and other vehicles. First $100,000 of small business investment not subject to any phase-in period. Bill would not address question of depreciation for structures.

C. Increase in the amount of permissible accumulated earnings from $150,000 to $300,000. Accumulated earnings tax would apply only to amounts in excess of $30,000.

D. Increase in the ceiling on the used property investment tax credit from $100,000 to $250,000.

III. Estate Tax Reforms.—to reduce onerous burden of gift and estate taxes of small businesses.

A. Increase the present estate tax exemption from $175,000 to $600,000.

B. Provide an unlimited gift and estate tax marital deduction.

C. Increase the annual gift tax exclusion from the current limit of $3,000 to $6,000 per year per donee.

D. Make several changes in special use valuation rules for farm land and closely held businesses.

E. Set the value of gifts made within 3 years of decedent's death at the value at the time of the gift rather than at the date of death.

F. Permit the 5 year deferral/10 year installment election for payment of estate taxes, provided that at least 35 percent of the gross estate or 50 percent of the taxable estate is a closely held business. (Present law limitation is 65 percent of adjusted gross estate.)

IV. Employee Stock Options.—bill would permit employees to exercise stock options without tax consequences, as opposed to present law requirement of paying ordinary income tax on "spread" between option price and market price. Employees would be eligible for capital gains treatment when the stock is sold, with option price being cost basis. This provision would enable smaller businesses to attract better management by encouraging the use of stock options for key employees. Bill would include conditions set forth in H.R. 5829 as reported by Senate Finance Committee in 1980.

V. Inventory Accounting for Small Business.—inflation has the effect of creating illusory profits for firms on "first in—first out" (FIFO) inventory accounting, since reported "cost of goods sold" are based on original, lower inventory price. Lower "cost of good sold" means higher taxable incomes and tax liabilities. Conversion to more realistic "last in—first out" (LIFO) method is very complicated and costly for smaller business. Under the bill:

A. Cash accounting (immediate expensing) would be permitted for businesses with total annual sales of $1 million or less.

B. Tax penalty associated with conversion to LIFO, which results from requirement to take back into income all previously written down inventories, would be payable over 10 year period.

C. Bill would delay until after December 31, 1980, compliance with Revenue Procedure 80-5 and Revenue Ruling 80-60, which require taxpayers to take back into income the value of erroneously written down inventories (Thor Power Tool case), to give small business more time to comply.●

OVERSIGHT HEARINGS ON FREEDOM OF INFORMATION ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oklahoma (Mr. ENGLISH), is recognized for 5 minutes.

● Mr. ENGLISH. Mr. Speaker, on July 14, 15, and 16, the Subcommittee on Government Information and Individual Rights will hold general oversight hearings on the Freedom of Information Act. The hearings will begin at 9:30 a.m. in room 2203, Rayburn House Office Building. The purpose of the hearings is to assess how well the Freedom of Information Act is working and accomplishing its objectives.

It has been many years since any congressional committee has taken a broad look at the FOIA. Much of the recent debate on FOIA has centered on specific problems and narrow complaints that have been separately raised. One consequence of this has been that little formal attention has been paid to the importance of FOIA in the public oversight of Federal Government activities. In these hearings, I hope that we will be able to assess the value of the act as well as evaluate the problems that have developed.

Another consequence of the piecemeal approach is that some issues have been resolved in isolation from one another. Solutions with general applicability may have been overlooked, and unnecessarily different procedures have resulted. By accepting comments on all aspects of the Freedom of Information Act, the subcommittee should be able to discern trends and identify patterns. This will simplify the consideration of any legislation.

Although a number of bills amending the FOIA have been introduced and referred to the subcommittee, and others may be introduced in the near future, these hearings will not focus on legislation. We would like to be able to make some general judgments about the act before concentrating on specific bills. There will be plenty of opportunity for consideration of legislation later in this Congress.

We hope to have a broad range of viewpoints on all aspects of FOIA represented at the July hearings. Those who use the act as well as those who are affected by it are invited to participate by submitting testimony or by appearing as witnesses. We will select as witnesses a representative sample of those who request to appear. In addition to the public witnesses, a number of agencies will be invited.

Anyone interested in testifying at these hearings should contact the subcommittee no later than June 22. Written testimony will be accepted for the record until 30 days after the hearings.

INDIAN TRIBAL GOVERNMENT TAX STATUS ACT

The SPEAKER pro tempore. Under a previous order of the House, the gentleman from Oklahoma (Mr. JONES) is recognized for 5 minutes.

● Mr. JONES of Oklahoma. Mr. Speaker, I rise to introduce a bill to amend the Internal Revenue Code to extend to recognized Indian tribes and Alaska Native villages the same tax treatment which is applicable to other governmental units. These amendments will enhance the ability of the tribes to serve the needs of their members, while furthering the Federal Government's longstanding policy of self-determination for Indian tribes and Alaska Natives.

Under the Internal Revenue Code, State and municipal governments not only are exempt from taxation, but enjoy a variety of other forms of favorable treatment intended to protect and strengthen government at the State and local levels. Indian tribes and Alaska Native villages provide many of the same essential public services as our States and municipalities. These include law enforcement, fire protection, schools, roads and transportation, water, sewage and garbage services, natural resource development, land use planning, housing, social and health programs, legal services, business licensing and regulation, and other activities. However, while an Internal Revenue Service ruling does exempt Indian tribes and Alaska Native villages from taxation, the Internal Revenue Code does not confer upon these tribes and villages any of

the other forms of favorable treatment now enjoyed by States and municipalities.

More important, this distinction in treatment clearly is at odds with Federal Indian policies promulgated for the past several administrations. Specifically, for the past half century, the Federal Government virtually without exception has sought to strengthen tribal governments politically and economically. The Indian Reorganization Act of 1934 authorized tribes to modernize their governmental structures to deal more effectively with contemporary problems and needs. In more recent years, both Congress and the executive branch have sought to reaffirm and strengthen tribal governments. Indeed, most Federal legislation enacted during the past 20 years to provide assistance to local governments also has expressly included assistance to tribal governments.

In an effort to assume greater local responsibility for financing their own public services, Indian tribes have attempted to raise funds on the reservation through the imposition of tribal taxes. These efforts, however, have been only partially successful because under the Internal Revenue Code taxes paid to Indian tribes are not treated in the same manner as taxes collected by non-Indian State and local governments. This difference in treatment undermines the tax initiatives of tribal governments and seriously interferes with their efforts to improve conditions of life in Indian country.

The proposed legislation has become increasingly vital for tribal governments as a result of the Reagan administration's policy of substantially reducing the Federal budget and transferring more public functions to State and local governments. Federal assistance to Indian tribes has been cut by one-third in the Reagan administration's proposed 1982 budget. Thus, Indian tribes are being asked to assume still greater responsibility for providing public services, even as they face severe cuts in Federal funding. If these tribes are to shoulder the new responsibilities being placed on States and municipalities, they must be accorded the same tax treatment as other State and local governments.

This bill generally accomplishes that objective. The term "recognized Indian tribe" includes any tribe, band, community, village, or group of Indians or Alaska Natives which is recognized by the Secretary of the Treasury, after consultation with the Secretary of the Interior, as performing substantial governmental functions. This definition includes the Indian tribes and Alaska Native villages which are treated as governmental units for certain revenue sharing purposes under the State and Local Fiscal Assistance Act of 1972. Three hundred and forty-seven groups are presently listed as eligible for revenue sharing entitlements under that act.

The bill also provides equivalent tax treatment with respect to interest paid on certain tribal debt obligations, pension and retirement income and contributions, charitable contributions, excise taxes, tribal income and real property taxes, and certain unrelated business income. Finally, the bill provides that certain tribal officials are to be "Government officials" for purposes of the tax on self-dealing between a private foundation and disqualified person.

The bill enjoys broad support among tribal leaders as well as a number of national Indian interest organizations. I would like to insert in the RECORD as an example of this support a strong letter of support from Mr. Ross O. Swimmer, the principal chief of the Cherokee Nation of Oklahoma.

DEAR CONGRESSMAN JONES: I am writing to request your strong support and sponorship of the proposed "Indian Tribal Governmental Tax Status Act".

This legislation would extend to Indian tribes the same general tax treatment under the Internal Revenue Code which at the present time is accorded state and local governments. More specifically, the measure grants, inter alia, a deduction from the federal income tax for taxes paid to an Indian tribe, exempts tribal governments from a variety of federal excise taxes, and provides a tax exemption for income on certain tribal governmental obligations.

The fundamental concept of the bill—namely, that Indian tribes are governments and, therefore, should receive the same federal tax treatment as other governments—is completely consistent with the legal history of tribes and current federal policy. As you are aware, Indian tribes long have exercised services, including health, education, police and fire protection, and general welfare, to their members. Furthermore, for a generation the established policy of the federal government has been to strengthen the political and economic institutions of tribal governments.

I am convinced that the "Indian Tribal Governmental Tax Status Act" would represent a significant step toward the economic enhancement and, hopefully, independence of Indian tribes. As I am sure you can appreciate, this progress ultimately would make Indian tribes far less dependent upon federal funds—a not untimely consideration in light of current national budgetary policies.

Very truly yours,
ROSS O. SWIMMER,
Principal Chief,
Cherokee Nation of Oklahoma.

Finally, let me conclude by giving you the revenue implications of this bill. Passage of this legislation would nominally affect the Federal budget. The revenue loss would be approximately $5 million annually. These days, that is a bargain, and I urge my colleagues to swiftly approve this legislation. Thank you, Mr. Speaker.●

AN INTERVIEW WITH LECH WALESA

(Mr. SOLARZ asked and was given permission to extend his remarks at this point in the RECORD and to include extraneous matter.)

Mr. SOLARZ. Mr. Speaker, the establishment of Solidarity, the first independent trade union in a Communist country, was an extraordinary event in the annals of communism. It was a vivid demonstration of the weakness of the economic system imposed by the Soviets upon Eastern Europe, as well as a stirring reminder of the desire for greater individual freedom behind the Iron Curtain.

If not for the exceptional leadership of Lech Walesa, it is extremely unlikely that Solidarity could ever have been established. Walesa is to politics what Michelangelo was to sculpture. His unusual blend of principle and pragmatism has enabled him to guide Solidarity, and Poland, through numerous crises virtually without bloodshed.

The Washington Post recently printed a remarkable interview with Walesa by the noted Italian journalist Oriana Fallaci. In view of the insights it provides about Walesa, who continues to play a crucial role in the ongoing drama in Poland, I would like to enter into the RECORD the complete text of this interview.

LECH WALESA: THE MAN WHO DRIVES THE KREMLIN CRAZY

LECH WALESA. One moment, First of all we have to clear things up. I am not a diplomat, I am not a master of ceremonies and even less an intellectual. I am an uncouth man, a worker. I have never read a book in my life, and I am a man with a goal to reach, so I don't give a damn for certain things. Not for the books, not for the interviews, not for the Nobel Prize and even less for you. I have no complexes, I don't. Neither toward the generals, nor toward the prime ministers, nor toward you. I can give a punch on the desk of a prime minister, I can leave a general in the lurch without saying goodbye, and as for you I can do the same. Anyway, I am the one who puts the first question: What do I lose, how much do I lose with this interview? Besides, why do you look at me that way?

ORIANA FALLACI. I look at you because you resemble Stalin. Has anybody ever told you that you resemble Stalin? I mean physically. Yes, same nose, same profile, same features, same mustache. And same height, I believe, same size.

A. Nie, nie, nie. No, no, no, nobody told me and I don't care. I didn't know it, I don't want to know it and you haven't answered my question yet. So I put another one: This interview, how do you write it? Question and answer, question and answer, or all together with the comments inside? Because the comments inside, I don't like them. It isn't fair, it is the reader who must make his comment and decide if the guy is right or wrong.

Q. Listen, Walesa. My interviews are written question and answer, question and answer, always. Whether you gain or you lose with this one, I don't know, because it depends on what you will tell me. And if

you don't mind, I am the one who asks. Now let's start. Seven months ago, nobody knew your name outside Poland and very few, I guess, inside Poland. Today you are one of the most famous men in the world and you drive Brezhnev crazy with your Solidarity movement, you put [former Polish Communist Party chief Edward] Gierek out of a job, you give [present Polish Communist Party chief Stanislaw] Kania a headache each time you call for a strike. When you go to Rome you are received by the pope as a head of state or a star and . . .

A. Stop, stop, stop, stop.

Q. Why? What happened?

A. It happens that you have a very authoritarian style, a typically dictatorial one. And as I do too, we have a problem. The problem is to find a compromise. So let's make a deal. From now on I will be nice with you and you will be nice with me, OK?

Q. OK. Here is the question: When you measure this glory, this power which fell on your shoulders, don't you ever say, my God, this is too much for me, I cannot keep it?

A. Yeah, yeah, yeah. The Holy Virgin knows. I'm tired, bloody tired, and not only in my body because I never sleep, my heart doesn't work as it should, it throbs, it hurts. I'm tired inside, in the soul. This life is not for me. Meeting people for whom you must wear a tie, knowing good manners, listening to recommendations: Don't do this, don't do that, please smile. Ties strangle me, I cannot wear them, why in hell should I smile when I don't feel like it? Nothing is permitted to me anymore, nothing. I cannot have a drink, I cannot pick up a girl, else the whole world falls apart and they say that the soda water went to my head. It isn't right. And you must say it, you must explain that men are men even if they make politics, men are sinners, so what?

Q. Yes, but I meant something else, Walesa. I meant the responsibility you took in front of your country and of history. Don't you ever feel scared by it, inadequate?

A. Nie, nie, nie. No, no, no, because I am a man of faith and because I know that this moment needs a guy like me. A guy who can make decisions with good sense and solve problems in a cautious, moderate way. I am not a fool. I do understand that too many injustices got accumulated during these 36 years, so things cannot change from morning to night. It takes patience, it takes wisdom I mean, the rage that people would like to burst like a bomb must be controlled. And I know how to control it, because I know how to reason through I am not a learned man, I know how to say things with the proper words. Like I did with the peasants at the strike in Jelenia Gora, for instance, when I yelled at them: "You've started the wrong strike, you idiots, you champions of stupidity, I'm against you." And 300 people remained speechless. Well, speaking to the crowds isn't always the art of going with the crowds, sometimes it's the art of going against the crowds and . . . Do I look pretentious?

Q. You don't. Why?

A. Because sometimes I give this impression. But I am not pretentious, believe me. I am a guy who wants to help people, for instance, if you ask me a favor, get me there, get me something, I immediately do my utmost. And I get you there even if I get my self into trouble, even if my friends say: "Mind your business. Is it your business? I like to make myself useful. It was so even in December 1970 and in August 1980, when I did what I did because nobody wanted to do it. It was so when I worked in the opposition, and today it is the same. I mean, I know how far we can go with our demands, I know what country we live in and what our realities are. I know the path we must follow. And the danger is to abandon such a path, to stray from the line because of a few blockheads or a few hotheaded idiots who don't understand.

So I have to keep repeating to them that things cannot be obtained too fast, that the demands must be put at the right time, without impatience. Look at the monument we erected for our dead, our workers killed by the police in 1970. Had we built it at once or two years later, now it would be simply the branch of a tree, easy to cut. Instead, today it's a tree and its roots are so deep that nobody can extirpate them, and if it will be cut it will blossom again.

Q. Lech, where did you learn to talk like that, from whom?

A. I don't know. I told you that I never read a book, anything. I never had teachers either, nor examples to imitate. I always solved my problems alone. Even the technical ones, like to fix a TV set or a sink, I think them over and I fix them in my way. Politics is the same. I think it over and I find the solution, or at least a solution. As for the moderate line I gave to Solidarity, however, I can tell you that I set it after the defeats of 1968 and 1970. It was then that I realized the necessity of working without impatience; otherwise, we would break our heads. I said to myself: Lech, a wall cannot be demolished with butts, we must move slowly, step by step, otherwise the wall remains untouched and we break our heads. You know, I have been arrested a hundred times, more or less, usually 48-hour arrests, and one thinks very well in jail because in jail there aren't noises and one is alone. It was in jail that I also found the way of sowing doubt into the minds of my jailers, to make them release me and to make them understand how wrong they were toward the country and themselves. Finally, it was in jail that I discovered the system of informing people about my arrests. Because it is useless to be arrested if people don't know.

Q. What was this system, Lech?

A. Well, when they released me and I went home, I placed myself in front of a bus stop and even if I had money to buy my ticket I pretended to be penniless. So I asked the people to buy my ticket, explaining that I had been arrested and why. People got interested and bought my ticket. Then I took the bus and during the trip I continued to explain, I held sort of a rally for them to warm up feelings. I did so for years. Wherever I went, whatever I did, I made something happen.

Q. This is great politics, Lech.

A. Nie, nie, nie. I am no politician, I have never been. Maybe one day I'll be one. I have just started to look around and understand their tricks, their calculations, but today I am no politician. The proof is that if I were a politician I would like doing what I do now, I would never have enough of it. Instead I'm fed up and I tell you at once what I am: I am a man full of anger, an anger I have kept in my stomach since I was a boy, a youngster. And when a man accumulates the anger I have accumulated for so many years, he learns to manage it all right. Which explains why I control so well the crowds and the strikes. Ha! One has to be very angry in order to know how to control the anger of the people. One has to have learned to live with it. Listen, my rage has been stored up for so long that I could keep it in at least five more years. That is, until 1985. It burst in August 1980 because I became aware that the occasion was bigger than I could hope. And I jumped beyond the fences of the Lenin shipyards in Gdansk.

Q. Let's talk about that, Lech, about the day you jumped beyond the fences.

A. Well, long before it happened we had considered the possibility of some big strike in Gdansk. We had considered it in our meetings when we taught the workers the history of Poland and the union laws. In fact, I had made myself ready to avoid an excessive situation and I had told the workers if there is an uproar I want to be informed at once. And when I was informed I immediately realized that the uproar had burst early because the situation was ripe, thus I had to get into the shipyards. The trouble was that four gentlemen—I mean, four policemen—watched me day and night. I got them lost—I won't tell you how, because I might need that trick again in the future—and I got to the shipyards and I jumped inside. I got there at a crucial moment. In fact, there was a meeting of 2,000 workers and the big boss was asking them to leave, making his promises. And nobody cared to oppose him. As a matter of fact, they were already leaving. I felt my blood boil. I elbowed my way through the crowd, I set myself in front of him and—do you know boxing? I landed him a straight left and I put him down so quickly that he almost fell out of the ring. I mean, I shouted at him that the workers wouldn't go anywhere if they weren't sure they had obtained what they wanted. So they felt strong, and I became their leader, and I still am.

Q. Leach, what does it mean to be a leader?

A. It means to have determination, it means to be resolute inside and outside, with ourselves and with the others. Here is what it means: I have been always so, even as a boy, when I was a poor boy living in the country and I wanted to become an aviator. I have always been the ringleader, like the billygoat that leads the flock, like the ox that leads the herd. People need that ox, that billygoat, otherwise the herd goes on its own here and there, wherever there is some grass to eat, and nobody follows the right road. A flock without an animal that leads is a senseless thing without a future. However, I don't know if I really am a leader. I simply know that I smell things, I feel situations, and when the crowd is silent I understand what it silently says. And I say it with voice, with the proper words. But now I have something to ask you. Because you travel a lot, and you know a lot of people, and you can answer. What do people say about me in the West?

Q. Well, they ask themselves, "Who really is this Walesa?"

A. Ha! This is a question they put to themselves in the East, too. "Who is this guy who makes our soldiers sleep in their boots for six months?" "Is he a general?" And it goes without saying that, in the East, they gave themselves an answer already.

Q. Yes, they call you an anarchist, a counterrevolutionary, an enemy of socialism, according to Tass and Pravda.

A. Tell them that I only am a man who wants some justice, a man who wants to be useful to them too, beyond any frontier and color and ideology. The hungry hare has no frontiers and doesn't follow ideologies. The hungry hare goes where it finds the food, and the other hares don't block it passage

with tanks. They should learn from the hares. But let's not talk about the East, let's talk about the West. What do they say about me in the West?

Q. Some say that you are a Christian Democrat, others say that you are a grandchild of Rosa Luxemburg [a Polish-born early associate of Lenin who broke with him over the issue of democracy within communism], others that you are a Social Democrat. And there are even some who call you a Eurocommunist. What shall we answer to them?

A. Nothing, because I refuse to express myself with their words, their labels, their slogans, left and right—socialism and communism, capitalism and Luxemburgism, Christian Democrat and Social Democrat. I express myself with my words: good, bad, better and worse. And I say: If it serves the people, it is good. If it doesn't serve the people, it is bad. Of course, one has to see how and in what sense it serves. One day I shared a little piece of bread with a nice girl, and I felt happy. Another day my wife served me a large portion of excellent sausages, but she did it so rudely that I felt unhappy and I couldn't eat them. I mean, having much food isn't enough and sometimes a little piece of bread is better than a large portion of excellent sausages. At the same time, one has to admit that if there isn't even that little piece of bread we cannot know happiness at all. Thus, we should build up a system which combines the two things: food and happiness. Then I say: Damn it, we live on this earth 50 or 60 years and on one side there are the rich who get richer and richer, on the other side there are the poor who get poorer and poorer. It doesn't work. Richness must be shared. But what do they store up, those rich who don't divide with the others? Anyhow they die, and when they die they leave all to heirs who are never satisfied and who curse them all the same.

Q. But, more or less, the socialists and the communists say these same things, Lech.

A. Nie, nie, nie. I told you that I don't want to use slogans invented by them.

Q. Do you mean that communism has failed?

A. Ha! It depends on the way you measure the concept of good, bad, better, worse. Because if you choose the example of what we Polish have in our pockets and in our shops, then I answer that communism has done very little for us. If you choose the example of what is in our souls instead, I answer that communism has done very much for us. In fact, our souls contain exactly the contrary of what they wanted. They wanted us not to believe in God, and our churches are full. They wanted us to be materialistic and incapable of sacrifices; we are antimaterialistic, capable of sacrifice. They wanted us to be afraid of the tanks, of the guns, and instead we don't fear them at all.

Q. Lech, let's go back to the sausages without freedom. How to obtain it?

A. Freedom must be gained step by step, slowly. Freedom is a food which must be carefully administered when people are too hungry for it. Suppose that Solidarity obtains some access to TV and through TV it starts yelling: "Away with the thieves, the rascals, the gangsters who robbed us for so many years." How would people react? Cutting off heads, I tell you, flooding the streets with blood. It would be chaos, anarchy. It already happened in the countryside, I saw it with my eyes. All at once the government got busy selling TV sets to the peasants, TV filled their houses with programs which attacked religion, and as a consequence many peasants lost their faith. They even became atheists. *Nie, nie, nie.* Things cannot change suddenly. It's dangerous. Don't you agree?

Q. Not really. I think that we should never be afraid of freedom, because there is only one thing which teaches freedom, and this is freedom itself. Freedom should never be administered by drops, like a spoonful of milk in the stomach of a starving person.

A. Well . . . On the other hand, one cannot exaggerate it as you do in the West, with all those political parties which don't know what they want, and one disturbs the other, doesn't let the other work, yet one supports the other—what kind of brothel is that? It seems a brothel to me and nothing else. Never mind that here in Poland it wouldn't be possible to have political parties, because things stay as they are. Here the control must be exercised by the unions. If we will be able to do it, we'll function better than your parties, which waste their time biting each other, insulting each other, accusing each other, collecting gossip on each other: He goes to sleep with her, she goes to sleep with someone else. It doesn't seem to me that your parties have done much, and in all that brothel I see only one indisputable fact: They say they want something and they do the reverse, Am I right?

Q. Yes, but if the unions substitute for the political parties, there is no pluralism, there is only a sharing of power between the party and the unions. Don't you want the pluralism, Lech?

A. Yeah, yeah, yeah. Sure. Every person, every group in the whole society must have the right to express itself. But why imitate the parties and use the world party? One can say "association," "club." The club of those who raise canaries, for instance. Or the club of those who pray with the rosary. And as wheat doesn't grow on stones—I mean, as in Poland we cannot have political parties but the one which already exists, as men must adapt themselves, let the canaries' breeders get together. Let them have a statute which welcomes the formation of other clubs—the club of those who raise rabbits, or pheasants, or ducks—and let us all become breeders of canaries, rabbits, pheasants, ducks, chickens. The important thing is that such groups exist freely, so they can serve society, and that the master does not arrest them. Do I say stupid things?

Q. No, Lech, you don't say stupid things.

A. Well, maybe I do. I don't know much about concepts, I never have time to think, and there are so many problems that I must fix in my mind. With you I'm rather thinking out loud. Yet I like it. Gee, do I like it. Because it happens so rarely that you hear the right questions. And right questions make me think. I mean, sometimes it is in talking with others that one gets an idea and says: "Why didn't I think of it before?" Yes, that's how ideas blossom, and this canaries idea might turn out very well.

Q. Yet the idea of growing wheat on stones is good, too.

A. Yeah, yeah, yeah. The problem is that one should remove the stones first. And what if under the stones there isn't the soil to grow wheat? What if the wheat grows short and deformed?

Q. Better than nothing.

A. I don't know. Maybe you are right, maybe you are wrong. But I think that you are wrong, and I am going to demonstrate it. If you want a child, and you want it with all your heart, desperately, do you prefer to have a deformed dwarf or not to have him at all? Oh, I would like to be less tired and to express myself better. I would like . . . Let's go on. But don't put those difficult questions to me, because they give me a headache, and now I have a headache.

Q. All right, an easy question, then. I know that your stepfather lives in America, so I guess that he has invited you many times to join him there. Have you ever planned to emigrate there?

A. *Nie, nie, nie,* never. I could never leave Poland, never. Besides, I've always thought that a man must live where he was born and grew up, in order to give back to his country what he got from it. Yes, my second father has invited me many times. I call him my second father because he married my mother after the death of my father. My real father died in 1945 from the privations he suffered in the extermination camp where the Germans put him. "Come here. What do you do there?" my second father wrote. But besides the fact that I couldn't live outside Poland, I felt that his invitation didn't come from his heart. It came from the dollars in his pockets. And I was not wrong because, when I met him again in Rome last month, I did not recognize him. In Poland he was a poor man, yet always ready to make sacrifices and divide what he had with others. Now he thinks only about money, amusements, and he has lost humanity. The dollars went to his head, I guess, and the result is that I don't get along with him anymore. I see life in a different way, I don't like money as he does. Yes, it's good to have money, we need money to live and raise our children properly, but money isn't all and doesn't give dignity. On the contrary, it gives a lot of temptations and sometimes makes people nasty. Which is why I would never try to become a millionaire.

Q. Then tell me, Lech: Were you angry at your stepfather when he let himself be photographed with Reagan?

A. Nie, nie, nie, nie, I like Reagan. Yeah. I like him a lot. The way he moves, the way he talks: just like me. Well, maybe he talks a little better than me, but for sure he moves like me. Look how he walks, or how he waves his hands and his arms. I only hope that he doesn't change, that he doesn't forget where he comes from. It would be a pity. Has he already changed? I'll see when I go to America and I will meet him, I hope.

Q. When will you go to America, Lech?

A. On the one hand I would like to go at once, on the other hand, never. Because I'm still black and blue from the hugs of the Roman crowds and I don't like it when people push me and touch me and kiss me like that. Anyhow, I'll go soon. As soon as I've put some order in the movement, let's say in six or seven months if nothing bad happens. Poland needs help. Not dollars help, I mean political help, economic help, and in order to obtain such help we must have contacts abroad. Nor should we forget that in the West there are people who make cold calculations, agreements, who would like to use the blood of Poland to solve their problems. Yes, I really must go to America. And with the help of our queen, the Holy Virgin, I shall go.

Q. Is that why you wear on your jacket this image of the Black Virgin [a statue of the Madonna that Poles credit with turning back a 17th-century Swedish invasion]? And isn't that image a label too?

A. Nie, nie, nie. It isn't a label, it is a habit. Or, better, a blessing. The Black

Virgin has always been sort of blessing for us Polish, and this particular one . . . I don't even remember who gave it to me, or when. Someone must have put it on my jacket after a pilgrimage. With the rosary also, it happened like this. Someone put a rosary in my hands, and I kept it until it broke. This is not easy for you westerners to understand, I know. The church has never been for you what it has always been for us, a symbol of struggle, I mean, the only institution which never submitted to the oppressors. And when we examine the factors which led to what is happening today in Poland, it is not enough to mention the workers' uprisals in 1956, 1968, 1970, 1976. It isn't even enough to consider our contact with foreigners, I mean the fact that we have been traveling abroad very much in these years and that we have seen how you live in your countries. We also have to consider the election of Pope Wojtyla, his travel to Poland and the continuous obstinate smart work of the church. Without the church nothing could happen, my case itself would not exist, and I would not be what I am. I'll say more: If I hadn't been a believing soul, I wouldn't have resisted, because I had so many threats. So many.

Q. But have you always been so religious, Lech?

A. Yeah, yeah, yeah. Ask my bishop. Even at school, when they taught us communism and I didn't pay any attention. Only between 17 and 19 I got far from the faith. Ha! I got on the wrong path: drinking, idleness, girls. Then something happened. One day I felt very cold, very tired, and I started looking for a place where I could go inside and rest. But there was nothing except a church in the area, so I entered the church and I sat down on a bench. And immediately I got well. So well that I left the wrong path. Now don't misunderstand me, don't believe I am an angel. Angels do not exist and I am no angel, I'm rather a Satan. However, I go to church every morning, and every morning I receive communion, and if I have some major sin to confess, I also go to confession. I say so because I am not that bad, after all. Since I've lived in this world I only got drunk a couple of times, and as for the girls . . . Listen, my wife is not bad. I rather say that she is the ideal woman for me. Had I another wife, by now I would be divorced or killed with a kitchen knife. So I have no reason to betray her. Besides, we have six children. Doesn't that show that we make love well? Much and well. Well, of course, when I happen to be far from her for many weeks as I was recently, I get temptation. I told you that I am no saint.

Q. OK, Lech, it seems to me that your headache is over. So let's go back to the difficult questions. Don't you ever have fears about being manipulated? For example, yesterday in Warsaw a high prelate said to me: "Walesa never does what the cardinal doesn't want."

A. In this respect it is true. I would never do a thing against the faith, the church and even less against Cardinal Wyszynski. He is a great man, his wisdom is immense and his help has been enormous. All the time and in every way. People don't know that it was Cardinal Wyszynski who arranged our meetings with Gierek and Kania, and even during the strikes of the peasants of Rzeszow and Bielsko-Biala I had to ask him to give me a hand. Without his intervention I wouldn't have been able to call an end to these strikes. So it would be stupid of me if I did something against the cardinal. Nor would he permit anyone to do something against me. Not even somebody with a black skirt [a priest's cassock]. But if somebody with a black skirt tries to use me . . . Listen, I cannot swear that no one tries, on any side. But I can swear that I don't permit anybody to manipulate me, not even to influence me. And if someone tries, I break his nose.

Q. What about the intellectuals, in that sense?

A. From the intellectuals and the peasants, *liberas nos Domine* [free us, Lord]! I say so. You would never believe the hangover I got from those peasants during their strikes. I kept yelling: "You are mean. Selfish, mean. Stubborn, mean. Don't you understand the situation we are in?" The intellectuals are like them, in a sense. Because they are unable to adjust themselves to the reality of the moment. During the struggle they were perfect, in fact I respect them a lot, yet now they cannot adjust. They would like to go on with the methods we followed before August 1980. Which is the reason why I always shout: "Be realistic. Use your brain." And this proves that I am not manipulated by them. Neither by the church nor by them. Then why do you keep so many professors and teachers and university lecturers in your movement, you may ask. Ha! Because, should I refuse them, they would dig underground like moles and they would get in all the same, through the tunnel. Better say: Come in, sit down. Besides, they're intelligent, and intelligent people are always useful. Provided you don't get inferiority complexes toward them. I don't. Know why? Because intellectuals need a lot of time to understand things, and even more to make a decision. They stay there to discuss, examine, discuss, and in five hours they reach the same conclusion I reached in five minutes or five seconds.

Q. And what about the Communist Party, Lech? I always asked myself why they let you rise so high and so fast. To exploit you? To use you as an alibi or as a scapegoat? Or maybe to assimilate you?

A. *Nie, nie, nie.* Being assimilated by the powers is a possibility that I don't even consider. If I wanted such a thing, I would have done it when I was Mr. Nobody. You can't imagine the offers I had. Being assimilated by the powers? I'd rather shoot myself in the head. Dignity counts more than life. Listen, they let me emerge because they didn't have another choice. Literally. Of course, this doesn't . . . I mean, when we speak about Poland we have to consider also the situation abroad. We are controlled. Thus, victims cannot be avoided. People always ask me: "Lech, aren't you afraid of being killed?" And as an answer I shrug my shoulders. I do so little to protect myself. Some of my friends try, they follow me wherever I go, but what is the use? One can be murdered in so many ways, not only with guns. They killed my best friend, they might kill me. I'm a fatalist. If it must happen, it will happen. And I will go to paradise.

Q. Lech, there is a three-month armistice between the government and Solidarity. But not all armistices end up with a peace treaty. what will happen then?

A. To begin with, Solidarity did not sign any armistice. We only said that we wouldn't be hostile toward the new government of [Premier Wojciech] Jaruzelski. Poland needs a strong government, a government capable of governing, and Jaruzelski can do it. Because he is a soldier, a general, therefore used to giving orders and to imposing discipline on others and on himself. As a soldier, he also should have the clean hands which are necessary to clear the country out of bastards with dirty hands. We must let him work. But if the hostilities will come from him and his government, we'll fight. We will, I promise. Whether someone likes it or not.

Q. Whether the Soviets like it or not, you mean. And what if Jaruzelski fails?

A. If he fails and our "brothers" don't "help" us, if he fails and our "allies" don't intervene, then it should be Solidarity that takes the responsibility of government. It is not very likely—as a matter of fact, it's so unlikely that such a possibility seems to me fantastic. Yet it is a possibility. Yet it is a possibility, it exists. Now let me make this clear: I don't want it, Solidarity doesn't want it, we only want to arrange it so the poor people eat a little more and are a little more satisfied. We want to arrange it, not to make politics, not to govern. But if other choices will not exist, Solidarity must be the choice. If the government says, "This is a mess, we resign," Solidarity should take the responsibility and I should take the situation into my hands. I say it in a firm way. And I add: Poland will never go back to being what it was before August 1980. Never.

Q. Lech, I want to make sure I have understood you. Did you really say that, should this government fail, Solidarity should govern and you should take the situation into your hands?

A. Yes, I said it.

Q. So you were not joking. And do you believe that you would be capable?

A. Yes, I believe it.

Q. Do you also believe that the Communist Party and the Kania government would accept such a capitulation? Yesterday in Warsaw a very important member of the government who also is a very important member of the [Communist Party] central committee said to me: "We shall never agree to share power, and even less to give up power."

A. Today they say so. Tomorrow, who knows? Great empires have fallen during the history of man.

Q. And what would the consequences be with your "brothers," your "allies"—I mean, with the Soviets? How can you hope that they would permit such a thing, that they wouldn't intervene to help?

A. This is the point, this is the problem, this is why I said that I regard such a possibility as a fantastic possibility.

Q. Less fantastic than a Soviet intervention if you even think to take over, Lech? So let us pronounce these two words that you Polish never pronounce, not even whisper, as if avoiding them could serve to exorcise them: Soviet intervention, Soviet intervention. Brezhnev says them, instead. And Kania, too. Publicly.

A. Oh, oh, oh, how often people raise their voices in order to scare. Don't we do the same in the opposition? I don't think that a violent confrontation would serve them, and they know it. So they will not do it. Or, better . . . Listen, somebody once said to me that everything would start in Poland and that we would obtain all or almost all, and that then we would suddenly lose all, to be resurrected one day and be men again. Well, I don't accept such prophecies, yet I admit that they might contain some truth. Just because of that possible truth I tell you that we don't want to pay such a price. Here is why we follow this tortuous path, and why I fight those who would like to change the moderate line of Solidarity, and why I keep

talking of political patience, and why I yell at the intellectuals and at the peasants. And why I remain so vague in speaking with you.

Q. Come on, Lech. Do you really believe that Brezhnev cares about the way we talk? It is not the words that count it is the facts. And when Kania has to deal with you, when Jaruzelski has to deal with you, when . . .

A. How many times have you seen the Soviet tanks in Poland? How many times have the Soviet tanks come here from August on?

Q. In Czechoslovakia they waited almost eight months.

A. But that solution has never been applied to Poland. Four times at least, Poland has found itself in a tragic situation during the last 25 years, yet we overcame it without the Soviet tanks. This time it will be the same. Besides, Czechoslovakia is not Poland.

Q. It isn't Hungary, either. Yet in Hungary too the Soviet tanks intervened. It is not Afghanistan either, yet Afghanistan is invaded by the Soviets.

A. Poland is different, Poland is different.

Q. Then let me say this: Isn't it true that the Polish students have asked and obtained, at least on paper, abolition of the obligatory teaching of Marxism and of the Russian language in their universities?

A. It's true.

Q. Isn't it true that, if the agreement is not respected and the students' strikes are not taken into consideration, the workers will strike for them?

A. Yes, it's true. Solidarity approves what the students are doing on that matter and it will fully support them in that struggle. We are with them, I am with them. The only reason why I did not go to the Lodz university during the students' strike is that I had to stay with the peasants in Rzeszow. The peasant strike's problem was more urgent. But I sent my advisers to Lodz, and they remained there all the time, and every two hours I called to tell them what should be done. Finally, I am the one who arranged the meeting of the students with the deputy premier, [Mieczyslaw] Rakowski.

Q. Well, do you expect the Soviets to accept such a national refusal of their ideology and of their language? Do you really believe that such heresy will go unpunished forever?

A. Nie, nie, nie, and what do you expect from us, then? That we give up? That we stop everything, that we go back to what we were and we say, sorry, it was a joke, we did not mean it, because we don't want to be punished? Should we give up the duty of being men and forget? What other solution do we have but to do what we are doing? I said it and I repeat it: We don't want to pay the price of a violent confrontation, we really don't. But if it will be necessary to pay that price, we will. Nobody will say that we are cowards. Personally I am more than ready to die. I am not as ready to kill: I am not able to kill, not even a chicken to make soup; my stomach gets upset when I see people killing a chicken. Yet if I were attacked, if I had to defend my country, my house, my children, my friends, my fellow workers, I wouldn't hesitate. Oh, why do you make me say these things? Why? You give me a headache again. Now I have a headache again.

Q. I do too, now. I have it too, Lech. So let's keep our headache, both of us, and let's face the last difficult question: But are the Soviet tanks indispensable? Aren't, wouldn't the Polish tanks be enough?

A. Nie, nie, nie, nie. I shall not consider that, no. Not even for a second. I refuse to believe that our bonzes [literally, Buddhist monks] are unable to find a bloodless solution. I refuse to believe that our soldiers will kill our workers. We will solve everything without pain, profitably for the two sides. Why do you ask such a thing?

Q. Because that very important member of the government also said to me: "The Polish army is devoted to the party one thousand percent." A lie?

A. Here is the only question which I cannot answer. This house is filled with microphones. Yes, microphones, and God knows how many there are listening now to this conversation. Yes, since 1972 they have tapped me with their bloody machines, and sometimes I ask myself: How long will it last, how long?

Q. And you, Lech, how long will you last?

A. If they don't kill me, you mean? If everything goes on smoothly? Well, coldly speaking, I would say that from now on I can only descend. Gradually or with a headlong fall. This is because I am not fitted for normal times and I cannot submit myself to the rules and the games. Because I am dead tired and my heart is in bad shape, my health goes to pieces. Because I cannot repeat myself—that is, I cannot repeat what I have done in August and until today. And finally because, if the worst happens, all the rage of the people will turn on me. And the same ones who applauded me, erected altars for me, will throw stones at me, will trample on me, will trample on me. They will even forget that I acted for good, in good faith. You know, if I were selfish and shrewd, I would cut my mustache and go back to some shipyard. But I shall not do it. I cannot do it. From now on, the situation will become more and more complicated, more and more difficult, and we are going to receive many blows. Yes, many blows, I must stay where I am: to struggle, to extinguish the unnecessary fires, like a fireman, to transform the movement into an organization, to . . .

Q. To raise canaries that sing much and well. Thank you, Lech. Good luck, Lech.

A. Good luck to you, and thanks to you, with all my heart. You have been nice to me and it isn't true that you throw the chador into the face of people you interview [a reference to the Persian robe Fallaci removed during her interview with the Ayatollah Khomeini in 1979]. I have enjoyed these hours we spent together so much, though you gave me a headache twice. You offered me so many ideas which I'll think over. I shall never forget you. And, if the Polish censors will permit publication of your book, "A Man," I will read it. And it will be the first book I've read in my life. Anyhow, if I go to paradise. I'll save a seat for you. So we can talk about the wheat that grows on the stones.

LEAVE OF ABSENCE

By unanimous consent, leave of absence was granted to:

Mr. EVANS of Iowa (at the request of Mr. MICHEL), for today and the balance of the week, on account of official business as a member of the Committee on Agriculture.

Mr. NELSON (at the request of Mr. WRIGHT), for today, on account of official business.

SENATE ENROLLED JOINT RESOLUTION SIGNED

The SPEAKER announced his signature to an enrolled joint resolution of the Senate of the following title:

S.J. Res. 50. Joint resolution designating July 17, 1981, as "National P.O.W-M.I.A. Recognition Day."

SPECIAL ORDERS GRANTED

By unanimous consent, permission to address the House, following the legislative program and any special orders heretofore entered, was granted to:

Mr. GONZALEZ, for 60 minutes, today.

Mr. GONZALEZ, for 60 minutes, on Wednesday, June 3, 1981.

Mr. GONZALEZ, for 60 minutes, on Thursday, June 4, 1981.

Mr. FASCELL, for 30 minutes, on Thursday, June 4, 1981.

(The following Members (at the request of Mr. NELLIGAN) to revise and extend their remarks and include extraneous material.)

Ms. FIEDLER, for 60 minutes, on June 4.

Mr. DERWINSKI, for 60 minutes, on June 3.

(The following Members (at the request of Mr. WOLPE) to revise and extend their remarks and included extraneous material:)

Mr. HUTTO, for 5 minutes, today.

Mr. ANNUNZIO, for 5 minutes, today.

Mr. LEVITAS, for 5 minutes, today.

Mr. BROWN of California, for 20 minutes, today.

Mr. LAFALCE, for 20 minutes, today.

Mr. ENGLISH, for 5 minutes, today.

Mr. JONES of Oklahoma, for 5 minutes, today.

Mr. EVANS of Georgia, for 60 minutes, on June 10.

EXTENSION OF REMARKS

By unanimous consent, permission to revise and extend remarks was granted to:

Mr. SOLARZ, and to include extraneous matter notwithstanding the fact that it exceeds two pages of the RECORD and is estimated by the Public Printer to cost $1,560.

Mr. BROWN of Ohio, immediately following the remarks of Mr. HAMMERSCHMIDT on H.R. 2156, extension of funds for Veterans' Administration support of State medical schools, today.

Ms. FERRARO, on H.R. 2540, immediately prior to the vote.

Mr. DE LUGO, in support of H.R. 2540, U.S. International Trade Commission and Customs Service Authorization, during general debate in the House today.

(The following Members (at the request of Mr. NELLIGAN) and to include extraneous matter:)

Mr. YOUNG of Florida in five instances.
Mr. CLINGER.
Mr. BROWN of Ohio in four instances.
Mr. BENEDICT.
Mr. MCDADE in two instances.
Mr. MICHEL in three instances.
Mr. RITTER.
Mr. LEE.
Mr. DERWINSKI.
Mr. KEMP.
Mr. LEBOUTILLIER.
Mr. LAGOMARSINO in three instances.
Mr. RUDD.
Mr. BEREUTER.
Mr. MCCLOSKEY in two instances.
(The following Members (at the request of Mr. WOLPE) and to include extraneous matter:)
Mr. IRELAND.
Mr. DE LA GARZA in 10 instances.
Mr. STARK in 10 instances.
Mr. WYDEN.
Mr. COELHO.
Mr. YATES.
Mr. RODINO.
Mr. BYRON.
Mr. ALEXANDER in two instances.
Mr. HERTEL.
Mr. DORGAN of North Dakota.
Mr. SKELTON.
Mr. WAXMAN.
Mr. GEJDENSON in two instances.
Mr. DE LUGO.
Mr. HAMILTON.
Mr. MAZZOLI.
Mr. WEISS in four instances.
Mr. LEVITAS.
Mr. CORRADA in two instances.
Mr. WON PAT.
Mr. BAILEY of Pennsylvania in two instances.
Mr. MOFFETT.
Mrs. SCHROEDER.
Mr. ECKART.
Mr. SEIBERLING in 10 instances.

ADJOURNMENT

Mr. GONZALEZ. Mr. Speaker, I move that the House do now adjourn.

The motion was agreed to; accordingly (at 3 o'clock and 31 minutes p.m.), under its previous order, the House adjourned until tomorrow, Wednesday, June 3, 1981, at 12 o'clock noon.

EXECUTIVE COMMUNICATIONS, ETC.

Under clause 2 of rule XXIV, executive communications were taken from the Speaker's table and referred as follows:

1490. A letter from the Secretary of the Army transmitting notice of the Army's intention to proceed with the second phase of the Chemical Agent Munitions Disposal System at Tooele Army Depot, Utah, pursuant to section 409(b)(4) of Public Law 91-121, as amended; to the Committee on Armed Services.

1491. A letter from the Acting Director, Defense Security Assistance Agency, transmitting a report on the impact on U.S. readiness of the Army's proposed sale of certain defense equipment to Jordan (Transmittal No. 81-49), pursuant to section 813 of Public Law 94-106; to the Committee on Armed Services.

1492. A letter from the Acting Director, Defense Security Assistance Agency, transmitting a report on the impact on U.S. readiness of the Army's proposed sale of certain defense equipment to Jordan (Transmittal No. 81-53), pursuant to section 813 of Public Law 94-106; to the Committee on Armed Services.

1493. A letter from the Mayor of the District of Columbia, transmitting a draft of proposed legislation to provide for improvements in the local planning process in the District of Columbia, a transfer authority over certain purely local planning activities to the government of the District of Columbia, and for other purposes; to the Committee on the District of Columbia.

1494. A letter from the Mayor of the District of Columbia, transmitting a draft of proposed legislation to amend the District of Columbia Self-Government and Governmental Reorganization Act with respect the National Capital Service Area; to the Committee on the District of Columbia.

1495. A letter from the Mayor of the District of Columbia, transmitting a draft of proposed legislation to authorize the transfer of the District of Columbia Employment Security Building to the government of the District of Columbia; to the Committee on the District of Columbia.

1496. A letter from the Secretary of Education, transmitting a report by the National Center for Education Statistics on the condition of education pursuant to section 406(d)(1) of the General Education Provisions Act, as amended; to the Committee on Education and Labor.

1497. A letter from the Secretary of Education, transmitting the annual report for fiscal year 1980 on programs under the Women's Educational Equity Act, pursuant to section 937 of the Elementary and Secondary Education Act, as amended; to the Committee on Education and Labor.

1498. A letter from the Chairperson, National Advisory Council on Bilingual Education, transmitting the fifth annual report of the Council, pursuant to section 732(c) of the Elementary and Secondary Education Act, as amended; to the Committee on Education and Labor.

1499. A letter from the Acting Director, Defense Security Assistance Agency, transmitting notice of the Army's intention to offer to sell certain defense equipment to Jordan (Transmittal No. 81-49), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on Foreign Affairs.

1500. A letter from the Acting Director, Defense Security Assistance Agency, transmitting notice of the Navy's intention to offer to sell certain defense articles to Saudi Arabia (Transmittal No. 81-51), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on Foreign Affairs.

1501. A letter from the Acting Director, Defense Security Assistance Agency, transmitting notice of the Air Force's intention to offer to sell certain defense equipment and services to Oman (Transmittal No. 81-52), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on Foreign Affairs.

1502. A letter from the Acting Director, Defense Security Assistance Agency, transmitting notice of the Army's intention to offer to sell certain defense equipment to Jordan (Transmittal No. 81-53), pursuant to section 36(b) of the Arms Export Control Act; to the Committee on Foreign Affairs.

1503. A letter from the Secretary of Housing and Urban Development, transmitting the semiannual report of the Department's Inspector General, covering the period ended March 31, 1981, pursuant to section 5(b) of the Inspector General Act of 1978; to the Committee on Government Operations.

1504. A letter from the Acting Administrator of General Services, transmitting various prospectuses proposing the lease of space, pursuant to section 7(a) of the Public Buildings Act of 1959, as amended; to the Committee on Public Works and Transportation.

1505. A letter from the Fiscal Assistant Secretary of the Treasury, transmitting the 25th annual report on the financial condition and results of the operations of the highway trust fund, pursuant to section 209(e)(1) of the Highway Revenue Act of 1956, as amended (H. Doc. No. 97-56); to the Committee on Ways and Means and ordered to be printed.

1506. A letter from the Mayor of the District of Columbia, transmitting a draft of proposed legislation to amend the District of Columbia Self-Government and Governmental Reorganization Act and section 7324 of title 5, United States Code, to authorize the Council of the District of Columbia to regulate political activities of employees of the District of Columbia government; jointly, to the Committees on the District of Columbia and Post Office and Civil Service.

1507. A letter from the Acting Comptroller General of the United States, transmitting a report on opportunities to reduce expenditures related to airport traffic control towers operated by the Federal Aviation Administration (CED-81-100, June 1, 1981); jointly, to the Committees on Government Operations and Public Works and Transportation.

SUBSEQUENT ACTION ON A BILL INITIALLY REFERRED UNDER TIME LIMITATIONS

Under clause 5 of rule X, the following action was taken by the Speaker:

the Committee on Science and Technology consideration of the bill (H.R. 2330) for a period ending not later than June 5, 1981, for consideration only of such portions of the bill and amendment authorizing funds for the development of a long-term nuclear powerplant safety systems plan pursuant to subsection 205(f) of the Energy Reorganization Act of 1974, as amended, as fall within that committee's jurisdiction over energy research and development pursuant to clause 1(r)(11), rule X.

PUBLIC BILLS AND RESOLUTIONS

Under clause 5 of rule X and clause 4 of rule XXII, public bills and resolutions were introduced and severally referred as follows:

By Mr. RODINO:

H.R. 3748. A bill to amend titles 10, 14, 37, and 38 of the United States Code, to codify recent law, and to improve the Code; to the Committee on the Judiciary.

By Mr. BROWN of California (for himself, Mr. WALGREN, Mr. HOLLEN-

BECK, Mr. ERTEL, Mr. WATKINS, Mr. SEIBERLING, and Mr. DYMALLY):

H.R. 3749. A bill to advance the national prosperity and welfare, to establish a National Technology Foundation, and for other purposes; jointly, to the Committees on Science and Technology and the Judiciary.

By Mr. FINDLEY:

H.R. 3750. A bill to insure that each community in the United States, regardless of size, is provided with the maximum local full time radio broadcasting service; to the Committee on Energy and Commerce.

By Mr. BAILEY of Pennsylvania:

H.R. 3751. A bill to amend and revise provisions of the Internal Revenue Code of 1954 relating to the targeted jobs tax credit; to the Committee on Ways and Means.

H.R. 3752. A bill to amend the Internal Revenue Code of 1954 to provide tax incentives for the training of skilled labor in labor-short industries; to the Committee on Ways and Means.

H.R. 3753. A bill to amend the Internal Revenue Code of 1954 to provide for the disposition of investment tax credits earned by basic American industries through transferability, refundability, and carryback and carryforward of earned and future investment tax credits, and to provide certain penalties when taxpayers transfer or receive refunds for such credits; to the Committee on Ways and Means.

By Mr. BROWN of Ohio:

H.R. 3754. A bill to amend the Internal Revenue Code of 1954 to provide a 50-percent maximum tax rate on taxable income; to the Committee on Ways and Means.

By Mr. BROWN of Ohio (for himself, Mr. RITTER, Mr. BENEDICT, Mr. CORCORAN, and Mr. DANNEMEYER):

H.R. 3755. A bill to amend title XIX of the Social Security Act to provide for a cap on medicaid expenditures beginning with fiscal year 1982, and for other purposes; to the Committee on Energy and Commerce.

By Mr. JOHN L. BURTON:

H.R. 3756. A bill to provide that no Treasury note which is issued for a term of more than 3 years shall bear interest at a rate which is greater than 8 percent per annum; jointly to the Committees on Banking, Finance and Urban Affairs and Ways and Means.

By Mr. FORD of Tennessee:

H.R. 3757. A bill to amend title XVIII of the Social Security Act to include dental care among the items and services for which payment may be made under the supplementary medical insurance program; jointly to the Committees on Energy and Commerce and Ways and Means.

By Mr. HANCE:

H.R. 3758. A bill to amend the Internal Revenue Code of 1954 to reduce estate and gift taxes; to the Committee on Ways and Means.

By Mr. IRELAND (for himself, Mr. GIBBONS, and Mr. FRENZEL):

H.R. 3759. A bill to amend the Tariff Act of 1930 with respect to the penalty for failure to declare articles valued at less than $50; to the Committee on Ways and Means.

By Mr. JONES of Oklahoma (for himself, Mr. CONABLE, Mr. FRENZEL, Mr. MATSUI, Mr. UDALL, Mr. CLAUSEN, Mr. YOUNG of Alaska, Mr. BEREUTER, Mr. SOLARZ, and Mr. LOWRY of Washington):

H.R. 3760. A bill to amend the Internal Revenue Code of 1954 to extend certain tax provisions to Indian tribal governments on the same basis as such provisions apply to States; to the Committee on Ways and Means.

By Mr. LAFALCE:

H.R. 3761. A bill to amend the Internal Revenue Code of 1954 to improve productivity and employment by promoting capital investment in small business, and for other purposes; to the Committee on Ways and Means.

By Mr. LEBOUTILLIER:

H.R. 3762. A bill to make State and local governments eligible for negotiable order of withdrawal accounts; to the Committee on Banking, Finance and Urban Affairs.

By Mr. LOWRY of Washington:

H.R. 3763. A bill to amend section 5 of the Uniformed Survivors Benefits Amendments of 1980 to provide the same annuity benefits to the surviving spouses of certain former members of the uniformed services who died before September 21, 1972, but after their discharge or release from active duty, as are provided under such section to the surviving spouses of certain former members who died before such date while serving on active duty; to the Committee on Armed Services.

By Mr. NAPIER (for himself and Mr. EMERSON):

H.R. 3764. A bill to amend title II of the Social Security Act to eliminate the 5-month waiting period which is presently a prerequisite of eligibility for disability insurance benefits or the disability freeze; to the Committee on Ways and Means.

By Mr. NAPIER (for himself, Mr. EMERSON, Mr. ROBERTS of Kansas, Mr. HARTNETT, Mr. MCCOLLUM, Mr. ROBERTS of South Dakota, Mr. MORRISON, Mr. JOHNSTON, Mr. CRAIG, Mr. SKEEN, Mr. HANSEN of Utah, Mr. STATON of West Virginia, Mr. HOLLAND, Mr. BAILEY of Missouri, and Mr. BROWN of Colorado):

H.R. 3765. A bill to provide mandatory social security coverage for Members of Congress and certain congressional employees; to the Committee on Ways and Means.

By Mr. NAPIER (for himself, Mr. EMERSON, Mr. NELLIGAN, Mr. ROBERTS of Kansas, Mr. ROBERTS of South Dakota, Mr. HARTNETT, Mr. CAMPBELL, Mr. HANSEN of Utah, Mr. MORRISON, Mr. SKEEN, Mr. FIELDS, Mr. CRAIG, Mr. MCCOLLUM, Mr. JOHNSTON, Mr. BROWN of Colorado, Mr. BAILEY of Missouri, Mr. HANSEN of Idaho, Mr. ROGERS, and Mr. STATON of West Virginia):

H.R. 3766. A bill to amend title II of the Social Security Act to eliminate the earnings test for individuals age 65 and over; to the Committee on Ways and Means.

By Mr. RUSSO:

H.R. 3767. A bill to amend the Internal Revenue Code of 1954 to provide an annual election to expense $25,000 of depreciable business assets, to increase the amount of income to which the lower corporate tax rates apply, to provide a zero rate of tax where a small business corporation distributes dividends, to increase the amount of used property to which the investment tax credit applies, to increase the investment tax credit for qualified rehabilitation expenditures, and for other purposes; to the Committee on Ways and Means.

By Mr. WAXMAN:

H.R. 3768. A bill to amend title III of the Public Health Service Act to provide for the prompt and orderly closure and transfer of Public Health Service hospitals and clinics; to the Committee on Energy and Commerce.

By Mr. WINN:

H.R. 3769. A bill to establish a Severe Storms Advisory Committee to review, on an annual basis, the severe storms research and operations activities of the Federal Government; to the Committee on Science and Technology.

By Mr. PHILLIP BURTON:

H.J. Res. 271. Joint resolution commemorating the centennial of the United Brotherhood of Carpenters and Joiners of America; to the Committee on Ways and Means.

By Mr. COELHO:

H.J. Res. 272. Joint resolution to authorize and request the President to issue a proclamation designating April 4 through 10, 1982, "National Medic Alert Week"; to the Committee on Post Office and Civil Service.

By Mr. DANIEL B. CRANE:

H.J. Res. 273. Joint resolution to designate the third Sunday in September 1981 as "National Ministers Day"; to the Committee on Post Office and Civil Service.

By Mr. LAFALCE:

H.J. Res. 274. Joint resolution to establish National Volunteer Firefighters' Day; to the Committee on Post Office and Civil Service.

By Mr. MITCHELL of New York:

H.J Res. 275. Joint resolution designating the week beginning September 25, 1981, as "Battle of West Canada Creek Bicentennial Week"; to the Committee on Post Office and Civil Service.

By Mr. TAYLOR:

H.J. Res. 276. Joint resolution to designate June 30, 1981, as "National Drug Standards Day"; to the Committee on Post Office and Civil Service.

By Mr. WOLF (for himself, Mr. PARRIS, Mr. ASHBROOK, Mr. HAGEDORN and Mr. ERLENBORN):

H.J. Res. 277. Joint resolution granting the consent and approval of the Congress for the States of Virginia and Maryland and the District of Columbia to amend the Washington Metropolitan Area Transit Regulation Compact to delete the requirement that laborers and mechanics employed by contractors and subcontractors in the construction, alteration, or repair of projects undertaken by the Washington Metropolitan Area Transit Authority be paid wages at rates not less than those prevailing on similar construction in the locality as determined by the Secretary of Labor in accordance with the Davis-Bacon Act; jointly, to the Committees on the Judiciary and the District of Columbia.

By Mr. RINALDO (for himself, Mr. ANNUNZIO, Mr. APPLEGATE, Mr. ATKINSON, Mr. BAILEY of Pennsylvania, Mr. BENJAMIN, Mr. BIAGGI, Mr. BINGHAM, Mr. JOHN L. BURTON, Mr. CARNEY, Mr. CHAPPIE, Mrs. CHISHOLM, Mr. CLAUSEN, Mr. COELHO, Mr. CONTE, Mr. CONYERS, Mr. DE LA GARZA, Mr. DENARDIS, Mr. DERWINSKI, Mr. DONNELLY, Mr. DOWNEY, Mr. DUNN, Mr. DWYER, Mr. FASCELL, Mr. FAUNTROY, Mr. FAZIO, Mr. FISH, Mr. FOGLIETTA, Mr. FORD of Michigan, Mr. FORSYTHE, Mr. GILMAN, Mr. GOLDWATER, Mr. GUARINI, Mr. HERTEL, Mrs. HOLT, Mr. HORTON, Mr. HOWARD, Mr. LANTOS, Mr. LEBOUTILLIER, Mr. LEE, Mr. MARKEY, Mr. MARKS, Ms. MARTIN of Illinois, Mr. MATSUI, Mr. MAVROULES, Mr. MCDADE, Mr. MCGRATH, Mr. MCHUGH, Mr. MOFFETT, Mr. MOLINARI, Mr. MOORHEAD, Mr. MURPHY, Mr. MURTHA, Mr. NELLIGAN, Mr. OBERSTAR, Mr. O'BRIEN, Mr. OT-

TINGER, Mr. PEYSER, Mr. PRICE, Mr. PURSELL, Mr. RAHALL, Mr. RICHMOND, Mr. RITTER, Mr. RODINO, Mr. ROE, Mr. ROTH, Mrs. ROUKEMA, Mr. ST GERMAIN, Mr. SANTINI, Mr. SCHEUER, Mrs. SCHNEIDER, Mr. SCHUMER, Mr. SHAW, Mr. SHUMWAY, Mr. SMITH of New Jersey, Mr. SOLARZ, Mr. SOLOMON, Mr. VENTO, Mr. WALGREN, Mr. WEISS, Mr. WORTLEY, Mr. ZEFERETTI, and Mr. LAGOMARSINO):

H. Res. 145. Resolution expressing the sense of the House of Representatives that the week commencing on June 7, 1981, should be designated as "National Italian-American Heritage Week"; to the Committee on Post Office and Civil Service.

By Mr. ROSENTHAL (for himself and Mr. DERWINSKI):

H. Res. 146. Resolution to offer strong support for current diplomatic efforts to resolve the latest crisis in Lebanon, and to protect the right of Lebanese Christian and other communities to live in freedom and security; to the Committee on Foreign Affairs.

PRIVATE BILLS AND RESOLUTIONS

Under clause 1 of rule XXII, private bills and resolutions were introduced and severally referred as follows:

By Mr. FAZIO:

H.R. 3770. A bill for the relief of Divinia Manatad and Jeuerita Manatad; to the Committee on the Judiciary.

By Mr. LOWRY of Washington:

H.R. 3771. A bill to authorize the documentation of the vessel, *Pacific Pride*, as a vessel of the United States with coastwise privileges; to the Committee on Merchant Marine and Fisheries.

By Mr. ROYBAL:

H.R. 3772. A bill for the relief of Mee Sau Tse; to the Committee on the Judiciary.

ADDITIONAL SPONSORS

Under clause 4 of rule XXII, sponsors were added to public bills and resolutions as follows:

H.R. 52: Mr. COURTER, Mr. DOUGHERTY, Mr. FOGLIETTA, Mr. FOUNTAIN, Mr. PANETTA, Mr. RHODES, Mr. SUNIA, Mr. VENTO, Mr. WEAVER, and Mr. JEFFORDS.

H.R. 397: Mr. MITCHELL of Maryland.

H.R. 450: Mr. HAGEDORN, Mr. HAMMERSCHMIDT, Mr. PHILIP M. CRANE, Mr. JOHNSTON, Mr. GINGRICH, and Mr. WOLF.

H.R. 654: Mr. MOLLOHAN and Mr. BENEDICT.

H.R. 703: Mr. LUNDINE.

H.R. 713: Mr. WOLF and Mr. MCCOLLUM.

H.R. 808: Mr. SUNIA, Mrs. COLLINS of Illinois, Mr. FOGLIETTA, Mr. LEVITAS, and Mr. DE LUGO.

H.R. 894: Mr. MCDONALD and Mr. JACOBS.

H.R. 911: Ms. FIEDLER.

H.R. 1005: Mr. WEAVER, Mr. DREIER, Mr. WYDEN, Mr. NAPIER, Mr. HARTNETT, and Mr. EVANS of Iowa.

H.R. 1034: Mr. NAPIER.

H.R. 1309: Mr. LELAND.

H.R. 1364: Mr. MCCOLLUM.

H.R. 1464: Mr. HILER, Mr. DASCHLE, Mr. WOLF, Mr. MCKINNEY, Mr. PARRIS, Mr. VANDER JAGT, Mr. RINALDO, Mr. MARRIOTT, Mr. SIMON, Mr. LEE, Mr. EMERSON, Mr. LELAND, Mr. HUTTO, Mr. PHILIP CRANE, Mr. TAUZIN, Mr. O'BRIEN, and Mr. FOWLER.

H.R. 1491: Mr. EMERY.

H.R. 1492: Mr. EMERY.

H.R. 1493: Mr. EMERY.

H.R. 1508: Mr. BROYHILL, Mr. BLILEY, Mr. TAUKE, Mr. MOORHEAD, Mr. LUKEN, Mr. COLLINS of Texas, Mr. SCHEUER, and Mr. D'AMOURS.

H.R. 1576: Mr. RAHALL.

H.R. 1596: Mr. HANSEN of Idaho, Mr. MOAKLEY, Mr. O'BRIEN, Mr. SCHEUER, Mr. SOLARZ, Mr. STOKES, and Mr. SUNIA.

H.R. 1703: Mr. JOHNSTON.

H.R. 1711: Mr. BAILEY of Pennsylvania.

H.R. 1725: Mr. WOLPE.

H.R. 1890: Mr. DIXON, Mr. JAMES K. COYNE, and Mr. HARKIN.

H.R. 1911: Mr. NAPIER.

H.R. 1918: Mrs. SCHROEDER and Mr. PURSELL.

H.R. 1983: Mr. WEBER of Minnesota.

H.R. 1995: Mr. HUBBARD, Mr. NICHOLS, and Mr. YOUNG of Alaska.

H.R. 2067: Mr. FORD of Michigan, Mr DINGELL, Mr. HERTEL, Mr. BLANCHARD, Mr. WOLPE, Mr. BROOMFIELD, Mr. PURSELL, and Mr. DAVIS.

H.R. 2103: Mr. FORSYTHE, Mr. LAGOMARSINO, and Mr. DERWINSKI.

H.R. 2104: Mr. STOKES, Mr. PORTER, Mr. DOUGHERTY, Mr. NAPIER, and Mr. BURGENER.

H.R. 2325: Mrs. BOUQUARD, Mr. STATON of West Virginia, and Mr. JAMES K. COYNE.

H.R. 2327: Mr. NAPIER.

H.R. 2488: Mr. ERTEL.

H.R. 2548: Mr. WOLPE.

H.R. 2556: Mr. GOODLING.

H.R. 2588: Mr. AUCOIN, Mr. MOAKLEY, Mr. VENTO, Mr. OBERSTAR, and Mr. WIRTH.

H.R. 2646: Mr. EVANS of Georgia, Mr. TRIBLE, Mr. HERTEL, Mr. NAPIER, Mr. DORNAN of California, and Mr. MAZZOLI.

H.R. 2773: Mr. GINGRICH, Mr. MARTIN of Illinois, Mr. ANTHONY, Mr. ALEXANDER, Mr. MINETA, Mr. FOGLIETTA, and Mr. NAPIER.

H.R. 2805: Mr. PHILIP M. CRANE.

H.R. 2883: Mr. SMITH of New Jersey, Mr. BAFALIS, Mr. PANETTA, Mr. FORSYTHE, Mr. JONES of North Carolina, Mr. HOLLAND, Mr. WINN, Mr. RAILSBACK, Mr. MCEWEN, Mr. LENT, Mr. QUILLEN, Mr. ST GERMAIN, Mr. FOUNTAIN, Mr. SMITH of Alabama, Mr. DUNCAN, Mr. WON PAT, Mr. COELHO, Mr. WALKER, Mr. VENTO, Mr. DYSON, Mr. WEBER of Minnesota, Mr. SIMON, Mr. MURPHY, Mr. SCHEUER, Mr. PETRI, Mr. DOWNEY, Mr. SOLOMON, Mr. HUGHES, Mr. OTTINGER, Mr. GINGRICH, and Mr. BAILEY of Pennsylvania.

H.R. 2897: Mr. YOUNG of Alaska.

H.R. 2932: Mr. SNYDER.

H.R. 2973: Mr. CROCKETT, Mr. FLORIO, and Mr. MITCHELL OF MARYLAND.

H.R. 3114: Mr. BUTLER and Mr. LIVINGSTON.

H.R. 3143: Mr. BENJAMIN, Mr. CONYERS, Mr. ECKART, Mr. STARK, Mr. OBERSTAR, Mr. FAZIO, Mrs. CHISHOLM, Mr. SABO, Mr. FARY, and Mr. FOGLIETTA.

H.R. 3158: Mr. BAILEY of Pennsylvania.

H.R. 3159: Mr. BAILEY of Pennsylvania.

H.R. 3204: Mr. MOAKLEY and Mr. FRANK.

H.R. 3205: Mr. STOKES.

H.R. 3218: Mr. RODINO, Mr. MITCHELL of Maryland, Mr. GARCIA, Mr. FORD of Tennessee, and Mr. CROCKETT.

H.R. 3253: Mr. FOGLIETTA and Mr. BEDELL.

H.R. 3436: Mr. BARNES and Mr. SABO.

H.R. 3442: Mr. VENTO and Mr. WON PAT.

H.R. 3666: Mr. HUBBARD and Mr. BLILEY.

H.J. Res. 72: Mr. LEBOUTILLIER, Mr. GRAMM, Mr. ARCHER, Mr. YOUNG of Alaska, Mr. SHUMWAY, Mr. MAVROULES, Mr. BEVILL, and Mr. STANTON of Ohio.

H.J. Res. 125: Mr. GUNDERSON.

H.J. Res. 131: Mr. GRADISON, Mr. MONTGOMERY, Mr. D'AMOURS, and Mr. RAILSBACK.

H.J. Res. 225: Mr. GOLDWATER, Mr. SAWYER, Mr. DORGAN of North Dakota, Mr. MATTOX, Mr. LANTOS, Mr. BROYHILL, Mr. HARTNETT, Mr. SHELBY, Mr. HANSEN of Utah, Mr. ANDREWS, Mr. LEWIS, Mr. GRAMM, Mr. MILLER of Ohio, Mr. MCEWEN, Mr. MORRISON, Mr. LUNGREN, Mr. MURPHY, and Mr. HANCE.

H. Con. Res. 59: Mr. WAXMAN and Mr. CONYERS.

H. Res. 100: Mr. NAPIER.

PETITIONS, ETC.

Under clause 1 of rule XXII, petitions and papers were laid on the Clerk's desk and referred as follows:

103. By the SPEAKER: Petition of the New England Board of Higher Education, Wenham, Mass., relative to the guaranteed student loan program; to the Committee on Education and Labor.

104. Also, petition of the University of Wisconsin Archives Council, Eau Claire, Wis., relative to reauthorization of the National Historical Publications and Records Commission; to the Committee on Government Operations.

105. Also, petition of the Negros Occidental Chapter, Defenders of Bataan and Corregidor, Inc., Bacolod City, Philippines, relative to veterans benefits; to the Committee on the Judiciary.

AMENDMENTS

Under clause 6 of rule XXIII, proposed amendments were submitted as follows:

H.R. 3455

By Mr. BONIOR of Michigan:

—At the end of the bill, add the following new section:

REPEAL OF AUTHORIZATION FOR CONSTRUCTION OF BINARY NERVE GAS PRODUCTION FACILITIES

SEC. 906. Notwithstanding section 705(a), the authorization for military public works to be accomplished by the Secretary of the Army at Pine Bluff Arsenal, Arkansas, contained in title I of the Military Construction Authorization Act, 1981 (94 Stat. 1750), and the authorization of appropriations therefor, are repealed as of the date of the enactment of this Act. If appropriated funds have previously been obligated for construction contracts for such military public works, such contracts shall be canceled and the contractors involved shall be paid the cancellation liability of the United States under such contracts.

By Mr. ERTEL:

—Page 59, after line 11, add the following new section:

REALIGNMENT OF FORT INDIANTOWN GAP

SEC. 906. (a) No funds appropriated pursuant to any authorization contained in this Act may be used to realign, or terminate any component of, Fort Indiantown Gap located in Annville, Pennsylvania, before November 1, 1981.

(b) No funds appropriated pursuant to any authorization contained in this Act may be used to realign, or terminate any component of, Fort Indiantown Gap located in Annville, Pennsylvania, if before November 1, 1981, both the Armed Services Committee of the Senate and the Armed Services Committee of the House of Representatives pass, by a majority vote of those members

of the committee present and voting, a quorum being present, resolutions disapproving such realinement or termination.

(c) For purposes of this section, the term "to realign" includes any action which both reduces and relocates functions and civilian personnel positions, but does not include a reduction in force resulting from workload adjustments, reduced personnel or funding levels, skill imbalances, or other similar causes.

By Mr. SIMON:

—Page 27, strike out lines 10 through 25 and insert in lieu thereof the following:

MX MISSILE SYSTEM

SEC. 305. No funds appropriated pursuant to the authorization for the MX missile system in section 301 may be obligated or expended with respect to a basing mode for the MX missile until—

(1) the President selects a specific basing mode for the MX missile system and transmits to the Congress in writing a description of the basing mode selected;

(2) the Secretary of Defense submits to the Committees on Armed Services of the Senate and House of Representatives a report in writing (A) justifying the selection of the President referred to in paragraph (1), and (B) containing a comparison and evaluation of alternative basing modes to the basing mode selected by the President; and

(3) a period of sixty days has elapsed after the certification under paragraph (1) has been received by the Congress and during which both Houses of Congress have not adopted resolutions of their respective Houses expressing disapproval of the development of the basing mode selected by the President.

EXTENSIONS OF REMARKS

SMALL BUSINESS TAX INCENTIVES ACT OF 1981

HON. JOSEPH M. McDADE
OF PENNSYLVANIA
IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mr. McDADE. Mr. Speaker, Congressman DAN MARRIOTT and I recently introduced H.R. 3202, the Small Business Tax Incentives Act of 1981. We submitted this measure because small business continues to be seriously affected by long-term inflation, high interest rates, and a heavy tax burden.

In late March, the Subcommittee on Tax, Access to Equity Capital and Business Opportunities of the House Small Business Committee, of which Mr. MARRIOTT is ranking minority member, held a series of hearings on the impact the President's tax proposals would have on small business. H.R. 3202 addresses many of the pressing problems voiced by the small business community during those hearings.

I would like to call to your attention the various provisions of the Small Business Tax Incentives Act. I feel these provisions were best outlined by my colleague from Utah during his excellent testimony before the House Ways and Means Committee when that panel held hearings on the tax aspects of the President's economic program. Accordingly, I am submitting Mr. MARRIOTT's thorough and able testimony for your consideration. The remarks of my distinguished colleague follow:

Mr. Chairman, Members of the Committee, I'm Dan Marriott, Congressman for the Second District of Utah. I appreciate this opportunity to outline what I believe must be a key element of any equitable and effective supply-side tax reform. As the Ranking Republican on the Subcommittee on Tax, Access to Equity Capital, and Business Opportunities, of the House Committee on Small Business, I feel it is essential that we fully understand the probable effects of the President's proposed economic program on the nation's small business community, and that we try to take those effects into consideration as debate continues on the final form the package will take.

I. AN OVERVIEW OF SMALL BUSINESS

The role of small business in our economy is indeed a crucial one. Let me simply refresh your memories with a number of significant statistics:

According to actual tax returns filed, there are around 15½ million businesses in the U.S. Of these, 2.7 million are corporations, including around 400,000 Subchapter S corporations.

1.4 million are partnerships.

Over 11.3 million are sole proprietorships.

Using the SBA's rule of thumb, that 97 percent of all businesses are small, there are over 15 million small businesses in this country.

II. SMALL BUSINESS' CONTRIBUTIONS TO THE ECONOMY

Small business accounts for the vast majority of all net new jobs in the private sector.

Treasury Secretary, Donald Regan, puts the figure at 85 percent.

The National Small Business Association puts the figure at 95 percent, which is probably closer to the mark. From 1969–1976, there were 9 million new jobs created. There was virtually no increase in employment among the nation's 1,000 largest corporations. Three million of those jobs were in State government; the other 6 million were in small businesses. (Source: Small Business Administration).

In any event, small business provides 58% of all non-farm employment.

Small business accounts for 50% of all new technical innovations.

According to the National Federation of Independent Business, small businesses contribute 43% of the Gross National Product, and 48% of the business portion of the GNP.

In addition to playing an active role in the stability of their towns and cities, small businesses are becoming increasingly aware of their potential political clout, and how to use it.

III. TAXES AND SMALL BUSINESS

The economic role of small business, as essential as it is, may be seriously threatened by the combination of long-term inflation, high interest rates, and a bias against small business of current tax laws.

I call your attention to figures set forth in the hearing record entitled Inventory Accounting as a burden on the Capital Formation Process (Pt. II), before the Subcommittee on Access to Equity Capital and Business Opportunities of the House Small Business Committee. These hearings, held June 10 and 11, 1980, produced the following table:

TABLE I.—THE RELATIVE TAX DISADVANTAGE OF SMALL CORPORATIONS

Size of business receipts	Percentage of total taxes to net worth	
	1969	1974
$50,000 to $100,000	18.3	30.1
$100,000 to $500,000	14.8	23.5
$500,000 to $1,000,000	15.4	21.3
$1,000,000 to $5,000,000	16.6	19.9
$10,000,000 to $50,000,000	14.7	16.9
$50,000,000 to $100,000,000	13.7	13.6
Over $1,000,000,000	11.8	11.5

There are additional, if unintentional, biases against small business in the tax code:

1. *Depreciation.*—The use of the Asset Depreciation Range is restricted, because of its complexity, almost exclusively to large firms.

2. *Accounting Methods and Inventory Methods.*—Small firms are merely confused by the complex regulations they face in choosing an accounting method. Further, because they cannot take advantage of an inventory method that recognizes the impact of inflation inventories, they wind up paying what amounts to an inventory tax.

3. *Accumulated Earnings Tax.*—A small corporation, if it accumulates earnings over $150,000, will have to justify to the IRS why the money should not be distributed (taxed). Since high interest rates force small businesses to finance, as much as possible, from retained earnings, this rule discourages growth. Small, closely held corporations are the only ones subjected to scrutiny by the IRS under this proposal. Even if it is able to show that operating needs justify a high accumulated earnings level, the small business may find the cost of mounting a defense prohibitive or even fatal.

4. *Ceiling on the Investment Tax Credit for Used Property.*—Small businesses make substantial use of used, refurbished equipment. The ceiling of $100,000 was supposedly needed to prevent large firms for trafficking in ITC's by reselling equipment between companies. Studies have shown this does not take place (Source: NFIB). Moreover, the value of the $100,000 ceiling has been greatly diminished by inflation. The most that can be said for the limit of this point is that it inhibits growth of many small firms, and provides an American market for the Japanese and other producers of less expensive, new equipment which is eligible for the full investment tax credit with no ceiling.

5. *Estate Taxes.*—Many small businesses must be sold so the heirs can pay the estate taxes due. Such a sale is frequently made to a larger concern, which works to increase economic concentration and to spur inflationary pressures. It obviously has another unintended result, that of preventing a family from continuing to operate a concern from generation to generation.

IV. SPECIFIC PROPOSALS FOR RELIEF OF SMALL BUSINESS

Congressman McDade and I have introduced a bill which we believe will restore a balance to our tax laws and correct the existing bias against small business. I'd like to take a few moments to outline our proposal and to comment on the reasons for the approach we've taken.

I strongly support the Administration's tax reduction proposals as a necessary first step to turning our economy around. The careful planning and foresight that have gone into these proposals is reflected by the fact that the Reagan Administration is not relying on tax policies alone, but is wisely joining them to budgetary restraint and sound monetary policies.

However, the very diversity that lends such strength to the American economy also makes it impossible for any single program to solve all its problems. For this reason, we would argue that, while 10–5–3 and Kemp-Roth are a good beginning, they must be augmented if small business is to realize any substantial benefit from the President's tax reduction package.

1. The great majority of corporations in this country are not capital-intensive and, therefore, would not benefit significantly from 10–5–3. In fact, 80% of all corporations

are small businesses. Most of them, including those in light industry, construction, trade, and service, would benefit more from a reduction in corporate tax rates.

The Marriott-McDade bill closely follows the lead of the bill reported last year by the Senate Finance Committee as H.R. 5829. It drops the bottom rate from 17% to 15% (for the first $25,000 of taxable income) and extends the scale of lower rates from the present $100,000 to $200,000. Anything beyond $200,000 would be taxed at 46%, which is slightly higher than the rate in the Finance Committee bill. (See Table II.)

Our reasons for setting the upper rate at 46% are simple: First, we have already offered large corporations a sizable break for all amounts under $200,000. Secondly, larger, more capital-intensive corporations will benefit—in a way that most small corporations won't—from 10-5-3. Thirdly, we believe that such a rate structure will tend to balance out the inequity in present effective corporate tax rates, while minimizing the revenue loss to the Treasury. The revenue loss from this portion of our bill has not been estimated; however, with the cap we propose, it should be significantly less than that for the Finance Committee bill, which went from $1.0 billion in fiscal year 1981 to $7.1 billion in fiscal year 1985.

TABLE II

[In percent]

Taxable income	Rate
Current law:	
0 to $25,000	17
$25,000 to $50,000	20
$50,000 to $75,000	30
$75,000 to $100,000	40
Over $100,000	46
Marriott-McDade bill (H.R. 3202):	
0 to $25,000	15
$25,000 to $50,000	17
$50,000 to $75,000	25
$75,000 to $100,000	30
$100,000 to $150,000	35
$150,000 to $200,000	40
Over $200,000	46

2. Studies show that about 80% of all businesses buy less than $25,000 in equipment in any one year. These non-capital-intensive firms, whether incorporated or not, are in no position to benefit from 10-5-3.

For example, if a small firm buys a $15,000 word processor, it will probably have to borrow money to pay for it. The term of the loan is likely to be four years, but 10-5-3 sets the depreciation period at five years; in other words, it will have paid off the loan for the equipment a full year before it can write it off. There are numerous other examples, from a new kitchen for a restaurant, to a new cooler for a flower shop.

We have calculated, with the help of NFIB and NSB, that a $25,000 direct expensing provision, as contained in H.R. 5829, coupled with the addition of a one percent investment tax credit, would allow the lowest bracket businesses to come out even with the capital recovery they would receive under other provisions of 10-5-3, which proposes a 6% credit for 3-year equipment.

Moreover, it would have the added benefit of simplicity. Under the proposed bill, there are still amortization schedules. Expensing would eliminate these tables and for most small firms, would have the effect of reducing the number of depreciation classes from 130 to one. The revenue loss from this provision has not yet been estimated. It should be similar to that in H.R. 5829, which peaked at $2.9 billion in fiscal year 1982, then dropped back below $1 billion in fiscal year 1985.

3. Under present law, there is a $100,000 limitation on the amounts of used equipment eligible for the investment tax credit; there is no similar limitation on new equipment.

This discriminatory tax treatment impacts directly and primarily on small businesses, which are already hindered by their inability to externally or internally generate the capital necessary to buy the equipment.

Capital stock formation among small businesses has been impeded by high interest rates, restricted availability of credit, regulatory burdens imposed by government, and tax laws.

Factoring in inflation, it is estimated that it would cost approximately $600,000 to start a small machine shop with used machinery which would employ ten workers. Retooling by already established small businesses is similarly far in excess of the current $100,000 cap.

Given current declining productivity, high interest rates, high capital costs and stiff international competition, small businesses should not be handicapped in their effort to enter into, and remain in, the American economy.

The Machinery Dealers National Association says it is confident that most new businesses in their industry equip their shops with used machinery.

To redress this imbalance, Mr. McDade and I propose that the ceiling on the amount of used property available for the investment tax credit be increased to $300,000.

4. The next provision is one which was included in the Finance Committee bill last year. It calls for increasing the number of Subchapter S corporation shareholders from 15 to 25, thus allowing more businesses to use the Subchapter S provisions. The revenue loss from this provision is estimated at only $5 million per year, but it will provide small businesses with much greater flexibility in attracting investment capital.

5. Title VI contains a combination of three provisions designed to attract more capital to the financially starved small business community. First, it attracts the all-essential seed money for a small business by allowing a $20,000 deduction to one per lifetime per individual. Then, to encourage the retention of the investment in small business, it calls for an increase in the capital gains tax exclusion to 80% for individuals who invest in a small business. Thirdly, it reduces the corporate alternative tax rate from 28% to 20%, to make the corporate capital gains tax rate the same as the maximum capital gains rate applicable to noncorporate taxpayers, when the corporation sells an interest in a small business.

The total estimated revenue "loss" from cutting the rate of the capital gains tax in half, on equity investments, in small businesses engaged in trade or commerce, is estimated to be only $159 to $176 million. Revenue gains from the jobs created by capital raised from such a reduction would be significantly higher, as was vividly demonstrated by the general capital gains cut passed in 1978.

Both the National Association of Small Business Investment Companies and the National Venture Capital Association point to the dramatic reaction of the venture capital industry to the tax cut. In the eight years before the tax cut, venture capital firms raised about $466 million; in only three years, following the cut, they raised over $1.7 billion.

In the eight years prior to the tax cut, venture capital firms invested a little over $2.9 billion; in only three years following the cut, they almost matched their eight year total, investing over $2.5 billion.

Furthermore, the Treasury has not lost the revenue it predicted it would. According to Oscar S. Pollock of Ingalls and Snyder in New York, indications are that the effects of the tax cut are significantly in the other direction. In 1978, the Joint Tax Committee estimated a revenue loss to the Treasury of $2.6 billion as a result of the capital gains tax reduction. What happened was quite the opposite. Treasury now estimates that there was a $1.1 billion revenue gain in 1979. In other words, in true supply-side fashion, a cut in the rate yielded a net increase in actual taxes paid.

We chose this three-part approach in lieu of a "rollover" for three simple reasons: First, it is far easier to administer, for both the small business investor and for the IRS; second, it will result—in the worst case—in a small revenue loss or—in the best case—in a revenue gain; thirdly, and just as important, it will rechannel investment money from tax shelters, where the success of the business is not the primary consideration, to areas of the economy where success is actually a prerequisite for a tax benefit. In other words, the small business investor, under our plan, has a vested interest in seeing that the small business' chances for success are maximized.

6. The next provision addresses a problem about which I expressed concern long before I ever came to Congress. As I mentioned earlier, too many small firms are sold, not because the heirs wish to sell them, but because they must do so to pay estate taxes. The present $500,000 exclusion is simply outdated and inadequate.

Such a sale can be avoided, of course, if the family-owned business purchases substantial insurance to pay Uncle Sam upon the death of the principal. As an insurance man myself, I have no doubt that, even with an increase in the exclusion, the prudent businessman or woman will invest in prudent financial planning, in order to assure their heirs an immediate, liquid estate in addition to the family business. Too many small businessmen and women are learning to cope the way farmers have for years: "Live poor and die rich." They shouldn't be forced to make that kind of a choice.

Our bill proposes an increase in the exclusion of small businesses from estate taxes to $2 million, when the small business is passed to a qualified heir and held for at least eight years. This recapture period is considerably less than the present 15 years primarily because the present provision is so totally out of step with actuarial tables. A surviving spouse is less than likely to outlive the deceased for 15 years. This provision recognizes reality and provides the spouse with much greater flexibility should he or she wish to retire, becomes ill, or is incapacitated after a reasonable period of operating the business.

It will also provide greater incentive for the continued growth of a small firm. Currently, an entrepreneur reaching middle age is likely to forgo expansion or improvement of the family business when the most likely beneficiary is Uncle Sam rather surviving heirs. "Why increase the value of my business just to pay increased estate taxes?" is likely to be the key factor in the equation.

7. The next title is designed to encourage savings and investment directly, by increasing the exemption of interest and individ-

uals to $2,000 per year per individual ($4,000 for joint returns), and making the exemption permanent.

8. Finally, in recognition of the need small business has for inventory reform, we've incorporated the language of a proposal introduced by Mr. Nowak, my Subcommittee Chairman. He has already testified on the matter in some detail before this Committee.

CONCLUDING REMARKS

In closing, I would simply like to point out our measure is a carefully crafted piece of legislation designed to benefit small business, but not at the expense of larger firms.

The Administration's own figures indicate that the tax part of its economic package is composed of tax rate reductions for individuals of about $554 billion over 5 years, and a total of $164.3 billion in reductions over the same period for business. We have pointed out that the benefits of 10-5-3 for small business will be quite limited. Additionally, the benefits of Kemp-Roth apply only to money withdrawn from the business, when that money is taxed.

Our bill is designed to encourage investment and retention of funds in small business, to offset some of the tax biases now affecting small business, to address problems not dealt with in the Administration's fine, but limited, tax reduction package, and to harness the true potential of the small business community for creating jobs, innovations, and enterprises that will ultimately provide the real foundation for economic growth and opportunity in this nation.

Thank you.●

EXECUTIVE PAY CEILING

HON. FRANK R. WOLF

OF VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mr. WOLF. Mr. Speaker, I rise to express my continued concern about the adverse effects of the executive pay ceiling on the recruitment, retention, and morale of our top managers in the Federal service. Due to the imposition of the pay limitations, these managers have had a single 5½-percent pay raise since 1977. Absolutely incredible, considering the double-digit inflation of recent years. Also, as a result of the pay caps, we now have some 33,000 top executives and lesser management employees all at the pay ceiling. This means that, in many cases, four to seven tiers of management are being paid the same salary. An intolerable situation in itself.

I believe that the work of the Federal executive is especially important at this time when efficiency and productivity are needed more than ever in Government. As taxpayers, we all want the best available talent to run the Government and to keep costs down. Unfortunately, we are losing the very employees who contribute the most to the efficiency of the Federal service. This exodus through retirement and higher paying jobs in the private sector is due in large part to the pay ceiling. Last year, over 75 percent of the Federal executives who reached retirement age did, indeed, retire. This is unprecedented. NASA officials indicated that virtually all of the top managers on the Columbia project will retire and that a whole new management team will be continuing the project. Quite a waste.

The FBI recently conducted a survey of its top executives. The results of that survey again point out the seriousness of this pay compression issue. Mr. Speaker, I request that the executive summary of that survey be inserted in the RECORD.

In summary, I believe that our capacity to attract and retain executives of outstanding ability and achievement to top positions in the Government has seriously diminished and has reached a crisis point. I sincerely hope that the administration and the Congress will, as expeditiously as possible, take whatever action is necessary to resolve this problem which is destroying the quality of our Senior Executive Service.

SUPERGRADE SURVEY—EXECUTIVE SUMMARY

In October, 1980, an Executive Salary Ceiling Questionnaire was sent to all 135 supergrades in the FBI. One hundred and five responded (79 percent) as follows:

The average respondent has moved 6.9 times in his FBI career, 3.3 times in the last 10 years, and 1.5 times in the last three years. The average respondent has received 3.9 promotions within the last 10 years and 1.5 promotions within the last three years. The average respondent has received .7 actual salary increases and twice as many (1.4) "on-paper" salary increases in the last three years. Eighty-eight respondents indicated some form of financial loss occasioned by the numerous transfers and lack of sufficient remuneration for same. Fifty-four respondents reported an average increase of $573 between their old mortgage payments and their new mortgage payments. Thirty-seven respondents assigned a dollar value to their total losses as a result of administrative advancement. These losses were non-reimbursable out-of-the-pocket expenses which averaged $6,450. Twenty-two respondents cited an additional tax liability averaging $3,860 which occurred when Government reimbursement for closing costs and moving expenses exceeded the amount allowed by Federal regulations. Ninety-one respondents reported an average separation from their families of 5.3 months during their last move.

Proposed remedies offered by respondents generally concerned two major areas—transfer and relocation expenses, and adequate salary.

Of the 104 respondents who identified career motivation factors 99 (95 percent) mentioned responsibility, while 80 (77 percent) mentioned salary. Where responsibility and salary were mentioned together 63 (83 percent) ranked responsibility as more important than salary, while 13 (17 percent) reversed the order. Five (5 percent) mentioned salary or salary-related items, such as retirement, as the only thing of personal importance. Sixteen (15 percent) mentioned responsibility or responsibility-related items as solely important.

Perhaps the most important question in the survey addressed the impact on the FBI if no financial relief is forthcoming in the future. Of the 105 respondents, (42 percent) indicated they planned to retire as soon as they are eligible, six said they planned to quit immediately if given a better offer, 43 did not mention early retirement but did express concern over the pay "cap," and only 12 voiced a firm commitment to the Bureau regardless of financial losses.●

FAMILY PLANNING

HON. PAUL N. McCLOSKEY, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mr. McCLOSKEY. Mr. Speaker, Family Planning Services—title X of the Public Health Service Act—will soon be considered for renewal. I recommend to my colleagues the following Issues in Brief from the Alan Guttmacher Institute, which outlines the achievements of the family planning program.

[From the Issues in Brief, April 1981]

TITLE X: A DECADE OF ACCOMPLISHMENT

When the Family Planning Services and Population Research Act (Title X, Public Health Service Act) expires in September 1981, it will have completed its first decade of service. In the coming months, Congress will be considering the renewal of Title X which is the backbone of the national family planning program and the mainstay of the nation's efforts to avert unwanted pregnancies and minimize the need for abortion. No less importantly, in recent years Title X provided more than half of federal funding—and about 60 percent of worldwide expenditures—for reproductive biology, contraceptive development and assessment of the safety of contraceptive methods currently in use.

BACKGROUND

The federal government's involvement in family planning dates back to the mid-1960s, and rests on three fundamental premises: that all persons should be able to freely determine the number and spacing of their children; that the timing and spacing of births is directly related to the health of mothers and children; and that the availability of family planning services to low-income persons can be instrumental in preventing or alleviating poverty and dependency.

WHAT IS TITLE X?

Title X comprises two separate but closely related programs:

Project grants for the provision of voluntary family planning services (including natural family planning and infertility services) to all who need and want them, including sexually active adolescents, with priority given to low-income persons. The legislation's goal has always been the prevention of unwanted pregnancy. It has always contained an absolute prohibition on the use of funds for abortion. The service program is buttressed by a training program for clinic personnel, community-based education activities and strict evaluation requirements to ensure the accountability of the program. The fiscal year 1981 appropriation for this component of title X was $166 million.

A research program in human reproduction, the development and evaluation of contraceptive technology and population

dynamics, conducted under the aegis of the Center for Population Research of the National Institute for Child Health and Human Development. In 1981, $79.9 million was appropriated for this purpose.

WHY IS TITLE X CRUCIAL TO THE FAMILY PLANNING PROGRAM?

In addition to Title X, Titles V (Maternal and Child Health), XIX (Medicaid) and XX (Social Services) of the Social Security Act also contribute to the support of the national family planning program. The inclusion of family planning in these programs demonstrates congressional commitment to the principle that services be provided in all appropriate settings and programs. Nevertheless, because each is a state-administered program, the emphasis given to family planning varies greatly from state to state. Moreover, since each of the programs has a specific purpose other than family planning, contraception does not generally receive high priority.

There are many reasons Title X is critical to the availability of family planning services nationwide:

It provides more than half of all federal funds for family planning.

The growth rate of the entire family planning program hinges on appropriations levels for Title X.

Title X is the only program through which Congress can affect the extent to which family planning services are provided.

Eighty percent of family planning services provided to teenagers in specialized clinics are provided in Title X-supported clinics, making Title X the nation's major vehicle for the prevention of unintended adolescent pregnancies.

Title X services are not limited to persons on welfare or to the poorest of the poor. Thus, they can help the near-poor and many teenagers avoid falling into poverty as a result of unwanted births.

WHO RECEIVES SERVICES?

Four and a half million women received family planning services through the federally supported family planning clinic network in 1978. The typical client is young, has a low or marginal income and has no children. One-third are in their teens; 69 percent are white; and seven in 10 have incomes below 150 percent of the official poverty level.

Title X-funded programs have always served teenagers, most of whom initiate sexual activity almost a year before seeking contraception. While the parents of most young teenagers know that their daughters are attending a clinic, services are not generally contingent on parental consent or notification. However, most facilities make every effort to encourage teenagers to get the support of their parents.

WHO PROVIDES SERVICES?

A network of 3,200 agencies operate clinics at over 5,000 service sites in virtually every U.S. county. In 1978, health departments served 41 percent of patients in organized programs; Planned Parenthood affiliates served 27 percent; hospitals 13 percent; and a variety of other agencies, such as HMOs, neighborhood health centers and free clinics, 19 percent.

DHHS generally makes grant awards to state health departments or statewide, regional or metropolitan area "umbrella" agencies (e.g., nongovernmental family planning "councils") which, in turn, subcontract with local agencies. Every organization competing for Title X funds must present a plan for the use of funds that is subject to extensive review, beginning at the community level.

WHAT SERVICES ARE PROVIDED?

The principal function of the family planning program has been to introduce effective contraception to many low-income women and teenagers. Prior to clinic enrollment about half of new patients used no contraception or one of the least effective methods. After enrollment, 75 percent chose one of the most effective methods.

Most women who receive contraceptive services are also provided a range of other preventive care: pelvic and breast examinations, cancer screening, venereal disease testing, etc. For many women, family planning clinics serve as the entry-point into the health care system.

SOME ACCOMPLISHMENTS OF THE FAMILY PLANNING PROGRAM

Almost 800,000 unintended pregnancies a year—almost 420,000 of them among teenagers—are averted as a direct result of the federally funded family planning program. If these unplanned pregnancies had occurred, there would be an estimated 275,000 additional births and 420,000 more abortions each year (the remaining pregnancies would end in miscarriages). During the 1970s, 2.3 million unintended births were averted due to the federally supported family planning programs.

There has been a marked increase in the use of effective contraceptive methods among low-income persons, eliminating previous differences in method use between the poor and the more affluent.

Each dollar invested in family planning by the government in year one yields a saving of $2.00 in health and welfare costs associated with unwanted births the following year. The cost/benefit ratio is even greater among teenagers—a $2.90 saving for every dollar spent—because teenage pregnancies and births are more likely to be problematic medically and teenage parents are more likely to need welfare or other public benefits than their adult counterparts.

Two Title X-supported researchers won the Nobel Prize for their work on the brain hormone (LHRH) that could supplant today's birth control pills for women and provide the first such pill for men.

WHAT REMAINS TO BE DONE?

In 1978, 5.8 million of the 13 million poor women and sexually active teenagers in need of subsidized family planning services did not receive care.

Almost 1.5 million abortions were performed in 1979, reflecting the high incidence of unwanted pregnancy.

In 1976, nine percent of births to married women were reported as unwanted, even after the birth of the child.

One out of every six births—544,000 in 1978—occurs out-of-wedlock; most of these births are unintended.

There is an urgent need to develop new and improved contraceptive methods and to follow up already well developed leads.●

CONGRESSIONAL VIGIL ON SOVIET JEWRY

HON. SIDNEY R. YATES

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mr. YATES. Mr. Speaker, the absolutely deplorable record of the Soviet Union as a gross and consistent violator of basic human rights is well established. But free people cannot accept that situation, and we must not ignore the men and women who we know are suffering the cruelty and deprivation of the Soviet system.

Today I want to remind the House that in 1978 Vladimir Slepak, a Moscow radio and television engineer, was arrested and given a 5-year sentence by a Soviet court. The Soviets did this because Vladimir and his wife, Maria, had spoken out and demanded the right to emigrate and join their sons in Israel. Vladimir Slepak first sought permission to emigrate in 1970 and as a result, he and his family have been the target of systematic harassment by the Soviets for a number of years. Vladimir has been fired from numerous jobs, he has been searched, beaten, and over the years, he has been arrested and jailed some 25 times for periods of 10 to 15 days but Vladimir and Maria continued the fight. In 1976, Vladimir became one of the first Moscow Helsinki monitors and he has not given up. The remarkable courage and dedication of the entire Slepak family is an example for all of us and I look forward to the day when they are together in Israel.●

VICE PRESIDENT BUSH'S NAVAL ACADEMY COMMENCEMENT REMARKS

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mr. MICHEL. Mr. Speaker, on May 7, 1981, Vice President GEORGE BUSH delivered the commencement address at the graduation exercise of the U.S. Naval Academy in Annapolis, Md. At this point I insert into the RECORD the Vice President's inspiring address:

EXCERPTS FROM REMARKS OF VICE PRESIDENT BUSH

Today I'd like to talk to you about what you, as graduates of the United States Naval Academy, can expect to face as future leaders of our country.

If there's a single word to sum up what the meaning of your four years here at Annapolis have been directed toward, that word is "leadership". With that in mind, it's significant to note that you and your fellow graduates from the other Service Academies will be witness in your first few years of duty to the departure from the military scene of the remaining veterans of World War Two.

Indeed, most of those World War Two veterans have already left active service, and the frame of reference at the highest levels of leadership within our armed forces is more and more that of the American involvement in Korea and Vietnam.

The significance of this changing of the guard lies in the fact that World War Two was the last war in which we as a nation were disposed to fight with all the material

and moral force we could bring to bear. The experience of that war—shared by many of us—helps to better understand what it is we're trying to deter—and indeed, what the word "deterrence" itself means.

Since that time, of course, the world of the American military professional has become more complex. Korea and Vietnam were in large part limited in their scope and intensity by the new realities of modern weaponry. Add to this the fact that the fossil energy we once drew on without limit is now recognized as a finite resource, and you can see that our military options have become increasingly difficult and dangerous in the past four decades.

There are other complications as well, factors that have a significant impact on our national defense decisions and priorities.

When I was flying during World War Two, if we missed a wire and crashed into a barrier, our superiors just ordered up another airplane. I might also add, this wasn't approved practice, but it did occasionally happen.

Today, some of our airplanes cost $25 million each. Small wonder that we put more into pilot training nowadays than ever before. And small wonder that we now talk in terms of tens of airplanes, while during World War Two we were producing thousands.

But if the scope and numbers of modern weaponry and defense have changed in the past 40 years, I regret to say that the old problems that have made the use of weapons necessary throughout history aren't any different than they used to be. There are still nations that rely on aggression as a means of expanding their influence, and there are still injustices forced by one nation on another, despite all rules of international law.

In meeting the threat of such aggression, the United States Navy remains today, as throughout our country's history, an irreplaceable force in demonstrating America's determination to defend its vital interests—and that fact is well understood by the President, the Secretary of State and the Secretary of Defense.

Let me assure you, however, that our Administration is determined to reverse that trend, so that the United States Navy takes its proper place as second to none on the face of the earth.

Our Navy has the high quality of leadership necessary to carry out its mission in the 1980's—from the Chief of Naval Operations, Admiral T. B. Hayward, to the men and women in this audience who are now entering active duty. And though, as I say, there has been tremendous change in terms of the difficulties and dangers involved in that mission, the stakes are the same—nothing less than the security of our nation.

That's why, in this decade of the 1980's, our nation's service academies and armed forces deserve the support of every American who prizes freedom. Too often in the past the vital role played by the men and women who make up our armed forces has gone unappreciated in peacetime. But if we value freedom and peace, we must also value those who wear the uniform of our country.

One thing I could never stomach were the vicious attacks on our military during the late 1960's and early 1970's. Thank God we seem to have put behind us those far too frequent attacks on our military.

And in this regard, let me assure you that America's Service Academies and our armed forces have no more ardent supporter than the President who now sits in the White House, your Commander in Chief.

You are graduating at a critical time in terms of the direction of the U.S. Navy. Our President has made a determination, long overdue in my opinion, to strengthen the U.S. Navy—to reverse the unfavorable trends that have been setting in vis-a-vis the Soviet Union.

We intend to move forward towards the concept of a viable three-ocean Navy—to continue to improve our submarine capability—to keep Naval aviation, and that surely includes the Marine Corps, in the forefront—and to see that our surface Navy, once without peer, is fast, strong and flexible enough to protect our interests around the globe.

Your country and freedom-loving men and women everywhere need you to maintain, operate and lead America's naval arm in these difficult, dangerous times.

To the Class of 1981, let me add that while the burden you take up is great, you can be sure not only of the support but the active help of your countrymen in carrying out your mission. The security of our country and the guarding of its freedom will to a major extent rest on your shoulders, but there will be others, from every walk of American life, sharing the responsibility of leadership in the years ahead.

I say this because I believe—indeed, I know—there is a renewed faith and enthusiasm in America today, a new optimism in our country's future and our ability to meet the challenges of that future, much as previous generations of Americans met the challenges of their times.

Call it the rediscovery of America by the American people, the recognition once again not only of what we have been and are, but of what we have within our ability to become. Yes, we face great challenges over the next decade in the economic as well as the military field. But for all our problems, as President Reagan said in his recent address at Notre Dame:

"When it is written, the history of our time won't dwell long on the hardships of the recent past. But history will ask, and our answer will determine the fate of freedom for a thousand years, 'Did a nation born of hope lose hope? Did a people forged by courage find courage wanting? Did a generation steeled by hard war and a harsh peace forsake honor at the moment of a great climactic struggle for the human spirit?'"

The President asked those questions, but I know that he has confidence in what the answer will be. And as I see and feel the spirit of the Class of '81 and of the tradition of this great Academy, I share that confidence. So long as there is an Annapolis, there will be an America. And so long as the spirit of Annapolis lives, the spirit of American freedom has nothing to fear.

Thank you, and may your future be blessed with fair winds and clear skies.●

DIMENSIONS OF TERRORISM

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mr. LAGOMARSINO. Mr. Speaker, this administration has declared opposition to terrorism in the world as a major element of our foreign policy.

Even though we constantly remind our colleagues of the insidious connections between the Soviet Union and the international terrorist movement, many simply refuse to accept that connection.

I would like to bring to the attention of all of my colleagues the following commentary which, once again, describes the pervasive Soviet influence in terrorist activities around the world. I hope that it might give a better insight into some of the problems we face in improving relations with the Soviet Union:

DIMENSIONS OF TERRORISM

(By William Randolph Hearst Jr.)

NEW YORK.—The fuses of international terrorism were ignited last week to explode in seething Northern Ireland and escalate tension half-a-world away in the Middle East. As usual, they are calculated to coerce the West and benefit the Soviet Union which refers to them as "liberation movements," including the one in our own Caribbean backyard of El Salvador.

This time the Soviets and their power-hungry surrogates miscalculated. At a foreign ministers' conference of NATO allies in Rome, the Western alliance toughened its attitude—after we agreed to balanced arms talks at the end of the year with the Russians—and flatly questioned the validity of that fuzzy word, "detente," with the U.S.S.R. Immediately following the Rome meetings, our State Department announced the expulsion of Libya, a haven of world terrorism, from its embassy in Washington, as further recognition of our awareness of their part in most terrorist plots.

In other words, the alliance moved much closer toward the views held by President Reagan and his secretary of state, Alexander Haig, whom many Europeans know and trust from his stint as Supreme Commander of NATO. The U.S. President and Secretary Haig have delared bluntly that the Soviets had better behave in the immediate future or we just won't bother negotiating with them. Our allies agreed with our views and did so in direct language that cannot be misinterpreted.

Secretary Haig has been outspoken in his condemnation of the U.S.S.R. for assembling terrorist units from about 60 nations. The Russians have worked with and helped terrorist-minded regimes to plan operations from sanctuaries in Libya, PLO camps in Lebanon, Syria, and even provided "graduate" training in the Soviet Union. They use loyal satellites like Bulgaria, East Germany and Czechoslovakia to harbor terrorist cadres for dispersal in Europe.

Their chief surrogates abroad are represented by Fidel Castro and his legions in Africa and the Middle East and are presently preparing terrorist trainees for the Caribbean and elsewhere in Latin America. Our own Commonwealth of Puerto Rico has begun to feel the first depredations of "FALN" terrorists, transported to Cuba by the Russians where they are trained by Castro's secret service under the active supervision of Russia's KGB.

The Soviet-run interlocking directorate of terrorism has existed since early 1970, according to knowledgeable informants on this deadly issue who often have been ignored or criticized for seeing Reds under beds. Like Secretary Haig, these people are academicians and historians, serious observers of the international scene. One of them is Mrs. Claire Sterling, whose book, "The

Terror Network," was recently published by Reader's Digest Press-Holt, Rinehart and Winston. Her credentials as a foreign journalist the last 30 years are impeccable and her political views I would describe as sturdily anti-Communist, but soundly liberal.

Over several years of research in many countries, Mrs. Sterling accumulated vast amounts of data, including interviews, reports and remembrances of disaffected terrorists. It's a hair-raising book, which many higher-ups in our government have poured over, and I wholeheartedly recommend it to you.

Mrs. Sterling also deals at some length with the combustible issues of Northern Ireland, officially called Ulster. Unappreciated by outsiders, and even many emotional Irishmen in the Republic of Ireland, is how the IRA is trying to reunify the country on an ideological basis geared to militant socialism. The gun-toting faction, known as the "provisional wing" of the IRA (Provos for short), works hand-on-bomb with the international terrorist network and has trainees with the PLO.

Mrs. Sterling writes that the Provos wage war to "demolish the colonial regime (i.e. Great Britain) in the north and the Quisling government" of the Republic of Ireland. This branch of the IRA aims to set up a socialist state with a brogue. All top Provos have been thoroughly indoctrinated with Marxist views.

Take, for example, someone well-known like Bernadette Devlin McAliskey, once a MP in London who was lionized during a visit here several years ago. Her major difference with the Provos is that they won't let her be No. 1. Devlin, as she's usually known, broke away to form her own party which is an out-and-out Trotskyite apparatus demanding immediate revolution in the north and in the Republic of Ireland.

Few Irish on the inside—north or south—and virtually none on the outside are even remotely aware of the Provos' ultra-socialist aims for a United Ireland. They are overwhelmingly God-fearing folk who for centuries nursed bitterness against the English who treated their kinfolk as second-class people. after the partition in 1921, which left six counties under British rule in Northern Ireland, fresh troubles simmered and blew up between Catholics and Protestants.

To keep both sides apart because the Protestants outnumber Catholics 2-to-1 in a population of 1.5 million, Britain sent in troops in 1969. They were first welcomed by the Catholics until the IRA Provos insinuated urban guerrillas. Attacks and disorders spread from the main city, Belfast, throughout the province. There are children today who have never known anything but violence and death as they grew up. Some have been known to play soccer by kicking unexploded grenades around.

Into this maelstrom appeared a rabble-rousing Protestant minister, Ian Paisley, who had acquired some fundamentalist theological education from one of our colleges in the South. Paisley was elected an MP by his constituency and has encouraged Protestant private armies to rally and fight off IRA assaults.

The signal for the latest storm now besetting Northern Ireland has been the death by hunger strike of Bobby Sands in a prison hospital. He was only 27 and already an inveterate IRA fighter. To some, Sands is a hero and a martyr; to others, a terrorist and a criminal

While keeping our fingers crossed about events in Northern Ireland, the U.S. is moving on a large-scale diplomatic front in the Middle East. We've asked Israel to hold off action while urging Syria to pull back its 22,000 troops and Soviet-furnished SAM-6 surface-to-air missiles. The Syrian units were sent in originally by key Arab nations as "peace-keeping" troops in Lebanon.

The Syrians expanded terms of their own mission by unilaterally driving into a strategic valley from which artillery fire can be rained on nearby Israeli settlements and their Chrisian Arab allies. The hasty introduction of SAM-6s to Syria was a deliberate act of the Soviet Union. These were accompanied by a complement of technicians and instructors. The Russians have now withdrawn their advisers but Syria defiantly insists it means to play hardball. The Syrian regime is a complete Russian Client.

What I've written this week paints a gloomy picture of the Soviet-run international terror network. It should make us think hard and realistically about the limits of accommodation with an adversary bent on doing us in. More on this subject whenever.●

MARIO ANDRETTI

HON. DON RITTER

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mr. RITTER. Mr. Speaker, I rise today to bring to my colleagues attention the growing reputation of my home area, Pennsylvania's Lehigh Valley, as the home of champions in the sports world.

In 1978, the valley's own Easton Assassin, Larry Holmes, defeated Ken Norton to clinch the World Boxing Council's heavyweight crown. He continues as world heavyweight champion today.

Two years after that, in 1980, a whole team of Lehigh Valley superstars, the Pennsylvania Stoners, captured the American Soccer League title.

And now, Mr. Speaker, within the last few days, Lehigh Valley residents have once again seen one of their own capture the 1981 Indianapolis 500 auto racing championship, one of the sporting world's most coveted prizes. He is Mario Andretti of Nazareth, Pa. His triumph has swelled the collective chests of the valley residents to new dimensions.

Andretti's racing career includes many significant victories. He was auto racing's rookie of the year in 1965, he first won the Indy 500 in 1969, and his 1978 six Grand Prix victories on the Formula One circuit rightfully earned him the World Driving Champion title that year.

Mr. Speaker, let no one mistakenly construe Mario's Indy victory as a gift horse. He began the race in the 32d spot in a field of 33. To have gone on to win the title against those odds is truly a magnificent achievement.

Mr. Speaker, Harvard University President James Bryant Conant once noted that "* * * each honest calling, each walk of life, has its own elite, its own aristocracy based on excellence of performance." No statement better exemplifies Mario Andretti's standing in the world of auto racing. He is truly a member of auto racing's aristocracy.

And we in the Lehigh Valley, home of the champions, are full of pride and exhuberance over his latest triumph. As the Allentown Morning Call so aptly put it in a May 26 editorial "Mario, we are proud of you—as we have been over so many years!"●

FULL-TIME RADIO COMING TO RURAL AMERICA

HON. PAUL FINDLEY

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mr. FINDLEY. Mr. Speaker, today I am introducing legislation taking note of the Federal Communications Commission's forward-looking 9 kilohertz plan and directing the Commission, in implementing it, to insure that each community in the United States, regardless of size, is provided with the maximum local full-time radio broadcasting service. In the last Congress, similar legislation—H.R. 13015—gained the cosponsorship of over one-quarter of the Members of the House of Representatives.

The reason that this legislation is so vital is that currently almost one-fifth of the American people do not have local nighttime radio service. Instead, from sunset to sunrise, if they are able to listen to radio at all, they must tune in to a station hundreds of miles away. If local weather conditions make certain roads impassable, if there is danger from flooding or a tornado, if schools are closed or community activities canceled or rescheduled, almost 50 million Americans have no way to find out about it until the Sun comes up the next morning and their local radio station resumes broadcasting.

Now the Federal Communications Commission is about to take an action that will have a greater impact upon daytime broadcasters and the communities they serve than anything it has done in its 50 years of existence. In July the FCC will decide whether to reaffirm or abandon its policy to shift radio channel spacing for 10 to 9 kilohertz. If the FCC reaffirms its policy, daytime broadcasters may have a chance to expand their service to full time. If the Commission abandons its policy, the fight to break down the clear channels will resume.

Right now there are powerful forces working against the millions of Americans served by the daytime broadcasters. The National Association of Broadcasters is opposed to the 9 kilohertz plan and trying to defeat it.

Using scare tactics, the NAB has told daytimers that it will cost them thousands of dollars to retune to 9 kilohertz, when in fact it will cost a daytimer with a nondirectional antenna as little as $135 for a new crystal and 1 hour of engineering time. Tuning a directional antenna will cost more, but not nearly as much as the NAB suggests.

Another unfounded charge is that shifting to 9 kilohertz will reduce the quality of radio broadcasting. Again, the NAB should know better. According to the Department of Commerce's Institute for Telecommunications Science, any additional interference, if it occurs at all, will be imperceptible. The FCC's own studies confirm that interference will be minimal.

The real issue troubling the NAB is worry over the economics of the broadcasting industry, and even here they have misjudged the issues. Again using scare tactics, the NAB states that "the average AM radio station would experience revenue losses in the order of 20 percent should we shift to 9 kHz channel spacing." But this thinly veiled attempt to protect entrenched economic interests simply misses the point. The daytime radio stations are already on the air competing for the advertising dollar. The only change that will be made by shifting to 9 kHz is that many will be able to remain on the air after sunset. And to the extent that they are located in communities where there is no local full-time station, they will actually be strengthening the broadcasting industry by attracting new advertising revenues.

Not only is the NAB's analysis wrong, but they try to scare daytime broadcasters into believing that "those stations with more marginal facilities—daytimers—would suffer the greatest relative losses." Let me tell you, I have heard from literally scores of daytime broadcasters and they are not afraid of the free competitive marketplace.

The president of WCIR of Beckley, W. Va., wrote me that his station "is at a definite disadvantage in the competitive marketplace" because of the current FCC policy which forces them to leave the air each evening about suppertime.

The vice president of WPCO in Mt. Vernon, Ind., wrote, "Since our station must go off the air at sundown, the regular listening audience then must tune to another station for evening listening. Each time a person changes the dial, there is greater likelihood they they will not set the dial back to our station."

The general manager of WMAX in Grand Rapids, Mich., told me that the "sunset signoff also has a very adverse effect on our competitive position in the Grand Rapids radio market * * * that is unfair and increasingly impossible to overcome."

And the president of Crawford Broadcasting Co. wrote, "We believe that the new communications act proposal begets new operating horizons for radio in a way which will produce far more efficient and competitive service to the public."

Mr. Speaker, there are millions of Americans who are depending upon the FCC to carry through with its commitment to narrow channel spacing from 10 to 9 kilohertz and to provide them with local nighttime radio service. The rest of the world—Europe and Asia—shifted to 9 kilohertz years ago with no problems at all. Therefore, no one can argue convincingly that the Western Hemisphere will encounter problems if it follows suit.

This issue has literally been studied to death. No doubt that has been the intent of opponents of increased local full-time radio broadcasting. Yet every study I have seen convinces me that it is time to make the change to 9 kHz so that the millions of Americans living in small towns and rural areas can for the first time have full-time local radio service.

Text of bill follows:

H.R. 3750

A bill to insure that each community in the United States, regardless of size, is provided with the maximum local full-time radio broadcasting service

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 307(b) of the Communications Act of 1934 is amended by adding at the end thereof the following: "In any proceeding to assign channels within the amplitude modulation (AM) radio broadcasting band the Federal Communications Commission shall, pursuant to adoption of a nine kilohertz channel spacing plan, ensure that each community in the United States, regardless of size, is provided with the maximum local full-time radio broadcasting service."●

HONORING JOHN AND ROSE TABA

HON. TOM LANTOS

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mr. LANTOS. Mr. Speaker, for generations, millions of penniless immigrants who were rich in integrity, intelligence, and dedication have built and developed this great Nation. Two such outstanding individuals from my native Hungary are John F. and Rose Taba. They hail from a small village on the Danube, Dunapataly. From childhood on, they have exemplified the hard work, the decency, the self-reliance, the creativity of the Magyar spirit.

In 1956, after the failure of the heroic Hungarian uprising against Soviet Russia, they came to the United States and seized the wide-open opportunities of raising a family, building a business and contributing to their community. Working together as a family, they succeeded in fulfilling the American dream in one short generation. They exemplify the finest tradition of Hungarian Americans with their deep commitment to the ideals of this country and the heritage of their homeland.

I am proud to join their thousands of friends—Hungarians, Hungarian Americans, and Americans—whose lives they have enriched in many wondrous ways with music, good food, and warm fellowship that knows no boundaries and no language.●

INTERNATIONAL CONFERENCE ON FAMILY PLANNING

HON. PAUL N. McCLOSKEY, JR.

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mr. McCLOSKEY. Mr. Speaker, the International Conference on Family Planning in the 1980's, the first of its kind in 15 years, was held in Jakarta, Indonesia, between April 27 and May 1, 1981. The conference was attended by family planning experts representing 90 nations, as well as by delegates from the various donors of foreign assistance, foundations that make family planning grants available, and private voluntary organizations.

The conferees heard President Suharto of Indonesia call family planning "a key to the survival of the world in the future," noting that while a large population constitutes a great potential for development, a large population alone does not guarantee the success of development. He observed that, without the ability and the possibility of heightening prosperity, a big population becomes a burden to society and may cause disaster for successive generations.

President Suharto pointed out that family planning affects various aspects of life ranging from education and culture to the position and role of women in a society. He emphasized that the implementation of family planning programs is a global rather than a national task and that nations must learn from each other through an exchange of experiences.

The conference, sponsored jointly by the United Nations Fund for Population Activities, the International Planned Parenthood Federation and the Population Council, issued the following statement at the conclusion of the conference:

JAKARTA STATEMENT

During the last ten years a widespread popular demand for family planning information and services has been documented and many family planning programs have

been successfully implemented. One hundred and eighteen governments now support the provision of family planning information and services. However, on the average less than 50 cents per capita per year is currently spent on family planning and population programs in developing countries, and the demand for services far outstrips available funds.

Family planning is an essential component of any broad-based development strategy that seeks to improve the quality of life for both individuals and communities. The challenge of the 1980s is to secure the political commitment, financial and human resources to meet the family planning needs of 900 million couples of child-bearing age. The number of these couples in developing countries is projected to double by the year 2000. This challenge was dramatically stated by President Suharto in his opening address to the conference when he declared, "Successful implementation of family planning programs will be a key to the survival of the world in the future."

We believe that if the following steps are taken the lives of millions of mothers and children will be saved and the living conditions of individuals in a stabilized world population will be enhanced in the twenty first century. Eighty million people are added to the global population each year and this annual growth is likely to reach 100 million by the end of the century. We believe that most serious changes may take place in the world environment and the fabric of society if our recommendations are not heeded.

The actions outlined below are of profound practical and moral importance for all mankind and deserve support by political leaders, religious groups, health professionals, development planners and all levels of society throughout the world:

1. Family planning is a basic human right. Governments should be encouraged to translate this right into realistic policies and programs which meet the needs of their people.

2. A wide range of fertility regulating methods should be made available to men and women, with information on their advantages and disadvantages. These should include reversible methods, and, where legally accepted, voluntary male and female sterilization. Since most currently available contraceptive methods fall short of providing complete protection against unwanted pregnancy, access to safe, modern abortion techniques should also be offered wherever laws permit.

Where abortion is not legal, adequate medical care and contraceptive services should be available to those suffering from the consequences of badly performed abortions.

3. Family planning services are most effective when they are initiated, managed, evaluated and controlled by people of the community and when they are sensitive to the values, needs and problems of people. Mobilizing community resources and generating local leadership will increase program orientation towards people and self-reliance, therefore community participation in the planning and provision of family planning services must be ensured.

4. Family planning is an essential and integral part of economic and social development. Depending on local conditions, family planning can be linked with health, education, rural development, women and youth programs. It may also be the lead component of a primary health care program. Population education must be integrated into formal and non-formal educational systems to prepare future generations.

5. The non-governmental sector should be fully used to stimulate and complement government family planning programs.

6. Women and men should be equal partners in social development. Programs to encourage greater participation of women in community and national life will not only benefit women but also encourage smaller families. Family planning programs should set an example by emphasizing program and policy responsibilities for women. The responsibilities of fatherhood should be emphasized for men.

7. Adequate supplies of contraceptives must be assured for all people. Because of rapidly expanding needs in the 1980s, planning and action to ensure continued availability of these commodities is necessary and appropriate centers of manufacture should be established in the developing world.

8. Improved means of fertility regulation are urgently needed. The safety, acceptability and effectiveness of methods must be enhanced. Support for research to improve existing methods and to develop and test new technologies must be substantially increased.

9. There is an urgent need to increase current expenditure in developing countries from an estimated $1 billion dollars to approximately $3 billion annually in order to meet population and family planning program needs. Countries providing development assistance should increase their support of population programs from the current 2 percent of development assistance outlays to at least 5 percent. At the same time, the developing countries should substantially increase the proportion of their public expenditures which are allocated for family planning programs.●

EXTENSION OF TARGETED JOBS TAX CREDIT PROGRAM VITAL

HON. DON BAILEY

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mr. BAILEY of Pennsylvania. Mr. Speaker, today I am introducing a bill to extend the targeted jobs tax credit (TJTC) program to December 31, 1984, tighten the present certification process of the program, and include all Vietnam-era veterans under the program.

The TJTC program was enacted in November 1978 as part of the Revenue Act of 1978 (Public Law 95-600). The program, as it exists, expands job opportunities for those most in need by giving a tax credit to employers who create jobs or target existing jobs to the following individuals:

Handicapped persons referred from vocational rehabilitation agencies;

Economically disadvantaged youths between the ages of 18 and 24;

General assistance recipients;

Supplemental security income recipients;

Economically disadvantaged Vietnam-era veterans;

Students between the ages of 16 to 19 participating in cooperative education programs; and

Economically disadvantaged convicts hired within 5 years of release from prison or date of conviction, whichever is later.

The TJTC serves the country well by targeting jobs to these individuals by avoiding expensive bureaucratic programing. Oversight is maintained through the certification process but the jobs are targeted and provided directly by the provisions of the act, existing agencies and the private employer. Moreover, the use of private sector jobs for employment opportunity and training provides a real world experience to the recipient and greater chance of full-time employment than more structured Government programs offer.

In 1979, 109,000 jobs were certified under the TJTC program. They came from all over the country and covered all targeted individuals. About half of the certified jobs were in the cooperative education program area with about half of the students involved being economically disadvantaged. In a recent survey, 97 percent of the teachers polled stated that they saw increased job opportunities for young people and disadvantaged youths because of the TJTC program.

I have heard from a number of employers in my district, confirming that they have hired more individuals and particularly hired more of those from the targeted groups due to the TJTC program. The tax credit certainly benefits the employers directly, and is the most direct and effective way to create jobs for the most needy with the best long-term employment results in the private sector.

The bill I am introducing today will extend the targeted jobs tax credit until December 31, 1984, and tighten up the certification process. To be certified under the program, application for certification will have to be applied for within 90 days of the hiring date. This will insure that jobs certified were created or targeted under the program and not just applied for after the fact at a later date. Additionally, it will include all Vietnam era veterans in the program rather than just the economically disadvantaged veterans.

I urge the support of my colleagues for this bill which I believe provides an effective and needed jobs opportunity program at a time when our economy needs just such a boost.●

YOUTH EMPLOYMENT DEMONSTRATION ACT AMENDMENTS

HON. CARDISS COLLINS

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mrs. COLLINS of Illinois. Mr. Speaker, today the House votes on final passage of H.R. 3337, the Youth Employment Demonstration Act amendments. I rise in support of H.R. 3337 and hope that my colleagues will join me in voting favorably for this legislation.

As my colleagues are aware, teenagers represent 10 percent of the civilian labor force and close to 24 percent are unemployed. The teenage jobless rate in some inner cities is anywhere from 39 to 50 percent. In the city of Chicago, the teenage unemployment rate is around 30 percent. Certainly, we are in critical need of legislation which would extend the authorization for youth employment and demonstration programs. Passage of H.R. 3337 is needed because the authorization of appropriations for youth programs under part A of title IV of CETA expired last September. The programs are currently being funded under the continuing resolution for 1981.

I share the Committee on Education and Labor's view that by providing Federal funds for training unemployed youth is an investment in human capital which will have an anti-inflationary result by raising the skill level of the labor force and improve productivity.

The link between education and employment opportunities have been firmly established. Also education problems seem to be concentrated among particular groups of youth, minority, and low income. Further, it is generally accepted that without basic literacy skills, youth are unable to take advantage of further education or training. Subsequently, many are consigned to the bottom of the economic social ladder.

We cannot sit idly by and let our youth slip away with no training or jobs. Accordingly, I look to my colleagues to pass this legislation.●

TRIBUTE TO L. T. "LOU" BARRINGER

HON. BILL ALEXANDER

OF ARKANSAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mr. ALEXANDER. Mr. Speaker, L. T. "Lou" Barringer, 80 years young, is stepping down as president of L. T. Barringer & Co. a subsidiary of Cannon Mills after 63 years in the cotton business. Lou Barringer has been in the forefront of the effort to keep cotton "king" in the Midsouth. Fortunately for the industry Lou Barringer's six decades of wisdom and experience will not be lost to the industry since he is staying on with Cannon Mills as a consultant.

I commend the following article which appeared in the Memphis Commercial Appeal on May 31, 1981, to my colleagues:

BARRINGER TO RETIRE AS COMPANY HEAD

(By Emmett Maum)

L. T. 'Lou' Barringer, 80, considered one of the most valuable men in helping to achieve cotton legislation, will step down Aug. 1 as president of L. T. Barringer & Co., cotton subsidiary of Cannon Mills Co.

Barringer, an agricultural confidant of President Harry Truman, will retire after 63 years in the cotton business.

But, Barringer said, "The next day, I will be back at my desk, doing what I've been doing for so many years."

No successor has been named, "and I have no idea who will become president," Barringer said. At the same time, Hugh J. Toumey, board chairman and chief executive officer of Cannon Mills, Inc., sales subsidiary of Cannon Mills Co., will retire.

Barringer is in his office from 9 a.m. to 6 p.m. week days and usually 9 a.m. to 1 p.m. Saturdays and Sundays. The only difference is that he will be serving as consultant rather than president, a position he has held at the company at 1195 Union since it was organized in 1930.

Otto G. Stoltz, board chairman and president of Cannon Mills Co., based in Kannapolis, N.C., said, "Lou Barringer has made a long and valuable contribution to Cannon and the cotton industry. We are very proud to have been associated with him."

While Truman was a U.S. senator from Missouri, he and Barringer met on one of Truman's visits to the Bootheel. Thereafter they often discussed agricultural matters, especially cotton. Barringer helped Truman learn a great deal about cotton and said that as senator and later as President, Truman was a big help in agricultural legislation, including cotton programs.

During the Truman administration, Barringer frequently visited the White House, often for meetings with the President concerning agriculture, but sometimes on efforts related to the then-developing space program and other Truman programs, he recalled.

"Once I visited Truman six straight days in the White House," he said.

Barringer spent so much time in Washington that he kept a room at all times at the Mayflower Hotel. Even today, he has a White House pass given him by Truman.

"In those days, synthetic fibers were just getting going, and we had to work to ward off their efforts to take over our cotton markets," he said.

Through the years in which he was a factor in agricultural and cotton legislation, Barringer worked behind the scenes. He never accepted an official position, but was close to numerous U.S. senators and representatives and high government officials.

Truman was "knowledgeable and fair about agriculture, including cotton," said Barringer. In fact, the former President worked on a farm his parents owned near Independence, Mo., as a youngster. "Truman was agriculture all the way," said Barringer.

In the 1940s, Barringer said, he was able to swing one of the biggest advance bookings of cotton in history. Anderson, Clayton & Co., which no longer is in the cotton business, was financing some California cotton producers' crops. A-C planned to buy the cotton as it was ginned. Barringer asked how many bales would be involved and was told 70,000 to 80,000 bales.

"I told them we would buy all of it," he said, "and it turned out to be a total of 78,000 bales. We paid the current market price each day when the farmers were ready to sell the cotton."

Barringer's presence in agricultural policy efforts has continued throughout his career. His collection of Washington memorabilia includes large signed photographs of Truman, key Truman aides with whom he worked and former President Lyndon B. Johnson, as well as invitations to gatherings like the "housewarming" former Vice President Nelson Rockefeller held for his new quarters in 1975.

During the Carter administration, when cotton exports were lagging, Barringer recalled, "The Export-Import bank head was resisting a $75-million loan to Japan for the purchase of cotton." Barringer said he and some Southern senators worked closely, and the senators finally persuaded former President Carter to push for the loan.

"If Japan hadn't received it and bought the cotton, prices for cotton probably would have dropped quite a bit, and our exports would have been down sharply. That didn't cost the taxpayers a penny, because Japan pays its obligations."

Barringer in 1918 started his cotton career with Cannon Mills as a "squidge," or clerk, in Concord, N.C. Later he moved to the firm's cotton department in Atlanta. Finally, in 1930, Charles A. Cannon, who was board chairman and president, decided the company was using so much cotton it should open its own cotton firm. So L. T. Barringer & Co. was founded here. Today, John W. Barringer, a son who is a Collierville farmer, serves as assistant to the president of the cotton company. The younger Barringer has been a prime mover in the group organizing the Mid-South Agricenter, Inc., for Memphis.

In 1976, Barringer was honored with a surprise dinner at the Mayflower. Many speakers lauded the Memphian, including Truman's daughter, Margaret Truman Daniel; Rep. Ed Jones (D-Tenn.), former Sen. James O. Eastland (D-Miss.), former Sen. William Fulbright (D-Ark.), and former Secretary of Agriculture Orville Freeman. He was praised for working in the thick of congressional battles over cotton legislation for more than 35 years.

Mrs. Daniel recalled that Barringer had campaigned for Truman in 1938, 1944 and 1948. "I don't have much to say except I love you," she said. "To this day, he is a close family friend."●

TRIBUTE TO HON. JUSTICE FREDERIC T. HENRY

HON. GARY A. LEE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mr. LEE. Mr. Speaker, colleagues, I sadly today bring to your attention the passing of one of my congressional district's and upstate New York's most respected jurists, the Honorable Jus-

tice Frederic T. Henry of Canandaigua, N.Y.

Judge Henry died Sunday at the age of 84, marking the loss to family, friends, and acquaintances of a good and honorable man. Those who served with him on New York State's highest court speak of his accomplishments as a friend as quickly as they address his accomplishments on the bench.

Frederic Henry grew up in Canandaigua, left to attend Cornell University Law School and serve in the U.S. Navy during the First World War, and then returned to his home and his lifelong neighbors to practice law in Canandaigua. In 1943 he began 7 years' service as Ontario County, N.Y. Surrogate Court judge. In 1950, he was elected to the New York State Supreme Court, and in 1959, in recognition of his respected service and his embodiment of the most admirable of characteristics of a jurist: fairness, compassion, and crystal-clear reasoning capacity, then-Gov. Nelson A. Rockefeller named Justice Henry to the State's highest court, the appellate court.

At the age of 77, in 1973, Judge Henry retired to return to the community of Canandaigua as a consultant to his son's practice of law and to exhibit a refreshed activity in the many community-betterment organizations to which so much of his life's free moments had been devoted: the Community Chest, the YMCA, the Canandaigua Hospital, and others.

The community will miss Judge Henry. I ask you to join with me today in observing the passing of this most honorable New York State jurist.●

IRISH EYES ON HUNGER

HON. JOSEPH M. McDADE

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mr. McDADE. Mr. Speaker, I would like to bring to my colleagues' attention an article which appeared in the New York Times on March 17, 1981, written by Father William J. Byron, president of the University of Scranton, Scranton, Pa. The article is entitled, "Irish Eyes on Hunger."

IRISH EYES ON HUNGER

(By William J. Byron)

SCRANTON, PA.—If there are Reagan roots in Tipperary, the Friendly Sons of St. Patrick surely will ferret them out for attention and celebration today. President Reagan's connection with the Irish predates his portrayal of The Gipper. "Dutch" was just a childhood nickname. His surname assigns him to the ranks of Irish-Americans whose forebears were the "boat people" of the 1840's.

The Irish came to these shores in a flight from famine. Yet concern for the hungry of the world is not high on any list of Irish excesses in contemporary America. This is strange, indeed, for what other immigrant group left so many famished behind and brought so many fevered with them only to die over here as an ultimate consequence of the potato failure over there?

Sunken eyes, pallid lips, protruding bones, bloated bellies were part of the scenery on an Emerald Isle blackened by blight in 1846. Millions of inhabitants of the modern world—Cambodia, say—have exhibited the same symptoms and experienced the same despair. Cambodia last year, Somalia this year, Ireland 135 years ago—the problem is hunger and what to do about it.

Wherever the Friendly Sons banquet tonight, there surely will be a potato on the plate. If it could speak, it would tell of hard times past; if it could point, it would direct all Irish eyes to the present problem of world hunger.

Somewhere on a White House shelf is a report, "Overcoming World Hunger: The Challenge Ahead." It is the March 1980 outcome of work begun two years earlier by a commission named by Jimmy Carter. His Presidency ended before he could attend to the recommendations. Chief among them is the suggestion that the United States "make the elimination of hunger the primary focus of its relationship with the developing countries, beginning with the decade of the 1980's."

With a Reagan in the White House, an O'Neill in the House Speaker's chair, and names such as Kennedy, Moynihan, Leahy, and Biden in Senate rollcalls, those hungry of the world who may also be afflicted with a sense of history might wonder when some political leadership will emerge here to activate an attack on hunger in less-fortunate lands.

Hundreds of thousands, possibly up to two million Irish men, women, and children died from starvation and disease related to the great potato famine. British lawmakers lined up at that time on the side of protectionism and laissez-faire. Government initiatives did establish public works to provide wages, paltry as they were, for potato-less farmers. But provision of food for starving Irishmen was left to private enterprise. It simply didn't work.

It would be a good idea to think forward and ask how history will evaluate today's Irish-American occupant of the Oval Office in terms of his response to world hunger. When the Friendly Sons invite their Senators and representatives, Irish or otherwise, to join them for dinner on St. Patrick's Day, more glasses than questions are raised, naturally. But out of the Irish-American experience comes a question that simply must be asked as this decade unfolds: Will America make elimination of hunger the primary focus of its relationship with the developing countries?

By the year 2100, political leadership here could conceivably extend to some Cambodian-Americans or Somali-Americans (Those possibilities are no less likely than was the expectation in the 1840's that the Irish would rise to the top of our executive and legislative branches.) Such groups could well have their own black-tie events on special days to celebrate their own heritage. The rice on their plates might stimulate musings on issues now beyond imagining. The question of what Irish and other Americans did in the 1980's for the world hungry is likely to occupy the thoughts of some. The answer to that question is being shaped in the Reagan White House and in the Congress of the O'Neills, Kennedys, Moynihans, Bidens, Leahys and their colleagues who are Irish at least one day a year.

Politicians on occasion recognize their own mortality. What a beautiful thing it would be if a line from the famous "Irish wish" could penetrate both Congress and the Oval Office and be understood in reference to the hungry of our world: "And when you come to die may the wail of the poor be the only sorrow you'll leave behind." This distance between cries of hunger and cries of sorrow at the passing of those who led the effort to eliminate hunger would be a remarkable measure of an extraordinary political career.●

REFLECTIONS OF A CHILD OF HOLOCAUST SURVIVORS

HON. SAM GEJDENSON

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mr. GEJDENSON. Mr. Speaker, several weeks ago, on April 30, Americans set aside a day to remember and mourn the 6 million lives which were lost in the holocaust of World War II. I had the privilege of joining my distinguished colleagues in the House as we paid tribute to those who were so senselessly murdered.

When we remember the holocaust, we must not only focus on the devastation of millions of men, women, and children, or on the loss of their descendants for all generations. We must also commemorate the survivors—those who faced incomprehensible atrocities and, through their very survival, reaffirm life and dignity in a world very often bereft of both. Nazism sought not only to exterminate all of the Jews in the world, but to erase even the memory of their existence. The Nazi crime, which came perilously close to completion, was thwarted by these individuals. Their lives are monuments to the vibrant Jewish culture of eastern Europe which no longer exists, and they are testimony to the spirit of a people who answer death by affirming life, by creating life.

When the State of Connecticut held a ceremony in remembrance of the holocaust, the main speaker was Menachem Z. Rosensaft, who, like myself, is a child of survivors. Mr. Rosensaft's parents survived the concentration camps at Auschwitz and Bergen-Belsen, and following their liberation he was born in the displaced persons' camp at Bergen-Belsen, on the cite of the concentration camp. With his background, and with his master's degree in European history, Mr. Rosensaft has spread the message and memory of the holocaust throughout this Nation by means of three books, numerous articles, a book of poetry, and several years of public speaking engagements. He is currently serving as a member of the steering committee that is planning a world gathering of holocaust survivors, where at least

3,000 survivors and their children are expected.

I would like to share with my colleague the remarks which Mr. Rosensaft made on April 27, when he delivered the keynote address at the holocaust commemoration in Hartford, Conn.

The address follows:

REFLECTIONS OF A CHILD OF HOLOCAUST SURVIVORS

And even if a million dying children did not destroy Creation
There will be another already forgotten universe
Over which God will have to cry those tears
That should have extinguished the fires of Auschwitz

"The Messiah," wrote Franz Kafka in one of his parables, "will only come when he will no longer be needed; he will only come on the day after his arrival; he will come, not on the last day, but on the very last."

During the winter and spring of 1945, when Allied troops at last entered the Nazi death camps, the stunned liberators discovered that they had come at the wrong time: too late to save, but too early to recite the final prayer. And, confronted with the emaciated survivors of civilization's nethermost inferno, they knew that they would never be able truly to comprehend what these living skeletons had undergone. The chasm between the survivors and the rest of the world was one which might, in time, be narrowed, but which could never be bridged.

In the course of the past thirty-six years, an entire generation, my generation, was born and has grown into maturity. For most of the members of this age group, Jews and non-Jews alike, the Holocaust is an historical abstraction. But not for us, the survivors' children. For us the cataclysm is more than real. While our very presence symbolizes our parents' ultimate victory over the enemies of the Jewish people, our collective consciousness is permeated with echoes of a world we never knew. Thus, we are the first generation and we are the last generation: the first to be born after the Holocaust, and the last to have a direct link with that Eastern European Jewish existence that was so brutally annihilated.

Other than in the limited sense that the designation is self-explanatory, it is difficult to define the children of Holocaust survivors as a separate entity in any comprehensive or accurate sense. We come from different backgrounds, covering virtually the entire European continent. We live in countries throughout the world, pursue a multitude of careers, and have diverse interests. Even our attitudes toward Judaism are vastly dissimilar. In brief, we are no more homogeneous than the survivors themselves. For the most part, all we have in common is our parents' experiences . . . but because of those experiences, we have everything in common.

Perhaps the best way to explain is with a story, or, rather, with two stories.

The first one: A child is born in a small Polish town in May of 1948. Its name is irrelevant, but it is definitely a Jewish town, with Jewish homes, Jewish schools, Jewish stores, synagogues and hassidic shtiblach, Jewish voices and Yiddish songs, an all-pervasive Jewish atmosphere. The family is a large one, as are most Jewish families in Eastern Europe, and the child is welcomed into the world by its parents, grandparents, brothers and sisters, uncles, aunts and cousins.

Soon, the child begins to receive a traditional Jewish education, both religious and cultural. He—or she—knows both Yiddish and Hebrew, in addition to Polish. At home, the atmosphere is one of profound Yiddishkeit, without any self-consciousness. His friends are all children like himself. And he knows that he will have all the options. He can become a scholar or a rabbi, a businessman or an industrialist, attend the famous Yeshiva in Lublin or study at a university in Warsaw or Cracow. He can become a Zionist or a socialist or both, a Jewish intellectual or a Polish professional. The choice is his. Of course, there are some restrictions. The centuries-old anti-Semitism of the Polish people remains very much in evidence. Still, the child grows up in a normal, stable environment. His existence is rooted in hundreds of years of family and communal tradition. He is safe, secure.

That is what should have been. But now for the second story, the real one: A child is born in the Displaced Persons camp of Bergen-Belsen in Germany in May of 1948. The name alone evokes shivers. Only minutes away from his crib are the mass-graves where tens of thousands who perished in this infamous concentration camp lie buried anonymously. Both his parents are Polish Jews, from towns which were once primarily Jewish. Only the parents are now virtually alone. Their entire families—parents, husband and wife, children, brothers and sisters, uncles and aunts—have been murdered. Few of their friends have survived the war. They themselves have experienced unspeakable atrocities. Now they must rebuild their lives, but in a vacuum. Gone is the support of a home, of family and friends, of security. Their confidence in man has been severely shaken, if not destroyed. Nevertheless, they are determined to go forward. They marry, and the child is the spark of their new beginning. But he, too, must grow up in this vacuum.

Ultimately, the family of three leaves the Displaced Persons camp. Filled with hopes and anticipation, they settle in Israel, or the United States, or elsewhere, to start new existences, new careers. But soon, a new disappointment sets in. Contrary to expectation, they are not usually welcomed with much warmth, even by the Jewish communities of their new homes. Perhaps there is some pity, some almost obligatory charity, but more often than not there is condescension, disdain. By and large, there is no desire to know what these refugees, these survivors went through. Certainly, there are few attempts to understand. Those who were indifferent throughout the years of the Holocaust remain indifferent. Thus, it is difficult for these new immigrants to integrate themselves into a less than receptive society. Also, there are the nightmares, the memories, the trauma, the fear and suspicion. The child is aware of all this, and it inevitably affects him in one way or another. As time goes by, he realized that he is somehow different. He is most comfortable with others like himself, to whom he does not have to explain his background, or his lack of grandparents, or his parents' experiences. In short, he is a child of Holocaust survivors.

With some variations, the above is accurate for most of us who are commonly referred to by the generic term, "the Second Generation". We are, I believe, unique in that while we did not experience the Holocaust, we have a closer personal link to it than anyone other than our parents. For us, it is not an abstract historical phenomenon to be treated dispassionately in an academic manner. Rather, it is our past, our parents' lives, our grandparents' death. Without having gone through the Holocaust, we nevertheless feel its flames. For us, the number 6,000,000 is not merely an anonymous statistic. It is our families, multiplied, and multiplied, and multiplied. It is my grandparents, and hundreds of thousands of other Jewish grandparents. It is my parents' brothers and sisters, and millions of other Jewish brothers and sisters. It is my six-year old brother, my mother's son who was gassed in Auschwitz, and more than a million other Jewish children.

Personally speaking—and in this context I would not presume to speak for anyone other than myself—even my relationship to Judaism is profoundly affected by the Holocaust. I cannot think of the destruction of the Temple in Jerusalem without thinking of thousands upon thousands of burning synagogues and Jewish homes. The martyrdom of a Rabbi Akiva who was put to death for his faith by the Romans must be seen in the light of Jews entering the gas chambers saying Shema Israel. The heroism of Bar Kokhba and of the fighters of Masada cannot any longer be recalled without at the same time remembering Mordekhai Anielewicz and the Warsaw Ghetto Uprising, the symbols of all the Jewish fighters and partisans of the Holocaust, and of all the resistance movements in all the camps and ghettos. Similarly, Abraham's readiness to sacrifice Isaac must be contrasted with the desperate attempts of Jewish parents during the Holocaust somehow to rescue their children, while the fires of Sinai cannot henceforth be approached except through the fires of Auschwitz. And we must never forget that our God who brought us out of Egypt is the same God who did not bring 6,000,000 of our people out of Nazi Europe.

This is not to suggest that one may erect a theology on the ashes of the Holocaust. However, we must treat it as an intrinsic part of the Jewish existence, and, as such, integrate it into our thoughts and being. No one among us has the right to evade its implications. For to ignore or minimize the Holocaust, to falsify or distort it in any manner, is to invite its recurrence.

In recent years, the Holocaust has all too often been trivialized, vulgarized and exploited. What should be sacred ground characterized by agonized silence and muted elegies, only to be approached with fear and apprehension, has become fashionable, an open territory without rules or restrictions. The annihilation of 6,000,000 European Jews is now the subject of speculative academic exercises. Pseudo-historians question the precise number of the victims, or even whether the Holocaust ever occurred, while others seek to deprive the Holocaust of its Jewish identity by deliberately ignoring the fact that the Final Solution was directed solely against the Jewish people. At the same time, novelists and dramatists concoct romanticized facsimiles of the most harrowing experience ever undergone by man, failing to comprehend the enormity of their desecration; irresponsible so-called mental health specialists concoct invalid theories at the expense of the victims, the survivors, and the children of the survivors; self-annointed authorities philosophize abstractly about Auschwitz and Treblinka for the sole purpose of philosophizing; and insensitive theologians attempt to posit religious interpretations of and justifications for the Holocaust without realizing that even to suggest

that God was somehow present at or a participant in Auschwitz is an act of blasphemy against the victims as well as against God.

Our response to this profane trend is a solemn commitment that, together with our parents, we shall perpetuate the sanctity and the inviolability of the memory of the Holocaust. We shall prevent it from being either mythologized or desecrated. And, above all, we shall transmit to our children our profound reverence and admiration for the spiritual strength, the heroic defiance and the somber dignity displayed throughout the years of the Holocaust by all those who experienced it, both the 6,000,000 and the survivors, for it is their unyielding adherence to the highest principles of Judaism and humanism which symbolizes and explains the survival of the Jewish people.

However, it is not sufficient for us to commemorate and remember. Simultaneously, we must do all that is within our power to ensure that there will never be another Holocaust. Because of who we are, we have a unique understanding of the bestiality that is inherent in mankind. We know only too well that Auschwitz, Treblinka and Bergen-Belsen represent the ultimate consequences of racism, persecution, oppression and discrimination. It is therefore our obligation—as much as if not more than anyone else's—to fight against and attempt to eradicate these phenomena whenever and wherever they occur. We must be as concerned about the unspeakable plight of the Cambodian refugees as we are about the persecution of Jews in the Soviet Union. We must take as firm and uncompromising a stand against South African Apartheid as we do against manifestations of anti-Semitism in France, Argentina and the Arab World. And it is incumbent upon us to reaffirm our total solidarity with and support for the State of Israel. We cannot stand by and allow its very survival to be bartered away for any reason.

Specifically, we may not criticize the world—including the Jewish world—for its silence forty and forty-five years ago, and for failing to come to the rescue of European Jewry at that time, unless we now demonstrate conclusively that we in fact learned the dire lessons of our recent past. Thus we must unambiguously reject and actively oppose any and all manifestations of extremism, violence, fanaticism or terrorism. For it is only by working toward the elimination of all hatred that we can justify our existence as human beings and Jews in the aftermath of the Holocaust.●

A TOWN HERO

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mr. LAGOMARSINO. Mr. Speaker, I rise to call the attention of this body to the impending retirement from formal public service of a dedicated and humane individual, Charles A. Mozley, of Fillmore, Calif.

Mr. Mozley, as he has become known to two generations of students at Fillmore High School, will be the subject of a special retirement tribute on June 12, sponsored by the people of the town which he has served so admirably for the past 29 years. His is truly a remarkable career, one of which all of us in this body can be proud. I am particularly pleased to bring Charley's accomplishments to the attention of this House because for a year he served as a member of my staff here in Washington, during a sabbatical from Fillmore High School in 1974.

Mr. Mozley is a teacher of civics—a profession which goes back to the time of Aristotle, at least—and I have known few people with a better grasp of what it means to be an active citizen in a democratic republic. During his career, he has taught over 4,000 young people the principles, privileges and responsibilities of citizenship in our Nation—as well as guiding a brace of interns and staff in my office.

Charley came to teaching by a strange route. After serving in the Navy in World War II, he was a jazz musician, playing the drums in nightclubs around the country. He came to Fillmore after a year in Barstow, Calif., and I must say, Mr. Speaker, to my dear colleague, JERRY LEWIS, that Barstow's loss was our gain.

For 29 years, Mr. Mozley has served not only as civics and psychology teacher, but also as senior class adviser, adviser for the senior council and on the senior class plays—and all-around confidant, cheerleader and friend of uncounted scores of Fillmore students. There are students now in his class whose parents sat in Charley's class years ago, and they tell me he has lost none of his enthusiasm, dedication and wry wit. He is truly that remarkable rarity and unique institution, a town hero. In fact, last month they made him grand marshal of the Fillmore Festival.

I said at the beginning of my remarks that Charley is retiring from formal public service. I qualified it that way because I know that Charley is not planning to withdraw from a lifetime of helping young people. He presently serves on the city youth needs committee, and continues his commitment to helping raise a family. And I know that his wife, Barbara, and his children, Melissa, Matt, Joel and Jim, join me in reporting that Mr. Mozley is as young today as the many young people he has helped through the years. He has a stake in continuing to do that, because his kids have given him five grandchildren to look out for.

So, Mr. Speaker, on behalf of my colleagues in the House and Senate, and with the pleasurable consent of the people of the community of Fillmore, I'd like to say—Thank you, Mr. Mozley, and God bless you.●

FOREIGN PORTS VERSUS GUAM: THERE IS NO CHOICE

HON. ANTONIO BORJA WON PAT

OF GUAM

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mr. WON PAT. Mr. Speaker, for the past 5 years I have been waging a long and difficult effort to defeat proposals put forth by the U.S. Navy to either close down or seriously reduce the effectiveness of the naval ship repair facility on Guam.

I was reminded of this today when I read a story in the Washington Post which discusses the ongoing controversy over whether or not Japan has allowed American ships carrying nuclear weapons into their waters and ports.

Despite statements by a former U.S. Ambassador to the contrary, Japanese officials have held steadfastly to their claim that American vessels with nuclear weapons are barred from that nation's waterways.

In recent months, I have been a strong advocate of an increased military role by the Japanese. I have said repeatedly that they should do more to carry the defense burden, particularly for their own defense.

While I have no argument with the Japanese decision to keep nuclear weapons out of their waters—that is and should be a decision only they can make—I do question the continued insistence by the U.S. Navy that this Nation should rely on foreign ports for our defense activities.

Since 1898 the U.S. Navy has found Guam to be a safe haven and a friendly port. Guamanians are Americans and have no reservations about U.S. military activities. We on Guam are very proud to be the westernmost Pacific base for the U.S. fleet. And at no time, have the American citizens of Guam ever barred nuclear weapons from our waters or our island. In fact, the military has found that Guam has welcomed it with open arms. Not because of any penchant for war; rather, because we realize that America might help keep our Pacific waters safe from foreign intervention.

If the Japanese wish to ban American nuclear weapons from their waters that is their right. The same is true of the Philippines which have a similar policy. But it does not require an expert in military affairs to realize that such a ban certainly restricts the usefulness of our bases in these countries.

I am all the more perplexed then by the continued efforts by the Navy to close down their operations at the Guam ship repair facility. Why would any military expert close down the only U.S. facility of this nature in the entire western Pacific when the alternatives are foreign ports which have

and will continue to place restrictions on our activities in their waters? I for one, cannot understand the logic of such reasoning. It seems simple logic would dictate that the facility on Guam would be kept going as an important ace in the hole against that time when this Nation would need to be guaranteed that our ships, complete with nuclear weapons, could find a safe and friendly haven in that part of the globe.

The price for this is not outrageous: The Guam facility costs only $24 million per year. This money, which is certainly a small sum compared to the overall military budget, gives over 700 Americans jobs and insures that work on American military vessels is done by Americans.

The choice is simple: The American citizens of Guam are ready and willing to do their share for the defense of this Nation. Can the same be said for our foreign allies?

I ask that the Washington Post story be included in the RECORD at this time. Thank you.

JAPAN INSISTS IT BARRED U.S. SHIPS WITH A-ARMS

(By William Chapman)

TOKYO, May 19.—The Japanese government stuck to its 21-year-old story today that American ships carrying nuclear weapons have been barred from Japan's waters and ports despite new disclosures by former officials that there never had been such an agreement.

Although the government's story was challenged on several sides, it nevertheless seemed determined to try to ride out the growing controversy.

The conflict burst into the open in a series of newspaper interviews that pitted the memories of former key officials against the version the government is clinging to.

Nuclear arms are a sensitive topic in this country that had two cities devastated by atomic bombs in World War II, and successive Japanese governments have avoided the issue of whether U.S. naval forces carry nuclear weapons. The Japanese also consider it extremely important that their politicians be seen as honest, and it would be a major embarrassment for a government in office to be suspected of lying about so sensitive an issue.

[Associated Press reported from Washington that Secretary of State Alexander M. Haig Jr. has canceled a visit to Japan scheduled for the second week of June. U.S. officials said the decision was made because Japan's new foreign minister would be away that week and had nothing to do with the problems plaguing U.S.-Japanese relations.]

Meanwhile, socialist and antinuclear organizations laid plans for large-scale protests aimed against the U.S.-Japanese mutual security treaty and attempting to force Prime Minister Zenko Susuki's government to take responsibility for allegedly deceiving the public.

The controversy arose yesterday when former U.S. ambassador Edwin O. Reischauer disclosed in a newspaper interview that since 1960 an agreement had permitted nuclear-armed American warships to dock routinely in Japanese ports and pass through Japanese waters.

Successive Japanese governments have insisted that such ships could not come into port withour prior consultation between the two governments. In a new denial of Reischauer's story today, the government said again that prior consultation would be necessary and that no such consultation had ever been held.

However, several former officials were quoted in news stories today as saying that the understanding reached in 1960 did not require prior consultation for American naval vessels. They said that the agreement had been discussed only in terms of bringing nuclear weapons ashore for land-basing and that warships were hardly discussed at all.

Takezo Shimoda, a former ambassador to the United States who was active in the 1960 negotiations, said that at the time the question of temporary docking or passing through Japan's waters "was outside the matter for prior consultation."

Members of Suzuki's Liberal Democratic Party said they expect the prime minister to survive by continuing to deny Reischauer's story.●

THE NINTH AVENUE FESTIVAL: WORLD'S LONGEST BLOCK PARTY

HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mr. WEISS. Mr. Speaker, Ninth Avenue in New York City is always a street of exceptional variety and flavor—in food, business, and culture. But on the weekend of May 16 and 17, Ninth Avenue showed what makes it really exceptional, as it welcomed half a million visitors to the eighth annual Ninth Avenue Festival, or "the world's longest block party."

For the festival, traffic is banned from 20 blocks of the avenue along a mile-long stretch. Entertainment is featured at several stages on the corridor, including music and folk dancing of many kinds. Strollers can choose among samples of food, drink, and other wares offered by the area's merchants, who set up 255 booths for the occasion. In their diversity, the offerings recall the history of the avenue. Irish, Italian, Greek, Caribbean, Asian, and Middle Eastern food, for example, are among that offered in this area where immigrants of those nationalities, and others, settled when they first came to these shores.

In its simultaneously international and American flavor, the festival is indeed what the New York Times describes as "the city's quintessential neighborhood celebration." And it is the people of the neighborhood who make it work: the small shopkeepers, bakers, grocers, artists, and others. All year round, but especially on the festival weekend in May, Ninth Avenue is one of New York's best places to live, to shop, and to buy and eat food.

I salute the merchants of Ninth Avenue, and the Ninth Avenue Association, both for the festival, and for giving the festival receipts to local churches, charitable groups, and scholarship funds. I cannot name everyone who contributed, but three members of the association deserve special mention: James Dell'Orto, owner of Manganaro's Hero Boy; Evelyn Regino, who sets up "Regino's Polish Corner" every year at 50th Street; and Lili Fable, president of the association and owner, with her husband Anthony, of Poseidon Bakery.

From 37th to 57th Street on the West Side, Ninth Avenue is truly a wonder of city life.●

PUT THEM TO WORK

HON. CLEVE BENEDICT

OF WEST VIRGINIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mr. BENEDICT. Mr. Speaker, I recently had the pleasure of reading an essay which I believe illustrates clearly the need to tighten welfare's eligibility standards by putting capable peope to work. The essay was written by my constituent, Tami Dean, a 16-year-old junior at Jefferson High School in Jefferson County, W.Va. I would like to take this opportunity to share her insightful essay with you.

PUT THEM TO WORK

(By Tami Dean)

Our late and very great 16th President, Abe Lincoln, once made a list of 10 "cannots." In my opinion, the most important and most applicable to today's society are the ninth and tenth ones, They read as follows:

"You cannot build character and courage by taking away a man's initiative and independence."

"You cannot help men permanently by doing for them what they could and should do for themselves."

We are living in a society where vast multitudes of people have their hands out asking for support. These people are subservient to a fear—that fear is the fear of poverty. Now, it is true that Jesus Christ admonished us in the New Testament to care for the widows and orphans, but he said nothing of the thousands of men and women who are accepting sustenance and support when they are capable of supporting themselves. As a matter of fact, the Book of Romans says, "To him that worketh goes the reward . . ." and "As ye sow so shall ye reap" is also a biblical principle. Even casting it into a secular light there is the well-known fable about the ant and the grasshopper. The ant worked and set up a store for winter while the grasshopper lounged and when winter came he was relegated to the charity of his neighbors.

Giving a person something for nothing is certainly taking away his initiative. He is not going to take it upon himself to find a job and earn money if it is handed to him. Character is built by work and personal experience. Nobody can be granted character. It must be built.

Our welfare system is a perfect example of "doing for men what they could and should do for themselves." This ties in with the fact that welfare takes away a person's

independence. A person cannot be independent who relies constantly on the charity of others. It is the man who works for a living, not he who demeans himself by begging, who gains total independence.

We would not have a United States of America if our forefathers had not worked for their independence. They would never have gotten it by sitting back and doing nothing.

We would not have gotten out of the Great Depression if the people had been content to sit back and accept the direct relief of the Federal Emergency Relief Administration. But they wanted to work! For that very reason, the Civilian Conservation Corps was created. In that way, the people could work for their money rather than sit back and have it handed to them. Why, it's a matter of pride if nothing else! The people in the thirties wanted to work. Why aren't people like that today?

So I would like to state that, though I am no economics expert, it is my considered opinion that our federal government would be in a much better state of finance if there were fewer strong and healthy people relying on it for their monthly welfare checks. My solution? Put them to work!!

Of course, the first question which comes to everyone's mind is, "How?" Well, there are many, many menial tasks to be done. There are jobs picking up trash, mowing grass on federal land, and construction and maintenance of buildings which are federally owned. And the state governments could help to ease the burden by offering work on state buildings and land.

We all know that one will always find some welfare recipients who will consider themselves "too good" to perform such "demeaning" tasks as these aforementioned. But if they are that good, why are they drawing welfare? They should go out and find a job "worthy of themselves."

There is no truer or more commonly quoted adage than "money doesn't grow on trees." It is quite obvious our government can't retain its present spending rate. Some people are crying because Reagan plans to "trim the fat" off of the budget. I take issue with anyone who accuses Ronald Reagan of lining the rich man's pockets at the expense of the poor. It is time some of them started fending for themselves. They cannot continue their parasitical practices without completely draining our economy. The only course to be taken is to tighten eligibility standards and put these capable people on work projects. It is only when they start earning their money that they obtain true independence.●

AMERICAN BASIC INDUSTRIALIZATION NATIONAL DEFENSE ACT

HON. DON BAILEY

OF PENNSYLVANIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mr. BAILEY of Pennsylvania. Mr. Speaker, today I'm introducing the American Basic Industrialization National Defense Act—ABINDA. Its goals are ambitious. They presume a primary industrial and transportation capacity to protect the United States against any combination of economic and/or military challenges from abroad. The vehicle is not perfect or complete, but necessary and by far the major factor in this endeavor; the vehicle is the Internal Revenue Code of 1954. The basic industries are as follows: steel, mining, railroads, automobiles, airlines, and paper.

Concepts like transferability, carryforward, carryback, minimum corporate tax, refundability, investment tax credit, and targeting are either redefined and/or reapplied or both in the Code to accomplish this end. Why?

These industries form our Nation's industrial heart. From them or through them flow practically every fundamental production need upon which this Nation's economic and military stability depend. Without them we cannot be free. If we lack them we lack independence. With them all related development and commerce can prosper free of foreign decisions. Without them we are potential victims of caprice, aggression, indifference, or accident. With them we can exercise a free and unfettered national will. Without them our decisions will be influenced by variables beyond our political control.

We have no choice. The only question is how we preserve them, how we channel resources into their revitalization. A matrix of elements, international and domestic, has combined to create an unhealthy environment for the long-range massive capital investment requirements these industries need. Prejudices against savings and investment in our Tax Code—a disproportionate impact caused by a well-meaning but discriminatory regulatory situation—trade policies which allowed foreign competitors to distort the rules of free enterprise at home but exploit them in our markets—while our domestic producers were denied similar opportunities—all these things have distorted resource allocations in this Nation. We shall either modernize these industries or cease to control our future.

In order to do so we must remedy the defects caused by past distortions and build a new industrial base. This piece of legislation seeks to do that through a combination of flexible devices that will help put the affected industries on a more equal footing. They will then be able to share in contemplated accelerated cost recovery changes for the future.

The bill penalizes and sunsets refundability and extended carryback in a one chance approach to help marginally profitable companies improve their cash flow. It "targets" in two ways. It limits the affected industries to the ones mentioned here and limits the resultant cash flow to productivity producing investments by definitions. It also recognizes the deficiencies in the Code suffered by capital intensive industries and provides flexibility to see that promised resources are available for investment rather than offered through the Code in one place as an ITC only to be taken away in the form of the minimum corporate tax or denied because of nonrefundability somewhere else. It does these things in the following ways.

An affected company in an affected industry can choose among the following: Refund up to 25 percent per year for 2 years their currently computed ITC load with up to a resultant 25 percent forfeiture computed yearly at one half the amount of the refund taken. The remaining 25 percent or more can be carried forward this third year and can be factored into the ITC already earned and being carried at that time. The purpose is to penalize refundability and encourage carryforward while still providing an opportunity for immediate cash flow; or a company can carry back against 10 years of past tax liability including past minimum tax liability their current ITC load but must forfeit the balance remaining.

For all ITC earners in all industries everywhere, the new effective date for current and future ITC's shall be 10 years from the effective date of the act—January 1, 1981. Future ITC's shall be refundable at a rate of up to 10 percent per year on any remaining ITC balance but a forfeiture of up to one-half the amount taken shall be required. In addition, future ITC's shall be transferable or negotiable to other corporations at up to 15 percent of outstanding ITC balances per year, but a penalty in the form of a forfeiture of one-half the amount transferred less any discount shall be necessary. Any profit to the transferee or purchasing corporation shall be taxable.

Again, the goal is to provide flexibility while encouraging carryforward against normal profit years. But we need the cash flow available for investment purposes to enable these corporations to compete. The implications for national defense purposes and employment are obvious and do not require elaboration.

Some sense of fair play should be invoked for these industries which have suffered so long at the hands of past injustices. Although refundability or transferability are not to be desired, they are the only alternatives to undeserved and unearned potential failures of industries without which we cannot survive, industries who have encountered difficulties through no fault of their own.●

H.R. 2400 AND THE PUBLIC UTILITY INDUSTRY

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mr. STARK. Mr. Speaker, I would like to bring to the attention of my colleagues a recent study by the Congressional Research Service on the impact of the Reagan administration's tax proposals on the public utility industry.

The study finds that for electric and telephone utilities H.R. 2400—the Economic Recovery Tax Act—would provide potential new tax benefits which substantially exceed present tax payments; for gas utilities the increased tax benefits would about equal expected levels of tax payments.

The text of the introduction and summary to this report appears below. The report was prepared by Donald W. Kiefer, a specialist in public finance and finance institutions in the Economics Division of the Congressional Research Service.

THE IMPACT OF THE REAGAN ADMINISTRATION TAX PROPOSALS (THE ECONOMIC RECOVERY TAX ACT OF 1981) ON THE PUBLIC UTILITY INDUSTRY

INTRODUCTION AND SUMMARY

The Reagan Administration's tax proposals, embodied in the Economic Recovery Tax Act of 1981 (H.R. 2400 and S. 683) introduced by Representative Barber Conable and Senator Robert Dole, would have dramatic effects on the U.S. tax system. The primary revision in the corporate income tax included in the proposals is a substantial further acceleration of depreciation deductions in an effort to stimulate investment and capital formation. This report assesses the effects of the proposed tax legislation on the public utility industry, which would be affected significantly by its enactment because of the industry's capital intensity and because of several provisions in the bill which focus specifically on public utilities. Section I of the report reviews the effects which the existing investment-related tax benefits—accelerated depreciation and the investment tax credit—have had on the industry and the effects which would result from the further acceleration of depreciation deductions in the Economic Recovery Tax Act.[1] Section II of the report analyzes the provisions of the bill which focus specifically on this industry, provisions which would change the required ratemaking treatment of accelerated depreciation and the investment tax credit (ITC) in regulating public utilities.

Because of the extreme capital intensity of the public utilities, the industry has received substantial benefits from the present investment-oriented tax provisions. From 1954, when accelerated depreciation was adopted, to the present, effective corporate income tax rates in this industry have declined substantially, and tax deferrals have played an increasingly important role in the financial structure of the industry. In 1979, the latest year for which data are available, accelerated depreciation and the investment tax credit reduced the Federal income tax payments of the electric utilities by $3.025 billion, the telephone utilities by $2.98 billion, and the gas utilities by $894 million. The industries' effective corporate income tax rates, based on actual Federal income tax payments and a modified concept of book net income (which excludes AFUDC),[2] were respectively 7.7 percent, 6.3 percent, and 17.1 percent.

When accelerated depreciation and the investment tax credit receive normalization ratemaking treatment, the tax savings become available to the utility companies to assist in financing their capital investment. Their contribution is largest in the telephone companies where they provide over 16 percent of gross capitalization and have since 1975 provided more than 30 percent of the increase in gross capitalization.[3] In the electric and gas industries the tax deferrals contribute 8.7 percent and 7.3 percent, respectively, of gross capitalization and have recently provided approximately one-sixth and one-eighth, respectively, of annual increases in gross capitalization.

The additional benefits which the public utilities can derive from the further tax reductions in the Economic Recovery Tax Act, while not inconsequential, are limited by the industry's present low tax liability. For the electric and telephone utilities the legislation would provide potential new tax benefits which substantially exceed present tax payments; for gas utilities the increased tax benefits would about equal expected levels of tax payments. Thus, the Economic Recovery Tax Act would virtually eliminate any Federal income tax liability for the public utilities once the more rapid depreciation were fully phased-in. The direct effect of the increased tax benefits on the utilities would be an increased cash flow equal to the amount of the reduction in Federal tax payments. While the tax payments of the industries have recently varied substantially, the data suggest increased tax benefits in the neighborhood of $1 billion per year in each of the utility industries. Additionally, the electric and telephone industries would accumulate substantial tax loss carryovers and unused investment tax credits which may induce the utility industry to advocate changes in the tax law to increase the benefits available to companies with no current tax liability. The industry would also be expected to move further in the direction of financial arrangements (e.g. saleleasebacks) and changed business structures (e.g. mergers with firms in other industries with tax liabilities to absorb excess tax benefits) designed to take maximum advantage of the tax benefits which the industry could not use directly.

In addition to increasing substantially the tax benefits received by the public utility industry, the Economic Recovery Tax Act would revise the ratemaking treatment of the tax benefits required by the tax code. The present code provisions basically restrict the use of flow through ratemaking treatment of both accelerated depreciation and the investment tax credit to those utilities which were using flow through for accelerated depreciation at the time of passage of the Tax Reform Act of 1969. All other utilities must normalize to be eligible for the tax benefits.

A review of the legislative history of accelerated depreciation and the investment tax credit leads to the conclusion that Congress intended the tax benefits to reduce the after-tax cost to businesses associated with the acquisition and ownership of capital assets, and that the resulting tax savings should be available for financing further capital investment. In short, their purpose was to subsidize business investment. Flow through treatment is inconsistent with this purpose; it denies utility firms any financial benefits from the tax advantages and does not provide capital for future investment. Rather, flow through treats the tax benefits as direct subsidies to utility customers and passes the tax reductions directly on to them through immediate utility rate reductions. Normalization treatment, on the other hand, regards the tax benefits as subsidies to capital investment and accurately accounts for the capital subsidy embodied in the tax benefits. Utility rates are also reduced under normalization treatment, but the rate reductions are spread over the lives of the underlying capital assets.

The Economic Recovery Tax Act would make two changes in the rules governing ratemaking treatment of accelerated depreciation. First, the legislation would require that normalization treatment apply to differences between book depreciation and tax depreciation attributable to both the use of different depreciation methods and different depreciation periods. The present code provision refers only to depreciation methods. Secondly, the legislation would require normalization treatment for all utility firms which use accelerated depreciation for new property placed in service after December 31, 1980. Present law allows those utilities which used flow through treatment in 1969 to continue using it. For those utilities which currently use flow through, the switch to normalization would result in increased cash flow to the company as well as somewhat higher utility rates charged to its customers. These effects would build gradually as new utility property came under the new rules and, in the aggregate, would be relatively limited because of the limited proportion of utility property affected and because, in most of the 12 States which currently require flow through treatment, it applies to only a portion of the total benefits from accelerated depreciation.

The Economic Recovery Tax Act would change the normalization treatment of the investment tax credit required by the tax code to make the treatment fully consistent with accounting for the ITC as, effectively, a reduction in the cost of the capital asset. Specifically, for utility property placed in service after December 31, 1981 the amended restrictions would permit both exclusion of the accumulated deferred investment tax credits from the utility rate base and a reduction of the cost of service by a proportionate amount of the ITC spread uniformly over the lives of the utility's assets. Since virtually all utilities which currently nomalize the ITC use the cost of service method (option 2), the effective change which they

[1] The depreciation revisions themselves are not summarized in this report. Other than placing utility property with a guideline life of 18 years or longer in the 10-year depreciation class and allowing utilities to elect not to take progress payments into account in calculating depreciation, they would apply to utilities the same as other industries. For a detailed summary of the proposals see: President Reagan's Economic Policy, White House Fact Sheet, and Related Documents, February 18, 1981, as reproduced by Bureau of National Affairs, Inc.

[2] Allowance for funds used during construction.

[3] "Gross capitalization" is a concept used in this report to measure the significance of the tax benefits to the firms' financial structures. It consists of private capitalization (equity capital plus long-term debt) plus the tax deferrals resulting from accelerated depreciation and the investment credit.

would experience is the exclusion of the deferred ITC's from the rate base.

For those utilities which normalize the ITC the change in rules would result in lower utility rates charged to customers and lower cash flow received by the utility companies. These effects occur because the rule change corrects an anomaly in the present normalization requirements which results in utility rates, cash flow received by the utilities, and utility profit rates which are higher than would be consistent with the utility accounting process, higher than intended by the utility regulatory commission, and higher than are consistent with the effects of the ITC in the unregulated sector of the economy. The effects resulting from the new ITC normalization rules would build gradually as new property came under the rules beginning in 1982. At present rates of return and rates of growth of deferred tax credits, the new normalization rules would imply lower utility rates charged to customers and lower cash flow to utility companies in amounts which grow each year by about $100 million in the electric utility industry and $70 million in the telephone utility industry. However, the actual effects would be expected to be lower than these figures, perhaps by significant amounts, because the larger accelerated depreciation tax benefits would reduce the amount of investment credits which the utilities could use directly and thereby reduce the rate at which deferred investment credits accumulate.●

ONE-SIDED "PEACE" MOVEMENT

HON. ROBERT J. LAGOMARSINO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mr. LAGOMARSINO. Mr. Speaker, a recent editorial in the Press-Courier of Oxnard, Calif., in my district, described the new peace movement as a "one-sided lobby for unilateral Western disarmament."

The editorial describes the recent demonstrations against El Salvador, the deployment of nuclear missiles in Western Europe, and the buildup of U.S. defense forces by the new peace movement. It adds, "conspicuously absent from these demonstrations is any hint of protest directed at the Soviet Union or its surrogates."

The editorial also notes that the Reagan administration can point to public opinion polls and its own mandate from the November election to support its stand for a tougher foreign policy and a stronger national defense.

The full text of the editorial follows:

[From the Press-Courier, May 9, 1981]

ONE-SIDED "PEACE" MOVEMENT

Writing more than half a century ago, the German philosopher Oswald Spengler detected a kind of unconscious death wish among the inheritors of Western culture, whom he judged too self-indulgent and short-sighted to pay the price required for their civilization's survival.

Spengler's bleak perception no doubt strikes many as overly pessimistic, or at least premature. But it does offer an intriguing, and not implausible, explanation for the revival of a liberal-left "anti-war" movement in the United States and Western Europe.

Among the galaxy of grievances aired during recent demonstrations, including the one at the Pentagon, three stand out: U.S. policy in El Salvador, NATO's plans to strengthen its theater nuclear deterrent, and the larger effort to restore U.S. defenses in the face of an awesome Soviet military buildup.

Broadly speaking, the new peace movement is demanding an end to American military aid for the Salvadoran government, cancellation of plans to deploy cruise and Pershing II nuclear missiles in Western Europe, and a halt to the new U.S. defense programs deemed by a bipartisan majority in Congress to be essential to national security.

Conspicuously absent from these demonstrations is any hint of protest directed at the Soviet Union or its surrogates.

Thus, for example, the speeches and signs at the affair in Washington included no demands for a Soviet withdrawal from Afghanistan, no expressed wish for an end to the covert supply of arms to Marxist guerrillas in El Salvador, no clamor for a halt to the deployment of Soviet SS-20 nuclear missiles aimed at Western Europe, and no manifest objection to a Soviet military buildup unprecedented in scope since Nazi Germany rearmed during the 1930s.

On its face, then, the new "peace" movement adds up to a one-sided lobby for unilateral Western disarmament!

Put another way, it constitutes a frontal attack against the most visible steps being taken by Western governments to defend themselves against the global offensive waged by the Soviet Union.

But it's too soon to conclude that Spengler was a prophet.

The Reagan administration can and should put these demonstrations in proper perspective by noting any number of public opinion polls, including the one tabulated on election day last November, showing majority support for a tougher foreign policy and a stronger national defense.

And even in Western Europe, where the collapse of detente has triggered palpable nervousness, the pacifist sentiment decried recently by NATO Secretary General Joseph Luns is more likely than not to give way ultimately to a reasoned consensus in favor of adequate defenses and against appeasement.

Even so, neither Washington nor its European allies can afford to ignore the mischievous potential of a reviving left-wing protest movement. The fact that the hard-core left has already attracted a measure of support from less radical liberals, including members of some church groups, should serve as a warning that these demonstrations cannot be dismissed solely as guerrilla theater.

Western European governments need to try harder to educate their own citizens on the sobering realities confronting the NATO alliance. And the Reagan administration would be wise to renew attempts to transform its overall foreign and defense policy mandate into a durable base of support for policies intended to prevent El Salvador from becoming another Cuba.

The Reagan administration and its counterparts in Western Europe have the facts on their side. Making sure that those facts are widely understood is the best defense against those who would make Oswald Spengler's vision a reality.●

MASS EXODUS OF CIVIL SERVANTS FROM GOVERNMENT

HON. PATRICIA SCHROEDER

OF COLORADO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mrs. SCHROEDER. Mr. Speaker, a variety of restrictions have together produced an unprecedented exodus of dedicated civil servants from Government. My concern about this issue led me to write the Acting Director of the National Aeronautics and Space Administration on the day of the successful landing of the Space Shuttle. I asked him to comment on reports of a "brain drain" at NASA. For the information of my colleagues, I insert my letter to Dr. Lovelace and his response in the RECORD:

COMMITTEE ON POST OFFICE AND CIVIL SERVICE,
Washington, D.C., April 14, 1981.

Dr. ALAN M. LOVELACE,
Acting Administrator, National Aeronautics and Space Administration, Washington, D.C.

DEAR DR. LOVELACE: On this day of your great accomplishment in successfully completing the first flight of the Space Shuttle, I believe it is necessary to focus on a serious problem which may be developing within NASA. The space agency needs a highly trained and technically proficient workforce to discharge its scientific and experimental mission. The excitement of space travel has attracted the world's best assemblage of scientists and engineers to NASA. This group of employees made the triumph of the Space Shuttle possible.

Recently, however, I have heard reports of a large number of pending resignations and retirements at NASA. Some of the agency's best employees have evidently decided to pursue more lucrative private sector positions when the excitement of the Space Shuttle mission is past.

Are these reports true? Does NASA face a serious brain drain? Can qualified replacement employees be found and trained in time for NASA to fulfill its future missions on schedule? Can anything be done, administratively or legislatively, to stem this surge of attrition?

I would appreciate your prompt response so steps can be taken to hold on to NASA's most precious asset, its people. I look forward to working with you in the future to attract and retain the type of individual which NASA and our government need.

Warmest personal regards,

PATRICIA SCHROEDER,
Chairwoman,
Subcommittee on Civil Service.

NATIONAL AERONAUTICS AND SPACE ADMINISTRATION,
Washington, D.C., May 14, 1981.

Hon. PATRICIA SCHROEDER,
Chairwoman, Subcommittee on Civil Service, Washington, D.C.

DEAR MADAME CHAIRWOMAN: This responds to your letter of April 14, 1981, concerning the potential for a serious "brain drain" within NASA.

I share the concern expressed in your letter. Some 2200 permanent employees left NASA in FY 1980. During that same period

90 senior executives retired, a rate of over 20 percent. This included nearly two-thirds of the optional retirement eligibles. Our projections indicate that another 90 senior executives may leave NASA in FY 1981.

We believe that there are several factors involved in providing an explanation of why so many people are leaving in such a short period of time. One of these factors has been the long history of personnel reductions and program reductions or stretchouts in NASA that extend back to the 1960's. Since 1967, NASA has experienced a reduction in its personnel strength every year; over that period our personnel strength has decreased form 33,947 to 22,613. The natural effect of these personnel reductions has been to reduce the intake of new blood and increase the overall age of our workforce. NASA's average age was 39.4 in FY 1968 and has increased to 43.5 in FY 1980.

The effects of eliminating or stretching out programs are difficult to quantify, but I believe that the top technical and scientific talent are attracted to those programs that are relatively stable. If we continue to delay or eliminate valuable scientific and technological efforts, I believe we will experience increased difficulty in maintaining a first rate base of talent.

The pay ceiling is probably the major single factor contributing to our retention difficulties. Dr. Frosch, our former Administrator, made the following statement before the Quadrennial Commission.

"An increasing number of NASA's key executives are leaving the agency, and although there are probably many factors which lead to an executive's decision to make a career change, I am convinced that the single most important reason is the fact that Federal executives' pay is simply too low."

"Based on my own experience as a Federal employee, I am keenly aware of the intangible benefits of public service and of the very real feeling of satisfaction of being able to participate directly in achieving major national goals—in NASA's case in aeronautics and space. But there does come a time when an executive's concerns about increasing personal debts and his or her ability to afford college tuition simply outweigh the intangible rewards of public service. That is particularly true in a scientific and engineering agency such as NASA where the education and experience of our executives are directly useful and sought after in the private sector."

"A clear trend in recent years underlines my concerns. In fiscal years 1977 and 1978 the attrition rate among executives was less than 6%. In FY 1979 almost 10% of our executives left the agency, and in FY 1980 the rate was 16.7%, not counting reemployed annuitants who technically retired but retained their positions without a break in service. If the present situation continues we project that there will be a separation rate of more than 20% for this fiscal year."

"While my major concern centers around NASA's senior executives, we are beginning to experience the same problems with our middle managers in the General Schedule who in effect provide the pool of talent from which we must draw our senior executives."

Dr. Frosch also stated, "A certain amount of turnover among executives is to be expected, and indeed is desirable in a research and development organization. The artificially low Federal pay cap, however, has the effect of driving out of NASA those whose talents and experience are most needed by the agency, and at the point in their careers when they are most productive."

In the process of attracting top technical executive talent, an attractive salary is, of course, a key element. Under the present Federal salary structure, the Government is not competitive in its search for top talent in the aerospace arena. I am enclosing a table from a report of the American Management Association on executive compensation in the aerospace industry which illustrates that fact.

The problem in NASA caused by the pay ceiling is made clearer when you consider that we currently have about 1700 employees who earn the same amount of pay; that number includes all 440 of our Senior Executive Service (SES) members and 1217 (83 percent) of our GS-15's. If a general pay raise of 4.8 percent goes into effect in October, it will add another 1100 to those at the pay cap for a total of approximately 2800 NASA employees. The NASA employees in this pay cap situation range for individual engineers working at our field centers to our Associate Administrators and Center Directors who are responsible for managing thousands of employees and multi-million dollar aerospace programs. In my opinion, this type of pay compression leads to disenchantment among the current workforce and presents a significant obstacle in the recruiting of truly first rate talent from the private sector.

Another factor that may contribute to the departure of NASA employees is the negative perception that has been building for the past several years in the Federal service in general. Many signals that come from the general public, their elected representatives and the media are negative toward the civil servants and the work performed by them. Examples of actions contributing to this perception include the continuation of pay caps, the possibility that retirement benefits will be significantly altered to the detriment of the civil servants, and severe travel restrictions that limit the possibility of scientists' and engineers' participation in work related professional activities. One recent example is the NASA experience with SES performance awards (bonuses). In May 1980 the agency awarded bonuses to 240 Senior Executives in accordance with the then applicable law and regulation, and with the knowledge of the Office of Personnel Management (OPM). This resulted in criticism that culminated in the number of bonuses being reduced by law for fiscal years 1980 and 1981, and further restrictions being placed on bonuses through guidelines issued by OPM. This puts NASA in the position where only a small number of our executives can be recognized with a bonus in the year that the agency first flew the Space Shuttle. Needless to say, this will reduce our capability to motivate and reward our people at a critical point in the agency's history, and increases the probability of key people leaving NASA.

I believe that NASA is fortunate to have extremely dedicated employees at all levels in its organization and I would like to think that the challenge of our programs alone will spur all of our employees to take on increased responsibilities. However, the above factors make it difficult to generate the enthusiasm necessary for employees to take on added burdens or strive for new challenges. This is particularly true among mid-level managers and senior executives who have the opportunity to move into the private sector where added responsiblity can be translated directly into increased tangible rewards. We are hopeful that qualified replacements for those who depart can be found within the agency and from the private sector; however, we are already facing an increasingly difficult situation regarding internal mobility. Employees from the NASA field centers have no economic incentive to move to Washington and other high-cost areas. The combination of the salary ceiling, moving expenses, and the cost of living in those areas result, of course, in a loss of real income for mid-level employees and executives who are willing to move.

We believe that there are things that can be done to help this situation:

A period of time is needed when the agency's personnel ceiling is relatively stable, allowing us to hire at entry levels and develop talent rather than reducing the force with the inevitable reduction in the hiring and retention or bright young technical minds.

Realistic pay levels should be instituted and maintained that will allow reasonable pay distinctions between the differing responsibilities for members of the SES and the upper grades of the General Schedule. This action is believed to be essential if we are to return to a system which provides rewards and incentives for Federal employees that are related to their responsibilities and performance. Without such rewards and incentives, we believe that agencies such as NASA will be seriously impaired in carrying out our national programs.

When NASA came into existence in 1958, the Congress recognized the need for NASA to retain and recruit the most qualified personnel available to meet the challenge of Sputnik. The National Aeronautics and Space Act of 1958, gave the Administrator authority to fix the compensation of a limited number of its personnel at a rate up to but not to exceed the highest rate for a GS-18. It was this authority that enabled NASA in its early years to compete with industry in attracting the best qualified people. Prior to the establishment of the SES, this advantage was eroded as the result of the pay cap.

We need resolution of some of the difficult problems that face us regarding civil servants. For example, the continuing debate regarding the retirement system may cause employees to make decisions about retiring that otherwise they might not make if they had a clear picture of what the retirement system will be in the future. Further, the SES bonus situation may effect the plans of executives in NASA. A reasonable possibility of receiving a bonus for a truly good job would probably help us to retain some executives. A limitation that places the bonus possibilities at 20 to 25 percent of the number of executives does not seem to provide much incentive for the majority of executives. In my opinion, it is preferable to return to the original 50 percent limitation or to a system with no limitation on the number of bonuses, but with a total dollar control instead.

I realize that the above suggestions are neither easy to adopt nor likely to produce enough of a change to satisfy all employees; however, it is my belief that a stable workforce, appropriate pay levels with distinctions between them, and the elimination of some of the ambiguity regarding employee benefits (including SES bonuses) will go a long way toward making the Government a more attractive employer.

Thank you for the opportunity to present my views on this matter. If I can be of fur-

ther assistance to you or the Subcommittee, please do not hesitate to call on me.

Sincerely,

A. M. LOVELACE,
Acting Administrator.

THE KEY TO A SUCCESSFUL ECONOMIC PROGRAM: WAGE-PRICE CONTROLS

HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mr. WEISS. Mr. Speaker, we have been fortunate recently to experience a slowing in the rate of inflation. This improvement, which I fear is only temporary, has been caused by factors unrelated to the President's economic program, which has yet to be adopted, no less applied in practice.

Yet interest rates continue at record high levels, and everyone—consumers, lenders, Wall Street, and workers—clearly expects inflation to resume its dizzying climb. Our "inflationary psychology" is unbroken. Budget-cutting of domestic programs with massive increases in defense expenditures will not break it. Only a stern measure will do the job: mandatory wage and price controls.

Syndicated columnist Joseph Kraft recognizes the need for controls, and makes an interesting case on their behalf in today's New York Daily News. I commend his article, which I have requested be reprinted below, to the careful attention of my colleagues.

WAGE-PRICE CONTROLS: THE BOTTOM ANTI-INFLATION LINE

WASHINGTON.—Dame Fortune is working for the Reagan administration in its fight against inflation. But the underlying surge of the economy is so powerful that luck isn't good enough.

So the administration, in a desperate move to squeeze the economy further, abandoned past positions on taxes and Social Security. It thereby fingered the missing piece in economic policy—a program to restrain prices and wages.

Like most pleasant surprises, the luck in the fight against inflation comes in threes. First, a mini-glut of oil has led to a drop in the price of a commodity that has previously worked to force up inflation. Food prices, another past source of inflationary pressures, have also moderated. Thirdly, the dollar has laterly appreciated against other currencies, thus cutting the cost of imported goods.

A marked easing off in the Consumer Price Index has been the most visible consequence. The CPI registered a rise of 12.6 percent in 1980. The April numbers show the CPI rising at an annual rate of only 4.8 percent.

But a crucial difference separates external causes of inflation—such as rises in commodity prices—from the underlying demand pull of the economy. Many signs suggest that, while the external thrusts have abated, the inner drive of the economy, the demand for goods and services and capital and labor, continues high.

A veritable explosion in the growth of the gross national product—up at a rate of 8.4 percent according to revised figures for the first quarter of this year—flashes one sign. Figures on hourly earnings—up at a rate of over 10 percent during the last six months—also express the strength of demand. Then there are the record interest rates.

Leading banks have recently raised the rate at which they lend to their best customers to over 20 percent. That means businessmen and consumers are prepared to pay enormous premiums for credit. Why?

Part of the reason is that demand for goods and services is brisk enough to justify the high rates. Another element is that borrowers believe that inflation, instead of falling, will go right on rising. That expectation is fed by professional analyses that find that the efforts of the Reagan administration to put a lid on federal spending have not been effective.

The administration, in these conditions, felt obliged to build confidence in its anti-inflationary effort by acting to make still further cuts in both the federal budget and consumer spending. In that spirit, it aired proposals to curtail some Social Security payments. It also announced a willingness to compromise with the Democrats on tax legislation now before the Congress.

Still, the economy can hardly be said to be out of danger. On the contrary, a basic defect in the administration's economic plan has been exposed by the latest developments. Even with good breaks, the administration has to squeeze very hard on interest rates and federal spending to hold back inflation. Experience—in 1966-67; in 1969-71; and 1974-75; and in 1979-80—suggests that tight money and tight budgets precipitate sharp recession before they really put a bite on inflation. With several companies—including Chrysler and some of the thrift institutions—in grave trouble, a tough anti-inflationary policy could stimulate something approaching panic in the weaker sectors of the economy.

For true safety, something else has to be added to the squeeze on interest and budgets. The something else is a mandatory program for restraining prices and wages. With such a program, commodity gluts and softness in the economy would be translated into cuts in prices and wages. Once those started to fall, inflation would be truly unwinding, not merely in suspense. The economy would at last come off the knife edge where, for the past decade, it has been so perilously positioned.●

QUALITIES NEEDED IN SERVICE ACADEMIES SELECTION

HON. ELLIOTT H. LEVITAS

OF GEORGIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mr. LEVITAS. Mr. Speaker, I recently received a letter from Cadet William Kent Nichols, whom I nominated to the Air Force Academy in 1977, and who is being graduated this year. In his letter he provides me with some of his reflections on criteria that should be kept in mind by all of us and our academy selection advisory committees when considering the young men and women we desire to nominate to service academies. I share Cadet Nichols' observations with my colleagues, because I believe they are particularly pertinent and instructive.

Cadet Nichols' comments follow:

• • • It seems to me that the most important step in acquiring a professional and superior officer corps is the initial selection of officer candidates. Officer candidates must have been seeded with the qualities of moral courage, loyalty, and duty to country in order to take advantage of the academy experience and ultimately to serve our country well. These qualities are not outdated in our modern forces, but, on the contrary, are even more necessary today than they have been in the past. I suspect that recognizing these qualities in a person is an almost impossible task, but I cannot overemphasize their importance.●

REPORTS OF U.S. TALKS WITH EL SALVADOR INSURGENT OPPOSITION

HON. LEE H. HAMILTON

OF INDIANA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mr. HAMILTON. Mr. Speaker, following reports in March 1981 that the United States accepted and then abandoned the idea of direct meetings with representatives of El Salvador's Democratic Revolutionary Front, I wrote the State Department to inquire about the accuracy of these reports and about U.S. policy on talking with the opposition.

Attached for Members' consideration are my letter to the Department and the State Department's reply. In its reply, the State Department clarifies its position against talks with the opposition and states U.S. policy on a negotiated settlement of the El Salvador conflict.

The correspondence follows:

APRIL 27, 1981.

Hon. ALEXANDER HAIG, Jr.,
Secretary of State,
Department of State,
Washington, D.C.

DEAR MR. SECRETARY: It was recently reported that several Salvadorans have indicated that the United States earlier this year first accepted, then abandoned, the idea of direct meetings with representatives of El Salvador's opposition insurgent forces.

I would like to know if such a meeting was ever agreed to in principle by either the State Department or the Embassy even if a firm date was never set. If the idea of talks with the Salvadoran representatives was pursued, why were they apparently so quickly abandoned?

I would appreciate knowing:

What the purpose of such a meeting was to be?

Who made the decision to try to meet with these Salvadoran leaders?

With whom were the representatives of El Salvador to meet?

Did Mexican or other third country national officials have any role in the arrangement for the meeting?

What contacts does the administration have today with the insurgent forces or their diplomatic representatives, either directly or through third parties?

What is our policy with regard to contacts with members of the Salvadoran leftist opposition?

Finally, what is current policy concerning a negotiated solution to the conflict in El Salvador and what role is the United States prepared to play in trying to reach such a solution?

I appreciate your consideration of these questions.

With best regards.

Sincerely yours,

LEE H. HAMILTON,
Chairman, Subcommittee on Europe and the Middle East.

DEPARTMENT OF STATE,
Washington, D.C., May 18, 1981.

Hon. LEE H. HAMILTON,
Chairman, Subcommittee on Europe and the Middle East, House of Representatives, Washington, D.C.

DEAR MR. CHAIRMAN: I am responding to your letter of April 27 to Secretary Haig concerning allegations that the United States accepted and then cancelled talks with representatives of the Salvadoran Democratic Revolutionary Front (FDR).

Since last December the FDR has sought to engage the United States in negotiations with them. For some months we have made clear both publicly and privately that the U.S. will not negotiate with the FDR and that the FDR should address itself to the Duarte Government if its purported search for peace is at all serious.

A number of third parties have contacted Department of State officials in Washington and overseas to broker contacts with the FDR. In each case we have told them of our policy that negotiations should be among the Salvadorans themselves. We have said that we do not see ourselves as a party to any negotiations. A press report alleging a planned meeting with U.S. representatives in Tegucigalpa in February is one of those instances of an approach made to us by an intermediary of the FDR. We never agreed to participate in such a meeting. The United States is not maintaining direct contacts with the FMLN-FDR at this time. We do not believe the benefits of such contacts would outweigh the disadvantages.

The United States position is that an election process is the best route to a peaceful resolution of the situation in El Salvador. If what is meant by "negotiation" or "negotiated settlement" is the establishment of a government in El Salvador by negotiating the sharing of power, we oppose it because it does not allow the people of El Salvador to choose their own leaders in a fair and open election. If, on the other hand, what is implied is that talks should be held among various Salvadoran groups to establish the conditions and procedures for elections, then we support such talks or negotiations.

We believe that the political process established by the Salvadoran government is the most likely way to peace. This process has already seen the granting of a general amnesty to all those who will put down their arms, the appointment of an electoral commission to develop the ground rules for the election of a constituent assembly in 1982, and an invitation to all political parties, regardless of ideology, to renounce violence and participate in the elections themselves and in the work on the provisions and guarantees that should be included in the electoral law.

We welcome the Salvadoran government's commitment to elections because we believe it points the way to a political solution of a conflict and does so on terms open to all Salvadorans. We think it provides a means whereby all groups who have been fighting with arms may test their strength before their own people in a non-violent, democratic manner.

Sincerely,

RICHARD FAIRBANKS,
Assistant Secretary for Congressional Relations.●

UNITED STATES-MEXICO PRISONER EXCHANGE TREATY IS A SUCCESS

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mr. STARK. Mr. Speaker, I would like to bring to the attention of my colleagues the following article from the Los Angeles Times on the United States-Mexico Prisoner Exchange Treaty.

As an original sponsor of the prisoner exchange legislation, I am very pleased by the success of the treaty. Not only have hundreds of Americans been spared from harsh and inhumane treatment in Mexico jails, but the United States-Mexico treaty has served as a model for agreements with many other countries. These agreements can only strengthen the cause of justice and international cooperation.

This program would never have gotten off the ground without the special help of Congressman DANTE FASCELL, Chairman CLEM ZABLOCKI, Congressman BEN GILMAN, and Congressman LARRY WINN. I want to offer my thanks—as well as that of hundreds of transferred Americans—to these gentleman for their interest, concern, responsibility, and legislative action.

The article follows:

[From the Los Angeles Times]

UNITED STATES-MEXICO EXCHANGE PROGRAM 3½ YEARS OLD—PRISONER TREATY A "QUIET SUCCESS"

(By Robert Montemayor)

It has been more than 3½ years since the first buses carrying Americans who had been imprisoned in Mexico pulled up to the Metropolitan Correctional Center in San Diego.

They waved and cheered from the bus windows, despite the fact that they were being transferred from one country's prison system right into another. But it was what they had fought for—even staged a hunger strike for—to force Mexican officials to send them home.

Those who arrived in San Diego in December, 1977, were the first of more than 500 Americans who have been swapped for about 275 Mexican prisoners under an unprecedented international prisoner exchange treaty.

SMOOTH-RUNNING ROUTINE

The constitutionality of the treaty had been questioned by many international attorneys concerned that the two countries' legal systems were incompatible.

Many predicted that the American prisoners—most of them in Mexican jails on drug-related charges—would successfully challenge their Mexican convictions as soon as they returned to the United States and make a quick exit to freedom.

Instead, the Mexican prisoner exchange operation has since spawned treaties with Canada, Turkey, Bolivia, Peru and Panama. Three court challenges to the treaty have been rejected at the appellate level.

U.S. officials who handle the exchange program say it has settled into a smooth-running routine that involves quietly swapping prisoners every three months. In fact, most of the transfers in 1980 and so far this year have involved more Mexicans than Americans.

"It's largely been a very quiet success after the first noisy transfers that we had with the first four plane-loads of 232 Americans transferred out and the 36 Mexicans transferred down," said Mike Abbell, director of the U.S. Office of International Affairs in Washington. D.C.

TALES OF MEXICO JAIL ABUSES

Abbell said there are now about 225 Americans in Mexican prisons, far fewer than the estimated 600 locked up there in 1976 when the treaty idea was first being considered.

In addition, there are about 350 Mexicans in the U.S. federal prison system, abut half of them eligible for transfer back to Mexico. The treaty excludes Mexicans who are in U.S. jails for immigration violations.

Abbell said the treaty has succeeded in achieving its two main goals—permitting prisoners to serve out their sentences in their own countries and easing the political friction between the United States and Mexico.

Long before the treaty was signed in November, 1976, stories of prisoner abuse in the Mexican jails were common. There were tales of Mexican guards using electric cattle prods on men's genitals, of women being raped, of families of prisoners being charged exorbitant legal fees and of the Mexican legal system trudging along at a snail's pace.

The reports from Mexico sparked a furious media and lobbying campaign in 1976 that eventually led to the exchange treaty.

Ironically, Abbell points out that "we've lost more Mexicans in U.S. prisons in terms of killings . . . than the reverse."

He said one Mexican was among the 33 killed in the two-day riot last year at the New Mexico State Penitentiary in Santa Fe.

Another Mexican was killed earlier this year, he said in a Kansas state prison" only days before he was supposed to be transferred to Mexico. Abbell said that the man was serving a term for murder

"Apparently the friends of whoever the Mexican killed were able to get him killed inside the Kansas prison," Abbell said. "I know of those two incidents specifically . . . but I don't know of any incidents in the past four or five years where an American has been killed in a Mexican prison."●

TO PROVIDE FOR AN ORDERLY PHASEOUT OF FEDERAL OPERATION OF THE PUBLIC HEALTH HOSPITAL AND CLINIC SYSTEM

HON. HENRY A. WAXMAN

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mr. WAXMAN. Mr. Speaker, I am today introducing H.R. 3768, a bill to provide a legislative framework for the phaseout of Federal control of the Public Health Service hospital and clinic system. The purpose of this measure is to give the communities, in which PHS hospitals or clinics are located, a reasonable opportunity to assume control of these facilities with a minumum of disruption to the patients, the staff, and the communities affected. The bill would assure that, by the end of fiscal year 1982, all 8 hospitals and 28 clinics would either have been transferred or closed.

The PHS hospital and clinic system has a long and distinguished history, dating back to 1798, when the Federal Government undertook the responsibility for providing free medical care to American merchant seamen. The hospital and clinic system was developed to discharge this responsibility. Over the years, additional beneficiary groups were recognized, so that today there are three basic categories: One, the primary beneficiaries, including American merchant seamen, active duty Coast Guard personnel, PHS Commissioned Corps officers, and National Oceanographic and Atmospheric Administration officers and crew; two, secondary beneficiaries—to whom services are provided on a space-available basis—including Department of Defense active duty personnel and dependents; and, three, community beneficiaries, often from medically underserved areas, to whom PHS hospitals provide a wide range of outpatient services. Among the latter group are Native Americans, Indochinese, Haitian, and Cuban refugees.

The system has gone through substantial structural changes as well. From a peak capacity of 30 hospitals during World War II, it has been consolidated into a national general medical and surgical network of 8 hospitals and 28 freestanding outpatient clinics, many of which replaced hospitals at which demand for inpatient services had declined. The eight hospitals, with a staff of approximately 4,500, are located in Baltimore, Boston, Nassau Bay, New Orleans, Norfolk, San Francisco, Seattle, and Staten Island. In fiscal year 1980, the PHS hospitals admitted 35,208 patients and processed 979,182 outpatients visits. The clinics, most of which act as referral centers for the hospitals, are located in Atlanta, Buffalo, Charleston, S.C., Chicago, Cincinnati, Cleveland, Detroit, Galveston, Honolulu, Houston, Jacksonville, Memphis, Mobile, New York City, Philadelphia, Pittsburgh, Port Arthur, Portland, Maine, Portland, Oreg., St. Louis, San Diego, San Juan, San Pedro, Savannah, Tampa, and Washington, D.C. In 1980, they handled 840,000 medical and dental visits.

On March 23, the Subcommittee on Health and the Environment held a joint oversight hearing with the Subcommittee on Merchant Marine at the Baltimore PHS Hospital. Testimony at the hearing, ably chaired by my colleague from Maryland, Ms. MIKULSKI, served to illustrate the important role that many of the PHS facilities play in their communities. In addition to providing quality medical, surgical, psychiatric, and alcohol detoxification services to statutory beneficiaries, the Baltimore hospital has also responded to the needs of the medically underserved neighborhoods within its service area. It is the site of a community health center funded under section 330 of the PHS Act that provided essential outpatient services to the low-income Hampden, Woodberry, and Remington neighborhoods. The hospital operates a Geriatric Day Treatment Center that provides intensive rehabilitation for the severely disabled elderly, helping to avoid costly and unnecessary institutionalization. It is also the site of the Cooperative Center for Occupational and Environmental Health which, in collaboration with the Johns Hopkins Schools of Public Health and Medicine, evaluates and treats work and environment related illnesses.

In my view, the efforts of the Baltimore hospital to respond to the wide range of medical and health needs of its community is the direction in which the Federal Government should be moving the PHS hospital and clinic system. Unfortunately, the administration has taken the position that the Federal Government should withdraw from operation of the PHS hospitals and clinics altogether by the end of this fiscal year. Legislation to accomplish this goal, H.R. 3223, has been introduced by my distinguished colleagues Mr. MADIGAN and Mr. BROYHILL.

In view of recent actions by the House Appropriations Committee relating to the fiscal year 1981 PHS hospital and clinic budget, and in view of the reconciliation instructions for fiscal year 1982 contained House Concurrent Resolution 115, it is apparent that the Federal Government will, as a matter, soon dispose of the system, whether or not the merchant seamen entitlement to free care is continued. I regret these decisions, for I believe that a careful community-by-community analysis of the impact of the facility closures would have led to a different result. Nonetheless, it is now clear that a precipitous and ill-advised systemwide closure is imminent. The only remaining question is whether local communities will be able to preserve any of the ongoing operations.

The purpose of the legislation I am introducing today is to create a reasonable opportunity for local communities, whether under public or private auspices, to take over hospitals or clinics that they feel provide needed health services. Under the administrations' proposal, local entities would have until July of this year to apply to assume sponsorship of a PHS hospital or clinic; by October 31, 1981, all of the PHS facilities would either be transferred or closed. This time frame

is simply unrealistic. Neither public officials nor private individuals could possibly resolve the numerous financial, administrative, legal, and logistical problems needed to assure a smooth transition from Federal to local operation by the end of October. I am concerned that many potentially interested parties, faced with this impractical timetable, will be deterred from taking control, and that a valuable community resource will be lost.

H.R. 3768 attempts to accommodate both the needs of potential local sponsors and Federal budgetary considerations. It would give local entities until September 1, 1981, to apply for sponsorship of a hospital or clinic. On the basis of these applications, the Secretary of the Department of Health and Human Services would divide the facilities into groups: Those to be closed, and those to be transferred to local control. The facilities on the closure track would cease operations by October 31, 1981. The facilities on the transfer track would be given until September 30, 1982, to work out the transition to local sponsorship. The bill would give the Secretary broad authority, subject, of course, to amounts available through appropriations, to make the financial, administrative, legal, and personnel arrangements necessary to effect an orderly transfer.

Unlike H.R. 3223, my bill does not propose elimination of the merchant seamen entitlement to free medical care. In my view, initial consideration of this issue would more appropriately lie with the Committee on Merchant Marine and Fisheries, to whom reconciliation instructions were also addressed.

I urge my colleagues to support this reasonable proposal.●

BELLAIRE POLICE CHIEF RETIRES AFTER 31 YEARS SERVICE

HON. DOUGLAS APPLEGATE

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mr. APPLEGATE. Mr. Speaker, I would like to take this opportunity to bring to the attention of the House of Representatives, a constituent of mine, Mr. Anthony (Red) Giannetta. On June 1, Mr. Giannetta retired from his position as of chief of police in Bellaire, Ohio, after more than 31 years of service.

Mr. Giannetta's impressive public record began with his 3 years of service in the U.S. Marine Corps where he was a gun captain in Guam. He later served as a Marine honor guard in Washington, D.C., where he rose to the rank of gunnery sergeant.

In 1949 Mr. Giannetta joined the Bellaire police force and was appointed captain in 1959. He became chief in 1975.

We are all grateful to Mr. Giannetta for his dedication to public service and are very proud of his achievements. His outstanding leadership abilities have provided an excellent example for both the police force and the citizens alike. The Bellaire community will remain deeply indebted to Mr. Giannetta for his enriching contributions.●

VETERANS—SPECIAL INDIVIDUALS

HON. JOHN J. LaFALCE

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mr. LaFALCE. Mr. Speaker, we have before us today six bills addressing the needs of veterans. I urge my colleagues to support these bills, thereby taking positive steps to help the veteran population of our Nation.

At a time when Federal support for many programs is being reduced, my colleagues on the Veterans' Affairs Committee have, fortunately, not lost sight of the special needs of veterans—both young and not-so-young. While expenditures should not be an overriding concern in our consideration of such important issues as those affecting veterans and their families, the fact remains that most veterans are taxpayers and want to see Washington make good use of their hard-earned money. Both veterans and the fiscally prudent have been well taken care of in the package of bills presented by the Veterans' Affairs Committee.

For the most part, the veterans' legislation we are voting on today exemplifies what we as legislators can do for people about whom we are truly concerned. The Veterans' Affairs Committee is to be commended for its diligence and spirit of cooperation in formulating the measures before us today.

The Veterans Health Care Act, H.R. 3499, is perhaps the single most important piece of legislation we are considering this afternoon. Among other things, this landmark bill recognizes the dual problems of agent orange and psychological readjustment as pervasive among the younger veteran population. By allowing veterans to receive hospital and nursing home care for agent orange-related illnesses, we are at long last taking a positive step on behalf of thousands of very frightened and angry young men and their families. Similarly, a 3-year extension of the outreach program shows, in real terms, our sensitivity to the ongoing needs of the individuals who fought in an unpopular war during one of our Nation's most divisive periods.

Our commitment to veterans should not be taken any less seriously during time of fiscal restraint. The Health Care Act seeks to insure the availability of hospital and nursing home care to sick and elderly vets by expanding the number of beds in the VA health care system beyond the levels advocated by the Reagan administration. Vets of all ages take great pride and comfort in their hospital, clinic, and nursing home system. It is for them from a grateful nation. Until, and unless, we can provide a better system, we must maintain the VA system and levels of care.

We also have a chance to support today another very significant measure and one which, like the health care bill, offers solutions to issues we have debated for many years. I am referring to H.R. 3423, the Veterans Training and Business Loan Act of 1981.

Underemployment and unemployment among Vietnam veterans is well known by anyone who pays even the most cursory attention to the issue. The 10-year time frame we established to help get these young men on an even keel with their nonveterans counterparts simply has not provided ample opportunity for many to use their benefits. H.R. 3423 extends on-the-job training and vocational education for qualified veterans for another 2 years. This is a wise move, Mr. Speaker, because 2 more years can make a world of difference to a vet on the threshold of independence and self-sufficiency.

Many soldiers return home to fulfill their dreams of self-employment, only to find their American dream squelched by tight startup capital and scarce technical assistance and guidance. While the availability of funds for all small businessmen is limited, it is more limited now than at any time since the end of the Vietnam war. The Training and Business Loan Act establishes a business loan program in the Veterans' Administration, available to all vets with at least a 30-percent service-connected disability and Vietnam era vets, thereby targeting help to veterans and hopefully closing the gap in assistance of this nature available to them as a special group in need of some specialized attention.

Mr. Speaker, it is important that we pass these measures which will assist those who have given so much to all of us.●

JOHN A. FICKEN

HON. IKE SKELTON

OF MISSOURI

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mr. SKELTON. Mr. Speaker, recently, one of Missouri's outstanding leaders in agriculture met an untimely death in a tractor accident. John A.

Ficken was a highly respected farmer from Ionia, Mo., and was known throughout the State for his leadership in many agricultural organizations. He was an officer with the Missouri State Fair, past president of the Missouri Pork Producers Association, past president of the Benton County Extension Council, and was most active in the Missouri Farm Bureau Association. He served as a member of the U.S. Air Force from 1951 to 1955. All who knew him realized the value of his friendship and witnessed his work for the betterment of agriculture in our State. He will be truly missed. His wife, four sons, and two daughters survive.●

CARDINAL WYSZYNSKI

HON. SAM GEJDENSON

OF CONNECTICUT

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mr. GEJDENSON. Mr. Speaker, The recent passing of Cardinal Wyszynski is a cause for great sorrow not only in Poland but worldwide among those who recognized the leadership he provided the Polish people as the spiritual leader of that nation's overwhelmingly Roman Catholic population. Cardinal Wyszynski was immensely respected for his wisdom, patience, and above all for his extraordinary skill in mediating potential conflict in his troubled country. Many examples come to mind of Cardinal Wyszynski's ability to avert open confrontation: in 1956 when he called for national unity and calm in the face of nationwide unrest, thereby averting a Soviet invasion, and again in 1980 when he acted as mediator in meetings with the head of the Communist Party Stanislaw Kania and Solidarity leader Lech Walesa.

Cardinal Wyszynski campaigned vigorously throughout his life for social and political rights for his countrymen. His extensive writings on labor and rural problems led his followers to nickname him the "workerpriest." He was an underground army chaplain in the anit-Nazi resistance in World War II before being consecrated as the Bishop of Lublin in 1946. Only 2½ years later, he was named Archbishop of Gniezno and Warsaw by Pope Pius XII, thereby becoming the Primate of Poland. Cardinal Wyszynski's lifelong labor to unite and strengthen Poland earned him the love of his people and the respect of us all.●

CO-OP AND CONDOMINIUM CONVERSION—A NATIONAL DILEMMA

HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mr. WEISS. Mr. Speaker, across the country, tenants are being swept up in the tide of co-op and condominium conversion. In New York City a trend that began in the early seventies in wealthier neighborhoods has suddenly hit like a tidal wave. On the West Side of Manhattan and in Riverdale, the district which I represent, we are witnessing a phenomenon so remarkable that it may make rental apartments extinct.

The rate of co-op conversion must be viewed with the local vacancy rate. In New York City we have a housing shortage of emergency proportions. There is a vacancy rate of about 3 percent for all of New York City—probably less than 1 percent in Manhattan. This, plus the fact that most New Yorkers are already paying 30 to 45 percent of their income for rent, dramatizes the dilemma they face in seeking decent, affordable shelter. As the number of rental units are reduced through conversions, the housing crisis becomes more acute because of greater demand from increases in divorced, single, and elderly households.

The critical shortage of housing has intensified speculation in real estate, driven up co-op prices, and accelerated the trend toward conversions. Property owners are eager to capitalize on scarcity, a booming market, and the promise of huge profits.

Added to this pressure cooker atmosphere is a U.S. Senator from New York who is actively working in Congress against rent control and rent stabilization laws.

While there is an increasing tendency toward conversion in less affluent neighborhoods and in other boroughs besides Manhattan, past experience indicates that conversion has taken place primarily in affluent areas where buildings are extremely profitable and are not a result of a distressed real estate market. A recent HUD report specifically notes that rent control is not a significant contributing factor to conversion. Cities such as Chicago and Denver, where there is no form of rent control, have had an overwhelming number of conversions.

Urban homeownership clearly has positive benefits to a community. It has created a new group of owners with a sense of community and a stake in their neighborhoods. As the value of an apartment follows the inflationary spiral year after year, buying a co-op has turned out for many to be an excellent financial investment. As people move increasingly into higher tax brackets where deductions on mortgage interest and real estate taxes provide a greater benefit, ownership looks better and better.

In neighborhoods such as Clinton, in my district, which has experienced significant housing abandonment, in-rem buildings have become resource for low- and moderate-income tenants who are offered a change to purchase apartments at modest cost and who can improve them through sweat, equity, and Federal community development money.

However, the positive aspects of co-op ownership must be balanced with the tremendous disadvantages that are also attendent. As the process takes hold of a neighborhood, one person's neighborhood stabilization becomes another person's gentrification. Many do not have the capital to purchase their apartments. In addition, high interest rates prevailing in the lending markets mean carrying charges that are too high for middle- and low-income people.

For those who cannot affort to buy, there is the emotional and financial trauma of being uprooted from their home and their community and the difficulty of finding another apartment. The HUD study has shown that a large portion of tenants who purchased their apartments preferred to rent; many bought because they were afraid that in an increasingly tight housing market there would be no place else to move. And most tenants who are forced to move because they cannot afford to buy find themselves paying higher rents for their new quarters. Many who do buy, the HUD study tells us, face enormous increases in their monthly housing budget—as much as 36 percent for insiders and 62 percent for outsiders.

Although New York has some of the most stringent controls in the country, the tenant in the conversion process is still at a decided disadvantage. In an eviction plan, a minority of tenants—35 percent—determine the fate of the majority. In a noneviction plan, tenants have even less power, since only 15 percent of the shares need to be sold and not necessarily to the tenants in occupancy. This inequity makes negotiating for the price of the apartment and the reserve fund heavily weighted in favor of the landlord.

As this Congress seeks to examine the conversion process, we must bear in mind that co-op conversion does not address our most critical housing need—the need to increase the supply of affordable housing. We must seek ways of accommodating and broadening the opportunities for those who seek homeownership while providing safeguards for those who either do not or cannot afford to do so.●

IT TOLLS FOR THEE

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mr. STARK. Mr. Speaker, I would like to bring to the attention of my colleagues the following New York Times article about human rights violations around the world.

As Americans, we should care about human rights violations wherever they occur—in Communist countries, Socialist countries, and capitalist countries. If human rights mean anything, they must apply to citizens of friendly and unfriendly governments alike.

IT TOLLS FOR THEE

(By Anthony Lewis)

BOSTON, May 13.—This is a column about two physicists, or more accurately about two human beings who happen to be physicists. They are from countries far apart in miles and in politics. They do not know each other. What they have in common, apart from their science, is their experience of that contemporary phenomenon: the terrorism of the state.

Vladimir Kislik comes from Kiev, in the Soviet Union. He is a Jew, and in 1973 he applied for an exist visa to emigrate to Israel. His wife and son were allowed to go. He was refused permission—and entered a nightmare life.

Mr. Kislik immediately lost his position at the Institute of Physics of the Ukranian Academy of Sciences. He took menial jobs and was fired from them. He was arrested for vagrancy. Foreign scientists who visited him at home were assaulted by ruffians on the streeet.

Last July, during the Olympics, he was put in jail for 15 days. There he had a heart attack. He was sent to a psychiatric hospital, where he was put in a ward with dangerous psychotics. Friends got word to the outside world, and groups in France and the United States sent strong protests to Soviet authorities. Mr. Kislik was released.

Recently he was arrested again. According to reports from Kiev, he is about to go on trial on a charge of "hooliganism." That carries a sentence of up to five years in a labor camp.

Elena Sevilla is a physicist from Argentina. She had a baby by Caesarean section in November 1975. Five days later she was arrested in her hospital bed. No charge was made, then or afterward. In January 1976, an Argentine judge ordered her released. But the authorities did not let her go, instead placing her under indefinite detention without charge. Her child was given to her parents. She was put under a strict prison regimen: allowed almost nothing to read, kept in her cell 23 hours a day.

There were protests from groups abroad, just as in Mr. Kislik's case: from the American Physical Society, the National Academy of Sciences, Amnesty International. Elena Sevilla was luckier than Mr. Kislik. After three years she was released and allowed to leave the country. She is now studying at Cornell.

Of course these two are not the only scientists who have been victims of their governments. In the Soviet Union, Anatoly Shcharansky is wasting away in solitary prison confinement, reportedly near death. Yuri Orlov is serving a seven-year sentence in a labor camp. Andrei Sakharov is in internal exile.

The scientist victims in Argentina are less familiar to us, but their stories are no less chilling. Federico Eduardo Alvarez Rojas, a well-know physicist, and his wife Hilda Graciela were seized by armed men in 1976 in front of their three young children; though once reported to have been seen in a prison, they have never been officially accounted for. American physicists know of at least 16 other of their Argentine colleagues who have similarly "disappeared."

The stories of Vladimir Kislik and Elena Sevilla and the others make a simple but fundamental point: the indivisibility of concern for humanity. State brutality and terrorism are evils—absolute evils—whether practiced in one corner of the world or another, one political system or another.

John Donne made the point to us as individuals 350 years ago. The passage best remembered is: "Never send to know for whom the bell tolls; it tolls for thee." But he also put it another way: "Any man's death diminishes me, because I am involved in mankind."

In today's world the point is not just individual or spiritual but political. If we close our eyes to official brutality here or there—in the Soviet Union or Argentina, in Uganda or Cambodia—we risk our own civilization. Scientists have tended to understand that, supporting their threatened colleagues everywhere. Governments are another question.

The question is especially acute now, as the new American Administration proposes what amounts to a double standard for human rights. It would focus attention on the cruelties of Communist governments and wink at the horrors done by "friendly" right-wing regimes.

Ironically, victims of Soviet repression—at least some of the more prominent among them—do not seem to want a one-dimensional American policy. Pavel Litvinov, a dissident who got out, said when I asked him that this attention naturally centered on events in the Soviet Bloc, "but I believe very strongly in the principle of human rights everywhere. I care about Argentina."

Five years ago this week some brave Soviet citizens set up a Moscow group to monitor observance of the rights supposedly gained in the Helsinki agreements. Most are now in prison or forced exile. Their spokesman in America, Ludmilla Alexeyeva, said: "The United States has achieved respectability and credibility in speaking out publicly and forcefully against human rights violations around the world. A continuation of this universal policy is essential to the human rights movement in the Soviet Union."●

INTRODUCTION OF LEGISLATION TO PROTECT AMERICA FROM THE IMPORTATION OF INFECTED AND DISEASED PLANT AND ANIMAL PRODUCTS

HON. ANDY IRELAND

OF FLORIDA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mr. IRELAND. Mr. Speaker, today, on behalf of myself and Congressmen GIBBONS and FRENZEL, I am introducing legislation to make effective the laws against the importation of possibly infected and diseased plant and animal material.

At present, persons entering the United States are supposed to report all animal and plant materials that they are carrying into the United States. For example, the Customs Declaration Form No. 6059 distributed to persons entering the United States asks the following questions:

Are you or anyone in your party carrying any fruits, plants, meats, or plant or animal products, birds, snails, or other live organisms of any kind?

Have you or anyone in your party been on a farm or ranch outside the USA in the last thirty days?

Of course, any of us can see the inadequacy of such questions for foreign nationals who may have little or no English, or who come from predominantly agricultural nations. Most would answer "yes" to the second part without any sense of the importance of the answer to U.S. argiculture.

Parenthetically, I would endorse the points made by Mr. GIBBONS in his excellent letter of May 27, 1981, to the Honorable William Archey, Acting Commissioner of U.S. Customs, suggesting ways in which incoming passengers, both United States and foreign, can be alerted to the dangers of bringing in contraband, and warned of the financial consequences to themselves should they do so.

In some cases, these materials, including associated items such as soils and serums, are prohibited or must be quarantined, because they may be infected or carrying exotic animal and plant diseases. These diseases could cause hundreds of millions and even billions of dollars worth of damage to American agriculture, and thus, to American consumers.

For example, it is estimated that if foot and mouth disease were permitted to spread to the United States and become established here, it could cost close to $12 billion to contain it. The eradication of African swine fever is estimated also in the billions of dollars. There was an outbreak of Exotic Newcastle disease of poultry as a result of entry of infected products and in the period 1971–72 it cost close to $56 million to eradicate it in California. The entry of dangerous fruit flies, such as the Mediterranean fruit fly, has become a particular problem in California at the present time.

These are but a few examples of the kind of situations which might wreak havoc to American agriculture.

And I must note that we in Florida have recently had a discussion of some magnitude with the Department of Agriculture on how we can best protect ourselves from the Mediterranean fruit fly without breaking the interstate commerce laws. We are not just concerned about H.R. 2540, in short,

and will continue to monitor any situation which appears of interest.

A recent APHIS working paper makes clear the actual risks involved in the matter at hand.

It is important to emphasize that about 3 percent of all travelers carry prohibited contraband. First quarter results of an ongoing annual survey being conducted on 4 percent of all travelers entering five major international airports show that this contraband is discovered nearly equally as often in hand-carried and checked baggage. Less than 50 percent of this material is declared by travelers either on their declaration form or orally! It only takes one infested orange or one small virus-infected piece of meat to start an infestation or outbreak which could cost millions of dollars to control. Infestations and outbreaks are too costly to take undue risks.

U.S. agricultural production is, it need hardly be stated, the greatest in the world, approaching a figure of $500 billion annually and contributing much of our balance of payments. In fiscal year 1980, for example, exports of U.S. agricultural commodities exceeded $40 billion. Accordingly, it is of critical importance that the United States be protected against the introduction of agricultural contraband.

Unfortunately, the present laws governing the entry of these animal and plant products are totally ineffective. As USDA noted in a 1979 memo,

The port-of-entry inspection of incoming travelers' baggage routinely discloses large quantities of prohibited plant and animal products and materials. Experienced inspectors estimate that deliberate concealment is involved in about one-fourth of the interceptions of prohibited agricultural materials. This presents a very real and constant threat for the introduction of destructive plant and animal diseases and pests from foreign countries.

Under title 7 of the United States Code, there are criminal penalties for the violation of the laws administered by the Animal and Plant Health Inspection Service. These criminal penalties are almost never enforced because of the heavy burden of work already before the courts and the Department of Justice. In the last Congress, legislation (S. 2956) was introduced at the request of the USDA to provide for a system of believable and enforceable civil penalties for the violation of APHIS laws. That bill was not enacted, and so far this year, no similar legislation has been submitted on behalf of the administration.

Under title 19, failure to declare an article to Customs, either in writing or orally if asked, results in the forefeiture of the item and makes the importer liable to a penalty equal to the value of the article. This provision of customs law is simply no deterrent. What is the value of an orange or a half eaten pork sandwich, or a partially cooked sausage? Customs, will take away such items if they are found, but rarely if ever bothers to assess a penalty of 20 cents or $1—the value of the food item, since the paperwork involved costs nearly $8. Yet that innocent looking orange or half a sandwich can be carrying diseases, which if established in the United States will annihilate orchards and herds throughout whole States and will cost incredible sums of money to eradicate.

The need to report the importation of animal and plant materials must be made more vivid to the traveling public. Violations of the laws to report such items must carry a credible penalty which will cause people not to bring in such items or to report such items to the customs officers and APHIS personnel at our Nation's ports of entry.

To put some teeth into the law requiring the reporting of such items, our bill amends title 19, United States Code, section 497 to provide a penalty of up to $50 for failure to report articles.

Mr. GIBBONS, Mr. FRENZEL, and I feel that such an amount, while seemingly slight in the face of the massive damage which unauthorized items can cause, is a practical amount which can and will be enforced. I would urge the House to see this as a sort of traffic ticket which will deter would-be offenders, when properly advertised by the airlines and the Customs, with the full cooperation of the individual airport authorities.

For those who feel we should impose massive potential penalties, I can only ask who they think will really be eager to enforce such penalties against the typical offender? Let us get something which works, rather than something which only sounds tough.

I do not delude myself that we will actually eradicate the problem through this legislation. But, it is certain that without this legislation, the cutbacks in Customs and other inspection agencies will eventually produce a deterioration in a situation which is already tenuous, at best.

I welcome the gentleman from Florida's initiative in cosponsoring this important legislation with me, and his commitment to hold hearings on it before his Subcommittee on Trade of the Committee on Ways and Means as quickly as possible. The gentleman from Minnesota's support is particularly welcomed, as it shows that the concern here is truly national, rather than regional.

We each appreciate the importance of moving this bill quickly, since the tests of speeded-up Customs procedures will be taking place at Miami International Airport, among others. At present, the law lacks any realistic teeth in the face of violations.

For these tests to be truly meaningful, we need to provide teeth just as soon as we can. This legislation provides those teeth, and I think it is a bite which will take.

In conclusion, I of course state that we stand prepared to coordinate our efforts on behalf of this legislation with any actions the Agriculture Committee may want to take to devise an enforceable and believable system of civil penalties for the violation of APHIS laws.

H.R. 3759

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 497 of the Tariff Act of 1930 (19 U.S.C. 1497) is amended by striking out the period at the end thereof and inserting in lieu thereof the following: "; except that, if the value of such article, including, but not limited to, any animal or plant article, is less than $50, such person shall be liable to a penalty of $50, in addition to the forfeiture of such article. In the case of articles valued at less than $50, the Customs Service shall provide for a system of immediate appeal and total or partial mitigation of penalty to address cases involving issues such as hardship or misunderstanding due to language barriers.".●

INTRODUCING H.R. 3748

HON. PETER W. RODINO

OF NEW JERSEY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mr. RODINO. Mr. Speaker, today, I am introducing H.R. 3748, a bill to amend certain titles of the United States Code, to codify recent law, and to improve the code. This bill will amend titles 10, 14, 37, and 38, United States Code, that have been enacted into positive law, to reflect changes in the substance of those titles by laws or reorganization plans that did not specifically amend those titles. The bill makes no change in the substance of existing law. This bill was prepared by the Office of the Law Revision Counsel of the House of Representatives and submitted to the Committee on the Judiciary of the House under section 285b of title 2, United States Code.●

VIETNAM'S COMMUNIST RULERS HAVE THEIR TROUBLES

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mr. MICHEL. Mr. Speaker, recent news reports state that the Communist rulers of Vietnam are having troubles these days. They told the world that once they took over, all forms of corruption in Saigon would cease—such does not appear to be the case. Their admirers in the United States told us that the Vietnamese Communists were not beholden to the Soviet Union. But the facts show that Viet-

nam is a Soviet proxy in the Southeast Asia.

I recall the strident voices denouncing American aid to the former Government of South Vietnam. Where are those same voices today now that it is undeniable that the Communist government of Vietnam is infinitely worse, in every way, than any of the governments of South Vietnam?

At this point I wish to insert in the record: "Now Vietnam Fights for a Soviet Indochina" from the Wall Street Journal, June 1, 1981, and "Vietnam Admits Losing Battle To Control Vice" from the London Daily Telegraph, republished in the Baltimore Sun, May 30, 1981.

[From the Wall Street Journal, June 1, 1981]

NOW VIETNAM FIGHTS FOR A SOVIET INDOCHINA

(By S. Rajaratnam)

Whoever wins the war in Cambodia, it is now not going to be the Vietnamese because, in my view, they have lost their war for a Vietnamese Cambodia to the Soviets. Out of the ashes of the old war now rises the new struggle for a Soviet-dominated Cambodia and eventually an Indochina presided over by the Soviets. The Vietnamese are now a subsidiary factor and to continue to deal with the Cambodian issue as primarily a Vietnamese problem is to blind ourselves to what has always been the central issue—the Soviet drive for pre-eminence in Southeast Asia.

Soviet objectives are not physical occupation of Southeast Asia but the forced conversion of this prosperous and crucial region into a proxy for their global politics.

When in December 1978 the Vietnamese invaded Cambodia the Soviets may have believed that a Vietnamese-dominated Indochina could be an asset in the power game. They may also have believed that the war would be over in a few weeks and the conquest would be accepted by the world with the resignation it received the occupation of neutral Laos.

By conceding backward Laos and Cambodia to Vietnamese imperial greed they would be winkling the Vietnamese out of their profitable and long-standing neutrality in the Sino-Soviet conflict. Laos and Cambodia were peanuts compared with the pearls and diamonds the Soviets hoped to garner in the rest of Southeast Asia with the cannon fodder their grateful ally could provide.

After nearly two and a half years things have not worked out that way. An army which allegedly trounced the mighty French and Americans is being denied victory by the not very impressive Khmer Rouge guerrillas. Two dry weather offensives have petered out and the Vietnamese are now contemplating the use of their air force, including F-5 jets, against increasing guerrilla harassment.

Soon non-Khmer Rouge guerrillas may join in the harassment.

The Association of Southeast Asian or Asean states instead of, as expected, being cowed into seeking accommodation with the mighty Vietnamese launched a diplomatic counter offensive which has successfully isolated them in the United Nations and in the non-aligned world as well. For both the Soviets and the Vietnamese this was something of a shock. They believed that a Vietnam which had been an object of universal adulation for some 30 years could have easily swung the Third World into endorsing its war of "liberation" in Cambodia.

Instead it was thumbs down. The disappointment was all the greater for the Soviet Union because it had hoped that "heroic" Vietnam would entice new supporters from the Third World to the Soviet side. Instead the only friends the Vietnamese have today are those that the Soviet Union can browbeat into supporting Vietnam's unwinnable colonial war in Cambodia. Some of the odium Vietnam has attracted is also rubbing off on the Soviets.

An even greater disappointment with the Vietnamese is that they are turning out to be an intolerable economic burden as well. The cost of underwriting what was expected to be a short war has now doubled to an estimated $6 million a day.

The Soviets also are saddled with the additional burden of propping up a Vietnamese economy which stubbornly proceeds from worse to worst. Far from being grateful, the Vietnamese have publicly voiced their displeasure over Soviet stinginess. In an interview with the Far Eastern Economic Review of Feb. 28, the chairman of the Vietnamese State Planning Commission complained about the 150 percent increase in the price of Soviet oil. "In selling to Vietnam," he reminded the Russians, "the Soviets should give some element of aid." He also expressed disappointment that the Soviets had yet to make any financial commitment to Vietnam's Five-Year Plan.

The propaganda about a Vietnamese economic miracle in Cambodia (which they seem incapable of achieving at home) has now been exposed by the Soviets themselves. On April 16, a Soviet embassy spokesman in Phnom Penh announced that, in view of the impending termination of international aid, the Soviets had started laying the groundwork for the reconstruction of Cambodian economy. "We are now preparing the base," he announced and added ominously: "It is the beginning."

A beginning implies the end of something and that something is a Vietnamese Cambodia. I do not see the Soviets pouring millions of rubles into Cambodia and then handling it back to the Vietnamese. Since the Soviets seem to be financing everything—the war in Cambodia and the domestic economies of the Indochinese states—they might as well administer Indochina themselves and, hopefully, run it properly. The Vietnamese role in Cambodia, from now on, will be to ward off guerrillas until such time as the Soviets can train sufficient Cambodians to take over this responsibility themselves.

I believe that as in Cambodia so too in Laos the Vietnamese cormorant will eventually be forced to disgorge its unswallowable prey to its keeper. In the early days the Soviets deferred to the fantasy of a Vietnamese Indochina by dealing with Laos and Cambodia through Hanoi. Now they are dealing directly with the leaders of Laos and Cambodia who will now be beholden to the Soviets.

From the Soviet point of view the quiet dismantling of a Vietnamese empire is sound strategy. They have discovered what should have been obvious even in 1978. Vietnamese might rested on borrowed strength. It was Soviet and Chinese aid coupled with collapse of political will in the United States which made possible Vietnam's glorious victory.

The Vietnamese will be most unhappy that inexplicably they should now be fighting for a Soviet Indochina and in a moment of unthinking euphoria they entered into an alliance with the Soviets to fight the "Chinese menace." The Soviets can at any time bring them to heel by offering them the option of facing Chinese vengeance on their own.

So after nearly two and a half years of fighting the Vietnamese have lost Cambodia and are left with the choice of either accepting Soviet servitude or facing Chinese vengeance.

There is, fortunately, a third choice and that is the solution offered by the Asean states and endorsed by the United Nations. It is a solution which does not impinge on Vietnamese honor or threaten their independence and which offers them protection against Chinese, Soviet, or any other menace.

It requires first the withdrawal of Vietnamese troops from Cambodia. Now that a Vietnamese Cambodia is not in the cards, the Vietnamese should have no difficulty complying gracefully with something which is inevitable anyway.

The second requirement is to offer the people of Cambodia, under United Nations supervision, a chance to choose the form of government they want.

In my view, unless we are totally mistaken about the Khmer Rouge record, it is most unlikely the Cambodia people will opt for its return. The leadership they are likely to endorse is one which will free itself of contending power blocs and which will be ready to live in fruitful co-operation with its Southeast Asian neighbors and in particular with a peaceful Vietnam.

Such a Vietnam can confidently look forward to aid and assistance from Asean, whose interest it is to see a prosperous and truly independent Vietnam. Moreover a Southeast Asia of over 350 million people, working together, can develop fruitful relations with great powers without becomming their proxies and victims as the Vietnamese have now become.

But so long as Vietnam insists that things are irreversible then Asean has no choice but to oppose Vietnam simply because its present policy endangers not only Vietnam but also the whole of Southeast Asia by converting it into a cockpit for new imperial wars. After all it was not Asean but Vietnam which re-introduced great power rivalry into a region which Western imperialism had vacated.

That Vietnam has become the first victims of this disastrous policy is a justification for re-examining it.

[From the London Daily Telegraph, May 30, 1981]

VIETNAM ADMITS LOSING BATTLE TO CONTROL VICE

BANGKOK, THAILAND.—Six years after it took over South Vietnam, the Communist regime has admitted that vice is as popular and rampant as ever in Ho Chi Minh City, formerly Saigon.

The current issue of the regime's official youth magazine Vanguard described an "investigative report" by one of its correspondents last month. He said a tour of coffee shops turned up entertainment ranging from decadent songs to rock 'n' roll dancing.

At one of the cafes, he wrote, pornographic movies were a special after-midnight feature for regular customers.

The magazine report said that police raids on 42 coffee shops late last month resulted in seizure of "hundreds of tapes of decadent

music, along with almost 50 reels of movies made in the United States, Taiwan, Western Europe and Thailand."

Three coffee house owners were charged at a people's court hearing, the article said. It gave no details of charges or results of the tribunal.

The investigative reporter appeared outraged that songs by popular singers of the pre-1975 period are available in Ho Chi Minh City, and indicated that possession of such tapes and records is illegal under the new regime.

"The latest songs written by Pham Duy, Hung Cuong and other scoundrels who have fled abroad, which have been presented by the Voice of America, are also available in the coffee houses," he wrote.

He said that in one coffee house he visited, young people appeared "entranced by a maudlin tune of a popular song dating from the puppet regime and sung by a female singer."

The Communist authorities have been trying to clean up "wicked Saigon" since April 30, 1975, the day Hanoi's army entered the city. But authorities have admitted that black marketeering, underground capitalist enterprises, prostitution and violent crime have continued at an alarming pace.●

IMPROVING THE QUALITY OF LIFE IN THE GENEVA LAKE AREA

HON. LES ASPIN

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mr. ASPIN. Mr. Speaker, there have been some developments in projects in the Lake Geneva area of my district since I last reported on them.

In 1979, I agreed to help the Geneva Lake Area Chamber of Commerce look for funds to rehab the old Chicago & Northwestern depot in Lake Geneva. We hoped the old depot might be used as a tourist center and a central location for buses, taxis, and trains.

While going from agency to agency looking for funds, I heard over and over that the depot would be an ideal project for a local development corporation. These are generally nonprofit groups to attract new industry or revitalize old housing and industry in a community. Federal and State funds can flow through an LDC to help private homeowners and business people.

With this in mind, I contacted Wisconsin cities that had LDC's and drafted the articles of incorporation for a Geneva Lake development corporation.

The details are being worked out now by Mayor Dick Folman and chamber of commerce members. The paperwork will soon go to the State for final approval and Lake Geneva will then have its own LDC helping improve the quality of life in the Geneva Lake area.●

SOCIAL SECURITY REFORM: AN EDITORIAL VIEWPOINT

HON. DOUGLAS K. BEREUTER

OF NEBRASKA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mr. BEREUTER. Mr. Speaker, as the debate continues over changes to be made in the social security system, I believe we must keep a historical perspective—we must remember why the system was established and how it has changed over the last 50 years. I, therefore, recommend to my colleagues the following syndicated column which ran in the Falls City Journal. I also agree strongly with the editorial's conclusion that the ongoing debate is just the beginning of a long overdue reconsideration of the social security system. The text of the column follows:

[From the Falls City Journal, May 19, 1981]

VIEWPOINT—AN END TO SOCIAL INSECURITY?

(By Don Graff)

In the beginning, the intention was relatively modest.

The idea was to provide some insurance for the elderly working population against unanticipated financial need. "Working" was defined in the most basic sense of the word, meaning jobholders in industry and commerce, no high-salaried professionals.

And even so coverage was far from comprehensive. Initially no more than 60 percent of the work force participated and benefits were limited, supplementing an individual's own savings and whatever might be forthcoming from other sources. Participants financed the program through deductions from their paychecks. But they were not thereby investing in an annuity, paying in money that they would be entitled to withdraw later.

The idea was not to establish a national pension system. The program was structured not as a cumulative trust fund but as a simple transfer mechanism. Money paid in by the participating portion of the active work force was immediately paid out to the eligible portion of the retired population.

That, briefly was Social Security as conceived and instituted in the Depression '30s. That is not Social Security in the inflationary '80s and to a considerable extent because the program has changed so much in the last half century it is in trouble. Again.

So now we have President Reagan and Congress revving up for the third rescue operation in approximately as many years. What makes this time around different is that for the first time retrenchment is being seriously addressed as essential to keeping the system solvent.

The administration proposals—principally to set back annual cost-of-living increases from July to October at a savings of billions a year, discourage early retirement, revise the formula for computing future benefits and tighten eligibility requirements for some—are in part a hurry-up effort designed to head off independent congressional action. Both houses are looking at more drastic pruning because the Social Security system is in such clearly bad shape, in real danger of running out of funds.

In a sense it is a victim of its own success. From the very beginning the system functioned not merely as intended but better. So much better that not only did participation multiply, benefits proliferated. With an expanding economy and a growing population, the nation could afford it, particularly in the boom '60s when a number of expensive additions were made to the original benefits package.

The good times came to an end in the sagging '70s, however. Partly it is demographics—a declining birthrate, meaning fewer newcomers to the work force, and more Americans living longer, meaning more retirees to be supported. In the 1930s, the payroll taxes of 11 workers supported one beneficiary. The ratio is now about 5-to-1, and some projections see it hitting 3-to-1 or less within another half a century.

The growing problem has been addressed to date through quick fixes that come down basically to raising payroll tax rates to meet recurrent benefit payment gaps. Any more fundamental restructuring of the program has been regarded as politically impossible given the growing and politically active population of retirees.

But there comes a point at which the inescapable can no longer be ignored. Such as now. A program such as Social Security cannot be insulated from the society and more immediately the economy in which it exists. It cannot pay out more in the long run than that economy is capable of putting into it.

The proposals now on the table are only the beginning of a long overdue reconsideration of the entire system. There are plenty of others to fuel the debate, such as spinning off costly Medicare as a separate program and taxing benefit payments above a subsistence level.

The important point now is that a start has been made. Social Security may not have been intended as a national pension system, but Americans have come to regard it as such. If despite the political complications the Reagan administration succeeds in restoring the system to soundness, the achievement could well rank in history's final accounting as its most constructive.●

SPECIAL INTERESTS

HON. ROMANO L. MAZZOLI

OF KENTUCKY

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mr. MAZZOLI. Mr. Speaker, one can say that, despite the difficulty of the recent vote on the fiscal year 1982 budget, the really hard votes lie ahead.

Coming on stage are the special interest lobbies. I call them the "Yes But" groups. "Yes, we need to cut government spending, but, don't start with me."

These folks, as the following Wall Street Journal editorial of May 22, 1981, makes clear, will make a mockery of the budget process if we are not careful.

TRULY NEEDY?

The Reagan administration seems to be having trouble cutting back funding for the Export-Import Bank. It had proposed cutting $752 million from the $5.9 billion the Carter administration wanted to give the

bank in direct lending authority in the current fiscal year. It also wanted to rescind $1 billion of the $8.56 billion in loan guarantees the previous administration proposed allowing the bank to write. But the biggest clients of the bank launched an intensive lobbying campaign, and now the House and Senate have restored much of the funding.

It's the sort of episode that makes you wonder how the administration will fare in the coming guerrilla war various interests are going to wage against its proposed budget cuts. In this instance, those seeking the handouts are big companies that export expensive items like airplanes and power plants. They claim they need discount financing of the sort the Ex-Im Bank provides because other governments (those, say, of France, Britain, West Germany) are prepared to offer discount credit to their manufacturers' customers overseas. Without U.S. Export-Import Bank help, they claim, they couldn't compete and thousands of U.S. jobs would be lost.

What these corporations don't stress is the enormous hidden costs the Ex-Im Bank program imposes on the rest of the economy. A recent Congressional Budget Office study reckons that Americans who aren't beneficiaries of the program pay additional interest costs of between $200 million and $900 million annually (at current interest rates and lending levels), because of Ex-Im pressures on capital markets. The congressional paper says it can't document any offsetting foreign policy gains and concludes that payments by non-beneficiaries (i.e., most of us) are "largely redistributed to U.S. exporters, foreign importers and banks, with the remainder absorbed in efficiency losses from misdirection of resources."

It's hard, in short, to think of a more inviting target for cuts, particularly for an administration committed to a free and growing economy. But in the current squabble the White House shows every sign of being either naive or disinterested. Capitol Hill gossip has it that the Commerce Department was sending up signals contrary to the administration position (Commerce denies this), and, in any event, it wasn't until setbacks on the floor that Mr. Reagan's own budget office—which does understand the issue—weighed in with any kind of strong statement.

All this comes only weeks after the administration's decision to negotiate "voluntary" import restraints on Japanese automobiles, an episode in which the Transportation Department seemed to be off and running on its own. That was another example of big business and big labor moving to protect parochial interests at the expense of the economy. The amounts at stake in the Ex-Im fight aren't large, but at some point the administration will have to learn how to combat these assaults, lest the economic program it has launched be made a mockery.●

FEDERAL ASSISTANCE FOR TRAINING PRISON PERSONNEL

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mr. STARK. Mr. Speaker, responsible action is needed to deter crime in the United States. One step would be to improve the quality nationwide of our penal institutions. Many criminals resort to crime upon release. Two things are needed, training of the inmates and training of the prison personnel. A national academy to train and educate prison personnel would serve to provide technical assistance to State and local institutions with tight budget restrictions.

It is appropriate to include here, excerpts from Chief Justice Warren E. Burger's commencement address at the George Washington University School of Law on Sunday, May 24, 1981, which sets out his plan to improve our penal institutions:

[From the Washington Post, May, 26, 1981]

A "MORAL OBLIGATION" TO PRISONERS

(By Warren E. Burger)

No one questions that a criminal conviction should always be open to correct a miscarriage of justice. But no other system in the world invites our kind of never-ending warfare with society, long after criminal guilt has been established, beyond reasonable doubt, with all the safeguards of due process. Our system has moved thoughtful, sensitive observers who are dedicated to individual liberty to ask: "Is guilt irrelevant?"

Looking back, we see that over the past half century we have indulged in a certain amount of self-deception with euphemisms, sometimes perhaps to sugar-coat the acid pills of reality, and sometimes to express our humane aspirations for those who break our laws. Prisons became "penitentiaries"—places of penitence—juvenile prisons became "reform schools" and, more recently, we have begun "halfway houses" without being quite sure halfway from what to what.

I have long believed—and I have frequently said—that when society places a person behind walls and bars it has a moral obligation to take some steps to try to render him or her better equipped to return to a useful life as a member of society. Now, I say "try," and I use the term moral obligation, not legal, not constitutional. The Constitution properly mandates due process and it mandates nothing concerning the subject of punishments except that they not be "cruel and unusual." To make these people good citizens is also for our own proper self-interest.

To do all the things that might have some chance of changing persons convicted of serious crimes will cost a great deal of money, and 1981, if you have listened to talk shows, is hardly the year in which to propose large public expenditures for new programs to change the physical plants and internal programs of penal institutions. So what I am about to propose are programs of relatively modest fiscal dimensions that I believe will help—but with no guaranteed results.

Two steps could reasonably be taken within the range of affordable expenditure. I relate them chiefly because they are affordable in an economic sense—and feasible in terms of the psychology and the political and economic realities of 1981. These proposals are closely related. Each bears on training and education—training of the inmates and training of the keepers.

In all too many state penal institutions, the personnel—the attendants and guards—are poorly trained and some are not trained at all for the sensitive role they should perform. A fairly recent study shows an astonishing rate of turnover of guards and correctional personnel.

An important and lasting consequence of lack of trained personnel is the impact on the inmate—and individual inmate—who continues his hostility toward society, toward fellow inmates and prison personnel. The keepers come to be the immediate symbols of the society that keeps them confined. Unfortunately, judicial holdings have not always discouraged this warfare. More often than not, and I emphasize this, inmates go back into society worse for their confinement.

The best of prison administrators cannot change some of the negative conditions unless those in the high-turnover, lower-echelon categories are carefully screened, well-trained and reasonably paid. Psychological testing of applicants is imperative to screen out people with latent tendencies of hostility. The existing prohibitions on psychological screening must be reexamined. Today, those lower positions in most of the states are generally not paid adequately enough to get even minimally qualified people.

The time is ripe to extend the fine work begun in 1972 by the National Institute of Corrections, and we should proceed at once to create a national academy of corrections to train personnel much as the FBI has trained local and state police. This is especially needed for the states, which have no real training resources available. The academy should also provide technical assistance to state and local institutions.

The second step for which I would urge consideration is one that would need to be over a longer period of time. We should introduce or expand two kinds of educational programs in the prisons.

The first would be to make certain that every inmate who cannot read, write, spell and do simple arithmetic would be given that training—not as an optional matter but as a mandatory requirement. The number of young, functional illiterates in our institutions is appalling. Without these basic skills, what chance does any person have of securing a gainful occupation when that person is released and begins the search for employment—with the built-in handicap of a criminal conviction?

Focusing on the longer-term prisoner, the second phase of this educational program would require a large expansion of vocational training in the skilled and semi-skilled crafts. The objective would be that a prisoner would not leave the institution without some qualifications for employment in the construction, manufacturing or service industries. These vocational training programs should also be mandatory. An inmate who declines to cooperate must be motivated to do so by incentives including shortening the sentence. Just as good behavior credit is now allowed to reduce sentences, we should allow credit on sentences for those who cooperate by learning. We should help them to learn their way out of prison.

Even in this day of necessary budget austerity, I hope that the president and Congress, in whose hands such matters must rest, will be willing to consider these two modest, but important steps. No one can guarantee results, but if we accept the moral proposition that we are our brothers' keepers and the moral proposition that there is a divine spark in every human being—hard as that is to believe sometimes—we must try.●

U.S. STRENGTH IN FOREIGN AFFAIRS

HON. TED WEISS

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mr. WEISS. Mr. Speaker, the strength of the United States in international affairs has been weakened by the Reagan administration's failure to implement a coherent, consistent foreign policy. While threatening world peace with a massive arms buildup and using El Salvador's civil conflict as the basis for a rhetorical confrontation with the Soviet Union and for military intervention, the President has made a choice for chief U.S. arms control negotiator which exhibits disregard for critically important arms control efforts. And while rightfully deploring Soviet intervention in Afghanistan, President Reagan rewarded that action by lifting the Soviet grain embargo.

A column which appeared in the New York Times recently documents these and other dangerous inconsistencies in the administration's handling of foreign policy. This commentary, by Richard Barnet, clearly shows how this policy undermines our Nation's role as peacekeeper and defender of freedom and democracy in the world.

A copy of the column follows:

[From the New York Times, June 1, 1981]

THIS IS DEALING FROM STRENGTH?

(By Richard J. Barnet)

WASHINGTON.—The Reagan Administration appears to have declared as nonproblems the so-called global concerns over which the Carter Administration briefly agonized: what to do about the catastrophic world food situation, the instability of the world monetary system, the sharing of resources under the sea, the mounting debts of poor countries, the growing rivalries within the developed world over access to scarce resources, and the environmental consequences of such rivalries.

Mounting economic and social instability in the third world is the No. 1 security problem, but the Administration's preferred approach to this threat to peace is to shake a finger at Moscow or to repaint an old battleship. It is a dangerously unrealistic policy, for there is no way that the United States can be restored to economic health without taking on these global problems in a serious way.

But is it not unfair to judge President Reagan harshly for not doing what he never had any intention of doing? Should not his performance be judged by his own goals? Unfortunately, by that test, too, he is headed for failure.

The Administration came to office promising to restore America to what Dean Acheson once called "situations of strength." Obviously, more than a military buildup was required. The Government would have to learn once again to speak with one voice on foreign policy issues. It would have to demonstrate strong public support for its program to restore American power. It would have to strengthen America's ties with its major allies. Most important, it would have to demonstrate that the nation's economy was vital enough to sustain our global commitments.

So far, the Administration has succeeded in confusing friend and foe alike. The President calls Soviet leaders liars and cheaters but invites them back into Middle East discussions. According to Secretary of State Alexander M. Haig Jr., the Russians are powerful enough to orchestrate much of the world's mischief, yet he says they are about to fall into the very ashcan of history that they have been preparing for us. The President's closest adviser, Edwin Meese 3d, announces that military action against Cuba is being considered, but the grant embargo against the Soviet Union is precipitously lifted without even advance notification to our allies.

El Salvador is selected as the critical site to make a stand against the newly discovered worldwide Communist-terrorist conspiracy. But neither the Congress, the Roman Catholic hierarchy, nor our European allies believe that the bloody civil war in that country was invented in Moscow. International terrorism is a fashionable construct to make chaotic and unmanageable events in a dizzying variety of places fit a ready-made strategy for addressing them—much like the "arc of crisis" rhetoric in the Carter Administration—but the Central Intelligence Agency says it has been unable to confirm the basic facts on which the Administration's paranoid worldview rests. Administration spokesmen claim that America would lose prestige if El Salvador's moderately repressive torturers and murderers, whom we are generously supplying with helicopters and rifles, should fall.

Thus, the Administration is setting that country up to be the new Vietnam. Whether a single additional adviser or even one infantry platoon is ever sent there, the Administration has already invested so much in that operation that this nation cannot help emerging from the involvement weaker, not stronger. Having announced that a political solution that includes the left is a major defeat, we have once again advertised our impotence. Having made support of our El Salvador policy a loyalty test for our allies in Europe and watched them flunk, the Administration has strengthened neutralist sentiment on the Continent and given a boost to the antiwar movement in both America and Europe.

The national security adviser, Richard V. Allen, scolds the Europeans for their "contemptible" better-Red/than-dead attitudes. The predictable result of our pressure has been to cause the West German Government to move slightly to the right and the German people to move to the left (66 percent of them, according to United States Government polls, are against modernizing the North Atlantic Treaty Organization with theater nuclear forces). The administration's obvious reluctance to negotiate arms-control arrangements in Europe, which a majority of Europeans see as the only way to reduce the Soviet nuclear threat against the Continent, offers the Soviet Union an unparalleled opportunity to put pressure on European governments by playing on legitimate popular fears. Reagan realism may work so well that the Kremlin will be able to claim a veto power over NATO weapons decisions.

Situations of strength these are not.●

INCOME TAX RELIEF FOR FORMER MISSILE SITE EMPLOYEES

HON. BYRON L. DORGAN

OF NORTH DAKOTA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mr. DORGAN of North Dakota. Mr. Speaker, I am introducing a bill to correct an injustice done to 118 people in North Dakota 10 years ago. Between 1970 and 1974 the U.S. Government employed a great number of people at the anti-ballistic-missile site near Concrete, N. Dak. There was no housing at this site, and yet the workers were not allowed to deduct from their income taxes their living-away-from-home and transportation expenses.

The Internal Revenue Service maintained that the temporary status, under which these workers were employed, could only be continued for a maximum of 12 months. The length of employment was not defined when workers were hired, and thus they had no means of knowing they would fall victim to this clause.

This case was heard in the Eighth Circuit Court of Appeals and was decided in favor of the plaintiff, Louis Fredrick. The Internal Revenue Service did make repayment to Mr. Fredrick and many other former workers who applied for repayment soon after the decision, but the statute of limitations was not held open during the court hearings, as it could have been. To further complicate the situation for the workers, the statute expired at different times for the people involved.

There is multiple injustice and a cruel irony in all of this. Not only were these 118 people not allowed to take their travel expenses as deductions when there were no housing alternatives for them at the jobsite, but also, they were presented with a technicality when they sought rightful reimbursement from the Internal Revenue Service following their court victory. The Internal Revenue Service audited only those who worked at the anti-ballistic-missile site for over 12 months. It was these people who were not allowed to take deductions for their unavoidable expenses, and it was these people who have been the subjects of this discrimination. Workers employed for under 1 year were allowed to take these expenses as deductions.

Mr. Speaker, I introduce this bill to insure that justice is done to those who have very patiently sought it for over 10 years, and who, having achieved this justice in a court victory, were denied it by an Internal Revenue Service ruling.●

WALL STREET REJECTS REAGANOMICS

HON. DENNIS E. ECKART

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mr. ECKART. Mr. Speaker, President Reagan is claiming that the financial community supports Reaganomics. Wall Street, however, has a different story to tell.

This morning's editorial in the New York Times shows how Wall Street investors are reacting to the President's tax plans.

IN DEFENSE OF WALL STREET

Considering the magnitude of the nation's economic problems, we could understand the Reagan Administration's radical abolition of Lord Keynes's General Theory and even its reverence for Arthur Laffer's amateurish curve. We began to worry when it also took the position that budget deficits don't really count in battling inflation and that rapid growth could occur while the Federal Reserve Board is officially encouraged to curb it, through high interest rates.

But what can you make of the latest iconoclasm? That champion of free markets in the White House has called in the Democratic leaders of Congress and exhorted them to ignore the message of the noblest market of them all: Wall Street. The President wants Congress to buy his tax program even though the financial markets won't.

Wall Street, the President insists, is not to be trusted; it sees the world "through a very narrow glass." Indeed, he adds, "I have never found Wall Street a source of good economic advice."

Well now, Mr. Reagan is surely not the first to have been burned once or twice by a fast-talking Wall Street broker, But is he blaming "the market" for its salesmen? No. He threatened to betray his free-market ideology because this grand market was showing so little confidence in his economic predictions.

The fact is that as free markets go, Wall Street is pretty smart and sensitive. It's big and competitive and its records, through fluctuating interest rates, the collective economic judgment of millions of freely operating investors. It has well tested Mr. Reagan's proclaimed intention of calming inflationary expectations. The President should be unhappy not with the market, a relatively passive messenger, but with its message: that Americans refuse so far to bet their bundles on his program.

Despite four months of energetic White House propaganda and budget-cutting, and a remarkably compliant Congress, there has been no real decline in long-term interest rates. Investors appreciate the President's spending cuts, but lack confidence in the rest of his plan: sharp increases in defense spending and a simultaneous three-year reduction in income taxes. Wall Street has been betting against much lower inflation rates, thereby stiffening Congressional resistance to the President's tax reductions.

It seems unfair, we know. Given Mr. Reagan's once unlimited faith in free markets, you'd think they would reciprocate the sentiment. But free markets have a way of being free; they will not bend, like politicians, to the finger-wagging of a popular President. Even Lord Keynes knew that. And we suspect President Reagan does too. Why, otherwise, did he spend so much time yesterday groping for a compromise in tax policy that would be less inflationary and more attractive to investors? To win the votes of Democrats, to be sure. But above all, to mollify Wall Street.●

MEDICAID ASSISTANCE REFORM AMENDMENTS OF 1981

HON. CLARENCE J. BROWN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mr. BROWN. Mr. Speaker, I am introducing a bill today which will provide for a more equitable allocation of Federal assistance to the States under the medicaid program within the capped fiscal year 1982 authorization level which President Reagan has recommended to the Congress. The bill—which embodies a novel concept advanced by the Ohio Hospital Association—is intended to aid Ohio and some 22 other States which are beset by disproportionately high unemployment and cost of living—two serious factors which impact directly on the number of medically indigent in the States and State resources to meet increased demand for services.

Medicaid, or title XIX of the Social Security Act, is an entitlement program which provides medical assistance to the poor through a State and Federal partnership. Since 1965, the Federal Government has paid a minimum of 50 percent of each State's medicaid costs and a maximum share of 83 percent of these costs.

Over the past 16 years, over $108 billion in Federal medicaid funds have been distributed amongst the States on the basis of a formula which relies solely on per capita personal income as an indicator of a State's ability to pay for services. One characteristic of the current medicaid formula is that per capita income, on which it is based, understates the fiscal capacities of several States who are enjoying a marked increase in revenues derived from oil and mineral resources, while it distorts the capacities of others which have been severely affected by downturns in the economy.

Many States in the Northeast and Midwest, for instance, have seen the demand for medicaid services explode as unemployed workers from the auto and other adversely impacted industries have exhausted unemployment benefits and have gravitated to the welfare and medicaid rolls. At the same time, these States have experienced declining revenue bases as a result of a decrease in taxable personal and business income.

Although the current medicaid formula has resulted in inequitable distribution of Federal funds in the past, continued utilization of this formula would have grave implications for States like Ohio, in light of the expanded responsibilities which will accompany President Reagan's comprehensive plan to overhaul the Federal bureaucracy and attack inflation through reduced Federal spending.

State matching rates are to be frozen for 2 years under the Reagan proposal, although for fiscal year 1982, Federal assistance to each State will not be allowed to exceed a level 5 percent greater than that which was received the previous year. Thus, with total program costs estimated to rise anywhere from 12 to 17 percent in the coming year, the actual percentage of each State's medicaid costs which will be borne by the Federal Government will be substantially reduced in fiscal year 1982 if Federal assistance is capped.

Because of the pressing need to attack inflation now through reductions in Federal spending and the equal importance of halting the growth of Federal entitlement programs by providing States with incentives to look for economies through more efficient ways of running their programs, a cap on Federal medicaid assistance in the proportions recommended by President Reagan is both necessary and practical.

However, because Federal medical assistance dollars are so vitally important to the States, it is only fair that the formula by which these funds are distributed be adjusted to reflect changes in State fiscal capacities and to acknowledge the viability of additional indicators of, first, the demand for services within a State; second, the effects of high cost of living upon State revenues; and, third, the short-term impact of unemployment and recession upon State revenues.

Criticism of the overreliance on the per capita income measure in the allocation of Federal assistance dollars is certainly not a new phenomenon. The per capita income measure is currently estimated to be in use in determining State allocations under 24 Federal assistance programs. The Advisory Commission on Intergovernmental Relations (ACIR) has done a substantial amount of research on the viability of per capita income as a measure of State fiscal capacity, and ACIR's own formula for Federal assistance to the States—the "Representative Tax System"—clearly points out that at least 14 States would receive substantially less Federal dollar support if other measures of their revenue-raising ability were taken.

Because the medicaid program is an open-ended entitlement program, there has never been a ceiling on total Federal expenditures. For this reason, most legislative proposals concerning the program have been designed to help a few (or even all) of the States—through some alteration of State

matching rates which would hold harmless any States which were not targeted beneficiaries—without cutting into the allocations of others. The theory in the past has been that the Federal medicaid "pie" is infinite.

Although the adjustments to the medicaid program which I am proposing today would provide for a redistribution of Federal funds, benefiting slightly less than half of the States, it would not change State matching rates and it does not assume an open-ended Federal medicaid investment. The formula that I am proposing would simply adjust spending ceilings for the States in fiscal year 1982 and following years, in order to direct a slightly larger proportion of Federal medicaid dollars to States with high unemployment and/or cost of living—allowing for a redistribution of some $360 million in Federal aid (or 2.1 percent of the Federal medicaid total) within the 5-percent cap proposed by President Reagan.

Calculating medicaid assistance under the Brown proposal, attachments A and B follow:

ATTACHMENT A.—CALCULATING MEDICAID ASSISTANCE UNDER THE BROWN PROPOSAL

The proposed formula for recalculating a state's share of the total federal assistance amount (which would be capped at a level 5 percent greater than the estimated expenditures in FY '81) involves a three-step procedure. It basically involves the determination of a state's adjusted share of total federal Medicaid dollars through a recalculation of each state's FY '81 program costs which would have been borne by the Federal government had the Brown formula (taking unemployment and cost-of-living into account) been in place. The adjusted percentage would then be applied to the capped federal assistance total.

Step 1: Calculate Adjusted Federal Medicaid Assistance Percentage (AFMAP):

a. Cases where state's unemployment rate is above national average:

Current Medicaid Assistance Percent = 5 (State unemployment 1980)/(National unemployment 1980) = AFMAP

b. Cases where state's cost-of-living estimate is above national ave.:

Current Medicaid Assistance Percent = 5 (State COL)/(National COL) = AFMAP

c. Cases where both state's unemployment and cost-of-living are above national average:

Current Medicaid Assistance Percent + 5 (State unemployment 1980)/(National unemployment 1980) + 5 (State COL)/(National COL) = AFMAP

(Where State Unempl. 1980 is the state's unemployment average for 1980 and Nat'l Unempl. '80 is the national average for the same year; where State COL is the state's estimated cost-of-living and Nat'l COL is the national average estimated for the same year. Both of these estimates can be recalculated on a yearly basis to reflect comparative state unemployment and cost-of-living for the previous year. The 5 in the formula is the "kicker.")

In the case of Ohio, which had an 8.4 percent unemployment rate in 1980 compared to a national average of 7.1 percent, the state's AFMAP would be 61.015, calculated as:

$$55.10 + 5\,(8.4)/(7.1) = 61.015$$

Ohio falls into the category of Case a, because its unemployment rate exceeded the national average. Ohio's COL did not exceed the national average; therefore, it would not qualify as either Case b or c.

Step 2: Determine State's Share of Adjusted Total Federal Medicaid Assistance:

To determine the percentage of total Medicaid funding each state would have received had the Brown Medicaid formula been in effect in FY '81, compute:

AFMAP × State's Total Medicaid Payments (Federal and State), fiscal year 1981/Adjusted Total Federal Medicaid Assistance, fiscal year 1981

Under the Brown formula, Ohio would have received approximately 3.94 percent of the federal medicaid assistance total for fiscal year 1981.

No state would be allowed to receive more than 16 percent of the total federal reimbursement figure in any year. (Only New York would be affected by this provision. Without the 16 percent limit, New York would receive about half of the funds redirected to the states under the Brown proposal. With the 16 percent cap, New York would still receive the largest increase in federal assistance, however, amounting to $95 million.)

Step 3: Apply State's Adjusted Percentage Share of Federal Medicaid Assistance to Proposed fiscal year 1982 Capped Medicaid Budget:

Using the approximately $17 billion proposed by the Reagan Administration to fund Medicaid in fiscal year 1982 under a five percent cap, Ohio would receive approximately $678 million or 3.94 percent of the total.

The attached table shows the level of funding each state would receive under the Brown Medicaid Proposal, compared to the current formula, using the five percent cap proposed by President Reagan.

ATTACHMENT B.—STATE BY STATE ALLOTMENT UNDER BROWN MEDICAID PROPOSAL

States	Reagan proposal fiscal year 1982 capped 5 percent	Brown proposal fiscal year 1982 capped 5 percent	Dollar change	Percentage of total	Percentage dollar change

CHIROPRACTIC—AN ALTERNATIVE

HON. RON WYDEN

OF OREGON

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mr. WYDEN. Mr. Speaker, this week, when H.R. 2004, the health manpower bill is marked up in the Subcommittee on Health and Environment, I will be offering an amendment to allow chiropractic students greater access to existing student grant and loan programs.

My amendment does not call for the expenditure of any additional Federal money. It would merely allow chiropractic schools and students to compete equally for Federal assistance, under the health manpower program.

My amendment parallels the amendment recently adopted by the Senate Labor and Human Resources Committee in S. 799, the Health Manpower Act.

I believe chiropractic offers alternative health care increasingly popular with patients. A recent article in the Oregon Journal, written by Joyce Lain Kennedy, discusses chiropractic as a career. I would like to share this information.

Chiropractors offer an approach to health care based on the idea that physical well-being is determined largely by the central nervous system. They believe that interference with this system—which can happen particularly in the spinal column—impairs functioning and lowers resistance to disease.

Employing such diagnostic tools as X-ray and ultrasound, chiropractors use primarily manual manipulations in treating patients. They may also advise on nutrition and recommend such procedures as traction or therapeutic exercises.

Your timing for entering the field couldn't be better. Long snubbed by the medical profession, chiropractic seems finally on the brink of mainstream acceptance and long-denied cooperation with other health-care providers. Indications:

In Chicago, five chiropractors are suing several medical associations, charging that a violation of anti-trust laws—which has enforced medicine's boycott of chiropractors—has worked to the detriment of patients. The American Medical Association already has responded by revamping its code of ethics to allow its members to collaborate with chiropractors.

The Department of Health and Human Services recently released an exhaustive study of chiropractic. Federal interest and funds in themselves signal a growing regard for the field's legitimacy, and the resultant data projects a promising outlook.

Reimbursement for chiropractic services is now included in many federal and private health-insurance programs.

Legislation pending in Congress would make chiropractic students eligible for low-interest health-education assistance loans.

Prepare for an educational grind. Prerequisites for chiropractic college are generally two years of undergraduate work heavy in biology and chemistry.

In most states, licensing is based on graduation from an accredited chiropractic college and passage of a qualifying exam.

Career prospects are bright. With 23,000 chiropractors already practicing, the HHS study predicts that the 10,000 to 13,000 people who enter the field during the next five years will be easily absorbed.

The study portrays the average chiropractic doctor as a white male in solo practice working in a small town in the Midwest or California and grossing approximately $63,400 per year. With the new public attitudes and an interest within the field in recruiting minorities and women, this profile soon may be obsolete.●

MOUNT ST. MARY'S COLLEGE

HON. BEVERLY B. BYRON

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mrs. BYRON. Mr. Speaker, nestled in the Catoctin Mountains, not far from Camp David, is the beautifully scenic campus of Mount St. Mary's College. Mount St. Mary's is one of the earliest established institutions of higher learning in the United States; it was established in 1808.

There are many campus-sponsored activities there and one of the most famous is the Gleemen and Belles Choral Group. This outsanding group gives concerts each year to a variety of groups not only in this area, but throughout the hemisphere. The Gleemen and Belles group has just returned from its 15th annual concert tour which took it to Nassua, The Bahamas, San Juan, and St. Croix. In the past, the group has traveled to Europe, Bermuda, Panama and the Canal Zone, the east and gulf coasts and California.

In some of their performances in other lands, they have been titled the "Ambassadors of Good Will for the Mount and the United States" by their hosts.

The group tailors their varied repertoire to each audience they entertain, ranging from classical selections to pop, sacred songs to Broadway tunes. Many of the numbers are choreographed and soloists and ensembles are often featured. A special presentation is organized each Christmas season.

The singers range in age from 18 to 22 years, and they represent many States from all around the country. The director of the group is the Reverend Dr. David W. Shaum, who has inspired many with his hard work, friendly attitude, and helpfulness. Penny Krepps is the accompanist.

I salute the dedication of these individuals and the choral group which has brought pleasure in music to so many. ●

FOR WANT OF A NAIL—1981 STYLE

HON. ROBERT H. MICHEL

OF ILLINOIS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mr. MICHEL. Mr. Speaker, there is an old saying that demonstrates the importance of little things:

For want of a nail, the horseshoe was lost; for want of a shoe, the horse was lost; for want of a horse, the rider was lost; for want of a rider, the battle was lost.

Today, that saying might go this way:

For want of a spare part, an American plane in West Germany was lost to duty; for want of that plane, and others like it, NATO was weakened; for want of a strong NATO, the Soviets attacked * * *.

We all know that our military is suffering from a lack of spare parts for many planes and other weapons. We cannot even hope to deter aggression unless our weapons are ready to be used.

What are we going to do about it?

At this point I wish to insert in the RECORD "Many Air Force Planes Often Can't Be Flown For Lack of Spare Parts" from the Wall Street Journal, June 1, 1981.

OUT OF ACTION: MANY AIR FORCE PLANES OFTEN CAN'T BE FLOWN FOR LACK OF SPARE PARTS—EVEN A KEY BASE IN GERMANY IS PLAGUED BY SHORTAGES; ECONOMIZING IS BLAMED

(By Walter S. Mossberg)

BITBURG, WEST GERMANY.—Commanders at the American air base here are particularly proud of a big, busy room known as the "Eagle Readiness Center." Lit by soft blue lights, the room is dominated by large displays listing the status of the base's 75 F15 fighter planes. The clatter of Teletypes fills the air, and five clocks on the wall give the hour in various time zones.

Though it looks like a war room, the readiness center isn't used for commanding pilots in combat or plotting military strategy. Instead, the people who staff the center spend all their time contacting Air Force warehouses and repair depots on two continents, searching for hard-to-find spare parts needed to keep the F15 Eagles flying.

On a typical day recently, the center's staff was keeping track of a shipment of special sealant and a common rudder component. Both items were supposedly on their way to Bitburg from Oklahoma, one of the places represented by the clocks on the wall. Until they arrived, two of the base's $27 million F15s would remain grounded. Another of the jets was idle for lack of eight different parts, including a single, specially designed screw.

DAILY STRUGGLE

The Bitburg base, close to Germany's western border, may be the premier fighter base in Western Europe. It boasts the best, most modern aircraft, and its supply staff regularly wins awards. Because of its importance to allied defense plans, the base also rates a certain priority in the Air Force supply system. Even then, Bitburg's 36th Tactical Fighter Wing, like other U.S. units in Europe, must struggle daily against shortages of parts, ammunition, fuel and other supplies.

U.S. Army and Air Force commanders throughout Europe complain that they are so short of such basic supplies that training has had to be cut and readiness has been hurt. Even worse, they say, American forces in Europe in many cases lack enough supplies to stay in combat for more than brief periods.

"We don't have enough weapons today. We don't have enough spare parts today. We don't have enough fuel for flying today. We don't have enough money to do anything, and here we are on the front lines," complains Gen. Benjamin Bellis, vice commander-in-chief of United States Air Forces in Europe.

Says Maj. Gen. W. C. Nutt, logistics commander for the Air Force in Europe: "Funding for spare parts has been really dismal for the past couple of years, and there's a two-year lead time. We don't want to have to fight between now and 1983—that's what it boils down to."

FAULTY GENERATORS

In a single day recently, five of the 100 F15s in Europe were grounded for lack of the same part, a generator that breaks down too often and is in short supply. "I don't believe there were ever enough parts bought for the F15," asserts Lt. Kathleen Spencer, assistant chief of an aircraft-maintenance unit at Bitburg.

Gen. Bellis, who once headed the F15's development program, agrees. "That's correct. We didn't buy sufficient spare parts. You can see that at the tactical level."

For years, the military brass and the Congress slighted the Pentagon's mundane "operations and maintenance" accounts in favor of money for shiny new planes, missiles, ships and tanks. And, as new weapons such as the F15 have grown more complex, requiring more and costlier parts and ammunition, the military's supply deficiencies have worsened.

To attack the problem, the Carter administration in January proposed a radical switch in defense spending, slashing new-weapons purchase to finance big increases for supplies, maintenance and construction. Though President Reagan's budget restored the weapons funds, it, too, included big increases for these support items.

YEARS OF WORK NEEDED

But even if Congress quickly votes the extra money, it will take years to fill the warehouses, depots and fuel tanks. And there isn't any guarantee that the flow of money will continue. If future cuts are needed, support items are still likely to be a tempting target.

For now, American commanders in Europe can only wait, scramble to make do, and worry.

At the top of the operational chain of commend, Gen. Bernard Rogers, Supreme Allied Commander in Europe, declares that when it comes to the ability to sustain its forces in combat, "The U.S. is flat on its ass."

Much further down the line, and much more diplomatic, is Col. Marcus Anderson, commander of Bitburg's tactical fighter wing. He says that "because of restrictions on funding, there are many things we've had to forgo." Col. Anderson estimates that, after the first week of war, his base would need a lot of outside help to keep enough planes, parts and ammunition on hand.

Bitburg's fighter wing, which has three-fourths of the F15s in Europe (there's a squadron in the Netherlands), plays a vital role in Western defense plans. Located just minutes by air from the East German border, the wing is supposed to "control the skies" in the early stages of any Communist onslaught and blunt waves of more numerous Warsaw Pack attackers with the F15's superior electronics and air-to-air missiles.

The Bitburg base is one of the best-equipped in the Air Force, a showcase installation with a better-than-average readiness rate. Four planes are kept on alert 24 hours a day.

But just 60%, or about 45, of Bitburg's 75 F15s are considered "fully mission capable" at any one time, on average. Nearly 14% of the fighters, about 10 planes, are rated "not mission capable" partly or wholly for lack of parts. On a typical day recently, six of Bitburg's F15s qualified as "hangar queens"—planes idled 21 days or more and thus officially subject to cannibalization to provide needed parts for other planes.

Once a plane becomes a "hangar queen," it risks falling into a vicious cycle. Because the plane is grounded anyway for lack of a part, more parts are removed from it to keep other plans going. But these, too, must be ordered; so the "queen" may stay grounded still longer. The Bitburg fighter with the missing screw was a victim of that process.

Bitburg's commanders insist, however, that the situation is better than these numbers alone would indicate. For instance, hangar queens rarely linger for more than two or three months because a rule bars mechanics from removing more than 10 parts from any one grounded plane.

What's more, the officers say, the 60% of Bitburg's planes normally considered "fully mission capable" could be augmented in a crisis by another 15%, or 11 planes. These extra planes could be made "flyable," even though some important systems—including radar—might be broken, provided mechanics have about 12 hours and can resort to heavier-than-normal cannibalization.

In addition to posing a crucial issue of combat readiness, the parts problem contributes to a nagging training deficiency that is a source of frustration for Bitburg's 100 fighter pilots. The average Bitburg pilot gets only about half of the training flights that base officers consider necessary, even though he flies the most potent planes in Europe.

"We would have to be able to fly every pilot once each flying day, which amounts to about 20 times a month," Col. Anderson says. But there isn't any prospect of that "in the near term," he adds. Currently, Bitburg's pilots average about 11 training flights monthly. That's far fewer than the U.S. believes Soviet pilots fly and only about a third of the number thought to be flown by Israel's F15 pilots.

Because of funding cuts and fuel-cost increases, Bitburg's wing has been authorized fewer total flying hours this year than in 1978, even though it has more pilots. The average flight time allowed for each pilot is up slightly from a low of 150 hours a year in 1979 but is still well below the 190 hours of 1978.

"On a day-to-day basis, we try to schedule 22 sorties, but I can't tell you the last time we got that many," says Lt. Col. Jim Cox, commander of Bitburg's 53rd Tactical Fighter Squadron, which has 26 pilots. The training pace, he adds, "isn't enough to be proficient," especially in view of the fact that, if war broke out, "some of us might have to fly with broken radar." (If that happened, he says, "I'd try to use my heat-seeking missiles," which don't depend on radar.) Col. Cox blames the inadequate training on a "lack of parts and lack of skilled people" to install them.

Though Bitburg is considered a good place to serve, its parts problem is exacerbated by the same difficulty in retaining skilled people that plagues other U.S. bases. Of 1,600 authorized noncommissioned and commissioned maintenance officers, the base had just 1,480 recently, and the maintenance chief terms even 1,600 too few. Annual turnover in maintenance is 40%, and overtime work is common.

The quality of pilot training has suffered along with the quantity. Because of poor weather and German regulations, daily training flights at Bitburg must be conducted at much higher altitudes and slower speeds than the Air Force believes real combat would require. Most training is against other F15s, instead of the smaller allied jets that more closely resemble Soviet fighters.

To get more realistic training, Bitburg pilots must fly periodically to Italy or Britain, where special ranges and mock-Soviet squadrons are maintained. But opportunities for such travel have been limited by the budget pinch. And the Bitburg wing hasn't ever been able to send a single F15 to the Air Force's main anti-Soviet war games in Nevada. It's hoped the first few Bitburg planes may participate this summer.

For about six months last year, Bitburg's pilots and others in Europe had to forgo all practice in firing the F15's cannon. There weren't any funds to pay for the practice sessions, conducted against a special towed target that is flown out of Spain.

The budget cuts have affected the Bitburg base physically as well. Eighteen maintenance and repair projects totaling $2 million, all deemed "essential" by base officials, have been delayed an average of four years. For seven years, until it was fixed in 1980, a leaking roof at a Bitburg warehouse allowed rainwater to pour down onto some of the $40 million in sophisticated aircraft parts stored inside.

Worse, from a combat viewpoint, have been the delays at Bitburg and other Air Force bases in the construction of operating buildings that are "hardened," or reinforced, against Soviet bombings and "filtered" to protect their occupants from chemical weapons.

Construction of eight semihardened buildings has slipped two to three years behind schedule because of budget limits. If war broke out, the building housing all the computers needed to maintain complex components of the fighters would be vulnerable, because it isn't hardened. The computers would have to be moved to one of the F15 shelters—leaving one of the fighter planes unprotected.

Col. Cox's squadron is due to get a new bomb-proof, filtered headquarters this summer. But, because of budget limitations, it doesn't include quarters for the maintenance crews, so he is trying to squeeze in space unofficially for at least a few mechanics who might keep his planes in the air. "Without them, I'm dead," he says.●

TAX INCENTIVES FOR RESEARCH AND DEVELOPMENT

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mr. STARK. Mr. Speaker, I would like to share with my colleagues the testimony of Hon. Edmund G. Brown, Jr., Before the Senate Finance Committee on tax incentives for research and development:

TESTIMONY OF EDMUND G. BROWN, JR., GOVERNOR OF CALIFORNIA, BEFORE THE SENATE FINANCE COMMITTEE

This is an exciting and critical time in the formation of business tax policy for the United States. The tax changes you are now considering can be compared in scope and magnitude only to those enacted during the early 1950's. Because of our short-term fiscal crisis, with a large deficit a probability, a tax cut must be carefully fashioned to meet short-term constraints while contributing to our long-term economic goals.

At the same time, we must recognize the limitations of broad tax reform to accomplish our economic goals. The U.S. economy is currently undergoing a major restructuring due to fluctuating energy prices, the maturing of technologies developed 10 to 20 years ago, and increasingly fierce international competition in both basic and advanced industries. This restructuring will occur with or without a tax cut, but it is in our national interest to hasten this restructuring and influence the final shape of our economy with a thoughtful tax program. To survive and maintain our quality of life we must encourage, rather than impede this process. Government plays a critical role in this process by focusing spending only where necessary, by making its policies predictable, and by passing appropriate tax policies; government can further economic development rather than impede it. However, such a tax policy should be put in context of broader economic policy in which emphasis shifts from conservatism to entrepreneurial risk-taking and from imitation to innovation in the development of new products. Any tax policy, if not accompanied by these actions by the private sector will be insufficient to meet the economic challenges of the remainder of this century.

In addition to the general lowering of personal income taxes and the reform of depreciation allowances already before you, I would like to discuss two specific measures which deserve your support. If we are to maintain our competitive edge, we as a nation must invest in science and engineering research and development. Study after study has shown that the largest single contributor to increases in productivity has not been more capital of the same kind or more labor of the same kind, but has been technological advances and increases in human knowledge.

S. 98, coauthored by Senators Danforth and Bradley (parallel to H.R. 1183 authored by Representative Shannon and H.R. 1539 authored by Representative Pickle) would provide for a 25% tax credit for increases in research and development spending by private firms. H.R. 1864, authored by Representatives Shannon and Pickle, would provide for a 25% tax credit for business contributions to universities for research. Both proposals are needed because basic and applied research are undertaken by both universities and businesses. Taken together, these measures should provide a much-needed stimulus to private investment in research and development.

THE 25 PERCENT INCREMENTAL RESEARCH AND DEVELOPMENT TAX CREDIT

S. 98, providing for incentives for research and development conducted by businesses is critical for a number of reasons:

First, our companies cannot compete internationally if only given more capital through tax cuts. No matter how effective the proposed reductions in personal income tax rates, they will not bring U.S. savings in line with Japanese or German savings rates. To keep up, we must be concerned with the quality of our investment. In particular, we must seek to add new capital for plants and equipment which are technologically superior and resource efficient.

Second, many companies are living off research and development undertaken five and ten years ago. In many industries, the new product cycle simply takes that long. If companies are not encouraged to increase their current spending in this area, the present rapid pace of corporate innovation will slow dramatically.

Third, the proposed "10-5-3" depreciation schedule taken alone discriminates against rapid innovation. For firms in industries with rapid technological change, the 5-year write-off for equipment is too long and will actually impose a higher tax burden. In contrast, those industries with little technological change, which consequently have write-off periods for equipment far in excess of 5 years, will benefit the most. It would be preferable to provide innovative firms with some protection against increases in write-off periods; but in the absence of such a provision, a research and development tax credit can limit the bias against innovation.

Fourth, this provision will benefit both mature and cutting edge industries, both new and old firms, and both small and large companies. It is not special interest legislation designed to aid a few high-technology companies in California. I am sure you are all aware of the successful revitalization of the Massachusetts and North Carolina economies which is occurring around technology based firms. More importantly, no U.S. industry can hope to compete in the future simply by using additional capital to duplicate itself—all must compete by being the first to innovate and the first to bring new products and processes to the world market. This holds as true for the auto and steel industries as it does for the electronics industry. By providing incentives only for increases in research and development, this bill focuses only on future investment in research and development and does not favor those industries which in the past have concentrated on research and development.

25 PERCENT TAX CREDIT FOR UNIVERSITY CONTRIBUTIONS

This nation has long depended on its public and private universities to carry out the long-term basic research needed to sustain private technological advances. Many of the current high-technology industries are directly linked to basic advances made at leading universities ten to thirty years ago. The proposed 25 percent tax credit for business contributions to university research is a vital complement to incentives for research and development within private businesses for several reasons.

First, in this period of limited public resources and amidst cuts in the National Science Foundation budget, a clear need exists to encourage the private sector to make long-term investments in basic university research. In California, I am attempting to do this by instituting a program of matching grants for business and government contributions to microelectronics research at the University of California. A Federal tax credit will further encourage participation in such programs across the country.

Second, the United States faces a shortage of engineers and scientists which is reaching alarming proportions. It is in this area that a comparison with the Japanese is quite telling. Out of 10,000 citizens in Japan, there are 400 engineers and scientists; while in the United States, there are 70. Out of the same 10,000 persons in Japan, there is one lawyer, while there are twenty lawyers in the United States. This shortage will become even more acute when the increased military budget begins to attract scientists and engineers out of civilian research and development. Increasing the research and development funds available to universities can only help in this regard.

REVENUE COST AND PUBLIC RETURN

I am sure that you are all concerned about the effect of these tax credits on the federal deficit. In fact, each of these proposals carries an initial cost which is quite modest rel-

ative to the overall tax package now being considered. While I realize that each public dollar must bear close scrutiny, if the current academic studies are accurate, there is no tax reform available to you which has a higher public return than increasing investment in research and development. Taken together, the two research and development tax credits will have an initial revenue cost of just over $600 million in 1982, and $1 billion in 1985. In contrast, the tax cut proposed in Kemp-Roth will cost $10 billion in 1982 and $59 billion in 1985. Such a revenue loss is indefensible in light of the national interest in innovation. If enacted, these research and development tax credits will focus private management on long-term investment, on the quality of investment, and on the neglected supply-side of the economy—human knowledge. Broad based tax cuts will not accomplish these goals.

STIMULATING ENTREPRENEURIAL BEHAVIOR

In addition to these critical measures, I would like to briefly discuss two other proposals which would increase our nation's entrepreneurial efforts: the restoration of incentive stock options and a targeted reduction in capital gains taxes.

Until recently, a decisive incentive for inducing promising entrepreneurs and managers to leave the security of large firms to take the risk of founding or joining new firms was the incentive stock option. Such options were occasionally subject to abuse, so that Congress acted to eliminate them. If targeted to new and small firms, where they can serve as a major incentive to innovation, I believe that favorable tax treatment for incentive stock options should be reinstated. S. 689, authorized by Senators Packwood and Bentsen, is a step in the right direction.

We have all observed the tremendous response of the nation's investors to the 1978 across-the-board reduction in capital gains tax rates. The area of greatest response, and greatest value to the economy, is in venture capital. In California, I am proposing to stimulate venture capital by eliminating state taxation of capital gains arising from new long-term investments in small California companies. I believe that there is also room for further targeted reductions at the Federal level. While there is no single bill which goes as far as desirable, S. 889, coauthored by Senators Roth, Long, Bentsen, and Wallop, which would cut in half the tax rate on gains from investment in small technology based firms, is an important first step.

CONCLUSIONS

You now face the task of fashioning U.S. business tax policy for years to come. If new tax policy legislation is enacted which stimulates research and development and is accompanied by more entrepreneurial private management, the United States will emerge from current difficulties ready to compete in the world economy. If this opportunity to focus the tax structure on innovation is missed, we run the serious risk of providing major tax benefits indiscriminately with insufficient preparation for the future. I urge all members of the Senate Finance Committee to support the research and development tax incentives outlined here today.●

JOSE S. RIVERA HONORED

HON. ANTONIO BORJA WON PAT

OF GUAM

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mr. WON PAT. Mr. Speaker, earlier this month, Mr. Jose S. Rivera passed away on Guam after a long and illustrious career as an educator on Guam.

The outstanding efforts of this learned man was honored by the Governor's Commission on Chamorro Language on April 10, 1981, and is a fitting tribute to one who had a deep and abiding love for the people of Guam and the Chamorro language.

One of the highlights of his career was the work he did on the Chamorro language dictionary. This major work brought, for the first time, a better understanding of the Chamorro language to our people.

I join the commission in saluting Mr. Rivera and his many contributions to our island. I also want to take this opportunity to express my deep sympathy to the Rivera family for their loss. Guam will certainly be a lesser place without the talents and dedication of Jose S. Rivera.

I ask that the commission's resolution on Mr. Rivera now be placed in the CONGRESSIONAL RECORD.

RESOLUTION

Whereas, Mr. Jose S. Rivera has enjoyed a long and distinguished career as an educator in Guam, serving in both teaching and administrative positions and,

Whereas, Mr. Rivera has additionally made a major contribution to the children of Guam and the Northern Marianas through his work on the Chamorro Language dictionary and,

Whereas, his research work on the dictionary demonstrates that he is a meticulous and dedicated scholar with a deep and abiding love for the Chamorro language and people and,

Whereas, the valuable scholarly work that Mr. Rivera has completed is virtually irreplaceable and,

Whereas, most of the work on the Chamorro language dictionary was accomplished at great personal sacrifice and through individual initiative and,

Whereas, Mr. Jose S. Rivera is a man whose work and life has been an inspiration to his family and to the people he has taught or had contact with and,

Whereas, Mr. Jose S. Rivera has promoted the highest standards of scholarly achievement: Therefore, be it

Resolved, that the Chamorro Language Commission greatly recognizes and appreciates the efforts of Mr. Jose S. Rivera and encourages all citizens to also recognize his work.

Copies of this resolution shall be given to Mr. Jose S. Rivera, members of his family, the Commissioner of Agat, Guam Legislators from District IV, the Representative to the United States Congress, the Speaker of the Guam Legislature, the Lieutenant Governor and the Governor of Guam.

This is enacted by the authority of Public Law 7-162.

Duly adopted on the commission's regular monthly meeting of April 10, 1981.

Robert A. Underwood, Chairman; Clotilde C. Gould, vice chairman; Bernadita C. Dungca, sec'y; Jesus C. Barcinas, member; Carmen C. Blas, member; Monsignor Oscar L. Calvo, member; Pedro B. Leon Guerrero, member; Father Anthony S. Apuron, member.●

REAGAN'S SOCIAL SECURITY PROJECTIONS

HON. LES ASPIN

OF WISCONSIN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mr. ASPIN. Mr. Speaker, I was stunned when I saw the social security benefit cutbacks proposed by President Reagan.

There are two very serious problems with the Reagan package. First, the cuts are far greater than anything needed to keep the social security fund solvent. The cuts are 7½ times greater than the deficit the Reagan administration calculates the social security fund will face in the next 5 years.

Second, some of the cuts are just plain unfair. Reagan is proposing to cut by one-third the benefits of those 61-year-olds who plan to retire next January. Many people have made plans for years based on the promised annuity they would receive from social security. Now the President is proposing to pull the rug out from under them.

The declared goal of the administration is to induce more Americans to work to age 65 instead of retiring as early as age 62, as 70 percent of our citizens now do.

If that is really the goal, why then is Reagan also proposing to trim benefits for those retiring at age 65 by up to 9 percent? What's more, the administration has failed to calculate the ripple effect of more people working to age 65—with more older people working there will be fewer jobs for younger people, which means more people on the unemployment rolls and more payments to be made from the unemployment compensation fund.

The moral horror of the Reagan plan, however, is that it shows government breaking faith with the people. For years, millions of people have planned to retire at age 62 and have planned their finances accordingly. It is amoral to tell our 61-year-old citizens in May that we are going to slash their benefits in January by more than a third.

When deficits are found in the social security system, they can and ought to be corrected quickly. If duplicative or unnecessary benefits are found, they ought to be eliminated immediately. But here we are talking about fundamental changes in the benefit struc-

ture. Fundamental changes ought to be made after giving citizens advance notice of many years, not 8 months. Anything else is simply not fair.

Richard S. Schweiker, the Secretary of Health and Human Services, argues that the cuts are essential or "the system would go broke as early as fall 1982."

But let me show you a few numbers. These numbers come from the Reagan administration itself. The administration says the social security system will run a deficit of $11 billion between now and 1986. It also says that its proposals will prune $70.9 billion more from social security benefits than is necessary to preserve the system over the next 5 years. This is overkill.

Reagan social security projections, calendar years 1982-86, under Reagan economic assumptions

[Dollars in billions]

Deficit without any changes in the system	$11.0
Savings from Reagan's February program	$35.5
Savings from May package of proposals	$46.4
Total savings from all Reagan proposals	$81.9
Savings as percentage of deficit	745

There are only two possible explanations for this.

One, perhaps the administration does not believe its own economic assumptions. If the administration really does not believe all the things it said to support its budget over the last few months, then the social security fund would have a deficit bigger than $11 billion between now and 1986.

Or, two, the administration has discovered that there is only one way to fulfill its campaign pledge to cut taxes, raise defense spending, and balance the budget—and that is to brutalize social security.

It was only a few weeks ago that the White House said social security retirement was part of the holy—or holey—safety net. I guess in the interim someone in David Stockman's office discovered that social security accounts for almost one-quarter of Federal spending and could not be exempt from the ax.

The Federal budget is roughly one-fourth for defense, one-fourth for social security and one-half for everything else. Compared to Carter's budget for this year, Reagan has already slashed $51 billion from the "everything else" half and added $51 billion to the defense quarter. To make the overall savings he wants to make, he has to chop away at the social security quarter.

The social security fund may need help to remain solvent, but the Reagan administration proposals go far beyond anything needed to accomplish that. Instead of reforms to bail out the social security fund, the administration proposals would use the social security fund to bail out the Defense Department and other programs favored by the administration.

I do not think we have seen the last of the cuts. When he was Governor of California, Reagan said he thought social security ought to be made voluntary. He soft-pedaled that talk during last year's campaign, but I would not be surprised to see the idea surface again as the administration drives to boost defense spending and cut drastically away at everything else.

The changes may be both unfair and excessive, but given the current popularity and political clout of President Reagan, I anticipate that many of the President's proposals will pass. Reagan is riding the crest of a budget cutting tidal wave never seen in our history. Despite the unpopularity of the cuts among older citizens, he might be able to push them through.

Reagan commands the Republican Party as no previous Republican leader has in this century. And the Republican Party commands the executive branch, the Senate, and effectively controls the House because it can get the support of conservative Democrats. I certainly hope we can protect the social security system from this onslaught, but it would be misleading to promise victory.

There has been an outpouring of anger over the proposed cuts. The administration has reacted by saying it is willing to compromise. However, in saying this, Secretary Schweiker maintained a hard line. For example, while many critics have said any changes in the early retirement benefit should only apply after 1990, Schweiker said, "We would like to not delay that long because we need the revenue now." Furthermore, Schweiker said he was open to the idea of some kind of tax on social security benefits. While he was vague, it appeared he was thinking of a tax on retirees with large outside incomes—in other words, a tax that would negate the administration's proposal to allow retirees over age 65 to earn unlimited amounts of income without losing benefits.

The administration knows its social security proposals will not win favor with senior citizens. So it has tried to win support from younger people by promising a cut in social security taxes. What it has tried to avoid saying is that the cut would amount at most to $29.70, and that savings would not come until 1985.

The administration's public announcement contained only one page on tax rates. One column suggested there would be a tax cut starting next January with bigger cuts in later years. When I asked administration officials why there were two columns and what they were proposing, they told me the second column was what their bill would call for.

That provides for no change in the social security tax structure until 1985 when the tax rate would be trimmed by one-tenth of 1 percent. That means the maximum anyone would save is $29.70.

SOCIAL SECURITY TAX STRUCTURE

	Taxable income	Percentage		
		Present tax law	Reagan proposal	Maximum annual tax savings [2]
Calendar year:				
1981	$29,700	6.65	6.65	.....
1982 to 1984	[1]	6.70	6.70	.....
1985	[1]	7.05	6.95	$29.70
1986 to 1989	[1]	7.15	7.05	29.70
1990 to 2019	[1]	7.65	6.45	356.40
2020 and after	[1]	7.65	7.55	29.70

[1] Beginning in January 1982, the amount of income subject to the social security tax will rise annually in link with the annual increase in wage rates, not inflation rates.

[2] This is the savings assuming no inflation. The actual dollar savings will rise in step with wage rates. Based on recent experience, that means the savings will not keep pace with inflation and the savings in 1985 will have less buying power than $29.70 today.

The administration proposal contains a larger social security tax cut after 1990. However, we know from past experience that any tax written into the law to take effect more than 5 years in the future usually gets changes along the way as circumstances change, so I cannot take a tax cut proposed for 9 years hence very seriously.

A SALUTE TO "MR. NECTARINE"

HON. TONY COELHO

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mr. COELHO. Mr. Speaker, California's position of unrivaled leadership in agricultural production can be attributed to many factors—our warm, sunny climate, the industriousness of our growers, the quality of our crops, imaginative marketing, and much more. There are some, however, who are pioneers in my home State's farm community—those who have made significant contributions to furthering agriculture's role throughout the world. One such pioneer, I am proud to advise my colleagues, is my constituent, Mr. Fred Anderson of Merced, Calif.

Mr. Anderson is now 89 years young, but for his research and development of many varieties of fruits and nuts, among them 50 varieties of nectarines, he has earned the nickname "Mr. Nectarine." Nine almond varieties, six plums, six apricots, and a variety of cherries, pecans and pears are all Fred Anderson's doing.

A California native, Mr. Anderson was fascinated by the work of Luther Burbank and set out to emulate his research in plant breeding. He studied at San Jose State College and earned a degree in pomology and plant genetics from the University of California at

Berkeley. Upon graduation he taught vocational agriculture at the high school level while taking a summer job at a nursery in Fresno, Calif. That summer stint led to a 10-year, full-time position which involved him in tree production, budwood selection and plant breeding.

In 1932 Mr. Anderson moved to Merced, Calif. to pursue his interest on his own 62-acre orchard. The U.S. patent law had been enacted 2 years earlier, so many of the fruit and nut varieties he created were identified as being distinctively his. In 1936 his first patent was awarded and 6 years later one of his more famous fruit varieties was introduced, the "Le Grand" nectarine. To this day, seven of the nine most popular nectarines are Fred Anderson's accounting for 80 percent of California's commercial nectarine production.

Over the past decade Mr. Anderson has remained active in farming, growing on 250 acres, almonds, pecans, walnuts, and nectarines. His latest research has focused on fruit varieties that can withstand the San Joaquin Valley's summer heat.

To Mr. Anderson's credit are his having received the coveted Wilder Medal for his breeding of stone fruits, and the annual Research Award presented by the California Association of Nurserymen. Home gardeners and agriculturalists everywhere owe a debt of gratitude for the contributions Fred Anderson has made to the plant sciences. When one considers that virtually all the commercial nectarine production in the United States is concentrated in California, it is with a very special tip of the hat that we salute "Mr. Nectarine."●

ISRAEL EXPERIMENTS WITH INCENTIVE-ORIENTED ECONOMICS

HON. JACK F. KEMP

OF NEW YORK

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mr. KEMP. Mr. Speaker, I recently had the pleasure of meeting Yoram Aridor, the new Finance Minister of Israel. A few months ago, Mr. Aridor inherited an unenviable combination of economic conditions—a stagnant economy with 130 percent annual inflation. A succession of his predecessors had been unable to make any headway; in fact, the problems only got worse.

Despite the practical limitations on his powers, especially in an election year, Mr. Aridor has nevertheless made some remarkable progress in only 3 months. When I met him in my office recently, he explained that his philosophy is to encourage saving without punishing consumption—a classical philosophy which makes excellent economic sense, since savings are only worth what they can buy. Mr. Aridor has reduced excessively high excise tax rates—exceeding 100 percent in many cases—with a resulting net gain of revenue to the Government. The income tax brackets have been widened, to reverse some of the past tax-bracket creep caused by inflation. Inheritance and certain property taxes were abolished. Banks have been allowed to offer real, inflation-adjusted rates of return on time deposits. The most striking result, to my mind, is the fact that the central bank has not had to create money to finance the Government deficit for the past 3 months.

So far, these reforms have been temporary. And obviously, there is more to classical or supply-side economics than just tax cutting. No government can hope to end inflation without first restoring a sound monetary policy, or to maintain general prosperity without a consistently sound budgetary policy. But the success of these initial efforts to restore incentives indicates a new direction for Israeli economic policy, which I hope will be pursued further.

I believe we, in the United States, especially in Congress, can learn a great deal from what is happening in Israel. Israel's problems differ from ours only in degree, not in kind. We, too, suffer from a chronic stagflation, caused by a monetary and budgetary disequilibrium, and from a sapping of economic incentives. While reaffirming our moral and financial support for our staunch democratic ally in the Middle East, we must also recognize that, both in the United States and in Israel, a strong, noninflationary economy is the first prerequisite for a strong defense.

I will be traveling this week to Israel to examine the economic situation at firsthand, and speaking with various citizens and public officials. I would like to report my findings to my colleagues when I return. For now, I call my colleagues' attention to an analysis of the recent economic policies in Israel by H. C. Wainwright & Co., the Boston economic consulting firm. The article follows:

POLITICAL UPDATE—ISRAEL FLIRTS WITH INCENTIVES

Political goals have their price. However resolute and confident initially, a democratic administration pursuing fruitless policies will waver as the electoral hour approaches. The desire to retain power by then usually overwhelms ideology. Leaders who are quick and adept will switch policies without succumbing to a fall in the government, substituting one group of ministers and advisers for another. Israel, where a policy of economic austerity (higher taxes and curbs on "demand") has been replaced with one of tax cuts, is the latest example.

Given the consequences of "losing face" in politics, a smooth shift of direction is difficult and rare. What forced prime minister Menachem Begin to act was the resignation of his finance minister, Yigael Hurvitz, in January. Hurvitz, who had been attempting to bring down the triple digit inflation rate by curbing private expenditure and wages, resigned to protest a big union wage settlement for teachers. An important member of the beleaguered cabinet, his defection to Moshe Dayan's third-party slate necessitated an early general election, now scheduled for June 30.

The opposition Labour Party automatically became a heavy favorite to win, given the country's chronic economic malaise under Begin's administration. Sixty percent of the respondents in the latest *Jerusalem Post* poll named the "economy and inflation" as their greatest concern.[1] Ladbrokes of London quoted odds implying a 40 percent chance that Labour will win an overall majority in parliament (a rare occurrence in Israel).

For his new finance minister, Begin chose Yoram Aridor, a 48-year old lawyer and politician with a bachelor's degree in economics. As the *Miami Herald* correspondent Theodore Stanger describes it, Aridor "has embarked on a campaign of massive sales- and income-tax reductions in what appears to be an impromptu imitation of Reagan-style 'supply-side' economics. . . . No sooner was Aridor installed than he announced a series of moves in direct contrast to Hurvitz' classic inflation cure. Aridor slashed the value-added (sales) tax rates on a wide range of consumer items, adjusted the income-tax tables for inflation . . . and promised to link salaries fully to the inflation rate (versus the present 80 percent linkage level)."[2] He abolished the inheritance tax and the property tax, reduced some capital gains tax rates, and cut import duties. And he announced generous savings and home-buying incentives to bring funds back into the above-ground economy.

Actually, Aridor's options were limited. In a lame duck administration, there was little hope of pushing tax reductions through the Knesset. The cuts he made were ones which were within the jurisdiction of the Treasury. Partly as a result, his sales tax reductions will last for only three months. But popular reaction to the early cuts has strengthened his hand in making more permanent changes.

The initial economic responses have been extraordinary. According to Mr. Stanger, "the sales tax on new, small-cylinder cars dropped from 223 percent to 154 percent . . . Car sales boomed. In one four-day period in February, dealers sold 4,228 new cars, compared with 608 new cars sold in all of January." He also reports that "the demand for color TV's has been so awesome that El Al passenger planes have been recruited to bring in extra shipments. A recent El Al flight from Copenhagen was able to carry only a few passengers because most of the seats were occupied by boxes of TV sets."

The Governor of the Bank of Israel, which is independent of the government, warned that the tax cuts would cost the government too much revenue. But the Wall Street Journal's Israel correspondent reported early in March that "Even though the policy lowers taxes, the increased buying has actually swelled state revenue. Additional revenue in February alone to-

[1] *Jerusalem Post*, international edition, March 15-21, 1981, p. 1.

[2] "Big Israeli tax reductions put campaign into high gear," *Miami Herald*, March 20, 1981.

taled $26 million, on a foreign currency outlay of $14 million." [3] According to The Economist's correspondent, January was the first month for a very long time in which no money was printed (the deficit had been running about 50 percent of total government spending). And Aridor's income tax reforms are estimated to cut in half the number of wage earners in the top (60 percent) bracket.[4] The Jerusalem Post reports that Aridor has been "pleased with the results of his earlier price cutting initiatives," and "is expected to continue in the same vein until the elections." [5]

This early reaction, of course, is not entirely a symptom of sudden prosperity. It may largely reflect consumer's anticipations that the lowered tax rates are only a window which will be closed again should Begin lose the election. Still, it illustrates the sensitivity of an economy to tax changes. A more telling indication of the impact of Aridor's policies is the response in the polls. The Jerusalem Post reported two weeks ago that "the gap is shrinking between the ruling Likud and Labour." Measured in terms of likely seats in the Knesset (which are allocated in proportion to the vote), the Labour margin over Likud shrank from a towering 38 in the January-February poll to 27 seats in March.

The Labour Party, which favors wage-price controls, export subsidies, and greater government control over the economy, has taken the changes badly, attacking the tax bracket adjustments as an inflationary political bribe. One leading candidate for the Treasury should Labour win, Gad Yaacobi, reportedly "contends that the whole 'Aridor bubble' will burst within a matter of months." [6] And the Bank of Israel is in dispute with Aridor over the value of the shekel. The Bank's policy of continuing to let the shekel depreciate (initiated by Milton Friedman in 1977) is rapidly offsetting the new income tax cuts through bracket creep.

The case of Israel is much more important to the world than its population of 4 million and its GNP of $20 billion would suggest. First, Israel is an enclave of Western culture and technology in a region of the world that has been a military volcano. A weak Israeli economy implies both internal instability and a deterioration in military capability. Indeed, the Israeli foreign minister, who conferred with Ronald Reagan in Washington in February, has been warning his colleagues that Israel would be unable to carry on a continued arms race with the Arab states "if only for economic reasons." [7] Israel is under U.S. protection. As its economy has slackened, demands for concessionary loans to buy arms have increased. But the United States cannot increase military aid without threatening its own fragile relationships with important Arab states. A significant improvement in Israeli economic performance should thus tend to strengthen the U.S. position in the Middle East.

Second, every policy switch by a government, however small, reflects the testing and failure of some doctrine. The world economy is a natural laboratory, and experiments are taking place in every corner. Israel has put austerity on trial. Though monetarism is not yet dead, the verdict is in. Similar policies still in use in Britain and the United States will encounter the forces that brought the turn in Israel. There are many differences between the situation in Israel and in the U.K. or the U.S. Not least of these is the fact that the Israeli leadership was so much closer to electoral defeat. Elsewhere too, when defeat nears, the pressure for a switch in policy will become irresistible.●

THE MAXIMUM TAX TO UNEARNED INCOME

HON. CLARENCE J. BROWN

OF OHIO

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mr. BROWN of Ohio. Mr. Speaker, during the past years of this country's economic distress we have learned many things about our economy. Some of these lessons, particularly those that have shown our popular economic theories and tendencies to be little more than outdated myths, have been difficult to acknowledge and accept. But these lessons, by giving us a better understanding of our economy, provide us with a realistic hope that our present economic misfortunes need not necessarily be with us indefinitely.

One lesson that I believe to be of supreme importance is that saving is the main staple of a growing economy. The importance of saving is, in many ways, the basis of the new economic philosophy that we know as supply-side economics. Our past economic philosophy was centered around consumption; that demand drove the economy and that the fine tuning of demand through manipulation of the deficit could cure all our economic ills. The new economics could not distance itself more from this folly of consumption than it does by its emphasis on saving. If there is a lynchpin to supply-side economics, it is that additions to the supply of goods in the economy should be financed through additions to saving. It is the saving of the private sector and not the spending of Government that provides wealth to the workers of this country.

Despite the emergence of this truth and despite the fact that our foreign competitors continue to outsave us and outgrow us, our tax code still maintains a bias against saving. The most obvious and most easily removable of the tax code's barriers to saving is the higher marginal tax rates that apply to interest and dividend income, that is, the income derived from saving. Earned income is subject to a maximum marginal tax rate of 50 percent, while income derived from saving faces a top marginal tax rate of 70 percent.

While it is obvious that such a barrier promotes consumption at the expense of saving, it is also obvious that when marginal tax rates exceed 50 percent, it is more valuable to the saver to shelter a dollar of income than to earn a dollar of income. Consequently, what saving is done by those above the 50 percent bracket is inordinately saved in tax shelters, such as gold, artworks, and so forth.

To remove this bias against saving and to eliminate the attractiveness of many of our tax shelters, I am introducing a bill that will extend the maximum tax of 50 percent to unearned income as well as earned income. My bill will also maintain the tax brackets between 50 and 70 percent, however, so that eligible taxpayers may experience marginal tax rate reductions below 50 percent for savings income, if Congress approves marginal tax rate reductions this year. For example, if a taxpayer's savings income fell into the 54-percent bracket and Congress approved a 10-percent across-the-board tax cut this year, his savings income would be taxed at a rate below 50 percent instead of at the lowered maximum rate of 50 percent.

Unless the maximum tax is extended to earned income before all the brackets with rates above 50 percent are lowered to 50 percent, the tax cut will not be the same across the board. This is so because only the brackets with rates below 50 percent and the brackets with a 70-percent rate would experience the full impact of the tax cut; all the brackets with rates between 70 and 50 percent would be cut less (this assumes a 10-percent cut in the marginal tax rates per year for 3 years).

We must remember that one of the goals of the across-the-board, supply-side rate cuts is not to make all the brackets with tax rates above 50 percent have rates equal to 50 percent, but instead to lower the top marginal tax rate from 70 percent to 50 percent. We should want all the brackets' marginal rates to be cut the same amount and for those brackets with rates between 50 percent and 70 percent to fall below 50 percent when the series of tax cuts is completed. If the brackets with rates above 50 percent have their rates immediately lowered to 50 percent, this across-the-board cut can only be accomplished if the maximum tax is extended before we cut marginal rates.

These straightforward steps will eliminate the ridiculous distinction between earned and unearned income and will do much to encourage savings to flow to productive investment that will put more goods on the shelf and more workers in the factories.

For this reason and because the only way America can grow out of its economic misfortune is to increase productive savings and productive invest-

ment, I ask that you join me in supporting the extension of the maximum tax to unearned income.●

MISS ELIZA JANE PRATT

HON. W. G. (BILL) HEFNER

OF NORTH CAROLINA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mr. HEFNER. Mr. Speaker, it is my sad duty to report the death of one of our former colleagues, Miss Eliza Jane Pratt of Wadesboro, N.C., who was the only woman from our State ever to serve in the U.S. House of Representatives. Miss Pratt died on May 13, 1981, at the age of 79 after several years of declining health.

Miss Pratt was appointed by Gov. Gregg Cherry in June of 1946 to fill the unexpired House term of Eighth District Representative W. O. Burgin, who had died. She served until January of 1947. She did not seek election to a full term because of the illness of her mother.

Miss Pratt came to Washington in the 1930's to work on Capitol Hill. She worked for a number of Members of Congress and for several Government agencies, including the Library of Congress, the Office of Alien Affairs, and the U.S. Department of Agriculture. She returned to North Carolina in the 1960's.

Miss Pratt's untiring efforts, her dedication, and her loyalty to the citizens of North Carolina and our country will long be remembered.●

UNITARY METHOD OF STATE TAXATION AND OIL COMPANY PROFITS

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mr. STARK. Mr. Speaker, according to a recently issued report by the Citizen/Labor Energy Coalition:

In 1979, Conoco, Amoco, Exxon, and Mobil paid State income taxes amounting to 0.3 percent, 0.4 percent, and 1.4 percent of their total corporate profits in State income taxes, respectively. These figures are less than the rate paid by the average family of four making $16,000 the year before.

In a recent article, Ken Cory, controller of the State of California and chairman of the California Franchise Tax Board, discusses the critical problem of the ability of the international oil companies to avoid State taxation, and the added burdens this places on other State taxpayers as the States scramble to find added revenues to finance their new responsibilities. He notes that unitary method of State taxation of multinational oil companies, now used on California and a number of other States, while not without flaws, has one overwhelming argument in its favor—it works.

As the battle on unitary taxes shapes up here in the House, I commend this excellent article to the attention of my colleagues. The article appeared in the May 25 edition of Tax Notes.

[From Tax Notes, May 25, 1981]

THE OIL COMPANIES' DISAPPEARING PROFITS: A CASE FOR THE UNITARY METHOD

(By Ken Cory)

Clearly the nation is in serious trouble. Industry reels under the impact of inflation and taxation, unemployment rises and the burden of the poor becomes even heavier.

At the same time, these impacts have not been equally distributed between sections of the economy or the country. The connection between the record profits of the very large oil companies and the record losses of the very large automobile companies is easily perceived. The fact that gasoline prices are high and rising clearly has something to do with the fact that Chrysler is afloat only at government sufferance. The differences between the unemployment rates in Houston and Detroit are similarly not unconnected.

Nor is the auto industry alone. Indeed, were one scoring winners and losers, the winners are the oil companies and the losers are everybody else. The record oil industry profits last year were a disproportionate 40 percent of all manufacturing profits.

STATE TAX AVOIDANCE

The tax consequences are less apparent but no less real. They are of increasing importance as the Administration justifiably moves to return a large share of government power and responsibility to the states. A great deal has been written about the failure of the international oil companies to pay their share of federal income taxes, but very little has been written about the increased tax burden this has placed on other businesses. Even less has been written about the ability of the international oil companies to avoid state taxation, and the added burdens this places on other state taxpayers as the states scramble to find added revenues to finance their new responsibilities.

Rising oil profits require a reexamination of the international oil companies' ability to avoid state taxation and force smaller, less profitable businesses to pick up their share of the taxes. The Citizen/Labor Energy Coalition recently issued a report citing the following data compiled from state revenue departments:

". . . In 1979, Conoco, Amoco, Exxon and Mobil paid state income taxes amounting to 0.3 percent, 0.4 percent, 0.9 percent, and 1.4 percent of their total corporate profits in state income taxes, respectively. These figures are less than the rate paid by the average family of four making $16,000 the year before.

". . . In Colorado, Gulf and Cities Service reported no taxable income in 1978, despite combined sales in the state of $33.7 million.

". . . Wisconsin fared even worse that year, with Exxon, Gulf, Tenneco and Union of California all alleging that their oil business in the state was a losing proposition, and therefore paying no state income taxes."

With other industries feeling the shock of energy prices and the Administration asking state governments to carry a greater burden, the question of effective state taxation of the international oil companies has become a very serious matter. Some states have attempted to get at the problems by using sales taxes on gasoline or gross receipts taxes. Such taxes hardly address the problem since their burden falls directly and immediately on the consumers. A more sophisticated approach is clearly required.

TRANSFER PRICE SHELL GAME

The states' problem in taxing oil companies centers around what are called "transfer prices." These are the prices that one division or corporate subsidiary of a vertically integrated company charges other divisions or subsidiaries in the same company. For example, an oil company's crude oil producing division "sells" crude oil to its refining division and the refining division in turn "sells" gasoline, heating oil, and other refined products to its marketing divisions. These are not true market transactions in the sense that they represent nothing more than a company doing business with itself. They are internal bookkeeping transactions and involve no real transfer of revenue outside the corporate organization.

When the various divisions are in different jurisdictions which have different rates of taxation there is an obvious opportunity to play a "shell-and-pea" game in order to avoid taxes. If the refining division faces higher taxes than the crude producing division, taxes can be reduced simply by increasing the price at which crude oil is sold to the refining division. As a result, the refining division makes little or no profits and pays little or no taxes, while the producing division makes lots of money where the tax rates are low. In addition, it is not unknown for an international oil company to set up off-shore companies specifically for the purpose of avoiding taxes.

Two points should be made. First, all integrated (or "unitary") corporations that operate across jurisdictional boundaries are capable of such manipulation. In terms of sheer magnitude, however, nothing matches the capability of the major oil companies. Second, it is important to recognize that this shifting of profits need not involve fraud or other illegality. The Internal Revenue Service (as well as the tax authorities in other nations) uses the so-called "arms-length" method of accounting in assessing the legitimacy of intracorporate transfer prices. According to this system, transfer prices used for an item would be compared to the price that would prevail in a true market, or "arm's-length," transaction. In the petroleum industry, at any given time, there is never a single price for crude oil, gasoline, or any other petroleum product. There are clusters of "market" prices which reflect various long-term contract prices and spot market prices. The absence of any one clear "market price" gives considerable latitude to managers in setting intracorporate transfer prices.

There is more than ample evidence that the integrated oil companies manipulate transfer prices to minimize taxes. In one Canadian case Exxon was shown to have used a paper subsidiary in the Dutch Antilles to evade many millions of dollars of Canadian taxes. And a recent report from Canada's Director of Investigations and Research, Consumer and Corporate Affairs alleges that "During the period 1958 to 1973 . . . excessive costs were imposed on Canadian consumers as a result of overcharges on transfer prices for imported crude oil levied by foreign parent companies on their Canadian subsidiaries . . ." Prior to 1973, the in-

tegrated oil companies shifted their profits to the production end of the business to maximize their tax savings through the use of the depletion allowance and foreign tax credits. Since 1973, these same companies have used this vertical structure to shift profits and, not incidentally, to maintain the downstream control OPEC needed to support its price structure. In fact, the integrated oil companies have opposed divestiture legislation by arguing that the oil industry is essentially unitary and that there are efficiencies inherent in vertical integration that cannot be measured merely by examining transfer prices.

THE UNITARY SOLUTION

To deal with the transfer price problem, a number of states, and in particular California, have employed the "unitary" method of corporate taxation. Essentially this method looks at that part of the corporation which is located within the state and attempts to identify the real economic contribution it makes to the overall corporate unit. While the formulae vary from state to state, in general, they determine the portion of the corporation's revenue subject to state taxation on the basis of the amount of property, payroll, and sales within the jurisdiction.

The unitary system of corporate taxation is not without flaws. Most obvious is the difficulty of determining what is a "unitary" corporation. It is generally agreed that a conglomerate corporation whose parts do little or no business with each other should not be treated as a unitary entity. For example, a firm that runs a car rental operation in one jurisdiction and a hamburger chain in another is hardly unitary. In taxing the hamburger chain a state would not be justified in looking at revenue earned by the car rental. There are, of course, closer cases where the unitary nature of the corporation can be reasonably disputed. But the general standard is sufficiently clear and workable: are the commonly owned entities operated as an economic unit? In short, it is the business reality that is the test.

In comparison with the necessity of untangling a host of intracorporate transactions and comparing them against an arm's-length standard, the unitary method presents no extraordinary problems of fairness of workability. In fact some tax scholars have found it a theoretically superior instrument of tax policy. But, tax theory aside, there is one overwhelming argument for the unitary approach: it can actually be used to collect taxes. It is no exaggeration to say that the arm's-length method completely fails to provide the states with a workable method for taxing corporate income earned within their jurisdictions.

Some critics of the unitary method are willing to tolerate its use by states in taxing multistate corporations, but they object to its use in taxing the earnings of multinational corporations. They claim that looking at the worldwide earnings of a corporation in order to determine what portion the state may tax result in unfair taxation of foreign earnings. This argument misses the point. The purpose of the unitary method is to determine what part of a corporation's total income (whether multistate or multinational) can appropriately be said to have been earned within the state, not to tax income earned outside the state. Or, put another way, what contribution did the activities within the state make to the total earnings of the corporation? This is a wholly legitimate question for any taxing jurisdiction to ask. It is painfully obvious that the arm's-length method provides no useful answer.

POLITICAL BATTLE ON THE HORIZON

Despite this failure of the arm's-length method, multi-national corporations have been quite successful in promoting efforts to restrict the ability of states to use the unitary method. Two years ago there was a bitter fight in the Senate over a provision in the United Kingdom Tax Treaty limiting the unitary method. Ultimately a reservation to the provision prevailed by a close margin. The unitary method has also withstood a number of broad-based legal challenges. In two recent cases—brought by Mobil and Exxon—the Supreme Court reaffirmed the constitutionality of the unitary method and rejected claims that worldwide apportionment amounts to double taxation.

These courtroom defeats have encouraged the oil companies and multinationals to focus their opposition to the unitary method on legislative remedies. Republican Sen. Charles McC. Mathias, Jr., and Rep. Barber Conable, the ranking Republican on the House Ways and Means Committee, have introduced legislation to prevent states from using the unitary method to tax multinational corporations. Needless to say, the bills have very powerful support. Advocates of the bills are now interested in attaching some form of the legislation to the pending tax-cut bill. This strategy could force Congress to consider the unitary method in a loaded political setting that would hardly be conducive to a deliberate exploration of the issues.

It is worth noting that the federal government has similar problems in dealing with transfer prices and a strong argument can be made for the use of the unitary approach by the Internal Revenue Service. While the U.S. Treasury Department supported the U.K. Tax Treaty and the Mathias bill, it has used the unitary approach itself. Unfortunately, the IRS has not done so systematically, and it certainly has not done so with the international oil companies.

With the rapid increase in both energy prices and profits, we simply have no choice but to find an effective means of taxing the international oil companies. It is irrational to rely on a system that permits 40 percent of manufacturing profits to remain out of the range of effective taxation. To ask that the states do so in the context of the current economic policies borders on madness. It requires other businesses whose profits are already suffering to bear more than their share of the burden. The unitary method may not be a perfect solution, but it is a reasonable, workable, and equitable approach and at the moment we have no other.●

THE TORTURE OF JACOBO TIMERMAN

HON. MICHAEL D. BARNES

OF MARYLAND

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mr. BARNES. Mr. Speaker, Jacobo Timerman's account of his imprisonment and torture in Argentina, entitled "Prisoner Without a Name, Cell Without a Number," has been universally acclaimed. But the most interesting and perceptive piece I have seen recently has been not on the book, but on the man. In an interview with Christian Williams of the Washington Post, Timerman gave us a two-paragraph human rights lesson that is worth a dozen political science textbooks, destroying the myth that our human rights policy has failed and capturing the importance of the policy for our own democracy and society. This passage read as follows:

America gets impatient with human rights, restless. You don't see the accomplishment. Do you expect to change a government with a policy? No, if you want to change the government you have to send in the Marines. What a human rights foreign policy does is save lives. And Jimmy Carter's policy did. How many? I don't know. Two thousand? Is that enough? But that policy is even more important to you than to us. It builds up a democratic consciousness in the United States. It is more important for the United States that Lefever be defeated than for Argentina.

I am very disappointed in President Reagan. * * * A new administration is entitled to change an approach, to change a strategy, but not to change a policy. The policy of human rights belongs to United States history. This administration is not changing a strategy, but an ideology.

Mr. Speaker, our human rights policy works. The new administration has an opportunity to learn from the past and show us how we can be more effective in our pursuit of human rights. I hope the administration will seize this opportunity, and will not abandon this policy that is so important to people everywhere—not least to ourselves.

I include the entire article at this point:

[From the Washington Post, May 22, 1981]

THE TORTURE OF JACOBO TIMERMAN—THE AGONY AND THE WITNESS OF THE JOURNALIST AND THE JEW

(By Christian Williams)

"The word that I hate most is 'unbelievable,'" said the man who had been tortured. He wore a well-cut, pin-striped suit, and his face, tanned the color of his expensive gold wristwatch, reflected the irony in his voice.

"What people want to hear about first is the torture. I am tired, but I try to tell them. 'Unbelievable,' they say. That's the word they used when the witnesses came out of the concentration camps.

"But I have an idea. On the television talk shows, I will agree to be tortured just as I was in Argentina. Then everyone will know what it's like.

"It would be easy, because the equipment is very simple. All you need is an electrical outlet, and a small transformer with a dial, and two wires for the electrodes. Here it's 110 volts, and in Argentina it's 220 volts, but otherwise the same. I would want a doctor in attendance.

"The first stage is pain, excruciating pain wherever the electrodes are applied. People would see my muscles contract, my hands drawing up in fists like this, my back arching, and hear that particular scream. The second stage, when they turn the dial up, destroys the tissue wherever the electrodes are applied. The testicles, say. The third stage stops the heart." He touches his chest.

"I would agree to be tortured on television to the first stage."

Jacobo Timerman was on the "Today" program yesterday, and will be interviewed today by the CBS Morning News, Cable News Network and Bill Moyers. It is unlikely that American news organizations will take him up on his offer, even to the first stage.

Much better to retain a certain distance from Jacobo Timerman, the distance appropriate to the outspoken intellectual whose case has come to symbolize the Argentina Problem—the problem of a nation struggling to govern itself while beset by terrorism, kidnaping, bombings, a 170-percent inflation rate and the scrutiny of its political allies.

Timerman, now 58, was until April 15, 1977, the publisher and editor in chief of La Opinion, a liberal daily newspaper in Buenos Aires. He was outspoken, and influential, and seen frequently on Argentine television. On that date, 20 armed men entered his 15th-floor luxury apartment, handcuffed him from behind, and took him to prison. He was jailed until Oct. 13, 1977, and kept under house arrest thereafter until Sept. 24, 1979. Twice the Argentine supreme court found that he was imprisoned without charge. The second time it so found, the junta responded with a threat to disband the supreme court. Timerman, however, had become a nuisance also in his incarceration. So his citizenship was revoked, his newspaper and all his possessions confiscated, and he was expelled from the country.

In ridding itself of Jacobo Timerman, the Argentine military government gave his story to the world. Bitter and combative, it now reaches out from the pages of his book, "Prisoner Without a Name, Cell Without a Number," and the spate of articles and interviews accompanying his book-promotion tour. The context of his story is Argentina, where since 1976 thousands of persons have "disappeared"—estimates of how many range from 6,000 to 20,000—and many more have been arrested and imprisoned.

But it begins and ends with his Jewishness, which he requires that others confront as he has confronted it.

"To be a Jew is to have almost a second biology," he said in Washington this week. "That is what I have learned. You are a man—and a Jew. You are a journalist—and a Jew. The question is always of survival. Nobody can explain why anti-Semitism exists, why a people is hated. Yet we are. Before Argentina there was the Holocaust the Inquisition. That is why I am a Zionist. We must have a homeland, and we must have guns."

Timerman was more than a Jew and a liberal. He was rich, and a Zionist. A military officer once described him as "a talented, arrogant Jew." His partner in La Opinion was David Graiver, also a Polish-born Jew. The junta believed Graiver was funneling money for the Montaneros guerrilla movement. Graiver was arrested, but later died in a plane crash.

Timerman was jailed and tortured but never charged. "That's the way it works in a totalitarian system. You're arrested because you're guilty." He was presumed guilty of participating in a worldwide plot to wreak economic havoc in Argentina—and specifically to seize control of Patagonia and establish a Jewish state there.

"I would be taken from the torture machine into another room, and there would be a man, an intellectual, smoking a pipe, pronouncing his words correctly. A man just like you or me, who would carefully explain that he was not a torturer.

"Then he would say: 'We know Brzezinski is a Jew. We know President Carter is a Jew, he changed his name from Braunsweig. We know Brzezinski has a plan to take over Brazil and Argentina and Chile, You must tell us about the details.' "

Did they really expect answers? He shrugged. "They were enjoying themselves. They had the Jew where they wanted him, at last."

THE FATALIST

By birth a Jew ("I am not at all observant"), by vocation a political journalist. He served his apprenticeship on the dailies of Buenos Aires. One day, he recalled, his editor told him that the time had come when he could have a by-line. This was a great privilege because most articles were unsigned.

"'One thing,' the editor said. 'Jacobo sounds too Jewish. Why don't you sign your name as Alejandro?' But I held out, and at the time I though I had scored a great victory. Only now I realize that it was a great defeat that the question should arise at all."

Timerman also revealed a talent for entrepreneurship. In the 1960's he introduced the newsmagazine concept to Argentina by founding the journal Primera Plana. It was successful. He sold it and used the profits to found the daily La Opinion in 1971. He was both publisher and editor in chief, with 45 percent of the stock. Graiver had 51 percent. Timerman's success was now conspicuous. He had his fine 15th-floor apartment with a view. He had a holiday home in Punta del Este, in Uruguay, "like the other rich men in Buenos Aires."

La Opinion was a liberal paper, distinctly intellectual, and it followed no predictable party line. But then, neither did Argentina. Between 1973 and 1976 there were four Peronist presidents, and a dozen notable political and military and revolutionary splinter groups, encompassing Trotskyite guerrillas, Peronist death squads, labor unions, the Church and competing branches of the armed forces. The nation was at war with itself, but the front was everywhere within its long borders reaching southward between the sea and the Andes.

One morning Timerman received two letters at La Opinion. One was from a rightist terrorist group, condemning him to death. The other was from the Trotskyite Popular Revolutionary Army, also threatening him with death.

Timerman responded on Page 1, revealing the threats and wondering with fatalistic curiosity, "Who will wind up with my corpse—the terrorists of the left or those of the right?"

Timerman had at one point called for a coup—the traditional method of changing goverments in Argentina—and in retribution Isabel Peron closed La Opinion for 10 days. The coup came in 1976, putting the army in power. But it was the army—the Nazi contingent within the army, he says—that arrested him and took him away.

HEROIC MEASURES

But the first question is always about the torture. "Unbelievable."

"People say that a strong man can come out of torture with whatever he had when he went in, but it's not true. Some part of my spirit was destroyed." He scoffs at the notion that torture can be withstood, that torture tests and defines the hero.

"No," he said, "when you are tortured to learn the address of a building, or the name of a man, you are lost. You will tell them anything. Albert Camus gave these instructions to the French Resistance: Try to hold out long enough for the others to escape. But do not die under torture. Try to survive. Of course, Tito's Underground received different instructions: They were supposed to die. That seems unreasonable.

"Mine was an ideological torture, because I had no address they wanted. Mine was a torture only from hate. It was not only the machine, but being tied in a chair all night, intentionally wet down. Of being required to soil yourself.

"It's hard to describe. I begin to think that perhaps everyone should be tortured. Tell me what you think of this idea: When you graduate from high school, you are tortured to the first stage for five minutes. Then when you get a college diploma, you must undergo another 10 minutes. If you want to run for office, another 15. This way it would not seem unbelievable."

He is congratulated on his sense of humor.

"Oh, I have no sense of humor," he said. "Only a sense of irony."

END OF AN IDEOLOGY?

This week in Washington, Timerman, as a spectator, visited the Senate Foreign Relations Committee hearings on President Reagan's nomination of Ernest W. Lefever to head the U.S. human rights program. Introduced by Sen. Charles H. Percy (R-Ill.), Timerman was greeted with loud applause. Lefever represents a less conspicuous policy regarding human rights in friendly governments. This is being called "quiet diplomacy," in contrast to the aggressive policies of Jimmy Carter.

"A quiet diplomacy is a silent diplomacy," Timerman was saying the next day. "Nations maintained a silent diplomacy with Hitler, and you see what happened.

"America gets impatient with human rights, restless, you don't see the accomplishment. Do you expect to change a government with a policy? No, if you want to change the government you have to send in the Marines. What a human rights foreign policy does is save lives. And Jimmy Carter's policy did. How many? I don't know. Two thousand? Is that enough? But that policy is even more important to you than to us. It builds up a democratic consicousness in the United States. It is more important for the United States that Lefever be defeated than for Argentina.

"I am very disappointed in President Reagan," he said. "A new administration is entitled to change an approach, to change a strategy, but not to change a policy. The policy of human rights belongs to the United States history. This administration is not changing a strategy, but an ideology.

"So much in Argentina is unique," he went on. "And no one knows about it. The murders, the disappearances, the tortures. Just to ask the names of the missing persons was extremely dangerous, and yet how could a newspaper not ask? This is why I did not go into exile, although my wife and my sons and I talked about it many times.

"My wife would say, 'I will run the paper, you escape.' I would say, 'No—I will run the paper, you escape.' But how could we when there was a Committee of Mothers of Missing Children asking our help? Do you know that in Argentina there is also a Committee of Grandparents of Missing Grandchildren? Where else in the world would you find a Committee of Mothers of Missing Journalists?

"Think of it. More than 100 journalists have disappeared in Argentina in the past four years. How come nobody knows about that? How come the newspapers of the world have not merely printed their names? This is a genocide of journalists, and nobody knows."

Those are the things Timerman says in interviews, and to anyone who will listen. It is not possible to corroborate the statistics of Argentinian chaos. But Timerman's coroboration is his experience: He was arrested, jailed, tortured and, finally, released, but he was never disputed with a formal charge.

THE SPIRIT IN EXILE

He is a survivor, of course. Although the junta confiscated all his property, including La Opinion (which he valued at well over $5 million, and which has been shut down), they could not touch his summer home in Uruguay. He sold it, and that money established him in Tel Aviv, where he lives now. His wife is there, and two of his sons. The third son is in New York, studying foreign affairs. Timerman has just written another book, about Israel, and does a column twice weekly in Maariv, and is not troubled financially. Timerman likes Israel, but he is not used to the colors. "The blue of the sea is too blue. It is not the blue of the South Atlantic."

Yet in this week of witness in America, his opinions probably wield more power than they ever have before.

He scoffs at the notion that he has survived intact, and with power.

"Part of my spirit has been destroyed," he said. "The great cost has been to my peace of mind. I try to come back now to the things that were most important to me, and I cannot. It is very frightening. I have lost the ability to read the great poets, Sophocles, or T. S. Eliot, or Delmore Schwartz, that were so important to me. I have been invited to Princeton to write a book about the effects of torture on the spirit, and I may do it. But I am afraid of what I may learn.

"You see, I was not degraded by the torture, but I was deteriorated. Many times I have asked myself, without my wife and children what would I do? Because of them, I cannot wake up in the morning and begin to suffer. But if it were not for them, I would always travel. I would be alone, and have no permanent things. I would keep from remembering, for that is the trick of survival under torture, and the big tragedy."

Timerman believes that Argentina must improve, that the worst times are over there, and that many of the 1 million exiles will eventually be able to return. Perhaps he will, too, because it is the land where he grew up, and made his fortune, and raised his family?

"No," he said sharply. "I will never return. I cannot. You see, I was not treated there as a political enemy, I was not hated for my politics. I was hated because I was a Jew, and I can never return to that. I will stay in Israel. I am no longer ashamed to love my Jewishness, because when I was in the diaspora, I was ashamed."●

PRIME TIME FOR SENIOR CITIZENS

HON. DENNIS M. HERTEL

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mr. HERTEL. Mr. Speaker, senior citizens in our Nation are facing a crisis at the hands of the present administration. The debate is complex and many faceted. I recommend to my colleagues this excerpt from an article in the Grosse Pointe News dated May 14, 1981, by Marian Trainor as an insight summary to the dilemma we must face on programs for older americans.

PRIME TIME FOR SENIOR CITIZENS

(By Marian Trainor)

Much has been written about President Reagan's economic program and its affects on older Americans. Opposers of the program point out Medicaid help will be cut by $1 billion during the next fiscal year and by $5 billion by 1986. The President refutes by promosing that the truly needy and the elderly will not be hurt by the program.

"Not so" counters the opposition. They say with health-care costs rising even more sharply than the high rate of inflation, a limitation on the federal contribution to the program which is now funded jointly with the states, would result in the states bearing most of the burden of any further rise in hospital, nursing home and doctor fees.

This could result in limiting the number of people accepted for Medicaid benefits or slashing Medicaid, which differs from Medicare in that it aids those people under 65 who cannot afford the care they need.

It could force many poor people to postpone treatment of ailments until they require hospitalization. On the face of it the federal government saves money, but what is saved at the federal level on preventive care will be spent at a state level on the much more expensive hospital care. This is particularly true in cases requiring nursing home care.

Proponents of Reagan's program argue present federal programs will be lumped into block grants and turned over to the states thus eliminating bureaucratic red tape and letting states establish their own priorities.

"Too costly," counters the oppositon. They believe that such services as home-delivered Meals on Wheels, Homemaker Services and Senior Centers would suffer. Under this plan local agencies would be forced to jostle for their money at the state level rather be assured of regular federal support.

And there are other concerns. Food stamps would be reduced by $1.8 billion at a time when the number of older persons receiving food stamps has increased and the cost of food has escalated. Under the formula which denies food stamps to people with incomes over 130 percent of the poverty line, most needy elderly would be ineligible.

Other cuts include funding for aged research and a change in the cost-of-living index for retired civil service workers. Under the new plan the index would be done annually, instead of twice a year as it now is calculated.

From the other side of the fence come promises from those who support President Reagan's budget "reform." They say that social programs will not only be maintained but more money will be spent on services during the next four years.

The big argument here is that the "social safety net" program will command an increasingly large portion of the budget moving from 3.6 percent of the 1981 budget to 40.6 percent of the 1984 budget. Under the "social safety net" (a concept initiated in 1930 under the New Deal) the "truly needy" will be protected by Social Security benefits, unemployment benefits and cash benefits for dependent families. This concept embraces the elderly, the disabled and veterans.

Which voices should we heed? Where shall we turn for reassurance that older Americans will not be deprived under the President's program? Older citizens have lived through hard times—and some good times. They are willing to share the burden of establishing fiscal responsibility but it is one they feel all Americans should assume equally.

If senior citizens are to retain what is needed to insure the necessities of life—good nutrition, adequate housing, medical care and contact with the outside world made possible by available transportation and Senior Centers—it would appear that they are going to have to become very active politically both as individuals and groups. They are going to have to let elected officials at the state and federal level know their needs so that when money is apportioned, a fair share will be allotted to them under the program.●

THE GREAT LAKES: AN ABUNDANT SOURCE OF FRESH WATER

HON. JAMES J. BLANCHARD

OF MICHIGAN

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mr. BLANCHARD. Mr. Speaker, I recently introduced H.R. 3600, the Great Lakes Protection Act of 1981, because I feel that it is time that the protection and preservation of the Great Lakes become an important part of our national agenda. While water shortages plague much of the Nation, we in the Great Lakes basin are surrounded by billions of gallons of clean fresh water. I would like to call your attention to the following editorial from the Detroit News which offers additional evidence of the importance of the Great Lakes as a precious national resource in light of serious water shortages in many other parts of the country.

WATER

Water, the first requirement of all life, is abundant here in the Great Lakes basin, an increasingly salient fact as national concern grows about the worsening drought in many parts of the country.

Consider:

The Mississippi River, which transports half the grain, 20 percent of the crude oil, and 15 percent of the coal moved in the United States, was closed to navigation for five days last month because of a sharp drop in the water level. Barges now carry 20 percent less cargo to reduce their draft.

Even so, 126 tow boats and 1,455 barges got stuck in the mud in January.

At Memphis, the river fell right off the water gauges. New markers were installed, and the river dropped below them. Never has the river been so low.

On the East Coast, New York City's reservoirs hold only two-thirds of the normal supply. New Jersey has a tough water-rationing program. Washington's water supply is threatened because the flow of the Potomac is only 1.3 billion gallons a day, compared with a normal flow of seven billion gallons.

The flow of fresh water from the Middle Atlantic states into Chesapeake Bay has declined so much that the salt water "front" (the line where saline and fresh water meet) has pushed inland 28 miles.

In the Midwest and Plains states, farmers are worried about the survival of moisture-starved hard winter wheat.

Meteorologists explain that the west-to-east jet streams, the engines that drive storms across the country, have shifted north over Canada. Two persistent high-pressure centers have parked over the West Coast and Rocky Mountains for more than two months, forcing stratospheric winds far north of their normal course and leaving most of the nation wanting for rain. If the pattern doesn't shift, spring will be dry—calamitously dry.

In dramatic contrast, Michigan's situation on the drought map is markedly favorable. Detroit shows a Palmer scale "plus three" (excessive) moisture rating, as does the southwestern part of the state. Central Michigan records "plus 2," well above normal, while the northern Lower Peninsula and the Upper Peninsula are in near-normal or mild-drought categories.

Fresh water is Michigan's most valuable natural resource, and there is far more than enough for drinking and industrial processing. While most of the nation is parched, here in our providentially well-situated state, Michiganians watch billions of gallons of fresh water flow daily by their door.

It's time Michigan paid more heed to its limitless supply of fresh water and turned this unique asset to good account.

Industries of all kinds, like people of all kinds, need water. We've got it. Let's flaunt it.●

GUN DECONTROL

HON. ELDON RUDD

OF ARIZONA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mr. RUDD. Mr. Speaker, I am pleased to join with my distinguished colleague from Missouri (Mr. VOLKMER) in cosponsoring again in the 97th Congress the Federal Firearms Law Reform Act, H.R. 3300.

Since the adoption of the Gun Control Act of 1968, many unnecessary restrictions have been placed on law-abiding U.S. citizens who own, desire to own, collect or sell firearms.

Sufficient time has now passed to review objectively the effects of the 1968 act and to determine how the law might be improved.

With this consideration in mind, 182 Members of the House cosponsored similar legislation, H.R. 5225, during the 96th Congress. The bill is a compilation of various reforms designed to correct specific abuses which have been perpetrated by the Bureau of Alcohol, Tobacco, and Firearms which oversees the Gun Control Act.

There is now increased sentiment for the reforms encompassed within this bill. Hearings should be initiated promptly so that action can be completed expeditiously.

The legislation is straightforward. Its objective is to amend the 1968 act to focus more clearly on enforcement provisions against those who actually abuse the use of guns. The bill would eliminate the regulatory morass which has unnecessarily restricted the legitimate actions of gun collectors, dealers, hunters, and other law-abiding gun owners.

The bill does not rescind or otherwise amend the major provisions of the 1968 act dealing with identification of purchasers, mail order sales, sales to minors, and related areas.

The Bureau of Alcohol, Tobacco, and Firearms has become notorious for its repeated attempts to initiate complex and cumbersome regulations which ultimately restrict legitimate gun ownership.

This bill seeks to eliminate much of this discretionary authority granted by the Congress to the Bureau. For instance, the legislation provides for a precise and limited definition of "engaging in the business" of dealing in firearms and ammunitions—activities which are regulated by the Gun Control Act of 1968.

The BATF has consistently used the broadest possible interpretation of engaging in the business to bring under its jurisdiction every conceivable aspect of gun ownership, including occasional sales by gun enthusiasts and small collectors. This restricted definition will preclude the BATF from harassing citizens—primarily small collectors—who sell guns only occasionally.

Under the revisions of the bill, licensed collectors would be permitted to collect whatever type of firearms they desire with a continuation of relevant reporting requirements to the BATF. Currently, only curios and relics are permitted to be collected.

Additionally, many general stores and bait and tackle shops in Arizona—and other similar stores throughout the country—are required to keep elaborate records of all ammunition sales, even though they do not sell firearms. This reform bill would eliminate cumbersome paperwork requirements for such stores which sell ammunition.

The legislation specifies that only firearms actually involved in an alleged violation may be seized by the BATF from an owner. The Bureau has repeatedly seized whole collections of guns and retained them for extended periods.

This bill provides for 90-day comment periods in the promulgation of all BATF regulations in order to provide citizens sufficient time to voice their views on such additional regulations. Even after having been finalized, the regulations would be subject to congressional review and veto procedures under the revisions of this bill.

In short, Mr. Speaker, the primary thrust of this legislation is to eliminate excesses of a bureaucracy which has attempted to accomplish through regulation restrictions which Congress never intended. Congress must act to clarify the intent of the Gun Control Act so that those who do not intend criminal activities will not be subjected to the whims of an overzealous Washington bureaucracy.

An additional important aspect of the bill is the prohibition of parole for those convicted under the existing penalties. Lenient judges would no longer be allowed to thwart congressional intentions to deal sternly with gun-possessing criminals.

Mr. Speaker, I believe these are all reasonable provisions which should receive early and favorable consideration.●

REPAYING A DEBT OF GRATITUDE TO OUR VETERANS

HON. RON de LUGO

OF THE VIRGIN ISLANDS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mr. DE LUGO. Mr. Speaker, this is a great day for the American veteran. Today, we have an opportunity to thank the thousands of men and women who unselfishly sacrificed years of their lives to protect their fellow countrymen. The House of Representatives will consider today a series of bills that seek to repay the debt of gratitude owed to these modern-day partiots. These bills are of particular importance to the U.S. Virgin Islands, where the young men and women who are my constituents have joined and served in the Armed Forces in proportionatelly greater numbers than most other regions of the United States. I am pleased to indicate my support for the following bills and I urge my colleagues to approve them:

VETERANS HOME LOAN GURANTEES (H.R. 2039)

This bill authorizes the VA to guarantee home mortgage loans which have provisions for graduated payment plans. These mortgages allow young people to purchase homes by structuring mortgage payments so that they are low during the early years of the mortgage and increase in later years as the individual's income, and thus ability to pay a higher mortgage, increases. Passage of this legisla-

tion will make it easier for our younger veterans to partake in the American dream—owning a home.

PRISONER OF WAR BENEFITS AND HEALTH CARE SERVICES ACT OF 1981 (H.R. 1100)

This bill changes from 6 months to 60 days the length of time a former POW must have been interned to establish a presumption-of-service connection for certain diseases and medical conditions. It also provides service-connected medical benefits for psychosis, psychoneurotic disorders, and psychophysiologic disorders. Finally, the measure would provide medical treatment, both inpatient and outpatient, on a priority basis to former POW's, regardless of the length of their internment.

Many of us cannot comprehend the severe traumas, both physically and psychologically, that our American POW's experienced as a result of their incarceration. The prisoner of war experience is characterized by torture, execution, "death marches", starvation, and—most of all—a crushing sense of doom and loss of hope. Passage of this legislation would extend a helping hand to these people and help them adjust better to civilian life.

VETERANS' TRAINING AND BUSINESS LOAN ACT OF 1981 (H.R. 3423)

This bill provides Vietnam-era veterans with 2 years of additional eligibility for on-the-job training and for vocational education. The unemployment rates of veterans who served in Vietnam continues to be unacceptably high. For example, during the first quarter of calendar year 1981 their unemployment rate was 10.9 percent. Passage of this legislation will certainly contribute to lowering that rate to more reasonable levels.

This bill also establishes a veterans' business loan program in the VA and authorizes $25 million for a revolving fund to finance it. All veterans with at least a 30-percent service-connected disability and Vietnam era veterans would be eligible for either direct or guaranteed loans up to $200,000. As we all know, many Vietnam era veterans have now completed their formal education and are now ready to become entrepreneurs in various fields of business. While they were serving their country, however, their civilian counterparts were already entering the mainstream of American business. When the servicemen returned from Vietnam, they had to play catch-up. This bill will enable them to make up some of that lost ground.

Finally, this bill would extend for an additional 2 years the veterans' readjustment appointments program. This would allow the VA and other Federal agencies to reach many more Vietnam era veterans who likewise need only the opportunity to prove their ability to overcome the employment barriers encountered upon returning to civilian life.

VETERANS HEALTH CARE ACT OF 1981

This legislation would extend the Vietnam era veterans' readjustment conseling program and provide medical care for Vietnam vets who were exposed to herbicide defoliants, including agent orange. Of more immediate importance to the Virgin Islands, is the provision which would extend the Veterans' Administration's authority to provide contract hospital care for veterans with non-service-connected disabilities in the Virgin Islands. Such an extension would insure that the VA could maintain the medical care now being provided pending the review and analysis of the recent report which assessed the health care need of veterans in the Virgin Islands.

Mr. Speaker, every time I return to the Virgin Islands I make it a point to meet with a number of men and women who served in the armed services. Many of them are Vietnam veterans.

The message these people give me is very clear—all is not well.

In many instances they still find themselves at a disadvantage with those who have not served in the Armed Forces. Others are still experiencing difficulties in trying to adjust to civilian life.

It is incumbent upon this Congress to take whatever steps are necessary to put our veterans on an even keel with the rest of the population. Passage of these bills will certainly be a giant step toward reaching that goal.●

PRESIDENT REAGAN'S FOREIGN POLICY

HON. FORTNEY H. (PETE) STARK

OF CALIFORNIA

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mr. STARK. Mr. Speaker, I am concerned about the direction—or lack of direction—of the current administration's foreign policy.

What are the fundamental objectives and priorities of U.S. foreign policy today?

The administration has talked tough with the Russians—but lifted the grain embargo.

The administration has drawn the line against Soviet subversion in El Salvador—without convincing either the American people or our allies abroad that the Soviet Union is the source of that sad country's troubles.

Most recently the United States was the only country to vote against the World Health Organization drafted international marketing code for infant formula. The administration seems to have misjudged its mandate in this case. The State Department admits that this vote has brought a deluge of mail running 9 to 1 against the U.S. position.

I would like to bring to the attention of my colleagues a column by Richard J. Barnet, author of "Real Security: Restoring American Power in a Dangerous Decade", which appeared in Monday's New York Times. In this column Mr. Barnet discusses the administration's performance in the foreign policy arena to date.

[From the New York Times, June 1, 1981]

THIS IS DEALING FROM STRENGTH?

(By Richard J. Barnet)

WASHINGTON.—The Reagan Administration appears to have declared as nonproblems the so-called global concerns over which the Carter Administration briefly agonized: what to do about the catastrophic world food situation, the instability of the world monetary system, the sharing of resources under the sea, the mounting debts of poor countries, the growing rivalries within the developed world over access to scarce resources, and the environmental consequences of such rivalries.

Mounting economic and social instability in the third world is the No. 1 security problem, but the Administration's preferred approach to this threat to peace is to shake a finger at Moscow or to repaint an old battleship. It is a dangerously unrealistic policy, for there is no way that the United States can be restored to economic health without taking on these global problems in a serious way.

But is it not unfair to judge President Reagan harshly for not doing what he never had any intention of doing? Should not his performance be judged by his own goals? Unfortunately, by that test, too, he is headed for failure.

The Administration came to office promising to restore America to what Dean Acheson once called "situations of strength." Obviously, more than a military buildup was required. The Government would have to learn once again to speak with one voice on foreign policy issues. It would have to demonstrate strong public support for its program to restore American power. It would have to strengthen America's ties with its major allies. Most important, it would have to demonstrate that the nation's economy was vital enough to sustain our global commitments.

So far, the Administration has succeeded in confusing friend and foe alike. The President calls Soviet leaders liars and cheaters but invites them back into Middle East discussions. According to Secretary of State Alexander M. Haig Jr., the Russians are powerful enough to orchestrate much of the world's mischief, yet he says they are about to fall into the very ashcan of history that they have been preparing for us. The President's closest adviser, Edwin Meese 3d, announces that military action against Cuba is being considered, but the grain embargo against the Soviet Union is precipitously lifted without even advance notification to our allies.

El Salvador is selected as the critical site to make a stand against the newly discovered worldwide Communist-terrorist conspiracy. But neither the Congress, the Roman Catholic hierarchy, nor our European allies believe that the bloody civil war in that country was invented in Moscow. International terrorism is a fashionable construct to make chaotic and unmanageable events in a dizzying variety of places fit a ready-made strategy for addresssing them—much

like the "arc of crisis" rhetoric in the Carter Administration—but the Central Intelligence Agency says it has been unable to confirm the basic facts on which the Administration's paranoid worldview rests. Administration spokesmen claim that America would lose prestige if El Salvador's moderately repressive torturers and murderers, whom we are generously supplying with helicopters and rifles, should fall.

Thus, the Administration is setting that country up to be the new Vietnam. Whether a single additional adviser or even one infantry platoon is ever sent there, the Administration has already invested so much in that operation that this nation cannot help emerging from the involvement weaker, not stronger.

Having announced that a political solution that includes the left is a major defeat, we have once again advertised our impotence. Having made support of our El Salvador policy a loyalty test for our allies in Europe and watched them flunk, the Administration has strengthened neutralist sentiment on the Continent and given a boost to the antiwar movement in both America and Europe.

The national security adviser, Richard V. Allen, scolds the Europeans for their "contemptible" better-Red-than-dead attitudes. The predictable result of our pressure has been to cause the West German Government to move slightly to the right and the German people to move to the left (66 percent of them, according to United States Government polls, are against modernizing the North Atlantic Treaty Organization with theater nuclear forces). The Administration's obvious reluctance to negotiate arms-control arrangements in Europe, which a majority of Europeans see as the only way to reduce the Soviet nuclear threat against the Continent, offers the Soviet Union an unparalleled opportunity to put pressure on European governments by playing on legitimate popular fears. Reagan realism may work so well that the Kremlin will be able to claim a veto power over NATO weapons decisions.

Situations of strength these are not.●

SCREENWRITER—BILL WITTLIFF

HON. J. J. PICKLE

OF TEXAS

IN THE HOUSE OF REPRESENTATIVES

Tuesday, June 2, 1981

● Mr. PICKLE. Mr. Speaker, one of America's hottest and most productive screenwriters is a resident of Austin and a product of—and storyteller of—Texas. Bill Wittliff has several irons in the fire, all bringing to the screen a unique, gifted talent for transmitting emotions and character. As an early admirer of our beloved Texas writer and folklorist, J. Frank Dobie, Bill Wittliff has become part of the Dobie tradition. He is a colorful man with a head full of colorful descriptions who has balanced his national success with a steadfast desire to stay near his Texas roots.

The American Film magazine this month features a fine article on Texan Bill Wittliff, whose creative talents are being shared and appreciated by everyone. I am glad to put this article in the RECORD.

MEMORIES OF A TEXAS CHILDHOOD

(By Mike Greco)

Texas is rich in unredeemed dreams, and now that the dust of its herds is settling, the writers will be out on their pencils, looking for them in the suburbs and along the mythical Pecos. And except to paper riders, the Pecos is a lonely and bitter stream. I have that from men who rode it and who knew that country round—such as it was, such as it can never be again.

Too much of Texas is flat, barren, and uninviting; the horizon is broken only occasionally by oil derricks or skyscrapers. It is not surprising that such a forbidding landscape should inspire legends about heroes who not only survived in this hard country but thrived in it. The land was a crucible, so the legends go, in which the heroes formed their character—courageous, rugged, tenacious, honest, and spiritually linked to the land.

Now that the dust of Texas herds has settled, the most interesting writer riding his pencil into the mythical past may be Austin screenwriter William D. Wittliff. At a time when Hollywood is relying on old movies for inspiration, Wittliff writes about the people and places he knows best—and he has met with much success. In less than five years, five of his unusual screenplays have been filmed: Thaddeus Rose and Eddie (1978), The Black Stallion (1979), Honeysuckle Rose (1980), and Barbarosa and Raggedy Man, which are scheduled to be released later this year. (In fact, his scripts are so much in demand that Marble Arch Productions and Universal Pictures gave him coproducer status in order to acquire, respectively, Barbarosa and Raggedy Man.)

Wittliff identifies with the land and the people that created America's lonely heroes. He is a Texan to the marrow of his bones who is searching for his identity in what he calls "the hairy underbelly of the myth." He is as interested in the flawed nature of his progenitors as he is in their heroic deeds.

Wittliff rides his pencil in the heart of Texas. Nestled in the tree-covered hills with the Colorado River meandering through them, Austin is light-years away from the skyscrapers of Dallas and Houston. A potpourri of funky saloons, chili parlors, and monuments to LBJ, Austin is the spiritual as well as the political capital of Texas and an ideal place for Wittliff to search for his Texas identity. "My roots are here," says the forty-one-year-old screenwriter. "I pull on those roots."

Settled in his favorite restaurant—Austin's Raw Deal—Bill Wittliff recently explained how his fascination with Texas developed. "I didn't realize that literature could spring from a place like Texas," he said, "until I was twelve years old and read one of J. Frank Dobie's books. It was an anthology of folktales, and the first folktale in the book was one I had heard as an oral tradition when I was about six years old. To see it in print just set me on fire. It was an awesome thing for me to realize that literature can spring out of your own land, your own environment."

Wittliff channeled his enthusiasm for Texas into book publishing. In 1964, after graduating from the University of Texas with a degree in journalism, he established the Encino Press. Wittliff launched his company, which publishes limited editions of works by Texas writers, with an essay by J. Frank Dobie about an old West Texas cowboy who had become interested in ornithology. Wittliff said, "Dobie gave us Bob More: Man and Bird Man royalty-free a month to the day before he died, and that started the Encino Press. Because Dobie trusted us, other writers who were established in Texas came to Encino Press."

Wittliff desperately wanted to follow in his mentor's footsteps and write about Texas as Dobie had done, but everything he attempted—short stories, essays, poems, and novels—fell far short of his expectations. "I cried bitter tears about not being able to write. My hand was trying to make a pretty sentence, but my head was full of images," the soft-spoken Texan confided. The Encino Press published works by Larry McMurtry, A. C. Greene, Edwin Shrake, John Graves, and Larry King, but nothing by its founder and publisher.

Then in 1973, while commuting between Austin and Dallas, researching a visual history of Dallas, Wittliff thought about a character his grandfather had once told him about—"an old Anglo guy that he had met when he was a kid back in the 1890's." Wittliff said, "The guy had had his ears cut off because he had stolen cattle as a boy. I was moved by that image. I started thinking about him and creating a story around him. I did this over a period of about six weeks. At the end of that period, I sat down and wrote it as a film script because I had seen it in my head."

Wittliff had finally found a form where his head and hand got together. At the time he wrote that script—which became Barbarosa—he had never seen a screenplay. The day Wittliff completed the script, Edwin Shrake, a friend and Sports Illustrated columnist turned novelist, read it and sent it to his agent. "It got some interest," Wittliff remembered. "I got a couple of letters. They didn't want to make it, but it was enough of a response to jump me into the next one."

Wittliff wrote the as yet unproduced "Gally Hobbs," Thaddeus Rose and Eddie, and Raggedy Man in quick succession. "It was the first time I had found a form that worked for me," he said. "I was afraid to stop because I'd been trying to find a form for years and years and was afraid of losing the only one I felt comfortable with."

Wittliff hired an agent to represent him in Los Angeles, and in a very short time, Thaddeus Rose and Eddie and Raggedy Man were optioned. United Artists bought Thaddeus Rose and Eddie and hired Irwin Kershner to direct the film. "My first trip to L.A. was made to talk to Kershner about the script, which turned out to be a real blessing for me," said Wittliff. "Kersh recognized pretty fast that I didn't know what the hell I was doing. He kinda took me under his wing and gave me an education in screen-writing.

"Kersh is a marvelous teacher. He was terrific to me. Rather than just say this won't work or this needs to be changed, Kersh could always back up his comments. 'This won't work because . . . .' 'Have you considered doing it this way?' 'What's really in the character's head here? He took a real interest in my stuff and helped me make it better."

Irwin Kershner, director of The Empire Strikes Back, believes Wittliff is successful because "he writes out of his own experience as a Texan. He's got the language of the region down so well and he uses that peculiar Texas humor so well that his scripts have the ring of truth to them. No one writes better dialogue than Bill, and nobody

writes characters funnier or more fully rounded. His work is unique." So is Wittliff himself, Kershner adds. "He is not one of those city boys who come to Hollywood trying to be all things to all people. He knows who he is and where he belongs. He's politically grounded, he's philosophically grounded, he's emotionally grounded in Texas. That's why he still lives there and only visits Los Angeles. He's a true regionalist."

When United Artists decided not to make Thaddeus Rose and Eddie, it was sold to CBS, which produced it for television and aired it in 1978. "I was disappointed that it wasn't made as a theatrical feature," Wittliff admitted, "but it brought my work to the attention of the Coppola people." And that let to The Black Stallion. Wittliff was invited to San Francisco to discuss the film with Carroll Ballard, the director. "I came up with several ideas," Wittliff said, "including putting the father on the boat and the whole idea of Alexander and Bucephalus, which I think gives the film its mystical quality."

However, Wittliff doesn't want to take the credit for The Black Stallion's success. "I think I planted a seed," he said, "but I don't think I grew the tree that became Black Stallion. I think Caleb [Deschanel] did that. I think Carroll [Ballard] did that. I think [Robert] Dalva, the editor, did that. The edited version was very different from the shooting script. I learned a lot working on Black Stallion."

Willie Nelson was also impressed by Thaddeus Rose and Eddie. Nelson, an Austin institution who set the country and western music establishment on its ear in the mid-seventies, watched the film on television and made inquiries about his fellow Texan. "Willie and I hit it off," said Wittliff. "We have a lot in common. I think Willie's music has a lot of content in it. If one listens between the lines of Red Headed Stranger, it's real powerful stuff. It's about losing grace and redemption. I'm moved by that album." When Universal sent representatives to Austin to negotiate film rights to the Red Headed Stranger album, Nelson invited Wittliff to the meeting and asked him to write the screenplay.

Nelson was delighted by Wittliff's screen adaptation of his album, and he asked Wittliff to rewrite the screenplay for Honeysuckle Rose when Warner Bros. signed Nelson for his first starring film role. "I don't want to take the credit for Black Stallion," Wittliff said, "and I sure don't want to take the blame for Honeysuckle Rose. Jerry Schatzberg [the director] had preconceived ideas about what life on the road was like, and he refused to see the reality of it. Do you have to mention I wrote Honeysuckle Rose?"

A few months after Wittliff began work on Honeysuckle rose, Nelson asked him if he had anything lying around. Wittliff did—his first screenplay, Barbarosa. Wittliff recalled, "Willie literally stuck his finger in the middle of the script, opened it, read two pages, closed it, and said, 'I want to be that guy.' Then Willie suggested we talk to Gary Busey for the other guy, and we made a deal with Marble Arch."

In 1979 Wittliff became a local celebrity when Honeysuckle Rose was filmed on location in Austin and Black Stallion opened to critical acclaim. That year, Sissy Spacek read a story about Wittliff while visiting her mother in Quitman, Texas. As it happened, she and her husband, director Jack Fisk, were looking "for a Texas writer for a film we wanted to make," Spacek recently said. "Bill sounded like the kind of writer we were looking for. We visited with him in Austin when we attended my cousin's wedding last year. He gave us a copy of Raggedy Man to read as a sample of his writing, and it was very much like the story we had been discussing. Bill had already written the film Jack and I wanted to make."

Raggedy Man, which is expected to be released late this year, is Wittliff's most autobiographical film to date. It is set in 1943 in Gregory, Texas, a small town where the inhabitants' horizons are much narrower than the big Texas sky looking down on them. Spacek portrays a divorced mother of two small children who runs the town's telephone office. As the sole operator, office manager, and bill collector, she is exploited by both the company and the town she serves. The film examines her journey of self-discovery and liberation, her relationship with her children, and the watchful protection of the town's enigmatic handyman from whom the film takes its name.

Wittliff grew up without a father in Gregory, Texas. His mother was the town's telephone operator, and like their fictional counterparts in Raggedy Man, they lived in the telephone office. "Raggedy Man began with an image," Wittliff explained. "I was going through some old photographs, and I found one of my mother and my brother and me, dressed in sailor suits, standing by the side of that little house. I built the story around that image. It's about a woman's desperation to be human."

Spacek also drew on memory. "Jack, Bill, and I have mothers who are amazing, special women from that era. The character I play is a combination of Bill's image of it, my image of it, and Jack's image of it, because we share similar experiences, having been raised in small-town Texas by strong mothers. With Bill, I always can imagine him as a little kid barefoot in Texas. Raggedy Man is that kid's story."

"Raggedy Man for me is probably more of an exorcism than anything," said Wittliff. "I wanted to believe that my father wanted to be with us but couldn't. It wasn't true. He was down the road drunk. It's a childhood fantasy. I wanted desperately for my father to be out there wanting to be with me."

The screenplay was optioned by a group of Mormon investors, who couldn't get the project off the ground. But Wittliff had faith in Raggedy Man, so he bid, against Jon Peters, to buy it back from the Mormons. "It had its admirers," he said, "but never had any takers as far as studios are concerned until Marianne Moloney stormed the barriers at Universal and persuaded them to make it. We originally talked to Sally Field, but when Sissy became interested, I knew she would be perfect for the part."

Raggedy Man and Barbarosa went into production last fall with Wittliff serving as a producer on both films. He was turning to producing, he explained, because "I wanted to stay in the room from casting through scoring. If someone wants to buy one of my original scripts, that's the price." Wittliff's desire to produce and direct (he shot second-unit material on Raggedy Man) stems from his concern as a writer about the way his scripts are interpreted. "I don't think my stuff is in the lines," he said. "It's in between the lines. It's not what the dialogue says, but it's the spaces. My whole thing about producing is not that I want to be a producer but that I know the spaces better than anyone else. I want to assemble the people who are going to make the movie and make certain they understand the spaces."

Wittliff's next step in protecting the "spaces" is to direct the Red Headed Stranger. He and Willie Nelson bought the script back from Universal and are preparing a package to present to the other studios. "Universal thought Robert Redford had to be the redheaded stranger in order for a Western to have a chance at the box office," Wittliff said. "Willie and I bought it back because we have a lot of faith in the story even without a big star."

Writing a movie for Bill Wittliff is almost a mystical experience that puts him in touch with his "roots" and his innermost self. "The part of writing that fascinates me most is the unconscious part when things fall out on the paper," Wittliff admitted. "I love sitting there writing and something blows out on the paper, and you look at it and say, 'Damn, I didn't know that.' That's the reason I write. I don't know what I really think until I see it on paper." (Hanging on the wall behind Wittliff's writing desk is a quote from a W. H. Auden essay: "How can I know what I think till I see what I say?")

Wittliff is a great storyteller. Whether competing with the cosmic cowboys and Ivy League professionals at the Raw Deal or captivating his audience in the intimacy of his office or home, Wittliff is the quintessential heir to the oral tradition of Texas. He is always animated, and his statements carry a conviction rarely encountered in Hollywood; Wittliff becomes most intense and excited when discussing the art of writing.

"Most of my scripts start with an image that may later disappear," he said. "The image doesn't necessarily fall at the beginning or the end but can fall anywhere. If it's an image that moves me, I'll try to put it down on paper. If I'm still curious enough about the image, then I'll start seeing where it goes in other directions."

Wittliff's images come from the heart rather than from the head. He was "moved" by the image of the "old Anglo guy" with no ears and by the photo of his mother and brother and by the Red Headed Stranger album. His approach to his art and the life it represents is as visceral as a cowboy's plaintive song for his steers on the open range: "I get in trouble on scripts when I start thinking about them. As long as I'm moved, I keep going. When I intellectualize, I go to hell. There's a time to question it, to see what form it's going to take, but if I look at it too early, it limits what bubbles up."

The creative process for Wittliff is "making conscious what has been unconscious. Things hit the paper from out of nowhere. They're not thought out; they're felt through images in the mind. It doesn't happen all the time, but it's the thing I pray for. I want to disappear and have those moments when the thing I'm putting on paper becomes so real that I'm no longer leading but following."

His work environment is crucial to him. He writes in the beautifully restored Victorian mansion that houses Encino Press. (His writing room was occupied in the late nineteenth century by O. Henry when he lived in Austin.) Wittliff has converted the library downstairs to his office and has decorated it with rare prints by Texas Works Progress Administration photographers, paintings by Texas artists, manuscripts and documents from nineteenth-century Texas,

and, over the fireplace, a pen-and-ink drawing of J. Frank Dobie.

Wittliff refuses to trade the peace and serenity of the Texas hill country for the bright lights of Tinseltown. "I remain in Austin because I want to write," he said. "I want to write well. Whatever my deficiencies as a writer, I want to give myself the best chance I can to see what I've got. I know myself well enough to know that I've got a far better chance of gettin' it up here than anywhere else."

"It's a matter of isolating and narrowing the anxieties," Wittliff continued. "Here the anxiety is always the quality of the work. The time to deal with the studios, and all the problems you can have in assembling a package, is after the writing is done, so you've got a film that you really want to go through all that —— for."

Austin, he believes, is the best place for him and his wife, Sally, to raise their twelve-year-old son, Reid, and eight-year-old daughter, Allison. "I've got a good wife. She stuck by me while I was shedding bitter tears about not being able to write and helped me struggle in creating the Encino Press. Sally and the kids love it here. It just wouldn't be worth it to me in terms of quality of life to leave Austin."

The family is crucial in Wittliff's screenplays. Each of his protagonists must confront it and adapt his values and lifestyle around it. Barbarosa, the character with no ears in Wittliff's first screenplay, desperately wants to be part of his Mexican wife's aristocratic family, but they shun him as the despised gringo who has corrupted the family blood.

Three generations of Zavellas try to kill Barbarosa to avenge the dishonor he has brought on the family, but they are no match for him. Barbarosa wants to belong to the family so badly he accepts his position as the hunted outcast. He instills the family with a sense of pride and purpose; he is the yardstick against which the Zavellas measure themselves.

Thaddeus Rose and Eddie is about two old Texas bachelors who avoid family responsibilities by chasing women and drinking. Their moment of truth comes when they finally realize they need a lasting relationship. In Raggedy Man the heroine has to come to grips with her relationship with her children and find an identity as a divorced single parent in an intolerant community.

The family constellation changes in The Black Stallion from a complete nuclear family to a mythical Alexander and Bucephalus family to an extended family at odds with the community. The film's youthful hero must adjust to each family, and each leaves an indelible mark on the boy.

The protagonist of Red Headed Stranger fails when he attempts to establish a family and create a community on his own selfish terms. He atones for his sins by joining a widow and her son—on her terms. And the hero of Honeysuckle Rose has to choose between two families: an adolescent family with which he can escape responsibilities and his real family, which needs his commitment.

"The ultimate theme of all of my films is people need people," Wittliff said. But he is also preoccupied with fathers and father figures who fail to fulfill their responsibilities to their families and communities. "I probably take fathers because in our society he is the peg on which most families hang," Wittliff said, "and as a male, he's the peg on which most communities hang as a larger father, so to speak."

"I am interested," Wittliff confided, and seemed embarrassed in doing so, "in looking for what is at the base of the human heart." He turned again to fathers and their responsibilities. "I didn't know that the Raggedy Man was the children's father until I was three-quarters the way through the script," Wittliff said. "Damn, I didn't know that."●

SENATE — *Wednesday, June 3, 1981*

(Legislative day of Monday, June 1, 1981)

The Senate met at 11:45 a.m., on the expiration of the recess, and was called to order by the President pro tempore (Mr. THURMOND).

PRAYER

The Chaplain, the Reverend Richard C. Halverson, LL.D., offered the following prayer:

Father in heaven, it is so easy for us to take life for granted. So often we have to lose a good thing before we appreciate it. We take health for granted until we get sick. We take family for granted until we are separated. We take friends for granted until we are alienated. We take privilege for granted until it is removed. We take for granted the faithful service of those who work with us until they leave us. We take freedom for granted until we are bound.

Forgive us, dear Lord, for this sin of presumption. Help us to be grateful for all the blessings and benefits which Thou dost bestow so benevolently upon us. Help us to love Thee and each other. Receive our gratitude and praise. We pray in Jesus' name. Amen.

RECOGNITION OF THE MAJORITY LEADER

The PRESIDENT pro tempore. Under the previous order, the majority leader is recognized.

THE JOURNAL

Mr. BAKER. Mr. President, I ask unanimous consent that the Journal of the proceedings of the Senate be approved to date.

The PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, are there special orders for the recognition of Senators this morning?

The PRESIDENT pro tempore. There are two special orders: One for the Senator from Wyoming (Mr. SIMPSON), for 15 minutes; the other for the Senator from West Virginia (Mr. ROBERT C. BYRD), for 15 minutes.

Mr. BAKER. I thank the Chair. I am advised that the distinguished Senator from West Virginia, the minority leader, has no need for his time under the special order, and I ask unanimous consent that the order be vitiated.

The PRESIDENT pro tempore. Without objection, it is so ordered.

ORDER FOR ROUTINE MORNING BUSINESS

Mr. BAKER. Mr. President, I ask unanimous consent that at the conclusion of the time allocated to the two leaders under the standing order and the execution of the special order, there be a period for the transaction of routine morning business, for not longer than 30 minutes, in which Senators may speak for not more than 5 minutes each.

The PRESIDENT pro tempore. Without objection, it is so ordered.

HOUSING AND COMMUNITY DEVELOPMENT AMENDMENTS OF 1981

Mr. BAKER. Mr. President, it is the intention of the leadership on this side to ask the Senate to proceed to the consideration of S. 1197, the housing bill, after the conclusion of the time for the transaction of routine morning business.

I have advised the distinguished minority leader of that intention, as well as the distinguished acting minority leader, who is in the Chamber. I will not now make that motion. I will wait until later.

However, so that all Senators may be on notice that that is the principal business to be transacted by the Senate today, I thought I would call that to the attention of all those who may hear this statement.

SENATOR STROM THURMOND—A REAL PRO

Mr. BAKER. Mr. President, I take this opportunity to pay my respects to the distinguished occupant of the chair, the President pro tempore.

What I am about to say is an especially difficult thing to phrase appropriately, but I feel an obligation to say it, and I wish to take this opportunity to say it while the Senator from South Carolina (Mr. THURMOND) is in the chair.

Over the last few weeks, we have gone through one of those periods when I suppose inevitably there is a good faith and conscientious conflict between chairmen and members of two of the committees of the Senate—in this case, the Committee on the Judiciary and the Committee on Commerce, relating to their roles and responsibilities in connection with a communications bill.

It proved impossible to reconcile the jurisdictional conflict in that case.

The last effort in that regard was made in my office to try to negotiate and arbitrate settlement of that dispute, but it failed.

Without any foreknowledge of how the result might finally be, or how the Senate might finally dispose of the issue. I recommended to the distinguished occupant of the chair and the distinguished chairman of the Commerce Committee, Senator PACKWOOD, that the conflict be submitted to the Senate as a whole, as indeed it was on yesterday in the form of a motion by the distinguished chairman of the Judiciary Committee, the Senator from South Carolina, that S. 271, Calendar Order No. 37, be referred temporarily to the Judiciary Committee. That motion did not prevail.

The reason for reviewing these circumstances, Mr. President, is to point out to all of our colleagues that Senator THURMOND is as gracious when he does not succeed as he is when he so more often does succeed.

If I may say so, in the parlance of the legislative arrangements of this city, STROM THURMOND is a real pro. He defends and guards his prerogatives. He discharges his obligations. He is true to his commitments. He more often than not succeeds. He sometimes does not. But he is a pro in either case.

In saying that I mean to pay him a tribute and a compliment of the highest order because I admire and respect that trait and characteristic in our colleagues. No one in this body on either side of the aisle exhibits it to such a degree as does the Senator from South Carolina.

Many have observed and remarked on the fact that the legislative process is necessarily the business of compromise. Sometimes it is not.

Sometimes it is simply bringing an issue to a head and disposing of it one way or the other. An equally important part of the legislative process is to abide by the decision of the Senate without rancor, without resentment, without a diminution of the effectiveness of the party, whether successful or unsuccessful.

So in the conflict on yesterday, as unfortunate as it may have appeared to be and as unsatisfactory as it may have been in its outcome to the Senator from South Carolina, it was extremely valuable in that it once again provided a role model for all of us on how to act as a Senator and how to accept success and how to accept failure.

Mr. President, I wish to note these observations for the record this day and to do so while the distinguished occupant of the Chair is present to hear them.

Mr. President, I have no further need for my time under the standing order and I yield it back.

RECOGNITION OF THE ACTING MINORITY LEADER

The PRESIDENT pro tempore. The Senator from Florida is recognized.

Mr. CHILES. Mr. President, as the acting minority leader I relinquish any time that the minority leader has.

RECOGNITION OF SENATOR SIMPSON

The PRESIDENT pro tempore. The distinguished Senator from Wyoming is recognized for 15 minutes.

SENATOR STROM THURMOND—A TRUE INSPIRATION

Mr. SIMPSON. Mr. President, I just happened to come into the Chamber as I heard the remarks of the majority leader paying tribute to the gentleman who occupies the chair at the present moment. I just wish to add a very real commentary of my own to you, sir, who serves as chairman of the Judiciary Committee, of which I am a member, who assisted me in obtaining membership on that committee, a committee I chaired when I was a member of the Wyoming House of Representatives and thoroughly enjoyed and enjoy now, a man who has taught me much, a man who has been most supportive, most understanding, and that is the Senator from South Carolina.

He has been a true inspiration to all of us, especially we newer Members. You have expressed to me your kindness, your friendship, your skills, and your amazing vitality, and I commend you, sir. It is a distinct pleasure. You make this body a richer place for service. I wanted to share that.

I did not actually reserve that full 15 minutes for that, but I wanted to say that and concur in the remarks of the majority leader.

COST SAVINGS RECOMMENDATIONS BY VETERANS' AFFAIRS COMMITTEE

Mr. SIMPSON. Mr. President, very briefly, and I shall not take the full time allotted, the Veterans' Affairs Committee this morning, the committee which I chair and on which you also serve with such distinction on that committee, ordered reported a resolution of the full committee to the Budget Committee specifying all of the cost savings legislation that the committee recommended in order to meet our reconciliation instructions.

I am sure the majority leader will be pleased at that, as one more committee joins the ranks of having done its duty, the Veterans' Affairs Committee, with regard to the meeting of the reconciliation instructions.

Mr. BAKER. Mr. President, if the Senator will yield to me, I am overjoyed at that prospect. I may say that the early compliance with those instructions for the Veterans' Affairs Committee, under the leadership of the distinguished Senator from Wyoming, is characteristic of the efficiency he brings to this body.

I will examine that work product very carefully and with great assurance that he has done a good job with it.

I thank him.

Mr. SIMPSON. I thank the majority leader.

VETERANS' BENEFITS LEGISLATION

Mr. SIMPSON. Mr. President, I ask unanimous consent that all of the bills that will be introduced in this packet be printed in full at the appropriate place in the RECORD.

The PRESIDING OFFICER (Mr. DENTON). Without objection, it is so ordered.

S. 1311—VETERAN'S INSURANCE AMENDMENTS ACT OF 1981

Mr. SIMPSON. Mr. President, I send to the desk a bill to amend chapter 19 of title 38, United States Code, to permit the unrestricted assignment of a beneficiary's interest in the proceeds of a government life insurance policy in cases involving contested claims, and to amend the amount an attorney may receive for representing a claimant in such cases. I submit this bill at the request of the administration.

The text of the bill follows:

S. 1311

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Veterans Insurance Amendments Act of 1981."

TITLE I—ASSIGNMENTS AND ATTORNEYS' FEES

SEC. 101. Section 718 of title 38, United States Code, is amended by:

(1) inserting in subsection (b) after "title," the following: "or contested claims which are resolved in accordance with subsections (c) and (d) of this section,";

(2) inserting "or her" immediately following "his"; and

(3) adding at the end of subsection (b) the following: "(c) In cases involving claims by two or more persons with opposing interests to proceeds of policies maturing on and after the date of enactment of this subsection, resolution of these conflicting claims by assignment of all or any portion of the proceeds to persons outside the class specified in subsection (b) of this section will be permitted. Except in cases where payment under this section will be made in a lump sum, the contingent beneficiary must join any assignment under this subsection. This subsection is not applicable to insurance granted under the provisions of section 722(b) of this title.

"(d) Each claimant to whom insurance proceeds will be paid under an assignment effected pursuant to subsection (c) of this section may assign a portion of the proceeds to be paid to an attorney who represented such claimant in the contested claim. The assignment to an attorney under this subsection may not exceed the lesser of (1) 10 per centum of the proceeds to be paid to that claimant, or (2) the amount of the fee payable pursuant to an agreement between the claimant and attorney. This assignment will be the only fee payable for professional services rendered in connection with the claim for insurance proceeds."

SEC. 102. Section 753 of title 38, United States Code, is amended by:

(1) deleting at the beginning thereof "Any person to whom United States Government Life Insurance shall be payable may assign his";

(2) inserting in lieu thereof the following: "(a) Except in cases involving contested claims to insurance proceeds, which will be governed by subsection (b) of this section, persons to whom United States Government Life Insurance shall be payable may assign their"; and

(3) adding at the end thereof the following:

"(b) In cases involving claims by two or more persons with opposing interests to insurance proceeds maturing on and after the date of enactment of this subsection, resolution of these conflicting claims by assignment of all or any portion of the proceeds to persons outside the class specified in subsection (a) of this section is authorized. Except in cases where payment under this section will be made in lump sum, the contingent beneficiary must join any assignment under this subsection.

"(c) Claimants to whom insurance proceeds will be paid under an assignment effected pursuant to subsection (b) of this section may assign a portion of the proceeds to be paid to an attorney who represented them in the contested claim. The assignment to an attorney under this subsection may not exceed the lesser of (1) 10 per centum of the proceeds to be paid to the claimant, or (2) the amount of the fee payable pursuant to an agreement between the claimants and attorney. This assignment will be the only fee payable for professional services rendered in connection with the claim for insurance proceeds."

SEC. 103. Subsection 784(g) of title 38, United States Code, is amended by:

(1) redesignating this subsection as paragraph 784(g)(1);

(2) deleting "10" and inserting in lieu thereof "25";

(3) deleting "one-tenth" and inserting in lieu thereof "one-fourth";

(4) deleting "his" and inserting in lieu thereof "the veteran's" immediately following "during";

(5) inserting "or her" immediately following "his"; and

(6) adding at the end thereof the following:

"(2) In cases brought under this section where insurance proceeds were paid before the litigation was commenced, and the person or persons to whom prior payment was made are ultimately the successful parties to the litigation, the Court shall determine a reasonable fee, not to exceed 25% of the disputed proceeds, to be paid to the attorneys of such party or parties; this attorney fee shall be incorporated into the judgment or decree of the court. This fee will be paid by the successful party or parties to their attorneys and may be apportioned as determined by the court. No other fee will be payable to any attorney for services in cases to which this subsection pertains."

SEC. 104. Section 3405 of title 38, United States Code, is amended by:

(1) inserting immediately after "3404" the following: ", 718, 753"; and

(2) inserting "or her" immediately following "him".

TITLE II—EFFECTIVE DATE

SEC. 201. The amendments made by this Act shall take effect as of the date of enactment of this Act.

S. 1312—VETERANS' REHABILITATION AND EDUCATION ADJUSTMENT ACT OF 1981

Mr. SIMPSON. Mr. President, I send to the desk a bill to amend title 38, United States Code, to make adjustments and improvements in the vocational rehabilitation and education programs administered by the Veterans' Administration. I submit this bill at the request of the administration.

The text of the bill follows:

S. 1312

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That (a) this Act may be cited as the "Veterans' Rehabilitation and Education Adjustment Act of 1981".

(b) Except as otherwise expressly provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of title 38, United States Code.

SEC. 2. Chapter 3 is amended by—

(1) adding the following subsection at the end of section 242:

"(c) The Administrator may establish Veterans Benefits Counselors at locations such as school campuses to provide assistance regarding benefits under this title to veterans and eligible persons and to conduct outreach as provided for under this subchapter.";

(2) striking out section 243 in its entirety; and

(3) amending the table of sections at the beginning of the chapter to strike out "243. Veterans' representatives.".

SEC. 3. Chapter 31 is amended by—

(a) striking out section 1503 in its entirety; and

(b) amending the table of sections at the beginning of the chapter to strike out "1503. Periods of eligibility.".

SEC. 4. Section 1512 is amended by—

(1) inserting "(a)" before "The"; and

(2) adding at the end thereof a new subsection (b) to read as follows:

"(b) There shall be transferred between the fund and current and future appropriations for readjustment benefits such amounts as the Administrator shall, from time to time, determine are necessary either to meet the requirements of the fund or to assure that fund surplus excess is returned to the appropriation.".

SEC. 5. Section 1652(b) is amended by striking out "402(a) of the Economic Opportunity Act of 1964 (42 U.S.C. 2902(a))" and inserting in lieu thereof "sections 7(a), (h), and (i) of the Small Business Act (15 U.S.C. 636 (a), (h) and (i))".

SEC. 6. Section 1673(a) is amended by—

(1) striking out "(1)" before "The";

(2) repealing paragraph (2) in its entirety;

(3) redesignating clauses (A), (B), (C), and (D) as clauses (1), (2), (3), and (4), respectively; and

(4) amending clause (2) (as redesignated by clause (3) of this section), to read as follows:

"(2) any sales or sales management course which does not provide specialized training within a specific vocational field;".

SEC. 7. Section 1682 is amended by—

(1) amending clause (1) of subsection (d) to read as follows:

"(d)(1) Notwithstanding the prohibition in section 1671 of this title prohibiting enrollment of an eligible veteran in a program of education in which such veteran has 'already qualified,' an otherwise eligible veteran shall be allowed educational assistance up to six months (or the equivalent thereof in part-time assistance) (A) for the pursuit of refresher training to permit such veteran to update such veteran's knowledge and skills and to be instructed in the technological advances which have occurred in such veteran's field of employment during and since the period of such veteran's active military service; or (B) for the pursuit of continuing education or training required by Federal, State, or local law either to attain professional or vocational relicensure or to retain employment in a particular profession or vocation.";

(2) striking out in clause (2) of subsection (d) "refresher" and inserting in lieu thereof "education or"; and

(3) amending the second sentence of subsection (e) by striking out "at one-half of the full-time institutional rate" and inserting in lieu thereof "in accordance with the rate of pursuit, but in no event more than the less than half-time rate".

SEC. 8. Section 1723(a) is amended by—

(1) striking out "(1) before "The";

(2) repealing paragraph (2) in its entirety;

(3) redesignating clauses (A), (B), (C), and (D) as clauses (1), (2), (3), and (4), respectively; and

(4) amending clause (2) (as redesignated by clause (3) of this section), to read as follows:

"(2) any sales or sales management course which does not provide specialized training within a specific vocational field;"

SEC. 9. The last sentence of subsection (d)(1) of section 3503 is amended by—

(1) striking out "or"; and

(2) inserting after "July 4, 1946" a comma and "or (c) any forfeiture of educational benefits under chapters 31, 32, 34 or 35 of this title".

SEC. 10. Section 408 of the Veterans' Education and Employment Assistance Act of 1976 (Public Law 94–502; 90 Stat. 2383) is amended by—

(1) striking out "June 1, 1981" in subsection (a)(1)(A) and inserting in lieu thereof "June 1, 1982";

(2) amending subsection (a)(1)(B) to read as follows: "before the close of the 60-day period after the day on which the President submits to Congress the recommendation described in subparagraph (A), Congress adopts and the President approves a joint resolution disapproving the recommendation or, in the event the President returns the joint resolution to the Congress with his objections, two-thirds of each House of Congress agree to pass and approve the joint resolution.;

(3) striking out "December 31, 1981" each place it appears and inserting in lieu thereof "December 31, 1982"; and

(4) striking out "January 1, 1982" and inserting in lieu thereof "January 1, 1983".

S. 1313—VETERANS' ADMINISTRATION MEDICAL PERSONNEL AMENDMENTS OF 1981

Mr. SIMPSON. Mr. President, I send to the desk a bill to amend title 38, United States Code, to provide additional flexibility within the Veterans' Administration's existing medical personnel management system. I submit this bill at the request of the administration.

The text of the bill follows:

S. 1313

Be it enacted by the Senate and the House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Veterans' Administration Medical Personnel Amendments of 1981".

SEC. 2. Section 4106 of this title is amended by striking out subsection (b) and, in lieu thereof, inserting:

(b) Appointments under section 4104(1) of this title shall be subject to a probationary period of two years. The record of each person serving under such appointment may be reviewed at any time during that period by a board or boards appointed in accordance with regulations issued by the Administrator. Procedures to be followed preceding, during, and subsequent to board reviews shall be established in regulations issued by the Administrator. The Board(s) shall recommend to the Chief Medical Director such action as it deems appropriate and consistent with the ability of the employee, as found by the Board(s), to perform effectively. The Chief Medical Director may accept, reject, or modify the recommendation of the Board(s). If the Chief Medical Director takes action not recommended by the Board(s), a statement of the reasons therefor shall be prepared and made part of the record.

SEC. 3. Section 4110(a) of title 38, United States Code, is amended by striking out the period at the end of the first sentence and adding "who has satisfactorily completed the probationary period required by section 4106 (b) of this title.".

S. 1314—CARE AND TREATMENT OF PATIENTS IN THE VETERANS MEMORIAL MEDICAL CENTER

Mr. SIMPSON. Mr. President, I send to the desk a bill to amend title 38, United States Code, to authorize funds to the Republic of the Philippines to assure the effective care and treatment of U.S. veterans, Commonwealth Army veterans, and new Philippine Scout veterans residing in the Republic of the Philippines. I submit this bill at the request of the administration.

The text of the bill follows:

S. 1314

Be it enacted by the Senate and the House of Representatives of the United States of America in Congress assembled, That section 624(d) of title 38, United States Code, is amended by striking "and at the same rate as specified in section 632(a)(4) of this title".

SEC. 2. Section 631 of title 38, United States Code, is amended to read as follows:

"§ 631. Assistance to the Republic of the Philippines

"The President is authorized to assist the Republic of the Philippines in fulfilling its responsibility in providing medical care and treatment for Commonwealth Army veterans and new Philippine Scouts in need of such care and treatment for service-connected disabilities and non-service-connected disabilities under certain conditions".

SEC. 3.(a) Section 632 of title 38, United States Code, is amended to read as follows:

"§ 632. Contracts and grants to assure the effective care and treatment of United States veterans in the Veterans Memorial Medical Center

"(a) The President, with the concurrence of the Republic of the Philippines, may authorize the Administrator to enter into contracts with the Veterans Memorial Medical Center, with the approval of the appropriate department of the Government of the Republic of the Philippines, covering the period beginning on October 1, 1981, and ending on September 30, 1986, under which the United States—

"(1) will provide for payments for hospital care and medical services, including nursing home care, in the Veterans Memorial Medical Center as authorized by section 624 of this title, and on the same terms and conditions set forth in such section, to eligible United States veterans at a per diem rate to be jointly determined for each fiscal year by the two Governments to be fair and reasonable; and

"(2) may provide that payments for such hospital care and medical services provided to eligible United States veterans may consist in whole or in part of available medicines, medical supplies, and equipment furnished by the Administrator to the Veterans Memorial Medical Center at valuations therefor as determined by the Administrator, who may furnish through the revolving supply fund, pursuant to section 5021 of this title and subject to reimbursement, such medicines, medical supplies, and equipment as necessary for this purpose.

"(b) To further assure the effective care and treatment of United States veterans in the Veterans Memorial Medical Center there is authorized to be appropriated for each fiscal year occurring during the period beginning October 1, 1981, and ending September 30, 1986, the sum of $500,000 to be used by the Administrator for making grants to the Veterans Memorial Medical Center for the purpose of assisting the Republic of the Philippines in the replacement and upgrading of equipment and in rehabilitating the physical plant and facilities of such hospital. Such grants shall be made on such terms and conditions as prescribed by the Administrator. Such terms and conditions may include prior approval by the Administrator of all purchases of equipment and of all plans for rehabilitating and upgrading the physical plant and facilities of the Veterans Memorial Medical Center. Funds for these grants shall be provided only from the Veterans Administration's "Medical Care".

"(c) The Administrator may stop payments under any such contract or on any such grant upon reasonable notice as stipulated by such contract or grant if the Republic of the Philippines and the Veterans Memorial Medical Center fail to maintain such hospital in a well-equipped and effective operating condition as determined by the Administrator.

(b) The table of sections at the beginning of such chapter is amended by striking "632". Contracts and grants to provide hospital care, medical services and nursing home care", and inserting in lieu thereof "632". Contracts and grants to assure the effective care and treatment of United States veterans in the Veterans Memorial Medical Center."

SEC. 4. No provision of this Act shall take effect prior to October 1, 1981.

S. 1315—PENSIONS OF VETERANS BLINDED AS A RESULT OF NONSERVICE CONNECTED DISABILITY

Mr. SIMPSON. Mr. President, I send to the desk another bill to amend title 38, United States Code, to provide that the pension of a single veteran who is blind as a result of a nonservice-connected disability and who is participating in a program of rehabilitation operated by the Veterans' Administration exclusively for the rehabilitation of blinded veterans shall not be reduced because the period of care of such veterans extends more than 3 months.

We have the situation where most blinded veterans do complete their training in just under 3 months. However, there are a few such veterans who require more than 3 months to complete their rehabilitative training and who choose to terminate their training early to avoid reduction in their pensions.

This provision will eliminate this unintended disincentive to completion of rehabilitative training by non-service-connected blinded veterans. The cost impact of that measure is not at all significant.

Then the final two in the packet, and the reason these are being presented, Mr. President, is to assure that we have appropriate hearings before we get to the next issue of business of the Veterans' Affairs Committee to deal with these.

The text of the bill follows:

S. 1315

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 3203(a)(1)(B) of title 38, United States Code, is amended by striking out the period at the end and inserting in lieu thereof the following: "unless the veteran is a blinded person and the care is being furnished in a Veterans' Administration blind rehabilitation center or clinic.".

S. 1316—GRADUATED-PAYMENT PLANS IN VA LOAN GUARANTY PROGRAM

Mr. SIMPSON. Mr. President, I send to the desk two further bills, one to amend title 38, United States Code, to authorize the Administrator of Veterans' Affairs to guarantee home loans with provisions for graduated-payment plans. That is significant innovation.

This bill would provide some relief for lower-income level and younger veterans who would otherwise be unable to purchase a home. The initial payments, of course, in this type of financial proceeding are lower in this type of loan. Then they increase in anticipation of the future higher earnings of the veteran.

We want to pursue that. We think that is worth holding hearings on, worth discussing, and getting a full ventilation of whether that will be effective for the American veterans.

The text of the bill follows:

S. 1316

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That except as otherwise expressly provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of title 38, United States Code.

ESTABLISHMENT OF GRADUATED-PAYMENT PLANS IN VA LOAN GUARANTY PROGRAM

SEC. 2. Section 1803(d)(2) is amended by—

(1) inserting "(A)" after "(2)"; and

(2) adding at the end of the following new subparagraphs:

"(B) The Administrator may guarantee loans with provisions for various rates of amortization corresponding to anticipated variations in family income. With respect to any loan guaranteed under this subparagraph—

"(i) the initial principal amount of the loan may not exceed the reasonable value of the property as of the time the loan is made; and

"(ii) the principal amount of the loan thereafter (including the amount of all interest to be deferred and added to principal) may not at any time be scheduled to exceed the projected value of the property.

"(C) For the purposes of subparagraph (B) of this paragraph, the projected value of the property shall be calculated by the Administrator by increasing the reasonable value of the property as of the time the loan is made at a rate not in excess of 2.5 percent per year, but in no event may the projected value of the property for the purposes of such subparagraph exceed 115 percent of such reasonable value. A loan may not be guaranteed under such subparagraph for a purpose other than the acquisition of a single-family dwelling unit."

SEC. 3. Section 1828 is amended by—

(1) inserting "(1)" after "constitution or law"; and

(2) inserting "(2)" restricting the manner of calculating such interest (including prohibition of the charging of interest on interest), or (3) requiring a minimum amortization of principal," after "lenders,".

TECHNICAL AND CONFORMING AMENDMENTS

SEC. 3. Section 1826 is amended by:

(a) striking out subsection (a) in its entirety; and

(b) striking out "(b)" in subsection (b).

EFFECTIVE DATE

SEC. 4. The amendments made by this Act shall take effect on October 1, 1981.

S. 1317—REMARRIAGE NOT TO RESULT IN TERMINATION OF DEPENDENCY AND INDEMNITY COMPENSATION

Mr. SIMPSON. Finally, Mr. President, I send to the desk a bill to amend title 38, United States Code, to provide that remarriage of the surviving spouse of a veteran after age 62 shall not result in termination of dependency and indemnity compensation.

We find that many of these survivors have cared continuously for a severely disabled spouse over and for a number of years, which often precludes them from pursuing a career. Upon the veteran's death the widow or widower is left without any means of support other than dependency and indemnity compensation know as DIC.

Those surviving spouses are often older citizens who have devoted their lives to caring for a service-disabled veteran. We believe that it is indeed unfair to deny them the benefits which they earned over the many years of devoted service simply because they might remarry during their latter years.

Many such individuals have stated to us that they live together rather than marry at that time because of the service income limitation, and they would welcome the opportunity to formalize their relationship without increasing financial hardship.

This bill and our consideration of it might well assist in their doing so.

The text of the bill follows:

S. 1317

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That section 103(d) of title 38, United States Code, is amended by adding the following new paragraph after paragraph (3):

"(4) The remarriage after age 62 of a surviving spouse of a veteran shall not bar payment of benefits under section 411 of this title."

Mr. SIMPSON. Mr. President, that is the package from the chairman of the Veterans' Affairs Committee. I thank the Chair for his forbearance, and I appreciate the time to present these and I yield back the remainder of my time.

ROUTINE MORNING BUSINESS

The PRESIDING OFFICER. There will now be a period for the transaction of routine morning business.

ORDER OF PROCEDURE

Mr. BAKER. Mr. President, I see the distinguished Senator from Minnesota in the Chamber and he may seek recognition. If he does, after he speaks, it is my intention to continue the period for the transaction of routine morning business for most of the entire period allotted. We are trying to obtain clearance now to proceed to the consideration of the housing bill, which may take a little while to do, while we ascertain the location and availability of those Senators who must necessarily be present on the floor to manage that measure.

So I wish to make that announcement to explain why we will probably utilize most, if not all, of the time remaining for the transaction of routine morning business even though there may not be speakers on the floor to utilize that time.

I yield the floor. Mr. President.

The PRESIDING OFFICER. The Senator from Minnesota.

(The remarks of Mr. BOSCHWITZ at this point in connection with the introduction of legislation are printed under "Statements on Introduced Bills and Joint Resolutions.")

Mr. BOSCHWITZ. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceeded to call the roll.

Mr. STEVENS. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection, it is so ordered.

DAYS OF REMEMBRANCE

Mr. PROXMIRE. Mr. President, 9 days ago our Nation celebrated Veteran's Memorial Day.

Historically, it has been a day of reflection, a day of concern, and above all, a day of remembrance. This year was no exception. In Arlington Cemetery, by the Tomb of the Unknown Soldier, the Vice President laid a memorial wreath honoring those who fought and died for freedom. In the old amphitheater nearby, tribute was paid to the men who were killed in the tragic attempt to rescue the hostages in April of last year. Across the Potomac, there was a memorial service for Vietnam veterans.

In thousands of towns and cities across the United States, Americans joined in this collective expression of sentiment for victims who died in Vietnam, Europe, and Iran. It is fortunate that for these serious causes there are so many voices, and fortunate that a day has been reserved for remembering these men and women.

Another important day passed less than a month and a half ago—Holocaust Memorial Day. As in the recent Memorial Day, tribute was paid to victims; these victims, however, did not die in combat. Instead, as private citizens, they were subjected to Hitler's brutal, merciless genocide.

By definition, genocide is any act committed with intent to destroy in whole or in part a national, ethnical, racial or religious group. In Hitler's Germany, this took the form of 6 million Jewish deaths. In Uganda, under Idi Amin, hundreds of thousands were left dead. It is a vicious, hideous crime. This cannot be overemphasized.

Mr. President, we cannot forget our past, for it is with us today. Indeed, it has been said that our history gives rise to our future. Let us now, in the aftermath of both the Holocaust Memorial Day and the Veteran's Memorial Day begin to take the steps to prove what we have learned from our past. The first move was made in December of 1946 when the United Nations General Assembly, appalled at details of Nazi atrocities, unanimously adopted a resolution declaring genocide a crime under international law. I ask my colleagues now to take the last step and stand firm in support of the Genocide Treaty, expressing our realization of the need to build a humane future for mankind.

RAYMOND NELS NELSON

Mr. FORD. Mr. President, tragic violence has again struck an employee of the U.S. Senate. Raymond Nels Nelson, since 1974 a professional staff member of the Committee on Rules and Administration, was, on Sunday, cruelly murdered in his home.

A Providence, R.I. newspaperman, Ray came to the Senate in 1961 as administrative assistant to the now senior Senator from Rhode Island, Mr. PELL. He served for 13 years in that capacity.

With the Rules Committee, he served with great vigor and skill on many important legislative matters and, most recently, has been dealing with the awesome responsibilities of space assignments for the committee. His professionalism, fairness, and pleasant manner endeared him to all who came in contact with him. We shall miss him greatly.

To his wife, Shirley, and his three children, David, Rebecca, and Marc, I extend my most sincere sympathy.

REPORTS OF INTRODUCTION INTO NICARAGUA VIA CUBA OF SOVIET HEAVY EQUIPMENT SUCH AS TANKS AND JETS

Mr. THURMOND. Mr. President, the Congress, the administration, and the American people should view with great alarm reports about the introduction of Soviet military equipment into Nicaragua via Cuba. According to these reports, this equipment, possibly includes Soviet jets and tanks.

The Monroe Doctrine, issued in earlier days of our Nation, remains sound in the 21st century. This country cannot permit the arming of nations in the Western Hemisphere by a Communist state such as the Soviet Union.

Mr. President, if the cancer which has emerged in Nicaragua is allowed to grow, it will eventually spread itself to other Central and South American nations. Even Mexico, which has common borders with the United States, could be endangered.

Cuba, of course, is a mere puppet of the Soviet Union. However, Cuba must be dealt with if it allows the Soviets to use its territory as a stopping off place for the eventual clandestine transfer of armaments to Nicaragua or other Western Hemisphere nations.

The present administration has taken a proper and required step by giving aid to El Salvador which is now facing Communist inspired rebels whose support comes from the Marxist government of Nicaragua. It should not be forgotten that the ill-advised policies of the Carter administration led to the downfall of a U.S. friend in Nicaragua, former President Anastasio Somoza. In fact, it is likely that the revolutionaries who drove Somoza from office were also responsible for sending agents into our own country to assassinate him last year.

This deed removed the possibility of Somoza's return to Nicaragua.

Our recent policy toward Somoza and acceptance of the Panama Canal Treaty has led to inroads by Communist forces in Central America. These policies were rejected in the last election, and the Reagan administration should meet this threat head on since it can be dealt with more easily now than later.

Further, the administration should not be deterred by the shrill cries from certain segments of the American press which greeted the recent introduction into El Salvador of a small number of military advisors. Some of these critics are the same ones who urged the overthrow of Somoza and support for the present government in Nicaragua.

The situation we find ourselves in today has been fostered by a recent reluctance to sell arms to friendly nations in South America. We now know that if the arms cannot be procured from the United States, they will be bought elsewhere. Peru demonstrated that fact in the early 1970's, and now that country has Soviet advisors assisting it with the operation of certain types of equipment we refused to sell. In fact, in the last 5 years we have sold less military equipment in South and Central America than a distant country like West Germany, and only a little more than a small nation like France.

Mr. President, the emergency light is on in Central America. If we do not meet this challenge with skillful and bold policies, we may soon be faced with a fire which will not easily be contained.

Mr. President, in conclusion, I ask unanimous consent that an article entitled "Soviet Said to Ship Arms to Nicaragua" which appeared in the New

York Times and another article entitled "Haig Says U.S. Watching Flow of Arms to Nicaragua" which appeared in the Washington Post, both dated today, June 3, 1981 be placed in the RECORD at the conclusion of my remarks.

There being no objectoion, the articles were ordered to be printed in the RECORD, as follows:

SOVIET SAID TO SHIP ARMS TO NICARAGUA

(By Judith Miller)

WASHINGTON, June 2.—The State Department said today that it had received unverified reports that Soviet T-55 tanks might have been shipped from Cuba to Nicaragua.

Administration officials said later that while there was still no hard evidence that the tanks had been shipped, Secretary of State Alexander M. Haig Jr. was convinced that the reports were accurate.

Asked about the reports today, Mr. Haig said that the State Department had noted "with increasing concern" the sophisticated armaments being shipped to Nicaragua from the Soviet Union, Libya and Cuba. He also expressed concern about the growing size of the Nicaraguan armed forces and reserves, adding that "we see nothing to justify" that kind of manpower or equipment in the country.

State Department officials said that for five or six weeks there had been significant activity at Nicaraguan ports and that this had coincided with reports indicating that tanks were on board the ships.

SOME EXPRESS SKEPTICISM

Some officials believe that the tanks may have been unloaded under camouflage, which would prevent intelligence agencies from accumulating hard evidence of their transfer.

Other officials expressed skepticism, suggesting that intelligence agencies should have been able to verify the information by now.

"The intelligence community has reported this half a dozen times," said James R. Cheek, Deputy Assistant Secretary of State for Inter-American Affairs, who is awaiting reassignment. "One day they'll be right."

Mr. Cheek said that American officials had for months expected deliveries to Nicaragua of equipment from the Soviet Union. He added that Nicaragua now possessed only a few American Sherman tanks of World War II vintage—perhaps "four or five"—and some long-outdated American training planes.

Dean Fischer, the State Department spokesman, said of the intelligence reports: "We do have information that some Soviet tanks may have arrived and that others are still in Cuba. These reports have not been confirmed."

NICARAGUA'S NEIGHBORS CONCERNED

Mr. Fischer declined to comment on whether State Department officials believed that Soviet aircraft had been given to the Sandinist Government in Nicaragua, as some intelligence information also suggests.

He said that the United States and Nicaragua's neighbors were concerned about the possible introduction of advanced Soviet arms into the region. He also suggested that such a development would prevent the United States from considering any resumption of aid to Nicaragua.

President Reagan suspended $10 million in economic aid to Nicaragua last April 1 on the ground that the Sandinist Government was aiding leftist insurgents in El Salvador. Mr. Fisher said that the United States had attempted to leave open the door" to a resumption of aid if Nicaragua ended its support of the guerrillas and its involvement in international terrorism."

Referring to the reports about the tanks, he said, It is not an appropriate time at present to resume aid."

Congressional aides familiar with the reports and State Department officials also expressed skepticism about the utility of heavy tanks in Nicaragua. One senior official said that it would be the event of the century" if the Nicaraguans succeeded in moving heavy Soviet tanks any great distance across the country since they would be too heavy for most roads and bridges and would be difficult to deploy in the country's rugged terrain.

Latin American specialists at the State Department also noted that Honduras, Nicaragua's neighbor, was better armed, having recently received about 20 medium British tanks.

HAIG SAYS U.S. "WATCHING" FLOW OF ARMS TO NICARAGUA

(By John M. Goshko)

Secretary of State Alexander M. Haig Jr. said yesterday the Reagan administration is "watching with increasing concern" the levels of sophisticated weapons being shipped into Nicaragua and "the high level of manpower" being assigned to the Nicaraguan armed forces.

"We see no threat [to Nicaragua] that justifies increases of this size," Haig said. "We will be watching closely the levels of arms that have arrived and that are expected to arrive."

Haig, answering questions at a State Department meeting for editors and broadcasters from around the country, was asked about a report in yesterday's Washington Post saying the United States has received intelligence reports that Soviet T55 tanks may have been sent secretly into Nicaragua.

He refused to comment directly on the report. But he did contend that high levels of arms "of a worrisome nature" are continuing to flow into Nicaragua from Cuba.

Some of this arms flow, Haig said, continues to be diverted to leftist guerrillas fighting the U.S.-backed government in neighboring El Salvador. Although he cited the big buildup of Nicaraguan forces being engaged in by the leftist-oriented, revolutionary government there, Haig did not specify whether any of the alleged flow is part of a long-rumored plan to equip the Nicaraguans with Soviet weaponry including tanks and MIG jet fighters.

Earlier, however, department spokesman Dean Fischer confirmed that the United States has received intelligence reports that Soviet tanks may have been shipped into Nicaragua and that additional tanks are in Cuba awaiting delivery. While Fischer said the reports have not been confirmed, he added that the presence of such Soviet weapons would pose "serious problems" for other Central American countries.

"As Nicaragua adds military equipment to its already substantial arsenal, tensions do inevitably increase," Fischer said. "We would consider the presence of heavy Soviet armor or aircraft to pose serious problems for Nicaragua's neighbors.

Daniel Ortega, the head of Nicaragua's revolutionary junta, has told The Washington Post the reports his country intends to obtain Soviet tanks and jets are "totally unfounded." However, the Nicaraguan government, which won power in 1979 after a bloody civil war, has made clear its intention to build a powerful military force, and there have been reports that the goal is for 50,000 men and women.

The Nicaraguans already are believed to have more than 20,000 people on military duty or undergoing training. The junta has justified the buildup on the grounds that Nicaragua must protect itself against hostile, military-dominated rightist regimes in Honduras, El Salvador and Guatemalaa and antirevolutionary Nicaraguan exiles centered in Honduras.

CONCLUSION OF MORNING BUSINESS

Mr. STEVENS. Mr. President, is there further morning business?

The PRESIDING OFFICER. If there is no further morning business, morning business is closed.

HOUSING AND COMMUNITY DEVELOPMENT AMENDMENTS OF 1981

Mr. STEVENS. Mr. President, I ask unanimous consent that the Chair lay before the Senate Calendar Order No. 111, S. 1197, the housing bill.

The PRESIDING OFFICER. The bill will be stated by title.

The assistant legislative clerk read as follows:

A bill (S. 1197) to amend and extend certain Federal laws relating to housing, community, and economic development, and related programs, to provide an improved and expedited multifamily mortgage foreclosure procedure, and for other purposes,

The PRESIDING OFFICER. Without objection, the Senate will proceed to the consideration of the bill.

The Senate proceeded to consider the bill.

Mr. STEVENS. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The assistant legislative clerk proceded to call the roll.

Mr. LUGAR. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER (Mr. GORTON). Without objection, it is so ordered.

Mr. LUGAR. Mr. President, I rise to present an innovative housing and community development bill. It represents the Banking, Housing and Urban Affairs Committee's effort to meet the difficult challenge of budget reductions while devising ways to make the use of scarce Federal resources more cost effective while streamlining burdensome and costly administrative procedures. S. 1197 is the culmination of a process which included 4 days of intensive hearings on housing and community development issues, extensive research by our staff, consultation with HUD and numerous client groups and considerable constructive debate by members of the committee in our markup session. We are confident that we have produced a thoughtful bill which contributes extensively to the improvement of our housing and community development program.

We no longer can afford programs of unlimited Federal assistance to growing numbers of American citizens.

Our country is enduring an economic trauma which requires control of runaway Federal spending. While some would argue that housing programs have borne an inordinate proportion of budget cutbacks, the truth is that housing programs, especially for increasingly more expensive new construction, are committing us for decades ahead to expenditure of tens of billions of dollars. We must scale back. Yet, we must not lose sight of our long-held obligation to assist those

who can least afford safe, adequate housing for themselves and their families. Our bill, therefore, first and foremost is our best attempt to focus limited Federal assistance on those who need that assistance most and who simply have few if any alternatives to Federal assistance.

I remind my colleagues that we have no latitude on any budget issues raised in this bill. Congress has now decided the dollar amounts and the committee has carefully constructed a bill whose funding authorizations do not exceed the limits we have set in the budget debate.

As our second major objective, we have striven for procedural simplification in both the community development and assisted housing programs under our jurisdiction. We have attempted to "deregulate" programs under our jurisdiction where unnecessary Federal regulatory instrusion has created high administrative costs and posed obstacles for State and local governments in their decisionmaking and in the administration of assistance programs. But, we have done this without weakening the purposes of CD and housing assistance programs, and in some cases we have strengthened them.

Title I of this bill addresses community and economic development authorizations.

I would like to reassure those who see in this bill a retreat from the basic purposes of the community development program. It is not. Rather, title I is a return to the original intention of the act: to provide a flexible program through which communities determine their community development needs and proceed to meet them with—as we reiterate in the body of title I—"maximum feasible priority to activities which will benefit low- and moderate-income families or aid in the prevention or elimination of slums and blight" or to meet urgent needs.

S. 1197 makes a significant procedural change in the program by eliminating application requirements, and by substituting a statement of intention, coupled with certifications that the law's requirements are being met. It is important to emphasize that the act's statement of findings and purposes has not been amended in any way. The primary objective of the program remains "the development of viable urban communities, by providing decent housing and suitable living environments and expanding economc opportunities, principally for persons of low and moderate income."

The minority in its supplemental views misconstrues our purposes in eliminating the application process. It is simply incorrect to state, as the minority does, that "the bill would dismantle program features designed to assure that low-income persons and distressed neighborhoods principally benefit from the program, as originally intended; that local citizens, not just officials in city hall, have adequate opportunity to participate in the development of the local program, and that the Federal Government exercise some responsibility for the use of the program's funds." This matter is sufficiently important that we should take time to set the record straight.

I shall address each of these major criticisms in turn.

First, our bill makes no change in the basic purpose of the act. Indeed, to make this clear, we have reiterated, in section 102(b), that community development funds must be used "so as to give maximum feasible priority to activities which will benefit low- and moderate-income families or aid in the prevention or elimination of slums or blight"; or to meet urgent needs posing a serious threat to health or welfare when other funds are not available. These requirements are taken from section 104(b)(2) of the present law. Nor should our commitment to this purpose ever be in doubt.

Since 1974, there has been disagreement over the administration of the community development program. But this dispute has not been over its basic purposes. Although it has to some extent involved priorities, the basic issue has been the extent to which HUD should intrude with its conception of what is appropriate to carry out these purposes and, in effect, to substitute its judgments for those of the local officials charged with administering the program.

The provisions of the 1972 act relating to the application requirements and review have been amended more frequently than any other section of the act—indeed, since 1974 there have been 23 changes made in the provisions of this single section. It is much simpler and more straightforward, since the intent of the act has always been to give communities flexibility to determine how best to meet the purposes of the act, to strike this controversial section and, instead, emphasize HUD's proper role in reviewing actual performance. In our bill, we thus reaffirm the basic tenets of a block grant as envisioned by the drafters of the original 1974 act.

Second, the minority charges that our bill dismantles the citizen participation requirements of the act. In fact, it does not. The committee bill is stronger on this score than the administration's proposal. Section 102(b) of the bill explicitly requires that grantees furnish citizens with information about funds available and activities that may be undertaken; gives citizens an opportunity to examine and comment on both the statement of proposed activities and the performance of the grantee; and, to assure that this is done, requires at least one public hearing at which citizens may express their views.

Under our bill, grantees are required to consider all citizen comments; but, as in present law, they are not required to accept them. I reiterate: Here, as elsewhere, we are simplifying procedures, not changing substance. Moreover, I can state from my own experience that few city officials who ignore the views of the citizens will long survive in public office. The majority believes that it is appropriate to assure citizen access to information, to provide them with an opportunity to express their views, and to assure them that those views are taken into account. Where we disagree with the minority is over the appropriateness of requiring specific, rigid plans to achieve this purpose. It is not right to intrude in a process which is already governed by State and local law in most communities. It would be naive to believe that the sophisticated groups which have become experienced with local CD programs will find it any more difficult under our bill to maintain their high level of involvement.

Finally, we have retained, explicitly, HUD's responsibility to assure that community development funds are spent for the activities and purposes for which they are provided. That is the essence of the block grant concept: To establish clear purposes and set a range of activities, while permitting State and local governments the flexibility which responsiveness to local needs and conditions requires. The vehicle for doing this is not, however, the application. Rather, the bill makes clear the original intent of the 1974 act—an intent which we believe has been distorted in recent years—to enforce the act by reviewing actual performance and, if necessary, adjusting or conditioning grants. Under our bill, HUD is required, no less than annually, to review recipient performance for compliance with the requirements and objectives of the act.

We expect HUD's performance reviews to be both responsible and thorough. Moreover, there is a model at hand—the approach taken to performance monitoring by HUD Secretary Carla Hills and Assistant Secretary David Meeker in 1976. HUD's performance reviews at that time focused not on minor and insubstantial matters, but on whether the purposes of the act were being carried out and, if not, how communities could be helped to comply with the act. As both a statement of the kind of approach the committee has in mind and a possible model for HUD to follow, I ask unanimous consent to insert in the RECORD at this point information on HUD's performance monitoring approach supplied to the Banking Committee when it held oversight hearings in 1976.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

CURRENT AND PROJECTED CDBG MONITORING ACTIVITIES

INTRODUCTION

Section 104(d) of Title I of the Housing and Community Development Act of 1974 requires the Department to undertake annual reviews of each block grant recipient's performance and compliance with statutory and regulatory requirements of the Community Development Block Grant program.

GENERAL BACKGROUND

The Department issued its initial guidelines for monitoring in Handbook form on November 13, 1975. Pursuant to those guidelines, each of HUD's ten Regional Offices devised its own monitoring system, to be implemented by the respective Area Offices in that Region. The Regional Offices retain responsibility for the overall management of monitoring activities in their respective jurisdictions. Additionally, on a very selective basis, Central Office personnel will accompany Area Office staff on monitoring visits to ensure that the monitoring activity is carried out in a manner consistent with the statute and program regulations.

Although the different Regional Monitoring Systems vary with respect to the nature and scope of activities to be undertaken by Area Offices, they all mandate a mix of ac-

tivities combining both in-house and on-site monitoring reviews of grantee performance and compliance with program requirements.

IN-HOUSE MONITORING

Continuing activities by HUD staff to assess grantee performance and compliance, short of an actual site visit to the locality, constitute HUD's in-house monitoring effort. The principal tool for in-house monitoring of the block grant program is the Annual In-House Review performed prior to approval of the subsequent year grant for all entitlement communities, and less frequently for discretionary recipients. Due to the fact that the In-House Review is performed as part of the application review process, which got underway during the early months of 1976, experience with this activity is limited to the third quarter of the Fiscal Year. This Review is useful primarily as a means of collecting, at one time and in one place, all relevant information possessed by HUD relating to a particular grantee's performance and compliance, e.g., application materials, audit results, citizen complaints, results of site visits, and other general files.

In the area of compliance monitoring, the In-House Review is most effective for those subject with which the Area Office staff have the greatest day-to-day contact, e.g., eligibility of program activities, financial procedures. For other areas of potential compliance difficulty, such as equal opportunity requirements and Federal Labor Standards, it is necessary in most cases to conduct on-site monitoring of the grantee's program.

ON-SITE MONITORING

The principal form of monitoring activity engaged in by the Department during the second and third quarters was the site visit to the local grant recipient.

During the second quarter (October 1–December 31, 1975), the average number of on-site visits made in each Region was 110. Approximately 75 percent of second quarter visits were made to entitlement recipients. with the remaining 25 percent to discretionary grantees. During the third quarter (January 1–March 31, 1976), the average number of on-site visits by Regions was 224, representing a substantial increase. Of the number of localities which were the subject of site visits during the third quarter, the figures reveal that 60 percent of the national total of 1324 entitlement grantees, and 27 percent of the 1803 discretionary grantees were site-visited by HUD.

Regular site visits were made to every type of grantee: metropolitan cities; urban counties; hold harmless communities; metropolitan and nonmetropolitan discretionary grantees. In addition special site visits were made in all of the major program areas: relocation/acquisition; environment; equal opportunity; financial management; labor standards; citizen participation; housing assistance plans; eligibility of program activities; and capacity of the grantee.

MONITORING RESULTS

The ultimate goals of the Department's monitoring effort are to insure that statutory and other program requirements are met, and to formulate corrective or remedial actions to deal with any deficiencies on the part of grantees. In this regard, the quarterly reports indicate the number and general nature of "findings" made and "actions" taken in various subject areas.

During the second quarter, the primary areas of difficulty for grantees nationwide were equal opportunity, labor standards, and the environment. Much of the early monitoring focused on recordkeeping and other procedural matters, rather than grantee performance in carrying out their program, due to the fact that most grantees were just beginning their program activities.

During the third quarter, equal opportunity emerged as a difficult problem area for grantees: Equal opportunity was the subject of 23 percent of findings made and actions taken, nationwide. Other significant problem areas include relocation/acquisition (18.3 percent of findings), citizen participation (12.2 percent of findings) and environment (12.2 percent of findings). A total of 1294 findings were made nationwide in ten subject areas during the third quarter.

The findings being made are varied. Examples of the types of findings reported by the Regions include:

"Equal opportunity—(inadequate recordkeeping and lack of affirmative action plans);

"Labor Standards—(failure to hold preconstruction conferences and failure to send required notices of certain activities to the Area Office);

"Environment—(miscalculation of time periods for public comment on environmental findings and inadequate documentation within the environmental review record; and local draw down of funds before release by HUD.)

"Financial management—(Inadequate Accounting Systems and Violations of $10,000 minimum draw down requirements)."

Most of these violations are of a type to be anticipated during the start-up period of any new program. As grantees gain experience with HUD procedures and other program requirements, these types of violations should decrease.

Site visits were clearly the most effective source of findings during the third quarter: 81.6 percent of national findings were made as a result of on-site visits.

ACTIONS

Most of the actions taken during both the second and third quarters were in the form of warning letters or other advisory communications to grantees found to be deficient in terms of performance or compliance, a result which is generally appropriate to the first monitoring effort. For the most part, second year applications had not been received by HUD Area Offices during the second or third quarters of the fiscal year. Therefore, the actions taken by Area Offices in the subject quarters reported are not necessarily representative of the type of actions that would be taken when applications are pending before the Department. The great majority of applications are submitted during the fourth quarter of the fiscal year. The letters generally outlined the nature of the problem, offered assistance in its correction, and advised the grantee that continued noncompliance would result in more severe actions by HUD. It is likely that particular cases of grantee deficiency will require additional follow-up to the warning letter in an effort to insure that the required performance or compliance takes place.

Most of the actions taken other than warning letters (34.2 percent of the total actions) involve direct communication between HUD staff and the grantee in an effort to render the necessary assistance and arrive at a solution to the problem, in order to bring the grantee into conformance with the law or regulations. Such communication was either in written form, by phone, or by means of a personal conference.

In a few cases involving serious performance or compliance problems, more severe actions were taken, e.g., failure to invite a subsequent year's discretionary application, substitution of local funds for block grant funds, conditional approval of the subsequent year's grant.

CONCLUSION

The Department's monitoring effort, initiated during the second quarter of Fiscal Year 1976 and significantly expanded during the third quarter, appears to be achieving the goals to which it was directed. The results of the Department's monitoring efforts have been significant. As a result of the site visits, Area and Regional Offices are able to take appropriate corrective and remedial actions to remedy, where possible, the deficiencies that are found, and in many cases to prevent continuance of the deficiencies or violations of Community Development Block Grant requirements.

Grantees in all Regions appear to be pleased with HUD's monitoring effort, particularly the site visits. These activities afford them an opportunity to become aware of any deficiencies that exist in their community development programs, and to receive the necessary assistance from HUD to arrive at solutions to these problems.

U.S. DEPARTMENT OF HOUSING AND URBAN DEVELOPMENT,
May 6, 1976.

MEMORANDUM

To: All Regional Administrators.
Attention: Assistant Regional Administrators for Fair Housing & Equal Opportunity
Assistant Regional Administrators for Community Planning & Development.
From: James H. Blair, Fair Housing & Equal Opportunity, E David O. Meeker, Community Planning & Development Co.
Subject: FH&EO Review of Entitlement Applications.

FH&EO review of entitlement applications is expected to be thorough, taking into account experiences of prior years. Certifications will continue to be accepted; however, additional information or assurances from the applicant may be required when there is substantial evidence in past performance which contradicts or challenges the certifications (570.306(b)(1)). The same general principles apply to hold harmless and discretionary applications; however, the extent of the review may be modified as appropriate to the amount of the grant.

Consistent with the provisions of section 570.306(b)(2) of the Community Development Block Grant regulation, FH&EO staff shall recommend approval of the application unless it is determined:

"i. on the basis of significant facts and data, generally available and pertaining to community housing needs and objectives, the applicant's description of such needs and objectives is plainly inconsistent with such facts and data; or

"ii. the activities proposed in the application to be undertaken are plainly inappropriate to the meeting the needs and objectives identified by the applicant; or

"iii. the application does not comply with the block grant regulations or other applicable law."

With respect to the first two standards, section 570,303(a) requires the applicant, in identifying its needs, to take into consideration and summarize any special needs found to exist in any identifiable segment of the total group of lower-income persons in the community. In its review, FH&EO staff should take into account whether the applicant has taken such special needs into consideration and summarized them. With respect to the third standard of review, FH&EO staff should analyze the application within the context of the equal opportunity certifications under section 570.303(e)(11) and the non-discrimination requirements of section 570.601. If application of these standards indicates a failure on the part of the applicant to comply with these regulations, FH&EO staff shall indicate, pursuant to section 507.306(b)(1), the substantial evidence, including significant facts and data, which challenges the certifications, statements of fact and data, or other programmatic decisions, and shall recommend appropriate additional information and specific assurances to be required from the applicant.

Further, the Area Office shall review the

recipient's past performance to determine whether:

"i. the recipient has carried out a program substantially as described in its prior application(s):

"ii. the program conformed to the requirements of the block grant regulations and other applicable laws and regulations; and

"iii. the recipient has demonstrated a continuing capacity to carry out in a timely manner the approved community development program."

If the recipient's past performance pertaining to minorities and women varied substantially from that described in its application and the subsequent application does not amend or correct the matter, the evidence shall be documented and corrective action recommended, including appropriate recommendations for additional information and specific assurances. Any modifications and/or actions proposed by FH&EO staff to correct deficiencies shall be coordinated with Area Office procedures for such notification and consistent with the timetable as called for in the memorandum of November 29, 1974 from Assistant Secretary Meeker. Final actions taken by Area Offices should involve only minimal use of contract conditioning.

If, in the course of the review of past performance, FH&EO Area Office staff find what they believe to be noncompliance with section 109, title VI, Executive Order 11246 or section 3 requirements, the matter shall be discussed immediately with FH&EO Regional staff for determination as to referral for compliance review. Such referral, however, shall not be the basis for recommending disapproval of the application.

JAMES H. BLAIR,
Assistant Secretary for Fair Housing and Equal Opportunity.
WARREN H. BUTLER,
Assistant Secretary for Community Planning and Development.

(2) Checklist: Entitlement Application Review and Instructions.

FAIR HOUSING AND EQUAL OPPORTUNITY—CHECKLIST: REVIEW OF PAST PERFORMANCE

[The following questions must be answered before reviewing the subsequent year's application. Sources of information include prior year's application and comments, site visits, performance report and additional information requested from the recipient, as may be necessary]

	Yes	No*	NA
1. Were activities proposed for last year designed to directly benefit minorities generally commensurate with need?			
2. If yes, did they get substantially underway during the program year?			
3. Has any housing assistance been provided (occupied) during the program year?			
(a) Have minorities benefited commensurately with need (as stated in prior application)?			
(b) Have female-headed households benefited commensurately with need?			
4. If the recipient has proposed activities generating relocation, answer the following:			
(a) Has relocation begun?			
(b) Is there a positive pattern of relocation for minorities? (Service and location)			
(c) Is there a positive pattern of relocation for female-headed households? (Service and location)			
*For no answers jot down vital statistics and source of information (e.g. performance report, table IC) which documents the deficiency. Subsequent applications should be reviewed in light of these deficiencies and this data will provide the basis for looking beyond the assurance. Specific areas of concern and recommended actions are incorporated as a part of the application review checklist.			
5. Has the recipient demonstrated affirmative action in employment as required in the equal employment opportunity clause of the grant agreement?			
6. Has the recipient taken action to affirmatively further fair housing through such activities as land development, zoning, site selection policies or programing?			
7. Has the recipient taken action to prevent discrimination in the sale, rental and/or financing of housing within the recipient's jurisdiction?			
8. Has the recipient demonstrated affirmative actions as required under sec. 3?			
(a) Utilizing lower income area residents as trainees and employees?			
(b) Utilizing sec. 3 eligible businesses?			
9. Has the recipient demonstrated affirmative action as required under Executive Order 11246?			
*For no answers, jot down vital statistics and source of information (e.g., performance report, table IC) which documents the deficiency. The reviewer shall recommend corrective action, looking beyond the assurances, if data indicates that an assurance maybe meaningless. Such action could include the provision of additional information and specific assurances, including timetables, prior to approval of the application.			
Examples:			
(A) The applicant, while agreeing through certification to take action to affirmatively, further fair housing has in fact taken no action during the program year (performance report VB. 1 and 2). The reviewer may recommend that the applicant be required to provide a specific assurance, including the actions it will take and the dates these actions will be implemented.			
(B) Although the applicant has had significant personnel action during the program year, this action has not demonstrated affirmative action in minority and/or female employment in the program areas funded in whole or in part by CDBG funds (performance report VE). The reviewer may recommend that the applicant be required to provide a specific assurance, including numerical goals and timetables, necessary to demonstrate affirmative action.			
10. If an on-site visit has been conducted, is the recipient maintaining data as required in:			
(a) Sec. 570.900(c)—Performance standards			
(b) Sec. 570.907(f)—Recordkeeping			
11. Has the recipient complied substantially with all EO related conditions specified in prior assurances and the grant agreement?			
*For no answer, jot down vital statistics and source of information (e.g., performance report, table IC) which documents the deficiency. Recommend institution of departmental procedures for termination, reduction or withholding of funds until corrective action is taken. A subsequent application should not be approved until this situation is corrected. Any deficiencies in questions 1 to 9 may be treated as above if:			
(A) The applicant refuses to amend the application or provide additional information or assurance, or			
(B) The applicant provides additional information and/or assurances but does not meet either the goals or timetables to which it has agreed			

(a) Percent and characteristics of minority and female heads of household by census tract, available from the U.S. Census (PHC–1 and PHC–3) and R. L. Polk and Company Surveys in selected localities (female-heads of households, only).

(b) Location of existing assisted housing by type.

(c) Appropriate newspaper clippings relating to civil rights.

Integrated into the "community profile", in summary form, should be:

(a) Maps which may include overlays showing minority concentrations, tracking materials derived from census block statistics and accompanying maps and/or supporting documentation previously submitted by applicants such as those included with:

"(1) Instructions for compliance with Title VI for the Neighborhood Facilities Grant Program (HUD 41906), Public Facility Loan Program (HUD 41905), the Open Space Land Program (HUD 41907) and the Neighborhood Development Program (HUD 41904).

"(2) Workable Program Submissions, including conditions to recertifications.

"(3) 701: Housing Elements; Studies in areas covered by CD Block Grant activities which identify problems of low income, minority, and/or female-headed households, including constraints, obstacles for delivery systems for services, and proposed treatment; Progress Reports and Final Project Closeout Reports; and any EO Contract Conditions.

"(4) Community Renewal Programs which illustrate community needs and/or delivery of existing facilities or services.

"(5) General Neighborhood Renewal Plans; Conventional Urban Renewal Plans (including individual plans—not NDP); Interim Assistance Plans, Disaster Planning Funds; Federally Assisted Code Enforcement Programs (115) and 312 grants and loans); Neighborhood Improvement Programs; Conventional and NDP Plan changes; Model Cities Planning Data, i.e. initial submissions and updates; CDA Letter #11 Plans; Low Rent Public Housing Program Reservations including section 23 Leasing."

(b) Information and maps available from EMAD, . . . e.g., Housing Market Reports, Annual Housing Surveys, Post Office Surveys.

(c) Studies by civil rights or public interest groups, universities, planning commissions and areawide and state planning organizations. Civil rights groups who express interest in providing assistance could be urged to review extent material, such as that listed above, to help prepare factual, EO profiles.

2. Alternatively, use the maps attached to the application if they are good and only supplement them with data on existing locations of assisted housing. For large cities, group similar census tracts. Keep these maps or tables with EO files. Send them to processing only if necessary to make a particular point.

3. a. Keep in EO files. Send to processing only if necessary tomake a particular point.

b. If deficiencies have been found in Questions 1–4, corrective action is required in the planning and programming of community development activities. These corrections should be reflected in the answers to Question No. 7.

4. This requires a comparison between the "facts" of the EO Community profile and the applicant's "facts" as contained in the application. If the facts in the application are substantially inconsistent with available information, the Reviewer should check "no", describe the deficiency, providing data and the source of the information which contradicts the application, and recommend corrective action.

As an example:

The minority area(s) of town has no public sewer system, a seriously inadequate septic system and/or dirt roads. The applicant identifies a number of community development needs, but does not identify these community development needs in the mi-

nority area(s). The reviewer shall succinctly present this evidence, noting how it may violate the provisions of 570.601 (2) and (3) as well as 570.303(a), and recommend corrective action.

In some cases the application may be incomplete. As an example:

In preparing a HUD funded Community Renewal Program, the locality had noted that 3 areas of the city were most severely deficient in streets and street improvements—all of them minority areas. The CDBG applicant in describing a need for street improvements within the locality, does not identify and/or summarize the greater severity of need of the minority community, as required in 570.303(a), although there is evidence that these deficiencies have not been corrected. Document the evidence and recommend corrective action.

8. Housing Assistance Plans. There are 3 primary sources of information on housing assistance needs. These are the U.S. Census publications and special tabulations; Polk and Company data; and state and area-wide agency studies.

Currently available in each area office is a special census tabulation prepared by EMAD which indicates housing deprivation of persons by family type and by minority groups. Housing assistance needs of minorities identified in table II which are below the figures in this special tabulation shall be documented and corrective action recommended.

9. If the goals are inappropriate to meeting the needs, the reviewer shall document the evidence and recommend corrective action. The following factors should be used to test appropriateness:

"(a) Proportional goals by household types. This is described in the HAP instructions and is one test of appropriateness.

"(b) Appropriateness of goals by tenure types. While proportionality is not required between meeting the housing assistance needs of current owners and renters, a community which has identified housing assistance needs for persons currently renting or expected to reside may not ignore these needs in their goals. The numerical goals for meeting the identified housing assistance needs of renters and persons expected to reside shall respond to these needs in a meaningful way.

"(c) Appropriate use of section 8 or other resources. Where needs are identified, and housing assistance resources (including section 8) which would serve the stated needs are available, the community must propose sufficient housing resources to meet, in a meaningful way, the needs of the income range identified in Table II.

"(d) Consistency of this year's proposed activities to 3-year goal. While the applicant is not required to meet all needs proportionately in any given year, the activities scheduled for any one year may not preclude meeting the proportionality or appropriateness tests (b. and c. above) over a 3-year period."

10. Self-explanatory.

11. This ties past performance to proposed goals. If a community for example, has not met prior goals for all or a part of their housing assistance, has not found suitable sites for new construction, or whose occupancy records in the HAP Performance Report indicate minority or female participation significantly below the needs which they have identified for these groups, the reviewer should document such evidence and recommend corrective action. Corrective action may include a recommendation for a specific assurance from the applicant, including goals and timetables, prior to approval of the application.

It is important, of course, to determine the causes of the failure to perform. For example, if such failure is due to problems associated with HUD's delivery of available resources, and the community has taken positive steps to make use of available resources without success, there should be no basis for penalizing the applicant. On the other hand, if the applicant has failed to take necessary actions within its control to facilitate the use of available resources to meeting housing needs, disapproval of the application may be appropriate. Brevity and specificity in requiring such specific assurances is illustrated by the following:

"... It is expected that (the City) will establish a timely schedule for implementing the Resolution which pledges that it will locate and approve sites for at least 90 units of family housing, of which 60 units or more must be in areas not having an undue concentration of assisted persons or low-income persons.

"It is imperative that specific sites be ready for our preliminary review no later than September 5, 1975. My staff and I would be happy to assist you in any way during the interim period to achieve this objective. Firm approved sites should be available to implement the production of the units no later than October 10, 1975. In this way, we can reach initial implementation of your Housing Assistance Plan during the first action year."

(Mr. SCHMITT assumed the chair.)

Mr. LUGAR. We leave virtually unchanged the requirement that entitlement communities must develop a housing assistance plan as a part of the community development process. This remains the principal link between the community development programs of a community and its housing needs.

Under our amendments, a community must certify that it has a current housing assistance plan in place, previously approved by the Secretary.

The small cities block grant proposal in the bill provides an optional opportunity for States to participate in the program by administering funds distribution for nonentitlement cities.

The committee believes that the small cities program can be enhanced by allowing States which are capable and adequately equipped to become involved in the process. Many States have community affairs departments. Most carry on community development activities.

Most have resources which can be used to assist small cities to meet their critical problems. We should not ignore them.

The provisions of the bill give States an option to administer funds distribution for nonentitlement cities if they: Provide a 10 percent cash match for the Federal funds; consult with local governments in developing a distribution system; administer the program with State funds; and provide technical assistance to the small cities.

The committee plan is a well conceived strengthening of federalism. In specifying that the funds cannot be used except to benefit small cities, the program avoids charges that the States will use the funds for other purposes.

It prohibits States from using only Federal funds for administration of the program, and very strongly specifies that local officials must be consulted in developing the funds distribution process.

These requirements are designed to assure that States choosing to participate in the process will be doing so in good faith, with the purpose of aiding the small cities within their boundaries.

In the event that a State does not choose to operate a program or is prohibited from doing so by failure to meet the bill's requirements, then the small cities are protected by HUD, who will operate the program essentially as in the present manner albeit with less procedural intervention.

These changes have been made to encourage those States which have already demonstrated an interest in local community development and to discourage those whose only attraction is the availability of Federal funds for building their own infrastructure.

States are free to develop whatever purposes and procedures for distributing funds that State and local priorities dictate. And consultation with local officials is required to assure a logical, appropriate, and equitable process for using the Federal funds.

Mr. President, I want to take a moment to anticipate a question which relates to the existing small cities program.

Under the State block grant program, States will be able to make multiyear commitments to their small cities. The proposed State block grant legislation is structured to provide States with maximum flexibility to meet the needs of their small communities.

States are in the best position to be sensitive to the needs of all of their smaller localities and to determine whether a multiyear commitment for some particular program is most responsive to local needs.

Since we anticipate that States will alter the existing program to be more responsive to their requirements and the needs of their communities, the proposed legislation does not contain a provision mandating continuation of existing multiyear commitments made by HUD where a State assumes administration of the program.

However, under the proposed statutory provisions, States may allow communities to receive the remaining years of a commitment and we would anticipate that they would choose to view this as a moral commitment to do so in order to provide as much continuity as possible for their communities.

Turning to the urban development action grant program, the committee retains the UDAG program as a separate section of the Housing and Community Development Act of 1974.

It is funded at $500 million per year for 1982 and 1983. The committee was impressed with the outpouring of support of this program hearing it described as one of the most successful economic development assistance programs devised by the Federal Government.

Again, as in community development, we undertook to make procedural changes which underscore administrative simplification without major changes to the substance of the program.

But we do sharpen the focus of the program in order that scarce Federal dollars may be concentrated on activities with the greatest economic benefits to their communities. We have also tightened the administration of the program by HUD to assure maximum return on the Federal dollar.

Mr. President, as our colleagues know, the administration had proposed originally that the UDAG program be funded for only 1 year.

This proposal reflected the fact that while the Secretary expressed his support for UDAG, he is engaged in a complete evaluation of the program's effectiveness and its relationship to future economic development programs.

We do not view our 2-year extension of the UDAG program as a preemption of the Secretary's prerogative to make recommendations for change to us after he completes his study.

Turning to housing, Mr. President, in this portion of the bill, the committee has again attempted to streamline the administrative procedures as well as to tame the growth of costs for assisted housing projects.

Yet, we believe this is a compassionate bill for we try to serve the needs of the truly poor and institute more equity into the aspects of the program which affect their ability to pay rent and otherwise meet living expenses.

The major budgetary problem that we face in housing programs is that funds are committed for subsidized housing far in advance. Budget authority provided today commits the Government by contract to housing subsidy payments for the next 15 to 40 years.

Given the skyrocketing costs of new construction, the Government cannot meet unlimited needs in providing housing assistance.

Our goal is to provide more housing. But continuously throughout this portion of the bill we have inserted provisions designed to target our limited funds to provide safe, decent, and adequate housing for those who are most in need.

Working again, well within our budget requirements, the bill provides assistance commitments for an additional 150,000 units in 1982 and 140,000 more in 1983.

Although this is a reduction from previous requests, it still means that we will be assisting 290,000 new families, 45 percent of these units will be new construction or substantially rehabilitated, and 55 percent will be existing units.

Several measures in the bill are designed to stretch the limited funds as far as possible.

For example, eligibility for assistance is limited to those with income below 50 percent of area median income rather than the current 80-percent limit.

This is still well above the poverty level in most areas, and is consistent with the purpose of aiding very low income families in obtaining decent housing.

Tenant rental payments under all of HUD's rental assistance programs would increase from current limits of 30 percent of adjusted family income, 10 percent of unadjusted family income or 15 percent in the case of section 8 tenants, or the housing portion of a household's welfare payments.

In addition, the definition of adjusted income would also be changed by income deductions across all programs to allow only for deductions for minors and elderly and handicapped persons.

The current system of deductions favors higher income tenants, who spend more and can then take more deductions.

However, to avoid undue hardship to those families receiving assistance, rent-rule changes will be phased in over a 5-year period and in no case shall result in an annual rent increase of more than 10 percent for any current tenant.

Several provisions in the bill amend the housing programs in ways that would reduce the average expenditures per assisted tenant again with the intention of stretching Federal dollars to assist as many of the truly needy as possible.

Among these provisions are a requirement that new section 8 projects be "modest in design and * * * reduce the types and number of unnecessary amenities and features," and another that limits Federal payments for vacant section 8 units to 1 month. Efficiency units are also encouraged in projects for elderly or handicapped persons.

The bill removes the requirement that section 8 and public housing projects must house families with a broad range of incomes. The committee feels that by requiring this economic mix while truly needy families go homeless is an injustice that was never intended in the original assisted housing programs.

The bill also recognizes the plight of local public housing authorities who are desperate for operating subsidies for those units already occupied. Operating subsidies are authorized by the bill at levels of approximately $1.2 billion in fiscal year 1982 and $1.35 billion in fiscal year 1983.

Several of the provisions I have discussed have the effect of standardizing certain administrative procedures where previously different procedures applied to the different housing programs.

These standardizations will not only save time and money, and make the programs more understandable, but will correct inequities in the ways these programs are administered.

None of the measures in the bill is designed to do anything less than provide safe, decent, and adequate housing to those most in need. We are attempting to make the limited funds we have work harder than ever to achieve that goal.

The balance of the bill, Mr. President, is relatively uncontroversial. Title III extends FHA insurance authority, increases loan limits on various manufactured housing insurance programs, extends the flood insurance program while repealing erosion coverage and extends the riot insurance program while repealing crime insurance protection.

Title IV creates new mortgage foreclosure procedures to permit HUD to speed up the process by which it recovers foreclosed multifamily rental units. This title overrides existing State mortgage foreclosure procedures which vary in their complexity and the time in which a building may be foreclosed and disposed of.

This new procedure is necessary to speed up foreclosure intakes to protect the physical condition of foreclosed properties and the quality of environment in which the tenants live during these proceedings. The committee received no opposition to the title and believes it is in the best interest of maintaining viable multifamily rental housing stock.

Title V is a simple, 1-year extension of the Department of Agriculture's rural housing programs. Few changes were made to these programs due to the limited amount of time in which we had to review them.

It is the committee's intention, however, to conduct a thorough review of the programs, for among other reasons, to determine if they are consistent with HUD assisted housing programs.

To the best of our knowledge, the rural housing programs have not been reviewed by the Senate since 1976 and we would all agree that much has changed in the housing needs of our country since then.

Mr. President, we are pleased with this bill believing it to be a constructive proposal for enhancing the quality of our communities, strengthening the bonds of federalism, and compassionately yet realistically meeting the fundamental and immediate housing needs of the poor.

And while not all of it was fully supported by all members of the committee, I commend this bill to my colleagues and urge its adoption in the traditional bipartisan manner that has marked our past efforts.

Mr. PROXMIRE addressed the Chair.

The PRESIDING OFFICER. The Senator from Wisconsin.

Mr. PROXMIRE. Mr. President, the Reagan administration has roared into the battle for a stronger economy carrying a banner that shouts "cut spending."

Now, I join that battle with joy. Hurray. For years I have been pleading with my colleagues in this body to cut back Federal spending. Now we have a President who not only agrees but also who has led the charge with a series of recommendations for sharp reductions.

In general, the Senate, as well as the House, has gone along with the President. I think we should have gone farther but the response in Congress to this call of retrenchment has been solid and constructive.

Now, today we come to a different phase of the Reagan crusade. Today we do not debate and decide on levels of spending. The budget resolution took care of that. Today we decide where the money we make available for housing and community development goes. We decide how to allocate and control money we take from the Federal taxpayers and expend for the purpose of reducing the slums and blight that shame our country and for the purpose of improving the pitifully inadequate housing that imprisons millions of our very poor.

The Banking Committee divided almost down the middle over this issue. Eight members voted to report the bill in its present form; seven members voted to knock out title I. Seven voted against reporting the bill at all. Now, why this division? Why did the committee so narrowly split on this bill?

An editorial in this morning's New York Times puts the issue squarely. That editorial, incidentally, is on the

desk of every Senator. It is entitled "Keep a Federal Eye on Federal Aid."

The editorial says, in part:

Congress will finally have to decide how to structure Federal aid to localities. Where it aims merely to use the Federal taxing power to support state and local budgets, it should attach no strings and relax all supervision. But where Federal assistance is to be earmarked for rebuilding cities and alleviating other social problems, it will have to insist on intelligent monitoring of how the money is spent. There's nothing socialistic about businesslike audits.

Now, the present law provides the cities with leeway to use the money for housing and community development with considerable discretion. Since 1974, when the Nixon administration recommeded and the Congress passed the community development program, the law has permitted mayors to use the money for three broad purposes: Eliminating slums and blight was number one; aiding low and moderate income families, number two; and alleviating other pressing needs.

Now, has the law unduly constricted the discretion of the Nation's mayors? Consider a report of the General Accounting Office before we decide, as the present bill before us would do, to relax standards any further.

What the GAO found was that there has been considerable abuse in the program as presently constituted. Here is a program—just think of this, Mr. President—here is a program that provides a tiny proportion, perhaps 1 percent of the money needed to provide adequate housing for the Nation's poor and to repair the blighted part of our cities. So limited funds should go to the most urgent housing and community development needs.

And yet, the GAO tells us that some of these funds have gone for music lessons and ice-skating lessons. That is right, music and ice-skating lessons. And with literally millions living on $5,000 a year or less, in one community 15 percent of the rehabilitation loans went to homeowners with incomes exceeding $30,000 per year.

Now, in committee, this Senator tried to tighten up the law by confining the rehab aid to families with incomes no more than 20 percent above the poverty level. When that would not fly, I proposed limiting assistance to families with incomes not exceeding 20 percent above median. The committee would not even accept that.

So, together with almost half of the committee, I voted against the community development section of the bill and then against the bill itself.

Now, what happens if the Congress knocks out title I of this bill? And I intend to offer an amendment shortly that would do that. It means we revert to present law, which, at least, provides for a system of accountability and reporting which, for all its faults, does require that most of the money serve the purpose of housing the poor and eliminating slums and blight.

The bill, as reported by the committee, in the words of the New York Times:

. . . proposes to pour a series of valuable domestic programs into one hat and pull out conservative rabbits called block grants. And where Government aid has already been thus transformed, as in so-called community development grants for cities, the White House wants to prove that the animal can be safely let off the Federal leash.

Mr. President, Congress and the President are well on their way to making historic reductions in spending on Federal programs. We should certainly insist that the money we do spend, since we are cutting it down, goes to help those who need help the most. No way will we do that by tossing billions out to the cities and telling them not to worry about accounting for how they spend it.

Now, let me be specific. The bill's five titles contain a variety of program revisions and extensions affecting virtually all areas of housing and community development. Included in the legislation are a major rewriting of the community development block grant program, reductions in fiscal year 1981 budget authority in compliance with Budget Reconciliation Instructions, authorization for 150,000 units of section 8 and public housing, down from 210,000 units last year, significant revisions in the section 8 rental assistance program, extensions of FHA insurance authorities, a new program to facilitate HUD's acquisition of multifamily projects in default, and the reauthorization of various rural housing programs.

This bill embodies a number of fundamental shifts in our approach to housing and community development. It includes some very worthwhile provisions.

But regrettably, the bill also contains some serious flaws that I believe must be corrected before the bill can be approved.

Mr. President, I would like to comment further on several of the more significant sections of the legislation.

Title I of the bill would almost totally revise the community development block grant program, and in so doing it would scrap many of the provision that in the judgment of many of us, are essential to assuring that the program accomplishes its objectives.

It would gut provisions of existing law designed to assure that the program principally benefits low and moderate income people and that its funds are targeted to worthwhile activities that are consistent with the purposes of the act. It would establish a new State role in the administration of the program for small cities, thereby needlessly creating another layer of bureaucracy in the program.

And, it would eliminate the law's requirement that, as a condition of receiving block grants, small cities must develop a housing assistance plan that reflects low and moderate income housing needs—that would be eliminated, the requirement that they develop a program to show that they are meeting the low and moderate income housing needs of their community—thus sending a clear signal to these communities that attention to low and moderate income housing needs can take a back seat in overall program goals.

Mr. President, these sweeping changes were approved with little opportunity for the committee or public interest groups to review them and to assess their impact. In fact, the legislation containing these revisions arrived at the committee's door literally hours before the secretary of HUD and public witnesses were scheduled to testify on the administration's housing and community development recommendations, and only days before the committee conducted its markup of the bill.

So they had no real opportunity to testify on the changes that go so far in the present law.

In examining the proposals, it becomes clear that the committee purchased a greater amount of local flexibility in using the program at a heavy price—the potential waste of millions of dollars. The hasty and ill-advised changes in the block grant program were a major reason for the unanimous minority vote against the bill. All Democrats did vote against the bill.

Title II of the legislation contains reauthorization of our housing assistance programs, and a variety of important changes in the way these programs operate. Of the 150,000 additional units of section 8 and public housing authorized for fiscal year 1982 under the bill, approximately 45 percent would be newly constructed or substantially rehabilitated, while about 55 percent would be existing or moderately rehabilitated. This level of assistance involves about $17.8 billion in budget authority.

The bill also simplifies the manner in which incomes are determined under the assisted housing programs, replacing the current confusing schedule of deductions with standard deductions and providing uniform recertification requirements. These are welcome improvements which should facilitate administration of the programs.

In addition, the bill would raise the tenant contribution for assisted housing tenants, both current and new, to 30 percent of income from the current level of 25 percent. This change will slow the rapid growth in housing assistance outlays while having only minimal impact on the majority of assisted housing tenants.

I think that part of the bill is particularly important because we should recognize that the great majority of poor people in this country are not benefited by this housing program. They are outside the program and they pay an average of 40 percent of their income in rent, not 25 and not 30 but 40 percent. So the relatively few that have access to this housing assistance have a tremendous advantage and an elite status.

In order to get more people into it, it seems to me it is more sensible to permit the level of payment by assisted housing to go to 25 percent and 30 percent.

The bill recognizes that the section 8 program is an enormously costly program, and it attempts to reduce these costs by reinforcing the program's emphasis on "modest design" housing, by giving greater weight to cost considerations in approval of applications for new section 8 development, by reducing payments for vacant units, and by reducing average room sizes.

These and other changes will lower the costs per-unit, and will enable us to serve a greater number of households for the

money provided. I should note that these provisions enjoyed wide bipartisan support.

The bill also addresses the serious impact that rent controls on new construction can have on new apartment construction.

I think everyone who serves in this body is aware of the effect of rent controls. There is a divided Senate, I am sure, on the issue, but many of us feel it has greatly inhibited construction. What this bill does is withhold section 8 new construction funds from communities which impose rent controls on newly constructed or vacant multifamily units.

Most committee Democrats strongly oppose this amendment. I personally supported it. While it will be argued that this provision unfairly penalizes the poor in areas with housing shortages, it seems to me that rent controls contribute to shortages, which penalizes all low income renters, not just those who would expect to receive section 8 assistance. If we can induce localities to remove rent controls we would spur new apartment construction and thus help relieve shortages.

Let me say that the provision does not withhold all section 8 assistance, just that for new construction and substantial rehabilitation. Existing and moderate rehabilitation subsidy would still be made available.

In the area of Federal housing insurance programs, the bill would extend for 2 years, in most cases, insurance authorities for both single and multifamily FHA programs. These extensions are necessary to prevent disruption of these programs which can mean so much for renters and homeowners of moderate incomes. The bill also raises loan limits and lengthens loan terms for FHA property improvement and manufactured home programs. These increases would reflect significant costs increases that have occurred since loan limits and terms were last increased.

Title IV of the bill would establish a new program of nonjudicial foreclosure for multifamily residential and nonresidential mortgages held by HUD under title II of the National Housing Act or under the section 312 program. I believe that the procedures outlined in this title accomplish the purpose of facilitating HUD acquisition of defaulted properties, while protecting the rights of the owners of these properties. Since substantial damage can occur to a property between the time it defaults and the time that HUD acquires it, this streamlined procedure can lower the cost of rehabilitation and resale by the Department following acquisition.

Mr. President, before I close let me indicate that while this legislation complies with the budget reconciliation instructions, it still involves some $22.5 billion in budget authority for fiscal year 1982. This is an enormous sum, and in light of the tremendous budget deficits that we are likely to see over the next several years, if the administration's proposed economic program is adopted, I do not believe we can point to the legislation as an example of fiscal restraint. I regret that greater savings will not be made because I feel that several areas could have absorbed reductions without causing any serious consequence. This legislation turns the housing and fiscal needs of the Nation on their respective heads. We need better targeting for the poor of the limited resources we have. What we have here is enormous sums of money to the States without any standards. This insures that on the basis of experience the money will be wasted.

Talk about Government waste, this legislation will build waste with our $22.5 billion housing program.

Mr. President, in closing, let me emphasize that I have enormous concern about the overall impact on this bill. I know that my concern is shared by many Members on my side of the aisle. If we cannot change this legislation to reflect our concerns, I do not see how many of us will be able to support its passage.

Mr. President, I know of no Senators on our side who want to speak at this time, but I would like to put in a brief quorum call, if the manager will permit, to give other Senators the opportunity to come to the floor at this time before I propose an amendment.

Mr. GARN. Mr. President, the bill before the Senate today is a major redirection of Federal housing and community development programs which will enhance the principles of federalism by giving the States and local governments more flexibility and which will meet the economic necessities of slowing the accelerating growth of program costs. The mandate of November's elections calls for more efficient Government that avoids unnecesary costs and burdensome regulations while continuing to meet basic problems of the country and its citizens. The Banking, Housing and Urban Affairs Committee has accepted that challenge and has streamlined Federal housing and community development programs. At the same time, S. 1197 maintains the framework of support for communities to meet their development needs and of expanding subsidies for the housing needs of the poor.

In the area of community development, title I of the bill largely incorporates the President's recommendations to strengthen the principles of federalism by simplifying and deregulating the community development block grant program and by allowing State governments a role in administering grants to small cities.

These amendments maintain the current purposes of community development support which are to achieve "the development of viable urban communities, by providing decent housing and suitable living environments and expanding economic opportunities, principally for persons of low- and moderate-income." However, growing administrative, regulatory, and procedural hurdles placed in the path of local governments seeking "entitlement" grants will be greatly reduced. Thus the bill will return this program to the original intent of a block grant which sets forth broad guidelines of community development aims and gives localities a flexible role to meet their needs in the manner they determine is best and most appropriate to local circumstances.

The bill gives States an option of administering community development funds for small cities. This is in recognition of the fact that many States have community affairs departments, activities and programs that support community development, and far greater ability to assess the appropriate priorities between competing small city development needs than Federal bureaucrats directed from Washington. To insure that small cities do continue to get the full benefit of the assistance provided, States must pay for administrative costs to run the program, consult with small city local officials, have community development planning and match 10 percent of the funds with State community development assistance to small cities. If a State does not choose to meet these requirements, then HUD will continue to award and administer grants from the funds set aside for the State's small cities.

Title I of the bill also continues the urban development action grant (UDAG) program at a level of $500 million for 2 years. The program has supported innovative economic development projects in many, many cities and in the committee's judgment should be continued for the 2-year period the bill covers for other programs. I know, however, that the committee will carefully review the administration's recommendations for this program for fiscal year 1983 based on a complete evaluation of its effectiveness which is now underway.

Mr. President, turning to housing assistance programs, the bill will reduce the rapid growth of costs for subsidized housing and better target the programs to help those most in need. I consider these changes to be essential to pursuing a housing assistance policy that the country can afford while compassionately recognizing the needs of the poor.

Significant steps toward controlling housing program costs are needed now to make progress toward budget control. These programs commit the Government for decades ahead to substantial growth in housing subsidies. Already these commitments total nearly $240 billion and even without the additional authorizations in this bill outlays will grow from $6.5 billion in fiscal year 1981 to over $9.6 billion in fiscal year 1986.

S. 1197 will slow the growth of costs through several significant steps. First, new authorizations for housing assistance are limited to $17.8 billion for fiscal years 1982 and 1983. This will provide housing aid for 290,000 more families beyond those already helped. Second, the committee has adopted the administration's recommendations to increase tenant rent over 5 years to 30 percent of income from the current 25-percent standard. This is justified because tenants in nonsubsidized apartments pay for more than 30 percent of their income for rent and outlays for subsidized housing will be reduced over $1.4 billion in fiscal year 1986 from this change. Finally, the bill makes tight program improvements which will reduce the cost of each additional housing unit so program funds can help more families.

The bill also will focus limited housing

funds on those who most need aid. Currently most of the 30 million eligible families get no help at all while a lucky few receive large subsidies. With the costs of the programs there is little prospect of ever being able to help all these families arbitrarily defined as eligible so the bill reduces the income limit to 50 percent of the median income in the area. This reduced limit is substantially over the poverty level in most areas. I also point out to my colleagues that even last year the democratically controlled Senate adopted a reduction in eligibility limits.

As chairman of the Banking Committee, I believe even greater improvements in the efficiency of housing assistance programs are needed. The committee will continue to examine improvements in the delivery mechanism such as through housing block grants. Reductions in mandated costs, which include such measures as excessive minimum property standards and Davis-Bacon wage requirements, appear essential to make these programs more efficient. The committee will also look at ways of financing subsidized housing, including the current practice of using the Federal financing bank for the public housing program.

Other provisions in the bill affect FHA mortgage insurance programs, rural housing programs, and miscellaneous programs in HUD and I believe these are noncontroversial.

Mr. President, I think it is important to point out to the Senate that this bill meets the reconciliation targets adopted by the Senate. Furthermore, unlike longstanding past practices of annual reauthorizations for FHA insurance and other housing programs, this bill provides a 2-year extension of these programs so the committee and the Senate can more effectively spend time next year considering program oversight and improvements.

Finally, I commend Senator LUGAR for his diligent work on this bill as chairman of the Subcommittee on Housing and Urban Affairs and Senator ARMSTRONG for thoroughness and thoughtfulness of his proposals to improve the housing programs, many of which are incorporated in the committee bill.

UP AMENDMENT NO. 129

(Purpose: To amend title I of the bill to retain existing law with respect to community development applications and distribution of funds)

Mr. PROXMIRE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The legislative clerk read as follows:

The Senator from Wisconsin (Mr. PROXMIRE) proposes an unprinted amendment numbered 129.

Mr. PROXMIRE. Mr. President, I ask unanimous consent that further reading be dispensed with. I shall explain the amendment.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Beginning with page 4, line 5, strike out all through page 12, line 14.

On page 12, line 16, strike out "SEC. 103." and insert in lieu thereof "SEC. 102.".

Beginning with page 14, line 6, strike out all through page 18, line 9.

On page 18, line 11, strike out "Sec. 105." and insert in lieu thereof "SEC. 103.".

On page 20, line 4, strike out "SEC. 106." and insert in lieu thereof "SEC. 104.".

On page 20, line 11, strike out "SEC. 107. (a)" and insert in lieu thereof "SEC. 105.".

On page 20, strike out lines 18 through 22.

On page 20, line 23, strike out "(2)".

On page 21, line 2, strike out "; and" and insert in lieu thereof a period.

On page 21, strike out lines 3 through 11.

On page 21, line 13, strike out "Sec. 108." and insert in lieu thereof "Sec. 106."

On page 30, line 24, strike out "SEC. 109." and insert in lieu thereof "SEC. 107."

On page 31, line 19, strike out "SEC. 110." and insert in lieu thereof "SEC. 108."

On page 32, line 2, strike out "SEC. 111." and insert in lieu thereof "SEC. 109".

Beginning with page 32, line 6, strike out all through page 34, line 15, and insert in lieu thereof the following:

TECHNICAL AMENDMENT

SEC. 110. Section 102(d) of the Housing and Community Development Act of 1974 is amended by striking out "103(a)(1)" and inserting in lieu thereof "103".

On page 34, line 17, strike out "SEC. 113." and insert in lieu thereof "SEC. 111.".

(At the request of Mr. CRANSTON, his name was subsequently added as a cosponsor of the amendment.)

Mr. PROXMIRE. Mr. President, this amendment would strike the substantive revisions of the community development block grant program contained in title I of the bill.

That title, it seems to me, properly could be called the Waste, Fraud, and Abuse Promotion Act of 1981, because if this bill goes through, on the basis of the General Accounting Office report, that is exactly what we can expect, inasmuch as they have documented the fact that even in the present program—which does require some degree of accountability—we have had abuse.

As the New York Times has pointed out, and I have referred to that editorial, if we let the animal off the leash entirely, we can certainly expect that the abuse; without accountability, without requiring any reporting, without even the effective discipline which we now have in the bill from the people in local communities, we can expect even greater abuse.

I offer this amendment because I strongly believe that the revisions contained in this legislation would drastically reduce the effectiveness of the community development program and cause the waste of millions of dollars of the taxpayers' money.

These changes, which upset the law's careful balance between local discretion and advancement of national objectives and which throw out provisions essential to assuring the proper use of public funds, were the major reasons why every member of the Banking Committee minority—every Democratic Senator—voted against reporting the bill. In fact, Mr. President, I am surprised that my Republican colleagues, so long the defenders of fiscal responsibility, would advocate provisions that contain such potential for the waste and abuse of the program's limited funds.

The changes the bill would make to the block grant program are dramatic and far-reaching: No longer would there be an application for CD funds explaining to HUD and to the public how a grant will promote a comprehensive strategy for community improvement.

In other words, that would not be necessary any longer. No longer would the applicant have to explain to HUD, explain to the Federal Government, in return for getting this money, these billions of dollars, how the grant would promote a comprehensive strategy of community improvement. If we lessen that kind of accountability, it is hard to believe that we would get the same kind of effort directed at solving the problem.

No longer would the Secretary be able to disapprove an application that would use funds in a manner clearly inconsistent with the purposes of the act. It is one of the reasons the New York Times is opposed to it. No longer would there be any formal structure for broad citizen participation in the community development planning process.

That is an element of control, to see that. Particularly in blighted areas, we have found a remarkable citizen response. We certainly have in Milwaukee, in Madison and other parts of my State, and I am sure it is true throughout the rest of the country: In areas where you have a great deal of poverty and where they normally are far less articulate, we did find leaders who would come forward and indicate their concern. Because of that, they would apply a degree of restraint and a degree of pressure to see that the program did serve the interests of the poor and of the low-income people.

Mr. President, while the bill would eliminate the application process, it would also weaken the Secretary's ability to conduct performance reviews which would be the only remaining method to assure that the taxpayers' money is not wasted.

Mr. President, you would normally think that, when you reduce these so-called requirements of accountability, the mayors and the communities and the counties and so forth would say, "Hooray, we do not want this redtape, we do not want to have to make this accountability." The fact is that title I is opposed by the National League of Cities; it is opposed by the Conference of Mayors; it is opposed by the National Association of Small Communities; it is opposed by the National Association of Counties; it is opposed by the National Association of Housing and Redevelopment Officials; it is opposed by the Work-Group for Community Development Reform; it is opposed by the National Low-Income Housing Coalition; it is opposed by the National Association of Neighborhoods.

The latter groups, I suppose, you might expect. But when you have a program of this kind opposed by local officials—including the mayors, including the counties—particularly when you have a situation where they did not really have an opportunity to testify—because, as I say, these proposals came up the very day they appeared. They had no chance

to check it with their membership, no chance for careful analysis, no chance for preparing statements in opposition—no wonder they opposed this kind of drastic and radical change.

I think it is to their credit that they indicate their opposition, although it would require a greater degree of accountability on their part.

The bill would also interpose State bureaucracy between HUD and small cities, by giving States the opportunity to receive the money from HUD and pass it on to small cities. For small cities, the link between CD grants and housing opportunities for low- and moderate-income people would be broken since these cities would no lcnger be requqired to accept such housing as a condition of their CD grant.

Mr. President, does anybody really think that many of these cities will provide housing opportunities for low- and moderate-income people, when they have resisted strongly? They have finally given in in many instances because that is the only way they would get housing money. When they do not have to comply, does anybody think the fundamental purpose of getting housing for low- and moderate-income people is going to be served by cutting the link?

Mr. President, my amendment is very simple: It would strike these changes in the CD law, and thus retain the current law. Current law results from a long history of carefully crafted compromises designed to strike a balance between local discretion in the use of funds, and appropriate Federal review to assure that the purposes of the program are carried out.

I believe it is vital that the Senate support my amendment for several reasons. First, the specific changes contained in the reported bill were the result of a hurried push by the Banking Committee majority to implement administration recommendations without benefit of adequate hearings and deliberation. As I noted in my opening statement, the proposals arrived at the committee a few hours before the scheduled hearings, and only a few days before the scheduled markup. The many organizations with important interest and expertise in the subject had no worthwhile opportunity to examine or comment on the proposed changes before the committee met to consider the legislation.

This brings me to my second objection: That there has been no evidence presented that these changes are necessary or even desirable for an effective community development program. True, we have heard complaints about overregulation and excessive zeal on the part of some HUD officials, and that the Department's regulations are difficult to comply with. But, these are primarily administrative problems that should be addressed by HUD. After all, those complaining so loudly about regulatory abuses are now in control of the regulatory process.

Who is running the show up there? Who is President of the United States? Who is Secretary of HUD? The Reagan administration is in charge, in firm charge, of the executive branch. If there are administrative difficulties, they can certainly solve them and they can do it without gutting this law.

Mr. President, I question whether there was a need for the kind of major statutory changes called for in this bill in order to make the CD program more responsive. Interestingly enough, my view was shared by the U.S. Conference of Mayors—the very group that we might expect to be most interested in a reduction of the Federal role in the CD program. In its letter to the committee expressing its concern about the committee's hasty action in marking up the bill, the conference stated that:

> We would like to emphasize that our members repeatedly have told us that the principal problems they have had with the CDBG program have stemmed from the regulation imposed in recent years which far exceed the intent of the statutory language.
>
> As we testified before the Subcommittee on Housing and Urban Affairs in 1980, we believe that the current statute is basically sound.
>
> What they are saying is:
>
> Yes, indeed, we would like to have the regulations simplified and clarified, which the Reagan administration can do without any change in the law, or without action by the Senate or the House.

But here we are knocking out the safeguards we now have, and it is wholly unnecessary, in the judgment of the people who have to live with this act, who know it intimately because they have lived with it for years.

So even the mayors agree that the problem with the CD program is not the statute—which represents that important balancing of interests—but the way HUD has administered the statute. It would seem more logical for HUD to try to streamline its administration consistent with the purposes of the program, before they come to Congress to claim the essential structure of the program is wrong.

My third objection to the bill's revisions of the block grant program is that they mean abdication of congressional responsibility to monitor the use of Federal tax moneys to see that they are expended in a sound, prudent manner. In this instance, deregulation of the CD program and too great a shift to the philosphy of local control would expose billions of Federal tax dollars to potential waste and abuse. I must again stress that the community development program represents a careful balancing of local discretion with Federal objectives. Restriction of the Federal role in this program will turn community development into revenue sharing with little ability to assure that Federal funds are used to carry out the purposes of the program. It was never intended that the community development program be a revenue sharing program.

Our former colleague, Senator Robert A. Taft, Jr., who was a good friend of mine at college before we both came to the Senate and who was a fine Senator from Ohio, commented in his views on the Housing and Community Act of 1974. This is what Senator Taft—who, of course, is the son of the late Senator Robert A. Taft, who was a Presidential candidate—said:

> A clear Federal directive is needed which channels (but does not mandate specifically) the use of funds. . . . I consider strong Federal directives for the program not to constitute support of bureaucratic "second guessing" but rather to be a necessity for fulfillment of the Federal responsibility to the taxpayers to promote the use of the money in as productive a manner as possible.

That was said by former Senator Robert A. Taft, Jr., of Ohio, a Republican, in stating his opinion when he was a member of our Banking Committee in 1974.

Mr. President, I believe that the statute as currently structured carries out Senator Taft's idea very well, and there is no compelling need to tamper with it to reduce the involvement of the Federal Government.

In fact, if there is any need to change the statute that governs the CD program, it should be in the direction of tighter, not weaker, Federal control. The GAO recently did a study for me of the effectiveness of the CD program in revitalizing America's cities. The results of their study are particularly alarming in view of the impact of the changes that this bill would make to the CD program. GAO found that HUD should require greater targeting of CD funds within communities if we are to have an impact on revitalization. Greater targeting, not less; not abandoning all targeting. Too much CD money is used for activities that have little relation to a community's real needs. Income limits have been too loosely set in some communities, and there is often no consistent pattern to the use of funds.

In summary, while the administration and the majority on the Banking Committee are calling for relaxation of the CD requirements—or as the New York Times said, letting the animal off the leash entirely— GAO says that Congress ought to take a hard look at the need for additional controls. I am not saying here that GAO is totally right and that we ought to legislate more controls on the program, but we have been put on notice by GAO that the direction in which this bill would take us is fraught with danger.

It is my view that the Senate, and the Banking Committee should reexamine the CD program to see how it could be made both simpler and more effective. Neither the bill before us, nor the process that produced it, have contributed to that goal. My amendment would retain current law.

Let me stress that. If my amendment is adopted, it does not mean we throw out everything. It means that we retain current law, which we have lived with and worked out, which is supported by the mayors and the counties, by those who work most closely with it. It would allow HUD and the committee the time to accomplish a more thoughtful and comprehensive analysis of the program.

I urge my colleagues to support an effective community development program by voting for the amendment I have proposed.

Mr. President, I ask for the yeas and nays on the amendment.

The PRESIDING OFFICER. Is there

a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. LUGAR. Mr. President, I oppose the amendment offered by the distinguished Senator from Wisconsin. It is an important amendment, because it addresses, I suspect, the basic change which the Reagan administration and Republicans on the Banking Committee have attempted to bring not only to title I but also to this entire legislation.

The Senator from Wisconsin has attempted to make the argument that, essentially, title I of our bill lets potential fraud off the leash—and he has cited the New York Times—and the general feeling that by failing to have applications that were of the order that the present legislation calls for, we would bring about mismanagement and the type of difficulty the GAO report describes, which the Senator from Wisconsin has illustrated with dramatic examples.

First of all, I simply wish to make the point that nothing in the bill we are discussing today, S. 1197, makes any change in the accountability of any government with regard to the expenditure of funds. As a matter of fact, the audit procedures have not been changed. I repeat that, because I believe there must be some misunderstanding that whereas in the present situation people are accountable, in the future they would not be.

I cite for the benefit of the record the excellent report which was established by the committee in preparation for this debate:

> For entitlement communities, the Secretary's review is conducted to determine whether the grantee has carried out its activities and its housing assistance plan in a timely manner and consistent with the three broad objectives of the Act cited in Section 104(b(3)—

I point out that those three broad objectives have remained the same from 1974 right through this current draft. There is no change in those objectives.

> Whether it has carried out those activities and its certifications in compliance with the requirements of Title I and other applicable laws, and whether it has a continuing capacity to carry out those activities.
>
> The Secretary's review of states which elect to distribute funds determines whether the funds had been distributed to localities in a timely manner and in conformance with the system described in its initial statement. In addition, HUD determines whether the state had carried out its certifications in compliance with Title I and other applicable laws and had conducted appropriate reviews of units of general local government receiving assistance from the state.
>
> The Secretary is authorized, where reviews determine that performance did not conform to the requirements, to make appropriate adjustments in future grants or state allocation amounts. With respect to assistance made available to units of general local government under section 106(d), the Secretary is authorized to adjust, reduce, or withdraw such assistance, or take other action as appropriate in accordance with the Secretary's reviews and audits. The Secretary is also authorized to provide such assistance directly to the units of general local government in the event that the Secretary found the state's action to be unsatisfactory with respect to allocating and administering funds. However, funds already expended on eligible activities under Title I would not be recaptured or deducted from future assistance to such unit of general local government.

Mr. President, that is not a change; that is the law. That is precisely what is in S. 1197. Any argument that S. 1197 makes fraud more possible and misspending more possible is simply erroneous.

It misses the fact that the audit procedure is identical.

If GAO finds difficulties, those difficulties might very well recur unless for some reason the new Secretary of HUD runs a more efficient shop.

It is not my purpose to engage in partisan rhetoric in the course of this discourse, but I might point out that the deficiencies that GAO found were found in a past administration and in audits conducted by that administration.

We are not suggesting that the audits be loosened. We, as a matter of fact, would commend to the Secretary of HUD the need to take to heart the deficiencies found by GAO in the administration of the past. But to somehow use those deficiencies as a way of discrediting S. 1197 is really to distort history very substantially.

What really is at the heart of this dispute on the amendment of the Senator from Wisconsin comes down to this word targeting and really who will determine priorities in a community and with what degree of labor those priorities will be obtained.

Mr. President, this act that we amend today commenced in 1974. The UDAG program was the successor for seven broad community development programs that were brought together into one. In 1974 there were communities such as Salt Lake City served by the distinguished chairman of our committee, Senator GARN, and the community in Indianapolis that I served as mayor at that time. I simply say during the committee deliberations we testified with some degree of expertise having been there, having filled out the forms. I suspect there are relatively few persons in this body among our colleagues who have had such a dramatic experience as taking a look at 2,600 pages of forms that the application contained in those days.

At one happy moment, and I have cited this in our opening statement, under Secretary Carla Hills and Assistant Secretary David Meeker, the application pages went down to apparently the low water mark of 52, not 2,600 but 52. During the markup we had a dramatic illustration of all of the equipment, all of the pages that used to be involved in making application for one of these things, stacks of books on top of each other, that actual mayors, actual councilmen, actual local governmental officials in this country faced because of action or inaction on this floor. We so seldom know the implications of what we do and the mischief it causes. But it was remedied by Miss Hills and Mr. Meeker, and 2,600 pages came down to 52.

Now, sadly enough, Mr. President, during the past 4 years the 52 has become 2,200. It is no wonder that the Reagan administration coming in now objected to 2,200 pages. I wish to make absolutely certain in our graphic senses we see the evolution of 2,600 pages down to 52, but during 4 years of the past HUD administration, back up to 2,200.

That really does not bring about any decrease in fraud. What it does bring about are headaches all over this country and it was not by accident all the pages accumulated. The pages accumulate because of targeting the desire on the part of the Federal Government to make certain that it intrudes in every process known to man and woman with regard to the application of UDAG. It is bureaucracy run amok. It has nothing to do with fraud. It has everything to do with people tinkering in local government.

Mr. President, this is an honest argument and there are many persons in our country who, as a matter of fact, believe the Federal Government knows best. If you are a true believer in the Federal Government and its intrusion you would be in favor of the 2,200 pages also. This is the way that we on the Federal side exercise our will.

The argument we are having today on title I comes in the simplification of the application, not in the audits, not in the antifraud provisions, but in the application. We are saying the application ought to be simple. It ought to hit head on the general objectives of this legislation to help poor people, to help provide decent housing to the poor, to focus our objectives on those who are of poor or at best moderate income in community development activities.

Those have been the objectives from the beginning and they are the objectives now, unchanged.

But it makes a whale of a lot of difference how you approach that application situation. I am sorry that in the markup it seemed to become a partisan matter, but so be it. We had an election last November. At least some of us felt the public said we have had enough of overregulation, bureaucracy run amok, control on top of control and we would like somebody to get in with the scissors and start cutting the pages out, and that we have done, the minority may feel with a vengeance, but I say with very great constructive intent and with deliberate speed.

I was surprised to hear the testimony of the U.S. Conference of Mayors. I have served as a member of the board of trustees of that body. I am well acquainted with most of the present membership of that board. I simply say that I do not know many mayors who in their heart of hearts are eager to have 2,200 pages as opposed to 52. In fact I became very suspicious of activity of that variety produced on the day of a markup and I suspect that in the leadership of that particular group there were a number of persons who simply, as a matter of fact, really like the old regime. As a matter of fact, we are a part of the old regime. But I simply say that is not the regime that came in with the election of 1980. And we are determined really to say to the country that it is time we went back to the spirit of the law of 1974 and that was a law that was fashioned by a Congress that had Democratic majorities on

both sides of the Capitol and a Republican administration, but it was an honest attempt to reduce Federal regulations and to bring about an application that gave local governments a clear shot at trying to meet these broad objectives of assisting poor people and bringing about standards of decent housing for the poor, and then provide for stringent audit by HUD which has remained ever since to make certain those objectives were fulfilled.

Let me comment briefly on the quotation that Senator PROXMIRE offered from our former colleague, Senator Bob Taft. Senator Taft's comment as quickly as I could transcribe it from Senator PROXMIRE's speech, talked about channeling rather than directing funds as the congressional responsibility, and clearly that is. Our responsibility here today is to try to think of how we are going to do some things about housing for the poor, about community development generally, to offer channels for that to occur. We are offering in this bill an exemplary attempt to give every citizen of the community the right to know the possibilities, the right to participate in the public hearing to be heard about those possibilities, the ability of local officials to respond to those citizen thoughts, and for procedures with local elected officials to move ahead, audited by HUD to make certain they met the general objectives.

That I think is constructive challenging and I believe would fully fulfill Senator Taft's ideas and ones which we on the majority side of the committee share.

Let me add just this final thought about the title I issue: I appreciate that this is a useful debate even if there is a difference of opinion because I think it highlights dramatically the difference between the view of federalism that the majority of the committee holds and the view of federalism which a part at least of the committee holds.

The view the majority hold on S. 1197 reflects this, and that is that there ought to be a maximum amount of local decisionmaking.

Most of us in public life, Republican and Democrat alike, have given speeches in which we have extolled the virtues of grass roots democracy, and we have pointed out how great it is to give people the right as locally elected officials, with public hearings, the grass roots opportunity to do what they wish.

Now we believe as a majority in actually implementing this when we have opportunities in statutes, and this is one of the first ones to come down the pike, and we have seized that opportunity, I think with enthusiasm.

The minority would have preferred, and may still prefer, simply to defer that debate altogether.

During the markup there was a complaint by the minority, which is repeated today, that there is so little time to think about all of this. Well, as a matter of fact, this has been a debate of our Republic for 200 years.

One does not need a whole lot of preparation to try to come to some determination as to what you think the role of the Federal Government ought to be vis-a-vis States and local governments. For our part we came fully prepared to debate that issue. We think the role of the Federal Government ought to be less. We think the application ought to be simple. We believe that the audit of moneys ought to be stringent.

I think it is a very clear-cut and concise policy which makes sense. I think the minority simply did not know what they wanted and stalled for time.

They may still, as a matter of fact, be calling for more time to regroup, to try to think through how you can have your cake and eat it, too. It is awfully hard to argue in favor of 2,200 pages and, at the same time, argue in favor of stronger local discretion. It simply will not sell.

Mr. President, I am hopeful that the amendment will be defeated soundly; that, as a matter of fact, we will proceed with title I in our bill, S. 1197. It makes a remarkable change. It sends the right signals to the country that we mean business and that we are prepared to try to give local discretion a chance.

Mr. GARN addressed the Chair.

The PRESIDING OFFICER (Mr. D'AMATO). The Senator from Utah.

Mr. GARN. Mr. President, I rise in opposition to this amendment. I certainly want to commend my colleague from Indiana for his excellent statement in opposition to this amendment, and I do not need to repeat what he has said because he has done it so adequately, except for one thing that I think needs to be emphasized.

As I look at the "Dear Colleague" letter from Senator PROXMIRE and others, the first paragraph really disturbs me because it simply is incredibly misleading. If you want targeting that is one thing. If you want more rules and regulations imposed on the mayors of this country, fine, and you can be for that. I do not happen to feel that way. It says:

> We intend to offer an amendment to overturn the Committee majority's action to strip the Community Development Block Grant Program of protections against waste and abuse.

Senator LUGAR mentioned that and he quoted the law. Everything else in the Dear Colleague letter is fine. The minority is entitled to their opinion. But as far as waste and abuse, the provisions we change have nothing to do with it whatsoever, and it needs to be emphasized that that is misleading to our colleagues. The auditing procedures are identical. That is a matter of HUD enforcing those auditing procedures. If there has been waste and abuse that is at HUD's doorstep. The changes we make have nothing to do with that. That must be pointed out.

To the staff who are listening to the squawk boxes before their Senators come out to vote on this amendment, let me say let us separate that issue out and get it to the point of whether we want more control over the mayors of this country or not. But let us not mix it up with fraud and abuse. The law is the same. I hope that point has been made clearly and sufficiently.

Let me also speak in opposition on a more general front. Fourteen years ago I was elected to the Salt Lake City Commission. It only took me about 3 weeks in office to start being discouraged with HUD.

For my entire 14 years in public office I have seen HUD grow with more and more controls, always with the excuse that they must dictate, they must target, they must decide what the purposes are.

My distinguished colleague from Wisconsin has heard this speech many times. I could sit down and he could give it for me. But, nevertheless, I will force him to listen once more. It is simply a matter of are we going to trust locally elected officials who are accountable and responsible to the voters in their cities or are we not? That has been an issue that Senator LUGAR and I have wrestled with for a long, long time because both of us served as mayors of our cities, as he said. Both of us served as officers of the National League of Cities, and both of us came back to testify time and time again before the congressional committees, before the Banking Committee, which I now chair, before the Finance Committee and the House committees. It was really rather demeaning to come back as an elected mayor of your city, having experience with local governmental affairs, working daily on housing and sewer and water and police and fire and all those services that are absolutely necessary to be provided from local governments, and be given 10 minutes to testify and be told "bring copies of your statement and we will ask you a few questions." This distinguished body of Senators, who have never had any of that experience would pat you on the head and say, "Go home, good mayor, and we will decide what is best for you."

Well, I am amazed that after all these years and all this money that has been spent by HUD, with so little effect across this country, that that philosophy still continues. That is one of the reasons why I ran for the Senate. I was tired of being treated like a little boy from the country, and decided that I should try to infiltrate. Maybe if I came to the Senate I could have some impact. But there are still those who think the collective judgment of 585 Congressmen and Senators somehow is better than the judgment of a mayor or city council elected in their city.

Again, most of those elected to the Congress have had no local government experience at all. Most of them came from law offices. We have got 70 lawyers in here, 71, I do not know, but certainly not too many who have actually been at the receiving end of HUD.

The reason I have to present this speech over and over again—and if I have to do it for the next 10 or 20 years I am going to do that—is because what happens in the implementation of the policy is Congress makes these policy decisions and they turn them over to HUD, and then we have GS–8's, 10's, 12's, and 15's, who are never accountable to any place in this country, creating these 2,600 pages of rules and regulations that Senator LUGAR talked about.

Just think of that. There is no doubt the Senate did not intend that at the time this act was created, but try to think of yourself as a mayor trying to

figure out those 2,600 pages. Think of the time and effort and wasted local taxpayers' dollars trying to satisfy these managers at HUD.

I have said many times we were not really mayors, we were the local managers for the Federal Government. But it was not even Congress that was really dictating to us. They were passing the buck to the bureaucracy and then the Federal civil servants, who have the next closest thing to eternal life you will ever find on the face of this earth. They are locked in where new Senators and new Presidents are only a minor irritation to them, and can yet create these page after page of rules and regulations.

Well, I finally started turning down Federal grants because they were to expensive to follow the rules and regulations. I turned down one-half of a million dollars of CETA funds the last year I was mayor.

So finally we have a majority in the Senate of the United States that really does feel we can trust some of these local government officials, and that we can get more for our dollars, more for the poor and the minorities, more in housing if we remove some of the strings.

So, yes, this is a very vital piece of legislation. And it certainly has not been dreamed up in the last 2 or 3 months. Some of us have been talking it for 6 years. It is not off the top of someone's head. Those of us who have worked with the A–95 review process and the application process I think are qualified to make some changes, to at least suggest some changes.

So this is an important debate today because it basically boils down to: Are we going to continue the dominance of Congress? The waste and inefficiency that has occurred in HUD over the last decade is a disgrace, primarily created by Congress. And now we are being told that it has worked so well let us continue it; do not change; do not let these locally elected officials have some discretion; continue to dictate to them.

And that is supposed to be efficiency. Hindsight is 20/20. I would suggest that the Senate look at the record of HUD and find out some of the abuses that are there. But you cannot blame it on the application process. That is part of the problem.

I do not know of any debate that I can think of that I feel more strongly about than this one. This amendment must be defeated. A very important principle that we are dealing with today is whether we continue to allow nonelected bureaucrats to make decisions for the cities and counties and States of this country, or are we going to turn some authority back. We should do this because you know there is a good, old-fashioned system in this country: If you do not like your local mayor, you can get a new one at the next election. But I would like someone to tell me how you get rid of the regional director of HUD in Denver, Colo., or any of the people who are sitting over there year after year, telling us how to run our cities.

So this is far more fundamental than what Senator PROXMIRE is talking about today. It is much deeper. It goes to the much more important subject of do we continue to centralize decisions in Washington, do we continue to have Senators with no local government experience decide what is best for 80,000 units of local government in this country, or do we give general, broad policy guidance to the cities and let them work within that framework, while still maintaining the control, as far as fraud and abuse?

I hope this amendment is overwhelmingly defeated, as it should be.

Mr. DODD addressed the Chair.

The PRESIDING OFFICER. The Senator from Connecticut.

Mr. DODD. Thank you, Mr. President.

Mr. President, I rise in support of and am pleased to cosponsor the amendment being offered by the Senator from Wisconsin.

I would like to compliment the distinguished Senator from Utah and the distinguished Senator from Indiana for the work they have done on this legislation. I would respectfully like to try and bring the debate on this amendment back to center, however, and discuss what is at stake in this amendment.

I believe that the provisions in the bill represent substantial change for the worse in terms of our ability and the ability of our cities across this land to effectively deal with the statutory mandate as dictated by the community development block grant program when it was established in a bipartisan way back in the early part of the 1970's, beginning in the Nixon administration and carried forward in the Ford administration and, over the past several years, in the previous administration.

Mr. President, the committee bill calls for some very significant changes in the application and review processes under the community development block grant program.

These proposals could have the effect, I believe, of diluting the targeting of Federal resources at a time when these funds are decreasing and are being subjected to increasing demands at the local level as a result of reductions and terminations in other programs whose functions are to be absorbed within the community development block grant program.

Under the present law dealing with the block grant legislation, applicants are required to undertake a multiyear planning process and develop a comprehensive local strategy for meeting community development and housing needs which relate to the primary purposes and objectives of the program.

An application may be disapproved if a community's statement of need is plainly inconsistent with the available facts and data; if the proposed activities are plainly inappropriate in meeting the applicant's needs; or if the applicant proposes either ineligible activities or the program as a whole does not represent an adequate response to meeting the needs of lower and of moderate income persons in the community.

Those are the two income groups which were specifically designated in the original legislation to be assisted by this program.

In sum, Mr. President, the current application requirements and review process provide for maximum local flexibility in the definition of needs and response, within the context of broad national priorities and the general requirement that funds be expended so as to produce measurable results in response to locally identified needs.

Certainly, Mr. President, the authority that was created under this legislation may have been construed in recent years to require the imposition of excessive Federal requirements and directions. And I would agree with the two previous Senators who have spoken, Senator LUGAR and Senator GARN, that there has been an unfortunate increase in the number of regulations and directions coming out of HUD.

But what I am suggesting, and I believe what the Senator from Wisconsin is suggesting, is that let us deal with that problem. If there has been tinkering with the legislation so as to create problems at the local level—and we do have an administration presently in office which is committed to trying to reduce the intrusion of Federal regulations—then let us deal with that problem.

But what is presently in the bill and what we are trying to correct is to avoid any changes in the community development block grant program that would weaken the purpose of that legislation as it was designed in the very first instance. If we want a revenue-sharing program here, then let us do that.

But I do not think that was the intention of the original sponsors or the people who are deeply committed to seeing something done at a time of limited resources, with slums and blight in our cities across this land.

What concerns me, Mr. President, about the pending changes in the committee bill is the fact that we are embarking, frankly, on hastily conceived and considered statutory modifications before there has been any evaluation of the present administrative regulations and procedures.

We have heard the rhetoric about how many pages of Federal regulations the people have to deal with. Mr. President, I am not going to argue with that. But let us look at what these regulations are, and if there are some bad ones then get rid of them.

But we are making a decision here today without really determining whether or not some of the provisions that are in those regulations are, in fact, the kind of regulations that are going to provide some assistance for people in this country. That is what we ought to be doing.

This Congress is only 5 months old. We went through the markup of the legislation in a couple of days. We really did not get a chance to look at whether or not the administration was really going to try and do something about the regulations.

The Senator from Wisconsin asked for a General Accounting Office study to be done to assess whether or not the present law is working and how it is operating.

They came back and said it is not tight enough because taxpayers' dollars are being wasted in local communities across this country because they are not meet-

ing the needs that this legislation was designed to address when it was originally enacted.

That is what we ought to be doing, if we are going to be responsible about dealing with the housing problems—and that is what we are dealing with here today, the housing problems of low- and moderate-income families in this country. That ought to be what we are trying to accomplish.

So, Mr. President, the obvious problem, as I have mentioned, with this approach is that we are without a statement of locally developed need and a strategy for meeting that need on a multiyear basis.

I believe that it is impossible to determine whether a community's annual statement of objectives and activities represents a valid response to local conditions. In addition, how can we insure that limited funds—and we are going to be dealing with limited funds and everyone in this body knows that—are being focused on national priorities?

Again, that was part of the original legislation in this area and, again, it was a bipartisan effort. We are talking about the Nixon-Ford legislation here. We are not talking about Carter legislation. We are talking about legislation that goes back to a previous administration, an administration that embraced many of the same philosophies that are being embraced today by the present administration.

While I am all for, as I mentioned, increased local flexibility—and I think the overwhelming majority of people in this body support that notion—and certainly in the utilization of scarce Federal resources to give those local communities the options that they should have, my concern is that we should not signal a retreat in Federal concern for the effective utilization and targeting of Federal dollars.

How do we insure that community development block grant funds are being spent in accordance with the program's primary objectives of principally benefiting low- and moderate-income persons without a statement of local need and the ability to measure local objectives against this statement? How do we insure that funds are used over time so as to have an impact without any multiyear planning process or comprehensive strategy?

I would submit, Mr. President, that it would be impossible. We are simply laying the framework for increasing waste and abuse in Federal resources at the very time when we can least afford it. Local communities, in fact, have expressed their opposition to this change.

I find it somewhat ironic that the so-called beneficiaries of the present legislation as it is written are opposed to the very notion. The very communities that we are talking about here today have expressed in a loud and almost unanimous voice that present law is a lot better than what is being offered by the committee bill, and, in fact, they support the amendment being offered by the Senator from Wisconsin and other members of the committee.

They recognize what the problems are at the local level, and almost without exception across this country they have stood up and said, clean up the administration and lessen some of the regulatory requirements.

For these reasons, Mr. President, I would urge my colleagues on both sides of the aisle to show some sense of proportion here, to show some balance, some deliberation, so that we can deal with the community development block grant program in an environment of some rationality.

That we just do not come in without any kind of analysis whatsoever and talk about local communities and flexibility, and at the same time also talk about meeting the housing needs of people in the Nation.

I strongly urge my colleagues to support the amendment offered by the Senator from Wisconsin.

Mr. PROXMIRE. Mr. President, I thank my good friend from Connecticut. What he said toward the end of his speech is unanswerable.

My good friends from Indiana and Utah talk about how the local officials want the change, how it is in their interest to have the change. What do they say? The National League of Cities, the Conference of Mayors, the National Association of Small Communities, the National Association of Counties, the National Association of Housing and Redevelopment Officials, the Working Group for Community Development Reform, the National Low-Income Housing Coalition, the National Association of Neighborhoods, and the National Urban League all unanimously, without exception, say they do not want title I adopted in its present form. They support, in effect, the Proxmire amendment.

It may be, as the distinguished Senator from Utah indicated, that Senators who have not served as mayors, and some of us have not, do not know what they are talking about when it comes to this kind of thing. But it is hard to believe that mayors who serve now, who have served under this legislation for years and years, do not know what they are talking about.

They speak, as you say, emphatically and clearly. They reject title I. They do not want title I. They say that the problem is not in the statute. The statute is a statute that they say they can work with. Their problem, they say, is in the regulations.

As I say, the new administration, and I share their view, is an administration that wants to reduce regulations sharply. I agree with that wholeheartedly. They are in office and have the power and responsibility to do it.

For that reason, Mr. President, I would hope that Senators would support this amendment and knock out this change.

My good friend from Indiana indicated that there was, in effect, as I understood him, no real loosening of auditing or control.

Well, Mr. President, I could not disagree more. The fact is in the first place there is no longer an effective requirement for people in the local community to participate in the planning process, particularly the people in the blighted area itself, people who have voluntarily had a part to play in working out these applications in the past. There is no effective provision in this proposed law that they could continue to participate.

It is true that the Sarbanes amendment was accepted in committee. What that amendment does, as we all know, is to require a hearing. It does not say when the hearing will be. The hearing can be after the proposal is all put together. As we know, that may well be the case in some communities where they do not have the kind of regard for the people in the blighted area that they should have.

Mr. LUGAR. Will the Senator yield for a question?

Mr. PROXMIRE. I am happy to yield.

Mr. LUGAR. I would simply raise the question as to how this particular argument pertains to fraud. In other words, how this would tie in with fraud and pertinent to the activities cited in the GAO report?

Mr. PROXMIRE. What that would tie into would be developing a program that really serves the needs of the local community as the people who live in that community see it. It would be quite different. If the Senator wants to know how this would tie in with fraud and waste, I am coming to that.

I do think it would tie into what is the fundamental purpose of this act, the reason we are providing a great deal of money. It is because we want to see that these blighted communities are served. We want to see legislation enacted that permits the people who live in the community the opportunity to speak effectively.

Mr. LUGAR. We have no disagreement on that. We all want to save blighted communities, but the Senator's arguments speak of loosening up the program. There seemed to be an implication that the changes in the application procedure and public hearings would in some way increase fraud or misuse of funds.

The debate we are engaged in is on the manner in which we should direct resources, which is important in terms of allocation, but does not pertain to fraud, review authority, or illegal use of funds.

Mr. PROXMIRE. Let me come to the other point. The point I made still stands. The Senator from Indiana has not shaken it. That was the opportunity for local people in the local community to be heard effectively on the kind of program they will have to live under and the kind of assistance that will be given to the community will not be heard effectively.

Now we come to the other part.

Under the bill as we have it now, as it would change the law, we would no longer have the requirement that performance review addressed where the grantee has carried out a program substantially as described in its application.

As I understand it, the application is designed to be the link between the local program and national objectives.

The part of the law that is knocked out is the part that sets forth that the application set forth a summary of a 3-year community development plan

which identifies community development and housing needs, demonstrates a comprehensive strategy for meeting those needs, and specifies both short- and long-term community development objectives which have been developed in accordance with area-wide development planning and national urban growth policies; second, formulates a program which includes the activities to be undertaken to meet its community development needs and objectives; third, describes a program designed to eliminate or prevent slums and blight, improve conditions for low and moderate income persons residing in or expected to reside in, as a result of existing or projected employment opportunities in the community, housing opportunity plans approved by the Secretary.

All of that which was required to be in the application is, under the title of the bill that is before us, eliminated. It seems to me that this would mean that the money would be far less likely to be spent to achieve the national objectives on which we jointly agree.

That is the part of the bill which I think is a mistake. That is the reason why I think the funds are less likely to be spent in the way the Congress earnestly desire them to be spent.

We do have, as the Senator has indicated, an objective finding and purpose of this bill, which, of course, has far less effective control than requiring that the application include this particular data.

Mr. President, I yield the floor.

Mr. TSONGAS. Mr. President, I understand that there is a time constraint, so I shall try to accommodate the Senate. Let me just make a few remarks, if I may.

COMMUNITY DEVELOPMENT PROGRAMS

Mr. President, for 20 years or so, we spent more money on urban renewal and various other unsuccessful urban experiments than we did to rebuild Europe under the Marshall Plan. We wasted a shameful portion of that money before we settled on a few important principles—principles supported by both Democratic and Republican administrations up to now. Those principles are:

First, target Federal funds to those who lack fiscal capacity to solve their own problems.

Second, use Federal funds to maximum advantage—as glue money for other public and private sector development efforts.

Third, insure that Federal and any other community and economic development funds are used to further a planned strategy for long-term economic growth, jobs and taxes.

In passing the CDBG program 7 years ago, Congress specifically rejected the notion that we create a revenue sharing program for community development, and embraced these principles as an alternative, to insure that the taxpayers' money would be spent wisely and effectively.

Last year, when we reauthorized CDBG for an additional 3 years, we looked at the law with great care. In thousands of pages of testimony on that law, not one word indicates that the law itself places undue burdens on local government. Many would say—and I would agree—that much can be done to relieve the regulatory, policy, and paperwork burdens on those governments without changing the law.

No evidence has been given that we should weaken the law, but evidence recently was given by GAO that we should consider strengthening the law.

No evidence has come forward to indicate that the link between smaller cities and HUD should be changed, or that smaller communities will benefit by changing from an objective HUD scoring system to a State-administered system with no guidelines and unclear controls on allocation of funds.

Now the administration has come forward with a proposal to eliminate application and review requirements. This includes elimination of requirements for a comprehensive strategy, to insure that CDBG funds are spent for solid, long-term economic and community revitalization purposes.

This includes elimination of the requirement that major physical development projects financed by the ACTION grant program be shown to be part of that strategy.

And with no justification, and certainly with no careful consideration of impacts, the administration proposes to give States the option to run a free-wheeling program for small cities.

The few requirements for this State control raise serious questions. For instance, the State is required to provide a 10-percent cash match. Is this 10 percent above and beyond projects already planned? The law does not say. Is this 10 percent to be allocated in proportion to each grant, or only for the first city in line?

Can the State run a long-planned highway through four towns and call it a 10-percent match? The law does not say. The law makes no provision for protecting those small cities which have received 2- or 3-year comprehensive grants, and may face termination of their programs in midstream if the program is taken over by the State. I want to question the distinguished chairman a little further on this specific point, and I hope to do so at some time.

I am strongly opposed to eliminating the statutory controls on expenditure of CDBG funds. I feel confident that we have examined this issue fully and fairly and have found no evidence to make these changes.

I am strongly opposed to transferring the small cities program to the States, because we have had no opportunity to examine the impact of this proposal, and no evidence that this move is warranted.

I ask unanimous consent that a letter on this issue from Mayor Jean Levesque of Salem, Mass., printed in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

NATIONAL ASSOCIATION OF SMALLER COMMUNITIES,
Washington, D.C., April 16, 1981.

Re proposed transfer of HUD Small Cities Program to the States.

DEAR ——— ———: In testimony given before the House Subcommittee on Housing and Community Development on March 19th, David A. Stockman indicated that HUD is presently considering transferring the C.D.B.G. "small cities" Program to the states in 1982 in order to more completely centralize this program.

As Chairman of the National Association of Small Communities (NASCO), I am concerned and upset that organizations such as NASCO, The National Association of Towns and Townships, the National League of Cities, Small Cities Advisory Council and other appropriate organizations were not notified of this totally new direction for the program, and also did not have the opportunity to work with HUD and OMB on this and other alternatives to realistically deal with the problems and needs of our smaller communities. Therefore, I strongly urge that greater involvement of states in the program not be pursued. As you no doubt know most states presently lack staff capacity to run the program and the performance by many states under the technical assistance program of Section 107 reveals for the most part a very marginal ability when compared with the assistance available from representatives of the HUD area offices. Moreover, it is the feeling of most local officials that the federal review process is objective and not politicized as most state grant processes have become.

What small cities need is a lowering of the entitlement threshold so that a significant number would have direct access to HUD funds on an entitlement basis. The mechanics for competing for the small cities funds should also be simplified. Both of these improvements to the Small Cities Program are best achieved in the context of the program remaining at the Federal level.

We urge your objection to any legislation which would transfer the program to the states!

Very truly yours,

JEAN A. LEVESQUE,
Chairman.

Mr. TSONGAS. Mr. President, the report which accompanies this bill justifies these changes on the grounds of unwarranted Federal regulatory intrusion and burgeoning administrative hurdles.

It says we have gone from 52 pages to over 2,000 pages of regulations in 7 years. I do not want to quibble over the total number of CDBG regulations for the entire program, but I must point out that the HUD regulations for the application and review requirements, for both small and large cities—which means that not all cities are subject to all requirements—appear to be about 52 pages.

I may have missed a few hundred pages, but I cannot have missed 1,950 pages. So let us not say we are eliminating 2,000 pages of regulations by ending the protections in the laws.

Again, while local officials have complained about the need to reduce paperwork, and those complaints are justified, let us not say we need to reduce effective use of the taxpayers' money in order to reduce paperwork. Let us call it what it is—negligent use of tax money for no purpose.

In conclusion, let me say that these community development laws are more to me than words on a piece of paper, or formula calculations on a computer printout. I spend a lot of time bringing these programs to life in Massachusetts.

I know that, absent these requirements, a lot of cities will continue to do a good job. But if we want to avoid going back to funding golf courses, we should

not abandon 7 years of careful fine tuning and leave that possibility open.

If the States were to take control of the program for small cities, I am sure that some—like Massachusetts—would spend the money well, because they have a proven track record in community development.

But there is no justification for placing a new layer of bureaucracy between local government and these funds, and certainly no reason to give the States the opportunity to subvert the objectives of this program.

Mr. President, we do not need to enact these provisions. We have an authorization. We are not required to take this action in order to comply with reconciliation. We shall make a big mistake if we act now in haste, and our actions result in unwise expenditure of scarce Federal funds.

Let me make two other remarks, Mr. President. I do not believe any Member of the Senate spends as much personal time as I do working on cities. Just in terms of the scheduling of my time in Massachusetts, I spend a lot of my time working with individual mayors on the issue of revitalization. The cities in our State have had a lot of bad years and it is a challenge to try to bring them back.

First, I can state with certainty that if you make changes in the CDBG program, or cut it back, the opportunity for these cities to engage in their own revitalization will be severely diminished. I think anyone who has worked with cities would arrive at the same conclusion. I think the statement by Senator PROXMIRE indicating how these cities feel about the changes is rather conclusive.

Second, I want to make a prognosis. In my opinion, the best urban revitalization program is the UDAG program. That program also happens to be the one with the most stringent terms and conditions for targeting resources. A program like public service CETA, with less stringent targeting, has been subject to great abuse.

I believe that, potentially, one way to eliminate the CDBG program is to take all the restrictions out of the law. Then it will be abused and the abuse will become the rationale for killing the entire program.

It seems to me if we are going to kill it, let us do it in a way that shows what we are doing and not in this rather strained way that I think does justice neither to the opponents nor to the program itself. I urge that the amendment of the Senator from Wisconsin be approved.

Mr. President, I would like to engage the chairman in a colloquy about one of the provisions of title I, if I might. As he has explained, the bill would permit States, at their option, to take over administration of the small cities community development block grant program.

In my State of Massachusetts, many, many communities participate in the small city program.

Many of these communities are participants in the comprehensive small cities program, administered by HUD to encourage comprehensive community development planning and programing for small cities.

As the chairman knows, communities participating in this program are not given 3-year contracts, but are awarded funds on an annual basis, pending sufficient appropriations and adequate progress in meeting the previous year's goals.

Consequently, there are many communities now in the first, second, or third years of planned, comprehensive grant programs which face the possibility of State administration of the small cities program in fiscal year 1982 and beyond.

Now, it is my understanding that some very considerable portion of the funds which would be made available for nonentitlement grantees in fiscal year 1982 and fiscal year 1983 has been committed, in effect, through the comprehensive small cities program.

I know that for my State of Massachusetts, the figure would be very high, since a high proportion of my State's small cities are participants in the comprehensive grant program. Mr. Chairman, am I correct in my reading of S. 1197 that there are no statutory provisions which require States to honor these multiyear commitments where they have been made by HUD in previous years?

Mr. GARN. That is correct.

Mr. TSONGAS. Would I also be correct in assuming that the committee assumed when drafting this legislation that the States would honor multiyear commitments made by HUD, even though the statute does not specifically require them to do so?

Mr. GARN. The committee based its decision to offer States the option to undertake the administration of the small cities program on a belief that many States have the capacity and the willingness to run sound community development programs.

The committee believes that States can run these programs with more sensitivity and understanding of local problems than the Federal Government.

Thus, the committee would be very surprised to find that States which opted to take over the small cities program were not prepared to honor these commitments, insofar as they are clearly responding to the needs of communities which adopted multiyear programs to address their needs.

Mr. TSONGAS. I appreciate that statement. The chairman would agree, then, that it was the committee's intention, and therefore the intention of the entire Senate in adopting these changes to title I, that States opting to take over the small cities grant program would be expected as a condition of such a takeover, to honor and fund those multiyear commitments which cities undertook with funding and approval from HUD in previous program years?

Mr. GARN. Yes, that would be correct.

Mr. TSONGAS. Would the chairman further agree that the Senate would expect the Secretary of HUD, when issuing regulations to enact this provision, to include in those regulations a requirement that States agree to honor and carry out to their completion multiyear commitments made to communities in previous program years by HUD?

Mr. GARN. Yes, I certainly would expect HUD to include such a requirement in the regulations.

Mr. TSONGAS. Once again, I would like to thank the distinguished chairman of the Banking Committee for this opportunity.

ORDER OF ROLLCALL VOTE TO OCCUR AT 3:30 P.M. TODAY ON UP AMENDMENT NO. 129

Mr. STEVENS. Mr. President, it is my understanding that the distinguished Senator from Wisconsin has an amendment that is pending that is ready for a a vote at this time. Have the yeas and nays been ordered on that amendment?

The PRESIDING OFFICER. The yeas and nays have been ordered.

Mr. STEVENS. I ask unanimous consent that the rollcall on the amendment of the Senator from Wisconsin occur at 3:30 this afternoon.

The PRESIDING OFFICER. Is there objection? Without objection, it is so ordered.

Mr. STEVENS. Mr. President, I ask unanimous consent that that amendment be set aside and that other amendments be in order. I announce that it is our intention that if rollcall votes are ordered on any amendments called up between now and 3:30 p.m., they will occur following the rollcall vote that has been ordered on the amendment of the Senator from Wisconsin.

We also hope that we will be able to finish this bill by 4:30 this afternoon. We will have more to say about that later.

The PRESIDING OFFICER. Is there objection? The Chair hears none and it is so ordered.

UP AMENDMENT NO. 130

(Purpose: To amend section 201 of the Housing and Community Development Amendments of 1978)

Mr. DODD. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Connecticut (Mr. DODD) proposes an unprinted amendment numbered 130.

Mr. DODD. Mr. President, I ask unanimous consent that reading of the amendment be dispensed with.

The PRESIDING OFFICER Without objection, it is so ordered

The amendment is as follows:

On page 66, between lines 18 and 19, insert the following:

ENERGY EFFICIENCY EFFORTS

SEC. 213. Section 201 of the Housing and Community Development Amendments of 1978 is amended—

(1) by redesignating subsection (h) as subsection (i); and

(2) by inserting after subsection (g) the following:

"(h)(1) Notwithstanding any other provision of law, in exercising any authority relating to the approval or disapproval of rentals charged tenants residing in projects which are eligible for assistance under this section, the Secretary—

"(A) shall consider whether the mortgagor could control increases in utility costs by

securing more favorable utility rates, by undertaking energy conservation measures which are financially feasible and cost effective, or by taking other financially feasible and cost-effective actions to increase energy efficiency or to reduce energy consumption; and

"(B) may, in his discretion, adjust the amount of a proposed rental increase where he finds the mortgagor could exercise such control.

"(2) The Secretary may waive one or more of the requirements of this section and may provide financial assistance to an owner of a project which is eligible for assistance under this section in order to assist the owner in carrying out a plan to upgrade the project to meet cost-effective energy efficiency standards prescribed by the Secretary.".

Mr. DODD. Mr. President, this amendment addresses the serious situation threatening the viability of the existing inventory of HUD insured and subsidized housing developments in my State and in many other areas of the Nation experiencing rapidly escalating utility costs. Our failure to take immediate and cost-effective actions to promote energy-efficiency in this inventory would place this housing beyond the financial reach of those it is intended to serve and would substantially increase Federal costs.

The situation this amendment addresses stems from the very nature and design of the prior HUD insured and subsidized programs. Unlike the section 8 program which provides for annual subsidy increases in response to increased operating costs, these HUD subsidy programs—section 236, section 221(d)(3) program which provides for annual supplement—provided fixed levels of assistance which do not increase in relation to income changes or cost increases. Principally as a result of increasing utility costs, many residents of these developments now pay excessive portions of their incomes for rent and have no housing alternatives.

The problem, Mr. President, is that the owners of these projects have little, if any, incentive to conserve energy and no available source of Federal assistance for needed improvements. Since HUD regulates rents in these buildings, a rise in utility bills prompts mortgagors to apply to the Department for rent increases to cover the additional expenses. In most cases, HUD simply verifies the increase and rarely considers whether all financially feasible steps have been taken to reduce utility expenses. The increase is granted and residents bear the full impact through increased rents. As long as HUD will approve these costs and the residents pay for the increases, mortgagors have no economic incentives to reduce costs by conserving energy or seeking lower rates.

In response to this situation, the first portion of my amendment would require the Secretary to assess the extent to which rent increases requested by the owners of these projects result from increased utility costs and the degree to which the owner has taken steps to decrease energy consumption.

The Secretary could approve less than the full increase, but my intent here is not to limit the ability of owners to secure necessary operating income.

Rather, the purpose here is to insure that owners know future rent increase requests will not be approved automatically if they continue to avoid reasonable, cost-effective actions to mitigate utility costs and the resultant effects on tenants.

For example, owners should be expected to try and secure the lowest utility rates possible for their property and implement cost-effective energy conservation measures using available project reserves or Federal and local assistance.

This amendment will not deprive owners of rent increases to which they would otherwise be entitled but rather would insure that such increases are limited to circumstances outside the owner's control.

Because these conservation improvements often increase costs in the short-term, I believe that it is essential that the Federal Government provide funding for these efforts as a last resort in order to maintain these housing resources at affordable rents for the low- and moderate-income families for whom this housing was designed to serve.

The simple fact is that there is currently no Federal funding source to provide direct assistance to project owners to make this housing energy efficient.

Modest expenditures for this purpose would be more than offset by the future energy savings and the reduction in the ultimate Federal contribution needed to keep this housing within the means of its residents.

While funding to increase the energy efficiency of these projects is permissible under the program of operating assistance for troubled multifamily housing projects enacted in 1978, the requirements for receipt of this assistance are geared to a more comprehensive treatment of the management and capital improvement needs of financially troubled projects.

In sum it is difficult, if not impossible, to obtain funding under this program exclusively for conservation activities absent other serious deficiencies.

The purpose of this assistance, however, is to maintain the financial soundness and low- and moderate-income character of the subsidized projects.

Making these projects energy efficient contributes to this objective, particularly in light of recent utility cost increases.

With this in mind, the second part of my amendment gives the Secretary the discretion to waive certain requirements under the troubled projects program in order to provide mortgagors with assistance to implement a cost-effective energy conservation plan.

It simply does not make sense to require these projects to become more distressed overall before they can become eligible for this assistance.

The decisions as to which comprehensive requirements would be waived and the use of funds for energy conservation are left to the discretion of the Secretary.

I envision that this change would enable the Secretary, at his discretion, to use this authority in circumstances consistent with the purposes of this assistance and only upon a determination that the owner is incapable of making these improvements without creating an additional cost burden on residents.

These activities would be funded from the available appropriation for the troubled projects program and would not result in any increase in budget authority or outlays.

In conclusion, I hope that my colleagues will agree that these amendments represent a modest and prudent step, within the current budget limitations, in support of both enhanced, cost-effective energy conservation and the protection of the very valuable investment of the Federal Government in the housing inventory for our lower and moderate-income citizens.

Mr. LUGAR. Mr. President, we believe that the amendment offered by the Senator from Connecticut has merit and will be delighted to support the amendment.

Mr. PROXMIRE. Mr. President, I commend my good friend from Connecticut for coming forward with this initiative to provide incentives to increase the energy efficiency of HUD subsidized housing developments and thereby mitigating the potential impact of rent increases on low- and moderate-income residents.

As I understand this amendment, HUD would be required in the consideration of proposed rent increases for these developments to consider the extent to which owners can and have taken cost-effective energy conservation measures within their control.

In addition, the Secretary would be given the discretion to use funds appropriated for the troubled projects program to finance these needed improvements.

This amendment will not result in any increased costs and, in fact, in the long term should result in a savings to the Government to the extent that energy consumption is reduced and the likelihood of future income subsidies or insurance claims is mitigated.

For these reasons, I am pleased to accept the Senator's amendment on behalf of the minority.

Mr. DODD. I thank my distinguished colleagues from Wisconsin and Indiana for their support of this amendment. I appreciate the assistance they have given me in developing the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 130) was agreed to.

Mr. PROXMIRE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. LUGAR. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 131

(Purpose: To strike section 211 of the bill)

Mr. ARMSTRONG. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Colorado (Mr. ARMSTRONG) proposes unprinted amendment numbered 131:

On page 63 of the bill, strike lines 23, 24, and 25, and strike the entirety of pages 64 and 65 of the bill.

Mr. ARMSTRONG. Mr. President, before addressing myself to the subject of this amendment, which I will do quite briefly, let me just take this occasion while I am on my feet to congratulate the distinguished subcommittee chairman and the ranking minority member and the others who have worked to bring this bill to the floor.

In my judgment, the legislation which we are now considering corrects some very serious difficulties with the present program of subsidized housing. If there were ever a moment in the life of this country when it was important for us to target our resources to be sure that the truly needy received the first and largest allocation of scarce resources and to wherever we can eliminate wasteful or abusive practices, this is obviously the time and place, and I believe that this bill does much to accomplish that purpose, and I think it is a very worthy thing and I do congratulate the managers of the bill in making that possible.

The amendment is a very simple one. It strikes from the bill a section which was inserted originally at my suggestion which provided for an interagency task force consisting of HUD, OMB, and Treasury to report to Congress within 6 months on three matters:

First, the direct and indirect Government cost on a per-unit basis of providing housing under the three major Federal rental housing assistance programs; second, the least expensive means of federally financing section 8 projects; and third, what additional Federal resources will be required to protect the Federal Government's current investment in already subsidized Federal housing projects.

This study is, in my judgment, urgently required for reasons which are spelled out in some detail in the committee report.

However, I am disposed to strike this from the bill upon the assurances by the Department that they are prepared to go forward with that study in an expeditious manner and furnish to Congress the information which is requested by the bill or which is directed by the bill in its present form.

I am particularly inclined to do so because of my very high regard and friendship for the Assistant Secretary of HUD for Housing who has expressed great personal interest in conducting a study along the lines which are contained in this section, and I have every confidence that under his leadership and that of others in the Department the study will be conducted and, therefore, the statutory language is not necessary.

With that explanation, Mr. President, I move the adoption of this amendment.

Mr. LUGAR. Mr. President, I compliment the Senator from Colorado on his very constructive amendment, even more so on his generosity of spirit in striking language which he offered in the markup.

But as the distinguished Senator has related, he has visited with the Secretary of HUD and with others and has been reassured that the objectives that he sought are shared by them and will, in fact, be implemented. We are delighted to support his amendment.

Mr. PROXMIRE. Mr. President, the amendment of the Senator from Colorado, as I understand it, would withdraw the requirement of this study that is in the bill. It would do so because, as I have been told, this study will be made anyway by the administration.

And I wish to say, of course, I accept the amendment and am happy to support it.

The PRESIDING OFFICER. Is there further debate?

The question is on agreeing to the amendment of the Senator from Colorado.

Mr. ARMSTRONG's amendment (UP No. 131) was agreed to.

Mr. LUGAR. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. PROXMIRE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 129

Mr. CRANSTON. Mr. President, I wish to speak briefly on the amendment that has been proposed by Senator PROXMIRE.

I am very happy to cosponsor the amendment which would delete all of title I of the housing and community development amendments in S. 1197 except for the program dollar authorizations and the sections dealing with the authorization of the urban development action grant program. The remainder of the provisions contained in title I of S. 1197 are so onerous that a bipartisan effort to improve the proposed title would be pointless.

In an effort to relax Federal regulation of community development block grants (CDBG) the committee majority voted to amend the existing statute so that:

First, the current application procedure for requesting CDBG funds is deleted;

Second, the secretarial review process is weakened to the point where review of the community's proposal occurs after the project is funded;

Third, the existing requirement that a comprehensive community development plan and strategy be submitted is dropped;

Fourth, citizen participation requirements are weakened; and

Fifth, a State block grant program is created.

If these provisions are adopted I am concerned that the ability of the Federal Government to assure that CDBG funds are targeted to low-income persons and to projects that will have an impact on revitalization of a community will be significantly weakened. Because the community will be able to substitute a statement of objectives, published in a local newspaper, that is not reviewed by HUD in lieu of a formal application, the Federal Government will not have the opportunity to comment upon the proposed use of Federal funds until after the project is funded. This could lead to abuses and waste in the program. Communities could fund projects including swimming pools, tennis courts, and saunas under the guise of redevelopment and not use the funds for the benefit of low-income people. The projects would be well underway before HUD would have the opportunity to curtail this kind of abuse.

This change in the formal application procedure by the Republican majority is a perverse attempt to permit cities to avoid using CDBG funds for low- and moderate-income people as set out in the purposes of the act. The elimination of the application process and the reduction of participation of low-income persons in the development of the redevelopment plans for their communities will allow cities to revitalize low-income areas without considering the needs and desires of low-income persons who live in those areas.

These changes have been adopted by the committee without adequate hearings or comments. In fact, a recent GAO report found that even under the existing program communities fail to effectively target their funds, and that the funds are often used for questionable purposes. GAO concluded that tighter oversight was needed to assure that progress is made in carrying out the purposes of the act. Title I of this bill contradicts the intent of the GAO report which calls for stronger Federal controls. I do not consider title I to be a responsible approach to the disbursing of CDBG funds to communities.

Mr. President, these changes transform the program into little more than a revenue-sharing program which is not the intent of the CDBG program. It was specifically designed to allow for Federal controls so that localities would not abuse the discretion they are afforded in the act. Congress has a responsibility to assure that Federal funds will be used in a manner consistent with the purposes of this act. I am very concerned about the potential for abuse that would occur if this title is enacted and it is for this reason that I urge my colleagues to vote for this amendment.

I yield the floor.

Mr. SCHMITT. Mr. President, what is the pending business?

The PRESIDING OFFICER (Mr. COCHRAN). The pending business is S. 1197. There is no amendment pending at this time.

UP AMENDMENT NO. 132

(Purpose: To reduce the section 516 authorization)

Mr. SCHMITT. Mr. President, I send an amendment to the desk which is in the nature of a technical amendment. and I believe the managers of the bill have agreed to accept it.

The PRESIDING OFFICER. The clerk will report the amendment.

The legislative clerk read as follows:

The Senator from New Mexico (Mr. SCHMITT) proposes an unprinted amendment numbered 132.

Mr. SCHMITT. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 106, line 9, strike out "$49,000,000" and insert in lieu thereof "$24,000,000".

Mr. SCHMITT. Mr. President, I believe the distinguished manager of the bill, Senator LUGAR, understands this amendment. It merely corrects the legislation to follow the intent of the committee. An inadvertent error in amount was included, and this amendment will correct that error.

Mr. LUGAR. Mr. President, I am pleased to commend the Senator from New Mexico for a very constructive amendment, for his careful and thoughtful attention to detail. Obviously, we support the amendment.

Mr. PROXMIRE. Mr. President, I understand this amendment is required for reconciliation, and therefore I am happy, of course, to accept the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from New Mexico.

The amendment (UP No. 132) was agreed to.

Mr. SCHMITT. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. PROXMIRE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. LUGAR. Mr. President, I suggest the absence of a quorum.

The PRESIDING OFFICER. The clerk will call the roll.

The legislative clerk proceeded to call the roll.

Mr. RIEGLE. Mr. President, I ask unanimous consent that the order for the quorum call be rescinded.

The PRESIDING OFFICER. Without objection; it is so ordered.

UP AMENDMENT NO. 133

(Purpose: To reallocate unused entitlement funds)

Mr. RIEGLE. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

The legislative clerk read as follows:

The Senator from Michigan (Mr. RIEGLE) for himself, Mr. DIXON, and Mr. LEVIN, proposes an unprinted amendment numbered 133.

Mr. RIEGLE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 15, beginning with "added" on line 3, strike out all through line 5 and insert in lieu thereof "reallocated in the succeeding fiscal year among the metropolitan cities and urban counties of the same State on the basis of a formula under which the amount reallocated to each such city or county bears the same ratio to the total amount reallocated to the metroplitan cities and urban counties within that State as the ratio which the amount allocated to that city or county pursuant to the preceding provisions of this section bears to the total amount allocated to the metropolitan cities and urban counties within that State.".

Mr. RIEGLE. Mr. President, I am offering this amendment on behalf of myself, Senator DIXON, Senator LEVIN, and Senator PERCY.

This amendment addresses the need to reallocate community development block grant funds after they are allocated by formula to communities that for a variety of reasons do not participate in the block grant program. Under present law, funds that are allocated to a community but not used are redistributed by HUD to other nearby communities. First priority goes to other communities in the same metropolitan statistical area. Second priority goes to other communities in the same State. Funds have not been redistributed outside the State.

The bill before us would change that approach by having HUD recapture the funds at the national level and then add the recaptured amounts to funds distributed by formula nationwide in the subsequent fiscal year. The administration sees this approach as one more way to reduce HUD's role in community development decisionmaking.

Mr. President, my amendment moves in the direction that the administration favors, but avoids a significant loss of funding that would be suffered by several States under the committee's reported bill.

This principally has an effect in about six States, Michigan, of course, being one, and California, Illinois, Texas, Wisconsin, and Connecticut being the others.

The reported bill would distribute funds from those States across the entire 50 States. The total amount of money involved is not great, so no community would gain noticeably under the administration's new approach. The amounts involved are $16 million, or only 0.4 percent of the total block grant program. However, for the States that are adversely affected, there are significant losses.

I have talked with the chairman about this matter and the ranking minority member. It would be my hope that the committee would accept this amendment.

Mr. LUGAR. Mr. President, I would like to support this amendment and will do so and recommend that the Senate approve the Riegle amendment. I believe it to be a constructive change.

Essentially, the current law provides for reallocation in the metropolitan areas where funds are lost. This has proven to be complex on some occasions.

Senator RIEGLE's amendment provides for recapture within a State. There was, of course, an intent, as the Secretary of HUD presented his ideas, that this money might be reallocated on a national basis as opposed to being recaptured in a State. Clearly, that course is arguably better. But, at the same time, it would appear to us, at least, that there is commonsense in the State recapture provision.

The sums of moneys are not large. As Senator RIEGLE has pointed out, apparently $14 million is involved out of $3.6 billion. So that, in our judgment, the question is a close call, but we commend the Senator for a constructive amendment and support it.

Mr. RIEGLE. I thank the Senator very much for his support and comment.

Mr. President, the approach I propose would be consistent with the policy adopted last year for section 8 housing funds and with the policy the committee is proposing for small cities this year.

Mr. PROXMIRE. Mr. President, I am happy to support this amendment. It is a good amendment. It keeps funds within the State where they were originally allocated and thus reduces the pressure on other communities within the areas which would be burdened if they were not kept there. Also, it is consistent with what we have done for housing assistance funds. It is not a new procedure. It is consistent with a policy we have already established.

I commend the distinguished Senator from Michigan on the amendment. I ask unanimous consent that I may be listed as a cosponsor.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. RIEGLE. Mr. President, I am delighted to have the support of the Senator.

If there is no further comment, I again thank both the chairman and the ranking minority member for their support and ask that we vote now on the amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment of the Senator from Michigan (Mr. RIEGLE).

The amendment (UP No. 133) was agreed to.

Mr. PROXMIRE. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. RIEGLE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 134

Mr. D'AMATO. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

The legislative clerk read as follows:

The Senator from New York (Mr. D'AMATO) proposes an unprinted amendment numbered 134.

Mr. D'AMATO. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

Page 82, between lines 9 and 10, add the following:

Section 242(d)(5) of the National Housing Act is amended by adding the following paragraph at the end thereof: ", provided however, the foregoing shall not limit the ability of the Secretary to approve a mortgage increase for any changes by the Secretary on any mortgage eligible for insurance under this subpart for which an application for increase had been made within 2 years of enactment.

Mr. D'AMATO. Mr. President, I am offering a technical amendment to the Housing and Community Development

Amendments of 1981. My amendment is intended to clarify the meaning of the term "modification of an existing mortgage." I am concerned about hospitals that are currently being renovated and refurbished through the combined use of HUD mortgage insurance, GNMA guaranteed obligations, and tax-exempt bonds.

In the 1979 amendments to the housing bill Congress grandfathered approximately 41 hospitals to allow them to complete any construction for which an application for insurance had been submitted by June 7, 1979. This amendment also prohibited any modifications of existing mortgages after that date. The use of the term modification has caused some bond counsel to question whether any changes in the mortgage structure is allowed even for those hospitals that qualified under the grandfathering provision.

Most of the hospitals that are affected by this amendment are in urban areas serving moderate-income persons. These hospitals need either more financing or have changed their renovation needs since the original applications were filed. I am sure, Mr. President, we all understand how under today's financial situation it may be necessary to require additional financing to complete such construction projects.

My amendment also requires that both the hospitals and HUD take action in a timely fashion. I believe, Mr. President, that the thought behind the original amendment was to limit the number of such applications. I have no desire and my amendment does not open the door to new applications or extensions that will go on for many years. I have included in this amendment a time limitation of 2 years after the date of enactment of this bill.

Mr. LUGAR addressed the Chair.

The PRESIDING OFFICER. The Senator from Indiana.

Mr. LUGAR. Mr. President, I commend the Senator from New York on a constructive amendment in which he has tried to tidy up some of the affairs of the past with regard to hospitals that are very well taken care of, I believe, by his thoughtful research. I support the amendment and commend it to the Senate.

Mr. PROXMIRE. Mr. President, I am happy to support the amendment. As the Senator from New York points out, the amendment would not expand the number of hospitals covered by present law. It would not mean any increase in the present mortgages for covered hospitals, only that adjustments could be made in mortgages up to the limits now in effect.

The hospitals affected are those serving predominantly persons of moderate incomes and thus the amendment is especially worthwhile. I am happy to support it.

Mr. D'AMATO. Mr. President, I thank my distinguished colleagues, the Senator from Wisconsin and the Senator from Indiana. I move the adoption of the amendment.

The PRESIDING OFFICER. Is there further debate on the amendment? If not, the question is on agreeing to the amendment of the Senator from New York (Mr. D'AMATO).

The amendment (UP No. 134) was agreed to.

Mr. D'AMATO. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. PROXMIRE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

UP AMENDMENT NO. 135

(Purpose: To authorize loans at interest rates in excess of certain State usury ceilings)

Mr. BUMPERS. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The clerk will report the amendment.

The legislative clerk read as follows:

The Senator from Arkansas (Mr. BUMPERS), for himself and Mr. PRYOR, proposes an unprinted amendment numbered 135.

Mr. BUMPERS. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 82, between lines 9 and 10, insert the following:

USURY PROVISION

SEC. 319. Title V of the Depository Institutions Deregulation and Monetary Control Act of 1980 is amended by adding at the end thereof the following:

"Part D—General Usury Override

"OTHER LOANS

"SEC. 531. (a) If the applicable rate prescribed in this section exceeds the rate a person would be permitted to charge in the absence of this section, such person may in the case of any loan, notwithstanding any State constitution or statute which is hereby preempted for the purposes of this section, take, receive, reserve, and charge on any such loan, interest at a rate of not more than 1 per centum in excess of the discount rate, including any surcharge thereof, on ninety-day commercial paper in effect at the Federal Reserve bank in the Federal Reserve district where the person is located.

"(b) If the rate prescribed in subsection (a) exceeds the rate such person would be permitted to charge in the absence of this section, and such State imposed rate is thereby preempted by the rate described in subsection (a), the taking, receiving, reserving, or charging a greater rate than is allowed by subsection (a), when knowingly done, shall be deemed a forfeiture of the entire interest which the loan carries with it, or which has been agreed to be paid thereon. If such greater rate of interest has been paid, the person who paid it may recover, in a civil action commenced in a court of appropriate jurisdiction not later than two years after the date of such payment, an amount equal to twice the amount of interest paid from the person taking, receiving, reserving, or charging such interest.

"(c) For the purpose of this part—

"(1) the term 'loan' includes all secured and unsecured loans, notes and bonds, credit sales, forbearances, advances, renewals or other extensions of credit made by or to any person or organization;

"(2) the term 'interest' includes any compensation, however denominated, for a loan;

"(3) the term 'organization' means a corporation, government or governmental subdivision or agency, trust, estate, partnership, cooperative, association, or other entity; and

"(4) the term 'person' means a natural person or organization.

"EFFECTIVE DATE OF PART D

"SEC. 532. (a) The provisions of this part shall apply only with respect to loans made in any State during the period beginning on July 1, 1981, and ending on the earlier of—

"(1) April 1, 1983, or

"(2) the date, on or after July 1, 1981, on which such State adopts a law or certifies that the voters of such State have voted in favor of any provision, constitutional or otherwise, which states explicitly and by its terms that such State does not want the provisions of this part to apply with respect to loans made in such State,

except that such provisions shall apply to any loan made on or after such later date pursuant to a commitment to make such loan which was entered into on or after July 1, 1981, and prior to such later date.

"(b) A loan shall be deemed to be made on or after July 1, 1981, if such loan—

"(1) is funded or made in whole or in part after July 1, 1981, regardless of whether pursuant to a commitment or other agreement therefor made prior to July 1, 1981;

"(2) was made prior to July 1, 1981, and bears or provides for interest on or after July 1, 1981, on the outstanding amount thereof at a variable or fluctuating rate; or

"(3) is a renewal, extension, or other modification made on or after July 1, 1981, of any loan, if such renewal, extension, or other modification is made with a written consent of any person obligated to repay such loan.

"(c) This part does not apply to any loan which is—

"(1) made in a State to which the provisions of parts A, B, and C of this title do not apply on the date of enactment of this part; or

"(2) secured by a residential manufactured home unless the loan meets the requirements of section 501(c).".

Mr. BUMPERS. Mr. President, I want to refresh the memories of my colleagues about the action taken by Congress last year to alleviate the plight of a lot of people, especially in my home State of Arkansas, who are in the financial business, because they were limited by a constitutional usury rate at a time when interest rates were going out the roof across the country. We passed three usury override provisions in the omnibus banking bill:

First, we provided that on business and agricultural loans, financial institutions could charge 5-percent above the Federal discount rate plus the Federal surcharge on the Federal discount rate. That translates into today's banking business this way, Mr. President: The Federal discount rate is 14 percent. Five percent above that, which was permitted under the bill of last year, would get the banker up to 19 percent, and the Federal surcharge right now is 4 percent. That is set by the Board of Governors of the Federal Reserve Board. Conceivably, bankers could charge as much as 23-percent interest under that bill. But that was only for business and agricultural loans. Consumer loans were not covered under it.

Second, we provided that any federally related institution, such as a federally chartered bank, a federally chartered credit union, any State bank insured by

the FDIC, and any State savings and loan insured by the FSLIC could charge 1 percent above the Federal discount rate on any loan. Since the Federal discount rate today is 14 percent that would mean they could charge 15 percent even on consumer loans.

But we still left some loopholes that are really wreaking havoc on the retailers of my State—and there are other States similarly situated—especially in the automobile industry. Ford Motor Credit, GMAC, all of those institutions that are not federally related, in my State, for example, are limited to a 10-percent rate on consumer loans. That means that the dealer cannot sell a car unless a bank is willing to finance it.

If an automobile is being sold for personal use the automobile dealer or the automobile finance company may not charge those higher interest rates. The most GMAC will charge the customer is 10 percent. So, in short, the automobile financing companies are pulling out. GMAC is pulling out. Ford Motor is pulling out. Chrysler is pulling out.

The automobile dealers in my State are in a terribly precarious situation. Even if they could find a banker to loan somebody money to buy an automobile, the maximum rate the bank could charge today is 15 percent. Since bankers are paying between 15 and 16 percent for their money, they are not clamoring to make those loans.

Mr. President, I ask unanimous consent that an article on the front page of the Wall Street Journal on May 22, 1981, setting out the particular situation in Arkansas, be printed in the RECORD immediately following my comments.

The PRESIDING OFFICER. Without objection, it is so ordered.

(See exhibit 1.)

Mr. BUMPERS. Mr. President, in April of last year the National Automobile Dealers Association did a random survey across the country and found that about 30 percent of their sales contracts for the purchase of an automobile were being lost because of the inability of the consumers to obtain financing. Think about that, 30 percent of the automobile dealer sales in the country being lost for lack of financing. By May the figure had jumped to an astounding 50 percent.

In a lot of cases, the inability of lending institutions to charge the going rate just simply caused the customer to withdraw. The dramatic reduction in consumer credit which consumers experienced during a recent period of high interest rates was not, of course, solely due to State usury limits, but there is not any doubt they have been big contributors.

Mr. President, I just talked to the chairman of the Banking Committee a moment ago. I told him that this is a critical situation for my State. I do not like the idea of coming to the Senate or to the Congress and asking them to bail out the State of Arkansas from a situation like this. I happen to be a borrower, not a lender. I do not like high interest rates any better than anybody else does. But I can tell you that the retailing industry in my State, especially the automobile industry, is in critical condition, and we have to have some relief. The only place they can get it right now, and the only place they can get it prior to November 1982, when our next election will be held to vote on this issue, is right here.

So I am pleading with my cohorts to lend an ear, to give us special consideration. The automobile industry in this Nation is in a critical condition. When you compound that with the fact that 50 percent of the sales nationwide are being lost for lack of credit, we are hurting ourselves.

Incidentally, I have a commitment from the chairman of the Banking Committee to hold hearings on this matter. I know the committee is considering a much broader bill dealing with this usury situation. I am reluctant to even burden them with this specialized kind of legislation. But the reason I bring it up now is to establish the dialog, to put everybody on notice that we are in a hopeless situation. We have to have relief and we have to have it soon.

The president of the Arkansas Dealers Association told me that if it takes 6 months to get this amendment through, 50 percent of the automobile dealers in Arkansas will be out of business. That is how serious it is. That is not hyperbole.

Mr. President, in sum, the State of Arkansas faces an economic emergency because of the usury limit in our State constitution. I ask unanimous consent that the article be reprinted at the conclusion of my remarks.

I have spoken in the Senate many times about the emergency financial situation created by the usury limit in the Arkansas constitution.

The State constitution mandates an interest ceiling of 10 percent on consumer and business loans, while small businessmen are required to finance their inventory with national suppliers at rates in excess of 20 percent. The merchant loses money if he sells the merchandise on credit and is limited to a 10-percent interest rate.

The usury override legislation that was passed by Congress last year provided temporary relief to some segments of the Arkansas economy, but another emergency relief measure needs to be passed to prevent many small businessmen from being driven out of business between now and next year's general election when the voters of Arkansas will once again be given an opportunity to change the 10-percent usury limitation contained in the Arkansas constitution.

An inequitable situation was created by the usury override legislation passed by Congress last year.

Under current law, any person, not just financial institutions, can make a business or agricultural loan and charge an interest rate up to 5 percent over the Federal discount rate, regardless of the State usury limit. But only federally-related financial institutions are allowed to make consumer loans that exceed State usury ceilings.

The net result is that merchants must borrow money at 21 percent or higher for loans on their inventory, and loan money to their customers at 10 percent. It does not take long under this financial arrangement to bankrupt the merchant.

Mr. President, the amendment Senator PRYOR and I are proposing today will provide temporary relief by allowing any person to charge a rate of interest of 1 percent in excess of the discount rate on all types of loans. The usury preemption in the bill will expire on April 1, 1983, or sooner if the State passes a law or constitutional provision overriding the Federal legislation.

There is no question that Arkansas' economy has suffered as a result of the constitutional usury limit.

Since 1974, when it all really started—the prime rate reached 12 percent in July 1974—Arkansas has ceased advancing on the national per capita income. From 1958 to 1974, Arkansas went from 62.3 percent to 78.7 percent of the national per capita income. Arkansas' growth was a 7.84 percent compounded annual rate, or 1.57 percent a year faster than the United States 6.27 percent.

Since 1974, however, Arkansas per capita income has increased at a 9.68 percent rate, which was .23 percent a year slower than the U.S. rate of 9.91 percent. We do not have comparable data for 1980, but the economic outlook just published by the University of Arkansas has comparative figures for personal income that indicates Arkansas will drop again when the figures come out.

Real personal income fell in 1980, both for Arkansas and the United States, with Arkansas' decrease almost twice the U.S. percentage (—4.959 percent versus —2.608 percent). This was partially due to the poor agricultural year, aided by the very weak year for construction. The 1981 projection is much better because it assumes a very good year for agriculture.

In earlier recessions, when the inflation was lower and interest rates lower and less volatile, Arkansas suffered less than the Nation. That is no longer the case. Arkansas is simply not competitive at these levels of inflation and interest rates, and it seems that it will be some time until the Nation's economy can be brought back to more reasonable levels—if indeed, it ever gets to the point that 10 percent is a broadly acceptable rate.

Recent unemployment data indicates that Arkansas suffered more from the poor economy in 1980 than did the Nation as a whole, and that the problem is continuing.

Overall, almost 6,000 more jobs would have existed in Arkansas at the end of 1980 if the State had performed like the Nation. Wholesale and retail trade employment would have been 3,600 more, and transportation and public utilities would have been up 2,100 jobs. If these jobs existed, Arkansas' February 1981 unemployment rate would have been 8.7 percent, instead of 9.3 percent.

State usury limits were established for ordinary times. However, when extraordinary circumstances result in a rapid escalation of interest rates and the prime rate quickly surpasses most State usury limits, the limitations no longer serve the purpose for which they were designed.

No one can deny that these are extraordinary times. During the decade of the sixties, the prime rate was changed only 15 times. During the year 1980 alone, the prime rate was changed 60 times. The prime interest rate hit 20 percent last April. Four months later, it was at 11 percent, and then in December was at 21.5 percent.

Usury limits compound the problems of small businessmen who are already hurt by the increased costs of doing business. Inasmuch as small businessmen generally have to pay 1 to 2 percentage points above prime to finance their inventory, they cannot obtain credit to continue to finance their ordinary business obligations, since lending institutions will naturally refuse to extend credit at usury law limits which are well below the going rate. In addition, sales of higher cost items, such as automobiles, drop dramatically because those consumers who desire credit and are willing to pay higher rates to finance the purchase of these items simply cannot get credit.

The Nation's automobile industry has been, and continues to be, in desperate straits. Production and sales are down dramatically and unemployment within the industry and within allied industries is extremely high. As far as the small business dealer is concerned, the attrition rate is staggering. Over 1,600 dealers have closed their doors since January 1, 1980, and over 100,000 dealer employees have lost their jobs.

The current problems facing the industry are, of course, multifaceted and no single action by the Government or industry will provide an immediate solution. However, State usury laws have played a significant role in the problems that have been encountered by many automobile dealers.

Automobile dealers are not the only people affected adversely by State usury limitations, but they exemplify the reason for the amendment I am introducing today.

As I said earlier, in April of last year, the National Automobile Dealers Association performed a random survey of dealers from across the country and found that approximately 30 percent of their sales contracts for the purchase of an automobile were being lost because of an inability of the consumers to obtain financing. By May, this figure had jumped to an astounding 50 percent. In many cases, the inability of lending institutions to charge the going rate resulted in their withdrawal from the automobile financing business.

The dramatic reduction in consumer credit which consumers experienced during the recent period of high interest rates was not, of course, solely the result of State usury limits, but there is no doubt that these limits contributed significantly to the problem in many areas of the country, especially Arkansas.

Unlike many other States, the Arkansas Legislature cannot legislate lenders out of this critical situation. With a 10-percent maximum interest rate limit embedded in Arkansas' constitution, there is no choice but emergency Federal legislation until our next general election in 1982.

Because of this unique interest rate restriction, many creditors, especially those that automobile dealers must depend on; namely, GMAC, Ford Motor Credit, and Chrysler Credit have established very strict credit policies. Beginning January 1, 1980, GMAC, for example, withdrew collision, conversion and confiscation coverage 93C, which exposes dealers to all losses resulting from repossessed vehicles. Shortly thereafter, Ford also limited their 3C coverage and recently Chrysler has withdrawn it. These moves are unique to Arkansas and were only the beginning of what has become a critical situation for Arkansas automobile dealers.

This critical situation was compounded when GMAC announced that it will not finance new non-GM cars or trucks for Arkansas dealers after March 31, 1981. In addition, the only used cars that will be eligible for GMAC financing will be those traded in on the purchase of a new GM car or truck.

Unless the Arkansas automobile dealers obtain relief immediately, most will not be able to stay in business another year without a dramatic drop in interest rates which is not imminent.

The problem created by usury ceilings is not unique to Arkansas, but the attention of the Senate has been directed to our State more often than others. I do not want to ask for emergency relief again to solve this problem that ultimately will have to be solved at the State level with the passage of a constitutional amendment. I recognize the local nature of this problem, but there is no other source of relief for the people of my State except in Congress.

I urge favorable consideration of this amendment.

EXHIBIT 1

[From the Wall Street Journal, May 22, 1981]

ARKANSAS RETAILERS SAY USURY LAW THREATENS WHOLESALE CLOSEDOWNS

(By Brenton R. Schlender)

LITTLE ROCK, ARK.—When C. Bernie Allen first got into the record and home-entertainment business here 17 years ago, he never dreamed that his fate as a businessman would be determined by Arkansas voters.

But on the day following the election last November, he watched the choir of demonstrator television sets in one of his four suburban stores flash voting returns that confirmed his fears with chilling redundancy. Arkansas voters, fed up with inflation, higher taxes and steep mortgage interest rates, had chosen to retain the state's century-old 10 percent interest rate ceiling on consumer loans. Mr. Allen, who had been paying some out-of-state lenders more than 20 percent in interest to finance his stores' operations for several months, knew that he faced more red ink and possibly his day in bankruptcy court.

Sure enough, in early March his company, Moses Melody Shops Inc., filed for reorganization in federal bankruptcy court here, despite record Christmas sales and the layoff of half his 72 employees. Now, Mr. Allen adds, the company is being liquidated.

"The load of carrying the difference between what we had to pay for money and what we could charge our customers for credit just got too heavy," the 49-year-old former minor-league third baseman explains. "The atmosphere for retail business in this state is like a morgue now."

VARIED COUNTERMEASURES

Hundreds of other furniture, appliance, soft-goods and automobile retailers in Arkansas also are being cramped by the lowest usury ceiling—and the stiffest penalties for violations—in the nation. To preserve profits, they have had to raise prices, tighten customer credit requirements, shorten repayment periods, lay off employees and discontinue free delivery and other services.

Federal legislation has taken Arkansas banks and savings and loan associations off the hook somewhat by allowing them to charge up to 15 percent on consumer loans and 23 percent on business and farm loans. But even the 15 percent limit is so low that many banks have nearly halted consumer lending; they prefer to divert funds to higher-yielding money-market certificates and other investments outside Arkansas.

"There's no other state quite like it," says Robert Devine, national coordinator for credit legislation for J. C. Penney Co. Not only is the Arkansas ceiling the nation's lowest, but Arkansas is the only state where interest rates are governed by the state constitution and not the legislature, he says. "In other words, it's just about impossible for retailers to operate there," he adds.

DEVELOPMENT HURT

Moreover, experts say the strict ceiling and stiff penalties have compounded an historically stagnant state economy and thereby have damped economic development in Arkansas. Others blame the usury ceiling at least in part for a recent spate of business bankruptcies and higher retail prices statewide. "It's hard to quantify exactly what the usury ceiling has done to harm Arkansas, but you know it has," says Jim Guy Tucker, a former congressman and currently an attorney for the Arkansas Bankers Association. It's just that a lot of the bodies haven't floated to the surface yet."

As the election last fall demonstrated, however, lots of people in Arkansas like the usury ceiling. That was the third time since 1968 that voters rejected proposed constitutional amendments, sponsored by a coalition of bankers, retailers and auto dealers, that would have allowed the legislature to set the interest rate ceiling and reduce usury penalties.

The staunchest opponents of the proposals have been organized labor and consumer groups. They cite many reasons. They don't want to give legislators, many of whom have ties with banks, the authority to set the ceiling. And they don't want to dilute the penalty for making a usurious loan—complete forgiveness of all principal and interest.

THE PRINCIPAL ARGUMENT

Mainly, however, "We don't think it's right for retailers to make money on money," says J. Bill Becker, Arkansas AFL-CIO president. He also sees "nothing wrong with tight money". He contends that federal economic-growth barometers show that Arkansas, whose population grew 18.8% in the 1970s, "has done pretty darn good" even with the ceiling.

But signs of the ceiling's effects are all over Arkansas' retailing industry—from the small-town mom-and-pop furniture stores all the way up to big car dealers and department stores. Mr. Allen, for example, was able to carry $2 million in "customer paper" only by borrowing at high interest rates (up to 23% at some out-of-state finance companies), or by paying reluctant appliance finance companies such as Westinghouse Credit Corp. and General Electric Credit Corp. to

back his credit customers. The most he could charge his customers, however, was 10% simple annual interest, with the debt to be paid in no more than 12 monthly installments.

"Most of those accounts were for about $50, and the customer would send you $5 a month," he moans. "That's almost as much as it cost us to mail out the monthly statements."

All those debt problems just to keep merchandise moving ultimately combined with the recession to run Mr. Allen out of business. Like Mr. Allen, his banker, William Bowen, chairman of Commercial National Bank here, blames Mr. Allen's troubles on the usury ceiling. "Bernie Allen played a good game," Mr. Bowen says, "but he got caught in the trap."

Also being hurt is Dillard's Department Stores, Inc., which is headquartered in Little Rock and operates seven of its 40 large stores in Arkansas. The company estimates that it lost $1.2 million in 1980 alone through borrowing from banks to cover its Arkansas credit customers. (Dillard's as a whole, however, earned $8.5 million, up from 8.3 million in 1979.) According to E. Ray Kemp, Dillard's vice chairman, 52% of the company's $35 million in sales in Arkansas are on credit, and "for every $1 we got back in interest and service charges, we spent $1.80." He adds, "Arkansas never was a normal place to do business, but now it's getting even worse."

Part of the problem, Mr. Kemp asserts, is that Arkansans are "taking advantage of any cheap credit they can get." He notes that Dillard's stores outside Arkansas average only 45% in charge sales, and those customers generally pay about 18% annual interest.

Over the years, Arkansas retailers have a few ways to offset the costs of extending credit. Dillard's, for example, has cut its pay period for credit purchases to six months from the 18 months allowed two years ago. Other retailers have quit extending their own credit altogether or encourage the use of bank credit cards, which can charge 15% in annual interest because of the federal bank laws.

Many retailers say they are operating with fewer clerks than ever before and have put off remodeling plans or moves to larger quarters. Others have simply trimmed inventories and discontinued free services.

HIGHER PRICES

However, the easiest way to recoup the built-in credit losses is to raise merchandise prices, and studies show that, except in border areas, Arkansas retailers have done just that. According to Gene Lynch, professor of finance at the University of Arkansas in Fayetteville, prices for furniture and appliances in Little Rock run as much as 11% higher than prices for identical merchandise in surrounding states—a difference he blames solely on the usury ceiling. That finding indicates that "cash customers are subsidizing every credit purchase in the state" by paying higher prices themselves, he contends. "There's no free lunch for anybody."

But in border towns such as Texarkana, which lies smack on the Texas-Arkansas line, Arkansas retailers can't raise prices and still compete with rivals across town. Consequently, most furniture and appliance dealers and all 15 franchised new-car dealers have set up shop on the Texas side of State Line Avenue, which bisects the central business district. There, they can charge up to 24% for consumer credit.

Melvin Kusin, owner of Kusin's Texas Furniture Store in Texarkana, knows what it's like to do business in both states because he owns another furniture store in nearby Hope, Ark. Mr. Kusin says the Texas store has "subsidized" the Hope store since consumer lending was "flat cut off" by Arkansas banks last summer. "Without the Texas store, we'd have to add 8% to 10% to our prices across the board just to cover interest expenses."

The few furniture dealers staying in Arkansas have been fixtures there for nearly half a century. "Sure we'd be better off in Texas, but we own our own property here," says R. J. McNatt, whose Moore Furniture Store has been in business "within spittin' distance of Texas" for more than 40 years. "Sometimes, when I get to thinking about it, I get a little mad that they don't have my problems down the street," adds the unperturbable Mr. McNatt. "But it's too late to move now."

The new-car dealers in Texarkana are lucky that, by the early 1970s, they all had moved to the Texas side. "Arkansas has practically been cut out of the map" as far as the auto makers' finance companies are concerned, says Dennis Jungmeyer, executive director of the Arkansas Automobile Dealers Association.

In the past year, General Motors Acceptance Corp., Ford Motor Credit Corp. and Chrysler Credit Corp.—all bound to the 10% interest ceiling for consumer car loans—have imposed on Arkansas dealers restrictions unheard of in the other 49 states. For example, GMAC and Ford Motor Credit don't extend wholesale or retail credit on new non-GM and non-Ford products, and GMAC finances the sale of a used car only if it is traded in on a new GM model. Unlike elsewhere, all dealers in Arkansas have to pay for insurance on cars in transit to their showrooms, and they have to pick up the full tab when a vehicle is repossessed. They also must pay market rates—as much as 23% lately—to finance their own inventories.

TOLL OF AUTO DEALERS

The Arkansas dealers, accustomed for years to tight financing, have still found ways to stay in business. Last year, only nine dealerships folded or changed hands out of 390, according to Mr. Jungmeyer. But so far this year, 17 dealers have already gone out of business or changed hands, even though sales have improved somewhat.

For a while, some dealers managed to turn the disadvantages of 10% credit into a marketing tool: They advertised their cheap credit to customers in surrounding states. But now some finance companies refuse to grant 10% credit to anyone but an Arkansas resident.

Normally, the dealers would rely on local banks to lend the money to customers turned down by finance companies. But even with the federal law allowing banks to charge 15%, they aren't making many auto loans. Several Little Rock banks say they grant consumer loans only to their best customers and only in amounts exceeding $3,000.

"With consumer loans, you have to be sparing and lend only to stay in touch with your good customers," says Mr. Bowen of Commercial National Bank. And Joseph Ford, a vice president at First National Bank in Little Rock, adds, "We just plain can't afford to loan out money" even at 15%. Since last June, Mr. Ford has seen First National's outstanding consumer loans drop to less than $13 million from $17 million. "This lack of credit has got to hurt the young people and little people of Arkansas as well as the businesses," he observes.

In the wake of failures at the ballot boxes, bankers, retailers and car dealers are beginning to hope for help from higher, and previously unmentionable, places. "Nobody likes the idea of the federal government meddling with our business," says David Kilborn, general manager of Cliff Peck Chevrolet in Little Rock. "But that's about our last hope now." Several Arkansas legislators in Washington have introduced a bill that would provide federal interest-rate relief to retailers, and a New York congressman has proposed creation of a national usury ceiling that would override state-imposed limits.

If retailers and auto dealers in Arkansas can hang on until November 1982, however, federal help may not be needed. In March, the Arkansas legislature voted to put on the 1982 ballot yet another constitutional amendment that would raise the consumer-loan ceiling to 17%—which still would be the nation's lowest—while retaining the current penalty for violations.

But even the amendment's proponents aren't very optimistic that it will fare any better than the last three proposals. "It's pretty hard to convince a voter that 17% or 18% interest will end up costing him no more than the 10% he's paying now," Mr. Kemp of Dillard's says.

Others aren't sure that the proposed amendment will offer enough relief. "My worst fear is that the new amendment will be as obsolete as the old law by the time we get around to vote on it," says Jackson Stephens, chairman of Stephens Inc., a Little Rock investment banking firm. "But by that time," he adds, "things might be so bad that the people will demand a cure."

At this point, Mr. President, I yield to my distinguished colleague (Mr. PRYOR).

The PRESIDING OFFICER. The Senator from Arkansas.

Mr. PRYOR. I appreciate the senior Senator from Arkansas yielding to me at this time. I would like to associate myself with the remarks he has so well stated on the floor.

Mr. President, last year during consideration of the Depository Institutions Deregulation and Monetary Control Act Senator BUMPERS and I were able to add a provision which removed certain usury restrictions while equalizing the treatment of State and national financial institutions: Since 1933 national banks had been permitted to charge up to 1 percent over the discount rate on any loan, notwithstanding any State usury law. Our provision allowed that same privilege to State-chartered banks, S. & L.'s and credit unions.

Now law, this authority and other usury preemptions have proved to be helpful to my State and, I am sure, the home States of many of my colleagues. Since the enactment of the legislation, however, we have come to realize that the coverage of the preemptions is too narrow. The legislation granted this added lending authority only to banks, savings and loans, mutual savings banks, credit unions and small business investment companies. Moreover, the thrust of the preemptive legislation last year was directed at business, agricultural and mortgage lending. Consumer loans were barely considered.

Excluded from the vital benefits of the legislation were automobile dealers, furniture and appliance dealers and other retailers as well as the consumers who needed credit to buy their goods.

To correct this omission Senator BUMPERS and I have introduced a bill which would allow any person—that is, any natural person or organization—to charge up to 1 percent over the Federal Reserve discount rate on any type of loan. This authority would expire on April 1, 1983, and States may override this Federal action at any time.

The need for this relief is clear. The

automobile dealers in my State are paying more than 20 percent for their floor plan but, under Arkansas' strict usury laws, can charge no more than 10 percent on car loans. During these times of high interest rates consumers cannot even turn to their local banks because the banks are making consumer loans only to a few favored depositors, preferring the higher rates of return available from out of State investments. Auto finance corporations like GMAC, Ford Motor Credit, and Chrysler Credit have either withdrawn from lending activities in Arkansas or imposed special restrictions which make lending unprofitable or impossible.

In 1981 the prime rate of interest fluctuated by 10 percentage points, and under these conditions a number of other States may at times find their usury ceilings well below market rates of interest. Last May a National Automobile Dealers Association survey showed that across the country half of all sales contracts for the purchase of cars was lost because of the inability of consumers to find financing.

In 1980, 1,600 auto dealers in the United States went out of business, with an estimated loss of 100,000 jobs. Others appear to be headed in the same direction. While usury laws alone cannot be held accountable for the dealers' distress, they are certainly an important factor. That is why the 20,000-member NADA supports relief legislation.

This relief would be applied to more than this one industry, however. Many small businesses have been operating at a disadvantage in some States—equipment dealers, furniture companies and appliance dealers are just a few examples. In addition, low interest ceilings are making it difficult for local units of government to borrow funds for needed municipal improvements.

Mr. President, approval of this legislation would be a boost in the arm for small business. Although no hearings have been held on this particular legislation, the Senate should have by this time a clear picutre of the harm that unrealistic usury laws do, and there is ample precedent for relief of this sort. I am pleased that the distinguished chairman of the Senate Banking Committee has agreed to hold early hearings on our bill and appreciate his courtesy on this matter.

I appreciate the courtesy of the Chair and the distinguished senior Senator from Arkansas.

The PRESIDING OFFICER. The Senator from Indiana is recognized.

Mr. LUGAR. Mr. President, I appreciate the statements made by both our distinguished colleagues from Arkansas. I will point out that there has been a commitment made by the chairman of the committee to hold a hearing on the point of concern of Senator BUMPERS and Senator PRYOR. Clearly, it is a concern that goes well beyond the State of Arkansas. I would say that automobile dealers in Indiana, and, as a matter of fact, most people who are in retail businesses throughout this Nation and in many fields of commerce, are equally concerned.

I can assure the Senator from Arkansas that the members of the Banking Committee, and I hope many more Senators, would be eager for a very careful examination of the issue.

Mr. BUMPERS. If the Senator will yield on that point, a lot of those automobiles we are not selling are made in Indiana.

Mr. LUGAR. That is so true. So we share that bond. I simply reiterate the point made by our distinguished chairman of the full committee (Mr. GARN) that there will be a hearing that will be, we hope, satisfactory to the request made by the Senator today.

Mr. PROXMIRE. Mr. President, may I say to my friend, the Senator from Arkansas, that I am inclined to favor a broad usury preemption, but I believe we should have a hearing in the Banking Committee and mark up the bill in committee.

I say that because the amendment of the Senator from Arkansas goes far beyond the preemption we passed last year. Last year, after full hearings, we preempted usuary limits on home mortgage loans and for federally related financial institutions.

This amendment would provide a preemption across the board, but limit the preemption to 1 percent in excess of the discount rate. After hearings, we may find that is too limited, or too much.

As I say, I have all the sympathy in the world for what the Senator is trying to do. We make automobiles in Wisconsin, too. American Motors is the principal plant there, and we have a big Chevrolet plant. We should address usury in a more comprehensive way.

Mr. President, I think the Senator is absolutely right in arranging with the committee for a hearing on this issue.

The PRESIDING OFFICER. Will the Senator suspend for 1 minute?

Under the previous order, the hour of 3:30 having arrived, a vote is now in order on the amendment of the Senator from Wisconsin (Mr. PROXMIRE).

Mr. PROXMIRE. Mr. President, I ask unanimous consent that the Senator from Arkansas be allowed to proceed for 1 minute.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. BUMPERS. Mr. President, I appreciate that very much.

I thank both the distinguished floor managers for their understanding. I especially thank the chairman of the Banking Committee for assuring me that he will hold hearings on this very promptly.

As I say, I wanted to raise the issue to point out the critical financial situation in my State.

With that, Mr. President, I withdraw the amendment.

The PRESIDING OFFICER. The Senator has that right.

The amendment (UP No. 135) was withdrawn.

UP AMENDMENT NO. 129

The PRESIDING OFFICER. Under the previous order, the vote now occurs on the amendment of the Senator from Wisconsin. The yeas and nays have been ordered. The clerk will call the roll.

The legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Kansas (Mrs. KASSEBAUM), the Senator from Maryland (Mr. MATHIAS), the Senator from Georgia (Mr. MATTINGLY), the Senator from Texas (Mr. TOWER), and the Senator from Wyoming (Mr. WALLOP) are necessarily absent.

I further announce that, if present and voting, the Senator from Texas (Mr. TOWER) and the Senator from Wyoming (Mr. WALLOP) would each vote "nay."

Mr. CRANSTON. I announce that the Senator from Virginia (Mr. HARRY F. BYRD, JR.), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Kentucky (Mr. HUDDLESTON), and the Senator from Ohio (Mr. METZENBAUM) are necessarily absent.

I also announce that the Senator from Georgia (Mr. NUNN) is absent attending the funeral of former Congressman Carl Vinson.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who wish to vote?

The result was announced—yeas 37, nays 53, as follows:

[Rollcall Vote No. 137 Leg.]

YEAS—37

Baucus	Eagleton	Moynihan
Bentsen	Ford	Pell
Biden	Glenn	Proxmire
Bradley	Hart	Pryor

NOT VOTING—10

Byrd, Harry F., Jr.	Kassebaum	Nunn
	Mathias	Tower
Hollings	Mattingly	Wallop
Huddleston	Metzenbaum	

So the amendment of the Senator from Wisconsin (UP No. 129) was rejected.

Mr. LUGAR. Mr. President, I move to reconsider the vote by which the amendment was rejected.

Mr. CHAFEE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

The PRESIDING OFFICER. Are there further amendments to be proposed?

Mr. MOYNIHAN. Mr. President, may we have order?

The PRESIDING OFFICER. The Senate will please be in order.

The Senator from New York is recognized.

Mr. MOYNIHAN. I thank the Chair.

Mr. President, I wonder if I could address the distinguished managers of this legislation for a moment with respect to the provision in section 205(a) on page 57 of the legislation which amends the Housing Act of 1937, to bring about one of the most extraordinary interpositions of Federal will and fiat to the affairs of local government that we have seen proposed in this Chamber in many years and which I daresay we have never——

Mr. STENNIS. Mr. President, the Senate is not in order. I am standing within 12 feet of the Senator and I cannot hear him.

The PRESIDING OFFICER. The observation of the Senator from Mississippi is well taken.

The Senator from New York will please suspend until we can have order in the Senate.

Will Senators wishing to converse please retire to the cloakroom?

The Senator from New York.

Mr. MOYNIHAN. I thank the Chair for its courtesy and I thank the distinguished Senator from Mississippi for calling the matter to the Senate's attention.

Mr. President, if I may repeat, we have in this legislation a proposal to interpose the judgment of the Federal Government in the affairs of local communities more stringent than any I have heard proposed in this Chamber, more than I believe has been proposed in the memory of Members of this body and no equivalent of which has ever been adopted.

Specifically, it is provided in section 205 to amend the Housing Act of 1937—that is about how far we go back in these matters—to provide that the benefits of section 8 housing may not be provided to any community which applies rent controls or rent stabilization to some or all newly constructed multifamily residential projects.

This is a wholly unexpected and in my judgment wholly unwarranted provision. It is just but one more of the matters which lead what was once a bipartisan and well supported program of the U.S. Senate now to have a bill before us which was reported out of the Committee on Banking, Housing, and Urban Affairs by a narrow margin of one vote. It is a pattern of polarization and partisanship which we had thought was behind us on certain measures such as social insurance, housing, and other matters of public welfare. It evidently is not and all the more is it to be deplored and to be opposed.

There is an elemental fact of the legislation that is now before us which is that it is a guillotine. The communities that have adopted rent control programs, stabilization programs—and they are all over; they can be found in all parts of the Nation—have done so by the normal democratic processes by which a city or town government makes such decisions. They extend over time. They involve legislation. They often and commonly involve referenda, and if they were to be repealed it would require time also.

This legislation does not even provide the minimum courtesy and the minimum acceptance of the democratic procedures of local government to provide a period of time in which to submit to the Federal dictation in such matters without being penalized, and without being deprived of their expectations under section 8 housing.

How strange and how inexplicable, coming in the aftermath of an election in which the new administration had proclaimed as almost its principal Federal purpose to get the Federal Government out of the affairs of local government. Here we find them coming into our homes through the keyhole of this measure to interfere with affairs of some 4 million people in the city of New York just as a beginning, with no hearings, with no consultations with the officials involved, much less the tenants involved. It imposes a national judgment on what is the most varied circumstances in our country, which is the nature of housing markets, the availability, the pressures on rents, the turnover in populations.

It is to me both inexplicable and wrong. It is one more aspect of this legislation which guarantees that it is going to have the least support of any housing bill that has been in the Chamber since the Housing Act of 1937 was in fact adopted. There will not have been in half a century a bill to receive such little support.

I recognize the fact of there being 53 votes in favor of any measure in this bill. We have just this moment seen 53 votes cast in opposition to an amendment by the Senator from Wisconsin, who has nurtured, developed, and cared for this legislation through almost a generation.

It is not the reputation of the Senator from Wisconsin to be a spendthrift. He is not noted for profligacy with Federal funds.

He is not generally thought to be a person given to inattention with respect to the impact of Federal programs on local governments.

It was with exactly a background of a carefully disciplined, coherent and sustained attention to the housing needs of this Nation that he just proposed a reasonable and necessary amendment, which was defeated by 53 votes, that number with which we are now familiar, and I am conscious that any effort to amend the bill with regard to this particular section would also fail, and I have no desire to see the conferees burdened with such a background when they meet with the House of Representatives, which will not accept this measure.

Yet I would like to ask the managers if they would not explain what I must say I find inexplicable as a measure. Suddently from nowhere a political viewpoint that asserts that the Federal Government must stop telling people what to do in their own hometowns is telling them what to do and then saying to you, "If you don't do it you will be denied that which otherwise would be yours," not merely as a matter of largesse of the Federal Government but as a matter of sharing public revenues raised equally in the communities to be affected as well as those that would be exempted.

I do not see how this is necessary; I do not even understand its genesis.

I wondered if I might ask the distinguished managers of the legislation what their view of the matter is and, in particular, what would be their view of a guillotine provision that does not even provide the communities that have such measures the opportunity to remedy their situations in order to avoid penalties.

I see my friend, the distinguished Senator from Indiana, the chairman, smiling at me. I hope it is not one of mild embarrassment, since that matter has come forward in the way it has, and I know he will ably represent that view, and I will be happy to hear him.

Mr. LUGAR. Mr. President, the Senator from New York has raised an important and certainly legitimate question, and I shall attempt to reply on behalf of the committee's deliberations as well as my own vote on the issue. The vote was 8 to 5, and I was one of the 8 to support it. We only included section 8 funds for new construction or for newly rehabilitated units in our action—and I think that is an important distinction—that which is new is the net input for which an application has been made. Moneys for new subsidized construction should not go into a community which has rent control.

The logic of this opposition is essentially that rent controls, in due course, limit the amount of building that goes on in a local community. There is evidence which appears to show the negative impacts of rent control on communities. In any case, those who are students of urban government have been exposed to books, magazine articles, and studies which have shown that rent controls have been debilitating with regard to the stock of housing in communities, whatever the social purpose of having such controls.

Section 8 is not a revenue-sharing proposition. It is not a distribution of funds per capita or by States. There is, in effect, no entitlement of a community or a State to section 8 funds. Applications are made by developers to the Federal Government for these funds. The funds are very limited, and clearly one of the arguments that we could have had today is that they are too limited. The needs are enormous. Section 8 has been a useful program, and the committee throughout, in a patient way, has tried to see how it could stretch Federal dollars so that they would bring about the greatest amount of decent housing for poor and moderate-income families.

Our judgment was that if we put money into communities which did not have rent control there was likely to be net gain of housing for the poor of that community whereas the net effect in rent control cities was likely to be less.

There are two additional arguments the Senator can raise which are important with regard to local government and federalism generally. I share the Senator's distress on these particular issues, namely, the effect on local governments.

If, in effect, this was a per capita distribution or a revenue-sharing matter——

Mr. MOYNIHAN. Mr. President, might we have order? The distinguished chairman is speaking to an important issue.

The PRESIDING OFFICER (Mr. DANFORTH). The Senator from New York is correct. The Senate is not in order. The Senate will be in order.

Mr. LUGAR. If, in effect, we were literally taking money away from a community which was entitled to it by formula, this would be even more of a serious problem. It is still a serious problem, and one that I am certain each of the Senators who voted for this amendment shares with the Senator.

I suppose it is balanced, at least in my judgment, by the problem that we have with assisted housing in general. In essence, we have been able to serve maybe one out of every 10 families or one in 12 families who are poor and ought to be served, and the question is how to stretch these dollars.

To avoid the problems of D'Amato-Armstrong amendment a community could remove rent controls. There will be a period of time in which this can be done. The section 8 provision we are talking about will not take effect immediately. It applies to fiscal 1982 and to fiscal 1983, in this 2-year authorization.

Cities will have time to take action. The Senator's prediction may be correct that the House of Representatives will not have a similar provision. The House committee voted 16 to 6 to defeat an identical amendment offered in their committee. Indeed we shall have an argument in conference about it.

I do not know where the conference will end up. But, there will be a period of time during which local governments' can attempt to find relief.

Mr. MOYNIHAN. Mr. President, I see the Senator from Wisconsin has risen.

Mr. PROXMIRE. Mr. President, I very much appreciate the remarks of my good friend from New York, and I always do. He is a marvelous Senator and a delightful person.

Let me say in the first place, Mr. President, that this is an amendment offered by the distinguished colleague of the Senator from New York, his distinguished junior colleague, and it is an amendment that I supported and voted for. It is an amendment—I stress the fact—that has been offered by the other Senator from New York because, of course, he has great experience in New York, too, and as the senior Senator from New York appreciates their problems, so does the other Senator.

It has been my judgment for a long, long time that whether it is price control, wage control, rent control, that they just do not work.

They do not work.

Now, you have a situation in New York City where I have found some of the most affluent people I know, very high incomes, who were all for rent control because they occupy beautiful apartments on Fifth Avenue or Park Avenue and other parts of that marvelous city. They have these apartments with a rent that is frozen and which gives them a very happy advantage.

Of course, the fundamental economic problem with rent control is it destroys any incentive to build rental units. You have to be an idiot these days, with inflation what it is, to build a rental unit with the expectation that you are going to be able to get a return on your income. Everybody knows, as I say, there are more tenants than landlords and the tenants have more political whammies than the landlords for that very reason and that has paralyzed the construction of rental units. It is one of the problems, along with the condominium problem and the tax problem, that has left us with a serious problem in the opportunity for people, particularly people with moderate incomes, to get rental units. So those are the economic reasons.

Now, the Senator points out a very interesting fact. This is, I think, the first significant housing legislation that has come to the floor in either body that is opposed to this kind of rent control. The Senator started out in his speech, as I recall, saying, "What real business does the Federal Government have in interfering in what should be a local determination?"

The answer, of course, is we are putting Federal money in there. When we put Federal money in there, it seems we have every right, in fact, we have an obligation, to see that the money is well spent.

As my good friend from Indiana pointed out, with rent control it means private rental units will not be constructed because the incentive is destroyed. It means we have to put funds in there to take the place of this deficiency and, for that reason, rent control is counterproductive.

I recognize the arguments on the other side, particularly the local argument, the local sovereignty argument. But, as I say, this is Federal money that we are concerned with now. I think we have every right, in fact a duty when we find a clearly counterproductive economic activity, to do our best to oppose it in the way we have.

People do not have to comply with this. All they have to do is say, "All right, we won't take your Federal money. We will continue our rent control." If New York City wants to do that, fine.

Mr. MOYNIHAN. Mr. President, I wonder if my good friend would hear me then just another moment. This is a subject which has been one of very considerable scholarly inquiry. I note that my friend from Indiana could only say that there appears to be evidence that rent control leads to abandonment and the decline of stocks.

I would have to say that is the strongest case you could make. John Gilderblum of the University of California has recently published a rather extensive study which concludes that communities with rather modest controls experience no reductions in building maintenance and none in building stocks. At Tufts, Prof. John Eckhart has, in effect, replicated the same study.

I would have to say to my friend from Wisconsin that he has used the words "rent control." But this legislation says rent control and rent stabilization. Now, I am not familiar enough with other parts of the country to know how common that is. But in the city of New York, it is the most common form.

Rent control, which in 1970 was involved with 1.2 million units—and the Senator is right, in the 1950's, Park Avenue was filled with duplex apartments in which mature couples were rattling around in a place where they once raised large families but it was cheaper to stay in their rent control buildings. Those are long since gone.

In 1970, there were 1.2 million units. By 1978, it was down to 400,000.

The main form of activity in the city of New York is rent stabilization and rent stabilization is voluntary in return for agreeing to stabilizing rents. Landlords agree to an 8-percent return on capital. It is an entirely voluntary choice the entrepreneur of the building makes. And most of them make it. It makes sense to them. It involves a subsidy by the city for housing. The city pays the subsidy and it judges that to be a useful thing.

The city subsidizes sidewalks. The city subsidizes street lamps and parks.

The builder has the free choice—and most take it, not all do, but most, depending a little bit on the sort of rental levels, most take this option.

Now, why are we going to impose on, let us say, the city of New York an activity which they engage in, which is entirely voluntary——

Mr. PROXMIRE. Mr. President, will the Senator yield on that point?

Mr. MOYNIHAN. I am happy to yield.

Mr. PROXMIRE. Mr. President, I think the Senator suggests what might develop into a reasonable compromise in conference. Because, as the Senator points out, and others pointed out, the chances are the House will not have this provision and we will have it. We will have to work out some compromise.

It may be that if we can find a way to have something like the volunteer system, which the Senator says that they have in New York City, I am not familiar enough with that to know, but, at any rate, what we need is some kind of provision that would enable people who build a rental unit to take care of their costs in an inflationary economy. We all know that the chances are overwhelming that for the next 10 years we are going to have to live with inflation, maybe 5 percent, maybe 10 percent, maybe 15 percent.

Under those circumstances, it is devastating for anybody who builds a building and expects to rent units not to be able to make some adjustments to the costs as they increase.

If we can work something out in conference, perhaps, which would make it possible for a person who wants to build a rental unit to have a real incentive, an expectation that he could have a reasonable return, I think that might be a very interesting and useful compromise.

I think that might be something we can give great attention to. But I think the Senate committee has made real progress. I hope the Senate will affirm that progress in taking a hard, cold look at what rent control has done in the past when it has not permitted some kind of adjustment of the kind the Senator describes in New York City.

Mr. MOYNIHAN. Mr. President, may I say that I am much reassured by the

statements of my friend from Wisconsin. I am not going to press the matter here, but if this matter is not dropped in conference, expect me to be on this floor as long as my breath lasts in opposition, because, I regret to say, the managers of this legislation have, in effect, admitted that they did not know the difference between rent control and rent stabilization.

Rent stabilization is a voluntary arrangement that the entrepreneur makes, calculating it out to maximize his return on capital. It is a judgment about how to maximize his return, freely made and freely entered into. It is not the business of the Senate to tell the city of New York that it cannot make a respectable arrangement, a voluntary arrangement, with builders that gives the builders the option of a fixed return at a lower rate of rent or to go into the market freely. Some do; some do not.

It is the kind of arrangement we want to leave to the people whose judgment is clearly best. How many times, from that side of the aisle, have we heard that the people of the grassroots know best and now we are passing legislation which is very clearly—I am sorry, Mr. President, I could not ever dream of speaking with disrespect, but the committee that passed this bill did not know what it was passing. It thought it was opposing rent control and it turns out there is a wholly different phenomenon called rent stabilization that in no way fits the criteria of rent control but is, nonetheless, penalized.

That is not good legislation. Once you go into conference, you drop the matter, and then have hearings and listen to the testimony of landlords. Ask 10 landlords from the city of New York, five of whom want the program and five of whom do not, and then see if any felt the worse and ask why they do or do not.

We do not know enough about this matter to adopt it now. I think that point having been made, and not desiring to invoke what will be an automatic partisan party majority, I will let the matter go.

Could I ask the distinguished manager a question? He knows my respect for him. He knows that I know what he has done in the city of Indianapolis. He was perhaps the greatest mayor Indianapolis ever had. Would I be wrong in thinking that the distinction between rent control and rent stabil'zation is just now being brought to the attention of the Senator?

Mr. LUGAR. The Senator is not correct in that assumption. This has been discussed during the markup. The distinction is a real one. I suppose the problem of finding the degree involved in stabilization is important, too. It may not be so voluntary as the Senator from New York implies. As the Senator from Wisconsin has suggested, it does offer some grounds for further discussion in conference and I submit that may be the appropriate forum for the next round of discussion.

Mr. MOYNIHAN. I know the reasonableness and openmindedness of the two managers of this legislation. I am prepared to entrust this matter to them and the views of the Members of the House. However, I do have to say that I think this was done hastily. In my view, the measure could not logically apply both to rent control, which is automatic and leaving no option, and rent stabilization, which is simply an arrangement which cities make with entrepreneurs.

With that, Mr. President, and thanking the two managers of this legislation, I yield the floor.

Mr. PROXMIRE. Mr. President, I ask for the yeas and nays——

Mr. MOYNIHAN. Would the Senator have the kindness to allow me to make one further statement?

Mr. PROXMIRE. Yes.

Mr. MOYNIHAN. It is my understanding that Assistant Secretary designate of HUD Steven May, who is the former mayor of Rochester, said that the administration was not in favor of this amendment. Am I correct in my understanding?

Mr. PROXMIRE. It is my understanding that this is correct.

Mr. MOYNIHAN. Is this another case of a rebellious Republican majority refusing to concede to the legitimate concerns of the administration for the welfare of the people?

Mr. DOLE. Yes.

[Laughter.]

Mr. MOYNIHAN. Yes, it is. I thank the Chair.

Mr. PROXMIRE. Let me say it was a bipartisan combination.

[Laughter.]

Mr. PROXMIRE. Mr. President, I ask for the yeas and nays.

The PRESIDING OFFICER. Is there a sufficient second? There is a sufficient second.

The yeas and nays were ordered.

Mr. PROXMIRE. I yield to the Senator from North Dakota.

Mr. BURDICK. Mr. President, I rise to question the amendment to title V, section 503, that would allow the Secretary of Agriculture to stop the Farmers Home homeownership programs at his discretion, irrespective of the appropriations or authorizations passed by this Congress.

Mr. President, in rural America high interest rates are a serious problem and the vast majority of my rural constituents support the cuts in Federal spending that will lead, hopefully, to lower inflation and lower interest cost for all borrowers. However, when the inflation problem is licked, few rural borrowers will be able to go to private lenders for a market rate loan because transactional cost, low volume, and a high demand for agricultural product loans has meant that few private lenders make housing loans. The farmers home office is essentially the only lender for rural housing. Hence, I am sure this committee joins me in supporting the continuing viability of the rural housing programs.

The present low-income housing program gives interest credits so that low-income homebuyers, whose income is under $11,200, can afford modest housing. These interest credits, if necessary, make the loan an effective interest rate of 1 percent. Even at that paltry level, only those close to the income ceiling can afford the program. Under an amendment last year passed by Congress the moderate-income borrowers up to $15,600 income are eligible for interest credits on a sliding scale. In both programs, the amount the buyer pays increases with his increasing income and on resale the Government subsidy is recaptured.

Despite the mandatory language in the amendment, making interest credit available above $11,200, the Department has failed to issue regulations implementing the program and this committee amendment would now repeal that amendment. Hence, buyers above $11,200 would be required to pay market interest rates. Unfortunately, under the income ceiling of $15,600, no buyers qualify for a market rate loan. Although $500 million remains in the program for fiscal year 1981, after the $300 rescission, the money is not likely to be used.

Mr. President, it should be noted that the amendment would also give the Secretary discretion to end the interest credit for the low-income borrowers at any time despite authorization or appropriation levels. Ending interest credit for low-income families is unthinkable. This temporary subsidy has been part of the program since its inception and without it there would be no program. The chance this amendment would be exercised will cause such uncertainty that realtors and builders will avoid making buyers aware of the mere possibility of this program.

This amendment along with the present low-income ceiling, making so few buyers eligible for the program, puts its future in serious jeopardy. This amendment would work to the detriment of our rural Americans who share the highest levels of inadequate housing in America.

The committee report accompanying this bill mentions that the rural housing proposals came too late for any major review of the programs, objectives, and operations. It mentions that it has been 5 years since the committee last examined the rural housing programs and that the Rural Housing Subcommittee will conduct an extensive review of the programs and make recommendations to the Senate in the next authorization cycle.

When this amendment was considered by the committee, the Administrator of Farmers Home had not been confirmed. Because the impact of this amendment is so severe and so far reaching for the continuation of the homeownership programs, I urge that this committee withdraw the amendment and give the Department and affected groups the opportunity to fully air this issue. Such a delay should have no effect on the budget proposals of the President.

Mr. DOLE. Mr. President, the changes in section 8 of the Housing Act of 1937 proposed in S. 1197 to be voted on today, if enacted into law, would make changes in the Internal Revenue Code that are, I am certain, unintended. These changes to the code occur because a number of tax provisions cross-reference section 8 for a definition as to what constitutes low and moderate income and low- and moderate-income housing.

RENTAL HOUSING REVENUE BONDS

One of the most significant changes to the code would occur in an area we amended just last year: housing bonds. In the Omnibus Reconciliation Act of 1980 we limited industrial development bonds for housing purposes to low- or moderate-income rental housing bonds. Low or moderate income was defined by reference, through code section 167, to section 8 of the Housing Act. At the time, low income under section 8 was defined as 80 percent of the median for an area. Few of us, at the time, expected a change to that definition as great as that which S. 1197 mandates.

NEED FOR A TECHNICAL TAX CODE AMENDMENT

The remedy for this problem does not lie in an amendment of S. 1197, however. We should not attempt to amend the Internal Revenue Code without due consideration by using an amendment to a housing law bill as a vehicle. What is needed is a separate technical amendment to the Internal Revenue Code given prompt and full consideration by tax experts on both sides of the aisle.

Such an amendment would make clear that our intent in referring to section 8 of the Housing Act for a definition of low and moderate income in the revenue bond area was for administrative ease and not to inextricably tie the rental housing revenue bond program to a housing subsidy program. It would also, I trust, not spell disaster for the limited bond program carefully crafted in legislation only a few months old.

I would suggest to the manager of the bill that I plan to introduce a bill containing such an amendment to the code in the near future and would urge its prompt consideration by my colleagues on the Finance Committee. That statement is made because there are some concerns about that provision.

UP AMENDMENT NO. 136

(Purpose: To recognize the Kansas Department of Economic Development as a public housing agency)

Mr. DOLE. Mr. President, I send an unprinted amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Kansas (Mr. DOLE) proposes an unprinted amendment numbered 136.

Mr. DOLE. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 66, between lines 18 and 19, insert the following:

RECOGNITION OF KANSAS DEPARTMENT OF ECONOMIC DEVELOPMENT

SEC. The Secretary of Housing and Urban Development shall permit the Kansas Department of Economic Development to participate as a public housing agency for the purposes of programs carried out under the United States Housing Act of 1937 and as a State agency for the purposes of section 883.203 of title 24 of the Code of Federal Regulations as in effect June 1, 1981.

Mr. DOLE. Mr. President, the amendment I propose today would simply allow my State of Kansas to join the other 49 States in receiving its approved allotment of section 8 housing units this year.

We have a problem because of a department ruling. It has been suggested that we ought to call up the Secretary and tell him to change the ruling. I am not suggesting that we have not tried to do that. We have been in discussions at the staff level at HUD, but HUD's ruling that our State agency does not qualify is based on technical arguments which are both wrong and, in my view, inappropriate.

Without going into all the technical arguments, I would just suggest that as far as I know everyone in my State, the State of Kansas, and the Kansas City area office of HUD, believed that the KDED was authorized to administer the fund.

My amendment would not cost the U.S. Government a penny, because this housing has already been appropriated and approved and is waiting in the Kansas City HUD area office. Section 8 housing units will not be taken from other States. I am only trying to insure that Kansas does not lose its housing because of a technicality.

Our problem stems from a Department of Housing and Urban Development ruling earlier this year that the Kansas Department of Economic Development does not qualify as a public housing agency eligible to administer section 8 housing. Federal law provides that only such a State agency can administer these funds. Since Kansas has no other appropriate agency, our State will probably lose the section 8 units.

HUD's ruling that our State agency does not qualify is based on technical arguments which are both wrong and inappropriate when an entire State's low-income housing is at stake. Without going into all the technical arguments, suffice it to say that everyone in the State of Kansas and the Kansas City area office of HUD has believed that KDED was authorized to administer the funds. A lengthy Kansas attorney general opinion details the legal arguments that the Kansas legislature intended the Kansas Department of Economic Development to administer such a program. In January, the HUD office in Kansas City cleared the agency for this purpose. Everyone in Kansas—from the head of KDED to the small communities and the congressional delegation—has assumed that this agency would administer our section 8 units.

It is simply inconceivable that a Federal agency would use such trivial grounds to deprive an entire State of participation in this program.

Senator KASSEBAUM and I have urged HUD officials in Washington to reverse the earlier ruling. After much delay, there seems to be agreement that our State has a legitimate case, but progress has stalled once again. We cannot afford to wait any longer.

Kansas' allocation of 120 section 8 units is at stake. The HUD area office has these units available now for State agency set-aside. Work can begin tomorrow if KDED is authorized to administer the program. If not, there are two ways Kansas could lose the units entirely. First, without KDED, the area office will need Washington approval to convert the set-aside units to a different category which can be administered directly by HUD in Kansas City. No conversion approval would mean no Kansas units. Second, HUD must spend 70 percent of its funds by July 1 of this year. If KDED does not receive approval in coming days, the July 1 deadline will not be met and the units will be revoked.

With time running out while HUD refuses to act, the Senator from Kansas has no choice but to force the issue by proposing this amendment. Because both Senators from Kansas are joining in offering an amendment which only applies to our State, we anticipate no objection and urge the Senate to approve our amendment without delay.

Mr. President, I know of no objection to the amendment.

Mr. LUGAR. Mr. President, Senator DOLE's amendment obviously has merit and equity not only for the State of Kansas but for the bill. It is a pleasure to indicate our acceptance.

Mr. PROXMIRE. Mr. President, I am pleased to support the amendment.

The PRESIDING OFFICER. Without objection, the amendment is agreed to.

The amendment (UP No. 136) was agreed to.

UP AMENDMENT NO. 137

Mr. ARMSTRONG. Mr. President, I send an amendment to the desk and ask for its immediate consideration.

The PRESIDING OFFICER. The amendment will be stated.

The assistant legislative clerk read as follows:

The Senator from Colorado (Mr. ARMSTRONG), for himself and Mr. CHAFEE, proposes an unprinted amendment numbered 137.

Mr. ARMSTRONG. Mr. President, I ask unanimous consent that further reading of the amendment be dispensed with.

The PRESIDING OFFICER. Without objection, it is so ordered.

The amendment is as follows:

On page 38, strike out lines 14 through 18 and insert in lieu thereof the following:

"(e) Section 213(d) of the Housing and Community Development Act of 1974 is amended by adding at the end thereof a new paragraph to read as follows:

'(4) With respect to fiscal years beginning after September 30, 1981, the Secretary of Housing and Urban Development is authorized to retain a portion of the contract authority available during any fiscal year under the authorities cited in pargraph (1) of subsection (a) of this section, not to exceed 10 per centum of the available contract authority on an aggregate basis. Such contract authority shall be available for subsequent allocation to specific areas and communities, and may be used for:

'(A) unforeseeable housing needs, especially those brought on by natural disasters or special relocation requirements;

'(B) support for the needs of the handicapped or for minority enterprise;

'(C) applications for assistance with respect in housing in new communities;

'(D) providing for assisted housing as a result of the settlement of litigation.

'(E) small research and demonstration projects;

'(F) lower-income housing needs described in housing assistance plans, including activities carried out under areawide housing opportunity plans;

'(G) innovative housing programs or alternative methods for meeting lower-income housing needs approved by the Secretary.' "

Mr. ARMSTRONG. Mr. President, this amendment is offered on behalf of the Senator from Rhode Island (Mr. CHAFEE) and myself.

Mr. President, this amendment addresses itself to the so-called Secretary's discretionary fund in the section 8 housing program. It has been the practice to set aside some 20 percent of section 8 funding in a discretionary fund administered by the Secretary of HUD. The dollar amount of this is staggering. We are talking about 20 percent of a huge program, literally approaching $5 billion a year in discretionary funding.

Mr. President, I am concerned, as I have previously expressed to the Committee on Banking, that no Secretary of any administration ought to have—nor, indeed, should any official of the administration have—the kind of unguided discretion over a large program, involving huge amounts of money, that has been customary in the past. Just to give some idea of the potential for abuse which is inherent in this kind of unguided discretion, Mr. President, let me point out what happened on January 19 of this year, the last day of the prior administration. On that day, more than $2 billion in section 8 budget authority—and I did say billion, Mr. President, not $2 million but $2 billion in section 8 budget authority—was released from the Secretary's discretionary fund and was available for new proposals in section 8 housing units. Several aspects of this release, aside from the date on which it occurred, were worthy of note.

First of all, that two regions of the Nation, region I and region II, the Northeast, received more than 55 percent of the funds. Second, that some areas of the country, particularly the Northwest, which had just been hit by the Mount St. Helens volcanic eruption, received no funds.

Third, and I think this is what concerned me most, unlike past practice, funds were released for specific projects rather than to HUD local offices to determine how the funds could best be allocated to suit local needs. In other words, we are talking about the Office of the Secretary dealing directly with project contractors rather than through local officials, obviously opening the door to potential abuse.

Mr. President, I do not accuse anyone of abuse in this case, although I note for the record, as I did in committee, that there are substantial allegations of wrongdoing and hanky-panky and at least questionable practices raised by such newspapers as the Boston Globe, the Providence Journal-Bulletin, and the Washington Post.

Finally, in the release of nearly $2 billion of discretionary funds of January 19 of this year, I note that, although public housing projects are reporting significant budget deficits for this fiscal year, not 1 dollar of this nearly $2 billion that was released was allocated to shore up the deficits in existing projects.

So, Mr. President, my thought, my motive, and my purpose as we considered this bill in committee was simply to delete all authority for discretionary funds. As I sought to draft an amendment to do so, I looked in the law for that section which authorizes the discretionary fund. That is when I discovered the aspect about this whole discretionary fund of gigantic proportions which I find the most mind-boggling of all. That is there there is no statutory authorization for any discretionary fund of any size.

Well, Mr. President, I then thought I would offer an amendment which would simply make it unlawful to have a discretionary fund and, in fact, at another time, I may do exactly that. I really have doubts that there should be a discretionary fund of any substantial nature. But I have been prevailed upon by those who are interested in this program, particularly the Senator from Rhode Island, who has been an authority and a student on these matters, to moderate somewhat my own initial thinking and, rather than offer an amendment which would abolish or completely eliminate the discretionary fund, to reduce it to no more than 10 percent and then only to permit this fund to exist under certain guidelines which are contained in the amendment.

With that understanding, Mr. President, let me explain what the guidelines are. First, that the money shall be available for subsequent allocation to specific areas and communities—not to individual project contractors, but to areas and communities in the regular order so that we are not talking about the Secretary of HUD dealing with local developers or local project contractors.

Second, that we are talking about allocation for unforeseen housing needs such as those brought on by natural disasters or special relocation requirements; that the funds in this so-called discretionary account support the needs of the handicapped or minority enterprise; applications for assistance with respect to housing in new communities; lower income housing needs described in housing assistance plans, including activities carried out under areawide housing opportunity plans; and innovative housing plans or alternative methods for meeting lower income housing needs approved by the Secretary.

Mr. President, I wish I could report to the Senate that the language which is contained in the Chafee-Armstrong amendment is very tightly drawn, that it would give with great precision the kind of direction the Department should have. I cannot honestly so report. But it is a much better direction than the Department has ever had before. We are limiting, by reducing from 20 to 10 percent, the amount of the discretionary fund. Although I personally think it is too large, out of regard and deference for the Senator from Rhode Island and others, including the subcommittee chairman, who has indicated to me his desire to retain in the Department a degree of discretion, I have agreed to go along with this amendment. I hope that the Senate will also support it.

Mr. LUGAR. Mr. President, we are pleased to accept the amendment. I appreciate the good will of the Senator from Colorado, his instructive input in the committee and the refinements he has made today.

Mr. PROXMIRE. Mr. President, I am pleased to accept the amendment on behalf of the minority. I think it is so worthwhile, I want to be listed as a cosponsor. I am delighted to join the Senator from Colorado.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. CHAFEE. Mr. President, this amendment would allow HUD to continue to set aside a portion of its assisted housing funds for discretionary purposes. To assure proper disposition of these funds, my amendment sets a limit on the funds that may be set aside, and specifies the purposes for which such funds may be used.

Currently, HUD maintains a Headquarters Reserve Fund created by regulations pursuant to section 213 of the Housing and Community Development Act of 1974. This fund, somtimes called the Discretionary Fund, serves many important program purposes and provides the Secretary with essential flexibility in addressing special housing-related needs.

For example, discretionary funds have been used for emergency assistance following natural disasters. When the floods of Hurricane Agnes washed away low-income housing, discretionary funds were used to replace housing that had been destroyed.

The fund is used routinely to meet handicapped needs. When local developer interest is inadequate to meet our handicapped housing goals, HUD frequently must advertise nationally. This can only be done if a central fund exists.

Discretionary funds are also used to experiment with low-cost alternatives to the present approach to assisted housing.

Mr. President, I am aware that use of the discretionary fund was the subject of some controversy during the final days of the last administration, but this is no reason to wipe out the fund entirely and hamstring this administration because of the activities of those before it.

This amendment would safeguard against abuse by limiting the amount and the application of the fund, but would leave HUD the latitude to assure its legitimate operations may be carried out.

I believe this is a most reasonable approach, and I urge my colleagues to accept this amendment.

The PRESIDING OFFICER. The question is on agreeing to the amendment.

The amendment (UP No. 137) was agreed to.

Mr. LUGAR. Mr. President, I move to reconsider the vote by which the amendment was agreed to.

Mr. PROXMIRE. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. LUGAR. Mr. President, I ask unanimous consent that a letter dated June 2, 1981, addressed to Senator GARN

from the National Association of Towns and Townships concerning a proposal to transfer the HUD Small Cities program to administration by State governments be printed in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

NATIONAL ASSOCIATION OF TOWNS AND TOWNSHIPS,
Washington, D.C., June 2, 1981.

Hon. JAKE GARN
U.S. Senate,
Dirksen Senate Office Building,
Washington, D.C.

DEAR SENATOR GARN: I am writing on behalf of the Executive Committee of the National Association of Towns and Townships (NATaT) and our more than 13,000 small community members, to urge your support for President Reagan's proposal to transfer the HUD Small Cities program to administration by state governments. Although we do believe that some minor improvements are necessary to safeguard the interests of small local governments, we are convinced that a properly constructed state block grant program will prove to be the most efficient and equitable means for delivering community development assistance to needy small communities.

Our members—most of them are communities of less than 10,000 population—have experienced substantial difficulty in making use of the Small Cities program as it is now constituted. A simplified program, administered by state officials who will be armed with a greater knowledge of local needs and capacities, will reach the thousands of needy small towns which have not benefitted from HUD assistance in the past. HUD will retain monitoring capabilities which will assure that national policy is followed at the state level.

In order to make certain that small communities benefit fully from this new Community Development program, NATaT's support for this new initiative assumes that three provisions will be added to the proposed legislation:

1. State expenditures for administration of the program should be limited to a maximum of three percent of each state's allocation;

2. It should be absolutely clear that none of the funds distributed by the states will go to large cities. All grants must go to communities with less than 50,000 population;

3. State governments should be required to honor multi-year grant commitments already made by HUD.

It will also be very important to provide local governments with adequate information about the new Community Development system.

We are convinced that this new initiative represents the best hope for meeting the community development needs of America's long-neglected small communities. We urge you to cast your vote in their behalf, in favor of this proposal.

Sincerely,

ED KRUEGER,
President.

Mr. LUGAR. Mr. President, I ask unanimous consent that a letter dated April 29, 1981, addressed to Senator PROXMIRE from the National Governors' Association concerning the community development action grant programs be printed in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

NATIONAL GOVERNORS' ASSOCIATION,
Washington, D.C., April 29, 1981.

Hon. WILLIAM PROXMIRE,
U.S. Senate, Dirksen Senate Office Building,
Washington, D.C.

DEAR SENATOR PROXMIRE: As you know, the Administration has proposed a number of changes in the community development block grant (CDBG) and urban development action grant (UDAG) programs as part of the FY 1982 HUD authorization bill. The legislation proposed by the Administration would provide state and local governments greater flexibility in the use of these important development funds and would establish a direct state role in administering the so-called "small cities" CDBG program. The National Governors' Association strongly urges your support for these reforms.

Many of the federal programs and tools that state and local governments have used to promote community and economic development are targeted for substantial reduction or elimination in the current round of budget cuts. The CDBG and UDAG programs are among the few remaining tools available to support state and local development and revitalization efforts. It is therefore extremely important that Congress enact the legislative changes necessary to provide greater flexibility in the use of these funds to address a broad range of development needs and activities.

Equally important is the need to provide a direct and meaningful role for states in managing a unified community and economic development block grant. As funding for categorical federal development programs is diminished, local governments are turning increasingly to the states for assistance. We are firmly convinced that states are in the best position to direct scarce development resources to the areas of greatest need. In our view, the transfer of administrative responsibility for the non-entitlement portion of CDBG from HUD area offices to elected state officials will assure more direct accountability for the use of these funds, and will produce funding decisions that are more responsive to local needs.

In recent years, the states have established an impressive record of achievements in designing programs and policies to aid distressed areas. The Administration's block grant proposal would build on the expertise states have developed in this area and would significantly enhance ongoing state efforts to promote community development and revitalization. As the Senate Banking Committee begins its mark-up of the 1982 HUD authorizations, we urge your support of the Administration's state block grant proposal.

Sincerely,

DICK THORNBURGH,
Governor of Pennsylvania, Chairman, Committee on Community and Economic Development.

WILLIAM F. WINTER,
Governor of Mississippi, Vice Chairman, Committee on Community and Economic Development.

Mr. DODD. Mr. President, I would like to take this opportunity to engage in a brief colloquy with the distinguished Senator from Indiana (Mr. LUGAR), the chairman of the Subcommittee on Housing and Community Development. Since the inception of the community development block grant program, the use of funds for public service activities has been subject to various limitations, including a restriction to areas where other physical development activities were being undertaken in a concentrated manner.

HUD has had a great deal of difficulty in implementing this limitation and, in fact, it was not until March 1978 that the Department issued regulations limiting these eligible services to neighborhood strategy areas. Even then, a phaseout period was provided. Given this difficulty in administration and a recognition that there is a need to provide local officials with increased flexibility in the use of CDBG resources in light of budget reductions and increasing demand for these funds resulting from the consolidation of related programs, the committee bill removes this limitation, but continues to preclude the use of funds if these services were provided with local resources within the prior 12-month period.

While I believe this maintenance of effort requirement is appropriate, I believe there is a need for some transition particularly as a result of the prior administrative difficulties. For example, the city of Hartford has been using CDBG funds to provide services, in senior centers Many of these centers are not located in NSA's and beginning in the upcoming program year, the city will not be able to use block grant funds.

However, under the committee bill, if the city picks up these costs from local funds, they will not be able to fund these services with block grant funds in the succeeding year. Given the lateness of the implementation of the prior provision and the pending change, I was interested as to the chairman's opinion as to whether this type of situation would qualify for a waiver of the 12-month requirement?

I notice in bill that the Secretary may waive this maintenance of effort requirement if the discontinuation of funding was due to circumstances beyond the control of the applicant.

Mr. LUGAR. The Senator is correct in stating that part of the reason for this change results from the difficulties experienced by HUD and localities in establishing an appropriate linkage between public services and concentrated physical development activities. The 12-month requirement was added to the law in 1977 to avoid situations in which CDBG funds simply would be substituted for local resources.

While it is my intent that the use of CDBG funds for public services continue to be directed to either new or an increased level of activity, I would agree that the Secretary should interpret the waiver provision liberally during the transition to the broader eligibility for public service activities provided in this bill. Depending upon local situations, I would agree that the prior inconsistencies in administration could present a circumstance beyond the control of the applicant.

Mr. DODD. I was interested further, as to whether the chairman would also agree with me that HUD should look favorably upon requests in the program year immediately preceding enactment of this change from cities which wish to continue funding such services from CDBG resources?

Mr. LUGAR. Again, I believe the Secretary should be reasonable in reviewing

these situations in recognition of the need for an appropriate transition. We certainly do not want to create a situation where localities are put in the position of either having to discontinue needed services or shift resources from other ongoing activities in anticipation of this change. Both prior and subsequent to the enactment of this provision, I believe the emphasis should be on local determination and flexibility.

Mr. DODD. I thank the chairman for his cooperation in this matter and commend him for the accommodations he has extended during consideration of this bill to Members on both sides of the aisle.

Mr. LUGAR. Mr. President, as you know the Banking Committee ordered S. 1197 reported to the Senate on May 5. Included in our bill is an extension of Federal flood insurance authority for 2 years. Unbeknown to the committee, the Comptroller General had issued an opinion affecting an important provision of the agreement between the Federal Emergency Management Agency and the pool of private insurance companies and their agents which produce the flood insurance.

This provision imdemnifies the companies and their agents from all judgments for damages as a result of court action by policyholders or applicants arising out of or caused by acts or omissions of FEMA in carrying out direct billing or policy issuance procedures controlled by FEMA to the extent that FEMA is responsible and the companies or agents have not caused or contributed to the liability. This decision, Mr. President, was based on the Comptroller General's conclusion that no appropriation has been made available for payments under the indemnity clause.

The result of the deletion of this so-called hold harmless provision is to make the companies and agents reluctant to participate in the national flood insurance program since private errors and omissions insurance does not cover damages and legal costs arising out of the Federal Government or its contractors. Therefore, we have a dilemma which should be resolved in order to sustain the progress which has been made in implementing the national flood insurance program.

Private insurers have asked us to consider an amendment to the Flood Insurance Act which would restore indemnity. We have yet to hear from the administration on this matter and are anxious to receive its counsel. The committee intends to resolve this problem of restoring protection with all due speed and recommend appropriate corrective action to the Senate at the earliest opportunity.

Mr. CRANSTON. Mr. President, I am voting against final passage of this bill. This decision was not made lightly. I have always been a supporter of housing legislation; however, this bill contains many provisions which I consider ill-advised and others which I believe are unduly harsh when considering the needs of low-income people. As a response to a national housing crisis it is remarkably threadbare. In short, the only housing policy reflected by the bill is one of disinterest on the part of the administration and the committee's Republican majority to the needs of Americans for decent housing.

The CDBG changes in title I of the bill are enough to convince me not to vote for this bill, but there are other provisions contained in S. 1197 that I find troublesome. Under the guise of reducing Federal spending, the administration is attempting to gut the housing program.

Democrats on the committee are committed to trying to develop increased opportunities for housing in this country, which led to our amendments in committee. First, increasing units for the housing of low income and elderly persons; second, reducing the cost of housing by permitting single room occupancy; third, reducing room size to reduce the cost of units; and fourth, transfering of $1.1 billion in budget authority targeted for the sale of public housing financing instruments to the Federal financing bank for additional housing units. These amendments reflect a concern for human beings, not just numbers, as the administration proposes.

The new administration and the Republican majority have combined to reduce severely the amount of assistance low- or moderate-income people will receive from the Federal Government. Their proposals will only push the poor deeper into poverty. Subsidized housing has been especially hard hit. President Carter proposed funding for 260,000 units of federally subsidized housing in his budget for 1982. In proposing its final revised budget, the Reagan administration recommended that assisted housing be reduced to an all time low of 175,000 units. The Republican majority on the Banking Committee was even less compassionate than the administration. They voted for only 150,000 units.

In addition, the administration recommended, and the majority agreed, that only 45 percent of the units are to be new construction or substantially rehabilitated housing. If these proposals are adopted it will be even more difficult for low-income people to find decent, safe, and affordable housing.

The administration has asked Congress to eliminate the "Ginnie Mae" tandem program of 7.5-percent mortgages to developers of low-income housing. This position was adopted in the bill. It is also considering limitations on the 11(b) tax-exempt financing authority. Tandem and 11(b) financing make up the bulk of financing for low-income housing. Many supporters of low-income housing believe that without this below-market financing, it will not be economically feasible to build low-income housing. With cutbacks in assisted housing and developer financing where will low-income people be living in the future?

I take issue with the proposed increase in the tenant's contribution toward rent. The bill raises the contribution from 25 percent to 30 percent of the tenant's income. Although it will be phased in over a period of 5 years, the Federal Government would squeeze an extra $1.72 billion from poor people which represents a 20-percent out-of-pocket increase for all tenants. This proposal amounts to Government-sponsored inflation and is severely harsh on those people who already have limited resources on which to exist.

Another provision that I have serious reservation about is the prohibition of illegal aliens from receiving Federal housing assistance. I can foresee many abuses to citizens by authorities attempting to determine whether one is an alien or not. I do not believe that the committee's response to this problem has been carefully thought out to protect against violations of the civil rights of low-income people be they alien or not.

Mr. President, it is for all of these reasons that I have determined that I cannot support this bill. I ask my colleagues to consider the implication of the policy set forth in this legislation and if they agree that this is not a housing bill but an antihousing bill, I hope they will join with me in voting against it.

Mr. BRADLEY. Mr. President, I oppose the adoption of S. 1197, the Housing and Community Development Act Amendments of 1981, because I believe it abandons moderate- and low-income families—those persons who in today's housing market cannot qualify for home mortgages and cannot afford the skyrocketing cost of unsubsidized rental housing. Congress created HUD in 1965 to provide for full and appropriate consideration at the national level of the needs and interests of the Nation's communities. We established a national housing goal in 1949 and reaffirmed it in 1968—"a decent home and suitable living environment for every American family." Millions of Americans have no answer to how they will take care of their housing needs. Unfortunately for them and for us, the private sector without any subsidies cannot provide them with one.

The housing industry is in its longest postwar decline. Due to sharp increases in interest rates, builders cannot get construction loans at rates that allow them to build moderately priced homes. Potential purchasers cannot qualify for or are reluctant to accept 15 to 16 percent mortgages. Unsubsidized multifamily rental housing is not deemed profitable to build—particularly for moderate- and middle-income families. For low-income families unsubsidized housing is out of the question. And existing housing stock is insufficient to house the population. The Senate Banking Committee proposal for 150,000 assisted units fails to recognize the dimensions of the problem. Even given the conflicting interests of reducing total Government spending and providing adequate housing, the cut in the level of assisted housing is excessive and unnecessary.

The shortage of unsubsidized rental housing has become an increasing problem since the late 1970's and is expected to reach epidemic proportions in the 1980's. The reason given is that the building and financial industries perceive rental housing as a bad investment. Unfortunately, stimulating new investment in the private unsubsidized multifamily rental market would result in a 25-percent increase in market

rents. This would not solve the problem of unavailability of housing to many moderate- and most low-income families. Therefore the only option is Government subsidized housing. The problem of determining a more economical way to produce housing for moderate- and low-income families is one we must address. However, until we have determined a method, the responsibility to adequately house our citizens remains.

This legislation also fails to recognize the harmful effect the current collapse of the construction industry has on the economy as a whole. The home building industry has been in a decline for 28 months and expects the decline to continue for at least 3 to 6 months. In this situation most builders and suppliers cannot survive. Increasing numbers of builders are facing bankruptcy, and with them will disappear thousands of construction jobs.

The Senate committee bill will have a strong impact on many communities. Using the State of New Jersey as an example, under the committee bill New Jersey can expect to receive approximately 3,900 units in fiscal year 1982 compared to an expected 6,697 units under the fiscal year 1981 appropriation. Under the committee bill the New Jersey Housing Finance Agency can expect 700 units of new and rehabilitated low- and moderate-income housing when the agency's capacity is between 5,000 and 7,000 units per year and the State's need exceeds this capacity by 200 to 300 percent annually.

The Senate committee housing bill also fails to provide for the promotion of communities by folding several effective programs into community development block grant program without an increase in funding. It will be impossible to effectively carry out the section 312 rehabilitation loan, the section 701 comprehensive planning assistance, the neighborhood self-help development, weatherization assistance and CSA's community economic development programs under the committee proposal. I support the views set forth by my Democratic colleagues in the Senate committee report on S. 1197 in opposition to title I of the bill. The purpose of the community development block grant program will not be carried out under the proposal. Although the committee recognized the importance of separating UDAG from CDBG it erred substantially in diluting citizen participation in the local community development process, in eliminating the linkage of housing assistance and community development and in failing to determine the impact of the proposed substantial changes in the community development component of the bill.

The defects of the Senate committee bill are so glaring that I must oppose its passage and I urge my fellow colleagues to do likewise. I am encouraged by the unanimous vote of the Democrats on the committee against reporting out the bill and suggest that we follow their studied action.

Mr. DURENBERGER. Mr. President, in a narrow sense, title I of this legislation only makes technical changes in the CDBG program. It changes HUD's prior approval role on the CDBG plans of communities. It reduces the level of citizen participation previously mandated by the Federal Government. It also allows the States a potential role in the small cities grant program.

However, in the larger perspective it sends a clear signal to HUD and the cities that the Senate is backing off its long-term commitment to target these funds primarily for the benefit of low- and moderate-income families and individuals. In 1974 when the administration was proposing special revenue sharing for community development, the Senate wanted to require that 80 percent of the money be used to directly benefit low- and moderate-income families. The House has always been somewhere between the Senate and the administration. The bill and the report contemplate much more local discretion and much less Federal targeting of the funds.

Local discretion is a valuable principle and it is important that the Federal Government encourage it where appropriate. I am glad to see that the President is committed to moving ahead in this area. GRS is a good example of a program that provides almost complete freedom in deciding how Federal funds may be used. GRS deserves the support of the Senate. There are two good reasons to support it. First, the Federal Government in a variety of programs and regulations puts heavy mandates on State and local governments. These mandates are expensive to implement. They reflect Federal policies and purposes, and the Federal Government ought to provide the funds to carry them out.

Second, not every community has an adequate fiscal capacity to deal with the problems it faces. And certainly the capacity is not equally distributed across States and communities. There is a justifiable Federal purpose in a program like GRS to equalize capacity to some extent. And the GRS formula tries to accomplish that objective by recognizing tax capacity and tax effort explicitly, although one may argue about the success or failure of that formula.

So it is appropriate to have a program like GRS that sends Federal funds to States and cities with complete latitude provided to Governors and mayors, legislatures, commissions, and councils to spend on programs that are recognized for whatever reason as appropriate endeavors of local government.

But this commitment to GRS and even a commitment to reduce the regulatory burden on State and local governments, does not mean that every program should be structured like GRS.

CDBG was not intended by the Congress to be general revenue sharing or even special revenue sharing as the Nixon administration proposed as part of the process that created this block grant. Rather it was designed to replace categorical grant programs where the Federal purpose was not equalization or compensation. The purposes of the programs replaced was very explicit. They were designed to assist persons of low- and moderate-income break the cycle of poverty that existed primarily in inner city neighborhoods and was due in part to the physical condition of those neighborhoods. The Senate has always insisted that this basic Federal purpose be preserved in this program.

Part of the process of providing flexibility to local governments while preserving the Federal purpose in a program is to change the method of allocation from discretionary grants made by Federal departments to formula grants with entitled jursidictions. That modification is reflected in the CDBG block grant. But it should be clear that no one can write a formula that preserves entirely the Federal purpose. The entitled jurisdictions are much larger than the neighborhoods that we intend to benefit. This failure in the ability of the formula to target was recognized in the first 2 years of CDBG. It resulted in more targeting through HUD regulations and the reauthorization in 1977. The targeting, effected through prior HUD approval of CDBG plans, assists that formula allocation and by the way assists local officials in achieving the Federal purpose.

This is not to say that all agree that there is a Federal purpose in community development. In fact, I am one who believes that the solution to "community development" problems would be much more likely from another source. Programs like CDBG treat the symptoms of fiscal distress in cities that result from a separation between the wealth that a city creates and the places where that wealth is invested. If the mayors could reach out to the tax base of the suburbs they would not face this kind of distress and Federal treatment would not be necessary.

There are also communities in the Nation where metropolitan government works to share the problems of housing, employment, and development with all communities within a region. In fact, these structural solutions which are available in most if not all of our major cities would in the long run be a better solution to the community development problems than programs like CDBG. And the long run might be considerably shorter, if the Federal Government got out of the community development business.

But so long as we are about community development, so long as we claim that there is a Federal purpose here, we ought to be sure that the Federal funds provided go to that purpose and not to community development generally. This is to suggest that "community development" is a very broad function of Government, but that the Federal purpose in community development is much narrower than the broad function. Those community development projects in which the Federal Government has no interest are not by that designation illegitimate. They are simply local, no more—no less. And by the same argument, not everything that is community development is a Federal purpose and not everything that is community development should be supported by Federal funds.

My argument concludes by saying to my colleagues that I think that we are mistaken, if in the name of more discretion to local officials we broaden the

Federal purpose in community development. In fact, as I have said, I think we should greatly narrow the Federal role because the structural solution that is available to the States and their cities is far more promising. Paradoxically, this belief that the Federal role should be narrowed leads me to believe that the Federal Government should be even more explicit in targeting those funds it will be expending. This can and should be done in conjunction with regional government planning.

For these reasons I think it is imperative that we find a way to continue to have a prior review system. I am hopeful that we can continue the best aspects of the present system while finding ways to ease the application process burden. Toward that end and in order to gain further input from those most directly affected by the block grant process, I will be holding hearings on this subject in the Intergovernmental Relations Subcommittee on Government Affairs.

Mr. TSONGAS. Mr. President, this legislation will seriously undermine our community and economic development efforts in Massachusetts and throughout the Nation. It will target the low-income family and elderly housing tenants for severe economic hardship.

The changes in housing programs are a major blow to poor people. First, the administration stripped the poor of their basic services including housing, and raised low-income housing rents. Now the Senate proposed to extract the final pound of flesh by forcing cities to choose between rent controls for tenants outside public housing and rent subsidies for tenants inside public housing.

The changes in community development programs are unnecessary, since they were reauthorized in the last Congress. More importantly the are dangerous, because they take away controls on how community development funds are spent. The proposed change in small cities program administration has received only a cursory examination, and would place another layer of bureaucracy between local and Federal Government. I believe that necessary regulatory reforms and reductions in paperwork should and can be made without this massive effort to weaken the law. Under the guise of eliminating these burdens the administration is actually wasting the taxpayers money.

It is clear that the issues are not dollars or programs, but philosophy. The administration could have an economic recovery program with the cities as partners, but they have chosen to make the cities their victims. I have worked on seven major housing bills since I came to Congress, but I cannot support this bill. It represents a major retreat from the programs and principles which have proven workable and effective.

● Mr. CHILES. Mr. President, I want to say a few words in opposition to the Banking Committee's move to terminate the authorization for the Federal crime insurance program (FCIP).

The FCIP provides residential and commercial insurance at reasonable rates for persons who are otherwise unable to obtain crime insurance because they are located in high crime areas. The program has been in operation for nearly 10 years now, and it insures approximately 80,000 people across the country.

The program recognizes that fighting crime, in the long run, involves more than increasing our law enforcement budgets. It recognizes that one important way to turn around our crime problem is to encourage people to build stable neighborhoods and to attract businesses to an area. A neighborhood where people know one another is a neighborhood where people will help one another to keep criminals out. It is tough to get people to move into an area and revitalize it unless you provide them with some incentives. The FCIP provides an incentive by giving people who want to revitalize a community the crime insurance that they would be unable to obtain on the commercial market. By taking away that incentive, we hamper this rebuilding effort and we do little to fight crime in the long run.

Mr. President, nearly 5,000 of the FCIP policyholders live in my State of Florida. Most of those who hold policies are in Dade and Broward Counties, areas which have been hard hit by crime. Many of these policyholders live in high crime areas, and are trying to revitalize these areas. Just last year, Miami was torn apart by civil disturbances in the Liberty City area. Today, people are trying to rebuild that community, and to attract businesses back into the Liberty City area. Insurance companies are helping in that rebuilding effort. Just after last year's disturbances, a group of major insurance companies in the Miami area met with Florida's insurance commissioner, Bill Gunter. After the meeting, the insurance companies told Mr. Gunter that they would continue to underwrite riot reinsurance policies in Dade County. To my way of thinking, this shows that our State governments and our private insurors want to do their part to help rebuild. Today, the Banking Committee's action sends a message out that the Federal Government is not willing to do its part.

Mr. President, the Banking Committee seems to be saying that either giving the crime insurance program an authorization or allowing the crime insurance program to use its borrowing authority is too high a price to pay. I can understand the committee's desire to save money and reduce Federal spending. I am in favor of balancing the budget, and I have worked long and hard to reduce Federal spending. But today, I am concerned that we are being pennywise and pound foolish. We may save money today, but it may end up costing us far more in the future.

I can understand the committee's concern over the imbalance between the amount paid out in claims and the amount collected in premiums under the crime insurance program. But I am not sure that it is a valid reason to terminate the program. This imbalance, a 3 to 1 ratio, should not really be surprising, since the very purpose of the crime insurance program is to insure people who live or do business in high crime areas. If there were no imbalance, then either the private sector would be involved in underwriting policies, or else the premiums would be prohibitively expensive.

Moreover, in some areas, this imbalance simply is not that high, yet these areas are being unfairly penalized. In Florida for instance, last year $857,000 was paid out in claims and $459,000 was collected in premiums under this program. If we want to reduce the imbalance in the program, then we ought to be looking for ways to change the program. We should not simply throw the program away, and leave all these people with no protection.

Mr. President, at this late stage of the bill's consideration, I will refrain from offering an amendment to restore funding for this program. My understanding however, is that the House presently favors continuing the crime insurance program in some form. So I would hope that the Banking Committee will reconsider its actions when this measure goes to conference. We need this insurance program if we are to effectively turn around our crime problem and rebuild our cities.●

● Mr. WILLIAMS. Mr. President, I regret that I must oppose this bill. I do not take this step lightly because I am fully aware that the legislation contains a number of important, even necessary provisions. But, the bad far out weighs the good. This bill would have us waste millions of dollars in community development funds at the same time that it picks the pockets of the poor in an effort to cut Federal housing assistance expenditures. Mr. President, if ever a bill deserved defeat, this one does.

Mr. President, I should like to outline some of the more egregious features of this legislation.

The community development block grant program was developed in 1974 to simplify our delivery of community revitalization funds. It has enjoyed wide support from those on the local level who put it to use. The program represents a careful fusion of local flexibility and the advancement of broad national objectives. The bill, in my view, would rip this structure apart, overloading the program with local flexibility at the same time that it overturns the Federal Government's responsibility to see that the program, in the interests of all taxpayers, truly accomplishes its objectives. The bill would deny citizens meaningful participation in the development of local block grant programs.

It would blur the program's present focus on low- and moderate-income persons, and it would reduce the ability of the Federal Government to monitor and guide the program's operations. The committee's rewriting of the program was based on the majority's unhappiness over the regulatory burdens that it perceives the present law places on localities. However, it should be pointed out that to the extent the program creates unwarranted regulatory requirements for communities, they result from the administration of the statutes. It would make more sense for the administration to provide regulatory relief by overhauling its own procedures that created the burdens in the first place.

It is especially ironic that while the bill purports to act in the interest of localities, the representatives of those localities in Washington have urged the committee not to change the program as the bill has proposed. These representatives, as well as committee members, had virtually no opportunity to examine and assess the proposed changes, since the administration's recommendations appeared at the committee the night before the HUD Secretary and public witnesses were scheduled to testify on the administration's 1981 housing and community development legislation. Moreover, the committee rushed to markup the proposed revisions within days of their submission by the administration. I cannot believe that such hasty, unconsidered action furthers the administration's stated goal of more deliberate, efficient Government. To the contrary, the bill almost invites communities to disregard the program's fundamental purposes in their use of program funds. After all, if the Federal Government is willing to scrap provisions designed to promote proper use of the funds, we can expect communities to draw a most unfortunate conclusion—that the Federal Government is losing its interest in overseeing this program, that the Federal Government does not really care whether the program goes to aid the poor or to upgrade distressed neighborhoods.

Ironically, a recent General Accounting Office report provides clear evidence that the program, as it is now, is too loosely monitored, and that funds are being diverted to highly questionable public purposes including ice skating and music lessons and rehabilitation assistance for persons with upper incomes. In the face of this criticism, and the GAO's specific recommendations for tightening the program's protections against waste, the administration and the committee majority would tear down these protections. For an administration so publicly committed to rooting out waste and fraud in Federal programs, the proposed revisions of the block grant program, which the committee adopted constitutes an act of bad faith.

Mr. President, what this bill does to the community development block grant program would be reason enough to oppose it. But, in moving from title I to title II, which deals with housing assistance programs. the bill goes from bad to worse. This bill lashes out at the poor. It punishes the poor as if being poor is not punishment enough.

It lowers the weight of our budget cutting exercise on the backs of those least able to bear the load. In approving for fiscal year 1982 a housing assistance level of only 150,000 section 8 and public housing units, some 25.000 units below that proposed by the President, and 60,000 units below that authorized for fiscal year 1981, the bill signals the virtual end of the Federal Government's commitment to better, more affordable housing for low-income persons. High interest rates have almost totally choked off private apartment construction, and the housing stock is suffering a net loss of as many as 300,000 multifamily units a year to conversion, abandonment, deterioration, and demolition. The bill will do nothing to bridge the growing gap between the amount of housing we need and what we are actually producing.

Not content to chop away housing assistance, the bill also seeks to soak the poor with additional rent. Under current law, assisted housing tenants pay 25 percent of their income toward the rent. The bill would raise that contribution to 30 percent. Almost one-third of a low-income person's income would go for rent. We can imagine how this kind of burden would bust the budgets of low-income people forcing them to make cruel choices among basic needs.

The bill's supporters claim that this increase in rents is necessary to promote greater equity between those few in assisted housing who enjoy a much lower rent obligation than the many who have equally low incomes but who do not live in assisted housing. Frankly, I fail to see how an increase in rent contributions for assisted housing tenants translates into any benefit at all for those currently unassisted. Unassisted tenants would continue to pay very high rents, or live in substandard housing, while those in section 8 or public housing projects would receive a jump in their rents. Equity would be better served if we expand the amount of assistance to those in need, rather than heaping more hardship on those we are now assisting.

The bill also attempts to inject the Federal Government into the issue of local rent controls by withholding section 8 new construction funds from localities with rent controls on new and vacant multifamily units. Not only is this an unwarranted intrusion by the Federal Government into local prerogatives, but it uses the poor as a lever to enforce a Federal policy preference. Rent controls are usually imposed after a great deal of public debate, sometimes bitter debate, and in response to serious housing shortages and climbing rents. We can hardly expect a community to reopen this debate just to secure a few section 8 units.

The provision also imposes the restriction immediately upon enactment, thereby applying the sanctions before communities have had a chance to take the action that the bill contemplates. Considering that it takes some time to adopt rent controls, especially in localities that approve them through referendum, we can expect that it would take some time to remove them. The bill fails to take this important fact into account.

The provision has other serious flaws in concept as well as in application. Its supporters contend that rent controls inhibit new apartment construction, and therefore to provide section 8 assistance to these communities would in effect bail them out of troubles that they have caused for themselves. Section 8 subsidizes too few new units to have any measurable impact on housing supply in individual communities. Thus, in no way can section 8 new construction allocations be considered a bail out for communities with housing shortages. Moreover, even if the removal of rent controls spurs the construction of multifamily projects, this rebirth of production would not mean greater construction of rental housing for low-income people. Rather, the increase in production would only affect apartments for middle- and upper-income renters. This is because local rent controls apply to private, unsubsidized construction, not to projects carrying a Federal subsidy.

Since virtually all low-income housing produced today is federally subsidized, not subject to local rent controls, the bill's antirent control provision would hold the poor hostage to effect a change that can only inure to the direct benefit of middle- or upper-income renters. There is great danger, as well, that when communities with rent controls realize that it is possible for them to keep out new section 8 projects and still receive community development block grants, they may find it in their interest to retain their controls.

Mr. President, this bill stands in stark contrast to the law's long-term commitment to decent affordable housing for our people. It stands as an example of how we have truly failed to honor that commitment. It seems to me that we would be better off to defeat this bill and seek the necessary reauthorizations and program extensions in some other manner. I urge the Senate to take this action.●

● Mr. GARN. Mr. President, last year at this time the Senate was considering the Housing and Community Development Act of 1980, and title V of that act contained national legislation for tenants in condominiums or cooperatives undergoing conversions, and legislation designed to provide judicial relief for Florida condominium owners subject to recreational leases containing automatic rental increase clauses.

While I did not oppose those provisions, enacted last year, to provide some judicial relief for holders of long recreational leases which were found by the courts to be unconscionable, I did object to the beginnings of Federal Government intervention into local condominium conversion matters.

I continue to believe that Federal regulation of condominium and cooperative conversion activity is both inappropriate and unwarranted. It is inappropriate because conversion related problems vary significantly between housing markets, and thus cannot be solved by one, uniform national law. Unlike a national law, local conversion legislation can be designed to suit the individual characteristics of local housing conditions, which differ according to rental vacancy rates, trends in the rental market, and the percentage, ages, and incomes of displaced tenants.

Local conversion regulation can be sensitive to housing priorities and policies of the community, including the decision to discourage or assist condominium conversion activity. Conditions in New York are not the same as conditions elsewhere, and require a different legislative approach best determined at the local level.

In short, controls over the conversion of rental housing to condominium ownership, and consumer protection for ten-

ants in converting housing, may be enacted by local governments to achieve a variety of public purposes, specific objectives, and priorities of the community. These public policy decisions critically affect local housing goals and should not be made by Congress.

Furthermore, Federal regulation of condominium conversions is unwarranted and ill-advised where State and local governments are responding to the need for conversion legislation. To date, an estimated 100 to 200 State and local governments have specifically responded to the recent acceleration of conversion activity in their communities with conversion legislation.

According to a survey by the National Multi-Housing Council on the status of current laws and legislative activities affecting condominium and cooperative housing, as of January 31, 1981, 25 States have enacted laws to regulate condominium conversions, not including regulations in the District of Columbia. Several of those States have passed, or have pending for consideration in the State legislatures, the comprehensive Uniform Condominium Act.

Where States have not adopted condominium statutes at the State level, often their larger metropolitan areas have adopted legislation at the local level. I am attaching a list of those States, and local jurisdictions, which have passed or are considering legislation concerning condominium and cooperative laws as completed by the Council.

Clearly, States and local jurisdictions are actively examining the need for condominium legislation, and are fashioning their legislative responses to meet special community housing needs and goals.

When the Senate passed title V last year, we unfortunately acted without the benefit of an extensive study by the Department of Housing and Urban Development documenting comprehensive information on condominium and cooperative conversions. I would briefly like to point out some of the findings of that study which strongly suggest that legislation regulating condominium conversions is unjustified. For example:

The HUD study found that condominium conversions have not taken place on a large scale, nationwide, and that they have not had a great impact on the rental market. Far from being a significant factor in the national rental housing shortage, the study found that at the end of 1979, only 1.3 percent of the Nation's occupied rental housing stock had been converted.

The HUD study laid to rest the myth that there is a significant displacement problem with former tenants in condominium conversions. HUD found that the amount of displacement in all households was equal to 10 percent of those who resided in converted buildings prior to conversion. HUD also found that 90 percent of all former residents indicated that they were satisfied with their new condominium housing.

Most importantly, the HUD study confirmed that condominium conversions are a local phenomena, and that State and local governments have responded to conversion-related problems. According to the study, conversion activity has been concentrated in the larger metropolitan areas, and 76 percent of all conversions have occurred in the largest 37 SMSA's. As a matter of fact, 59 percent of that activity has taken place in just 12 of those areas. This finding, which came too late for Banking Committee consideration last year, clearly portrays conversions as a local, and not a national activity, therefore, requiring local, not national, regulation. As previously noted in my remarks, many of the States and local jurisdictions have passed statutes and ordinances providing protections for tenants and buyers in converted condominiums. Regarding this local legislation, the study states that the larger jurisdictions and those with more conversions are more likely to adopt condominium conversion legislation.

Mr. President, I am happy to report that in last year's housing conference the conferees wisely chose to abandon the Senate's condominium conversion protections, in favor of a sense of the Congress resolution which was devoid of legislative effect. I am sorry to have learned that that resolution is being misused.

This resolution imposes no affirmative obligations upon the Federal financial regulatory agencies. It merely expresses the sense of the Congress discouraging federally insured lenders from financing those condominium conversions which will adversely impact on the housing opportunities of low and moderate income, elderly, and handicapped tenants. According to the Parliamentarian. a sense of the Congress resolution imposes no legislative duties nor does it embody affirmative legislation.

I believe that the history of the aborted condominium conversion legislation demonstrates that the conferees flatly and unequivocally rejected any Federal role in regulating conversion activity. The findings of the HUD study have supported the wisdom of that decision. I would hope that these actions would put to rest any call for more Federal Government regulation in an area which is so clearly a local matter.

CONDOMINIUM CONVERSION (AS OF JANUARY 31, 1981)

The following States have enacted or have pending legislation concerning condominium conversion. The municipalities listed after each State have specific laws regulating condo conversion (UCA) Uniform Condominium Act.

Arizona.

California: over 20 communities and several counties in CA have adopted some form of conversion ordinances.

Colorado: Boulder.

Connecticut: Hartford.

Delaware: Wilmington.

District of Columbia.

Florida.

Georgia: Atlanta.

Illinois: Considering UCA—Calumet, Chicago, Elkgrove Village, Evanston, and Skokie.

Indiana: No state law but ordinances in Indianapolis.

Iowa: Pending legislation.

Kentucky: Louisville—pending legislation.

Maine: introduced legislation—Maine Condominium Act.

Maryland: Montgomery County.

Massachusetts: Seven bills introduced 1981—Acton, Boston, Brookline—on appeal, Framingham, Lowell, Quincy, Salem, and Somerville—regulations under consideration.

Michigan.

Minnesota: Adopted UCA 1980—Minneapolis, Wayzata, and St. Paul.

Mississippi: Introduced legislation consistent with UCA in January 1981.

Nevada: Reno.

New Hampshire.

New Jersey: Bills pending in 1981 session in addition to an already strict state law.

New York: Bills pending in addition to state law New York City.

North Carolina: State legislature Drafting Committee is compiling recommendations to present to the next session of the N.C. General Assembly re condo conversion regulation and moratoriums.

Ohio: Lakewood, Lyndhurst—suburbs of Cleveland.

Oregon: Portland.

Pennsylvania: Adopted revised version of UCA in July 1980.

Rhode Island: Bills introduced in the 1980 session died in committee.

Tennessee.

Utah: Pending Legislation.

Vermont: UCA passed in 1980 but later killed in the Senate. Reintroduced in 1981.

Virginia.

Washington: State buyer protection. Tenant protection in: Everett, King County, Lynwood, Mercer Island, Redmond, and Seattle.

West Virginia: UCA passed in 1980.

Wisconsin: Tenant protection with additional legislation pending.

STATES WITH CONDO BUYER PROTECTION REGULATIONS:

Hawaii. Louisiana, Maine, Montana, and South Dakota.

In all, 25 states have enacted laws to regulate condominium conversions not including regulations in the District of Columbia.●

● Mr. DODD. Mr. President, I intend to oppose final passage of S. 1197, the Housing and Community Development Amendments of 1981. I do so reluctantly, because I believe this legislation contains several positive proposals and represents the best efforts of the committee working within the time constraints imposed by the May 15 reporting deadline. I want to commend the chairman of the full committee (Mr. GARN) and the chairman of the Subcommittee on Housing and Urban Affairs (Mr. LUGAR) for the accommodations extended to this Senator during consideration of this bill in committee and before the full Senate. I appreciate particularly the majority's commitment, extended during committee markup, to conduct hearings on the demonstration housing development loan program I introduced. I believe it is essential that the committee move expeditiously to address current and emerging housing policy issues in an innovative manner.

Mr. President, in committee and on the floor I have opposed specific provisions of this legislation and questioned others. Taken as a whole, this bill represents undesirable changes in the Nation's housing, community and economic development policies. It represents a failure to maintain current efforts and instead signals a retreat from our commitment to the housing needs of lower- and moderate-income families and older Americans. At a time when our housing

needs are far exceeding our ability to meet those needs, I fear that this bill will be seen as a retrenchment in our historic commitment to the principle established in the landmark 1949 Housing Act of "a decent home and suitable living environment for every American family."

The committee bill provides for only 150,000 new assisted housing unit reservations in the coming fiscal year, reduces the eligibility for assisted housing from 80 to 50 percent of median income, and increases the percentage of income which beneficiaries of assistance must contribute toward rent. In addition, an increasing proportion of assisted housing activity would be directed for income subsidies in connection with existing units, rather than for urgently needed new housing construction or the substantial rehabilitation of this Nation's substandard housing stock.

Those who argue that the committee bill reflects the budget constraints approved by the Senate majority are right, but they suffer from the same shortsightedness that produced those constraints and took almost 20 percent of the total budget cuts from housing programs. I submit that in the consideration of individual authorization and appropriations legislation we will have the opportunity to reorder priorities stated in the current budget while remaining within the already approved overall constraints on budget authority and outlays. In reordering individual program assumptions, both within this bill and the budget as a whole, we have the opportunity to state a sense of priorities which respond adequately to basic human needs and produce cost-effective, productive investments.

The housing needs of the American people will not abate or disappear because we have redefined them in this legislation. In fact, we have fallen far short of meeting the housing needs of our lower income citizens and increasing housing costs have placed moderate income, working families among those unable to afford adequate housing.

In 1973, the Nixon administration imposed a moratorium on new assisted housing activity. Not only did this action freeze all efforts to meet increasing housing needs, but it destroyed the capacity of government and the private sector to later implement new program directions. I submit that the funding levels in this bill move us dangerously close to another moratorium that would cripple all efforts to address current and future housing policy issues.

Where is the so-called safety net for lower income families without sufficient income to afford decent shelter at an affordable cost? How long will lower and moderate income working families wait for lower interest rates and promised increases in production? Will we be able to afford to produce the needed level of housing at future costs? And, most importantly, will anyone be left behind to build this housing?

Mr. President, if Connecticut received each of the 150,000 new housing units contained in this bill the current demand for housing would still not be met. According to the State Department of Housing, 173,000 households in Connecticut currently need assistance either because their current dwellings are substandard or too expensive. This need must be addressed before we can begin to focus on the 20,000 units the same department estimates will be needed annually to meet the demands of the immediate future.

By rejecting this bill, we can go back to committee and in a more deliberate and thoughtful manner consider how we can proceed with this task of demonstrating progress in response to these conditions. We can send a signal that it is possible to live within the overall budget requirements and still exhibit compassion and a true sense of priorities in support of basic human needs. If current programs are flawed, let us get about the business of establishing a more sound base for the future. We cannot afford this bill or any other like it that sacrifices the future for limited short-term savings and ignores the basic needs of the American people.●

● Mr. MOYNIHAN. Mr. President, the Housing and Community Development Amendments of 1981 contain a number of provisions that would, if enacted, be disastrous for those with low incomes and for communities throughout the country.

The bill includes language introduced by Senators ARMSTRONG and D'AMATO to deny Federal housing assistance to communities with rent control ordinances. That rent control is desirable is a policy judgment with which many may disagree and some do; what few can question is that local ordinances are none of the Federal Government's business. Rent control and rent stabilization are the quintessence of local issues. Had this amendment been proposed and accepted by a Democratic majority, it would have been decried as a wholly improper and unacceptable instance of Federal intrusion, overregulation and paternalism. That it has Republican sponsorship does not make it more appropriate.

In fact, this is the position taken by the Reagan administration, which opposes the rent control provisions of this bill. On March 5, OMB Director David Stockman told the House Banking Committee that penalizing communities with rent control "is the kind of meddling that could only compound local meddling that caused rent controls in the first place." On March 18, HUD Secretary Samuel Pierce told the House Subcommittee on Housing and Community Development that "rent control should be determined by the localities." And on May 7, White House spokesman Larry Speakes told reporters that President Reagan feels that "the Federal Government should stay out of the business of rent control."

To support this bill would be to participate in the federalization of the issue of rent control. In what can only be termed a power grab by Washington, a fresh example of the classic pattern of intruding the purportedly superior wisdom of Federal officials into what has heretofore been left to governments closest to the people.

There are additional problems with this bill. It would raise the percentage of income paid as rent by low-income tenants in assisted housing from 25 to 30 percent. Thirty percent of income may represent a significantly lower rental than is available in the private housing market. But for those tenants now living in an assisted unit, it is a rent increase, pure and simple. A rent increase that will take $1.72 billion from low-income renters over the next 5 years. From precisely those people whose incomes are already too small to insure that all necessities can be obtained. From families which are already hard pressed to pay 25 percent of income for rent. This is no better than government-sponsored inflation for those people suffering worst from the inflation that this Government cannot seem to cure.

The bill would lift many important provisions governing the Community Development Block Grant (CDBG) program. Not all provisions, but only those designed to insure that low- and moderate-income areas benefit from the funds. The bill eliminates the requirement that funds be targeted to low- or moderate-income neighborhoods. It repeals the citizen participation requirements, which have given low-income area residents some control over development in their neighborhoods. These changes seriously hamper the program's ability to help rehabilitate low- and moderate-income areas, which was the original intent behind CDBG. It has operated effectively and should not be changed in this fashion.

This bill makes changes that are bad government and bad social policy. I cannot support it and I will not vote for it. It is one thing to curtail Government programs. It is quite a different thing to do so in a way that most hurts the least fortunate. And it would be unconscionable to support a bill that predicates receipt of Federal funds upon a certain type of local behavior. The rent control language is an attempt to punish cities that behave in a certain way and by creating the threat of punishment, causing those cities to change their behavior. If the Senate acts affirmatively on this bill, I will take my fight against the rent control language to conference and will, if necessary, resume it when the final version of the bill comes before the Senate. It can and must be defeated.●

The PRESIDING OFFICER. The bill is open to further amendment. If there be no further amendment to be proposed, the question is on the engrossment and third reading of the bill.

The bill was ordered to be engrossed for a third reading and was read the third time.

The PRESIDING OFFICER. The bill having been read the third time, the question is, Shall it pass? The yeas and nays have been ordered. The clerk will call the roll.

The assistant legislative clerk called the roll.

Mr. STEVENS. I announce that the Senator from Florida (Mrs. HAWKINS), the Senator from Maryland (Mr. MATHIAS), the Senator from Georgia (Mr. MATTINGLY), the Senator from Texas (Mr. TOWER), the Senator from Wyoming (Mr. WALLOP), and the Senator

from South Dakota (Mr. ABDNOR) are necessarily absent.

I further announce that, if present and voting, the Senator from Texas (Mr. TOWER), the Senator from Wyoming (Mr. WALLOP), and the Senator from Florida (Mrs. HAWKINS) would each vote "yea."

Mr. CRANSTON. I announce that the Senator from Virginia (Mr. HARRY F. BYRD, JR.), the Senator from South Carolina (Mr. HOLLINGS), the Senator from Ohio (Mr. METZENBAUM), and the Senator from Massachusetts (Mr. KENNEDY) are necessarily absent.

I also announce that the Senator from Georgia (Mr. NUNN) is absent attending the funeral of former Congressman Carl Vinson.

The PRESIDING OFFICER. Are there any other Senators in the Chamber who wish to vote?

The result was announced—yeas 65, nays 24, as follows:

[Rollcall Vote No. 138 Leg.]

YEAS—65

Andrews	Garn	Nickles
Armstrong	Glenn	Packwood

Hawkins	Mathias	Tower
	Mattingly	Wallop

So the bill (S. 1197) was passed, as follows:

S. 1197

An act to amend and extend certain Federal laws relating to housing, community, and economic development, and related programs, to provide an improved and expedited multifamily mortgage foreclosure procedure, and for other purposes

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled, That this Act may be cited as the "Housing and Community Development Amendments of 1981".

TABLE OF CONTENTS

TITLE I—COMMUNITY AND ECONOMIC DEVELOPMENT

Sec. 101. Authorizations.
Sec. 102. Statement of activities and review.
Sec. 103. Eligible activities.
Sec. 104. Allocation and distribution of funds.
Sec. 105. Discretionary fund.
Sec. 106. Nondiscrimination.
Sec. 107. Transitional provisions.
Sec. 108. Urban development action grants.
Sec. 109. Rehabilitation loans.
Sec. 110. Urban homesteading.
Sec. 111. Repealers.
Sec. 112. Technical amendments.
Sec. 113. Report on block grant program.

TITLE II—HOUSING ASSISTANCE PROGRAMS

Sec. 201. Housing authorizations.
Sec. 202. Tenant rental payments.
Sec. 203. Cost reduction in assisted housing.
Sec. 204. Redirection of economic mix policy.
Sec. 205. Miscellaneous housing assistance amendments.
Sec. 206. Rent supplements.
Sec. 207. Disposal of HUD-owned projects.
Sec. 208. Section 235 amendments.
Sec. 209. Restriction on use of assisted housing.
Sec. 210. Payment for development managers.
Sec. 211. Review of operating subsidy formula; feasibility study.
Sec. 212. Energy efficiency efforts.
Sec. 213. Recognition of Kansas Department of Economic Development.

TITLE III—PROGRAM AMENDMENTS AND EXTENSIONS

Sec. 301. Extension of Federal Housing Administration mortgage insurance programs.
Sec. 302. Extension of flexible interest rate authority.
Sec. 303. Research authorizations.
Sec. 304. Federal Housing Administration general insurance fund.
Sec. 305. Property improvement and manufactured home loans.
Sec. 306. Increase in maximum loan limit for manufactured home parks; manufactured home condominiums.
Sec. 307. Homeowner counseling.
Sec. 308. Technical amendments.
Sec. 309. Flood insurance.
Sec. 310. Riot and crime insurance.
Sec. 311. Neighborhood Reinvestment Corporation.
Sec. 312. National Institutes of Building Sciences.
Sec. 313. Model zoning code.
Sec. 314. Lower cost technology.
Sec. 315. Compilation of basic laws.
Sec. 316. Usury provision.
Sec. 317. National Consumer Cooperative Bank.
Sec. 318. Recision of 1981 authority.
Sec. 319. Mortgage insurance for hospitals.

TITLE IV—MULTIFAMILY MORTGAGE FORECLOSURE

Sec. 401. Short title.
Sec. 402. Findings and purpose.
Sec. 403. Definitions.
Sec. 404. Mortgages subject to Act.
Sec. 405. Designation of foreclosure commissioner.
Sec. 406. Prerequisites to foreclosure.
Sec. 407. Notice of default and foreclosure sale.
Sec. 408. Commencement of foreclosure.
Sec. 409. Service of notice of default and foreclosure sale.
Sec. 410. Presale reinstatement.
Sec. 411. Conduct of sale; adjournment.
Sec. 412. Foreclosure costs.
Sec. 413. Disposition of sale proceeds.
Sec. 414. Transfer of title and possession.
Sec. 415. Record of foreclosure and sale.
Sec. 416. Computation of time.
Sec. 417. Separability.
Sec. 418. Regulations.

TITLE V—RURAL HOUSING

Sec. 501. Authorizations.
Sec. 502. Definition of low income.
Sec. 503. Interest subsidy program.
Sec. 504. Reports.

TITLE I—COMMUNITY AND ECONOMIC DEVELOPMENT

AUTHORIZATIONS

SEC. 101. Section 103 of the Housing and Community Development Act of 1974 is amended to read as follows:

"AUTHORIZATIONS

"SEC. 103. The Secretary is authorized to make grants to States, units of general local government, and Indian tribes to carry out activities in accordance with the provisions of this title. There are authorized to be appropriated for these purposes not to exceed $4,166,000,000 for each of the fiscal years 1982 and 1983. Sums appropriated pursuant to this section shall remain available until expended.".

STATEMENT OF ACTIVITIES AND REVIEW

SEC. 102. (a) The caption of section 104 of the Housing and Community Development Act of 1974 is amended to read as follows: "STATEMENT OF ACTIVITIES AND REVIEW".

(b) Subsections (a), (b), and (c) of section 104 of such Act are amended to read as follows:

"(a)(1) Prior to the receipt in any fiscal year of a grant under section 106 by any metropolitan city or urban county, under section 106(d) by any State, or under section 106(d)(2)(B) by any unit of general local government, the grantee shall have prepared a final statement of community development objectives and projected use of funds and shall have provided the Secretary with the certifications required in subsection (b) and, where appropriate, subsection (c). In the case of metropolitan cities and urban counties receiving grants pursuant to section 106(b) and in the case of units of general local government receiving grants pursuant to section 106(d)(2)(B), the statement of projected use of funds shall consist of proposed community development activities. In the case of States receiving grants pursuant to section 106(d), the statement of projected use of funds shall consist of the method by which the States will distribute funds to units of general local government.

"(2) In order to permit public examination and appraisal of such statements, to enhance the public accountability of grantees, and to facilitate coordination of activities with different levels of government, the grantee shall—

"(A) furnish citizens information concerning the amount of funds available for proposed community development and housing activities and the range of activities that may be undertaken,

"(B) publish a proposed statement in such manner to afford affected citizens or, as appropriate, units of general local government an opportunity to examine its content and to submit comments on the proposed statement and on the community development performance of the grantee, and

"(C) hold one or more public hearings to obtain the views of citizens on community development and housing needs.

In preparing the final statement, the grantee shall consider any such comments and views and may, if deemed appropriate by the grantee, modify the proposed statement. The final statement shall be made available to the public, and a copy shall be furnished to the Secretary together with the certifications required under subsection (b) and, where appropriate, subsection (c).

"(b) Any grant under section 106 shall be made only if the grantee certifies to the satisfaction of the Secretary that—

"(1) the grantee is in full compliance with the requirements of subsection (a)(2)(A), (B), and (C), and has made the final statement available to the public;

"(2) the grant will be conducted and ad-

ministered in conformity with Public Law 88-352 and Public Law 90-284;

"(3) the projected use of funds has been developed so as to give maximum feasible priority to activities which will benefit low- and moderate-income families or aid in the prevention or elimination of slums or blight; the projected use of funds may also include activities which the grantee certifies are designed to meet other community development needs having a particular urgency because existing conditions pose a serious and immediate threat to the health or welfare of the community where other financial resources are not available to meet such needs; and

"(4) the grantee will comply with the other provisions of this title and with other applicable laws.

"(c)(1) Any grant made under section 106(b) shall be made only if the unit of general local government certifies that it is following a current housing assistance plan which has been approved by the Secretary and which—

"(A) accurately surveys the condition of the housing stock in the community and assesses the housing assistance needs of lower income persons (including elderly and handicapped persons, large families, owners of homes requiring rehabilitation assistance, and persons displaced or to be displaced) residing in or expected to reside in the community as a result of existing or projected changes in employment opportunities and population in the community and its surroundings (and those elderly persons residing in or expected to reside in the community), or as estimated in a community accepted State or regional housing opportunity plan approved by the Secretary, and identifies housing stock which is in a deteriorated condition, including the impact of conversion of rental housing to condominium or cooperative ownership on such needs;

"(B) specifies a realistic annual goal for the number of dwelling units or lower income persons to be assisted, including (i) the relative proportion of new, rehabilitated, and existing dwelling units, including existing rental and owner occupied dwelling units to be upgraded and thereby preserved, (ii) the sizes and types of housing projects and assistance best suited to the needs of lower income persons in the community, and (iii) in the case of subsidized rehabilitation, adequate provisions to assure that a preponderance of persons assisted should be of low and moderate income; and

"(C) indicates the general locations of proposed housing for lower income persons, with the objective of (i) furthering the revitalization of the community, including the restoration and rehabilitation of stable neighborhoods to the maximum extent possible, and the reclamation of the housing stock where feasible through the use of a broad range of techniques for housing restoration by local government, the private sector, or community organizations, including provision of a reasonable opportunity for tenants displaced as a result of such activities to relocate in their immediate neighborhood, (ii) promoting greater choice of housing opportunities and avoiding undue concentrations of assisted persons in areas containing a high proportion of low-income persons, and (iii) assuring the availability of public facilities and services adequate to serve proposed housing projects.

"(2) The Secretary shall establish such dates and manner for the submission of housing assistance plans described in paragraph (1) as the Secretary may prescribe.".

(c)(1) Section 104(d) of such Act is amended to read as follows:

"(d) Each grantee shall submit to the Secretary, at a time determined by the Secretary, a performance report concerning the use of funds made available under section 106, together with an assessment by the grantee of the relationship of such use to the objectives identified in the grantee's statement under subsection (a). The Secretary shall, at least on an annual basis, make such reviews and audits as may be necessary or appropriate to determine—

"(1) in the case of grants made under section 106(b) or section 106(d)(2)(B), whether the grantee has carried out its activities and, where applicable, its housing assistance plan in a timely manner, whether the grantee has carried out those activities and its certifications in a manner which is not plainly inconsistent with the requirements of this title, the primary objectives of this title, and other applicable laws, and whether the grantee has a continuing capacity to carry out those activities in a timely manner; and

"(2) in the case of grants to States made under section 106(d), whether the State has distributed funds to units of general local government in a timely manner and in conformance to the method of distribution described in its statement, whether the State has carried out its certifications in compliance with the requirements of this title and other applicable laws, and whether the State has made such reviews and audits of the units of general local government as may be necessary or appropriate to determine whether they have satisfied the applicable performance criteria described in paragraph (1) of this subsection.

The Secretary may make appropriate adjustments in the amount of the annual grants in accordance with the Secretary's findings under this subsection. With respect to assistance made available under section 106(d), the Secretary may provide such assistance directly to the units of general local government, or adjust, reduce, or withdraw such assistance, or take other action as appropriate in accordance with the Secretary's reviews and audits under this subsection, except that funds already expended on eligible activities under this title shall not be recaptured or deducted from future assistance to such units of general local government.".

(2) The amendment made by paragraph (1) shall take effect on October 1, 1982.

(d) Section 104 of such Act is amended by striking out subsections (e) and (f) and redesignating subsections (g), (h), (i), and (j) as subsections (e), (f), (g), and (h).

(e) Section 104(f) of such Act, as redesignated by subsection (d) of this section, is amended—

(1) by striking out "applicants" in paragraph (1) and inserting in lieu thereof "recipients of assistance under this title";

(2) by striking out "applicant" wherever it appears and inserting in lieu thereof "recipient of assistance under this title";

(3) by striking out "applications and" in the last sentence of paragraph (2); and

(4) by adding the following new paragraph at the end thereof:

"(4) In the case of grants made to States pursuant to section 106(d), the State shall perform those actions of the Secretary described in paragraph (2) and the performance of such actions shall be deemed to satisfy the Secretary's responsibilities referred to in the second sentence of such paragraph.".

(f) Section 104(g) of such Act, as redesignated by subsection (d) of this section, is amended—

(1) by striking out paragraph (1) and inserting in lieu thereof the following:

"(1) Units of general local government receiving assistance under this title may receive funds, in one payment, in an amount not to exceed the total amount designated in the grant (or, in the case of a unit of general local government receiving a distribution from a State pursuant to section 106(d), not to exceed the total amount of such distribution) for use in establishing a revolving loan fund which is to be established in a private financial institution and which is to be used to finance rehabilitation activities assisted under this title. Rehabilitation activities authorized under this section shall begin within 45 days after receipt of such payment."; and

(2) by striking out the last two sentences of paragraph (2).

ELIGIBLE ACTIVITIES

SEC. 103. (a) Section 105(a) of the Housing and Community Development Act of 1974 is amended—

(1) by striking out paragraph (8) and inserting in lieu thereof the following:

"(8) provision of public services, including but not limited to those concerned with employment, crime prevention, child care, health, drug abuse, education, energy conservation, welfare or recreation needs, if such services have not been provided by the unit of general local government (through funds raised by such unit, or received by such unit from the State in which it is located) during any part of the twelve-month period immediately preceding the date of submission of the statement with respect to which funds are to be made available under this title, and which are to be used for such services, unless the Secretary finds that the discontinuation of such services was the result of events not within the control of the unit of general local government except that not more than 10 per centum of the amount of any assistance to a unit of general local government under this title may be used for activities under this paragraph;"; and

(2) by striking out "and" at the end of paragraph (15);

(3) by striking out the period at the end of paragraph (16) and inserting in lieu thereof "; and"; and

(4) by adding at the end thereof the following new paragraph:

"(17) provision of assistance to private, for-profit entities, when the assistance is necessary or appropriate to carry out an economic development project.".

(b) In fiscal years 1982, 1983, and 1984 the Secretary may waive the limitation on the amount of funds which may be used for public services activities under section 105(a)(8) of the Housing and Community Development Act of 1974, as amended by this Act, in the case of a unit of general local government which, during fiscal year 1981, allocated more than 10 per centum of funds received under title I of the Housing and Community Development Act of 1974 for such activities.

ALLOCATION AND DISTRIBUTION OF FUNDS

SEC. 104. (a) Section 106(a) of the Housing and Community Development Act of 1974 is amended to read as follows:

"(a) Of the amount approved in an appropriation Act under section 103 for grants in any year (excluding the amounts provided for use in accordance with section 107 and section 119), 70 per centum shall be allocated by the Secretary to metropolitan cities and urban counties. Except as otherwise specifically authorized, each metropolitan city and urban county shall be entitled to an annual grant from such allocation in an amount not exceeding its basic amount computed pursuant to paragraph (1) or (2) of subsection (b).".

(b) Section 106 of such Act is amended by striking out subsection (c) and redesignating subsections (d), (e), (f), and (g) as subsections (c), (d), (e), and (f), respectively.

(c) Section 106(c), as redesignated by subsection (b) of this section, is amended to read as follows:

"(c) Any amounts allocated to a metropolitan city or urban county pursuant to the preceding provisions of this section which are not received by the city or county for a fiscal year or which become available as a result of actions under section 104(d) or section 111

shall be reallocated in the succeeding fiscal year among the metropolitan cities and urban counties of the same State on the basis of a formula under which the amount reallocated to each such city or county bears the same ratio to the total amount reallocated to the metropolitan cities and urban counties within that State as the ratio which the amount allocated to that city or county pursuant to the preceding provisions of this section bears to the total amount allocated to the metropolitan cities and urban counties within that State.".

(d) Section 106(d)(1) of such Act, as redesignated by subsection (b) of this section, is amended—

(1) by striking out "section 103(a)" and all that follows through "nonmetropolitan areas of each State" in the first sentence and inserting in lieu thereof the following: "section 103 for grants in any year (excluding the amounts provided for use in accordance with section 107 and section 119), 30 per centum shall be allocated among the States for use in nonentitlement areas. The allocation for each State shall be"; and

(2) by striking out "nonmetropolitan" wherever it appears and inserting in lieu thereof "nonentitlement".

(e) Section 106(d) of such Act, as redesignated by subsection (b) of this section, is amended by striking out paragraphs (2) and (3) inserting in lieu thereof the following:

"(2)(A) Amounts allocated under paragraph (1) shall be distributed to units of general local government located in nonentitlement areas of the State to carry out activities in accordance with the provisions of this title—

"(i) by the State, consistent with the statement submitted under section 104(a); or

"(ii) by the Secretary, in any case described in subparagraph (B), for use by units of general local government in accordance with paragraph (3)(B).

"(B) The Secretary shall distribute amounts allocated under paragraph (1) where—

"(i) the State has elected, in such manner and before such time as the Secretary may prescribe, not to distribute such amounts;

"(ii) the State has failed to submit the certifications described in subparagraph (C); or

"(iii) such action is necessary as a result of findings and actions taken pursuant to section 104(d).

"(C) To receive and distribute amounts allocated under paragraph (1), the Governor must certify that the State—

"(i) engages or will engage in planning for community development activities;

"(ii) provides or will provide technical assistance to units of general local government in connection with community development programs;

"(iii) will provide, out of State resources, funds for community development activities in an amount which is at least 10 per centum of the amounts allocated for use in the State pursuant to paragraph (1); and

"(iv) has consulted with local elected officials from among units of general local government located in nonentitlement areas of that State in determining the method of distribution of funds required by subparagraph (A).

"(3)(A) If the State receives and distributes such amounts, it shall be responsible for the administration of funds so distributed. Such amounts may not be used for administrative expenses incurred by the State in carrying out its responsibilities under this title.

"(B) If the Secretary distributes such amounts, the distribution shall be made in accordance with determinations of the Secretary pursuant to statements submitted and the other requirements of section 104 (other than subsection (c)) and in accordance with regulations and procedures prescribed by the Secretary.

"(C) Any amounts allocated for use in a State for a fiscal year which are not received by that State or the units of local government of that State or which become available as a result of actions taken under section 104(d) or 111 shall be added to amounts available for use in that State in the succeeding fiscal year. Any amounts which are or become available in any case described in paragraph (2)B)(i) shall be available for use within the State to which the amounts were allocated.

"(4) In computing amounts under paragraph (1), Indian tribes shall be excluded.".

(f) Section 106(f), as redesignated by subsection (b) of this section, is amended by striking out "(1)" and all that follows through "106(e)" and inserting in lieu thereof "all basic grant entitlement amounts".

(g) Section 102(a)(4) of such Act is amended by inserting before the period at the end thereof the following: ", or until September 30, 1982, whichever is later".

DISCRETIONARY FUND

SEC. 105. Subsections (a), (b), and (c) of section 107 of the Housing and Community Development Act of 1974 are amended to read as follows:

"(a) Of the total amount approved in appropriation Acts under section 103 for each of the fiscal years 1982 and 1983, not more than $60,000,000 for each of the fiscal years 1982 and 1983 may be set aside in a special discretionary fund for grants under subsection (b). Grants under this section are in addition to any other grants which may be made under this title to the same entities for the same purposes.

"(b) From amounts set aside under subsection (a), the Secretary is authorized to make grants—

"(1) in behalf of new communities assisted under title VII of the Housing and Urban Development Act of 1970 or title IV of the Housing and Urban Development Act of 1968 or in behalf of new community projects assisted under title X of the National Housing Act which meet the eligibility standards set forth in title VII of the Housing and Urban Development Act of 1970 and which were the subject of an application or preapplication under such title prior to January 14, 1975;

"(2) in Guam, the Virgin Islands, American Samoa, the Northern Mariana Islands, and the Trust Territory of the Pacific Islands;

"(3) to Indian tribes; and

"(4) to States, units of general local government, Indian tribes, or areawide planning organizations for the purpose of providing technical assistance in planning, developing, and administering assistance under this title, and to States and units of general local government for implementing special projects otherwise authorized under this title. The Secretary may also provide, directly or through contracts, technical assistance under this paragraph to such governmental units, or to a group designated by such a governmental unit for the purpose of assisting that governmental unit to carry out assistance under this title.

"(c) Amounts set aside for use under subsection (b) in any fiscal year but not used in that year shall remain available for use in subsequent fiscal years in accordance with the provisions of that subsection."

NONDISCRIMINATION

SEC. 106. Section 109(a) of the Housing and Community Development Act of 1974 is amended by adding the following new sentence at the end thereof: "Any prohibition against discrimination on the basis of age under the Age Discrimination Act of 1975 shall also apply to any such program or activity.".

TRANSITIONAL PROVISIONS

SEC. 107. (a) Any amounts appropriated for any fiscal year before fiscal year 1982 in a Department of Housing and Urban Development-Independent Agencies Appropriation Act or a Supplemental Appropriation Act under the head "Community Development Grants" which are or become available for obligation shall remain available as provided by law, and shall be used in accordance with the following:

(1) funds authorized for use under section 106(a) of the Housing and Community Development Act of 1974 before the effective date of this title shall be available for use as provided by section 106(c) of such Act;

(2) funds authorized for use under section 107 of such Act before the effective date of this title shall be available for use as provided by section 107(c) of such Act; and

(3) funds authorized for use under section 106(c) or (e) of such Act before the effective date of this title shall be available for use as provided by section 106(d)(3)(A) of such Act.

(b) Any grant or loan which, prior to the effective date of any provision of this title, was obligated and governed by any authority stricken by any provision of this title shall continue to be governed by the provisions of such authority as they existed immediately before such effective date.

URBAN DEVELOPMENT ACTION GRANTS

SEC. 108. (a) Section 119 of the Housing ing and Community Development Act of 1974 is amended to read as follows:

"URBAN DEVELOPMENT ACTION GRANTS

"SEC. 119. (a) The Secretary is authorized to make urban development action grants to cities and urban counties which are experiencing severe economic distress to help stimulate economic development activity needed to aid in economic recovery. Of the total amount approved in appropriation Acts under section 103 for each of the fiscal years 1982 and 1983, not more than $500,000,000 shall be available for each of the fiscal years 1982 and 1983 for grants under this section.

"(b)(1) Urban development action grants shall be made only to cities and urban counties which have, in the determination of the Secretary, demonstrated results in providing housing for low- and moderate-income persons and in providing equal opportunity in housing and employment for low- moderate-income persons and members of minority groups. The Secretary shall issue regulations establishing criteria in accordance with the preceding sentence and setting forth minimum standards for determining the level of economic distress of cities and urban counties for eligibility for such grants. These standards shall take into account factors such as the age of housing; the extent of poverty; the extent of population lag; growth of per capita income; and, where data are available, the extent of unemployment and job lag.

"(2) A city or urban county which fails to meet the minimum standards established pursuant to paragraph (1) shall be eligible for assistance under this section if it meets the requirements of the first sentence of such paragraph and—

"(A) in the case of a city with a population of fifty thousand persons or more or an urban county, contains an area (i) composed of one or more contiguous census tracts, enumeration districts, or block groups, as defined by the United States Bureau of the Census, having at least a population of ten thousand persons or 10 per centum of the population of the city or urban county; (ii) in which at least 70 per centum of the residents have incomes below 80 per centum of

the median income of the city or urban county; and (iii) in which at least 30 percentum of the residents have incomes below the national poverty level; or

"(B) in the case of a city with a population of less than fifty thousand persons, contains an area (i) composed of one or more contiguous census tracts, enumeration districts, or block groups or other areas defined by the United States Bureau of the Census or for which data certified by the United States Bureau of the Census are available having at least a population of two thousand population of the city, whichever is greater; five hundred persons or 10 per centum of the (ii) in which at least 70 per centum of the residents have incomes below 80 per centum of the median income of the city; and (iii) in which at least 30 per centum of the residents have incomes below the national poverty level.

The Secretary shall use up to, but not more than, 20 per centum of the funds appropriated for use in any fiscal year under this section for the purpose of making grants to cities and urban counties eligible under this paragraph.

"(c) Applications for assistance under this section shall—

"(1) in the case of an application for a grant under subsection (b)(2), include documentation of grant eligibility in accordance with the standards described in that subsection;

"(2) set forth the activities for which assistance is sought, including (A) an estimate of the costs and general location of the activities; (B) a summary of the public and private resources which are expected to be made available in connection with the activities, including how the activities will take advantage of unique opportunities to attract private investment; and (C) an analysis of the economic benefits which the activities are expected to produce;

"(3) contain a certification satisfactory to the Secretary that the applicant, prior to submisison of its application, (A) has held public hearings to obtain the views of citizens, particularly residents of the area in which the proposed activities are to be carried out, and (B) has analyzed the impact of these proposed activities on the residents, particularly those of low and moderate income, of the residential neighborhood, and on the neighborhood in which they are to be carried out; and

"(4) contains a certification satisfactory to the Secretary that the applicant, prior to submission of its application, (A) has identified all properties, if any, which are included on the National Register of Historic Places and which, as determined by the applicant, will be affected by the project for which the application is made; (B) has identified all other properties, if any, which will be affected by such project and which, as determined by the applicant, may meet the criteria established by the Secretary of the Interior for inclusion on such Register, together with documentation relating to the inclusion of such properties on the Register; (C) has determined the effect, as determined by the applicant, of the project on the properties identified pursuant to clauses (A) and (B); and (D) will comply with the requirements of section 121.

"(d)(1) Except in the case of a city or urban county eligible under subsection (b)(2), the Secretary shall establish selection criteria for grants under this section which must include (A) as the primary criterion, the comparative degree of economic distress among applicants, as measured (in the case of a metropolitan city or urban county) by the differences in the extent of growth lag, the extent of poverty, and the adjusted age of housing in the metropolitan city or urban county; (B) other factors determined to be relevant by the Secretary in assessing the comparative degree of economic deterioration in cities and urban counties; and (C) at least the following other criteria; demonstrated performance of the city or urban county in housing and community development programs; to the extent to which the grant will stimulate economic recovery by leveraging private investment; the number of permanent jobs to be created and their relation to the amount of grant funds requested; the proportion of permanent jobs accessible to lower income persons and minorities, including persons who are unemployed; the impact of the proposed activities on the fiscal base of the city or urban county and its relation to the amount of grant funds requested; the extent to which State or local government funding or special economic incentives have been committed; and the feasibility of accomplishing the proposed activities in a timely fashion within the grant amount available.

"(2) For the purpose of making grants with respect to areas described in subsection (b)(2), the Secretary shall establish selection criteria, which must include (A) factors determined to be relevant by the Secretary in assessing the comparative degree of economic deterioration among eligible areas, (B) such other criteria as the Secretary may determine, including at a minimum the criteria listed in paragraph (1)(C) of this subsection.

"(e) The Secretary may not approve any grant to a city or urban county eligible under subsection (b)(2) unless—

"(1) the grant will be used in connection with a project located in an area described in subsection (b)(2), except that the Secretary may waive this requirement where the Secretary determines (A) that there is no suitable site for the project within that area, (B) the project will be located directly adjacent to that area, and (C) the project will contribute substantially to the economic development of that area;

"(2) the city or urban county has demonstrated to the satisfaction of the Secretary that basic services supplied by the city or urban county to the area described in subsection (b)(2) are at least equivalent, as measured by per capital expenditures, to those supplied to other areas within the city or urban county which are similar in population size and physical characteristics and which have median incomes above the median income for the city or urban county;

"(3) the grant will be used in connection with a project which will directly benefit the low- and moderate-income families and individuals residing in the area described in subsection (b)(2); and

"(4) the city or urban county makes available, from its own funds or from funds received from the State or under any Federal program which permits the use of financial assistance to meet the non-Federal share requirements of Federal grant-in-aid programs, an amount equal to 20 per centum of the grant to be available under this section to be used in carrying out the activities described in the application.

"(f) Activities assisted under this section may include such activities, in addition to those authorized under section 105(a), as the Secretary determines to be consistent with the purposes of this section.

"(g) The Secretary shall, at least on an annual basis, make reviews and audits of recipients of grants under this section as necessary to determine the progress made in carrying out activities substantially in accordance with approved plans and timetables. The Secretary may adjust, reduce, or withdraw grant funds, or take other action as appropriate in accordance with the findings of these reviews and audits, except that funds already expended on eligible activities under this title shall not be recaptured or deducted from future grants made to the recipient.

"(h) No assistance may be provided under this section for projects intended to facilitate the relocation of industrial or commercial plants or facilities from one area to another, unless the Secretary finds that the relocation does not significantly and adversely affect the unemployment or economic base of the area from which the industrial or commercial plan or facility is to be relocated.

"(i) Not less than 25 per centum of the funds made available for grants under this section shall be used for cities with populations of less than fifty thousand persons which are not central cities of a metropolitan statistical area.

"(j) A grant may be made under this section only where the Secretary determines that there is a strong probability that (1) the non-Federal investment in the project would not be made without the grant, and (2) the grant would not substitute for non-Federal funds which are otherwise available to the project.

"(k) In making grants under this section, the Secretary shall take such steps as the Secretary deems appropriate to assure that the amount of the grant provided is the least necessary to make the project feasible.

"(l) For purposes of this section, the Secretary may reduce or waive the requirement in section 102(a)(5)(B)(ii) that a town or township be closely settled.

"(m) In the case of any application which identifies any property in accordance with subsection (c)(4)(B), the Secretary may not commit funds with respect to an approved application unless the applicant has certified to the Secretary that the appropriate State historic preservation officer and the Secretary of the Interior have been provided an opportunity to take action in accordance with the provisons of section 121(b).

"(n)(1) For the purposes of this section, the term 'city' includes Guam, the Virgin Islands, and Indian tribes.

"(2) The Secretary may not approve a grant to an Indian tribe unless the tribe (A) is located on a reservation or in an Alaskan Native Village, and (B) is an eligible recipient under the State and Local Fiscal Assistance Act of 1972.

"(o) In the event that no amounts are set aside under, or precluded from being appropriated for this section for fiscal years after fiscal year 1983, any amount which is or becomes available for use under this section after fiscal year 1983 shall be added to amounts appropriated under section 103.".

(b) Section 121 of such Act is amended by striking out "subsection (c)(7)(B)" in subsection (b) and inserting in lieu thereof "subsection (c)(4)(B)".

(c) The amendments made by subsections (a) and (b) shall become effective on the effective date of regulations implementing such subsections. As soon as practicable, but not later than January 1, 1982, the Secretary shall issue such final rules and regulations as the Secretary determines are necessary to carry out such subsections.

REHABILITATION LOANS

SEC. 109. (a) Section 312 of the Housing Act of 1954 is amended by adding at the end thereof the following:

"(l) On or after October 1, 1981, loans may be made under this section only in connection with urban homesteading programs or multifamily properties.".

(b) Subsection (a)(1)(D) of such section is amended by striking out "approved".

(c) The first sentence of subsection (d) of such section is amended—

(1) by inserting "and" after "1979,"; and

(2) by striking out all after "1980" and inserting in lieu thereof a period.

(d) The last sentence of subsection (d) of such section is repealed.

(e) Subsection (h) of such section is amended by striking out "1982" each place it appears and inserting in lieu thereof "1983".

(f) Subsection (j)(1) of such section is amended by striking out the second sentence.

URBAN HOMESTEADING

SEC. 110. The first sentence of section 810 (h) of the Housing and Community Development Act of 1974 is amended by striking out "and not to exceed $26,000,000 for the fiscal year 1979" and inserting in lieu thereof "not to exceed $26,000,000 for the fiscal year 1979, and not to exceed $13,467,000 for the fiscal year 1983".

REPEALERS

SEC. 111. (a) Title VII of the Housing and Community Development Amendments of 1978 is hereby repealed.

(b) Section 701 of the Housing Act of 1954 is hereby repealed.

TECHNICAL AMENDMENTS

SEC. 112. (a) Section 102(a) of the Housing and Community Development Act of 1974 is amended—

(1) by striking out paragraphs (18) and (19);

(2) by inserting immediately after paragraph (6) the following:

"(7) The term 'nonentitlement area' means an area which is not a metropolitan city or part of an urban county."; and

(3) by redesignating the remaining paragraphs accordingly.

(b) Section 102(c) of such Act is amended by striking out "a Community Development Program in whole or in part" and inserting in lieu thereof "activities assisted under this title".

(c) Section 102(d) of such Act is amended by striking out "103(a)(1)" and inserting in lieu thereof "103".

(d) The caption of section 105 of such Act is amended to read as follows: "ELIGIBLE ACTIVITIES".

(e) Section 105(a) of such Act is amended—

(1) by striking out the first sentence and the words "These activities" in the second sentence and inserting in lieu thereof "Activities assisted under this title";

(2) by striking out "program" in paragraph (6);

(3) by striking out "the Community Development Program" in paragraph (9) and inserting in lieu thereof "activities assisted under this title";

(4) by striking out "to the community development program" in paragraph (11);

(5) by striking out "(as specifically" and all that follows through "104(a)(1)" in paragraph (14) and inserting in lieu thereof "which are carried out by public or private nonprofit entities"; and

(6) by striking out "(as specifically described in the application submitted pursuant to section 104)" in paragraph (15).

(f) Section 105(b) of such Act is amended by striking out "a grant" and inserting in lieu thereof "assistance".

(g) The second sentence of section 106(b)(4) of such Act is amended by striking out "for a grant under subsection (c) or (e)" and inserting in lieu thereof the following: "to receive assistance under subsection (d)".

(h) Section 108(d)(2) of such Act is amended by striking out "approved or".

(i) The first sentence of section 110 of such Act is amended by striking out "grants" and inserting in lieu thereof "assistance".

(j) The first sentence of section 112(a) of such Act is amended by striking out "103(a)" and inserting in lieu thereof "103".

(k) Section 113(a)(2) of such Act is amended by striking out "as approved by the Secretary".

(l) Section 116(b) of such Act is amended to read as follows:

"(b) In the case of funds available for any fiscal year, the Secretary shall not consider any statement under section 104(a), unless such statement is submitted on or prior to such date (in that fiscal year) as the Secretary shall establish as the final date for submission of statements in that year.".

REPORT ON BLOCK GRANT PROGRAM

SEC. 113. Not later than one hundred and eighty days after the date of enactment of this Act, the Secretary of Housing and Urban Development shall report to the Congress on administrative and legislative steps that can be taken to—

(1) require all grantees to concentrate their block grant funds in distressed geographic areas small enough so that visible improvements can be achieved in a reasonable time period and to ensure that claimed benefits to low- and moderate-income persons are, in actuality, occurring;

(2) reduce the broad list of activities currently eligible so that funds can be focused on those activities which meet the cities' most urgent revitalization needs;

(3) develop overall income eligibility requirements for recipients of block grant supported rehabilitation; and

(4) limit eligible rehabilitation work to that which is essential to restore the housing unit to a decent, safe, and sanitary or energy efficient condition, specifically prohibiting nonessential and luxury items, so that more homes needing basic repairs can be rehabilitated.

TITLE II—HOUSING ASSISTANCE PROGRAMS

HOUSING AUTHORIZATIONS

SEC. 201. (a) The first sentence of section 5(c)(1) of the United States Housing Act of 1937 is amended by inserting immediately after "1980" the following: ", by $891,500,000 on October 1, 1981, and by $899,800,000 on October 1, 1982".

(b) The second sentence of section 5(c)(1) of such Act is amended by striking out "Acts;" and all that follows through the period and inserting in lieu thereof the following: "Acts. In addition, the aggregate amount which may be obligated over the duration of the contracts may not exceed $31,200,000,000 with respect to the additional authority provided on October 1, 1980, $17,815,100,000 with respect to the additional authority provided on October 1, 1981, and $17,810,600,000 with respect to the additional authority provided on October 1, 1982.".

(c) Section 5(c) of such Act is amended by—

(1) redesignating paragraphs (3), (4), and (5) as paragraphs (4), (5), and (6), respectively; and

(2) inserting immediately after paragraph (2) the following:

"(3)(A) Of the additional authority approved in appropriation Acts and made available on October 1, 1981, and October 1, 1982, the Secretary shall make available at least $75,000,000 each fiscal year for assistance to projects under section 14.

"(B) Of the balance of the additional authority referred to in the preceding subparagraph which remains for each fiscal year after deducting the amount to be provided for assistance to projects under section 14, the Secretary shall allocate funds for use in different areas and communities in accordance with section 213(d) of the Housing and Community Development Act of 1974, except that on a national basis the Secretary may not enter into contracts aggregating—

"(i) more than 45 per centum of such balance for existing units assisted under this Act; and

"(ii) more than 55 per centum of such balance for newly constructed and substantially rehabilitated units assisted under this Act.

"(C) Notwithstanding subparagraph (B), after making the allocations referred to in such subparagraph, the Secretary shall accomodate the desires of States and units of local government regarding the mix between newly constructed or substantially rehabilitated and existing or moderately rehabilitated housing if the contract and budget authority allocated is sufficient to provide assistance with respect to such mix. Any contract or budget authority which remains after assistance is set aside for such mix shall be reallocated in accordance with section 213(d) of the Housing and Community Development Act of 1974. In any case where a State or unit of local government determines that funds allocated under this paragraph would be more effectively used for the modernization of existing public housing, the Secretary may approve the use of all or a part of such funds in accordance with the provisions of section 14.

"(D) The Secretary may not make reservations from the total amount of budget authority provided to carry out this Act in any fiscal year in a manner which would cause the amount reserved to exceed 30 per centum of the total amount for the last quarter of any fiscal year or 15 per centum of the total amount for any month of the last quarter of any fiscal year.".

(d) Section 9(c) of such Act is amended by—

(1) striking out "and" immediately after "on or after October 1, 1979,";

(2) striking out "$826,000,000" and inserting in lieu thereof "$970,800,000"; and

(3) inserting immediately before the period at the end thereof the following: ", not to exceed $1,204,600,000 on or after October 1, 1981, and not to exceed $1,350,400,000 on or after October 1, 1982".

(e) Section 213(d) of the Housing and Community Development Act of 1974 is amended by adding at the end thereof a new paragraph to read as follows:

"(4) With respect to fiscal years beginning after September 30, 1981, the Secretary of Housing and Urban Development is authorized to retain a portion of the contract authority available during any fiscal year under the authorities cited in paragraph (1) of subsection (a) of this section, not to exceed 10 per centum of the available contract authority on an aggregate basis. Such contract authority shall be available for subsequent allocation to specific areas and communities, and may be used for:

"(A) unforseeable housing needs, especially those brought on by natural disasters or special relocation requirements;

"(B) support for the needs of the handicapped or for minority enterprise;

"(C) applications for assistance with respect to housing in new communities;

"(D) providing for assisted housing as a result of the settlement of litigation;

"(E) small research and demonstration projects;

"(F) lower-income housing needs described in housing assistance plans, including activities carried out under areawide housing opportunity plans;

"(G) innovative housing programs or alternative methods for meeting lower-income housing needs approved by the Secretary."

(f)(1) The first sentence of section 201(h) of the Housing and Community Development Ameandments of 1978 is amended—

(A) by striking out "and" after "the fiscal year 1980,";

(B) by inserting before the period at the end thereof the following: ", not to exceed $50,176,000 for the fiscal year 1982, and $50,176,000 for fiscal year 1983"; and

(C) by striking out the comma immediately following "Act" and inserting in lieu thereof a closed parenthesis.

(2) The third sentence of section 236(f)(3) of the National Housing Act, as redesignated by section 202(f)(7) of this title, is amended by striking out "September 30, 1981" and inserting in lieu thereof "September 30, 1983".

(g) Section 305(c) of the National Housing Act is amended—

(1) by striking out "and" immediately after "October 1, 1978,"; and

(2) by inserting before the period at the end thereof the following: ", and by $2,300,000,000 on October 1, 1981, except that not more than $942,800,000 of such amount shall be available for the purchase of or commitments to purchase mortgages secured by projects which do not contain units assisted under section 8 of the United States Housing Act of 1937".

(h) Section 202(a)(4)(B)(i) of the Housing Act of 1959 is amended by striking out "and to $5,752,500,000 on October 1, 1981" and inserting in lieu thereof "to $5,752,500,000 on October 1, 1981, and to $6,102,500,000 on October 1, 1982".

TENANT RENTAL PAYMENTS

SEC. 202. (a) Section 3 of the United States Housing Act of 1937 is amended to read as follows:

"RENTAL PAYMENTS; DEFINITIONS

"SEC. 3. (a) Dwelling units assisted under this Act shall be rented only to families who are lower income families at the time of their initial occupancy of such units. A family shall pay as rent for a dwelling unit assisted under this Act the highest of the following amounts, rounded to the nearest dollar:

"(1) 30 per centum of the family's monthly adjusted income;

"(2) 10 per centum of the family's monthly income (15 per centum for the purpose of section 8); or

"(3) if the family is receiving payments for welfare assistance from a public agency and a part of such payments, adjusted in accordance with the family's actual housing costs, is specifically designated by such agency to meet the family's housing costs, the portion of such payments which is so designated.

"(b) When used in this Act:

"(1) The term 'lower income housing' means decent, safe, and sanitary dwellings assisted under this Act. The term 'public housing' means lower income housing, and all necessary appurtenances thereto, assisted under this Act other than under section 8. When used in reference to public housing, the term 'lower income housing project' or 'project' means (A) housing developed, acquired, or assisted by a public housing agency under this Act, and (B) the improvement of any such housing.

"(2) The term 'lower income families' means those families whose incomes do not exceed 50 per centum of the median income for the area, as determined by the Secretary with adjustments for smaller and larger families, except that the Secretary may establish income ceilings higher or lower than 50 per centum of the median for the area on the basis of the Secretary's findings that such variations are necessary because of prevailing levels of construction costs, unusually high or low family incomes, or other factors.

"(3) The term 'families' includes families consisting of a single person in the case of (A) a person who is at least sixty-two years of age or is under a disability as defined in section 223 of the Social Security Act or in section 102 of the Developmental Disabilities Services and Facilities Construction Amendments of 1970, or is handicapped, (B) a displaced person, (C) the remaining member of a tenant family, and (D) other single persons in circumstances described in regulations of the Secretary. In no event shall more than 15 per centum of the units under the jurisdiction of any public housing agency be occupied by single persons under clause (D). In determining priority for admission to housing under this Act, the Secretary shall give preference to those single persons who are elderly, handicapped, or displaced before those eligible under clause (D). The term 'elderly families' means families whose heads (or their spouses), or whose sole members, are persons described in clause (A). A person shall be considered handicapped if such person is determined, pursuant to regulations issued by the Secretary, to have an impairment which is expected to be of long-continued and indefinite duration, substantially impedes such person's ability to live independently, and is of such a nature that such ability could be improved by more suitable housing conditions. The term 'displaced person' means a person displaced by governmental action, or a person whose dwelling has been extensively damaged or destroyed as a result of a disaster declared or otherwise formally recognized pursuant to Federal disaster relief laws. Notwithstanding the preceding provisions of this subsection, the term 'elderly families' includes two or more elderly, disabled, or handicapped individuals living together, or one or more such individuals living with one or more persons determined under regulations of the Secretary to be essential to their care or well being.

"(4) The term 'income' means income from all sources of each member of the household, as determined in accordance with criteria prescribed by the Secretary. Such term includes the amount of income which a member of the household would have received with respect to any resource (or interest therein) owned by such member within the preceding 24 months if such member gave away or sold such resource or interest at less than the fair market value of such resource or interest for the purpose of establishing eligibility for assistance under this section, as determined pursuant to regulations of the Secretary. Household income shall be determined on the basis of actual income received over a representative prior period, with appropriate provision for sudden loss of income.

"(5) The term 'adjusted income' means the income which remains after excluding such amounts or types of income as the Secretary prescribe. In determining amounts to be excluded from income, the Secretary may, in the Secretary's discretion, take into account the number of minor children in the household and such other factors as the Secretary may determine are appropriate.

"(6) The term 'public housing agency' means any State, county, municipality, or other governmental entity or public body (or agency or instrumentality thereof) which is authorized to engage in or assist in the development or operation of lower income housing.

"(7) The term 'State' includes the several States, the District of Columbia, the Commonwealth of Puerto Rico, the territories and possessions of the United States, the Trust Territory of the Pacific Islands, and Indian tribes, bands, groups, and Nations, including Alaska Indians, Aleuts, and Eskimos, of the United States.

"(8) The term 'Secretary' means the Secretary of Housing and Urban Development.

"(c) When used in reference to public housing:

"(1) The term 'development' means any or all undertakings necessary for planning, land acquisition, demolition, construction, or equipment, in connection with a lower income housing project. The term 'development cost' comprises the costs incurred by a public housing agency in such undertakings and their necessary financing (including the payment of carrying charges), and in otherwise carrying out the development of such project. Construction activity in connection with a lower income housing project may be confined to the reconstruction, remodeling, or repair of existing buildings.

"(2) The term 'operation' means any or all undertakings appropriate for management, operation, services, maintenance, security (including the cost of security personnel), or financing in connection with a lower income housing project. The term also means the financing of tenant programs and services for families residing in lower income housing projects, particularly where there is maximum feasible participation of the tenants in the development and operation of such tenant programs and services. As used in this paragraph, the term 'tenant programs and services' includes the development and maintenance of tenant organizations which participate in the management of lower income housing projects; the training of tenants to manage and operate such projects and the utilization of their services in project management and operation; counseling on household management, housekeeping, budgeting, money management, child care, and similar matters; advice as to resources for job training and placement, education, welfare, health, and other community services; services which are directly related to meeting tenant needs and providing a wholesome living environment; and referral to appropriate agencies in the community when necessary for the provision of such services. To the maximum extent available and appropriate, existing public and private agencies in the community shall be used for the provision of such services.

"(3) The term 'acquisition cost' means the amount prudently required to be expanded by a public housing agency in acquiring property for a lower income housing project.".

(b) Sections 4, 5, 9, and 11 of such Act are amended by striking out "LOW INCOME" where it appears in the caption accompanying each such section and by inserting in lieu thereof "LOWER INCOME".

(c) Sections 2, 4, 5, 6, 9, 11, 12, 13, and 14 of such Act are amended by striking out "low-income" wherever it appears and inserting in lieu thereof "lower income".

(d) Section 6(c)(2) of such Act is amended by striking out the phrase "at intervals of two years (or at shorter intervals where the Secretary deems it desirable)" and inserting in lieu thereof "no less frequently than annually".

(e) Section 8 of such Act is amended—

(1) by striking out paragraph (3) of subsection (c) and inserting in lieu thereof the following:

"(3) The amount of the monthly assistance payment with respect to any dwelling unit shall be the difference between the maximum monthly rent which the contract provides that the owner is to receive for the unit and the rent the family is required to pay under section 3(a) of this Act. Reviews of family income shall be made no less frequently than annually.";

(2) by striking out paragraph (7) of subsection (c) and redesignating paragraph (8) of such subsection as paragraph (7);

(3) by striking out paragraphs (1), (2), and (3) of subsection (f) and redesignating paragraphs (4), (5), and (6) of such subsec-

tion as paragraphs (1), (2), and (3), respectively;

(4) by striking out "The provisions of section 3(1), 5(e), and 6" in subsection (h) and inserting in lieu thereof "Sections 5(e) and 6";

(5) by striking out the comma after the word "Act" in subsection (h); and

(6) by striking out "25 per centum of one-twelfth of the annual income of such family" in paragraph (3) of subsection (j) and inserting in lieu thereof "the rent the family is required to pay under section 3(a) of this Act".

(f) Section 236 of the National Housing Act is amended—

(1) by striking out "two years" in subsection (e) and inserting in lieu thereof "one year";

(2) by striking out "25 per centum of the tenant's income" in the second sentence of subsection (f) and inserting in lieu thereof "30 per centum of the tenant's adjusted income";

(3) by striking out clause (ii) in the third sentence of subsection (f) and inserting in lieu thereof the following:

"(ii) to permit the charging of a rental for such dwelling units at such an amount less than 30 per centum of a tenant's adjusted income as the Secretary determines represents a proportionate decrease for the utility charges to be paid by such tenant, but in no case shall such rental be lower than 25 per centum of a tenant's adjusted income.";

(4) by striking out "25 per centum of their income" in paragraph (2) of subsection (f) and inserting in lieu thereof "30 per centum of their adjusted income";

(5) by striking out "25 per centum of the tenant's income" in paragraph (2) of subsection (f) and inserting in lieu thereof "the highest of the following amounts, rounded to the nearest dollar:

"(A) 30 per centum of the tenant's monthly adjusted income;

"(B) 10 per centum of the tenant's monthly income; or

"(C) if the family is receiving payments for welfare assistance from a public agency and a part of such payments, adjusted in accordance with the family's actual housing costs, is specifically designated by such agency to meet the family's housing costs, the portion of such payments which is so designated";

(6) by striking out the third sentence in paragraph (2) of subsection (f);

(7) by striking out subparagraph (A) of subsection (f)(3) and redesignating subsection (f)(3)(B) as subsection (f)(3); and

(8) by striking out subsection (m) and inserting in lieu thereof the following:

"(m) For the purpose of this section the term 'income' means income from all sources of each member of the household, as determined in accordance with criteria prescribed by the Secretary. Such term includes the amount of income which a member of the household would have received with respect to any resource (or interest therein) owned by such member within the preceding twenty-four months if such member gave away or sold such resource or interest at less than the fair market value of such resource or interest for the purpose of establishing eligibility for assistance under this section, as determined pursuant to regulations of the Secretary. The term 'adjusted income' means the income which remains after excluding such amounts or types of income as the Secretary may prescribe. In determining amounts to be excluded from income, the Secretary may, in the Secretary's discretion, take into account the number of minor children in the household and such other factors as the Secretary may determine are appropriate. Household income shall be determined on the basis of actual income received over a representative prior period, with appropriate provision for sudden loss of income.".

(g) Section 101 of the Housing and Urban Development Act of 1965 is amended—

(1) by striking out paragraph (2) in subsection (c) and inserting in lieu thereof the following:

"(2) 'income' means income from all sources of each member of the household, as determined in accordance with criteria prescribed by the Secretary. Such term includes the amount of income which a member of the household would have received with respect to any resource (or interest therein) owned by such member within the preceding twenty-four months if such member gave away or sold such resource or interest at less than the fair market value of such resource or interest for the purpose of establishing eligibility for assistance under this section, as determined pursuant to regulations of the Secretary. The term 'adjusted income' means the income which remains after excluding such amounts or types of income as the Secretary may prescribe. In determining amounts to be excluded from income, the Secretary may, in the Secretary's discretion, take into account the number of minor children in the household and such other factors as the Secretary may determine are appropriate. Household income shall be determined on the basis of actual income received over a representative prior period, with appropriate provision for sudden loss of income.";

(2) by striking out the first sentence of subsection (d) and inserting in lieu thereof the following: "The amount of the annual payment with respect to any dwelling unit shall be the lesser of (1) 70 per centum of the fair market rent, or (2) the amount by which the fair market rental for such unit exceeds 30 per centum of the tenant's adjusted income."; and

(3) by striking out ", except the elderly, at intervals of two years (or at shorter intervals in cases where the Secretary may deem it desirable)" in paragraph (2) of subsection (e), and by inserting in lieu thereof "no less frequently than annually".

(h) Title II of the Housing and Community Development Amendments of 1979 is amended—

(1) by striking out subsection (c) in section 202; and

(2) by striking out subsection (c) in section 203.

(i)(1) In determining the rent to be paid by tenants who are occupying housing assisted under the authorities amended by this section on the effective date of this Act, the Secretary, notwithstanding any other provision of this section, may provide for delayed applicability, or for staged implementation, of the procedures for determining rent required by the provisions of subsections (a) through (h) of this section if the Secretary determines that immediate application of such procedures would be impracticable, would violate the terms of existing leases, or would result in extraordinary hardship for any class of tenants. The Secretary shall prohibit any increase in rents required by the amendments made by this section (other than any part of those increases attributed to increases in family income) in excess of 10 per centum for a family during any twelve-month period. Notwithstanding any other provision of this section, application of the procedures for determining rent contained in this section shall not result in a reduction in the amount of rent paid by any tenant below the amount paid by such tenant immediately preceding the effective date of this Act.

(2) Tenants of housing assisted under the provisions of law amended by this section whose occupancy begins after the effective date of this Act shall be subject to immediate rent payment determinations in accordance with the amendments contained in subsections (a) through (h), except that the Secretary may provide for delayed applicability, or for staged implementation, of these requirements for such tenants if the Secretary determines that immediate application of the requirements of this section would be impracticable, or that uniform procedures for assessing rents would significantly decrease administrative costs and burdens.

(3) The Secretary's actions and determinations and the procedures for making determinations pursuant to this subsection shall not be reviewable in any court. The provisions of subsections (a) through (h) shall be implemented and fully applicable to all affected tenants no later than five years following the date of enactment of this Act, except that the Secretary may extend the time for implementation if the Secretary determines that full implementation would result in extraordinary hardship for any class of tenants.

COST REDUCTION IN ASSISTED HOUSING

SEC. 203. (a) Section 8 of the United States Housing Act of 1937 is amended—

(1) by inserting after the first sentence of subsection (b)(2) the following: "To increase housing opportunities for very low-income families, the Secretary shall assure that newly constructed housing to be assisted under this section is modest in design and shall reduce the types and number of unnecessary amenities and features.";

(2) by adding at the end of subsection (c)(2) the following:

"(D) Notwithstanding the foregoing, the Secretary shall limit increases in contract rents for newly constructed or substantially rehabilitated projects assisted under this section to the amount of operating cost increases incurred by owners of comparable projects in the area.";

(3) in subsection (c)(4)—

(A) by striking out all after "exceeding" in the first sentence and inserting in lieu thereof "thirty days."; and

(B) by striking out "sixty-day" in the second sentence and inserting in lieu thereof "thirty-day"; and

(4) by adding at the end thereof the following:

"(m) The Secretary shall give a weighted average consideration of 33⅓ per centum for cost considerations when reviewing proposals for assistance under this section.

"(n) For the purpose of achieving the lowest cost in providing units in newly constructed projects assisted under this section, the Secretary shall give a priority in entering into contracts under this section for projects which are to be located on specific tracts of land provided by States or units of local government if the Secretary determines that the tract of land is suitable for such housing, and that affording such priority will be cost effective.

"(o) The Secretary shall not enter into any contract with respect to a newly constructed project under this section if the sizes of the units in such project exceed (1) the sizes specified in the minimum property standards by more than 10 per centum or the sizes specified by other applicable Federal standards, or (2) the sizes specified in the applicable local codes, whichever are greater.".

(b)(1) The Secretary of Housing and Urban Development may not deny or withhold Federal housing assistance with respect to any property in which some or all of the dwelling units do not contain bathroom or kitchen facilities because of the lack of such facilities.

(2) In the case of newly constructed or substantially rehabilitated projects for occupancy by elderly or handicapped persons

or families with respect to which Federal housing assistance is provided pursuant to contracts entered into on or after October 1, 1981, to the maximum extent practicable, the Secretary of Housing and Urban Development shall, on a nationwide basis, assure that not less than 25 per centum of the units are efficiency units.

(3) As used in this subsection, the term "Federal housing assistance" means assistance under any program pursuant to the United States Housing Act of 1937, the National Housing Act, section 101 of the Housing and Urban Development Act of 1965, section 202 of the Housing Act of 1959, title V of the Housing Act of 1949, or title I of the Housing and Community Development Act of 1974.

REDIRECTION OF ECONOMIC MIX POLICY

SEC. 204. (a) The Secretary of Housing and Urban Development shall rescind 24 C.F.R. 880.603(c).

(b) Section 8 of the United States Housing Act of 1937 is amended—

(1) by inserting "only where consistent with the purpose of aiding lower income families in obtaining a decent place to live" after "mixed housing" in subsection (a);

(2) by adding at the end of subsection (b)(2) the following: "Each contract entered into under this section after the date of enactment of the Housing and Community Development Amendments of 1981 shall provide that a family which is not eligible for assistance under this section at the time of its initial occupancy may rent a unit in a newly constructed or substantially rehabilitated project assisted under this section only if the number of units in the project which are occupied by families eligible for assistance under this section equals or exceeds the number of units in the project which were to be available for occupancy at initial rent-up by families eligible for assistance under this section."; and

(3) by inserting after "nonhandicapped persons" in the second sentence of subsection (c)(5) the following: "which are not subject to mortgages purchased under section 305 of the National Housing Act and not financed with the proceeds of obligations the interest on which is exempt from taxation under chapter 1 of the Internal Revenue Code of 1954".

(c) Section 6(c)(4)(A) of such Act is amended by striking out "will include families with a broad range of incomes and" and by striking out "lower income and".

MISCELLANEOUS HOUSING ASSISTANCE AMENDMENTS

SEC. 205. (a) Section 8 of the United States Housing Act of 1937 is amended—

(1) by adding at the end thereof the following:

"(p) After the date of enactment of this subsection, the Secretary may not enter into any contract for a newly constructed or substantially rehabilitated project pursuant to this section which is to be located within the jurisdiction of a State or unit of local government which applies rent controls or rent stabilization to some or all newly constructed multifamily residential projects or to units in any multifamily residential project which become vacant."; and

(2) by adding at the end of subsection (c) the following:

"(8) Each contract under this section shall provide that the owner will notify tenants at least six months prior to any rent increase which may occur after the expiration of such contract.".

(b)(1) Within one year after the date of enactment of this Act, the Secretary of Housing and Urban Development shall conduct a survey to determine the number of projects which are assisted under section 8 of the United States Housing Act of 1937 owned by developers or sponsors with five-year annual contributions contracts who plan to withdraw from the section 8 program when their contracts expire and who will increase rents in those projects to levels that the current residents of those projects will not be able to afford. The Secretary shall notify affected residents of possible rent increases where applicable.

(2) Not later than one year after the date of the enactment of this Act, the Secretary shall transmit to the Congress a report recommending methods for recapturing the cost to the Federal Government of front-end investment in those units which are removed from the section 8 program.

(c) Section 8 of the United States Housing Act of 1937 is amended by adding at the end thereof the following:

"(q) The Secretary shall assure that no Federal, State, or local official financially profits by participating in the development of housing to be assisted under this section.".

(d)(1) The Secretary of Housing and Urban Development shall permit public housing agencies to retain, out of judgments obtained by them in recovering amounts wrongfully paid as a result of fraud and abuse in the housing assistance program under section 8 of the United States Housing Act of 1937, an amount equal to the greater of (A) the legal expenses incurred in obtaining such judgments, or (B) 50 per centum of the amount actually collected on the judgments.

(2) The Secretary of Housing and Urban Development shall include in the annual report under section 8 of the Department of Housing and Urban Development Act a summary of cases brought to its attention by public housing authorities for prosecution or civil action, and shall describe the handling of such cases by such authorities and by the Department of Housing and Urban Development and the resolution of such cases in the court system.

(e) Section 8(d)(1) of the United States Housing Act of 1937 is amended by striking out clause (B) and inserting in lieu thereof:

"(B) the procedural and substantive rights of the tenant with respect to occupancy of the unit shall be determined by the terms of the lease and applicable State and local law;".

RENT SUPPLEMENTS

SEC. 206. (a) Section 101(1) of the Housing and Urban Development Act of 1965 is amended to read as follows:

"(1) Notwithstanding the provisions of subsection (a) and any other provision of law, the Secretary may utilize additional authority under section 5(c) of the United States Housing Act of 1937 made available by appropriation Acts on or after October 1, 1979, to supplement assistance authority available for that purpose under this section.".

(b) The second sentence of section 101(d) of such Act is repealed.

DISPOSAL OF HUD-OWNED PROJECTS

SEC. 207. Section 203(a) of the Housing and Community Development Amendments of 1978 is amended by adding at the end thereof the following: "To the maximum extent feasible, the Secretary shall seek to dispose of projects owned by the Secretary to tenant-owned cooperatives.".

SECTION 235 AMENDMENTS

SEC. 208. (a) Section 235(c)(2)(A) of the National Housing Act is amended by striking out "ceases for a period of 90 continuous days or more making payments required under the mortgage loan, or advance of credit secured by such a property, or".

(b) Section 235(h)(1) of such Act is amended by adding the following new sentence at the end thereof: "The Secretary shall not enter into new contracts for assistance payments under this section after September 30, 1981, except pursuant to a commitment issued on or before September 30, 1981.".

(c) Section 235(q)(14) of such Act is amended by striking out "ceases for a period of 90 continuous days or more making payments on the mortgage, loan, or advance of credit secured by the property, or".

RESTRICTION ON USE OF ASSISTED HOUSING

SEC. 209. (a) Section 214 of the Housing and Community Development Act of 1980 is amended to read as follows:

"RESTRICTION ON USE OF ASSISTED HOUSING

"SEC. 214. (a) Notwithstanding any other provision of law, the Secretary of Housing and Urban Development may not make financial assistance available for the benefit of any alien unless he or she is a resident of the United States and is—

"(1) an alien lawfully admitted for permanent residence as an immigrant as defined by sections 101(a)(15) and 101(a)(20) of the Immigration and Nationality Act (8 U.S.C. 1101(a)(15) and 8 U.S.C. 1101(a)(20)), excluding, among others, alien visitors, tourists, diplomats, and students who enter the United States temporarily with no intention of abandoning their residence in a foreign country;

"(2) an alien who entered the United States prior to June 30, 1948, or such subsequent date as is enacted by law, has continuously maintained his or her residence in the United States since then, and is not ineligible for citizenship, but who is deemed to be lawfully admitted for permanent residence as a result of an exercise of discretion by the Attorney General pursuant to section 249 of the Immigration and Nationality Act (8 U.S.C. 1259);

"(3) an alien who is lawfully present in the United States pursuant to an admission under section 207 of the Immigration and Nationality Act (8 U.S.C. 1157) or pursuant to the granting of asylum (which has not been terminated) under section 208 of such Act (8 U.S.C. 1158);

"(4) an alien who is lawfully present in the United States as a result of an exercise of discretion by the Attorney General for emergent reasons or reasons deemed strictly in the public interest pursuant to section 212(d)(5) of the Immigration and Nationality Act (8 U.S.C. 1182(d)(5)); or

"(5) an alien who is lawfully present in the United States as a result of the Attorney General's withholding deportation pursuant to section 243(h) of the Immigration and Nationality Act (8 U.S.C. 1253(h)).

"(b) For purposes of this section the term 'financial assistance' means financial assistance made available pursuant to the United States Housing Act of 1937, section 235 or 236 of the National Housing Act, or section 101 of the Housing and Urban Development Act of 1965.".

(b) An alien who is lawfully present in the United States as a result of being granted conditional entry pursuant to section 203(a)(7) of the Immigration and Nationality Act (8 U.S.C. 1153(a)(7)) before April 1, 1980, because of persecution or fear of persecution on account of race, religion, or political opinion or because of being uprooted by catastrophic natural calamity shall be deemed, for purposes of section 214 of the Housing and Community Development Act of 1980, to be an alien described in section 214(a)(3) of such Act.

PAYMENT FOR DEVELOPMENT MANAGERS

SEC. 210. The Secretary of Housing and Urban Development shall develop and implement a revised schedule for development managers of lower income housing projects assisted under the United States Housing Act of 1937 so that the percentage limitation applicable to fees chargeable in connection with smaller projects is increased to a minimum level which is practicable.

REVIEW OF OPERATING SUBSIDY FORMULA; FEASIBILITY STUDY

SEC. 211. (a) The Secretary of Housing and Urban Development shall review the administration of the operating subsidy program under section 9 of the United States Housing Act of 1937 and, not later than March 1, 1982, shall report to the Congress recommendations for one or more new operating subsidy formulas which contain incentives to achieve good management, full rent collection, and improved maintenance of projects developed under the United States Housing Act of 1937.

(b) The Secretary of Housing and Urban Development shall examine the feasibility of having the Department of Housing and Urban Development design and implement a computer system which can be utilized by public housing agencies to comply with the Department of Housing and Urban Development's reporting requirements, and report thereon to the Congress not later than March 1, 1982.

ENERGY EFFICIENCY EFFORTS

SEC. 212. Section 201 of the Housing and Community Development Amendments of 1978 is amended—

(1) by redesignating subsection (h) as subsection (i); and

(2) by inserting after subsection (g) the following:

"(h)(1) Notwithstanding any other provision of law, in exercising any authority relating to the approval or disapproval of rentals charged tenants residing in projects which are eligible for assistance under this section, the Secretary—

"(A) shall consider whether the mortgagor could control increases in utility costs by securing more favorable utility rates, by undertaking energy conservation measures which are financially feasible and cost effective, or by taking other financially feasible and cost-effective actions to increase energy efficiency or to reduce energy consumption; and

"(B) may, in his discretion, adjust the amount of a proposed rental increase where he finds the mortgagor could exercise such control.

"(2) The Secretary may waive one or more of the requirements of this section and may provide financial assistance to an owner of a project which is eligible for assistance under this section in order to assist the owner in carrying out a plan to upgrade the project to meet cost-effective energy efficiency standards prescribed by the Secretary.".

RECOGNITION OF KANSAS DEPARTMENT OF ECONOMIC DEVELOPMENT

SEC. 213. The Secretary of Housing and Urban Development shall permit the Kansas Department of Economic Development to participate as a public housing agency for the purposes of programs carried out under the United States Housing Act of 1937 and as a State agency for the purpose of section 883.203 of title 24 of the Code of Federal Regulations as in effect June 1, 1981.

TITLE III—PROGRAM AMENDMENTS AND EXTENSIONS

EXTENSION OF FEDERAL HOUSING ADMINISTRATION MORTGAGE INSURANCE PROGRAMS

SEC. 301. (a) Section 2(a) of the National Housing Act is amended by striking out "October 1, 1981" in the first sentence and inserting in lieu thereof "October 1, 1983".

(b) Section 217 of such Act is amended by striking out "September 30, 1981" and inserting in lieu thereof "September 30, 1983".

(c) Section 221(f) of such Act is amended by striking out "September 30, 1981" in the fifth sentence and inserting in lieu thereof "September 30, 1983".

(d) Section 235(m) of such Act is amended by striking out "September 30, 1981" and inserting in lieu thereof "September 30, 1982".

(e) Section 236(n) of such Act is amended by striking out "September 30, 1981" and inserting in lieu thereof "September 30, 1982".

(f) Section 244(d) of such Act is amended by—

(1) striking out "September 30, 1981" in the first sentence and inserting in lieu thereof "September 30, 1983"; and

(2) striking out "October 1, 1981" in the second sentence and inserting in lieu thereof "October 1, 1983".

(g) Section 245(a) of such Act is amended by striking out "September 30, 1981" where it appears and inserting in lieu thereof "September 30, 1983".

(h) Section 809(f) of such Act is amended by striking out "September 30, 1981" in the second sentence and inserting in lieu thereof "September 30, 1983".

(i) Section 810(k) of such Act is amended by striking out "September 30, 1981" in the second sentence and inserting in lieu thereof "September 30, 1983".

(j) Section 1002(a) of such Act is amended by striking out "September 30, 1981" in the second sentence and inserting in lieu thereof "September 30, 1983".

(k) Section 1101(a) of such Act is amended by striking out "September 30, 1981" in the second sentence and inserting in lieu thereof "September 30, 1983".

EXTENSION OF FLEXIBLE INTEREST RATE AUTHORITY

SEC. 302. Section 3(a)(1) of Public Law 90–301 is amended by striking out "October 1, 1981" and inserting in lieu thereof "October 1, 1983".

RESEARCH AUTHORIZATIONS

SEC. 303. The second sentence of section 501 of the Housing and Urban Development Act of 1970 is amended by striking out "and not to exceed $51,000,000 for the fiscal year 1981" and inserting in lieu thereof "not to exceed $51,000,000 for the fiscal year 1981, not to exceed $35,000,000 for the fiscal year 1982, and not to exceed $35,000,000 for the fiscal year 1983".

FEDERAL HOUSING ADMINISTRATION GENERAL INSURANCE FUND

SEC. 304. Section 519(f) of the National Housing Act is amended by striking out "$1,738,000,000" and inserting in lieu thereof "$1,864,637,000".

PROPERTY IMPROVEMENT AND MANUFACTURED HOME LOANS

SEC. 305. Section 2(b) of the National Housing Act is amended to read as follows:

"(b)(1) No insurance shall be granted under this section to any such financial institution with respect to any obligation representing any such loan, advance of credit, or purchase by it if the amount of such loan, advance of credit or purchase exceeds—

"(A) $17,500 ($20,000 where financing the installation of a solar energy system is involved) if made for the purpose of financing alterations, repairs and improvements upon or in connection with existing single-family structures or manufactured homes;

"(B) $43,750 or an average amount of $8,750 per family unit ($50,000 and $10,000, respectively, where financing the installation of a solar energy system is involved) if made for the purpose of financing the alteration, repair, improvement, or conversion of an existing structure used or to be used as an apartment house or a dwelling for two or more families;

"(C) $22,500 ($35,000 in the case of a manufactured home composed of two or more modules) if made for the purpose of financing the purchase of a manufactured home; and a suitably developed lot on which to place the home;

"(D) $35,000 ($47,500 in the case of a manufactured home composed of two or more modules) if made for the purpose of financing the purchase of a manufactured home;

"(E) such an amount as may be necessary, but not exceeding $12,500, if made for the purpose of financing the purchase, by an owner of a manufactured home which is the principal residence of that owner, of a suitably developed lot on which to place that manufactured home, and if the owner certifies that he or she will place the manufactured home on the lot acquired with such loan within six months after the date of such loan;

"(F) $60,000 or an average amount of $20,000 per family unit if made for the purpose of financing the preservation of an historic structure; and

"(G) such principal amount as the Secretary may prescribe if made for the purpose of financing fire safety equipment for a nursing home, extended health care facility, intermediate health care facility, or other comparable health care facility.

"(2) Because of prevailing higher costs, the Secretary may, by regulation, in Alaska, Guam, or Hawaii, increase any dollar amount limitation on manufactured homes or manufactured home lot loans contained in this subsection by not to exceed 40 per centum. In other areas where needed to meet higher costs of land acquisition, site development, and construction of a permanent foundation in connection with the purchase of a manufactured home or lot, the Secretary may, by regulation, increase any dollar amount limitation otherwise applicable by an additional $7,500.

"(3) No insurance shall be granted under this section to any such financial institution with respect to any obligation representing any such loan, advance of credit or purchase by it if the term to maturity of such loan, advance of credit or purchase exceeds—

"(A) fifteen years and thirty-two days if made for the purpose of financing alterations, repairs and improvements upon or in connection with an existing single-family structure or manufactured home, except that such limitation may be extended to twenty years and thirty-two days where financing the installation of a solar energy system is involved;

"(B) twenty years and thirty-two days if made for the purpose of financing the alteration, repair, improvement or conversion of an existing structure used or to be used as an apartment house or a dwelling for two or more families, except that such limitation may be increased to twenty-five years and thirty-two days where financing the installation of a solar energy system is involved;

"(C) twenty years and thirty-two days (twenty-three years and thirty-two days in the case of a manufactured home composed of two or more modules) if made for the purpose of financing the purchase of a manufactured home;

"(D) twenty years and thirty-two days (twenty-five years and thirty-two days in the case of a manufactured home composed of two or more modules) if made for the purpose of financing the purchase of a manufactured home and a suitably developed lot on which to place the home;

"(E) fifteen years and thirty-two days if made for the purpose of financing the purchase, by the owner of a manufactured home which is the principal residence of that owner, of a suitably developed lot on which to place that manufactured home;

"(F) twenty-five years and thirty-two days if made for the purpose of financing the preservation of an historic structure;

"(G) such term to maturity as the Secretary may prescribe if made for the purpose of financing the construction of a new structure for use in whole or in part for agricultural purposes; and

"(H) such term to maturity as the Secretary may prescribe if made for the purpose of financing fire safety equipment for a nursing home, extended health care facility, intermediate health care facility, or other comparable health care facility.

"(4) For the purpose of this subsection—

"(A) the term 'developed lot' includes an interest in a condominium project (including any interest in the common areas) or a share in a cooperative association; and

"(B) a loan to finance the purchase of a manufactured home or a manufactured home and lot may also finance the purchase of a garage, patio, carport, or other comparable appurtenance.

"(5) No insurance shall be granted under this section to any such financial institution with respect to any obligation representing any such loan, advance of credit, or purchase by it unless the obligation bears such interest, has such maturity, and contains such other terms, conditions, and restrictions as the Secretary shall prescribe, in order to make credit available for the purpose of this title. Any such obligation with respect to which insurance is granted under this section shall bear interest and insurance premium charges not exceeding (A) an amount, with respect to so much of the net proceeds thereof as does not exceed $2,500, equivalent to $5.50 discount per $100 of original face amount of a one-year note payable in equal monthly installments, plus (B) an amount, with respect to any portion of the net proceeds thereof in excess of $2,500, equivalent to $4.50 discount per $100 of original face amount of such note. The amounts referred to in clauses (A) and (B) of the preceding sentence when correctly based on tables of calculations issued by the Secretary or adjusted to eliminate minor errors in computation in accordance with requirements of the Secretary, shall be deemed to comply with such sentence.

"(6)(A) Any obligation with respect to which insurance is granted under this section may be refinanced and extended in accordance with such terms and conditions as the Secretary may prescribe, but in no event for an additional amount or term in excess of any applicable maximum provided for in this subsection.

"(B) The owner of a manufactured home lot purchased without assistance under this section but otherwise meeting the requirements of this section may refinance such lot under this section in connection with the purchase of a manufactured home if the borrower certifies that the home and lot is or will be his or her principal residence within six months after the date of the loan.".

INCREASE IN MAXIMUM LOAN LIMIT FOR MANUFACTURED HOME PARKS; MANUFACTURED HOME CONDOMINIUMS

SEC. 306. (a) Section 207(c)(3) of the National Housing Act is amended by striking out "$8,000" and inserting in lieu thereof "$9,000".

(b) Section 234(a) of such Act is amended by inserting "or a manufactured home or manufactured home and lot" after "one-family unit".

HOMEOWNER COUNSELING

SEC. 307. Section 106(a)(1)(iii) of the Housing and Urban Development Act of 1968 is amended to read as follows:

"(iii) default and delinquency counseling and advice to homeowners with respect to property maintenance, financial management, and such other matters as may be appropriate to assist them in improving their housing conditions and in meeting the responsibilities of homeownership;".

TECHNICAL AMENDMENTS

SEC. 308. (a) The last sentence of section 207(c)(3) section 213(p), the last proviso in section 220(d)(3)(B)(iii), section 221(k), the proviso in section 231(c)(2), and section 234(j) of such Act are amended—

(1) by inserting "therein" immediately after "installation" wherever it appears; and

(2) by striking out "therein" before the punctuation at the end thereof.

(b) Section 223(f) of such Act is amended—

(1) by inserting "and" immediately after the semicolon at the end of paragraph (2)(A); and

(2) by redesignating paragraph (5) as paragraph (4).

(c) For purposes of paragraphs (1) and (4) of section 308(c) of the Housing and Community Development Act of 1980, the term "mobile home" and the term "manufactured home" shall be deemed to include the term "mobile homes" and the term "manufactured homes", respectively.

(d)(1) The material preceding the proviso in clause (2) of the first sentence of section 234(c) of the National Housing Act is amended to read as follows: "(2) the project is or has been covered by a mortgage insured under any section (except section 213(a)(1) and (2)) of this Act or the project was approved for a guarantee, insurance, or a direct loan under chapter 37 of title 38, United States Code, notwithstanding any requirements in any such section that the project be constructed or rehabilitated for the purpose of providing rental housing:".

(2) Section 318 of the Housing and Community Development Act of 1980 is repealed.

FLOOD INSURANCE

SEC. 309. (a) Section 1319 of the National Flood Insurance Act of 1968 is amended by striking out "September 30, 1981" and inserting in lieu thereof "September 30, 1983".

(b) Section 1336(a) of such Act is amended by striking out "September 30, 1981" and inserting in lieu thereof "September 30, 1983".

(c) Section 1376(c) of such Act is amended by striking out "and" after "1980," and by inserting after "1981" the following: ", not to exceed $51,000,000 for the fiscal year 1982, and not to exceed $51,000,000 for the fiscal year 1983".

(d)(1) Section 1302(g) of such Act is repealed.

(2) Section 1370(c) of such Act is repealed.

(e) The amendments made by this section do not affect any obligations arising out of contracts entered into on or before the date of enactment of this Act.

RIOT AND CRIME INSURANCE

SEC. 310. (a) Section 1201 of the National Housing Act is amended—

(1) by striking out "C," in subsection (b)(1);

(2) by striking out "September 30, 1981" in subsection (b)(1) and inserting in lieu thereof "September 30, 1982"; and

(3) by striking out "and 1231(c) until September 30, 1984" in subsection (b)(1)(A) and inserting in lieu thereof "until September 30, 1982".

(b) Part C of title XII of such Act is repealed.

(c) The amendments made by this section do not affect any obligations arising out of contracts entered into on or before the date of enactment of this Act.

NEIGHBORHOOD REINVESTMENT CORPORATION

SEC. 311. Section 608(a) of the Housing and Community Development Amendments of 1978 is amended by striking out "and not to exceed $13,426,200 for fiscal year 1981" and inserting in lieu thereof "not to exceed $13,426,000 for fiscal year 1981, not to exceed $14,950,000 for fiscal year 1982, and not to exceed $14,950,000 for fiscal year 1983".

NATIONAL INSTITUTE OF BUILDING SCIENCES

SEC. 212. (a) Section 809(c)(4) of the Housing and Community Development Act of 1974 is amended by adding at the end thereof the following: "Notwithstanding any such rules and procedures as may be adopted by the Institute, the President of the United States shall appoint, by and with the advice and consent of the Senate, two of the members of the Board of Directors selected each year for terms commencing in that year, as representative of the public interest.".

(b) Section 809(h) of such Act is amended by striking out "1982" and inserting in lieu thereof "1987".

MODEL ZONING CODE

SEC. 313. The Secretary of Housing and Urban Development is authorized and directed to develop a model manufactured housing zoning code for use by appropriate local authorities.

LOWER COST TECHNOLOGY

SEC. 314. The Secretary of Housing and Urban Development is authorized to develop and implement a demonstration program utilizing lower cost building technology for projects located on innercity vacant land.

COMPILATION OF BASIC LAWS

SEC. 315. Not later than ninety days after the date of enactment of this Act, the Secretary of Housing and Urban Development shall publish a full and complete edition of the basic laws and authorities relating to housing and community development reflecting changes and additions occasioned by this Act. Such publication shall carry annotations reflecting periodic changes to basic laws and a description of provisions which are replaced or amended. The Secretary of Housing and Urban Development shall forward copies of such publication to the Chairman of the Committee on Banking, Housing, and Urban Affairs of the Senate and the Chairman of the Committee on Banking, Finance and Urban Affairs of the House of Representatives. A revised edition of such basic laws and authorities shall be published not later than ninety days after the enactment of any subsequent housing and community development authorizing legislation.

USURY PROVISION

SEC. 316. Section 501(a)(1)(C)(vi) of the Depository Institutions Deregulation and Monetary Control Act of 1980 is amended by inserting "or residential manufactured home" after "residential real property".

NATIONAL CONSUMER COOPERATIVE BANK

SEC. 317. (a) Section 108 of the National Consumer Cooperative Bank Act is amended by adding at the end thereof the following:

"(f)(1) Effective on and after the date of enactment of the Housing and Community Development Amendments of 1981—

"(A) the Bank may not make any new commitment for a loan or guarantee; and

"(B) the Bank may not issue any obligations pursuant to section 107.

"(2) All amounts received by the Bank as repayments of principal and payments of interest or other charges or fees in connection with loans or guarantees shall be paid into the Treasury of the United States as miscellaneous receipts not later than thirty days after receipt by the Bank, except that the Bank may pay out of such amounts its operating expenses in an amount each year not to exceed that amount determined by the Comptroller General of the United States to be necessary for that year, but the total amount of such expenses shall not exceed the cost which would have been incurred if the Bank were terminated during fiscal year 1981 and its functions transferred to the Secretary of the Treasury.".

(b) Section 105(a)(5) of such Act is amended to read as follows:

"(5) in the case of a primary cooperative organization—

"(A) restricts its voting control to members or voting stockholders on a one vote per person basis, except that this requirement shall not apply to any housing cooperative existing on March 21, 1980, which did not meet such requirement on that date; and

"(B) takes positive steps to insure eco-

nomic democracy and maximum participation by members of the cooperative including the holding of annual meetings and, in the case of organizations owned by groups of cooperatives, provides positive protections to insure economic democracy;".

RESCISSION OF 1981 AUTHORITY

SEC. 318. Notwithstanding any other provision of law, the Secretary of Housing and Urban Development may not obligate or expend $5,552,000,000 of budget authority provided for fiscal year 1981.

MORTGAGE INSURANCE FOR HOSPITALS

SEC. 319. Section 242(d)(5) of the National Housing Act is amended by adding the following paragraph at the end thereof: *"Provided, however,* That the foregoing shall not limit the ability of the Secretary to approve a mortgage increase for any changes by the Secretary on any mortgage eligible for insurance under this subpart for which an application for increase had been made within two years of enactment.".

TITLE IV—MULTIFAMILY MORTGAGE FORECLOSURE

SHORT TITLE

SEC. 401. This title may be cited as the "Multifamily Mortgage Foreclosure Act of 1981".

FINDINGS AND PURPOSE

SEC. 402. (a) The Congress finds that—

(1) disparate State laws under which the Secretary of Housing and Urban Development forecloses real estate mortgages which the Secretary holds pursuant to title II of the National Housing Act or section 312 of the Housing Act of 1964 covering multiunit residential and nonresidential properties burden the programs administered by the Secretary pursuant to these authorities, and cause detriment to the residents of the affected projects and the community generally;

(2) long periods to complete the foreclosure of these mortgages under certain State laws lead to deterioration in the condition of the properties involved; necessitate substantial Federal management and holding expenditures; increase the risk of vandalism, fire loss, depreciation, damage, and waste with respect to the properties; and adversely affect the residents of the projects and the neighborhoods in which the properties are located;

(3) these conditions seriously impair the Secretary's ability to protect the Federal financial interest in the affected properties and frustrate attainment of the objectives of the underlying Federal program authorities, as well as the national housing goal of "a decent home and a suitable living environment for every American family";

(4) application of State redemption periods to these mortgages following their foreclosure would impair the salability of the properties involved and discourage their rehabilitation and improvement, thereby compounding the problems referred to in clause (3);

(5) the availability of a uniform and more expeditious procedure for the foreclosure of these mortgages by the Secretary and continuation of the practice of not applying postsale redemption periods to such mortgages will tend to ameliorate these conditions; and

(6) providing the Secretary with a nonjudicial foreclosure procedure will reduce unnecessary litigation by removing many foreclosures from the courts where they contribute to overcrowded calendars.

(b) The purpose of this title is to create a uniform Federal foreclosure remedy for multiunit residential and nonresidential mortgages held by the Secretary of Housing and Urban Development pursuant to title II of the National Housing Act or section 312 of the Housing Act of 1964.

DEFINITIONS

SEC. 403. As used in this title—

(1) "mortgage" means a deed of trust, mortgage, deed to secure debt, security agreement, or any other form of instrument under which any interest in property, real, personal or mixed, or any interest in property including leaseholds, life estates, reversionary interests, and any other estates under applicable State law, is conveyed in trust, mortgaged, encumbered, pledged, or otherwise rendered subject to a lien, for the purpose of securing the payment of money or the performance of an obligation;

(2) "multifamily mortgage" means a mortgage held by the Secretary pursuant to title II of the National Housing Act or section 312 of the Housing Act of 1964 covering any property, except a property on which there is located a one- to four-family residence;

(3) "mortgage agreement" means the note or debt instrument and the mortgage instrument, deed of trust instrument, trust deed, or instrument or instruments creating the mortgage, including any instrument incorporated by reference therein (including any applicable regulatory agreement), and any instrument or agreement amending or modifying any of the foregoing;

(4) "mortgagor" means the obligor, grantor, or trustor named in the mortgage agreement and, unless the context otherwise indicates, includes the current owner of record of the security property whether or not personally liable on the mortgage debt;

(5) "person" includes any individual, group of individuals, association, partnership, corporation, or organization;

(6) "record" and "recorded" include "register" and "registered" in the instance of registered land;

(7) "security property" means the property, real, personal or mixed, or an interest in property, including leaseholds, life estates, reversionary interests, and any other estates under applicable State law, together with fixtures and other interests subject to the lien of the mortgage under applicable State law;

(8) "State" means the several States, the District of Columbia, the Commonwealth of Puerto Rico, the territories and possessions of the United States, and the Trust Territory of the Pacific Islands, and Indian tribes as defined by the Secretary;

(9) "county" means county as defined in section 2 of title I, United States Code; and

(10) "Secretary" means the Secretary of Housing and Urban Development.

MORTGAGES SUBJECT TO ACT

SEC. 404. Multifamily mortgages held by the Secretary encumbering real estate located in any State may be foreclosed by the Secretary in accordance with this title, or pursuant to other foreclosure procedures available, at the option of the Secretary.

DESIGNATION OF FORECLOSURE COMMISSIONER

SEC. 405. A foreclosure commissioner or commissioners designated pursuant to this title shall have a nonjudicial power of sale as provided in this title. Where the Secretary is the holder of a multifamily mortgage, the Secretary may designate a foreclosure commissioner and, with or without cause, may designate a substitute foreclosure commissioner to replace a previously designated foreclosure commissioner, by executing a duly acknowledged, written designation stating the name and business or residential address of the commissioner or substitute commissioner. The designation shall be effective upon execution. Except as provided in section 408(b), a copy of the designation shall be mailed with each copy of the notice of default and foreclosure sale served by mail in accordance with section 409(1). The foreclosure commissioner, if a natural person, shall be a resident of the State in which the security property is located and, if not a natural person, the foreclosure commissioner must be duly authorized to transact business under the laws of the State in which the security property is located. The foreclosure commissioner shall be a person who is responsible, financially sound and competent to conduct the foreclosure. More than one foreclosure commissioner may be designated. If a natural person is designated as foreclosure commissioner or substitute foreclosure commissioner, such person shall be designated by name, except that where such person is designated in his or her capacity as an official or employee of the government of the State or subdivision thereof in which the security property is located, such person may be designated by his or her unique title or position instead of by name. The Secretary shall be a guarantor of payment of any judgment against the foreclosure commissioner for damages based upon the commissioner's failure properly to perform the commissioner's duties. As between the Secretary and the mortgagor, the Secretary shall bear the risk of any financial default by the foreclosure commissioner. In the event that the Secretary makes any payment pursuant to the preceding two sentences, the Secretary shall be fully subrogated to the rights satisfied by such payment.

PREREQUISITES TO FORECLOSURE

SEC. 406. Foreclosure by the Secretary under this title of a multifamily mortgage may be commenced, as provided in section 408, upon the breach of a covenant or condition in the mortgage agreement for which foreclosure is authorized under the mortgage if any previously pending proceeding, judicial or nonjudicial, separately instituted by the Secretary to foreclose the mortgage other than under this title has been withdrawn, dismissed, or otherwise terminated. No such separately instituted foreclosure proceeding on the mortgage shall be instituted by the Secretary during the pendency of foreclosure pursuant to this title. Nothing in this title shall preclude the Secretary from enforcing any right, other than foreclosure, under applicable State law, including any right to obtain a monetary judgment. Nothing in this title shall preclude the Secretary from foreclosing under this title where the Secretary has obtained or is seeking any other remedy available pursuant to Federal or State law or under the mortgage agreement, including, but not limited to, the appointment of a receiver, mortgage-in-possession status or relief under an assignment of rents.

NOTICE OF DEFAULT AND FORECLOSURE SALE

SEC. 407. (a) The notice of default and foreclosure sale to be served in accordance with this title shall be subscribed with the name and address of the foreclosure commissioner and the date on which subscribed, and shall set forth the following information:

(1) the names of the Secretary, the original mortgagee and the original mortgagor;

(2) the street address or a description of the location of the security property, and a description of the security property, or so much thereof as is to be offered for sale, sufficient to identify the property to be sold;

(3) the date of the mortgage, the office in which the mortgage is recorded, and the liber and folio or other description of the location of recordation of the mortgage;

(4) the failure to make payment, including the due date of the earliest installment payment remaining wholly unpaid as of the date the notice is subscribed, or the description of other default or defaults upon which foreclosure is based, and the acceleration of the secured indebtedness;

(5) the date, time, and place of the foreclosure sale;

(6) a statement that the foreclosure is being conducted pursuant to the Multifamily Mortgage Foreclosure Act of 1981;

(7) the types of costs, if any, to be paid by the purchaser upon transfer of title; and

(8) the amount and method of deposit to be required at the foreclosure sale (except that no deposit shall be required of the Secretary), the time and method of payment of the balance of the foreclosure purchase price and other appropriate terms of sale.

(b) As a condition and term of sale, the Secretary may require that the purchaser at a foreclosure sale under this title agree to continue to operate the security property in accordance with the terms, as appropriate, of the loan program under section 312 of the Housing Act of 1964, the program under which insurance under title II of the National Housing Act was originally provided with respect to such property, or any applicable regulatory or other agreement in effect with respect to such property immediately prior to the time of foreclosure sale.

COMMENCEMENT OF FORECLOSURE

SEC. 408. (a) If the Secretary as holder of a multifamily mortgage determines that the prerequisites to foreclosure set forth in section 406 are satisfied, the Secretary may request the foreclosure commissioner to commence foreclosure of the mortgage. Upon such request, the foreclosure commissioner shall commence foreclosure of the mortgage, by commencing service of a notice of default and foreclosure sale in accordance with section 409.

(b) Subsequent to commencement of a foreclosure under this title, the Secretary may designate a substitute foreclosure commissioner at any time up to forty-eight hours prior to the time of foreclosure sale, and the foreclosure shall continue without prejudice, unless the substitute commissioner, in his or her sole discretion, finds that continuation of the foreclosure sale will unfairly affect the interests of the mortgagor. In the event that the substitute commissioner makes such a finding, the substitute commissioner shall cancel the foreclosure sale, or adjourn such sale in the manner provided in section 411(c). Upon designation of a substitute foreclosure commissioner, a copy of the written notice of such designation referred to in section 405 shall be served upon the persons set forth in section 409(1) of this title (1) by mail as provided in such section 409 (except that the minimum time periods between mailing and the date of foreclosure sale prescribed in such section shall not apply to notice by mail pursuant to this subsection) or (2) in any other manner, which in the substitute commissioner's sole discretion, is conducive to achieving timely notice of such substitution. In the event a substitute foreclosure commissioner is designated less than forty-eight hours prior to the time of the foreclosure sale, the pending foreclosure shall be terminated and a new foreclosure shall be commenced by commencing service of a new notion of default and foreclosure sale.

SERVICE OF NOTICE OF DEFAULT AND FORECLOSURE SALE

SEC. 409. The foreclosure commissioner shall serve the notice of default and foreclosure sale provided for in section 407 upon the following persons and in the following manner, and no additional notice shall be required to be served notwithstanding any notice requirements of any State or local law—

(1) NOTICE BY MAIL.—The notice of default and foreclosure sale, together with the designation required by section 405, shall be sent by certified or registered mail, postage prepaid and return receipt requested, to the following persons:

(A) the current security property owner of record, as the record exists forty-five days prior to the date originally set for foreclosure sale, whether or not the notice describes a sale adjourned as provided in this title;

(B) the original mortgagor and all subsequent mortgagors of record or other persons who appear of record or in the mortgage agreement to be liable for part or all of the mortgage debt, as the record exists forty-five days prior to the date originally set for foreclosure sale, whether or not the notice describes a sale adjourned as provided in this title, except any such mortgagors or persons who have been released; and

(C) all persons holding liens of record upon the security property, as the record exists forty-five days prior to the date originally set foreclosure sale, whether or not the notice describes a sale adjourned as provided in this title.

Notice under clauses (A) and (B) of this paragraph shall be mailed at least twenty-one days prior to the date of foreclosure sale, and shall be mailed to the owner or mortgagor at the address stated in the mortgage agreement, or, if none, to the address of the security property, or, at the discretion of the foreclosure commissioner, to any other address believed to be that of such owner or mortgagor. Notice under clause (C) of this paragraph shall be mailed at least ten days prior to the date of foreclosure sale, and shall be mailed to each such lienholder's address as stated of record or, at the discretion of the foreclosure commissioner, to any other address believed to be that of such lienholder. Notice by mail pursuant to this subsection or section 408(b) of this title shall be deemed duly given upon mailing, whether or not received by the addressee and whether or not a return receipt is received or the letter is returned.

(2) PUBLICATION.—A copy of the notice of default and foreclosure sale shall be published, as provided herein, once a week during three successive calendar weeks, and the date of last publication shall be not less than four nor more than twelve days prior to the sale date. The information included in the notice of default and foreclosure sale pursuant to section 407(a)(4) may be omitted, in the foreclosure commissioner's discretion, from the published notice. Such publication shall be in a newspaper or newspapers having general circulation in the county or counties in which the security property being sold is located. To the extent practicable, the newspaper or newspapers chosen shall be a newspaper or newspapers, if any is available, having circulation conducive to achieving notice of foreclosure by publication. Should there be no newspaper published at least weekly which has a general circulation in one of the counties in which the security property being sold is located, copies of the notice of default and foreclosure sale shall be posted in at least three public places in each such county at least twenty-one days prior to the date of sale.

(3) POSTING.—A copy of the notice of default and foreclosure sale shall be posted in a prominent place at or on the real property to be sold at least seven days prior to the foreclosure sale, and entry upon the premises for this purpose shall be privileged as against all persons. If the property consists of two or more noncontiguous parcels of land, a copy of the notice of default and foreclosure sale shall be posted in a prominent place on each such parcel. If the security property consists of two or more separate buildings, a copy of the notice of default and foreclosure sale shall be posted in a prominent place on each such building. Posting at or on the premises shall not be required where the foreclosure commissioner, in the commissioner's sole discretion, finds that the act of posting will likely cause a breach of the peace or that posting may result in an increased risk of vandalism or damage to the property.

PRESALE REINSTATEMENT

SEC. 410. (a) Except as provided in sections 408(b) and 411(c), the foreclosure commissioner shall withdraw the security property from foreclosure and cancel the foreclosure sale only if—

(1) the Secretary so directs the commissioner prior to or at the time of sale;

(2) the commissioner finds, upon application of the mortgagor at least three days prior to the date of sale, that the default or defaults upon which the foreclosure is based did not exist at the time of service of the notice of default and foreclosure sale; or

(3)(A) in the case of a foreclosure involving a monetary default, there is tendered to the foreclosure commissioner before public auction is completed the entire amount of principal and interest which would be due if payments under the mortgage had not been accelerated; (B) in the case of a foreclosure involving a nonmonetary default, the foreclosure commissioner, upon application of the mortgagor before the date of foreclosure sale, finds that such default is cured; and (C) there is tendered to the foreclosure commissioner before public auction is completed all amounts due under the mortgage agreement (excluding additional amounts which would have been due if mortgage payments had been accelerated), all amounts of expenditures secured by the mortgage and all costs of foreclosure incurred for which payment from the proceeds of foreclosure is provided in section 412, except that the Secretary shall have discretion to refuse to cancel a foreclosure pursuant to this clause if the current mortgagor or owner of record has on one or more previous occasions caused a foreclosure of the mortgage, commenced pursuant to this title or otherwise, to be canceled by curing a default.

(b) Prior to withdrawing the security property from foreclosure in the circumstances described in subsection (a)(2) or (a)(3), the foreclosure commissioner shall afford the Secretary a reasonable opportunity to demonstrate why the security property should not be so withdrawn.

(c) In any case in which a foreclosure commenced under this title is canceled, the mortgage shall continue in effect as though acceleration had not occurred.

(d) If the foreclosure commissioner cancels a foreclosure sale under this title, a new foreclosure may be subsequently commenced as provided in this title.

CONDUCT OF SALE; ADJOURNMENT

SEC. 411. (a) The date of foreclosure sale set forth in the notice of default and foreclosure sale shall not be prior to thirty days after the due date of the earliest installment wholly unpaid or the earliest occurrence of any uncured nonmonetary default upon which foreclosure is based. Foreclosure sale pursuant to this title shall be at public auction, and shall be scheduled to begin between the hours of 9 o'clock ante meridian and 4 o'clock post meridian local time on a day other than Sunday or a public holiday as defined by section 6103(a) of title 5, United States Code, or State law. The foreclosure sale shall be held at a location specified in the notice of default and foreclosure sale, which shall be a location where foreclosure real estate auctions are customarily held in the county or one of the counties in which the property to be sold is located, or at a courthouse therein, or at or on the property to be sold. Sale of security property situated in two or more counties may be held in any one of the counties in which any part of the security property is situated.

(b) The foreclosure commissioner shall conduct the foreclosure sale in accordance

with the provisions of this title and in a manner fair to both the mortgagor and the Secretary. The foreclosure commissioner shall attend the foreclosure sale in person, or, if there are two or more commissioners, at least one shall attend the foreclosure sale. In the event that no foreclosure commissioner is a natural person, the foreclosure commissioner shall cause its duly authorized employee to attend the foreclosure sale to act on its behalf. Written one-price sealed bids shall be accepted by the foreclosure commissioner from the Secretary and other persons for entry by announcement by the commissioner at the sale. The Secretary and any other person may bid at the foreclosure sale, including the Secretary or any other person who has submitted a written one-price bid, except that the foreclosure commissioner or any relative, related business entity or employee of such commissioner or entity shall not be permitted to bid in any manner on the security property subject to foreclosure sale. The foreclosure commissioner may serve as auctioneer, or, in accordance with regulations of the Secretary, may employ an auctioneer to be paid from the commission provided for in section 412(5).

(c) The foreclosure commissioner shall have discretion, prior to or at the time of sale, to adjourn or cancel the foreclosure sale if the commissioner determines, in the commissioner's sole discretion, that circumstances are not conducive to a sale which is fair to the mortgagor and the Secretary or that additional time is necessary to determine whether the security property should be withdrawn from foreclosure as provided in section 410. The foreclosure commissioner may adjourn a sale to a later hour the same day without the giving of further notice, or may adjourn the foreclosure sale for not less than nine nor more that twenty-four days, in which case the commissioner shall serve a notice of default and foreclosure sale revised to recite that the foreclosure sale has been adjourned to a specified date and to include any corrections the foreclosure commissioner deems appropriate. Such notice shall be served by publication, mailing and posting in accordance with section 409, except that publication may be made on any of three separate days prior to the revised date of foreclosure sale, and mailing may be made at any time at least seven days prior to the date to which the foreclosure sale has been adjourned.

FORECLOSURE COSTS

SEC. 412. The following foreclosure costs shall be paid from the sale proceeds prior to satisfaction of any other claim to such sale proceeds:

(1) necessary advertising costs and postage incurred in giving notice pursuant to sections 409 and 411;

(2) mileage for posting notices and for the foreclosure commissioner's attendance at the sale at the rate provided in section 1921 of title 28, United States Code, for mileage by the most reasonable road distance;

(3) reasonable and necessary costs actually incurred in connection with any necessary search of title and lien records;

(4) necessary out-of-pocket costs incurred by the foreclosure commissioner to record documents; and

(5) a commission for the foreclosure commissioner for the conduct of the foreclosure to the extent authorized by regulations issued by the Secretary.

DISPOSITION OF SALE PROCEEDS

SEC. 413. Money realized from a foreclosure sale shall be made available for obligation and expenditure first to cover the costs of foreclosure provided for in section 412; then to pay valid tax liens or assessments prior to the mortgage; then to pay any liens recorded prior to the recording of the mortgage which are required to be paid in conformity with the terms of sale in the notice of default and foreclosure sale; then to service charges and advancements for taxes, assessments, and property insurance premiums; then to the interest; then to the principal balance secured by the mortgage (including expenditures for the necessary protection, preservation, and repair of the security property as authorized under the mortgage agreement and interest thereon if provided for in the mortgage agreement); and then to late charges. Any surplus after payment of the foregoing shall be paid to holders of liens recorded after the mortgage and then to the appropriate mortgagor. If the person to whom such surplus is to be paid cannot be located, or if the surplus available is insufficient to pay all claimants and the claimants cannot agree on the allocation of the surplus, or if any person claiming an interest in the mortgage proceeds does not agree that some or all of the sale proceeds should be paid to a claimant as provided in this section, that part of the sale proceeds in question may be deposited by the foreclosure commissioner with an appropriate official or court authorized under law to receive disputed funds in such circumstances. If such a procedure for the deposit of disputed funds is not available, and the foreclosure commissioner files a bill of interpleader or is sued as a stakeholder to determine entitlement to such funds, the foreclosure commissioner's necessary costs in taking or defending such action shall be deductible from the disputed funds.

TRANSFER OF TITLE AND POSSESSION

SEC. 414. (a) The foreclosure commissioner shall deliver a deed or deeds to the purchaser or purchasers and obtain the balance of the purchase price in accordance with the terms of sale provided in the notice of default and foreclosure sale.

(b) The foreclosure deed or deeds shall convey all of the right, title, and interest in the security property covered by the deed which the Secretary as holder, the foreclosure commissioner, the mortgagor, and any other persons claiming by, through, or under them, had on the date of execution of the mortgage, together with all of the right, title, and interest thereafter acquired by any of them in such property up to the hour of sale, and no judicial proceeding shall be required ancillary or supplementary to the procedures provided in this title to assure the validity of the conveyance or confirmation of such conveyance.

(c) A purchaser at a foreclosure sale held pursuant to this title shall be entitled to possession upon passage of title to the mortgaged property, subject only to an interest or interest senior to that of the mortgage, and any other person remaining in possession thereafter shall be deemed a tenant at sufferance.

(d) There shall be no right of redemption, or right of possession based upon right of redemption, in the mortgagor or others subsequent to a foreclosure pursuant to this title.

(e) When conveyance is made to the Secretary, no tax shall be imposed or collected with respect to the foreclosure commissioner's deed, whether as a tax upon the instrument or upon the privilege of conveying or transferring title to the property. Failure to collect or pay a tax of the type and under the circumstances stated in the preceding sentence shall not be grounds for refusing to record such a deed, for failing to recognize such recordation as imparting notice of for denying the enforcement of such a deed and its provisions in any State or Federal court.

RECORD OF FORECLOSURE AND SALE

SEC. 415. (a) To establish a sufficient record of foreclosure and sale, the foreclosure commissioner shall include in the recitals of the deed to the purchaser or prepare an affidavit or addendum to the deed stating—

(1) that the mortgage was held by the Secretary;

(2) the particulars of the foreclosure commissioner's service of notice of default and foreclosure sale in accordance with sections 409 and 411;

(3) that the foreclosure was conducted in accordance with the provisions of this title and with the terms of the notice of default and foreclosure sale;

(4) a correct statement of the costs of foreclosure, calculated in accordance with section 412; and

(5) the name of the successful bidder and the amount of the successful bid.

(b) The deed executed by the foreclosure commissioner, the foreclosure commissioner's affidavit and any other instruments submitted for recordation in relation to the foreclosure of the security property under this title shall be accepted for recordation by the registrar of deeds or other appropriate official of the county or counties in which the security property is located upon tendering of payment of the usual recording fees for such instruments.

COMPUTATION OF TIME

SEC. 416. Periods of time provided for in this title shall be calculated in consecutive calendar days including the day or days on which the actions or events occur or are to occur for which the period of time is provided and including the day on which an event occurs or is to occur from which the period is to be calculated.

SEPARABILITY

SEC. 417. If any clause, sentence, paragraph or part of this title shall, for any reason, be adjudged by a court of competent jurisdiction to be invalid or invalid as applied to a class of cases, such judgment shall not affect, impair, or invalidate the remainder thereof and of this title, but shall be confined in its operation to the clause, sentence, paragraph, or part thereof directly involved in the controversy in which such judgment shall have been rendered.

REGULATIONS

SEC. 418. The Secretary is authorized to issue such regulations as may be necessary to carry out the provisions of this title.

TITLE V—RURAL HOUSING

AUTHORIZATIONS

SEC. 501. (a) Section 513 of the Housing Act of 1949 is amended—

(1) by striking out "not to exceed $3,797,600,000 with respect to the fiscal year ending September 30, 1981" in subsection (a) and inserting in lieu thereof "not to exceed $3,700,600,000 with respect to the fiscal year ending September 30, 1982";

(2) by striking out "not less than $3,120,000,000" in subsection (a)(1) and inserting in lieu thereof 'not less than $3,170,000,000";

(3) by striking out subsection (b)(2) and inserting in lieu thereof the following:

"(2) not to exceed $49,000,000 for loans and grants pursuant to section 504 for the fiscal year ending September 30, 1982, of which not more than $25,000,000 shall be available for grants;";

(4) by striikng out subsection (b)(3) and inserting in lieu thereof the following:

"(3) not to exceed $24,000,000 for financial assistance pursuant to section 516 for the fiscal year ending September 30, 1982;"; and

(5) by striking out "and" at the end of subsection (b)(4), by striking out the period at the end of subsection (b)(5) and inserting in lieu thereof "; and", and by adding at the end thereof the following:

"(6) not to exceed $2,000,000 for the purposes of section 509(c) for the fiscal year ending September 30, 1982.".

(b) Section 515(b)(5) of such Act is amended by striking out "September 30, 1981" and inserting in lieu thereof "September 30, 1982".

(c) Section 517(a)(1) of such Act is 1981" and inserting in lieu thereof "September 30, 1982".

(d) Section 521(a)(2)(D) of such Act is amended—

(1) by striking "$493,000,000" and inserting in lieu thereof "$398,000,000"; and

(2) by striking out "September 30, 1981" and inserting in lieu thereof "September 30, 1982".

(e) Section 523 of such Act is amended—

(1) by striking out "September 30, 1981" each place it appears in subsection (f) and inserting in lieu thereof "September 30, 1982";

(2) by adding at the end of subsection (f) the following: "None of the funds appropriated under this subsection shall be available for the purposes of subsection (b)(1)(B)."; and

(3) by striking out "not to exceed $2,500,000 for fiscal year 1981" in the first sentence of subsection (g) and inserting in lieu thereof "not to exceed $1,000,000 for fiscal year 1982".

DEFINITION OF LOW INCOME

SEC. 502. Section 501(b)(4) of the Housing Act of 1949 is amended to read as follows:

"(4) For the purpose of this title, the term 'persons of low income' and the term 'persons and families of low-income' mean persons and families whose incomes do not exceed those levels established for any area by the Secretary with adjustments for smaller and larger families.".

INTEREST SUBSIDY PROGRAM

SEC. 503. Section 521(a)(1)(B) of the Housing Act of 1949 is amended by striking out "shall" and inserting in lieu thereof "may".

REPORTS

SEC. 504. The Secretary of Agriculture shall transmit a report to the Congress not later than March 1, 1982, setting forth—

(1) various options for presenting the budget of the Farmers Home Administration and alternatives to the use of Federal Financing Bank financing for rural housing programs;

(2) workable definitions of "low income" which will target Farmers Home Administration housing assistance programs to a population substantially equivalent to the population served by the Department of Housing and Urban Development's assisted housing programs;

(3) the effect of a requirement that 30 per centum of assistance provided Farmers Home Administration be provided to families with incomes at 50 per centum of area median income and recommendations for contribution requirements which will achieve equity with the contribution requirements of the Department of Housing and Urban Development's assisted housing programs;

(4) recommendations for ensuring that subsidy levels for assisted families are minimized and that assisted families with similar circumstances in different regions of the country are treated equally; and

(5) the Farmers Home Administration's efforts to minimize the cost of housing subsidized under its programs and the Farmers Home Administration's use of existing lower cost housing technology.

Mr. LUGAR. Mr. President, I move to reconsider the vote by which the bill was passed.

Mr. STEVENS. I move to lay that motion on the table.

The motion to lay on the table was agreed to.

Mr. GARN. Mr. President, may I just speak briefly as chairman of the Banking Committee to compliment the managers on both sides in the expeditious way they have handled a very comprehensive housing bill.

I must admit that it may have been a mistake to let Senator LUGAR manage the bill because in the past years when I have it has always taken me at least 2 days to get this bill through the Senate and here he has managed to do it in one afternoon. I probably should not have allowed such expertise to be displayed in the Chamber. I will be displaced forever.

But very seriously I do wish to compliment the managers on both sides for the handling of this bill this afternoon.

Mr. STEVENS. Mr. President, it is the intention of the leadership that there will be no more votes this evening.

Mr. President, what is the pending business?

The PRESIDING OFFICER. There is no pending business.

ROUTINE MORNING BUSINESS

Mr. STEVENS. Mr. President, I ask unanimous consent that there now be a period for the transaction of routine morning business with Senators permitted to speak therein not to exceed 5 minutes each.

The PRESIDING OFFICER. Without objection, it is so ordered.

ANTITRUST SUITS BY FOREIGN GOVERNMENTS

Mr. PERCY. Mr. President, I was pleased to be added earlier this week as a cosponsor of S. 816, legislation to amend the Clayton Act to limit the circumstances under which foreign governments may sue for violations of the antitrust laws.

As the Senator from one of the major exporting States of this country and from a city which is a crossroad of international business and financial interests, I have made it a high priority throughout my Senate career to eliminate as many barriers as I can to the free flow of international trade and business relationships.

For this reason, I very strongly support the principle of S. 816:

That our Government and foreign governments should be on equal footing in U.S. courts and that foreign governments should not be denied the right to sue for antitrust damages in our courts so long as that right is similarly available to us in that foreign country.

In 1978, the Supreme Court ruled in an antitrust case referred to as Pfizer against India that a foreign government is a "person" as defined under section 4 of the Clayton Act and is thus entitled to bring treble damage antitrust actions in U.S. courts.

The pending legislation, S. 816, would modify this decision by amending the Clayton Act to specifically permit antitrust actions by a foreign government in American courts provided that:

Similar conduct is forbidden by the laws of that foreign government; that those laws are enforced and that the United States be permitted to recover actual damages for similar conduct under the foreign laws.

While I do subscribe to the principle on which the bill rests, I am concerned at the same time that the bill be a workable piece of legislation. Some recent reservations on the part of the State Department have been brought to my attention and I hope they can be resolved before this legislation reaches final passage.

Mr. President, I ask unanimous consent that a letter from the Department of State to my distinguished colleague, the chairman of the Judiciary Committee, be printed in the RECORD at this point.

There being no objection, the letter was ordered to be printed in the RECORD, as follows:

DEPARTMENT OF STATE,
Washington, D.C.

HON. STROM THURMOND,
Chairman, Committee on the Judiciary, U.S. Senate.

DEAR MR. CHAIRMAN: The Department of State's views have been requested concerning S. 816, a bill to amend the Clayton Act to limit the circumstances under which foreign governments may sue for violations of the antitrust laws.

The Department is not able to support this bill as it presently stands. The present text would restrict suits by both foreign governments and their instrumentalities, without further definition. The effect could be to affect suits by commercial instrumentalities of foreign governments which are, in fact, vigorous competitors in the marketplace fully subject to suit under our laws. Further, the present text incorporates a three-tiered test of reciprocity which could be very difficult, if not impossible, for any other country to meet, given the variations in concept and approach involved in even the most effective foreign competition laws. The result is that the bill, in its present form, could be inequitable and injurious to U.S. commercial interests abroad.

The Department could support this legislation if it were clarified in two respects. First, we believe it should clearly exclude the commercial instrumentalities of foreign governments from its coverage, so that an entity that would be subject to suit in the United States could likewise sue on the same basis as a private entity here. Second, we believe that the bill should be clarified to ensure that the reciprocity test could be met by countries that have strong and vigorously enforced antitrust legislation, such as the Federal Republic of Germany, even if that legislation may differ in its particulars from U.S. legislation.

Sincerely,

RICHARD FAIRBANKS,
Assistant Secretary for Congressional Relations.

Mr. PERCY. Mr. President, I appreciate the special effort made by the Judiciary Committee to accommodate the concerns of the State Department by adding report language to address both points raised in its letter.

I ask unanimous consent that the language from Senate Report 97–78, excerpted as follows, be printed in the RECORD at this point.

There being no objection, the excerpt was ordered to be printed in the RECORD, as follows:

THE ANTITRUST RECIPROCITY ACT OF 1981

The "similar conduct" test under the bill expresses the committee's understanding that the foreign government's competition laws need not be identical to U.S. antitrust laws in scope or formulation. What is necessary is

that the type of conduct at issue under the foreign government's section 4 complaint must have been prohibited by the laws of that nation, including any multinational treaty to which the nation is a party and which is enforceable through a damage action in the courts of that nation.

For example, section 1 of the Sherman Act broadly prohibits all contracts and combinations in restraint of trade. If a foreign government wishes to claim that it was victimized by price-fixing—one category of restraint covered by section 1 of the Sherman Act—it must establish only that its laws also prohibited price-fixing. It would be irrelevant that the foreign nation had not chosen to outlaw other types of restraints that are also reached by section 1, such as resale price maintenance agreements or tying arrangements.

In this way, the bill recognizes that foreign sovereigns can decide what kinds of anticompetitive conduct they want to prohibit and to determine how they want to formulate these prohibitions. In no sense, therefore, does the bill condition the antitrust rights of foreign governments, which have applicable and enforced competition laws, on a willingness to copy the particulars of U.S. statutes. In so interpreting the laws of a foreign state, a court may consider the representations of officials of the foreign state as well as those of relevant U.S. Government agencies such as the Department of State and the Department of Justice, or any other relevant evidence.

Finally, it should be noted that the bill applies only to suits by, or on behalf of, a "foreign government or an instrumentality of a foreign government." Thus, it applies to activities conducted by the foreign government, either directly or through subordinate units or entities that exercise sovereign power or act on its behalf. The bill is not intended, however, to apply to entities that conduct exclusively or primarily commercial activities, even though the government may be the sole or controlling owner of such commercial entities.

In determining whether the entity allegedly affected by the challenged conduct is covered by the provisions of S. 816, the definition of "commercial activity" found in the Foreign Sovereign Immunities Act, 28 U.S.C. section 1603(d), should be instructive. For example, the bill would apply to a procurement agency that is engaged primarily or exclusively in making purchases on behalf of a foreign government or on behalf of a public institution acting on behalf of the government, even if that procurement agency is separately established or incorporated. By contrast, the bill would not apply to a company that is primarily or exclusively engaged in standard commercial operations, like the manufacture of automobiles or the operation of an airline, even if a foreign government owns the company.

Mr. PERCY. Mr. President, I know that the concerns raised by the State Department were shared by some of our allies and major trading partners as well. The report language certainly goes a long way in expressing the intention of the committee to allay the fears of our friends abroad.

I hope that these matters can be further discussed on the floor when the bill is considered by the Senate.

I think we would render a service to ourselves, to U.S. businesses in the international markets, and to our allies by discussing these issues forthrightly on the floor as a means of avoiding any possible misunderstanding or injury to U.S. commercial interests abroad.

SPEECH BY NADEEM MAASRY

Mr. PERCY. Mr. President, the problem of how best to address current world economic problems created by the flow of capital to the OPEC nations and to meet the long-term capital requirements of the oil-consuming countries is an issue we must face. In a recent speech entitled, "Toward the Ideal Marriage: Energy Alternatives—and Middle East Funding," presented to the Business Week Executive Conference, Nadeem Maasry, vice president of Financial General Bankshares, provided some very useful insights into this problem. Mr. Maasry suggests a solution which promotes free trade and private enterprise. I ask unanimous consent that excerpts from Mr. Maasry's speech be printed in the RECORD at this point.

There being no objection, the material was ordered to be printed in the RECORD, as follows:

TOWARD THE IDEAL MARRIAGE: ENERGY ALTERNATIVES—AND MIDDLE EAST FUNDING

When the capital needs of the oil-consuming nations—both the rich and the poor—needed for development of alternative energy are compared with the petrofund surpluses, one is tempted to explore a pertinent set of questions. One such question was posed recently by a prominent American banker: Since the West possesses the technological capability to develop new energy sources and a capital surplus exists in the Middle East, it would seem to be a perfect marriage. I quote, "So it is not unrealistic to expect OPEC, sooner or later, directly or indirectly, to play an important role in the development of alternative energy."

I submit that in theory, such a marriage could take place and it would truly be a marriage made in heaven. But, in reality, I have to say today that too many disincentives exist for one to be very sanguine that such a perfect union will occur unless current circumstances are altered significantly.

In the majority of the oil-producing countries, insufficient private-sector framework exists to allocate the surplus to productive ends, creating the basis for long-term growth. Rather, in country after country, there are cadres of civil servants toiling within billowing bureaucracies, content to deposit oil revenues in risk-free bank deposits, treasury bonds and other secure instruments. It must be understood that the bulk of oil revenues rests in government hands, indeed in the hands of civil servants who cannot take risks and who are ultra-conservative in their investment policies. The civil servant is not interested in long-term returns.

I wish to emphasize today that there is an unfortunate, though perhaps understandable, lack of long-term planning in the bureaucracies and among the leadership in many of the surplus oil-producing countries. But coupled with that assessment is a fact of equal importance: Oil-consuming nations have demonstrated a shortsighted approach toward attracting the investment to petrofunds into alternative energy projects by failing to promote greater cooperation between the West and the Middle East; by failing to encourage the growth of private banking counterparts in the surplus countries and by failing to develop creative financing ideas.

Such investments would serve multiple purposes:

Provide, for the first time, reliable channels for the investment of petrofunds over the longer term.

Relieve oil-producing nations of the mounting pressure to deplete their petroleum reserves.

Diffuse inflationary pressures in the oil-producing lands by offering investment instruments that would be more attractive than real estate and other nonproductive opportunities.

Aid in the restructuring of the global economy in a manner serving the mutual interests of the oil-consuming and oil-producing nations.

A marriage between western alternative energy technology and petrofund surpluses might have been consummated by now if appropriate approaches had been made. But with far too much frequency, most approaches centered around transactions that featured the sale of technology for petrofunds rather than equity. There is no future in such deals.

Here and there, encouraging signs are to be seen in the types of quasi-governmental/private-sector ventures now being formed. They will serve as the transitional institutions to finance the underpinnings of a free market. But they are few and far between and are laboring against formidable odds. As long as the governments of the oil-rich nations dispense increasing social benefits to the populace and employ them in greater numbers as civil servants, the less likely it will be that a potential managerial class will be attracted to risk-oriented projects.

So, we are faced with the challenge of altering a vicious cycle, characterized by petrofunds, larger government bureaucracies, and woeful progress in realizing the potential of a thriving and lasting system of free enterprise.

In this influential audience and throughout this country are individual businessmen, investors and public policy leaders who could alter the present course of the Middle East economies by helping them to create the foundations of a private sector which will enhance political and economic stability and sustain commerce around the world in the years ahead.

After World War II, the world faced another mighty challenge. In a joint effort, the Marshall Plan was launched in Europe. Some $13 billion in government aid and billions more in private investment were expended and strong economies were created.

Today, despite the frictions of our time, it is still possible for business and society to be allies in the pursuit of both progress and the general good, but only if accommodations and compromises are made to arrest the slide toward economic disaster and only if preparations are accelerated for the transition to the new energy era.

This will require a new kind of relationship between oil-producing countries, developing nations and the industrialized states of the West. What is needed is a Marshall Plan in reverse—and I emphasize the word "Plan." Plans must be drawn up calling for U.S. and other western expertise, rather than money, to be made available and, if combined with local capital, that would create the kind of conditions which led to success in Europe. The key to such an unprecedented effort must be joint action taken interdependently. It will fail without that key

If it does fail, the dream of a perfect marriage between today's petrofunds and tomorrow's alternative energy sources will remain only a dream. This need not happen. Today, it behooves the western world and the oil-consuming nations to reexamine avenues and incentives for constructive petrofund investments of a kind that will assure the oil-producing nations secure long-term investment instruments instead of speculative, fly-by-night will-o'-the-wisps.

MR. NADEEM G. MAASRY

Mr. Maasry is Senior Vice President of Financial General Bankshares Inc., which is

one of the largest multi-bank bank holding companies with banks in five different jurisdictions in the United States. He is responsible for all international commitments.

Mr. Maasry was born in Lebanon and received his education at the American University of Beirut and at Johns Hopkins University in this country.

He is credited with conceiving of the idea as well as putting together and organizing the Kuwait Financial Centre in 1974, the first investment bank totally in the private sector in Kuwait with participation from a U.S. financial institution. The Kuwait Financial Centre has grown to a size of over $150 million by year-end 1980. It is therefore from his own personal experience in an oil surplus country that Mr. Maasry talks to us today about the necessity to help a nascent private sector in the financial markets of the oil countries to play a bigger role in energy project financing as well as other investments.

Mr. Maasry has served on a number of bank boards including Credit European in Luxembourg and the Kuwait Financial Centre in Kuwait. He has participated in several important conferences and symposia and written extensively on the subject of money and banking in the Arab world.

CITIZENSHIP EDUCATION

Mr. PERCY. Mr. President, the Center for Citizenship Education has brought to my attention a recent speech by Bob Stuart, chairman of the board, National Can Corp., delivered to students at Northwestern University in Chicago, Ill. This speech gives full meaning to positive citizenship development in America. For the interest of my colleagues, I ask unanimous consent that the speech be printed in the RECORD at this point.

There being no objection, the speech was ordered to be printed in the RECORD, as follows:

ADDRESS BY BOB STUART

In a matter of minutes the President of the United States will be addressing the Nation on a very important aspect of citizenship—an economic policy designed to insure continuing freedom for all Americans. The President, we are told by White House spokesmen, wishes to stress that while "patriotism" is at issue, acceptance of what appears to be a stringent economic policy is an act of survival. Also, he is urging all citizens not to penalize their congressional representatives for acceding to the proposed cuts in spending. "Do what is best for your country," he seems to be saying—the ultimate value of citizenship.

Back in 1976, the year of our Bicentennial Celebration, the Commissioner of Higher Education for the State of Utah delivered an address to a National Conference for Education and Citizenship in Kansas City. This conference invested nearly one-half million dollars to launch a new and badly needed effort to renew and restore an understanding of citizenship and the values and responsibilities of citizenship among American citizens. Regrettably nothing significant grew from that conference.

Today I come to you as a member of the board of the new Center for Citizenship Education which has launched a whole new thrust to bring that about, and has already brought together a major consortium of every conceivable type of organization and institution interested in promoting responsible citizenship, known as the Council for Advancement of Citizenship. In 1976 that Commissioner, delivered a speech entitled "Morality and Citizenship: Whose Responsibility?" I have recast that title somewhat to come up with my own for this evening: "The Moral Crisis in Citizenship Education: Whose Responsibility?"

Today that former Commissioner of Higher Education is our new Secretary of Education, appointed by a newly elected President. He is, of course, Terrel H. Bell. Dr. Bell can now look out across a nation in which the answer to the question he posed is as elusive as it was in 1976. At this point in our history, however, the question he raised stems not just from a national dilemma but truly from a national crisis. We seem to be cast adrift without a rudder in a sea of problems from which there is no escape. Where should we be heading? No one, at least no one we are willing to trust is pointing firmly and insistently toward the harbor or shoreline. Even if we should agree on where the shoreline is, who is going to take us there? If we all pull together, will we surely be saved? Or would it be better to strike out, each on his own "looking out for Number One," hoping that the others make it to safety too, but the devil take the hindmost?

Today we Americans are in a state of confusion closely bordering on malaise. We are no longer sure of who we are or where we are going. We are searching for meaning in life. Our youth are puzzled about whether there are truly any "eternal verities," or whether every decision "depends on the situation." Cheat on an exam? Why not? Gotta get that degree. Anyway, everybody else does it. Snitch on a colleague to gain favor with the boss? Hey, man, it's a dog-eat-dog world. Walk away from the scene of an accident or a crime? Ignore the victim? Of course! You're just asking for trouble if you get yourself involved.

I'm personally convinced that we have let the values of family and community life erode terribly. The overwhelming pressures today are in favor of again using the idiom "looking out for Number One." But can Number One, and that's me or to you that's you, working solely in his or her own self-interest, really protect themselves from our large-scale, quality of life-damaging problems: of inflation, unemployment, environmental degradation, juvenile crime, diminished international prestige and economic woes? Clearly, he or she cannot. They must join with others in common cause, as we have always joined in the past. And he will look for leadership, as we have always looked in the past—and generally found it.

In this inaugural year, we are all looking to the leadership of a newly elected President swept into office by a wave of public dissatisfaction. That dissatisfaction centered on the perception that so many of our national ills, both at home and abroad, were not getting better, but indeed seemed to be getting worse. Whether a new national leader can cure them remains to be seen. Certainly no mere president can do it without the wholehearted support of all of us.

Fortunately it appears that our new President Reagan will undertake to bring us together by reaffirming the values and responsibilities to which we have committed ourselves in the past. He has already reminded us that, while he is proud to have been elected President, he cannot do the job alone, that he must count on every one of us, whatever his or her station in life, to contribute their share to the overall effort to restore our faith in ourselves, our leaders, and our institutions. He will, we can expect, urge us to greater social service, accepting responsibilities to others and expressing that acceptance through concerted government/private sector/voluntary programs to revitalize our families, our neighborhoods, our communities, our agencies of self-government. The willingness we show to work together toward common goals, and to do so skillfully, are together the essence of good citizenship.

How do we move from a confused citizenry to a common condition of effective citizenship? We do it through a restoration of belief in our democratic heritage and of confidence in our mutual ability to surmount obstacles. What convictions, ethics, and values do we hold in common as Americans? We have always been able to answer that question in the past. Two hundred years of testing our democratic beliefs on the forge of hard times has left us a rich legacy from which to draw support for these trying days. They are implicit in the ethical and procedural systems we have developed over the decades—and which we so often take for granted—in fostering individual liberty, equality of opportunity, the rule of law, the American economic system, and our representative government.

Our new President's strategy in coping with the problems he faces must necessarily go far beyond reshaping political bureaucracies to make them more responsive to public needs and more cost-effective in their operations. To succeed, he must focus time and attention on citizenship development in the broadest sense of the term, from cradle to grave. He must include all of us into the process of setting goals and priorities, so that we can agree on where we as a nation ought to be going, and on how we are planning to get there. He must urge the committed to open their circles in welcome to those who are not, and get them committed too. In doing so, he will need the support of this business community, of nonpolitical organizations working in the public sector, of voluntary agencies, and of individual volunteers.

There are plenty of concerned citizens ready to help. Some of them met last spring at Wingspread in Wisconsin, to explore their common interest in strengthening citizenship competence in all its aspects. Representatives of business corporaticns, labor unions, educational institutions, and voluntary associations, they demonstrated their own good citizenship by joining together to create the Council for the Advancement of Citizenship. The goals of the new Council are several fold—to conduct intensive research on what is already going on in the field of citizenship development, to establish an information clearinghouse, and to develop a mass communications program, all with a view toward implementing a national movement at all levels of American life to promote a better understanding of citizenship opportunities and responsibilities.

Fortunately, President Reagan starts from a philosophic position favorable to developing a partnership relation with the private sector. He and his supporters regard the private arena as their natural home. They are citizens who represent private-sector values first and foremost, but who have won a victory in the political arena. They are ready to work with those of us who are committed to the development of those attitudes and citizenship skills which will help us navigate the shoals now upon us and lying just ahead, through a working partnership of public and private enterprise.

But President Reagan's team, fresh from victory at the polls, will find the going even rougher on the high seas. They have already bumped headlong into the established system, in mandating a Federal hiring freeze as a first order of business. Suddenly, they find themselves in confrontation with a bureaucracy skillfully defended by tenured civil servants and supported politically by powerful special-interest groups. In battling the established system on its own turf—or to continue our seaworthy analogy which I as a sailor, a rag and stick yachtsman, like to use—on its own surf the Reagan team has little more change of winning than any of his predecessors.

As we have seen, the Federal bureaucracy tends to change not as the President changes, nor even as the immediate political chief changes. Rather, the bureaucracy tends to

shift with its own constituency, its own special interest group or pressure group, sometimes as leader, sometimes as follower. When American farmers rise in indigation to oppose a regulation just published by the Department of Agriculture, the Department listens carefully and generally, mends its ways. But then, farmers have taken pains to organize in politically potent combinations.

American Indians, on the other hand, found the Bureau of Indian Affairs singularly unresponsive through the years, until they began to do the same. President Reagan will make the bureaucracy more responsive and efficient only as he persuades citizens as a whole to voice their general expectations for more responsive and efficient government in ways that compel the various bureaucracies to listen to the overall citizenry and not just the pressure group.

What then, is the answer? It can be found in citizenship development. Educate citizens in the rules and ethics of the game; show them where they have a voice and how to press the levers of power; and imbue them with the attitudes that go with winning. In this approach there will obviously lie peril for "couldn't-care-less" incumbents, but better government for the citizen-at-large.

The American business community has a special responsibility in responding affirmatively to the dialogue on social responsibility. The nation rightly attributes the extraordinary development of its resources to the aggressive, risk-taking, decision-making skill of uncounted business enterprises, large and small. No other nation has a comparable record. Moreover, business values have played a major role in shaping the American way of life.

Businessmen and business corporations have an outstanding record of social responsibility—first of course to their customers and then to their employees and even to their suppliers, as well as to their shareholders naturally, but also to the communities in which they do business. Top executives who manage public corporations have had to limit their corporations use of profits to support social and civic causes which would not return benefits directly and promptly to all the corporation's shareholders, because the corporation's profits belong to its shareholders; but in spite of that corporate managers have been quick to help address public problems where there could presumably be an indirect return to the corporation's shareholders. Especially have they frequently involved their corporations in dealing with those problems which could not possibly be solved as well, if at all, by government or by other nonbusiness institutions.

My own civic and charitable interests and commitments are but one example of personal and corporate involvement in such social responsibilities by business leaders across the nation. I could speak for hours on that subject alone, but at this moment I merely wish to express my admiration and respect for what businesses and business people are doing in so many individual fields.

However, I believe that in many ways in the movement to develop values and competencies for effective citizenship in the years ahead, business leaders will be increasingly sought after for support and guidance. Business executives know that support and guidance must be forthcoming, in a spirit of responsible citizenship, if business expects to see any reduction in the burden of government regulation and interference of which it complains so bitterly.

I do want to emphasize the moral aspect of our business way-of-life. Ultimate justification for that way-of-life does not lie in the number of automobiles produced, nor on the number of dishwashers and houses, nor even on the standard-of-living, no matter how high. Nor does ultimate justification lie in profits, the business profits are properly the immediate, legitimate objective of business enterprise, and the basis for our high standard of living, and for the continued existence of each business that contributes to it. Rather, it lies in the extraordinary opportunities our economic system provides for self-fulfillment of the individual citizen. More than any previous civilization, America has emphasized freedom and individualism.

The business comunity, in which so much American individualism has sought and found expression, without trampling on the opportunities of others, cannot and would not wish to escape responsibility for helping to provide and expand such opportunities in the future, for joining in the movement to develop effective citizens, and for making decisions that reflect such high ethical standards that the need for government regulation and interference will become superfluous, on the face of it.

Beyond the nurturing of individualism, business institutions have traditionally helped to maintain the Constitutional balance between the government and the society that government is designed to serve. Throughout history, societies have been unitary; that is, state and society have been one—static and, if not immutable, at least highly resistant to change. Only in relatively recent history and in Western Europe did an alternative institutional relationship gradually emerge. There, the separation of church and state created liberating tensions that encouraged the evolution of social and institutional relationships in response to changing needs.

Today, in our own society, the churches unaided cannot preserve an effective counterbalance to the state. Other institutions important to American life such as schools and educational institutions and the business corporation and the nonprofit voluntary association must also play institutional roles in citizenship development, expressing moral and ethical values through which individuals can relate courageously yet responsibly to the state.

As I mentioned previously, business corporations must and do necessarily express social responsibility beyond the goal of profits for shareholders. Business at one time intruded too heavily into the personal lives of its employees. With a swing of the pendulum business tried to bend over backwards not to influence its employees in political or religious or moral matters. Now business must get back into influencing its employees—to be good citizens. Just as the President of the United States must expand the base of citizen participation in public affairs, just so the corporation executive must expand the base of employee participation in corporate affairs.

Increasingly, businesses are institutionalizing employee input into the decision-making process in many areas—such concerns as employment conditions, retirement pensions and programs, but also in business operational goals, and more newly employee volunteer work, and support for worthy charities. Increasingly, they are seeking out opportunities for social service within the local and national communities. Some offer work-study opportunities or sponsor community-service programs, for young people still in high school or college. Others sponsor community-service opportunities for employees during their working years. A few are considering the merits of offering flexitime alternatives to full-time work for employees nearing the end of their company careers; in connection with the corporations general responsibility and helping make arrangements to phase its retirees into community service work, for those who are appalled at the prospect of closing out their active years "cold turkey." Many of these possibilities were explored by business leaders who attended a Wingspread Conference on "The Future of Employee Volunteering" last November.

These business initiatives and these citizen voluntary activities have an obvious tie-in with efforts the President might make to provide higher levels of citizenship participation in public affairs on a national scale. Community-service options for any citizen who wants to help solve a problem, even for men and women currently employed daily, and even more for those who are working part time, or not currently needing employment income, about to retire, can be geared toward revitalization of deteriorating urban neighborhoods and reversal of the process of urban decay.

City residents can and must play a major role in restoring economic and social vitality to distressed urban areas. That role might reasonably include participation in research on causes and effects of urban decay; and the planning of immediate and longer-term programs to reverse the process, but more likely personal involvement in the providing of essential services and the establishment and operation of self-help organizations in targeted neighborhoods, in logical extension of the citizenship participation principle.

The practice of real citizenship, responsible citizenship, involves three major facets. The one which everyone thinks of first is participation in the political process, i.e., voting in primaries as well as general elections, and preferably working for a candidate or candidates and a political organization or party. The second, which I have been emphasizing here today, is voluntary participation in solving the problems of one's community, state, and nation and making voluntary contributions of one's own time and energy to meet the needs of one's community and fellow citizens rather than leaving it all up to government to do. A third, which we have yet not touched on, and which I will not take your valuable time to elaborate on today because I think you already know it, is nevertheless every bit as important as the other two, and I want to remind you of it now and leave an emphasis on it with you before I bring these remarks to a close. It is living responsibly and ethically, complying with all proper laws and regulations, cooperating with the proper authorities in their legitimate performance of their duties, and observing those American traditions and customs which contribute to the quality of life of our nation, and perhaps most important, teaching and inspiring all those persons with whom we have influence to do likewise.

To really broaden the exercise of citizenship by all Americans, so that they properly embrace all three of those facets, will require a substantial educational effort.

Those of us who enjoy the advantages of a good education have a special responsibility to bring along those who do not. The job is developing good citizens—citizens who can cope with the complexities of the modern world, who respect themselves and care about others. That job is the responsibility of all of us. Let's hope for Presidential leadership that will show the way, clearly pointing out the opportunities for individual self-fulfillment through service to family, community and nation, urging us relentlessly to take advantage of those opportunities; and facilitating the process of developing effective functioning citizens in any way the federal government can do so. But let us never forget that first, last, and always, that the nation does not belong to the government or to the president. It is ours, and that what happens to it is really up to us.

What will you do?

MESSAGES FROM THE PRESIDENT

Messages from the President of the United States were communicated to the Senate by Mr. Saunders, one of his secretaries.

EXECUTIVE MESSAGES REFERRED

As in executive session, the Acting President pro tempore laid before the Senate messages from the President of the United States submitting sundry nominations which were referred to the appropriate committees.

(The nominations received today are printed at the end of the Senate proceedings.)

ANNUAL REPORT OF THE FEDERAL PREVAILING RATE ADVISORY COMMITTEE—MESSAGE FROM THE PRESIDENT—PM 57

The PRESIDING OFFICER laid before the Senate the following message from the President of the United States, together with an accompanying report; which was referred to the Committee on Governmental Affairs:

To the Congress of the United States:

In accordance with Section 5347(e) of Title 5 of the United States Code, I hereby transmit the 1980 Annual Report of the Federal Prevailing Rate Advisory Committee. The period covered by the report precedes my term of office.

RONALD REAGAN.

THE WHITE HOUSE, *June 3, 1981.*

MESSAGES FROM THE HOUSE

At 11:53 a.m., a message from the House of Representatives delivered by Mr. Berry, one of its clerks, announced that the House has passed the following bill, without amendment:

S. 1070. An act to extend the authorization for youth employment and demonstration programs, and for other purposes.

The message also announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 661. An act for the relief of Blanca Rosa Luna de Frei;

H.R. 688. An act for the relief of Junior Edmund Montcrieffe;

H.R. 783. An act for the relief of Roland Karl Heinz Vogel;

H.R. 1469. An act for the relief of Madeleine Mesnager;

H.R. 1480. An act for the relief of Omar Marachi;

H.R. 1550. An act for the relief of Aurora Isidra Rullan Diaz;

H.R. 2039. An act to amend chapter 37 of title 38, United States Code, to authorize the Administrator of Veterans' Affairs to guarantee home loans with provisions for variable-payment plans, and for other purposes;

H.R. 2136. An act to amend title 38, United States Code, to revise the provisions of such title relating to the construction and alteration of, and acquisition of land for, national cemeteries;

H.R. 2540. An act to authorize appropriations for the U.S. International Trade Commission, the U.S. Customs Service, and the Office of the U.S. Trade Representatives for fiscal year 1982, and for other purposes.

The message further announced that the House has agreed to the following concurrent resolution, in which it requests the concurrence of the Senate:

H. Con. Res. 76 Concurrent resolution expressing the sense of the Congress that the Secretary of the Army should place a plaque in Arlington National Cemetery honoring members of the U.S. Armed Forces who died during an attempt to rescue American hostages held in Iran.

At 4:52 p.m., a message from the House of Representatives, delivered by Mr. Gregory, one of its clerks, announced that the House has passed the following bills, in which it requests the concurrence of the Senate:

H.R. 1100. An act to amend title 38, United States Code, to expand eligibility of former prisoners of war for certain benefits and health-care services provided by the Veterans' Administration, and for other purposes;

H.R. 1714. An act to amend title 38, United States Code, to authorize the Veterans' Administration to furnish memorial headstones or markers to commemorate veterans who by choice are buried at sea or who donate their bodies to science, and for other purposes;

H.R. 2156. An act to amend title 38, United States Code, to extend by 12 months the period during which funds appropriated for grants by the Veterans' Administration for the establishment and support of new State medical schools may be expended;

H.R. 2185. An act for the relief of Hanife-Frantz;

H.R. 3423. An act to amend title 38, United States Code, to provide vocational education and training opportunities for certain Vietnam-era veterans, to establish a small business loan program for Vietnam-era veterans and disabled veterans, and for other purposes; and

H.R. 3499. An act to amend title 38, United States Code, to extend the Vietnam-era veterans' readjustment counseling program, to provide medical care for Vietnam veterans exposed to herbicide defoliants (including agent orange), to recover the cost of certain health care provided by the Veterans' Administration, and for other purposes.

HOUSE BILLS REFERRED

The following bills were read twice by unanimous consent, and referred as indicated:

H.R. 661. An act for the relief of Blanca Rosa Luna de Frei; to the Committee on the Judiciary.

H.R. 688. An act for the relief of Junior Edmund Montcrieffe; to the Committee on the Judiciary.

H.R. 783. An act for the relief of Roland Karl Heinz Vogel; to the Committee on the Judiciary.

H.R. 1469. An act for the relief of Madeleine Mesnager; to the Committee on the Judiciary.

H.R. 1480. An act for the relief of Omar Marachi; to the Committee on the Judiciary.

H.R. 1550. An act for the relief of Aurora Isidra Rullan Diaz; to the Committee on the Judiciary.

H.R. 1714. An act to amend title 38, United States Code, to authorize the Veterans' Administration to furnish memorial headstones or markers to commemorate veterans who by choice are buried at sea or who donate their bodies to science, and for other purposes; to the Committee on Veterans' Affairs.

H.R. 2039. An act to amend chapter 37 of title 38, United States Code, to authorize the Administrator of Veterans' Affairs to guarantee home loans with provisions for variable-payment plans, and for other purposes; to the Committee on Veterans' Affairs.

H.R. 2136. An act to amend title 38, United States Code, to revise the provisions of such title relating to the construction and alteration of, and acquisition of land for, national cemeteries; to the Committee on Veterans' Affairs.

H.R. 2185. An act for the relief of Hanife-Frantz; to the Committe on the Judiciary.

H.R. 3423. An act to amend title 38, United States Code, to provide vocational education and training opportunities for certain Vietnam-era veterans, to establish a small business loan program for Vietnam-era veterans and disabled veterans, and for other purposes; to the Committee on Veterans' Affairs.

HOUSE BILLS PLACED ON CALENDAR

The following bills were read twice and ordered placed on the calendar:

H.R. 1100. An act to amend title 38, United States Code, to expand eligibility of former prisoners of war for certain benefits and health-care services provided by the Veterans' Administration, and for other purposes.

H.R. 2540. An act to authorize appropriations for the U.S. International Trade Commission, the U.S. Customs Service, and the Office of the U.S. Trade Representatives for fiscal year 1982, and for other purposes.

H.R. 3499. An act to amend title 38, United States Code, to extend the Vietnam-era veterans' readjustment counseling program, to provide medical care for Vietnam veterans exposed to herbicide defoliants (including agent orange), to recover the cost of certain health care provided by the Veterans' Administration, and for other purposes.

HOUSE CONCURRENT RESOLUTION REFERRED

The following concurrent resolution was read, and referred as indicated:

H. Con. Res. 76 Concurrent resolution expressing the sense of the Congress that the Secretary of the Army should place a plaque in Arlington National Cemetery honoring members of the U.S. Armed Forces who died during an attempt to rescue American hostages held in Iran; to the Committee on Veterans' Affairs.

EXECUTIVE AND OTHER COMMUNICATIONS

The following communications were laid before the Senate, together with accompanying papers, reports, and documents, which were referred as indicated:

EC–1322. A communication from the Acting Director of the Defense Security Assistance Agency, transmitting, pursuant to law, a report on the Department of the Army's proposed letter of offer to Jordan for defense articles estimated to cost in excess of $25 million; to the Committee on Armed Services.

EC–1323. A communication from the Secretary of the Navy, transmitting a draft of proposed legislation to authorize the Secretary of Defense to count as reductions, positions downgraded from GS–13 and above to GS–12 and below in complying with the requirements of section 811(a) (1) and (2) of the Department of Defense Appropriation Authorization Act, 1978, (Public Law 95–79, 91 Stat. 323); to the Committee on Armed Services.

EC–1324. A communication from the Secretary of Defense, transmitting a draft of proposed legislation to amend titles 10 and 5, United States Code, to increase the number of Assistant Secretaries in the Department of Defense and for other purposes; to the Committee on Armed Services.

EC–1325. A communication from the Secretary of the Air Force, transmitting, pursuant to law, his decision to withdraw active Air Force support activities at Hancock Feld,

N.Y., during fiscal year 1983; to the Committee on Armed Services.

EC–1326. A communication from the Assistant Secretary of State for Congressional Relations, transmitting, pursuant to law, a report on the President's decision to extend a credit to the Socialist Republic of Romania in connection with its purchase of two nuclear steam generators; to the Committee on Banking, Housing, and Urban Affairs.

EC–1327. A communication from the Vice President of the U.S. Synthetic Fuels Corporation, transmitting, pursuant to law, the quarterly report of the Corporation for the period January 1 through March 31, 1981; to the Committee on Energy and Natural Resources.

EC–1328. A communication from the Acting Assistant Legal Advisor for Treaty Affairs of the Department of State, transmitting, pursuant to law, a report on international agreements, other than treaties, entered into by the United States in the 60-day period prior to May 28, 1981; to the Committee on Foreign Relations.

EC–1329. A communication from the Acting Inspector General of the Department of Health and Human Services, transmitting, pursuant to law, the report on the activities of the Office of Inspector General, Department of Health and Human Services, for the period January 1 through March 31, 1981; to the Committee on Governmental Affairs.

EC–1330. A communication from the Acting Administrator of the Veterans' Administration, transmitting, pursuant to law, the report of the Office of Inspector General, Veterans' Administration; to the Committee on Governmental Affairs.

EC–1331. A communication from the Acting Administrator of the National Aeronautics and Space Administration, transmitting, pursuant to law, the report of the Office of Inspector General, NASA, for the period ending March 31, 1981; to the Committee on Governmental Affairs.

EC–1332. A communication from the Mayor of the District of Columbia, transmitting a draft of proposed legislation to amend the District of Columbia Self-Government and Governmental Reorganization Act with respect to the National Capital service area; to the Committee on Governmental Affairs.

EC–1333. A communication from the Mayor of the District of Columbia, transmitting a draft of proposed legislation to authorize the transfer of the District of Columbia Employment Security Building to the Government of the District of Columbia; to the Committee on Governmental Affairs.

EC–1334. A communication from the Secretary of Health and Human Services, transmitting, pursuant to law, the report on the refugee resettlement program; to the Committee on the Judiciary.

EC–1335. A communication from the Acting Commissioner of Immigration and Naturalization, transmitting, pursuant to law, orders suspending deportation of certain aliens under section 244(a)(1) of the Immigration and Nationality Act; to the Committee on the Judiciary.

EC–1336. A communication from the Secretary of Education, transmitting, pursuant to law, a report entitled "The Condition of Education"; to the Committee on Labor and Human Resources.

EC–1337. A communication from the Acting Comptroller General of the United States, transmitting, pursuant to law, a report entitled "Changes Needed To Deter Violations of Fair Labor Standards Act"; to the Committee on Labor and Human Resources.

PETITIONS AND MEMORIALS

The following petitions and memorials were laid before the Senate and were referred or ordered to lie on the table as indicated:

POM–139. A petition from a citizen of Dallas, Tex., urging congressional cooperation with the efforts of the Reagan administration to strengthen the military power of the United States; to the Committee on Armed Services.

POM–140. A petition from a citizen of Plano, Tex., urging congressional cooperation with the efforts of the Reagan administration in strengthening the military power of the United States; to the Committee on Armed Services.

POM–141. A petition from a citizen of Plano, Tex., urging congressional cooperation with the efforts of the Reagan administration to strengthen the military power of the United States; to the Committee on Armed Services.

POM–142. A petition from a citizen of Plano, Tex., urging congressional cooperation with the efforts of the Reagan administration to strengthen the military power of the United States; to the Committee on Armed Services.

POM–143. A resolution adopted by the Berkley Rent Stabilization Board, opposing the vote of the Senate Banking Committee to restrict Federal housing subsidies to cities with local rent control laws; to the Committee on Banking, Housing, and Urban Affairs.

POM–144. Joint resolution adopted by the legislature of the State of Maine; to the Committee on Environment and Public Works:

"JOINT RESOLUTION

"We, your Memorialists, the Senate and House of Representatives of the State of Maine in the One Hundred and Tenth Legislature, now assembled, most respectfully present and petition the Honorable Ronald W. Reagan, President of the United States, as follows:

"Whereas, this body commends the efforts of the Administration and Congress to reduce inflationary pressures in the economy by recommending budget cuts as well as tax incentives for private capital investments; and

"Whereas, this body supports reductions of the various federal programs to achieve these objectives; however, there is great concern over the proposed elimination of future funding for the Economic Development Administration and the rescission of the remaining appropriations of fiscal year 1981 of the agency; and

"Whereas, the Public Works and Economic Development Act of 1965, by which the Economic Development Administration was established, has resulted in $131,684,993 being spent in Maine, amounting to 429 grants and loans; and

"Whereas, a large proportion of the EDA investment in Maine has been to those industries that have their basis in the state's natural resources—food processing facilities and forest product manufacturing or to assist declining industries such as textiles and shoes in some of the state's smaller towns and more isolated regions; and

"Whereas, investments in the private sector have created 8,570 permanent jobs and countless temporary jobs involved in the construction or expansion of industry in the State and local public works' projects have created over 25,000 temporary jobs and 17,050 permanent positions in the State; and

"Whereas, it has been our experience in Maine that the benefits from this program far outweigh the public cost whenever the increased economic activities resulting from investments have been thoroughly examined; and

"Whereas, over $25,000,000 worth of projects in Maine are pending funding at this time, $10,400,000 was being counted on for the development of 2 cargo ports and over $2,000,000 was anticipated for planning and technical assistance and for development of a statewide Revolving Loan Fund; and

"Whereas, included in the $25,000,000 are the fish piers for which the citizens of Maine have already approved a bond issue and only $2,000,000 of the anticipated $7,500,000 was received before the funding cut; and

"Whereas, projects with applications pending were notified by EDA that they should not expect to receive EDA assistance since fiscal year 1981 funds were sufficient to cover only those projects for which full approval had been given prior to the Administration's rescission proposal; now, therefore, be it

"*Resolved*, That we, your Memorialists, express our strong support for the Public Works Program of the Economic Development Administration and respectfully urge the Congress and the Honorable Ronald W. Reagan, President of the United States, to continue the funding of this program so as to permit the continued development of job-generating projects so necessary to the future well-being of this State and Nation; and be it further

"*Resolved*, That duly authenticated copies of this resolution be transmitted forthwith by the Secretary of State to the Honorable Ronald W. Reagan, President of the United States, the President of the Senate and Speaker of the House of Representatives of the United States Congress and to each member of the Maine Congressional Delegation."

POM–145. A resolution adopted by the Consulting Engineers Council of Texas, Inc., favoring the adoption of legislation relating to the development of needed energy and water resources projects; to the Committee on Environmental and Public Works.

POM–146. A resolution adopted by the House of Representatives of Puerto Rico; to the Committee on Governmental Affairs.

"RESOLUTION

"STATEMENT OF MOTIVES

"December 31, 1982, will mark the tenth anniversary of the disappearance of the renowned Puerto Rican sportsman, Roberto Clemente which occurred at the moment he was leaving his country to give a helping hand to the people of Nicaragua after it had suffered the effects of earthquakes which had left its capital city virtually in ruins.

"During his life, Roberto Clemente achieved goals within the sports world never before attained by a Puerto Rican, and only by a handful of other men in the sports world. Each day, his deeds exalted the name of Puerto Rico. During the off-season months, he returned to this island and shared his knowledge with the youth of Puerto Rico. He excelled as a father, upholding with his moral fiber, the unity of his family. In his life, Roberto set an example for Puerto Rico.

"When he disappeared more than eight years ago, the humanitarian phase of his personality remained in the minds of hundreds of millions of North Americans, Latin Americans and Puerto Ricans who mourned his death. He left his family and country on New Year's Eve, a night of great festivity, to accompany and deliver provisions collected in Puerto Rico for the people of Nicaragua.

"Normally, it is the birth of a person that is celebrated, not his death. Nevertheless, Clemente did not die alone; after a life full of great achievements Clemente did performing his greatest sacrifice and the most admirable of all his performances.

"It is proper that this humble, honest and humanistic son of the small town of Carolina be remembered with a commemorative stamp to be issued on December 31, 1982, in the city of Carolina that saw his birth and death.

"*Be it resolved by the House of Representatives of Puerto Rico:*

SECTION 1. To request, as it is hereby requested, that the United States Postal Service issue a postal commemorative stamp in homage to memory of the renowned Puerto Rican

sportsman, Roberto Clemente, on December 31, 1982, in the city of Carolina, Puerto Rico.

SEC. 2. To exhort all the civic, sports, and cultural organizations in Puerto Rico, as it is hereby exhorted, to make their opinion on such a significant matter known at the federal level.

"SEC. 3. A copy of this Resolution shall be sent to the Postmaster General of the United States, to the President of the United States, the Honorable Ronald Reagan; the Vice-President of the United States, the Honorable George Bush, the leaders of the Congress, and the Resident Commissioner of Puerto Rico, the Honorable Baltazar Corrado."

POM-147. A resolution adopted by the City Council of Waterford, Calif., expressing its support of efforts by the Federal Administration to return powers to local entities and urging a careful implementation of those efforts in ways that will enhance, not further impede, home rule; to the Committee on Governmental Affairs.

POM-148. A petition from a citizen of San Antonio, Tex., relating to the release of the indentity of intelligence agents; to the Select Committee on Intelligence.

POM-149. A resolution of the West Central Wardens and Superintendents Association, urging the development of funding programs to continue the upgrading of correctional service throughout the country; to the Committee on the Judiciary.

POM-150. A resolution adopted by the Southern Conference of Attorneys General, favoring increased drug enforcement efforts; to the Committee on the Judiciary.

POM-151. A resolution adopted by VFW Post 3803, Ville Platte Department of Louisiana, favoring the Reagan administration policies concerning veterans' hospitals and facilities; to the Committee on Veterans' Affairs.

REPORTS OF COMMITTEES

The following reports of committees were submitted:

By Mr. THURMOND, from the Committee on the Judiciary, without amendment:

S. 1033. A bill granting the consent of Congress to the agreement between the States of North Carolina and South Carolina establishing their lateral seaward boundary (Rept. No. 97-129).

By Mr. EAST (for Mr. THURMOND), from the Committee on the Judiciary, with an amendment in the nature of a substitute:

S. 823. A bill to provide for the payment of losses incurred as a result of the ban on the use of the chemical Tris in apparel, fabric, yarn, or fiber, and for other purposes (Rept. No. 97-130).

By Mr. HATCH, from the Committee on Labor and Human Resources:

Report to accompany the bill (S. 1200) to authorize appropriations for the National Science Foundation for the fiscal year 1982 (Rept. No. 97-131).

EXECUTIVE REPORTS OF COMMITTEES

The following executive reports of committees were submitted:

By Mr. McCLURE, from the Committee on Energy and Natural Resources:

Charles M. Butler, III, of Maryland, to be a Member of the Federal Energy Regulatory Commission for the remainder of the term expiring October 20, 1983.

Georgiana H. Sheldon, of Virginia, to be a Member of the Federal Energy Regulatory Commission for a term expiring October 20, 1984.

(The above nominations, reported from the Committee on Energy and Natural Resources, with the recommendation that they be confirmed, subject to the nominees' commitment to respond to requests to appear and testify before any duly constituted committee of the Senate.)

EXECUTIVE REPORTS OF COMMITTEES SUBMITTED DURING THE RECESS

The following executive reports of committees were submitted after the recess of the Senate on June 3, 1981, under authority of the order of the Senate of that date:

By Mr. THURMOND, from the Committee on Armed Services:

Tidal W. McCoy, of Virginia, to be an Assistant Secretary of the Air Force, vice Joseph Charles Zengerle III, resigned.

Joel E. Bonner, Jr., of Virginia, to be an Assistant Secretary of the Army, vice Alan J. Gibbs.

William R. Gianelli, of California, to be an Assistant Secretary of the Army, vice Michael Blumenfeld, resigned.

Harry N. Walters, of New York, to be an Assistant Secretary of the Army, vice William Eldred Peacock, resigned.

Mr. THURMOND. Mr. President, from the Committee on Armed Services, I report favorably the following nominations: Gen. Robert E. Huyser, U.S. Air Force (age 56), for appointment to the grade of general on the retired list; Lt. Gen. Hans H. Driessnack, U.S. Air Force, for appointment as senior U.S. Air Force member of the Military Staff Committee of the United Nations; Maj. Gen. William J. Livsey, Jr., U.S. Army, to be lieutenant general; Maj. Gen. Harold A. Hatch, U.S. Marine Corps, to be lieutenant general; Lt. Gen. Freddie L. Poston, U.S. Air Force (age 55), for appointment to the grade of lieutenant general on the retired list; Lt. Gen. Stanley M. Umstead, Jr., U.S. Air Force (age 52), for appointment to the grade of lieutenant general on the retired list; Lt. Gen. Richard L. West, Army of the United States (major general, U.S. Army) (age 56), to be placed on the retired list in the grade of lieutenant general; Maj. Gen. Ernest D. Peixotto, U.S. Army to be lieutenant general; Vice Adm. William N. Small, U.S. Navy, for appointment as Vice Chief of Naval Operations to the grade of admiral while so serving; Adm. Donald C. Davis, U.S. Navy (age 60), for appointment to the grade of admiral on the retired list; Rear Adm. Robert L. Walters, U.S. Navy, to be vice admiral; Maj. Gen. John K. Davis, U.S. Marine Corps, to be lieutenant general; and Lt. Gen. Charles M. Hall, Army of the United States (major general, U.S. Army) (age 56), to be placed on the retired list in the grade of lieutenant general. I ask that these names be placed on the Executive Calendar.

The PRESIDING OFFICER. Without objection, it is so ordered.

Mr. THURMOND. In addition, in the U.S. Navy and Naval Reserve, there are 284 temporary/permanent promotions to the grade of captain and below (list begins with Latimer T. Albert); in the Navy and Naval Reserve, there are 11 temporary/permanent appointments to the grade of captain and below (list begins with Kenneth J. Anderson); in the U.S. Navy Reserve there are 1,419 temporary promotions to the grade of captain and below (list begins with Reinaldo G. Alvarez); and in the Regular Air Force there are 490 appointments to the grade of major and below (list begins with George W. Berger). Since these names have already appeared in the RECORD and to save the expense of printing again, I ask unanimous consent that they be ordered to lie on the Secretary's desk for the information of any Senator.

The PRESIDING OFFICER. Without objection, it is so ordered.

(The nominations ordered to lie on the Secretary's desk were printed in the RECORD of May 11, May 19, and May 20, 1981, at the end of the Senate proceedings.)

INTRODUCTION OF BILLS AND JOINT RESOLUTIONS

The following bills and joint resolutions were introduced, read the first and second time by unanimous consent, and referred as indicated:

By Mr. DOLE (by request):

S. 1308. A bill to insure the confidentiality of information used by the Internal Revenue Service to develop standards for the examination or other investigation of returns under the Internal Revenue Code of 1954; to the Committee on Finance.

By Mr. GOLDWATER (for himself and Mr. JACKSON) (by request):

S. 1309. A bill for the relief of the estate of Dorothy Meserve Kunhardt; to the Committee on the Judiciary.

By Mr. BOSCHWITZ (for himself, Mr. CHAFEE, Mr. BURDICK, Mr. GORTON, Mr. HATCH, Mr. HAYAKAWA, Mr. HUMPHREY, Mr. JEPSEN, Mr. PERCY, Mr. TOWER, Mr. QUAYLE, Mr. ARMSTRONG, and Mr. KASTEN):

S. 1310. A bill to amend the Internal Revenue Code of 1954 to provide certain community development, employment, and tax incentives for individuals and businesses in depressed areas; to the Committee on Finance.

By Mr. SIMPSON (by request):

S. 1311. A bill to amend chapter 19 of title 38, United States Code, to permit the unrestricted assignment of a beneficiary's interest in the proceeds of a Government Life Insurance policy in cases involving contested claims, and to increase the amount an attorney may receive for representing a claimant in such cases, and for other purposes; to the Committee on Veterans' Affairs.

S. 1312. A bill to amend title 38, United States Code, to make adjustments and improvements in the vocational rehabilitation and education programs administered by the Veterans' Administration, and for other purposes; to the Committee on Veterans' Affairs.

S. 1313. A bill to amend title 38, United States Code, to provide additional flexibility within the Veterans' Administration's existing medical personnel management system; to the Committee on Veterans Affairs.

S. 1314. A bill to amend title 38, United States Code, to authorize funds to the Republic of the Philippines to assure the effective case and treatment of patients in the Veterans Memorial Medical Center; to the Committee on Veterans Affairs.

By Mr. SIMPSON:

S. 1315. A bill to amend title 38, United States Code, to provide that the pension of a veteran who is blind as a result of a non-service-connected disability and who is being furnished hospital care by the Veterans' Administration in a Veterans' Administration center operated exclusively for the rehabilitation of blinded veterans shall not be reduced because the period of care of such veteran extends more than three months; to the Committee on Veterans Affairs.

S. 1316. A bill to amend chapter 37 of title

38, United States Code, to authorize the Administrator of Veterans' Affairs to guarantee home loans with provisions for graduated-payment plans, and for other purposes; to the Committee on Veterans Affairs.

S. 1317. A bill to amend title 38, United States Code, to provide that remarriage of the surviving spouse of a veteran after age 62 shall not result in termination of dependency and indemnity compensation; to the Committee on Veterans Affairs.

By Mr. RIEGLE (for himself, Mr. LEVIN, and Mr. HATFIELD):

S. 1318. A bill to amend the Internal Revenue Code of 1954 with respect to State or local government obligations issued to finance certain beverage container facilities the construction of which is made necessary by an antidisposable beverage container law; to the Committee on Finance.

By Mr. BRADLEY:

S. 1319. A bill to amend the Internal Revenue Code of 1954 to provide for individual and corporate income tax reductions, and for other purposes; to the Committee on Finance.

By Mr. HEINZ:

S. 1320. A bill to amend the Internal Revenue Code of 1954 to modify the excise tax on trucks, buses, tractors, etc., and for other purposes; to the Committee on Finance.

By Mr. COCHRAN:

S. 1321. A bill to provide access to small businesses and other persons, of information concerning rules applicable to such businesses or persons; to the Committee on the Judiciary.

By Mr. COCHRAN (for himself and Mr. STENNIS):

S. 1322. A bill to designate the United States Department of Agriculture Boll Weevil Research Laboratory building, located on the campus of Mississippi State University, Starkville, Mississippi, as the "Robey Wentworth Harned Laboratory"; to the Committee on Agriculture, Nutrition, and Forestry.

By Mr. TSONGAS (for himself and Mr. KENNEDY):

S. 1323. A bill to amend the Internal Revenue Code of 1954 with respect to the residential energy and investment tax energy credits, and for other purposes; to the Committee on Finance.

By Mr. PERCY:

S.J. Res. 86. Joint resolution authorizing the President to proclaim the month of November, 1981 as "National REACT Month"; to the Committee on the Judiciary.

STATEMENTS ON INTRODUCED BILLS AND JOINT RESOLUTIONS

By Mr. DOLE (by request):

S. 1308. A bill to insure the confidentiality of information used by the Internal Revenue Service to develop standards for the examination or other investigation of returns under the Internal Revenue Code of 1954; to the Committee on Finance.

CONFIDENTIALITY OF TAXPAYER COMPLIANCE INFORMATION

● Mr. DOLE. Mr. President, today I am introducing legislation, at the request of the administration, to clarify the intent of Congress that the Internal Revenue Service's data base for its taxpayer compliance measurement program (TCMP) cannot be disclosed to private persons under the restrictions of section 6103 of the Internal Revenue Code.

TCMP SYSTEM

Under present Internal Revenue Service (IRS) procedures, most individual income tax returns selected for examination are picked on the basis of a scoring system. The development of variables used to arrive at the scores begins with carefully controlled audits pursuant to an audit program called the taxpayer compliance measurement program (or TCMP). This program is intended to serve the basic purposes of the Internal Revenue Service's general audit program, which involves approximately 2 million returns.

COURT DECISIONS PERMIT DISCLOSURE

Recent court decisions brought under the Freedom of Information Act have awarded plaintiff's access to these TCMP source materials with the deletion of all characteristics which would be used to identify particular taxpayers. In reaching their conclusions, the courts point to section 6103(b)(2) of the Internal Revenue Code (code) which excludes from the definition of protected return information "data in a form which cannot be associated with, or otherwise identify, directly or indirectly, a particular taxpayer." The courts construe the exclusion as compelling the editing and disclosure of return information.

DISCLOSURE UNWARRANTED AND HARMFUL TO IRS AUDIT PROGRAM

Neither the Freedom of Information Act nor the exclusion was intended to permit public disclosure of information which would seriously compromise the integrity of the self-assessment system of taxation. Maintaining the confidentiality of such information far outweighs any legitimate public interest in its disclosure or any benefit to be derived from disclosure. Furthermore, the purpose of the exclusion was to continue public access to anonymous statistical studies and compilations prepared for tax administration purposes and to require editing under the Freedom of Information Act only when the IRS adds identifiers to previously disclosable studies. The exclusion was not meant to compel the preparation of edited materials for public distribution upon demand.

If the TCMP source data are released, the IRS would be faced with the problem of developing an alternative audit selection system. The resulting costs to the IRS, both in terms of the resources needed to accomplish this task and the potential loss of tax revenues due to the use of a less effective audit selection system, would be immeasurable.

DISCLOSE ANONYMOUS DATA UNLESS DISCLOSURE IMPAIRS TAX ADMINISTRATION

This bill would amend the definition of return to include within the definition any data—whether or not identifiable—from which standards or other criteria or procedures can be derived for the selection of returns for examination or other investigation the disclosure of which the Service determines would seriously impair Federal tax administration. This addition is specifically intended to permit protection of the TCMP data base dealt with in the court cases. It would thus authorize disclosure of anonymous statistical tabulations based on the TCMP which the Service prepares for tax administration purposes the disclosure of which would not seriously impair Federal tax administration.

Although this addition to section 6103(b)(2) clarifies that the TCMP data base constitutes protected return information subject to disclosure only as provided by section 6103, its continued confidential use by the IRS is assured since other persons entitled to receive return information under the various provisions of that section would be unable to justify access to the information for the statutory purposes for which such access is authorized or required.

This legislation will prevent the adverse consequences to the tax system which disclosure of the data base would cause. The administration supports this bill and urges immediate consideration by the Congress.●

By Mr. BOSCHWITZ (for himself, Mr. CHAFEE, Mr. BURDICK, Mr. GORTON, Mr. HATCH, Mr. HAYAKAWA, Mr. HUMPHREY, Mr. JEPSEN, Mr. PERCY, Mr. TOWER, Mr. QUAYLE, Mr. ARMSTRONG and Mr. KASTEN):

S. 1310. A bill to amend the Internal Revenue Code of 1954 to provide certain community development, employment, and tax incentives for individuals and businesses in depressed areas; to the Committee on Finance.

URBAN JOBS AND ENTERPRISE ZONE ACT OF 1981

Mr. BOSCHWITZ. Mr. President, on behalf of Senator CHAFEE and myself, I am introducing today the "Urban Jobs and Enterprise Zone Act of 1981." This legislation, which has been the subject of much debate and discussion over the past year, was first introduced in the 96th Congress. And today, after having consulted with the vast majority of the leading urban organizations around the country, as well as many of our cities' mayors and businesses, we are reintroducing an amended version of this proposal which we feel will be far more effective in the task of creating jobs in our Nation's inner cities. Simultaneously today, an identical bill is also being introduced in the House of Representatives by Congressmen KEMP and GARCIA.

When this proposal was first introduced in the 96th Congress, Mr. President, the enthusiastic response was very gratifying. Mayors from all over the country wrote indicating support and offering their suggestions and recommendations, a number of which have been incorporated in this new bill that we are introducing today. Of course, not all agreed with each and every provision of the legislation, but all eagerly welcomed a fresh, new, and innovative approach to resolving the problems of poverty and joblessness in inner-city America.

After investing scores of billions of dollars in the so-called war on poverty over the last two decades, we have failed to provide any meaningful opportunity for advancement—an opportunity to get a foot up the ladder of success, so to speak. While our welfare programs provide crucial services, they, unfortunately, have created a system of dependency which has helped trap many of our poor in a self-perpetuating cycle of poverty. The Urban Jobs and Enterprise Zone Act attempts to break that cycle by offering a more lasting and rewarding alternative to welfare dependency—a job, and a job in the private sector, which will mean personal, economic, and societal growth.

The focus of this year's urban jobs legislation is the same as last year's: Small business development and job creation in the most distressed areas of our urban centers as well as depressed rural areas. The means to reach that end have changed somewhat, but the overall goal is still the same: job creation.

Those areas which HUD designates as enterprise zones based upon the severity of their economic distress will qualify for a package of benefits designed to lure job-creating businesses into the inner city. Any business that is willing to take the risk of locating in one of these zones and who will pledge to hire at least 40 percent of its workers from the unemployed labor force, will qualify for a lucrative series of Federal tax incentives.

By simply locating in the zone itself business will qualify for some of the incentives, but by employing at least 40 percent of the workers from the unemployed labor force, additional incentives will be available. And workers who take jobs in those zones will receive a 5 percent break on their personal income taxes up to $1,500 a year.

In keeping with last year's bill, this legislation is directed at small businesses. They create the vast majority of new jobs. In the past 10 years, nearly 20 percent of new private sector employment has come from businesses with 20 or fewer employees and 80 percent of new jobs have been created by businesses with less than 100 employees.

The source of that is a study, Mr. President, done by David Birch of the Massachusetts Institute of Technology.

Another advantage of small businesses, as compared to corporations, is the increased opportunity for rapid advancement. A person working in a small business has a one-to-one relationship with the boss, something that is not often the case in larger businesses. Too often, people at the lower end of the wage scale get lost in the shuffle of big business. However, from my own experience, I just do not think this is as prevalent in small businesses. The employer and employee identify more with one another. A person's qualities, problems, family, and ambitions cannot escape the boss' notice, and seldom do.

Furthermore, working in a small business is stimulating and exciting. Getting in on the ground floor of a new business, particularly a small business, allows you to see all the wheels turning at once before you. It offers a very effective method for advancement and a means to learn how businesses work so that eventually you'll be able to go into business yourself.

If people are going to maximize their efforts and abilities, there must be potential for them to rise above low-skilled minimum wage jobs—to see an opportunity to advance within a business. The urban jobs bill offers that potential.

As I have previously mentioned, the focus and concept of this legislation remains unchanged; however, we have developed a list of new incentives that will make these enterprise zones more attractive to businesses. After consulting with dozens of urban organizations, we concluded that the incentives needed to be strengthened to overcome the drawbacks of locating in an inner city.

The problems of crime, weak infrastructure support, city taxes, et cetera, remain a barrier to business development in these areas. Business already encounters the usual problems of tax burdens and a lack of startup capital and technical expertise; but when these are combined with the disadvantages of locating in a distressed area, businesses are hit with a double whammy, so to speak. Thus, our task is not only to make it attractive for entrepreneurs to invest in risk-taking ventures, but also to invest in new businesses that are located within the inner cities.

We have tackled this problem by combining a package of Federal and local incentives. Those cities that have UDAG eligible areas and can also show signs of high unemployment, poverty, out-migration, or abandonment of buildings, can apply to HUD for zone designation.

However, to receive designation, these cities will have to compete among one another on the basis of the severity of their economic distress plus their "local commitment." The cities, States, counties, and other municipal-type governments are encouraged to work together to construct a State and local package of incentives. Cities will then compete with other cities for zone designation on the basis of who can offer the most attractive package.

So, not only must cities qualify on the basis of their economic distress, but there has to be a local, State and county package of various types of incentives—property or income tax relief, relaxation of building codes, increased infrastructure support, et cetera—to augment the Federal package of tax incentives, that is, elimination of capital gains taxes, a 50-percent reduction in income taxes, a 5-percent refundable tax credit for wages paid to previously unemployed workers, et cetera. This local-Federal package addresses the problems that all small businesses face, as well as the particular problems of a business who has located in an inner city.

For the workers, there are also tax incentives. Instead of providing a break in the employee's social security taxes, this year's bill provides a refundable tax credit of up to $1,500 a year for all workers who are employed in the zone by a business with at least 40 percent CETA-eligible employees. That is quite a hefty supplement to their annual wages and an enormous advantage to the employee who chooses to work in one of these businesses.

In closing, Mr. President, I would like to say that as a small businessman myself, I think this legislation offers a very attractive package of incentives which will be successful in stimulating business development. It has always been my contribution to the formation of this bill, to look at it as a businessman and to decide what would entice me into a distressed area.

I think we have put together such a package and I am pleased to say that it has gained widespread support of both the Republican and Democratic Members in Congress. In addition, at our press conference today, Vernon Jordan, president of the National Urban League, wholeheartedly endorsed this legislation and urged that all Members of Congress—despite their party or ideological commitments—rally behind this proposal and see that it is enacted in the 97th Congress.

Mr. President, I have one last point that is worthy of mention. I want to make clear that outside of HUD's role as designator of the zones, the involvement of the Federal Government in this legislation is rather slight. We are not creating a vast new program that is going to cost the Federal Government billions of dollars. This is a program of private investment. This is a program of giving tax concessions to businesses to come into distressed areas so that they will put people back to work, put them on payroll and get them paying taxes. This is not a new form of a welfare program. We are simply trying to utilize the great free enterprise system to put people back to work and to revitalize inner city America.

Mr. BURDICK. Mr. President, will the Senator yield?

Mr. BOSCHWITZ. I yield to the Senator from North Dakota.

Mr. BURDICK. I would like to say to my friend from Minnesota that he is making a very important speech today. I am intrigued with his idea and I will certainly review it very carefully.

One question I have is, Who would administer this program?

Mr. BOSCHWITZ. Mr. President, in answer to the Senator's question there is no real administration. After HUD makes the choice of an area as an enterprise job zone, there really is no administration beyond that. I suppose HUD would have some oversight and see whether or not that particular zone is attracting business.

As a matter of fact, my good friend from North Dakota asks an interesting question that I would like to answer in two parts.

First of all, I know my friend is from a very rural State. It borders my State. Much of my State is rural. We have changed this bill from last year's model, so to speak, to include rural areas, areas that have 250,000 population or more, so that a county in his State or my State, virtually any county, would qualify.

Then they go to HUD and ask to be designated an enterprise zone. They are in competition with, presumably, hundreds of other counties and areas that also want to be designated an enterprise zone. The bill says that not more than 25 will be designated in a given year. So that community which comes with the best package of tax benefits to be combined with the Federal tax benefits when that community is chosen as an enterprise zone is the community that will be chosen.

Furthermore, if that community comes and says, "If we are designated an enterprise zone and give this tax package, plus the tax package that you, the Federal Government, will give, this employer, that employer, a series of employers have indicated or have signed contracts that they will locate there," that will certainly give great credibility and enhance the strength of that particular area to be designated an enterprise zone.

Mr. BURDICK. Let me ask my friend,

has he estimated what the tax loss might be to the Federal Government and to the various States?

Mr. BOSCHWITZ. Mr. President, the Senator from North Dakota asks a good question, as to what the tax loss would be.

It is very hard to judge that. Most of these areas are producing no taxes at the present time. Most of the employees, at least 40 percent of the employees, would be unemployed and, as a result, would be removed from the welfare rolls and become taxpayers instead. Because of that, we feel that the impact on revenues will not be great.

I might say that the Reagan administration has endorsed the concept and hopes that a bill of this nature will be passed in this Congress. That, perhaps, is an indication that there will not be too great a revenue loss.

Mr. BURDICK. I commend the Senator from Minnesota for this approach. It is certainly worth delving into.

Mr. BOSCHWITZ. I thank the Senator from North Dakota.

Mr. President, I ask unanimous consent that a fact sheet on the Urban Jobs Enterprise Zone Act, be printed in the RECORD.

There being no objection, the fact sheet was ordered printed in the RECORD, as follows:

FACT SHEET, URBAN JOBS ENTERPRISE ZONE ACT

A. AREA REQUIREMENTS

1. Area's population must be at least 4,000 if located within Standard Metropolitan Statistical Area of at least 50,000; area population must be 2,500 for other areas. Indian reservations are exempt from the population requirements.

2. Area must be UDAG (including pockets-of-poverty) eligible.

3. Area must meet one of the following criteria:

a. unemployment over last 18 months was at least 1½ times the national average;

b. was a low-income poverty area as determined by most recent census;

c. 70 percent of residents have income below 80 percent of the area median income.

d. population decline of at least 10 percent between 1970 and 1980 and either chronic abandonment of buildings or substantial tax arrearages.

4. Must submit a plan to HUD detailing local efforts to reduce various burdens borne by employers and employees.

B. DESIGNATION BY HUD

1. 10 to 25 zones per year.

2. Preference will be given to areas showing the greatest distress, which have the greatest community support and which submit the best plans (including economic incentives given by state, county and local governments).

C. BENEFITS AVAILABLE TO BUSINESS AND INVESTORS IN IT

1. 5 percent refundable tax credit for wages paid to CETA—eligible (Title II B or D, or Title IV A or B) employees who work in zone.

2. Elimination of the capital gains tax for all the new businesses and investors in them.

3. A package of local tax benefits as designed by each area when they bid to get Enterprise Zone designation.

D. ADDITIONAL BENEFITS AVAILABLE TO THOSE BUSINESSES WITH AT LEAST 40 PERCENT CETA-ELIGIBLE EMPLOYEES

1. Elimination of income tax on half of all income earned from operations within the zone or interest on loans to zone businesses.

2. May use cash accounting if receipts are less than $2 million per year.

3. Extension of loss carryover to 20 years.

E. BENEFITS AVAILABLE TO EMPLOYEES

1. If employed in the zone by a busines with at least 40 percent CETA-eligible employees, a 5 percent refundable tax credit for wages earned, up to a $1,500 credit per year.

● Mr. QUAYLE. Mr. President, I am pleased to join today with my colleagues, Senators BOSCHWITZ and CHAFEE in sponsoring a bill to establish free enterprise zones within some of our Nation's most economically depressed and blighted areas. While creation of these enterprise zones will not be a panacea for our urban ills, the use of incentives to promote new private enterprise and entrepreneurship in economically depressed regions is an idea whose time has come.

As chairman of the Subcommittee on Employment and Productivity, I will work to coordinate programs in our jurisdiction with this innovative proposal of tax incentives and tax reform. Several key elements of this new idea must be kept in mind: The goal is to create new business in the zones, not to foster development in these neighborhoods at the expense of other neighborhoods. The enterprise zone regulations must be simple, the essential concept is to make it easy for people to enter business. Any policy aiming to revive these depressed areas must emphasize small business and entrepreneurship, and not larger well-established operations. Finally, this bill is a bold new experiment, and as such provides for not more than 25 enterprise zones to be created each year for a 3-year period.

The legislation which I join in sponsoring has several features which must be noted. Small businesses established within an enterprise zone will automatically fall under the Regulatory Flexibility Act, providing substantial relief from the Federal regulations.

Further, our States and local governments have long awaited the kind of Federal tax incentives for depressed areas which this bill will provide. The Governor of Indiana recently signed into law legislation which will create an Enterprise Zone Commission. That commission will identify certain local taxes, rules and regulations to be made exempt in designated enterprise zones. With the passage of this Urban Jobs and Enterprise Zone Act, which I cosponsor today, we can begin to coordinate a truly unique approach to promoting free enterprise, revitalizing our urban centers, and creating jobs.●

● Mr. CHAFEE. Mr. President, the Urban Jobs and Enterprise Zone Act of 1981 offers our Nation's most distressed cities and towns an opportunity for economic rebirth.

Let me emphasize the concept of opportunity because it is just that. It is not the answer; it is not the miracle cure; it is not a massive, new spending program masquerading as salvation from Washington, D.C.

The enterprise zone idea and the support it has from President Reagan signal a new direction in American urban policy. It is founded on our belief that job creation in declining urban and rural areas can only be achieved by removing obstacles to economic growth and providing long-term incentives for people to live and work in these places.

It is time for our Federal Government to give up trying to prescribe solutions for the vast array of local economic problems in this Nation and, instead, offer a richer opportunity for local authorities to foster new jobs and entrepreneurial growth from the ground up.

This is the goal of the Urban Jobs and Enterprise Zone Act of 1981, which I am pleased to be reintroducing today. Having worked on this legislation for more than a year with Senator BOSCHWITZ, Congressman KEMP, and Congressman GARCIA, I believe we have made significant improvements over the original 1980 draft of the bill. We have also had the input and support of dozens of economic development experts from around the United States in producing this new bill. In particular, I want to express my appreciation for the help my staff and I have received in this effort from many concerned Rhode Islanders.

The act we propose today allows between 10 and 25 zones to be established in each of the next 3 years. Applications for zone designation will be considered from areas which meet tests of high unemployment and widespread poverty, and show a strong commitment on the part of local business, government and civic leaders to work together to enhance economic opportunities for people who live or work there. The Department of Housing and Urban Development (HUD) will be the administering agency.

The primary benefits under the Enterprise Zone Act are Federal tax reductions designed to increase new jobs and business investment in zone areas. These tax breaks will increase the rate of return on productive economic activity, helping to overcome the high costs associated with locating in distressed areas. Such costs might include training an unskilled workforce, protecting against crime and vandalism, and compensating for poor city services.

Zone employers will be given a 5 percent refundable tax credit for wages paid to CETA-eligible employees, that is, people who are considered long-term unemployed from economically disadvantaged families. The capital gains tax will also be eliminated on all new zone investments.

For zone businesses hiring at least 40 percent CETA-eligible workers, there are additional tax incentives. Income tax on half their profits will be eliminated. And, for those who lend capital to such zone enterprises, taxes will be eliminated on half the income from their loans.

For all workers in businesses with at least 40 percent CETA-eligible employees, there is a 5 percent refundable tax credit for wages earned, up to a $1,500 credit per year. This relief is provided in view of the fact that, in many cases, leaving welfare rolls also means leaving behind tax-free income and health benefits which can far exceed minimum or low wage salaries.

The act also recognizes that some Federal programs enacted in past years have been useful tools in economic develop-

ment projects. Therefore, special consideration will be given to applications from zone areas for assistance under programs such as the Urban Development Action Grant (UDAG), section 8 low-income housing, and CETA private sector job training.

I believe this legislation offers a fresh and effective approach to the perplexing problems of economic decline—an approach that can be used in the South Bronxes and South Providences of our Nation, as well as in depressed rural areas.

I will be conducting the first congressional hearings on the Urban Jobs and Enterprise Zone Act next month, on July 13 and 16, and I urge all my colleagues to support its enactment during this Congress.●

By Mr. SIMPSON (by request):

S. 1311. A bill to amend chapter 19 of title 38, United States Code, to permit the unrestricted assignment of a beneficiary's interest in the proceeds of a Government Life Insurance policy in cases involving contested claims, and to increase the amount an attorney may receive for representing a claimant in such cases, and for other purposes; to the Committee on Veterans' Affairs.

S. 1312. A bill to amend title 38, United States Code, to make adjustments and improvements in the vocational rehabilitation and education programs administered by the Veterans' Administration, and for other purposes; to the Committee on Veterans' Affairs.

S. 1313. A bill to amend title 38, United States Code, to provide additional flexibility within the Veterans' Administration's existing medical personnel management system; to the Committee on Veterans' Affairs.

S. 1314. A bill to amend title 38, United States Code, to authorize funds to the Republic of the Philippines to assure the effective case and treatment of patients in the Veterans Memorial Medical Center; to the Committee on Veterans' Affairs.

By Mr. SIMPSON:

S. 1315. A bill to amend title 38, United States Code, to provide that the pension of a veteran who is blind as a result of a non-service-connected disability and who is being furnished hospital care by the Veterans' Administration in a Veterans' Administration center operated exclusively for the rehabilitation of blinded veterans shall not be reduced because the period of care of such veteran extends more than 3 months; to the Committee on Veterans' Affairs.

S. 1316. A bill to amend chapter 37 of title 38, United States Code, to authorize the Administrator of Veterans' Affairs to guarantee home loans with provisions for graduated-payment plans, and for other purposes; to the Committee on Veterans' Affairs.

S. 1317. A bill to amend title 38, United States Code, to provide that remarriage of the surviving spouse of a veteran after age 62 shall not result in termination of dependency and indemnity compensation; to the Committee on Veterans' Affairs.

(The remarks of Mr. SIMPSON on this legislation appear earlier in today's RECORD.)

By Mr. BRADLEY:

S. 1319. A bill to amend the Internal Revenue Code of 1954 to provide for individual and corporate income tax reductions, and for other purposes; to the Committee on Finance.

TAX REDUCTION ACT OF 1981

Mr. BRADLEY. Mr. President, the bill I am introducing today offers a sorely needed alternative to the administration's tax proposal. Economists, investors, businessmen, academics, and Congressmen warn that the administration's tax bill will not put America on a course of sustained economic recovery, but will fuel inflation and force the Federal Reserve to slam on the monetary brakes. That is a formula for soaring interest rates, protracted recession, and unacceptable levels of unemployment.

My bill will correct some of the more glaring flaws and inefficiencies in the administration's proposals. It provides tax cuts to accelerate economic recovery, reduces inequities in the tax system, and increases incentives for work, saving and productive investment. The bill will reduce taxes by about $4.2 billion in fiscal year 1981 and $14.9 billion in calendar year 1981. In fiscal year 1982, the bill will cut taxes by about $35.6 billion and in calendar year 1982 by $48.8 billion. Over 40 percent of these tax cuts are specifically designed to stimulate savings, investment and productivity. The rest will offset the individual income and payroll tax increases. That will occur this year and next.

The President is promising that his tax bill will cure inflation, put Americans back to work, and cause a surge in their productivity to boot.

To achieve this outcome, the administration's tax package would have to induce a supply side miracle inspired by a radical, abrupt, yet sustained, increase in America's productivity growth. Actual experience teaches us that is highly unlikely. For the last 16 years, our productivity has grown at rates well below the high levels assumed by the administration. For the last 3 years, its growth has been negative.

Sustaining high productivity not only will require more investment in plant and equipment, but a more highly skilled labor force and changes in American management practices as well. None of these can occur quickly. It takes 5 to 10 years to build major new industrial facilities. Thus, even the new investment that the administration's tax bill is supposed to generate will not be contributing to productivity for a number of years.

Given the odds against a supply side miracle, it would be irresponsible for us to count on one in setting our Nation's economic policies. We must therefore modify the administration's tax proposals so that their inflationary thrust does not jeopardize our prospects for a robust economic recovery.

First, we must insure that any personal tax cuts offset inflation-induced tax increases and rising payroll taxes. The 10-percent uniform rate cut the President is advocating simply does not do this. Bracket creep and social security taxes impose a disproportionately heavy burden on middle- and low-income groups. Yet 10–10–10 delivers the bulk of its tax cuts to upper bracket taxpayers.

Second, we need a tax cut that, unlike the President's does not leave dramatically increased savings to chance. In 1980, the average American family saved 5.7 percent of its income. In the first 5 years of the 1960's there was essentially no inflation, rapid productivity growth, and great optimism. How much did the average American family save then? Six percent of its income.

To put that in perspective, remember that 6-percent savings rate includes the savings of high-income groups and involuntary savings such as contributions to pension plans. The median family does not save 6 percent of its income, and voluntary savings is much less than 6 percent. Moreover, it is not necessarily true that the high income individuals who are the prime beneficiaries of 10–10–10 will at the margin save more than middle-income individuals. On average they certainly save more, but they need not save more out of extra income. The high-income family might use a tax cut to buy a second home because they have enough put away for retirement. A middle-income family might save its tax cut because it is worried about how to survive during old age. Unfortunately, we just do not have much information on what marginal, as opposed to average, savings rates look like as one goes up the income scale.

But it seems clear that, at best 10–10–10 is unlikely to increase savings by more than 6 cents on the dollar. That will not give us the extra investment we need to restore productivity growth or to successfully challenge our international competitors. As a result of the baby boom, more workers for relatively the same equipment we would have to raise investment from 11 percent to between 13 percent and 14 percent of the GNP just to hold the amount of capital per worker constant. To keep up with the Japanese and Germans in terms of capital per worker, we would have to invest over twice that amount.

Beyond that, as long as we are running a deficit, each dollar that goes to reduce taxes will raise that deficit by much more than it will increase private savings. A dollar cut in taxes is a dollar less in revenue while a dollar less in taxes is historically 6 cents more in savings. For this reason, 10–10–10 will shrink, not swell, the domestic resources available for investment. Like apes on a treadmill, we will end up nowhere, while the shadow of our dwindling prosperity looms ever larger; 10–5–3, which is supposed to stimulate business investment, is equally inefficient and poorly targeted.

It will offer huge benefits to some firms, particularly the large capital-intensive ones, and very little to others. It will make investment particularly profitable where firms can borrow heavily, so that the combination of initial tax savings from rapid depreciation and the investment tax credit, high interest deductions and low equity will be a boon to tax shelter investment. It also will provide huge breaks for investments in office buildings and shopping centers. They last far longer than the 10 years in which they could be depreciated under the President's bill, and they also can be sold and written off many times. But we are most in need of industrial factories full

of equipment, not office buildings and shopping centers. And we need to boost innovation which, in turn, means much more investment in research and development. Yet 10–5–3 will discourage investment in the very industries we want to promote. If 10–5–3 is adopted, the tremendous incentive it provides for speculative building and tax shelters may very well end up sucking investment funds out of industry. That would mean less investment in industrial facilities and R. & D. after 10–5–3 is enacted than before.

My bill avoids these pitfalls. Its principal provisions are:

A reduction in rates for low- and middle-income taxpayers. The bottom rate would be reduced from 14 percent to 12 percent and all other rates would be lowered to help offset mounting social security taxes and inflation-induced income tax increases.

An increase in the personal exemption from $1,000 to $1,100 to benefit low- and middle-income taxpayers. This increase includes both the exemptions which taxpayers may claim for themselves and their dependents and the extra exemptions for the blind and the elderly.

An increase in the zero bracket amount (formerly the standard deduction) from $2,300 to $2,400 for single persons and from $3,400 to $3,600 for married couples who file joint returns. This also benefits low- and middle-income taxpayers.

An increase in the earned income credit for low-income taxpayers from 10 percent of the first $5,000 to 11 percent and an extension of the income ceiling from $10,000 to $11,000.

Easing of the burden on married couples with two incomes who pay much higher taxes than they would if they were single. This would be achieved by a new deduction of 10 percent or up to $4,000 of the earnings of the spouse with the lower income. This deduction would substantially lower the marriage penalty, enhance the equity of the tax system, and reduce the disincentives to work which result from the high tax rates applicable to the second earner's income.

Reduction of the top rate on investment income from 70 to 50 percent, phased in by 1982. This would eliminate the distinction between unearned income and provide substantial incentives for savings and investment.

Higher utilization of provisions for individual retirement savings by increasing the deduction for contributions to individual retirement accounts (IRA's) from $1,500 to $2,000; increasing the deduction for contributions to qualified pension plans from $7,500 to $15,000; and providing a new deduction of up to $1,000 for contributions to IRA's for employees participating in qualified pension plans. These provisions will reduce the inflationary thrust of individual tax cuts and give a substantial boost to capital formation. The bill also modifies the existing rules for pension plans to provide greater protection for rank-and-file employees and to prevent tax abuse.

Simplification and liberalization of the depreciation rules to eliminate the effect of inflation on capital recovery. This would be achieved by permitting business taxpayers to deduct the present value of all future depreciation allowances in the year an asset is purchased. This will provide substantial incentives for investment in new plant and equipment, but unlike 10–5–3 will not generate wasteful subsidies for buildings nor encourage tax shelter investments.

A 25 percent tax credit for certain expenditures on research and development, including R. & D. that the taxpayer pays universities to perform. This is intended to encourage risk taking and innovation to stimulate productivity and improve the competitiveness of our industries in international markets.

Mr. President, this approach is clearly preferable to the administration's proposals on both equity and efficiency grounds. But it is still a long way from the kind of radical tax cut America needs. Instead of 70 percent, or even 50 percent, I would like to see us lower the top individual rate to 30 percent. And rather than reducing the corporate tax burden by complicated depreciation allowances and increased investment tax credits, why not have a straightforward rate cut instead?

But the only way we can afford rate cuts of th's magnitude is by coming to grips with the special deductions, exclusions and credits that narrow the tax base and introduce wide disparities in tax liability among taxpayers with equal incomes.

The alarming proliferation of these special interest provisions threatens the integrity of our tax system. The main function of that system is to raise the revenues appropriate to our fiscal and distributive goals. In recent years, however, we have increasingly turned to the tax code to cure the social and economic ills that afflict our society. This ad hoc approach to tax policy and legislation has dangerously weakened and inordinately complicated the income tax. Many Americans know that the loopholes we have created enable wealthy individuals to avoid paying their fair share. The Internal Revenue Code is so complex that businessmen must get technical tax advice before making investment decisions which are then all too heavily influenced by consideration of the "tax angles." Tax forms are now so unwieldy that millions of low- and moderate-income Americans must pay to have their returns prepared, while the firms that do the preparing have become large and profitable.

Equally important is the way special interest tax provisions harm our economy. Today's tax subsidy is tomorrow's economic distortion. Because taxpayers act in reliance on these subsidies, it is virtually impossible to repeal them—even when their continuation siphons off scarce investment capital from more productive activities. And new subsidies are all too easily rationalized on the ground that special treatment for some has disadvantaged others.

Nothing in the administration's proposals even begins to address these problems. On the contrary, the administration's spending cuts will only motivate special interest groups to redouble their lobbying efforts to restore through the tax code what they lost in the budget. Mr. President, unless we reverse this trend in favor of greatly reduced rates and a truly comprehensive tax base, the only people paying income taxes will be the workers whose wages and salaries are subject to withholding.

In sum, Mr. President, while my tax bill is clearly preferable to the administration's, it is also true that neither of us goes far enough in lowering rates, reducing complexity and restoring equity. It is therefore high time that we assess the troubled state of our tax policy and make finding solutions an important national priority in the months ahead. I ask unanimous consent that the text of the bill be printed in the RECORD.

There being no objection, the bill was ordered to be printed in the RECORD, as follows:

S. 1319

Be it enacted by the Senate and House of Representatives of the United States of America in Congress assembled,

SECTION 1. SHORT TITLE; AMENDMENT OF 1954 CODE.

(a) SHORT TITLE.—This Act may be cited as the "Tax Reduction Act of 1981".

(b) AMENDMENT OF 1954 CODE.—Except as otherwise expressly provided, whenever in this Act an amendment or repeal is expressed in terms of an amendment to, or repeal of, a section or other provision, the reference shall be considered to be made to a section or other provision of the Internal Revenue Code of 1954.

TITLE I—INDIVIDUAL INCOME TAXES

SEC. 101. DECREASE IN MAXIMUM RATE TO 60 PERCENT IN 1981.

(a) IN GENERAL.—Section 1 (relating to tax imposed) is amended—

(1) by striking out in the table in subsection (a) all that follows the item relating to taxable income in excess of $85,600 but less than $109,400 and inserting in lieu thereof the following:

"Over $109,400	$47,544, plus 60% of excess over $109,400.";

(2) by striking out in the table in subsection (b) all that follows the item relating to taxable income in excess of $60,600 but less than $81,800 and inserting in lieu thereof the following:

"Over $81,800	$35,055, plus 60% of excess over $81,800.";

(3) by striking out in the table in subsection (c) all that follows the item relating to taxable income in excess of $41,500 but not over $55,300 and inserting in lieu thereof the following:

"Over $55,300	$20,982, plus 60% of excess over $55,300.";

and

(4) by striking out in the table in subsection (d) all that follows the item relating to taxable income in excess of $42,800 but less than $54,700 and inserting in lieu thereof the following:

"Over $54,700	$23,772, plus 60% of excess over $54,700.".

(b) EFFECTIVE DATE.—The amendments made by this section shall apply to taxable years beginning in 1981.

SEC. 102. RATE CUTS FOR 1982 AND AFTER; INCREASE IN ZERO BRACKET AMOUNTS.

(a) RATE REDUCTION.—Section 1 (relating to tax imposed) is amended to read as follows:

"SECTION 1. TAX IMPOSED.

"(a) MARRIED INDIVIDUALS FILING JOINT RETURNS AND SURVIVING SPOUSES.—There is hereby imposed on the taxable income of—

"(1) every married individual (as defined in section 143) who makes a single return jointly with his spouse under section 6013, and

"(2) every surviving spouse (as defined in section 2(a)),

a tax determined in accordance with the following table:

"If taxable income is:	The tax is:
Not over $3,600	No tax.
Over $3,600 but not over $5,600	12% of excess over $3,600.
Over $5,600 but not over $7,600	$240, plus 14% of excess over $5,600.
Over $7,600 but not over $11,600	$520, plus 17% of excess over $7,600.
Over $11,600 but not over $15,600	$1,200, plus 20% of excess over $11,600.
Over $15,600 but not over $20,000	$2,000, plus 23% of excess over $15,600.
Over $20,000 but not over $24,400	$3,012, plus 27% of excess over $20,000.
Over $24,400 but not over $29,700	$4,200, plus 29% of excess over $24,400.
Over $29,700 but not over $35,000	$5,737, plus 35% of excess over $29,700.
Over $35,000 but not over $45,600	$7,592, plus 41% of excess over $35,000.
Over $45,600 but not over $59,800	$11,938, plus 48% of excess over $45,600.
Over $59,800	$18,754, plus 50% of excess over $59,800.

"(b) HEADS OF HOUSEHOLDS.—There is hereby imposed on the taxable income of every individual who is the head of a household (as defined in section 2(b)) a tax determined in accordance with the following table:

"If taxable income is:	The tax is:
Not over $2,400	No tax.
Over $2,400 but not over $4,400	12% of excess over $2,400.
Over $4,400 but not over $6,400	$240, plus 14% of excess over $4,400.
Over $6,400 but not over $8,400	$520, plus 17% of excess over $6,400.
Over $8,400 but not over $11,400	$860, plus 21% of excess over $8,400
Over $11,400 but not over $14,600	$1,490, plus 23% of excess over $11,400.
Over $14,600 but not over $18,000	$2,226, plus 25% of excess over $14,600.
Over $18,000 but not over $23,300	$3,076, plus 30% of excess over $18,000.
Over $23,300 but not over $28,600	$4,666, plus 35% of excess over $23,300.
Over $28,600 but not over $33,900	$6,521, plus 40% of excess over $28,600.
Over $33,900 but not over $44,500	$8,641, plus 45% of excess over $33,900.
Over $44,500	$13,411, plus 50% of excess over $44,500.

"(c) UNMARRIED INDIVIDUALS (OTHER THAN SURVIVING SPOUSES AND HEADS OF HOUSEHOLDS).—There is hereby imposed on the taxable income of every individual (other than a surviving spouse as defined in section 2(a) or the head of a household as defined in section 2(b)) who is not a married individual (as defined in section 143) a tax determined in accordance with the following table:

If taxable income is:	The tax is:
Not over $2,400	No tax.
Over $2,400 but not over $3,400	12% of excess over $2,400.
Over $3,400 but not over $4,400	$120, plus 14% of excess over $3,400.
Over $4,400 but not over $6,400	$260, plus 17% of excess over $4,400.
Over $6,400 but not over $8,400	$600, plus 18% of excess over $6,400.
Over $8,400 but not over $10,400	$960, plus 20% of excess over $8,400.
Over $10,400 but not over $12,800	$1,360, plus 23% of excess over $10,400.
Over $12,800 but not over $14,900	$1,912, plus 25% of excess over $12,800.
Over $14,900 but not over $18,100	$2,437, plus 29% of excess over $14,900.
Over $18,100 but not over $23,400	$3,365, plus 32% of excess over $18,100.
Over $23,400 but not over $28,700	$5,061, plus 38% of excess over $23,400.
Over $28,700 but not over $34,000	$7,075, plus 43% of excess over $28,700.
Over $34,000 but not over $41,400	$9,354, plus 48% of excess over $34,000.
Over $41,400	$12,906, plus 50% of excess over $41,400.

"(d) MARRIED INDIVIDUALS FILING SEPARATE RETURNS.—There is hereby imposed on the taxable income of every married individual (as defined in section 143) who does not make a single return jointly with his spouse under section 6013 a tax determined in accordance with the following table:

If taxable income is:	The tax is:
Not over $1,800	No tax.
Over $1,800 but not over $2,800.	12% of excess over $1,800.
Over $2,800 but not over $3,800.	$120, plus 14% of excess over $2,800.
Over $3,800 but not over $5,800	$260, plus 17% of excess over $3,800.
Over $5,800 but not over $7,800.	$600, plus 20% of excess over $5,800.
Over $7,800 but not over $10,000.	$1,000, plus 23% of excess over $7,800.
Over $10,000 but not over $12,200.	$1,506, plus 27% of excess over $10,000.
Over $12,200 but not over $14,850.	$2,100, plus 29% of excess over $12,200.
Over $14,850 but not over $17,500.	$2,868, plus 35% of excess over $14,850.
Over $17,500 but not over $22,800.	$3,796, plus 41% of excess over $17,500.
Over $22,800 but not over $29,900.	$5,969, plus 48% of excess over $22,800.
Over $29,900	$9,377, plus 50% of excess over $29,900.

"(e) ESTATES AND TRUSTS.—There is hereby imposed on the taxable income of every estate and trust taxable under this subsection a tax determined in accordance with the following table:

"If taxable income is:	The tax is:
Not over $1,000	12% of taxable income.
Over $1,000 but not over $2,000.	$120, plus 14% of excess over $1,000.
Over $2,000 but not over $4,000.	$260, plus 17% of excess over $2,000.
Over $4,000 but not over $6,000.	$600, plus 20% of excess over $4,000.
Over $6,000 but not over $8,200.	$1,000, plus 23% of excess over $6,000.
Over $8,200 but not over $10,400.	$1,506, plus 27% of excess over $8,200.
Over $10,400 but not over $13,050.	$2,100, plus 29% of excess over $10,400.
Over $13,050 but not over $15,700.	$2,868, plus 35% of excess over $13,050.
Over $15,700 but not over $21,000.	$3,796, plus 41% of excess over $15,700.
Over $21,000 but not over $28,100.	$5,969, plus 48% of excess over $21,000.
Over $28,100	$9,377, plus 50% of excess over $28,100.".

(b) INCREASE IN ZERO BRACKET AMOUNT.—Subsection (d) of section 63 (defining zero bracket amount) is amended—

(1) by striking out "$3,400" and inserting in lieu thereof "$3,600",

(2) by striking out "$2,300" and inserting in lieu thereof "$2,400", and

(3) by striking out "$1,700" and inserting in lieu thereof "$1,800".

(c) FILING REQUIREMENTS.—Paragraph (1) of section 6012 (a) (relating to persons required to make returns of income) is amended—

(1) by striking out "$3,300" and inserting in lieu thereof "$3,500",

(2) by striking out "$4,400" and inserting in lieu thereof "$4,700", and

(3) by striking out "$5,400" and inserting in lieu thereof "$5,800".

(d) CONFORMING AMENDMENTS.—

(1) LUMP SUM DISTRIBUTIONS TAX.—Subparagraph (C) of section 402 (e) (1) (relating to tax on lump sum distributions) is amended by striking out "$2,300" and inserting in lieu thereof "$2,400".

(2) PERSONAL HOLDING COMPANY TAX.—Section 541 (relating to personal holding company tax) is amended by striking out "70 percent" and inserting in lieu thereof "50 percent (65 percent in the case of taxable years beginning in 1981)".

(e) WITHHOLDING AMENDMENTS.—

(1) WITHHOLDING TABLES.—Subsection (a) of section 3402 (relating to requirement of withholding) is amended by striking out the second sentence and inserting in lieu thereof the following new sentence: "With respect to wages paid after December 31, 1981, the tables so prescribed shall be the same as the tables prescribed under this subsection which were in effect on January 1, 1981, except that such tables shall be modified to the extent necessary to reflect the amendments made by section 102 of the Tax Reduction Act of 1980.".

(2) WITHHOLDING ALLOWANCES BASED ON ITEMIZED DEDUCTIONS.—Subparagraph (B) of section 3402 (m) (1) (relating to withholding allowances based on itemized deductions) is amended—

(A) by striking out "$3,400" and inserting in lieu thereof "$3,600", and

(B) by striking out "$2,300" and inserting in lieu thereof "$2,400".

(f) REPEAL OF MAXIMUM TAX.—

(1) IN GENERAL.—Part VI of subchapter Q of chapter 1 (relating to maximum rate on personal service income) is repealed.

(2) CONFORMING AMENDMENTS.—

(A) Paragraph (1) of section 3 (b) (relating to tax tables for individuals) is amended to read as follows:

"(1) an individual to whom section 1301 (relating to income averaging) applies for the taxable year,".

(B) Subsection (b) of section 1304 (relating to special rules for income averaging) is amended—

(i) by inserting "and" at the end of paragraph (1),

(ii) by striking out ", and" at the end of paragraph (2) and inserting in lieu thereof a period, and

(iii) by striking out paragraph (3).

(C) The table of parts for subchapter Q of chapter 1 is amended by striking out the item relating to part VI.

(g) EFFECTIVE DATES.—

(1) IN GENERAL.—The amendments made by subsections (a), (b), (c), (d), and (f) shall apply to taxable years beginning after December 31, 1981.

(2) WITHHOLDING AMENDMENTS.—The amendments made by subsection (c) shall apply to remuneration paid after December 31, 1981.

SEC. 103. PERSONAL EXEMPTIONS INCREASED TO $1,100.

(a) GENERAL RULE.—Section 151 (relating to allowance of deductions for personal exemptions) is amended by striking out "$1,000" each place it appears and inserting in lieu thereof "$1,100".

(b) FILING REQUIREMENTS.—

(1) Section 6012(a)(1)(B) (relating to persons required to file returns of income) is amended by striking out "$1,000" each place it appears and inserting in lieu thereof "$1,100".

(2) Subparagraph (A) of section 6013 (b)(3) (relating to assessment and collection in the case of certain returns of husband and wife) is amended by striking out "$1,000" and "$2,000" each place they appear and inserting in lieu thereof "$1,100" and "$2,200", respectively.

(c) WITHHOLDING REQUIREMENTS.—

(1) Paragraph (1) of section 3402(b) (relating to percentage method of withholding income tax at source) is amended by striking out the table and inserting in lieu thereof the following:

"PERCENTAGE METHOD WITHHOLDING TABLE

"Payroll period	Amount of 1 withholding exemption
Weekly	$21.15
Biweekly	42.31
Semimonthly	45.83
Monthly	91.67
Quarterly	275.00
Semiannual	550.00
Annual	1,100.00
Daily or miscellaneous (per day of such period)	3.01"

(2) Paragraph (1) of section 3402(m) (relating to withholding allowances based on itemized deductions) is amended by striking out "$1,000" and inserting in lieu thereof "$1,100".

(d) EFFECTIVE DATES.—

(1) IN GENERAL.—The amendments made by subsections (a) and (b) shall apply to taxable years beginning after December 31, 1980.

(2) WITHHOLDING AMENDMENTS. — The amendments made by subsection (c) shall apply with respect to remuneration paid after December 31, 1981.

SEC. 104. INCREASE IN THE EARNED INCOME TAX CREDIT.

(a) INCREASE IN CREDIT.—Subsection (a) of section 43 (relating to earned income credit) is amended by striking out "10 percent" and inserting in lieu thereof "11 percent".

(b) REVISION OF LIMITATION.—Subsection (b) of section 43 (relating to limitation) is amended to read as follows:

"(b) LIMITATION.—The amount of the credit allowable to a taxpayer under subsection (a) for any taxable year shall not exceed the excess (if any) of—

"(1) $550, over

"(2) 13.75 percent of so much of the adjusted gross income (or, if greater, the earned income) of the taxpayer for the taxable year as exceeds $7,000.".

(c) CONFORMING AMENDMENTS.—

(1) Subsection (f)(2) of section 43 is amended—

(A) by striking out "$10,000" each place it appears and inserting in lieu thereof "$11,000", and

(B) by striking out "$6,000" and inserting in lieu thereof "$7,000".

(2) Paragraph (2) of section 3507(c) (relating to earned income advance amount tables) is amended—

(A) by striking out "10 percent" each place it appears and inserting in lieu thereof "11 percent",

(B) by striking out "$6,000 and $10,000" and inserting in lieu thereof "$7,000 and $11,000", and

(C) by striking out "$3,000 and $5,000" and inserting in lieu thereof "$3,500 and $5,500".

(d) EFFECTIVE DATES.—

(1) IN GENERAL.—Except as provided in paragraph (2), the amendments made by this section shall apply to taxable years beginning after December 31, 1981.

(2) AMENDMENTS OF SECTION 3507.—The amendments made by subsection (c)(2) shall apply to remuneration paid after December 31, 1981.

SEC. 105. DEDUCTION FOR TWO-EARNER MARRIED COUPLES.

(a) IN GENERAL.—Part VII of subchapter B of chapter 1 (relating to additional itemized deductions for individuals) is amended by redesignating section 221 as section 222 and by inserting after section 220 the following new section:

"SEC. 221. DEDUCTION FOR TWO-EARNER MARRIED COUPLES.

"(a) IN GENERAL.—In the case of a joint return under section 6013 for the taxable year, there shall be allowed as a deduction an amount equal to 10 percent of the lesser of—

"(1) $40,000, or

"(2) the qualified married earner amount.

"(b) DEFINITION OF QUALIFIED MARRIED EARNER AMOUNT.—For purposes of this section—

"(1) IN GENERAL.—The term 'qualified married earner amount' means an amount equal to the qualified earned income of the spouse with the lower qualified earned income for the taxable year.

"(2) QUALIFIED EARNED INCOME.—For purposes of paragraph (1), the term 'qualified earned income' means an amount equal to the excess of—

"(A) the earned income of the spouse for the taxable year, over

"(B) an amount equal to the sum of the deductions described in paragraph (1), (2), (7), (9), or (10) of section 62 to the extent such deductions are properly allocable to or chargeable against earned income described in subparagraph (A).

The amount of qualified earned income shall be determined without regard to any community property laws.

"(3) EARNED INCOME.—For purposes of paragraph (2), the term 'earned income' means income which is earned income within the meaning of section 401(c)(2)(C) or 911(b), except that—

"(A) such term shall not include any amount—

"(i) not includible in gross income,

"(ii) received as a pension or annuity,

"(iii) paid or distributed out of an individual retirement plan (within the meaning of section 7701(a)(37)),

"(iv) received as deferred compensation, or

"(v) received for services performed by an individual in the employ of his spouse (within the meaning of section 3121(b)(3)(A)), and

"(B) section 911(b) shall be applied without regard to the phrase ', not in excess of 30 percent of his share of net profits of such trade or business,'.

"(c) DEDUCTION DISALLOWED FOR INDIVIDUAL CLAIMING BENEFITS OF SECTION 911, 913, or 931.—No deduction shall be allowed under this section for any taxable year if either spouse claims the benefits of section 911, 913, or 931 for such taxable year.".

(b) DEDUCTION ALLOWED IN COMPUTING ADJUSTED GROSS INCOME.—Section 62 (defining adjusted gross income) is amended by inserting after paragraph (14) the following new paragraph:

"(17) DEDUCTION FOR TWO-EARNER MARRIED COUPLES.—The deduction allowed by section 221.".

(c) CONFORMING AMENDMENT TO WITHHOLDING.—Subparagraph (A) of section 3402(m)(2) (defining estimated itemized deductions) is amended by striking out "other than paragraphs (13) thereof" and inserting in lieu thereof "other than paragraphs (13) and (17) thereof".

(d) OTHER CONFORMING AMENDMENTS.—

(1) Subsection (a) of section 85 (relating to unemployment compensation) is amended by striking out "and without regard to section 105(d)" and inserting in lieu thereof ", section 105(d), and section 221".

(2) Subsection (d)(3) of section 105 (relating to amounts received under accident and health plans) is amended by inserting "and section 221" after "subsection" the first place it appears.

(3) The table of sections for such part VII is amended by striking out the item relating to section 221 and inserting in lieu thereof the following new items:

"221. Deduction for two-earner married couples.

"222. Cross references.".

(e) EFFECTIVE DATES.—

(1) IN GENERAL.—Except as provided in paragraph (2), the amendments made by this section shall apply to taxable years beginning after December 31, 1981.

(2) WITHHOLDING.—The amendment made by subsection (c) shall apply to remuneration paid after December 31, 1981.

SEC. 106. APPLICATION OF CERTAIN CHANGES IN THE CASE OF FISCAL YEAR TAXPAYERS.

Section 21 (relating to effects of changes in rate of tax) is amended by adding at the end thereof the following new subsection:

"(g) CHANGES MADE BY TAX REDUCTION ACT OF 1981.—In applying subsection (a) to a taxable year which is not a calendar year, the amendments made by sections 101, 102, and 103 of the Tax Reduction Act of 1981 (and no other amendments made by such Act) shall be treated as a change in a rate of tax.".

TITLE II—CORPORATE INCOME TAXES

Subtitle A—Cost Recovery Provisions

SEC. 201. FIRST-YEAR CAPITAL COST RECOVERY METHOD.

(a) IN GENERAL.—Part IV of subchapter B of chapter 1 (relating to itemized deductions for individuals and corporations) is amended by inserting after section 167 the following new section:

"SEC. 168. FIRST-YEAR CAPITAL COST RECOVERY METHOD.

"(a) ALLOWANCE OF DEDUCTION.—There shall be allowed as a deduction an amount equal to the aggregate of the applicable percentage of the basis of each first-year recovery property placed in service by the taxpayer during the taxable year.

"(b) CLASS AND APPLICABLE PERCENTAGE.—

"(1) IN GENERAL.—All first-year recovery property—

"(A) shall be placed in one of the four classes set forth in the following table, and

"(B) shall have the applicable percentage set forth for such class in the following table:

"Class	Applicable percentage:
1	98.5
2	97.3
3	94.8
4	92.7

"(2) ASSIGNMENT TO CLASSES.—The Secretary shall prescribe a table which sets forth the types of assets which fall into each of the 4 classes.

"(3) INITIAL ASSIGNMENT OF PROPERTY TO CLASS.—

"(A) IN GENERAL.—For purposes of this section—

"FIRST-YEAR RECOVERY PROPERTY WITH PRESENT CLASS LIFE (IN YEARS)	Shall be placed in class:
Less than 4	1
4 or more but less than 8.5	2
8.5 or more but less than 14.5	3
14.5 or more	4

"(B) PRESENT CLASS LIFE.—For purposes of this paragraph, the present class life of any property is the class life (if any) which would be applicable to such property as of May 1, 1981, under section 167(m) (determined without regard to any regulation, ruling, or announcement published by the Secretary after such date).

"(4) ASSIGNMENT TO DIFFERENT CLASS.—The Secretary may assign any property to a different class if the Secretary determines that as a result of such assignment the yearly declines (in constant dollars) in the value of the property will be more accurately reflected (relative to such declines for other property).

"(5) PROPERTY FOR WHICH THERE IS NO CLASS LIFE.—If a present class life cannot be determined under paragraph (3)(B) with respect to any property, the Secretary shall assign such property to a class in a manner consistent with paragraph (4).

"(c) FIRST-YEAR RECOVERY PROPERTY DEFINED.—Except as otherwise provided in this section, for purposes of this title, the term 'first-year recovery property' means tangible property—

"(1) which is of a character subject to the allowance of depreciation,

"(2) which is—

"(A) personal property, or

"(B) other property (not including a building and its structural components) but only so long as it meets the requirements of clause (i), (ii), or (iii) of section 1245(a)(3)(B), and

"(3) which is placed in service by the taxpayer after December 31, 1980.

"(d) CERTAIN PROPERTY EXCLUDED FROM

DEFINITION OF FIRST-YEAR RECOVERY PROPERTY.—For purposes of this section—

"(1) PROPERTY USED PREDOMINANTLY OUTSIDE THE UNITED STATES.—The term 'first-year recovery property' does not include property which, during the taxable year, is used predominantly outside the United States (within the meaning of paragraph (2) of section 48(a)).

"(2) CERTAIN LIVESTOCK.—The term 'first-year recovery property' does not include livestock (within the meaning of section 1231 (b)(3) without regard to the period for which such livestock has been held by the taxpayer) other than items of livestock which the taxpayer elects to treat as first-year recovery property.

"(3) CERTAIN METHODS OF DEPRECIATION.—The term 'first-year recovery property' does not include—

"(A) property if—

"(i) the taxpayer elects to exclude such property from the application of this section, and

"(ii) for the first taxable year for which a deduction would (but for such election) be allowable under this section with respect to such property, the property is depreciated under the unit-of-production method or any other method of depreciation not expressed in a term of years,

"(B) property which is a leasehold improvement which is depreciated or amortized over the term of the lease, or

"(C) property which is depreciated under the retirement-replacement-betterment method.

"(4) AMORIZATION PROPERTY.—The term 'first-year recovery property' does not include property with respect to which the taxpayer—

"(A) is entitled to elect amortization (in lieu of depreciation), and

"(B) elects such amortization.

"(5) PUBLIC UTILITY.—The term 'first-year recovery property' does not include—

"(A) any public utility property with a present class life of more than 18 years, and

"(B) any public utility property with a present class life of 18 years or less unless the taxpayer uses a normalization method of accounting (within the meaning of section 167 (1)(3)(G)) with respect to such property.

For purposes of the preceding sentence, the present class life of any property shall be determined under rules similar to the rules of paragraphs (3)(B), (4), and (5) of subsection (b).

"(6) OIL OR GAS FIRED BOILERS.—The term 'first-year recovery property' does not include any boiler described in section 167(b).

"(7) NONCORPORATE LESSORS.—In the case of a person other than a corporation, the term, 'first-year recovery property' includes property with respect to which such person is the lessor only if subparagraph (A) or (B) of the first sentence of section 46(e)(3) is met with respect to such property.

"(e) SPECIAL RULES FOR DISPOSITIONS OF FIRST-YEAR RECOVERY PROPERTY.—For purposes of this title (other than this section)—

"(1) ZERO BASIS.—The adjusted basis of any first-year recovery property shall be zero.

"(2) DISPOSITIONS.—In the case of any disposition of first-year recovery property—

"(A) the applicable percentage (determined under subsection (b)) of—

"(i) the amount realized, or

"(ii) in the case of a disposition other than a sale, exchange, or involuntary conversion, the fair market value of such property,
